IDENTIFIERS College Costs; *United States (South)

ABSTRACT

Data are presented on higher education in the South in 1983 and 1984, including more than 60 tables and brief descriptions of the latest available statistics for the United States, the Southern Regional Education Board (SREB) region, and the 14 individual SREB-member states. The tabular information is grouped under six headings: population and economy, enrollment and institutions, degrees, institutional finances, student finances, and faculty. Among the findings are the following: 3 of every 10 persons in the United States live in the South and by the year 2000, the region's population will increase by one-third; the economic growth of the South is demonstrated in the rise of per capita personal income; on the average, the southern region appropriates a larger share of state tax funds to higher education than do state governments nationally; both nationally and in the South, faculty salaries on the average increased about 4 percent from 1982-1983 to 1983-1984 in public colleges and universities; tuition accounts for an average of 11.5 percent of the current funds revenues of public institutions in the SREB states; more than 3.3 million students were enrolled in southern colleges in fall 1982; and about 84 percent of college students in the South attend public institutions. FOREWORD

For over two decades, SREB's biennial *Fact Book on Higher Education in the South* has chronicled the South's achievement and progress in higher education and focused on matters needing continued emphasis by leaders in education and government.

SREB *Fact Books* have charted and projected the dramatic changes in college enrollments in the South; have focused attention on the financial challenges facing Southern higher education and highlighted gains that have moved several SREB states to national funding levels; have spotlighted faculty salaries as a key factor in improving higher education and marked the South's progress in narrowing — but not yet eliminating — the gap between faculty salaries in the region and the nation. In general, SREB *Fact Books* have sought to reinforce the challenge issued more than two decades ago by the SREB Commission on Goals for Higher Education that the South must be measured against the same criteria of excellence which are applied everywhere.

A substantial proportion of the information about financial support, faculty salaries, enrollment trends, degree output, and faculty salaries continues to be presented within a regional context, based on the annual SREB-state data exchange. Increasingly, questions are raised as to the feasibility of collecting similar information on a national basis and in as timely a manner. SREB supports efforts in behalf of uniform and speedy collection of national data on higher education.

To present the latest available information, some of the tables and figures in the *Fact Book* make use of preliminary data. We appreciate the cooperation of the several agencies and offices which have provided advance data, particularly the National Center for Education Statistics, the National Science Foundation, and Region IV of the U. S. Department of Education.

This 1984 edition of the *Fact Book* marks the eleventh compiled under the guidance of Dr. E. F. Schietinger, SREB's Director of Research, who retires this year. Dr. Schietinger's leadership in identifying educational issues and his integrity in the analysis and presentation of data to assist governmental and educational leaders have established a standard for future SREB efforts.

Suggestions and comments concerning the information and its presentation in the SREB *Fact Book* are welcomed.

WINFRED L. GODWIN
President

SREB STATE PROFILES 1983 and 1984

The *Fact Book on Higher Education in the South, 1983 and 1984* includes more than 60 tables designed to present the latest available statistics for the United States, the SREB region, and the 14 SREB-member states individually. Information contained in the tables has been grouped under the six headings which form the sections of the publication: population and economy; enrollment and institutions; degrees; institutional finances; student finances; and faculty.

The data displayed on pages 2 to 4 are an abridged composite of some of the more fundamental statistics, offering brief state profiles on population and economy, finances, and enrollment. Most of the notes refer the reader to a particular table elsewhere in the *Fact Book* for more complete information and full citation of sources.

Persons interested in the status of higher education may find in these profiles convenient indicators of the progress and position of the region and individual states. However, users should be careful to take into account the wide range of interstate differences which can affect the comparability and relative rankings of the data. Most indices will be more meaningful when placed within the context of related measures.

SREB STATES AS A PERCENT
OF THE U.S. AVERAGE
1982**

SOURCE: U.S. Department of Commerce, Bureau of Economic Analysis, "Survey of Current Business," Vol. 63, No. 8 (August, 1983).

