#### **ABSTRACT**

One of a series designed to help Florida school districts provide special programs for exceptional children, the manual presents a training guide on interagency coordination for profoundly mentally handicapped students. Instructions are provided for conducting group sessions and extensive examples of handouts are furnished. Objectives are listed and procedures detailed for each of four modules covering the following topics (sample subtopics in parentheses): participation in service planning (use of different terms to refer to the target population, organization of state and local education agencies, need for joint planning and service delivery); statutes, rules, and regulations affecting service planning (state and federal requirements for sevice plans and reviews, legal terms); documents used for service planning (planning processes for Individual Educational Programs and habilitation plans, relationships among different service plans); and methods for cooperative planning (alternative methods of cooperative planning, their advantages and disadvantages). Each module also includes questions to ask, aspects to explain, and self-check exercises. (CL)

A Training Program About Coordinating Service Plans for Profoundly Mentally Handicapped Students

#### ACKNOWLEDGEMENTS

This PARINERS IN PLANNING trainer's guide is one in a series of publications developed to help Florida school districts provide special programs for exceptional students. It was developed by the Interagency Development Project, Leon County Public Schools under the guidance of:

Charles H. Couch Superintendent of Schools

Robert M. Connors Director, Exceptional Student Education

Lynda Roser Coordinator, Exceptional Student Education

Linda F. Laugen, Project Director Interagency Development Project

During the field survey conducted in the first year of the Interagency Development Project, 52 school district and HRS personnel responded to written questionnaires, 23 exceptional student education administrators answered questions through telephone surveys, and 83 individuals were interviewed. A 14-member advisory committee was also established to oversee project activities and materials production. The Interagency Development Project recognizes the contributions of these professionals, without which this trainer's guide could not have been developed. Appreciation is expressed to these individuals for their willingness to provide constructive content suggestions for the PARTNERS IN PLANNING training materials and for the companion publication, A Resource Manual for the Development and Evaluation of Special Programs for Exceptional Students, Vol. III-J, Interagency Service Plans for the Profoundly Mentally Handicapped.

#### INTRODUCTION

This trainer's guide was developed and written by the Interagency Development Project, a Title VI-B project awarded to the Leon County School Board by the Florida Department of Education, Bureau of Education for Exceptional students. The funding period for the grant began July 1, 1981 and ended June 30, 1983. The project had three major goals for the two-year grant period: first, to study interagency coordination of service plans for school-aged profoundly mentally handicapped (PMH) students in Florida; second, to identify practices for agency coordination; and third, to develop a resource manual and complementary training materials for Florida educators interested in improving interagency coordination of service plans for PMH students.

The resource manual, entitled A Resource Manual for the Development and Evaluation of Special Programs for Exceptional Students, Vol. III-I: Interagency Service Plans for the Profoundly Mentally Hardicapped, and the two publications that make up the PARTNERS IN PLANNING training materials (this trainer's guide and the participant's manual) have been developed to better acquaint personnel of public schools and the Department of Health and Rehabilitative Services (HRS) with the statutes, rules, and regulations on which service plans are based. All three publications describe the service plans used by local school districts and HRS and suggest ways in which local agencies may coordinate the development and implementation of these documents. Using different formats, the resource manual and training materials provide information on the agencies that serve PMH students, the legal bases for service plans, service plan documents, and methods for coordinating planning. The resource manual and the PARTNERS IN PLANNING training materials may be used independently or in conjunction for group training.

#### Use of this trainer's guide

The information in this trainer's guide is intended for the use of group leaders who want to provide training on the development of interagency service plans to personnel of public schools, HRS, and other community agencies. School district superintendents, exceptional student education administrators and supervisors, school principals, teachers, and other public school personnel involved in coordinating educational services with HRS can benefit from group training that addresses the development and coordination of interagency service plans. The information in the resource manual, this trainer's guide, and the PARTNERS IN PLANNING participant's manual can also help HRS personnel understand the procedures local school districts use to provide educational services. The statutory bases for service planning and the alternatives for coordination should suggest ways in which both agencies might adjust local policies and procedures to encourage and enhance cooperative efforts.

The PARINERS IN PLANNING participant's manual contains a complete set of materials for self-paced study. This trainer's guide provides instructions on how to conduct a group session. In making their presentations, group leaders should use these notes along with the transparencies, handouts, case studies, and answer keys found in the appendixes of this guide. Before their presentations, trainers should also study the information provided in the participant's manual for PARINERS IN PLANNING and prepare answers for each of

the questions suggested in this guide. Supplementary information can be found in the companion publication already mentioned, A Resource Manual for the Development and Evaluation of Special Programs for Exceptional Students, Vol. III-J: Interagency Service Plans for the Profoundly Mentally Handicapped.

students

DISTRIBUTE
Handout 1: Questions

WAIT, while participants read

#### EXPLAIN:

- 1. The title PARTNERS IN PLANNING was chosen to express the legal and practical responsibilities of local school systems and the Department of Health and Rehabilitative services (HRS) in planning educational services for Profoundly Mentally Handicapped (PMH) students.
- 2. HRS and public school service plans go by different names, are affected by different laws, and have different purposes.
- pMH students are referred to by different names, depending on the agency.
- 4. PARTNERS IN PLANNING is the product of cooperation between the DOE, HRS, and the Leon County School District. Teachers, trainers, administrators, therapists, social workers, parents, private consultants, and many others contributed information and expertise to this project.
- 5. PMH students include the full range of schoolaged children and youth from age 5 through 18.
- 6. These students come from different ethnic and social backgrounds and live in a variety of environments.
- 7. The roles played by local school districts and HRS in planning services for these students are defined in a complex set of laws, regulations, and rules.

#### EXPLAIN:

- 1. The major objectives of this training will answer the questions in Handout 1. Answers to these questions will clarify the process and methods that school and HRS districts can use to develop interagency service plans.
- 2. Participants are to use Handout 1 as their own checklist for finding answers as they work through the PARINERS IN PLANNING program.

OBJECTIVE 1: Recognize which students are classified as profoundly mentally handicapped (PMH).

#### EXCLVIN:

The first module concentrates on participants in the planning of services for PMH students.

#### ASK:

WRITE answers on board, flip chart, or transparency as they are given

- 1. What are the characteristics of PMH students?
- 2. For educational purposes, what other categories are mentally handicapped students divided into?
- 3. What must Florida's local school districts provide for all mentally handicapped students?

OBJECTIVE 2: Recognize which students receive services from local school districts and HRS.

#### EXPLAIN:

1. Fforida law requires that all school districts provide special educational programs for exceptional students from age 5 through age 18.

The law [S. 228.041] and State Board of Education Rule [6A-6.30] include the following in the exceptional student category:

- --mentally handicapped
- --speech and language impaired
- --hearing impaired
- --visually impaired
- --physically impaired
- --emotionally handicapped
- --specific learning disabled
- --gifted

#### ASK:

- Which PMH students receive services from local school districts and HRS?
- 2. Ask other questions to prompt the correct answers, such as "Which age group?" and "Why do these students qualify for HRS services?" If participants don't give the correct answers, simply write down and explain each answer.

write answers on board, flip chart, or transparency, as they are given

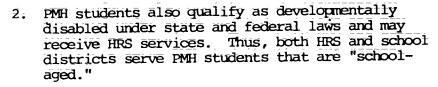

4

:

#### EXPLAIN:

1. School districts must serve exceptional students that are school-aged (between the ages of 5 and 18). Florida law [S. 232.01, F.S.] also permits school districts to extend their programs to students beyond the mandated ages to include students below age 5 and above age 18. Thus the exact ages of students in the "school-aged" category vary from school district to school district.

DISPLAY
Transparency 3: Chart
of age categories

WRITE

HRS

list of terms used by

school districts and

OBJECTIVE 3: Recognize the different terms agencies use to refer to PMH students.

#### ASK:

- 1. What are some of the terms you have heard used to describe PMH students?
- Ask other prompting questions to get answers from the group. If answers are not volunteered, give and explain each answer.
- 3. Which terms are generally used by local school districts and the DOE? by HRS?

#### EXPLAIN:

- Different terminology tends to come from state and federal laws, regulations, and rules.
- 2. School districts use these terms:
  - -- Exceptional student
  - -- Profoundly mentally handicapped
  - -- Profoundly handicapped (PH)
- 3. HRS uses these terms:
  - --Developmentally disabled
  - --Mentally retarded
  - -- Profoundly mentally retarded
  - -- Developmental Services Client

-5-

OBJECTIVE 4: Recognize the different home environments of PMH students.

#### EXPLAIN:

Local school districts serve PMH students who come from various types of home environments.

#### ASK:

WRITE
different home
environments as they
are listed

1. What different types of home environments do PMH students come from? If participants do not name all of the possible home environments, complete the list and explain why these environments must also be included (See pages 9-11 of the participant's manual).