POPULATION AND ECONOMY

Highlights

- In the past ten years population in the SREB states grew 21 percent, almost twice the national increase of 11 percent. According to recent population projections, the South's population will grow 33 percent from 1982 to 2000, compared to 18 percent for the nation. Arkansas (49 percent), Kentucky (42 percent), Mississippi (62 percent), and Texas (51 percent) are expected to lead Southern states in relative growth (see Table 1).
- The traditional college-age population (18- to 24-year-olds) in the South increased by one-third in the past decade but will remain relatively stable from 1985 to 2000. Increases of more than 15 percent in several Southern states will be offset by comparable drops in other states (see Table 2).
- About one-fourth of the South's population aged 25 and above has less than nine years of school. Almost 60 percent have graduated from high school; 13 percent are college graduates (see Table 3).
- Per capita personal income in the South has been rising steadily for the last two decades: the average per capita income was 78 percent of the United States average in 1960; in 1970, it was 86 percent; and in 1982, 91 percent (see Table 4).
- General sales taxes, property taxes, and individual and corporate income taxes provide about three-quarters of state and local tax revenues in the nation and the South (see Table 5).

SECTION 2
ENROLLMENT AND INSTITUTIONS

**FULL-TIME-EQUIVALENT ENROLLMENT,
PUBLIC FOUR-YEAR INSTITUTIONS, SREB STATES
FALL 1983**

NOTE See Appendix for category definitions.

SOURCE SREB-State Data Exchange with state higher education agencies, 1983-84.

ENROLLMENT AND INSTITUTIONS

Highlights

- Enrollment in public colleges and universities accounts for 78 percent of total enrollment nationally and 84 percent in the South. In 1960, the corresponding figures were 69 and 66 percent, respectively. The proportion of students attending public colleges has remained relatively stable since peaking in 1975, when 86 percent of all college students in the South attended public institutions (see Table 8).
- Nationally, almost half (47 percent) of all students enrolled in public institutions of higher education attend two-year colleges. One-tenth of the students in private institutions are enrolled in two-year colleges. In the South, the percentage of two-year college enrollments is slightly higher in the private sector and somewhat lower in public institutions (see Table 9).
- Graduate enrollment, which grew rapidly between 1970 and 1975 — 40 percent nationally and 75 percent in the South — slowed considerably between 1976 and 1982, decreasing by one percent in the nation and increasing five percent in the South (see Table 11).
- During the past decade, part-time enrollment as a share of total public enrollment increased about 12 percent nationally (to 45 percent) and about 14 percent (to 42 percent) in the South (see Table 15).
- In the last 15 years, the proportion of women attending institutions of higher education has climbed steadily. The majority of college students today are women (see Table 16).
- In the 14 SREB states, 14 percent of the students enrolled in higher education in 1982 were black; blacks represent 18.7 percent of the total population. Hispanic students accounted for 4.4 percent of the enrollment; Hispanics represent 6.2 percent of the population. Some 90 percent of the region's Hispanic students attend institutions in Florida or Texas (see Tables 17 and 18).

NOTES: "Program" is defined according to Higher Education General Information Survey (HEGIS) classifications.

Complete information on terminations and consolidations of doctoral programs during this period is not available; however, significant numbers of such program eliminations are known to have occurred in several states.

SOURCE: SREB doctoral information exchange.

West Virginia	227	83	0.32	0.34	0.37

* These figures represent the ratio of total college enrollment to the population aged 18 to 24. This index is often used as a proxy measure for the participation rate in higher education. Due to interstate migration of students and variations among states in the degree to which vocational-technical enrollments are included in collegiate enrollments, and because many college students today are outside this age group, this measure is easily misinterpreted and should be used with caution.

NOTE: Some of the original data were truncated and rounded for this table, which may alter the totals slightly.