#### EXPLAIN:

- 1. The different types of HRS residential facilities where PMH students may live (Emphasize the special construction of cluster ICF/MRS).
- 2. PMH students from Tallahassee and Orlando Sunland Centers are gradually being transferred to cluster ICF/MRs all over Florida. This type of residential facility will play an increasing role in the lives of PMH students.

#### ASK:

- 1. What types of residential facilities for PMH students does your school district have?
- Does your district have one or more cluster facilities? Are any planned for your district?

OBJECTIVE 5: Recognize the different types of service plans for PMH students.

#### EXPLAIN:

Both HRS and local school districts may serve schoolaged PMH students, but they use different service plans. These plans have different names and different purposes.

#### ASK:

1. Whatever name we give a service plan, how would you describe one? (open discussion)

-6-

2. What makes a service plan individualized? (continue discussion)

WRITE names of service plans as they are mentioned 3. What is the name of the public school service plan? HRS service plan? (If names are not volunteered, write Individual Educational Program (HEP) and habilitation (hab) plan.)

#### EXPLAIN:

1. Definition of IEP and hab plan.

WRITE
"Implementation Plan"
by IEP and "Active
Treatment Plan" by hab
plan"

2. Implementation plans and Active Treatment Plans (ATPS) and how they are used.

OBJECTIVE 6: Recognize how local school systems, the DOE, and HRS are organized to meet the needs of PMH students.

#### WRITE local school district

#### EXPLAIN:

Local school districts are organized in different ways and these organizations affect the way IEPS and programs for PMH students are developed and implemented.

#### ASK:

WRITE participant responses 1. What are some ways that school districts may make decisions about programs for PMH students? (open discussion). If participants do not specifically name "school-based"; "central office-based," or "shared decision making," list these and explain the characteristics of each.

WRITE "DOE"

Who provides technical assistance for PMH students at the state level?

WRITE "BEES"

- 3. What does "BEES" stand for?
- 4. What does "BEES" do?

#### EXPLAIN:

- 1. BEES is an acronym for the Bureau of Education for Exceptional students.
- 2. BEES provides leadership for the development and evaluation of special programs for exceptional students.

#### WRITE

- -- Program' Development
- --Program Review and Evaluation
- -- Program Services
- --Resource Management
- 3. REES has 4 sections: Program Development; Program Review and Evaluation; Program Services; and Resource Management. (See page 7 of the resource manual or page 14 of the participant's manual for a description of sections and responsibilities.)
- 4. The responsibilities of each section.
- 5. The role of FDLRS (Florida Diagnostic and Learning Resources System).
- 6. Local school districts must submit their district procedures for serving exceptional students to BEES each year.

#### ASK:

- 1. How does your school district serve PMH students? (open discussion)
- 2. How many PMH students do you have in your school?
- 3. Where do these students live?
- 4. Which of the three basic management systems does your school district use to develop IEPs for PMH students?
- 5. Who is most responsible for-
  - a. identifying exceptional students?
  - b. developing appropriate programs?
  - c. developing procedures for exceptional student education?
  - d. creating district policy for exceptional student education?
- 6. Have you read all or part of your district procedures document for exceptional student education? Where would you find a copy?
- 7. Who prepares this document for your school district?
- 8. In your district, which terms are used to refer to PMH students? Do different agencies use different terms?

#### EXPLAIN:

1. The Developmental Services Program within HRS is

WRITE HRS Developmental Services

DISTRIBUTE Handout 2: Services provided by Developmental Services

WAIT while participants read

WRITE Social worker/case manager

WRITE
Other service programs:
--Children's Medical
Services (QMS)
--Economic Services

--Medicaid Services

responsible for coordinating services to children and adults who are developmentally disabled.

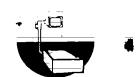

- 2. Just as BEES serves other exceptional students in addition to PMH students, HRS' Developmental Services Program also serves people who have disabilities other than retardation—such as cerebral palsy and epilepsy.
- 3. Our primary interest is in those Developmental Services clients who are also students in our classrooms.
- 4. Developmental services offers a number of different services to qualified clients. Notice the items marked with arrows. PMH students are most likely to receive these services.
- 5. The services that a Developmental Services client is qualified to receive will be listed on the client's hab plan. After the hab plan is developed, a Developmental Services social worker becomes that client's case manager and is responsible for seeing that needed services are provided. Developmental Services calls this process its Case Management System.
- 6. Developmental Services is just one of 10 service programs that HRS provides for eligible clients. Three other HRS programs that may serve PMH students are Children's Medical Services (CMS), Economic Services, and Medicaid Services.

#### ASK:

- 1. How many PMH students in your school are clients of Developmental Services?
- 2. What other HRS services do these students receive?
- 3. How do these services support and reinforce what PMH students are learning in school?
- 4. Which HRS services do you think help the educational growth of your PMH students? Why? (Go over HRS services listed on handout 2).
- 5. How does your school's educational program for PMH students support and reinforce services they receive from HRS?

DISPLAY
Transparency 4: Holistic
vs. Fragmented

DISPLAY
Transparency 5: Chart of coordination needs

6. What are the names of the HRS social workers assigned to the PMH students who are also clients of Developmental Services?

OBJECTIVE 7: Recognize the need for joint planning and delivery of services to PMH students:

#### EXPLAIN:

local school districts and HRS deliver services to many of the same children and youth. Both systems encourage the holistic development of these individuals. Because of differences in agency responsibilities, however, development is often fragmented.

#### ASK:

- 1. When do the services of PMH students need to be coordinated? (Point out age groups and agency responsibilities on transparency 5.)
- 2. Can coordinating the services of local school districts and HRS make a real difference in the lives of PMH students? (open discussion)

#### READ:

The text of case study 1, "Andrew." (see appendix C)

#### ASK:

- 1. Were services for Andrew totally coordinated partially coordinated, or uncoordinated? (open discussion)
- 2. What probable effect did this have on Andrew's development?
- 3. How might Andrew's situation have been improved?

#### SELF-CHECK EXERCISE

#### EXPLAIN:

The self check exercise is for you to keep for your own review of Module 1, but we will go over the answers as a group.

#### ASK:

- 1. each question aloud
- 2. prompting questions to get the answers that appear in the answer key for Module 1 (see appendix D).

OBJECTIVE 1:

Recognize differences in the organizational structures of local school districts and HRS districts.

#### EXPLAIN:

Module 2 concentrates on the legal and agency requirements that affect service planning for PMH students. First, however, we will examine some differences in the organizational structures of local school districts and HRS districts. Finally, we will look at some of the things school and HRS personnel can do to coordinate services and still meet all of their legal obligations.

#### ASK:

- 1. What is the difference in the geographic structure of school and HRS districts?
- 2. How many HRS districts are there?
- 3. Which HRS district serves the most school districts? The least?
- 4. Which HRS district serves your school district?
- 5. How many other school districts does this HRS district serve?
- 6. Where is the headquarters for this HRS district?
- 7. When an HRS district serves a large number of school districts, what coordination problems might you expect? (open discussion)

#### EXPLAIN:

1. For local school districts, the school board generally determines policy and procedures.

Teachers report to principals of individual schools, who report to the superintendent and the school board. The school board ensures that the school district is complying with State Board of Education rules.

DISPLAY
Transparency 6: Map
of Florida indicating
HRS and school districts

WRITE School Districts:

--Superintendent

--Local School Board

-DOE (legal requirements)

WRITE
HRS Districts:
—District Staff

—Direct Services Supervisors

—Program Coordinator

—District administrator

—Assistant Secretary
for HRS
—HRS Secretary

Governor

2. HRS districts are part of a more centralized system, with the headquarters in Tallahassee determining much of the policy for the 11 HRS districts. District staff members report to Direct Services Supervisors or Program Supervisors. Program Supervisors report to the Program Coordinator or the District Administrator. The District Administrator reports to the Assistant Secretary of HRS, who reports to the Secretary. The HRS Secretary reports to the Governor.

3. Our laws created these separate organizational structures, and these structures tend to support separate communication patterns.

OBJECTIVE 2: Recognize state and federal requirements for service plans and service plan reviews.

#### EXPLAIN:

- 1. Federal laws and regulations may lead to the creation or revision of state laws and rules. State laws and rules are also developed without federal laws and regulations as a basis. When new federal laws affect state laws, our legislature may amend our statutes to comply with the new federal requirements.
- When we talk about services for PMH students, we must consider all of the state and federal laws, rules, and regulations for:
  - -- the education of handicapped students
  - --services to the developmentally disabled
  - --HRS residential facilities
  - --Client services in ICF/MRs

WRITE

- -- Education of handicapped students
- --Services to the
- developmentally disabled -- HRS residential
- --HRS residentiai fācilities
- -Client services in ICF/MRs

#### WRITE

P:L. = Public Law

F.S. = Florida Statutes

Regulations

FAC = Florida

Administrative

Code

SBER = State Board of

Education Rule

S. = Section of state

law

§ = Section of federal

law

3. Different abbreviations are used for different laws, rules, and regulations. Here are some you need to know:

--P.L. = Public law

-F.S. = Florida Statutes

--CFR = Code of Federal Regulations

--FAC = Florida Administrative Code

-- SBER = State Board of Education Rule

--- = Section of state law

==\$ = Section of federal law

These abbreviations will often be used as we refer to the various legal bases for service plans and service plan reviews.