DEGREES

Highlights

From 1971 to 1982 in the South: —

- The number of bachelor's degrees increased in business and management (74 percent) and engineering (84 percent), and decreased in education (-33 percent) and social sciences (-35 percent) (see Table 34).
- The increases in the number of master's degrees were 47 percent in education, 211 percent in business and management, 196 percent in public affairs and services, and 27 percent in engineering (see Table 35).
- The number of doctorates in education and the biological sciences showed increases — 68 and 8 percent, respectively. The physical and social sciences both registered losses (see Table 36).
- The decline in the number of doctorates awarded in engineering — a drop of about 34 percent — is indicative of a critical shortage in qualified faculty in engineering and related fields (see Table 38).
- The number of first professional degrees almost doubled, with quantum leaps in some fields — in dentistry, the increase was 50 percent; in medicine, 93 percent; and in law, 102 percent (see Table 37).
- The field of education accounts for 32 percent of all degrees awarded at the master's level in the nation and 41 percent in the South (see Tables 30 and 35).
- The latest information shows that in the SREB states women received 51 percent of the bachelor's degrees, 24 percent of the first professional degrees, 56 percent of the master's degrees, and 34 percent of the doctorates awarded (see Tables 26, 28, 30, and 32).
- Blacks received 11.6 percent of the bachelor's degrees, 4.5 percent of the first professional degrees, 9.2 percent of the master's degrees, and 4.8 percent of the doctorates awarded by Southern colleges and universities in 1980-81 (see Tables 27, 29, 31, and 33).

SECTION 4 INSTITUTIONAL FINANCES

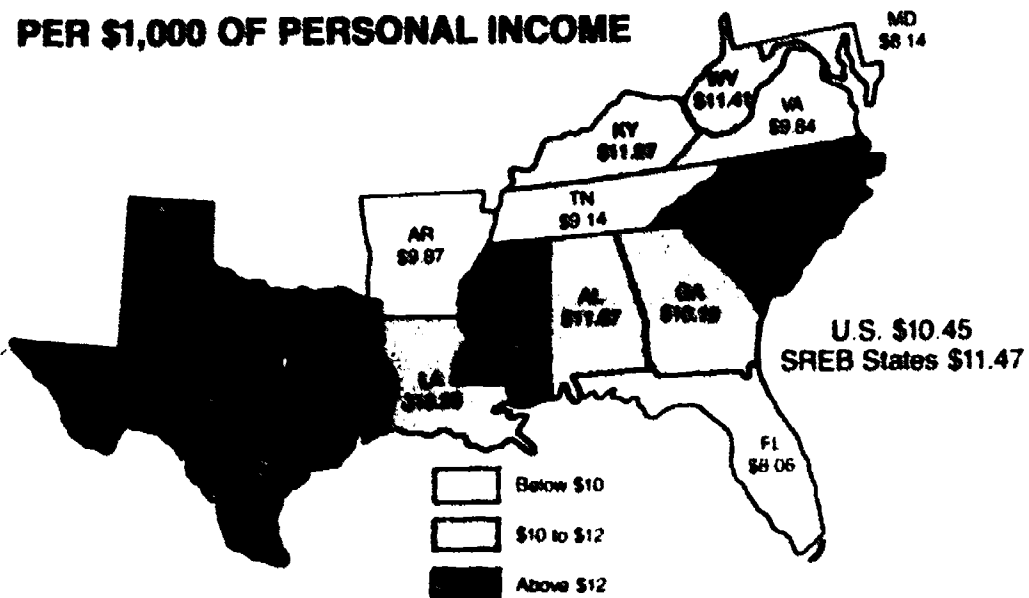

STATE APPROPRIATIONS FOR OPERATING EXPENSES OF HIGHER EDUCATION, 1983-84

TWO-YEAR INCREASE, 1982 TO 1984

SOURCE: M. M. Chambers, *Appropriations of State Tax Funds for Operating Expenses of Higher Education 1983-84* (Washington, DC: National Association of State Universities and Land-Grant Colleges, 1983).