#### ASK:

WAIT for participant responses and then WRITE

P.L. 94-142

WAIT for participant responses and then WRITE

P.L. 95-602

1. Which federal law requires that school systems develop IEPs?

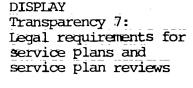

2. Which federal law requires that HRS develop habilitation plans?

#### EXPLAIN:

- 1. Federal regulations also require that residents of ICF/MRs have a "written plan of care."
- 2. State and federal laws require that certain people attend service plan meetings and that the plans be reviewed periodically.

#### ASK:

- 1. Other questions to elicit information displayed on Transparency 7, such as "Who is legally required to attend a hab plan meeting?"
- Which requirements are similar for school districts, HRS, and ICF/MRS?
- 3. Which requirements are different? From this

DISPLAY
Transparency 8: Legal
requirements for
service plan contents

small sample, which agency would you guess has the most requirements?

#### EXPLAIN:

- 1. State and federal laws, rules, and regulations also indicate what each service plan must contain.
- 2. Required contents of IEPs, hab plans, and Individual Plans of Care (Point out elements on Transparency 8)

#### ASK:

- 1. What do all three plans have to have?
  - 2. Which plan must use a standard format?
- 3. Which plan is concerned with the residential environment of the individual?
- 4. Other questions to prompt identification of service plan contents.

#### EXPLAIN:

- 1. School districts and HRS Developmental Services both use one service plan, but ICF/MRs use two: the Developmental Services hab plan and an Active Treatment Plan (ATP).
- 2. Both the IEP and the ATP relate to the hab plan, but in different ways:
  - a) The IEP shows educational and related services. A had plan lists all services a Developmental Services then should received.

    Because public schools, not HRS, provide ed ucational services, HRS personnel must know what is in an IEP to indicate the educational goals and services on the hab plan.
  - b) The ATP relates to the hab plan much like the public school implementation plan to the IEP. It is used in ICF/MRs to prescribe the methods staff will use to meet the annual goals listed on the client's hab plan.

DISPLAY
Transparency 9:
Relationship of service
plans

#### ASK:

- Do all PMH students have an ATP?
- 2. Do all PMH students who live in an ICF/MR have a hab plan?
- 3. Which service plans would PMH students living in group or foster homes have?
- 4. How many PMH students in your school have hab plans? ATPS?
- 5. How would you expect goals for "education," habilitation," and "active treatment" to be (a) similar and interactive? (b) different and conflacting? (open discussion)

#### EXPLAIN:

There are federal and state regulations for the licensure and certification of ICF/MRs. Chapter 10D-38 of the Fiorida Administrative Code sets the requirements for ICF/MRs operating in Florida. This rule interprets federal regulations for ICF/MRs. HRS contracts with ICF/MRs for residential services and encourages the use of these facilities for HRS clients:

Recognize legal terms found in state and federal laws, rules, and regulations related to services for PMH students.

#### EXPLAIN:

To work together, school and HRS personnel need to have a clear understanding of the legal and agency terms both use in discussing services to students and clients. Keep this list of the most common terms and add any others that you learn during this training.

#### ASK:

1. Which terms are used by school personnel? by HRS? by ICF/MRs?

WRITE Chapter 10D-38, FAC--ICF/MR regulations for Florida

DISTRIBUTE
Handout 4:
Glossary of terms
WAIT
While participants

read

- Have participants indicate in the margin of their handout, SD (for school district), HRS, or ICF/MR for the agency using the term.
- Other questions designed to encourage study of the definitions, such as, "Which other disorders are included in the category of 'developmentally disabled'?"

Recognize possiblities for agency OBJECTIVE 4: coordination of service plans and service plan reviews.

#### EXPLAIN:

- So far, this module has shown that school districts and HRS districts--
  - -are organized in different ways --have different responsibilities
    - --use different terms when referring to services for the same individuals
    - --respond to different laws, rules, and regulalations

#### ASK:

Considering these factors, would you expect services for PMH students to be harmonious, conflicting, or unrelated? (open discussion and write examples participants give under each term)

#### EXPLAIN:

To help us determine what is allowed, we need to compare requirements for such things as service plan reviews, participants, reevaluations, written reports, and contents of service plans and see where any conflicts occur.

headings: --harmonious --conflicting

WRITE as column

--unrelated

#### WRITE

- --contents
- --review
- --participants
- --reevaluation
- --participation by personnel outside the agency

#### DISPLAY

Transparencies 10 and 10A: Legal requirements for service plans and service plan reviews

#### ASK: .

1. Which of the legal requirements on this chart are - the same?

- 2. Which would cause conflicts?
- 3. According to this chart, what could school districts and HRS districts do to give more continuity to service planning for PMH students?
- 4. Ask other probing questions that require participants to think about coordination possibilities, such as "Do the laws allow personnel outside an agency to participate in annual reviews?"

#### EXPLAIN:

Many possibilities for improving service planning exist.

#### READ ALOUD:

Options listed on Transparency 11.

#### ASK:

1. How many of these options are feasible in your school district? (allow participants to express views on the options and their feasibility for their situation.)

#### EXPLAIN:

The most important pay-off of the coordination of service plans is for each PMH student.

#### READ:

The text of case study 2, "Jeremy." (see appendix C)

#### ASK:

- 1. In Jeremy's case, why was coordination so important?
- 2. What things could have gone wrong if Jeremy's services had not been coordinated?
- 3. Which of the coordination procedures were legally required?
- 4. Which of the coordination procedures would you agree to? (open discussion)

-18-

Self-check

The self check exercise if for you to keep for your will go over the answers as a group.

1. each question aloud

2. prompting questions to get the answers that appear in the answer key for Module 2. (see appendix D)

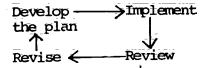

OBJECTIVE 1: Recognize the planning processes for IEPs and hap plans.

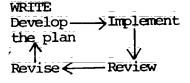

#### EXPLAIN:

- 1. Module 3 presents in more detail the components of IEPs, hab plans, and ATPs. It also summarizes the planning process for IEPs and hab plans and points out differences in the number of service plan reviews and the scheduling of these reviews.
- 2. Although IEPs and hab plans are used for different purposes by different agencies, the procedures each agency used follow the same cycle.

#### ASK:

- If planning is the first step in developing a service plan, what is the next step?
- Continue to ask questions about each step until participants have identafied this 4-step process:

#### EXPLAIN:

Because different agencies carry out these procedures and follow different regulations, the exact processes used and schedules for these procedures may be different. The cycle, however, is the same.

WRITE as column headings: IEP, HRS hab plan, ICF/MR hab plan

WRITE under IEP:

WRITE under HRS hab

plan: annually, semi-

OBJECTIVE 2: Recognize differences in the number of required service plan reviews.

#### ASK:

- Do you remember the different requirements for service plan reviews?
- 2. How often does an IEP have to be reviewed?
- 3. How often does an HRS hab plan have to be reviewed?
- 4. How often does an ICF/MR hab plan have to be reviewed?

### WRITE under ICF/MR hab plan: annually, quarterly,

monthly

annually

annually

#### EXPLAIN:

 In addition to these differences, there are differences in the ways that these reviews are scheduled. IEP reviews may be scheduled any time during the calendar year or at the anniversary date of the IEP. Whatever the date of the review, an IEP must be in effect at the beginning of the school year.

#### ASK:

- 1. When are IEP reviews conducted in your school?
- 2. Who usually participates in these reviews?
- 3. What arrangements are made to prepare for these meetings?

#### EXPLAIN:

wRfTE in hab plan
column: annual review—
anniversary date of plan;
semi—annual review—six
months after initiation
of plan

WRITE by monthly in ICF/MR hab plan column: QMRP

WRITE by quarterly: team review

WRITE by annually: all staff and outside service providers

- 1. Annual reviews of hab plans generally are scheduled close to the anniversary date of the last review. The semi-annual reviews generally are held six months after the initiation date of the hab plan. Because clients can enter the Developmental Services Program at any time, annual and semi-annual reviews occur every month.
- 2. In ICF/MRs the QMRP (the professional responsible for the management of a client's programs), must review each client's hab plan every month. Every 3 months, a team of ICF/MR staff members must review both plans. Annually, all ICF/MR staff and outside service providers must meet to review both plans.

#### ASK:

- 1. Are hab plan meetings for your PMH students held at the school or somewhere else?
- 2. Does anyone from the school go to these meetings? Why or why not?
- 3. Do any of your students have ICF/MR hab plans?
- 4. Does your school have copies of hab plans for your PMH students? Why or why not?

OBJECTIVE 3: Recognize components of the different service plans.