PER \$1,000 OF PERSONAL INCOME

SOURCE: *The Chronicle of Higher Education*, "Fact-File," October 26, 1983.

INSTITUTIONAL FINANCES

Highlights

- From 1974 to 1984, appropriations of state tax funds for higher education operating expenses increased 211 percent in the South and 159 percent in the nation. The 1983-84 appropriation per capita for the Southern states (\$116) exceeds the national average (\$110).
- State operational appropriations for higher education in the SREB states, as a percent of state taxes, range from 12 to 21 percent. Southern states appropriate 16.8 percent of state taxes for higher education; the national average is 14.1 percent (see Table 41).
- Almost half of total current funds revenues of public colleges and universities in the SREB states come from state appropriations. Tuition and fees (12 percent), local government (1 percent), federal government contracts and grants (10 percent), auxiliary enterprises (11 percent), and hospitals (7 percent) contribute the bulk of other revenues (see Table 43).
- Public colleges and universities spend about half of current funds expenditures for the basic functions of instruction (36 percent), research (9 percent), and public service (5 percent); the balance is used for various administrative and support services, including hospital operations (see Table 44).
- The total current funds revenues of institutions of higher education in the South increased 25 percent for public institutions and 27 percent for private institutions in two years. About one-third of total current funds revenues for higher education in the United States goes to private institutions; in the SREB states, private institutions receive about one-fourth of the total (see Table 45).
- Twenty-three Southern universities are among the 100 institutions receiving the largest amounts of federal support for research and development (see Table 48).

TABLE 40

Appropriations of State Tax Funds for Operating Expenses of Higher Education 1973-74, 1981-82, 1983-84; Appropriations Per Capita 1983-84

	Appropriations (Thousands of Dollars)			Percent Increase		Per Capita

West Virginia	81,796	192,092	199,319	3.8	144	102

NOTES: Appropriations exclude dollars for capital outlay and debt service. Also excluded are monies derived from sources other than state tax funds, with the exception of Texas, which includes federal revenue sharing funds appropriated by the Texas legislature. The figures include funds for health programs, state scholarship and other financial aid programs, and higher education coordinating or governing boards.

The appropriations information above has been updated with data from M.M. Chambers, *Grapeline*.

Some of the original data were truncated and rounded for this table, which may alter the totals slightly.

SOURCES: M.M. Chambers, *Appropriations of State Tax Funds for Operating Expenses of Higher Education, 1983-84* (Washington, DC: National Association of State Universities and Land-Grant Colleges, 1983); and U.S. Bureau of the Census, *Current Population Reports, Series P-25, No. 930, "Estimates of the Population of States, by Age: July 1, 1981, and 1982"* (Washington, DC: U.S. Government Printing Office, 1983)

SECTION 5 STUDENT FINANCES

STATE AWARDS FOR STUDENT FINANCIAL AID AS A PERCENT OF STATE APPROPRIATIONS FOR HIGHER EDUCATION

SOURCE: Donald A. Gillespie and Nancy Carlson, *Trends in Student Aid: 1963 to 1983* (Washington, DC: The Washington Office of the College Board, December 1983).

ESTIMATED STUDENT AID, BY SOURCE, 1983-84 ACADEMIC YEAR, UNITED STATES

SOURCES: National Association of State Scholarship and Grant Programs, *15th Annual Survey, 1983-84 Academic Year* (Deerfield, IL: National Association of State Scholarship and Grant Programs, 1984); M. M. Chambers, *Appropriations of State Tax Funds for Operating Expenses of Higher Education 1983-84* (Washington, DC: National Association of State Universities and Land Grant Colleges, 1983).