#### ASK:

WRITE Benefits of Sharing

HIST Benefits that participants identify 1. Would having a knowledge of a PMH student's IEP and hab plan benefit the student's teacher and the student? (open discussion)

2. Ask other probing questions that help participants see the benefits of each agency knowing what is in the other's plan, such as "What if a child has an allergy to orange juice or dairy products? How would a teacher find that out?" and "Why is it important that teachers know the special medical needs of their students?"

#### EXPLAIN:

1. To coordinate and use information on IEPs and hab plans, school personnel first need to recognize the elements of each plan and how they relate.

#### ASK:

1. What is the purpose of an IEP? (open discussion)

2. Which of these legal requirements are on the first page?

-- present level of performance

--annual goals

--short-term objectives

--specific educational services to be provided

--related services to be provided

--date services will begin

--duration of services

--objective criteria

--evaluation procedures and schedules

--attendance by school district representative/ parent(s), student, teacher, and evaluation specialist

3. Which legally required components appear on the second page?

4. Would a student's IEP be two pages, or more than two? Why?

5. How is your district's TEP different from the sample?

#### DISPLAY Transparency 12: IEP, page 1

Hab plan, page 2

DISPLAY
Transparency 16:
Hab plan, Certificate
of Eligibility page

The HRS hab plan is a service planning document that specifies goals and services for Developmental Services clients. These are based on a client's needs identified through assessment and evaluation. The first page of the hab plan contains basic information about the client.

#### ASK:

- 1. On the first page, where is the statement of the client's eligibility for services?
- Item 8 lists 5 types of disability. All of these come under what term? (answer: developmental disability)
- 3. Other questions that help participants identify information required on page 1.

#### EXPLAIN:

The second page of the hab plan indicates that certain assessments have been completed. It also addresses a specific type of residential placement.

#### ASK:

- 1. What assessments appear on page 2?
- 2: What type of residential placement is addressed?
- 3. What are the different types of these residential facilities?
- 4. Which type do you suppose would serve PMH students who need the most physical and medical attention? (answer: Developmental/Medical)

#### EXPLAIN:

The next page of the hab plan determines the client's eligibility to be classified as developmentally disabled under federal law.

#### ASK:

1. Questions that help participants identify elements and how they reflect legal requirements

of P.L. 95-602.

#### DISPLAY

Transparency 17: Hab plan, page C with measurement categories indicated

POINT OUT: Each measurement category on the evaluation/goals page

#### EXPLAIN:

The evaluation/goals page is the "heart of the hab plan, because it lists a client's evaluations and present levels of performance in specific areas.

#### READ:

Measurement categories shown on transparency 16

#### EXPLAIN:

The information on an IEP relates to this page of the hab plan.

#### ASK:

- 1. Which measurement category would an educational program relate to? (answer: Section C)
- 2. Is an IEP divided into the same measurement categories as Section C? Why or why not?
- 3. Does your school district measure and write goals for any of the same skill areas as those listed under Section C?

#### EXPLAIN:

HRS regards section C as the educational part of the hab plan.

#### ASK:

- Who fills out section C of a hab plan if the public schools are providing the educational program for a client? (answer: HRS staff typically ask schools to provide a copy of the student's IEP which they attach to the hab plan and reference on the evaluation/goals page.)
- 2. For a school-aged client, how would HRS know what to put in section C? (answer: 'HRS staff would have to get this information from public school personnel.)

-24-

- 3. What might HRS use as a substitute for section C? (answer: a copy of the student's public school IEP.)
- 4. Does your school provide HRS with a copy of a PMH student's IEP every year? Why or why not? (open discussion)
- 5. What use would an IEP be to a hab plan committee?
- 6. What use would a hab plan be to a student's teacher, therapist, and other service providers?
- 7. Ask other probing questions that encourage participants to recognize the importance of sharing service plans.

### EXPLAIN:

After an IEP is developed, teachers use the annual goals and short-term objectives on the IEP to develop an implementation plan for the student. This plan outlines the instructional sequences or steps to be used in achieving the short-term objectives on the IEP. The implementation plan has no required format, and teachers and therapists usually construct their own forms.

### EXPLAIN:

A PMH student who lives in an ICF/MR will also have an Active Treatment Plan, or ATP. This plan has basically the same purpose as an implementation plan. Each service provider must develop an ATP that lists short-term goals and the training methods and activities the person will use to meet the goals on the hab plan.

Like implementation plans, ATPs are not standardized, although Developmental Services has recommended a format for ICF/MRs to use.

### ASK:

 How are IEPs like hab plans? If participants don't give correct answers, simply write

WRITE
IEP -> Implementation
Plan

WRITE under Implementation Plan, "Instructional steps"

write han plan—)ATP

WRITE under ATP "training methods and activities"

down and explain that each must include:

- --Annual goals for student or client progress
- --Specific services to be provided
- --A time-line for accomplishing goals and objectives.

Each must also:

- -- be developed by an interdisciplinary team
- --be reviewed at least annually
- How is an implementation plan like an ATP? •If participants do not give correct answers, simply write that both--

-are developed by the professionals serving the student (teacher, therapist, directcare service provider, etc.)

-- are based on the goals and objectives in

their respective service plans

--outline instructional strategies and activties to be used to achieve annual goals and short-term objectives

WRITE Implementation Plan/ATP and similarities identified by participants.

RE-DISPLAY

reviews

Transparency 7: Legal requirements

for service plans

and service plan

OBJECTIVE 4: Recognize relationships among the different service plans for PMH students.

### EXPLAIN:

A short review of legal requirements for IEPs, hab plans, and the "Individual Plan of Care" for ICF/MRs will point out similarities and differences between the documents.

### ASK:

- Questions about the content of IEPs, hab plans, implementation plans, and ATPs. If participants do not readily identify similarities and differences, simply point these
- How can a knowledge of the different components of the IEP and hab plan help teachers and other professionals ensure a PMH student's progress in education and other life skills? (open discussion)

### READ:

The text of case study 3, "Gloria" (see appendix C)

### ASK:

- 1. Why was it important that the professionals working with Gloria know information in both the IEP and the hab plan?
- 2. What could have happened if they had not shared this knowledge?
- 3. How did sharing the information on the service plans help ensure Gloria's progress?

### SELF-CHECK EXERCISE

### EXPLAIN:

DISTRIBUTE
Handout 6: Module 3
Self-check

### ASK:

- 1. each question aloud
- prompting questions to get the answers that appear in the answer key for Module 3 (see appendix D)

OBJECTIVE 1: Recall the interactive role of school and HRS districts in the educational and hab planning process.

### EXPLAIN:

- 1. Module 4 takes a look at four methods of cooperative planning that focus on the development of service plans and annual meetings to review these service plans. It also points out the contribution that cooperative agreements and data sharing can make to the development of any of the four methods.
- focal school districts and HRS districts have major responsibilities for PMH students and thus a great impact on their lives.

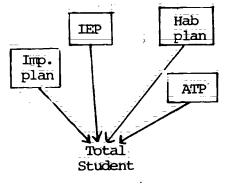

### ASK:

- 1. Do you believe that each PMH student should have an individual plan that addresses the student's needs? (open discussion)
- 2. What might be some advantages of having a combined IEP and hab plan?
- 3. What impact may the absence of communication between school district and HRS personnel have on the development of PMH students? (continue discussion)

### EXPLAIN:

1. The IEP, the hab plan, the implementation plan, and the ATP all contribute to the development of the total student.

WRITE Combined IEP/hab plan and advantages mentioned by participants

REDISPLAY
Transparency 4:
Holistic vs.
Fragmented

1. What is the probable result when these plans are not coordinated? A total student, or one who is fragmented?

### EXPLAIN:

ASK:

1. Whatever your role in working with PMH students,

you have an investment in the progress of PMH students and a role that involves you in the complex requirements for planning effective services.

2. Many of the PMH students enrolling in public school will be clients of HRS. The child will already have a hab plan and may have received educational services through HRS. The hab plan may already have been reviewed and revised through several cycles of hab planning that generated extensive information about the PMH student.

### ASK:

WRITE
participants'
observations as
they are mentioned

WRITE

PMH student--

three plans

one plan/two plans/

1. How do these facts influence the school district-HRS interactive role in planning? (open discussion)

OBJECTIVE 2: Recognize the names and features of alternative methods of cooperative planning.

### EXPLAIN:

School-aged PMH students can have one, two, or three service plans.

### ASK:

- 1. When would a PMH student have only one service plan? Two? Three?
- 2. How many meetings would you expect to have when a student has two plans? Three plans?
- 3. Might you also expect to have one meeting to develop one plan? Why or why not? (open discussion)
- 4. Who benefits from separate meetings and separate service plans?
- 5. Who would benefit from a single meeting and a single service plan?

### EXPLAIN:

 Since ICF/MR facilities usually combine their hab plan and ATP reviews, we can reduce the number of DISPLAY Transparency 18: Four methods of

cooperation

DISPLAY
Transparency 19:
Chart of Conditions
and distribute
Handout 7, a
duplicate chart

required meetings from three to two.