STUDENT FINANCES

Highlights

- Tuition and required fees for state residents increased at most public colleges and universities in the region from 1983 to 1984. Median tuition and required fees increased 15 and 25 percent at Doctoral I and II institutions, respectively. At Master's I, Baccalaureate, and Two-year institutions, the increases were 13, 13, and 9 percent, respectively (see Table 50).
- Student financial support from Basic Educational Opportunity (Pell) Grants remained relatively stable from 1980 to 1984. In its efforts to hold down domestic spending, the federal government has not increased financial aid for students (see Table 51).
- Funding for federal campus-based student financial aid programs for College Work Study and National Direct Student Loans increased slightly from 1982 to 1984, while support for Supplemental Educational Opportunity Grants decreased (see Table 52).
- State funding for comprehensive state scholarship and grant programs for student financial aid grew 44 percent in the South from 1980 to 1982 and dropped 12 percent from 1982 to 1984. Several states had great fluctuations during this period. State student aid funding in the South accounts for only 9.2 percent of the national total (see Table 55).

SECTION 6 FACULTY

1983-84 FACULTY SALARIES, BY SEX, ALL INSTITUTIONS, UNITED STATES

SOURCE *Academe Bulletin of the AAUP, "Annual Report on the Economic Status of the Profession, 1983-84,"* Vol. 70, No. 2 (July August 1984)

FACULTY

Highlights

- Faculty in the fields of law, engineering, and business and management have the highest salaries, on the average. Business and management faculty have had the largest salary increase in the past two years — over 15 percent (see Table 57).
- Faculty salaries in the SREB states increased 116 percent from 1972 to 1984. At the same time, inflation rose 149 percent thus eroding the purchasing power of the average faculty salary (see Table 57).
- Salaries for faculty in Southern colleges and universities are about 6 percent less than faculty salaries nationally (see Tables 58, 59, 60, and 61).
- In 1983-84, the student-faculty ratio was about 20 to 1 in the public institutions in the SREB states (see Table 62).

West Virginia	26.9	23.0	27.1	27.1	26.1

* The student-faculty ratio was derived by dividing the number of full-time-equivalent students by the number of full-time instructional faculty.

NOTE: See Appendix for definitions of institutional categories.

SOURCE: SREB-State Data Exchange with state higher education agencies, 1983-84.

APPENDIX

SREB-STATE DATA EXCHANGE DEFINITIONS OF INSTITUTIONAL CATEGORIES*

Category	Definition
Doctoral I	Institutions awarding at least 100 doctoral degrees which are distributed among at least 10 HEGIS categories (2-digit classification) with no more than 50 percent of the degrees in any one category.
Doctoral II	Institutions awarding less than 100 but at least 30 doctoral degrees which are distributed among at least 5 HEGIS categories (2-digit classification).
Doctoral III	Institutions awarding less than 30 but at least 1 doctoral degree.
Master's I	Institutions offering master's level programs in 10 HEGIS categories (2-digit classification) and awarding at least 100 master's degrees.
Master's II	Institutions awarding less than 100 but at least 1 master's degree.
Baccalaureate	Institutions that award the baccalaureate degree as the highest degree.
Two-Year	Institutions below the baccalaureate level whose awards are exclusively or predominantly associate degrees, either in college-parallel or vocational/technical fields.
Specialized	Stand-alone institutions with specialized degree programs. These may include medical or health science centers and, in some instances, stand-alone law schools, fine arts schools, and engineering schools, etc.

*Used in Tables 13, 42, 50, 58, 59, 60, 61, and 62.

STATE AGENCIES RESPONSIBLE FOR COORDINATION OF HIGHER EDUCATION

This list includes for each state, the state agency or agencies responsible for the coordination of collegiate institutions, including those responsible for two-year college systems where this function is a separate or shared responsibility.