- In this situation, possible options for coordinating service plans and annual reviews include:
  - -One meeting to produce one service plan
  - -- One meeting to produce two service plans
  - -- Two meetings with cross-representation of school and HRS personnel to produce two service plans
  - -Two meetings with shared written information to produce two service plans
- 3. There are other possible options, but these alternatives are considered among the best choices for integrated planning.

### ASK:

1. What are the principal features of each method?
(Point out features of each method on transpared ency 18)

OBJECTIVE 3: Recognize the conditions under which different methods would be appropriate.

### EXPLAIN:

- Different conditions require different approaches to planning. Each of the four methods may be appropriate or inappropriate to a given situation.
- 2. Handout 7 lists a number of possible conditions under which PMH students may be served. The numbers at the top of the four columns represent the four methods:
  - 1-1: One meeting/one service plan
  - 1-2: One meeting/two service plans
  - 2X-2: Two meetings with cross-representation/
    - two service plans
  - 21-2: Two meetings with shared information/two service plans

### ASK:

Suppose a high percentage of a school district's

on transparency, CHECK methods participants agree on PMH students live in HRS operated or HRS vendored multibed facilities. Which methods might be most beneficial to the student and practical as well? (open discussion)

2. Which methods of planning might be feasible under each of the conditions listed on handout 7? Which of the possible methods for each condition would benefit PMH students the most? (Discuss each condition and ask participants to check off feasible methods on their handouts.)

### EXPLAIN:

Two meetings with shared information would be feasible under all of the conditions listed. Since interagency communication in this method is minimal, other methods with better communication would probably be more beneficial to the students themselves. (If participants do not suggest the following alternative methods for each condition, explain why each is appropriate.)

- 1. A large percentage of a school district's PMH students live in HRS operated or HRS vendored multi-bed facilities: 1-1, 1-2
- PMH students live in a variety of settings that include foster homes, group homes, and multi-bed facilities: 2X-2
- 3. A majority of PMH students receive limited HRS services and programs: 2I-2
- 4. Public school programs for PMH students take place in one or several centers: 1-1; 1-2
- PMH programs take place in a variety of public school settings throughout the district: 2X-2; 2I-2
- 6. The school district employs staffing specialists or program consultants who chair planning meetings and serve as school district representatives: 1-1; 1-2; 2I-2
- School district representatives are not always administrators and may not be authorized to commit district resources: 2X-2; 2I-2

- 8. Both agencies' philosophies lead to the inclusion of behaviorally stated, measurable goals and objectives on service plans: 1-1; 2X-2
- 9. School district and HRS requirements for service plan information differ slightly: 1-1; 1-2; 2X-2; 2I-2
- 10. School district and HRS philosophies and purposes for service plans vary considerably: 2I-2

disadvantages of
Method 2; Method 3;
and Method 4, along
with participant
responses for each

OBJECTIVE 4: Recognize the advantages and disadvantages of each method.

### EXPLAIN:

Whatever the conditions that favor one or several methods over others, each method has inherent advantages and disadvantages.

### ASK:

- 1. What are some possible advantages and disadvantages of method one, One meeting/One Service Plan, for:
  - a. students and parents
  - b. the school district
  - c. HRS

(Possible advantages and disadvantages for each method are found on pages 102-105 of the participant's manual).

2. Ask the same question for each method and add any from the participant's manual that participants fail to mention. (You may also ask participants to refer to the appropriate page of the participant's manual after a discussion of each method.)

OBJECTIVE 5: Recognize the requirements for implementation of each method.

### EXPLAIN:

The more interactive the coordination method, the more likely a school and HRS district will encounter implementation concerns.

# ERIC.

7.

### ASK:

MRITE
Method 1—
Implementation
and concerns that
participants
mention

write
the other 3
methods and
concerns that
participants
identify for each

 If you decided that method 1 is feasible for your district, what kinds of implementation concerns might you expect to encounter?

2. Ask the same question for each of the other 3 methods. Mention and explain problems listed on pages 106-108 of the participant's manual that participants fail to identify.

OBJECTIVE 6: Recognize practical methods of planning and scheduling that can be used to carry out the methods of cooperative planning.

### EXPLAIN:

Each method requires slightly different procedures for planning and scheduling meetings.

### ASK:

 What procedures would personnel in your school district have to take to plan and schedule a joint meeting?

- 2. What procedures would HRS personnel have to take to prepare for a joint meeting?
- 3. Would the planning for method one to be any different from the planning for method two?
- 4. Ask similar questions for methods 3 and 4.
- 5. What obstacles to planning and scheduling might occur for each method?
- 6. Would you need to alter a method you want to use to make it fit your school district's circumstances? If so, what changes would you make? (open discussion)

WRITE
Planning and
Scheduling—
Method Land
participant
responses

OBJECTIVE 7:

Recognize the contribution of cooperative agreements and data collection to cooperative planning.

### EXPLAIN:

- Cooperative agreements and shared data can do much to enhance agency cooperation and service planning. Some school and HRS districts have developed formal and informal cooperative agreements and formal and informal systems for sharing data.
- WRITE Cooperative agreements--Ch. 79-184, F.S.
- 2. Chapter 79-184, F.S. requires cooperative agreements between school and HRS districts in which HRS residential facilities are located. These agreements may be written in any format and district school boards and HRS are free to negotiate duties, responsibilities, and procedures.

### WRITE

- --school board responsibilities --HRS responsibilities --Mutual provisions
- 3. Typically a cooperative agreement contains three sections, one that describes what the school board will provide and be responsible for, one that details what HRS will be responsible for; and one that lists mutual provisions.
- 4. The school districts serving Sunland residents have cooperative agreements with the appropriate HRS district. These agreements have been negotiated primarily by school district Exceptional Student Education administrators, public school principals, and Sunland staff. They generally define each agency's role and responsibilities but vary in detail.
- 5. Less formal agreements, both written and oral, may address:
  - --Attendance of personnel at staffings and other meetings
  - --Locations and times for meetings
  - --Procedures for handling field trips, tardiness, and absence
  - --Procedures for coordinating goals and objectives, behavior management, methodologies, and other elements of a student's education, training, and care.

### ASK:

1. Does your school district have a cooperative agreement with HRS? Why or why not?

- 2. Does your school district have informal agreements with the HRS district, an HRS facility, or an ICF/MR? If so, what is covered in these agreements?
- 3. Does your school or school district have coordination needs that might be worked out in written agreements with HRS? (open discussion)

### EXPLAIN:

WRITE Data Collection and Sharing

DISPLAY
Transparency 20:
Legal requirements
for data collection

- Exchanging data can also help school and HRS staff plan and sustain complementary programs.
- 2. No statutes, DOE regulations, or HRS regulations require specific data collection procedures.

  Thus, schools, HRS residential facilities and ICF/MRs develop their own systems. The result is widely varying methods of data collection (ICF/MR data must be stated in measurable, objective terms, however).

### ASK:

In the following situations, what might data on student progress show?

### READ AND DISCUSS: the following situations:

- An HRS occupational therapist uses cut-out cups to decrease the suck-swallow response in a student. The public school occupational therapist uses a straw bottle to encourage sucking and swallowing.
- 2. A public school teacher is teaching a student to self-feed. HRS facility staff are feeding the student.
- 3. An HRS occupational therapist uses a special technique to decrease a student's tongue thrusting; the student's teacher used tongue thrust as a motor imitation task.
- 4. HRS and school district staffs do not develop mutually reinforcing short-term objectives to meet annual goals.

- 5. The hab plan and the IEP list radically different goals for a particular skill area, such as self-care.
- 6. Individuals working with the same student never meet to discuss goals, objectives, methodologies, program rationales, and data collection.

### ASK:

- 1. How does your school district handle problems like these?
- 2. What types of data do HRS and school personnel need to share?
- 3. How could your school or school district improve the coordination of methodologies and data collection? (open discussion).

### EXPLAIN:

Some school and HRS districts use these methods:

- School and HRS staff members hold periodic conferences on students at the school or at another mutually acceptable location.
- Teachers provide ICF/MR staff with narrative program reports on students who live in the ICF/ MR.
- 3. School and HRS personnel periodically exchange information and data, either orally or in writing.
- 4. Public school therapists visit their HRS counterparts, and vice versa. They use these visits to discuss students that both serve and to demonstrate methods, activities, positioning, and other elements of training.
- 5. Public school teachers and therapists participate in joint inservice training with HRS personnel. Training sessions allow individuals to discuss methodologies, data collection, and data sharing.

### ASK:

1. Which of these options is feasible in your situation? (open discussion)

2. What options could you add to our list?

WRITE

Options for sharing data and participant suggestions

- 2. prompting questions to get the answers that appear in the answer key for Module 4.

### DISMISSAL OF GROUP

### **EXPLAIN**

1. The participant's manual for the PARINERS IN PLANNING Training Program covers the information you
learned today and has additional exercises and
questions. Use it as a reference or pass it on
to someone you know who is interested in learning
more about coordinating service plans for PMH
students. (If the resource manual is distributed, explain that it presents the same information in a different format and in more detail.)

APPENDIX A

=<u>3</u>=

### INTRODUCTION

\*As you participate in this PARINERS IN PLANNING program, you will find the answers to these questions:

### From Module 1:

- Which students are classified as profoundly mentally handicapped (PMH)?
- Which PMH students receive services from local school districts and the Department of Health and Rehabilitative Services (HRS)?
- What terms do different agencies use to refer to PMH students?
- What are the different home environments of PMH students?
- What types of service plans do PMH students have?
- How are local school systems, the Department of Education (DOE), and HRS organized to meet the needs of PMH students?
- Is there a need for joint planning and delivery of services to PMH students?

### From Module 2:

- What are some differences in the organizational structures of local school districts and HRS districts?
- What are the state and federal requirements for service plans and service plan reviews?
- What are some of the legal terms found in state and federal laws, rules, and regulations related to services for PMH students?
- What are some possibilities for agency coordination of service plans and service plan reviews?

### From Module 3:

- What are the planning processes for IEPs and hab plans?
- What are the differences in the number of required service plan reviews and the scheduling of these reviews?
- What are the components of different service plans?
- How are the different service plans for PMH students related?

### From Module 4:

- How do local school districts and HRS districts interact in the educational and habilitation planning process for PMH students?
- What are four possible methods of cooperative planning?
- What are the advantages and disadvantages of each method?
- What are the requirements for implementation of the different methods?
- What are some practical methods of planning and scheduling that can be used to carry out the various methods of cooperative planning?
- How can cooperative agreements and shared data collection contribute to cooperative planning?

### SERVICES PROVIDED BY DEVELOPMENTAL SERVICES

Developmental Services offers many different types of services to eligible clients. Arrows indicate those services that PMH students are most likely to receive.

Recreation to help meet clients' therapeutic needs and develop leisure-time skills.

Education, Training, and Therapy that address self-care, pre-vocational, social, academic, daily living, communication, and motor skills. School-aged clients, however, generally receive these services from local school districts.

- Parent training that includes classes and individual home instruction; assessment of client needs and abilities; and other assistance to parents.
- Respite Care that places clients under temporary residential care for up to 30 days. This service relieves families or foster parents of stress caused by continuous management and supervision or by a family crisis.
- Supplemental payments to families or caretakers that permit clients to remain with their families or return to their homes.
- Medical and dental services identified in a client's hab plan.
- Transportation to and from service providers and community families.
- Escort services for clients who need help in getting to and from service providers.
- Health support services that include therapies and other training to help clients develop self-sufficiency.
- Developmental training to develop skills clients need to live independently.

Residential care that includes foster homes, group homes, habilitation centers, ICF/MR facilities, and Sunland Centers.

- Social group services that help clients cope with personal problems and learn to function adequately through social, cultural, and leisure-time experiences.
- Counseling that helps clients and their families resolve social, health, and emotional problems.

### GLOSSARY OF TERMS

As you have already seen, federal and state laws, regulations, and rules that affect services for PMH students use an assortment of different terms. Here are a few of the most important:

- Active Treatment—An aggressive and organized effort to fulfill each ICF/MR resident's fullest functional capacity. It requires an integrated individually-tailored program of services directed toward achieving measurable behavioral objectives.
- Active Treatment Plan (ATP) -- An individualized prescriptive plan written by an interdisciplinary team of ICF/MR service providers to implement an ICF/MR client's habilitation plan.
- Annual Goals—Those behaviors or skills that an exceptional student or Developmental Services client is expected to learn within a year. These goals are recorded on an exceptional student's Individual Educational Program. For a Developmental Services client, annual goals appear on the client's habilitation (hab) plan and on the Active Treatment Plan or other appropriate implementation plan.
- Annual Reviews—The annual meetings held by both school system and HRS personnel to revalidate and make changes in service plans. School system personnel meet with parents and students (when appropriate) to renew and revise Individual Educational Programs. HRS personnel meet with parents, clients, and service providers to change or revalidate goals in habilitation plans.
- Developmentally Disabled—A term used in Florida law to describe children and adults who exhibit disorders or syndromes caused by retardation, cerebral palsy, autism, or epilepsy. For such persons, these symptoms must constitute substantial handicaps that are likely to continue indefinitely. Federal law [P.L. 95-602] also defines "developmental disability" as a severe, chronic disability that—is attributable to a mental or physical impairment or combination of mental and physical impairments;
  - -- is manifested before the person attains the age of 22;
  - -- is likely to continue indefinitely;
  - -results in substantial functional limitations in three or more of the following areas of major life activity: self-care, receptive and expressive language, learning, mobility, self-direction, capacity for independent living, and economic sufficiency; and
  - --reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services that are of life-long or extended duration and are individually planned and coordinated.
- Exceptional Student--Under Florida law and rule [S. 228.041, F.S.;

SBER 6A-6.301], any public school student (or child eligible for enrollment) who needs special instruction or special education services
because of physical, mental, emotional, social, or learning exceptionality. Exceptional students are those who are mentally handicapped
speech and language impaired, hearing impaired, visually impaired,
physically impaired, emotionally handicapped, specific learning
disabled, and gifted.

- Habilitation—A process by which a client is assisted to acquire and maintain those life skills which enable him to cope more effectively with the demands of his condition and environment and to raise the level of his physical, mental, and social efficiency. It includes, but is not limited to, programs of formal structured education and treatment (Ch. 393, F.S.).
- Habilitation (hab) Plan—An individualized prescriptive plan written for each Developmental Services client. The habilitation plan identifies client needs and authorizes the expenditure of state funds to provide services. The plan describes a client's present level of functioning or development in each applicable program or service area and lists annual goals for client performance.
- Habilitation Planning Committee (HPC) Those HRS staff members and service providers who meet to develop and review a habilitation plan for a Developmental Services client.
- Individual Educational Program (IEP)—The written service document that state and federal laws require for every student enrolled in an exceptional education program. In Florida, public school systems write IEPs for the exceptional students they serve (ages vary from school district to school district) and HRS does the same for all HRS clients below age 22 who are not being served by local school systems.
- Intermediate Care Facility for the Mentally Retarded (ICF/MR)—A residential facility licensed by the state and certified according to federal Medicaid regulations. An ICF/MR provides room and board; continuous 24-hour-a-day supervision; participation in professionally developed and supervised activities, experiences or therapies; and all habilitative, rehabilitative, or treatment services identified for each client by an interdisciplinary team.
- Qualified Mental Retardation Professional (QMRP) -- A professional responsible for the management of programs provided to clients living in Intermediate Care Facilities for the Mentally Retarded.

Write the answers to these questions on this sheet. This self-check is for you to keep for your own review of Module 2.

L.	Local school districts and HRS districts cover:
	a. the same geographic areas
	b. different geographic areas
2.	Florida is divided into HRS districts.
	a. 12 c. 11
	b. 10 d. 9
3.	HRS district serves school districts, which is the most served by any
	HRS district.
. •	a. 10 c. 14
	b. 12 d. 16
1.	HRS District 10 encompasses one school district. This district is:
	a. Broward c. Hillsborough
	b. Dade d. Orange
5.	HRS district staff members report to, who report to
	a. District administrators; the Program Supervisor
	b. Direct Services Supervisors; the Program Coordinator or the district
	administrator
•	c. District Supervisors; the HRS assistant Secretary
; ·	Schoof district policies are approved by
	a. School principals c. The superintendent
	b. The school board d. The Department of Education
-	What do these abbreviations stand for?
	ā. CFR d. F.Ā.C.
	b. P.L. e. SBER
	c. f.S.
-	Which statements accurately reflect the ways federal regulations and state
	take and rules develop?

- - New federal laws lead to the development of new state laws.
  - New state laws always lead to revisions in federal laws and regulations. b.
  - New or revised federal laws may lead to revisions in state laws. c.
  - State laws may be developed without a federal law as a basis. ā.

- e. State rules are detailed specifications of a state law's requirements.
- 9. On your sheet, write "SD," "HRS," or "ICF/MR" to indicate the agency that each requirement applies to. Some regulations may apply to more than one agency.
  - a. A written habilitation plan for each individual
  - b. Monthly review of service plans
  - c. A written individualized educational program for each individual
  - d. A meeting of agency personnel to develop individual service plans
  - e. At least annual review of service plans
  - f. A written "plan of care"
  - q. A service plan using a standardized format
  - h. Service plans that include annual goals
  - i. Service plans that include statements of specific services to be provided
- 10. Write the name of the document for each of the definitions given below:
  - a. An individualized prescriptive plan written by an interdisciplinary team of ICF/MR service providers to implement an ICF/MR client's habilitation plan
  - b. The written service document that state and federal laws require for every student enrolled in an exceptional education program.
  - c. An individualized prescriptive plan written for each Developmental Services client. The plan identifies client needs and authorizes the expenditure of state funds to provide services. The plan describes a client's present level of functioning or development in each applicable program or service area and lists annual goals for client, performance.
- 11. Write "annually," "semi-annually," "quarterly," or "monthly" to indicate how often individual service plans must be reviewed.
  - a. IEP
  - b. HRS Developmental Services hab plan
  - c. ICF/MR hab plan
- 12. Each agency requires or expects certain people to attend annual reviews of service plans. Write "SD," "HRS," or "ICF/MR" to indicate the agency that requires the following participants at these meetings:
  - a. the student (or client)
  - b. the parents or guardian
  - c. the student's teacher

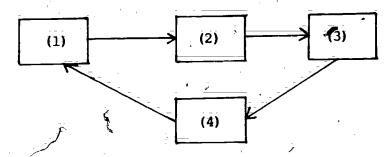

- d. All staff and outside professional team members involved in the student's program
- e. A committee composed of specific representatives and staff members
- f. A local school district representative

## SELF-CHECK, MODULE 3

Write the answers to these questions on this sheet. This self-check is for you to keep for your own review of Module 3.

1. The planning procedures for HEPs and hab plans follow the same cycle. In the following diagram, what do steps 1, 2, 3, and 4 represent?

2. School district A schedules meetings to review the IEPs for all of their PMH students in April and May. School district B schedules these meetings for different PMH students from month to month throughout the year.

Which school district follows acceptable practice?

- a. School district A
- b. School district B
- c. Both A and B
- d. Neither A'nor B
- 3. Public school and Sunland Center staff decide to schedule TEP and hab plan reviews to coincide. Is this good practice? Why or why not?
- 4. Which of the following statements are correct?
  - a. The laws require that IEPs be reviewed annually and semi-annually.
  - b. ICF/MRs must review their hab plans annually, semi-annually, and quarterly.
  - c. HRS hab plans must be reviewed annually and semi-annually.
  - d. IEPs must be reviewed annually.
  - e. IEPs must be reviewed quarterly.
  - f. ICF/MR hab plans must be reviewed annually, quarterly, and monthly.
- 5. For each component listed below, write HEP, IP (Implementation Plan) HP, or ATP on your paper to indicate which parts are included in which plans.
  - a. Student identification information
  - b. Annual goals
  - c. Educational services to be provided
  - d. Related services to be provided
  - e. Residential placement

Instructional sequences to be followed Present levels of performance. h. Short-term objectives Evaluation procedures Classification as developmentally disabled j. k. - 7. Which statements describe the major relationships between IEPs, hab plans, and ATPs?
  - a. School districts and HRS agencies have the same assessment procedures and instruments for determining a student's present level of performance.
  - b. The content areas for assessment are different for the HEP and the hab plan because HEPs concentrate on educational performance, while hab plans concentrate on psychological, medical, and other habilitative categories.
  - c. Components of IEPs overlap with some components of hab plans and ATPs.
  - d. IEPs and ATPs include short-term objectives for the referenced subject or skill areas.
  - e. IEPs, hab plans, and ATPs all have goal statements that are intended to express reasonable expectations for the student's progress in a 12-month period.

### <u>SELF-CHECK, MODULE 4</u>

Circle or otherwise indicate the answers to the following questions. This self-check is for you to keep for your own review of Module 4.

- 1. The role of public school personnel in the development and implementation of IEPs and hab plans is complex. Which of the following would be most likely to encourage student progress?
  - a. Teachers and therapists consider only the student's academic skill levels in planning the educational services for the student.
  - b. Public school staff obtain information about a student's needs, care, and services from HRS and use this information to help them plan the educational services for a PMH-student.
  - c. School personnel who work with a PMH student participate in meetings to change goals and objectives on a student's IEP.
  - d. Public school teachers and therapists keep data records on student progress for use in writing annual goals and short-term objectives.
- For each of the following statements, write 1-1, 1-2, 2X-2 or 2I-2 on your paper to indicate which coordination method applies.
  - a. The school district and HRS exchange service plans currently in effect. Each agency conducts its own service plan review.
  - b. Both agencies participate in concentrated premeeting coordination. At the service plan meeting, participants develop one document that meets the needs of both agencies. Each agency implements the plan according to its own requirements.
  - c. Premeeting activities include the selection of co-chairpersons. At the meeting, a total service plan is first developed; then a public school IEP and an HRS hab plan.
  - d. Each agency selects representatives to attend the meeting of the other agency. Both school district and HRS staff members attend their own and the other's meeting. After the meeting, school district and HRS personnel frequently communicate regarding the student's progress.
- 3. For each condition listed below, write 1-1, 1-2, 2X-2, or 2I-2 to indicate which models might be used under which conditions.
  - 1-1: one meeting/one service plan
  - 1-2: one meeting/two service plans
  - 2X-2: two meetings with cross representation/two service plans
  - 21-2: two meetings with shared information/two service plans
  - a. A high percentage of a school district's PMH students live in HRSoperated or HRS-vendored multi-bed facilities.
  - b. PMH students live in a variety of settings that include foster homes, group homes, and multi-bed facilities.

- c. A majority of PMH students receive limited HRS services and programs.
- d. Public school programs for PMH students are held in one or several centers.
- e. Educational programs for PMH students take place in a variety of public school settings throughout the district.
- f. The school district employs staffing specialists or program consultants who chair IEP meetings and serve as school district representatives.
- g. School district representatives are not administrators and are not qualified to commit district resources.
- h., Both agencies philosophies lead to the inclusion of behaviorally stated, measurable goals and objectives on service plans.
- i. School district and HRS requirements for service plan information differ slightly.
- j. School district and HRS philosophies and purposes for service plans vary considerably.
- 4. For each advantage listed below, write 1-1, 1-2, 2X-2; or 2I-2 to indicate the method(s) most likely to produce that advantage.
  - An opportunity to develop a "total" service plan for the student
  - b. Face-to-face contact between school and RRS personnel
  - c. Fewer meetings for the student's parents
  - d. Easily handled logistical arrangements

5.

- e. ARS hab plans and public school IEPs meet the specific needs of each agency
- f. The development of a non-contradictory program for the student
- g. Opportunities for school district and HRS staff to cooperatively plan a PNH student's program

Write 1-1, 1-2, 2X-2, or 2I-2 to indicate which method(s) of cooperation would be most likely to produce the following disadvantages.

- a. Parents may be intimidated by the large number of professionals who attend the meeting.
- b. The school district and HRS may find it difficult to schedule meetings at mutually agreeable times.
- c. Each agency may not receive the other's service plan in time for its review.
- d. The school district must provide release time for teachers or other school personnel to attend the meeting.
- e. No face-to-face communication between school district and HRS personnel takes place.
- f. IEP and hab plan goals may not be complementary or may directly conflict.

- g. School system or HRS representatives may not be able to attend meetings.
- h. Philosophical differences may cause conflicts.
- 6. Which of the following represent practical methods for planning coordinated services?
  - a. Distribute copies of the service plan(s) to representatives of all agencies serving the student.
  - b. Notify appropriate persons in both agencies when the service plan(s) need modification.
  - c. Once the service plans for a student have been developed, communicate needs for changes only to the parents.
  - d. Review annual goals and other information provided on the student's IEP and hab plan.
- 7. Cooperative agreements between school district and HRS personnel may be in the form of:
  - a. Cooperative agreements
  - by letters of agreement
  - c. verbal agreements
  - d. formalized, written agreements
- 8. Which of the following issues are usually addressed in cooperative agreements?
  - a. responsibilities of the school board
  - b. responsibilities of HRS
  - c. attendance of personnel at meetings
  - d. teaching and training methods and activities
- 9. How does the sharing of data on a PMH student's progress Help in planning services for the student?
  - a. It doesn't help because school district and HRS requirements are so different.
  - b. It can reveal discrepancies in teaching procedures that may affect the student's progress.
  - c. It can help school district and HRS staff recognize a need to expand communication on PMH students.

## "FREE" OPTIONS

## LOCAL SCHOOL DISTRICTS AND HBS:

- Share service plan documents (with parental permission)
- Develop a single service plan form that meets the requirements of both agencies
- Participate in each other's annual reviews or combine reviews into one meeting
- Agree on common or complementary goals, objectives, and methodologies
- Agree on how goals and objectives are to be written
- Coordinate timelines for the accomplishment of goals and objectives
- share evaluation results (with parental permission)
- Encourage appropriate personnel to coordinate educational and training activities

ONE MEETING/

## METINGS WITH CROSS REPERSENTATION TWO SERVICE PLANS

## TWO MEETINGS WITH SHARED WRITTEN INFORMATION TWO SERVICE PLANS

A joint meeting of representatives from the school district, the HRS district and HRS agencies, parents, and others who provide programs for a PMH student to develop one service plan that satisfies school district and HRS requirements.

A joint meeting of representatives from the school district, the HRS district and HRS agen who provide programs for a PMH student to develop and a representative of an IEP and a hab plan that meet school district develop a hab plan. and HRS requirements for each plan.

Two separate meetings, one of school district personnel and a representative of the HRS district cies, parents, and others to develop the IEP and a second of HRS personnel the school district to

Two separate meetings, one of school district personnel to develop an IEP based on school system data and information provided by the HRS district and a second of MRS personnel to develop a hab plan based on HRS data and information provided by the school district.

2X-2 Two meeting representati KEY: 1-1 One meeting/one plan 1-2 One meeting/2 plans CONDITIONS A high percentage of queen strict's PMH students live in HRS operation of HRS vendored multi-bed focilities. PMH students live in a variety of settings that include foster homes, group homes; and multi-bed focil de les A majority of the PMH students receive limited HRS services and programs. Public school programs for PMH students take place in one or several centers PMH programs take place in a variety of public school settings throughout the district The school district employs staffing specialists or program consultants was chair planning meetings and serve as school district representatives, School district representatives are not administrators and are not authorized to commit district resources. Both seencies' philosophies lead to the inclusion of behaviorally stated, megaticable goals and objectives on service plogs. School district and HRS requirements for service plan information differ slightly. School district and this philosophies and purposes or service plans very considerably

## PUBLIC SCHOOL SYSTEM

## HRS DEVELOPMENTAL SERVICES

#### HRS-ICF/MRS

No statutes or DOE regulations address classroom data collection.
Responsibilities for developing data collection ystems typically est with individual principals and teachers.

No statutes or HRS regulations require training specialists to collect data in a specific way. Facility requirements vary.

Rule 10D-38.16(6),
FAC requires
"documented evidence of consistently applied training activities." Each ICT/MR develops its own system of data collection and the consistency of reporting is monitored by teams from the HRS Office of Licensure and Certafication.

RESULT: Widely varying methods of data collection.

RESULT: Widely varying methods data collection,

REPORT: Systematic collection and reporting of data stated in measurable, objective terms.

ANDREW

Andrew was born with an unknown etiology that caused profound retardation. When he was 6 months old, it became obvious that he was developmentally delayed. His parents, already in their mid-forties, decided that Andrew would receive better care in an institution.

Andrew lived in a Sunland Center until he was 14. At that age, he could walk; feed, bathe, and toilet himself; and care for a few basic needs. Because of Andrew's capacity to help care for himself, he was transferred to a group home for severely and profoundly retarded teenagers.

Rrior to his move, Andrew had received his educational services from the public school program located at the HRS institution arranged worker in his new community referred Andrew to the public school placement specialist, who arranged Andrew's staffing. Andrew's group home parent, Andrew, a school district representative, Andrew's teacher, the public school speech therapist, and the HRS social worker assigned as Andrew's case manager all attended the meeting.

Shortly afterward, Andrew entered a community public school. Andrew's teacher quickly noticed Andrew's self-injurious habit of biting his hand when he did not want to follow his teacher's directions. Andrew was also coming to school without having bathed. The teacher set up a behavioral program, designed to reduce hand-biting, but did not feel that Andrew's new program required revision in his IEP.

For several weeks, the teacher sent home daily notes concerning Andrew's personal hygiene. When she received no response, the teacher called the group home and found out that Andrew refused to bathe himself and follow other directions of the group home parent. The teacher suggested that the parent use the behavior management program that she used with Andrew while he was at school. The group home parent visited Andrew's teacher, who demonstrated her techniques and gave the parent a copy of the behavior program to use at home.

Five weeks later, Andrew was still biting himself and refusing to bathe. The parent their decided that the school program was ineffective and called Andrew's case manager about his problems. The parent and the social worker met two weeks later and decided that an HRS behavioral program specific all set up a program for Andrew and train the parent in the home.

The social worker mentioned that Andrew's hab plan, which she received from the Sunland Center, listed hand ting and refysal to backe among Andrew's believior problems.

At school Andrew's teacher continued to use the program she had devised and assumed that the group home parent was doing the same.

The school and HRS behavior programs were incompatible, and Andrew soon began to tantrum throughout the day.

Finally, Andrew's teacher called the group home parent and discovered the conflict in program. She asked the parent and the behavioral program specialist to meet with her to design a compatible school/home behavior management program. This meeting took place 3½ months after Andrew's problems were noticed.

(Module 2, Case study 2)

#### JEREMY

Jeremy, who is now 9 years old, was born with spina bifida (myelomeningocele) hydrocephalus, and profound mental retardation immediately after Jeremy's birth; he received an operation to conduct exceptive brain fluid into his heart, where it could be absorbed by the blood. Shortly after the first operation, Jeremy also received surgery to alleviate back and urinary tract problems.

As an infant, Jeremy received an individualized program at the local United Cerebral Palsy Association. At age 3, he began a public preschool program at a local school. Because of Jeremy's extensive medical, mental, and physical disabilities, his parents felt they could not care for Jeremy at home and placed him, at age 8, in a private ICF/MR. After his move to the facility, his parents, school personnel, and ICF/MR staff decided that Jeremy's public school program was still the most appropriate educational setting.

Jeremy's medical diagnosis and functional level both suggested a need for maximum communication between the ICF/MR and the school. The ICF/MR administrator also explained to the school principal certain ICF/MR regulations for monthly progress reports, the writing of behavioral objectives, and attendance by service providers at annual hab plan reviews. The principal, Jeremy's teacher, and the ICF/MR administrator agreed on the following coordination procedures:

- 1. The teacher would provide the ICF/MR with daily reports on Jerace's food and fluid intake, body elimination, and other maintenance programs.
- 2. Both the school and the ICF/MR would provide daily coordinated physical therapy.
- Jeremy's teacher and therapists would keep daily and monthly graphs of Jeremy's progress toward goals listed on Jeremy's hab plan.

The collection of daily and monthly data helped the ICF/MR meet its legal requirements, but transferring data from public school data sheets to those used by the ICF/MR was a time-consuming task.

The school principal, Jeremy's teacher, and the ICF/MR administrator decided that a common recording form would substantially reduce the paperwork involved. The three also discussed the possibility of combining the annual IEP and hab plan reviews into one meeting and coordinating the writing of short-term

objectives.

All of these coordination procedures are currently in effect. They help to ensure that Jeremy:

- 1. receives sufficient food to maintain his body weight;
- receives sufficient liquids to prevent dehydration;
- remains free of bowel and urinary complications;
- receives the repositioning he needs to prevent bed sores and associated infections;
- 5. is guaranteed coordinated, mutually reinforcing services.

The school principal, teacher, and other professional staff realize that they are not legally required to help the ICF/MR meet its regulations, but they also believe that, in Jeremy's case, coordinated care and training are essential to his well-being and development.

(Module 3, Case Study 3)

#### GLORIA

Gloria is a 5-year-old girl living in a large HRS residential facility. Her movements are stiff and spastic, and she lies in a reclining wheel chair, unable to care for her basic needs. She must be fed, toileted, and cared for by facility personnel. She cannot speak, so she is unable to let any of her needs be known to others. Gloria, however, will smile and laugh whenever her foster grandparent, a familiar staff member, or her parents come to visit her.

Gloria was born with cerebral palsy, a disorder or injury to the brain that affects the voluntary control of her muscles. Because of the increasing physical care that Gloria needed, her parents felt that they could no longer care for her adequately at home. Thus, when she was 3 years old, they placed her in the residential facility.

Gloria's parents have monitored her personal care and progress on a regular basis throughout the last 2 years. They attend the semi-annual and annual hab plan meetings, which are required by the state facility. At these meetings, Gloria's hab plan is reviewed and revised. Gloria's current plan lists her priority needs and those responsible for meeting those needs:

- 1. self-care-unit staff
- 2. physical therapy—physical therapy staff
- 3. medical needs-medical staff

## 4. educational needs--public school staff

At age 4, Gloria began school in a community-based, public pre-school program for the profoundly physically and mentally handicapped. Each year the school has an IEP meeting which is attended by Gloria's parents, a school district representative, an HRS staff member, a teacher, a physical therapist, an occupational therapist, and a speech therapist. Gloria's priority educational goals for this year are a toilet training program; a physical therapy program to prevent further physical deformities; an oral musculature program to increase proficiency in eating skills; and a speech therapy program to develop basic and functional communication.

Each school term, Gloria's teacher attends the annual hab plan review held at the facility. At these meetings, she provides facility staff with a copy of Gloria's IEP and reviews Gloria's progress during the preceding year. The teacher discusses specific IEP objectives and answers any questions related to Gloria's public school program.

At this year's meeting, she reported that Gloria was responding to her toilet training program with the use of a specially adapted toilet chair. The teacher noted that Gloria's new skill was being transferred to her living unit through access to a similar toilet chair. She indicated that Gloria has also improved her eating skills (she was eating diced, instead of ground, vegetables) and had learned to indicate "yes" and "no" by looking at the appropriate symbol attached to her arm chair.

After the teacher's report, the hab plan committee determined which of Gloria's new skills were being carried over to her living unit and reinforced by facility staff.

At the meeting, the teacher learned that over the past year, Gloria had experienced an additional 10% hearing loss in her right ear. She was also told that Gloria's congenital lung disorder was requiring increased postural drainage and that she had become allergic to any type of citrus juice. The teacher used this information to ensure that the school responded to Gloria's particular health, safety, and programming needs.