Alabama

Dr. Joseph T. Sutton, Executive Director
Commission on Higher Education
One Court Square, Suite 221
Montgomery, Alabama 36197-0001
(205) 269-2700

Dr. Charles Payne, Chancellor
State Department of Postsecondary Education
419 S. Perry St.
Montgomery, Alabama 36104
(205) 834-2200
(Two-Year Institutions)

Arkansas

Dr. Gary D. Chamberlain, Director
Arkansas Department of Higher Education
1301 West Seventh Street
Little Rock, Arkansas 72201-2993
(501) 371-1441

Florida

Dr. Barbara W. Newell, Chancellor
Board of Regents
State University System of Florida
107 West Gaines Street, Suite 210
Tallahassee, Florida 32304
(904) 488-4234

Dr. Clark Maxwell, Executive Director
Board of Community Colleges
Department of Education
Collins Building
107 West Gaines Street
Tallahassee, Florida 32304
(904) 488-1721

Dr. Thomas Furlong, Director
Florida Postsecondary Education Planning
Commission
Knott Building
Tallahassee, Florida 32301
(904) 488-6029

Georgia

Dr. Vernon D. Crawford, Chancellor
Board of Regents of the University System
of Georgia
244 Washington Street, S.W.
Atlanta, Georgia 30334
(404) 656-2200

Kentucky

Mr. Harry M. Snyder, Jr., Executive
Director
Kentucky Council on Higher Education
West Frankfort Office Complex
U.S. 127, South
Frankfort, Kentucky 40601
(502) 564-3553

Louisiana

Dr. William Arceneaux, Commissioner
Louisiana Board of Regents
161 Riverside Mall
Baton Rouge, Louisiana 70801-1389
(504) 342-4253

Maryland

Dr. Sheldon H. Knorr, Commissioner
Maryland State Board for Higher Education
16 Francis Street
Annapolis, Maryland 21401
(301) 269-2971

Dr. James D. Tschechtelin, Executive
Director
State Board for Community Colleges
Jeffrey Building
16 Francis Street
Annapolis, Maryland 21401
(301) 269-2881

Mississippi

Dr. E. E. Thrash, Executive Secretary
and Director
Board of Trustees of State Institutions
of Higher Learning
P.O. Box 2336
Jackson, Mississippi 39205
(601) 982-6611

Dr. George V. Moody, Director
Division of Junior Colleges
State Department of Education
P.O. Box 771
Jackson, Mississippi 39205
(601) 354-6962

North Carolina

Mr. William C. Friday, President
University of North Carolina
General Administration
P.O. Box 2688
Chapel Hill, North Carolina 27514
(919) 962-6981

Mr. Robert Scott, State President
Department of Community Colleges
Education Building
State Board of Education
Raleigh, North Carolina 27611
(919) 733-7051

South Carolina

Dr. Howard R. Boozer, Executive Director
South Carolina Commission on Higher
Education
1429 Senate Street, Suite 1104
Columbia, South Carolina 29201
(803) 758-2407

Mr. G. William Dudley, Jr., Executive
Director
State Board for Technical and
Comprehensive Education
111 Executive Center Drive
Columbia, South Carolina 29210
(803) 758-6919

Tennessee

Dr. G. Wayne Brown, Executive Director
Tennessee Higher Education Commission
501 Union Building, Suite 300
Nashville, Tennessee 37219
(615) 741-3605

Dr. Roy S. Nicks, Chancellor
State University and Community College
System of Tennessee
1161 Murfreesboro Road
Nashville, Tennessee 37217
(615) 741-4821

Texas

Dr. Kenneth H. Ashworth, Commissioner
Coordinating Board, Texas College and
University System
P.O. Box 12788, Capitol Station
Austin, Texas 78711
(512) 475-4361

Virginia

Dr. Gordon K. Davies, Director
State Council of Higher Education
for Virginia
James Monroe Building
101 North Fourteenth Street
Richmond, Virginia 23219
(804) 225-2137

Dr. Johnas F. Hockaday, Chancellor
Virginia Community College System
James Monroe Building
101 North Fourteenth St.
Richmond, Virginia 23219
(804) 225-2117

West Virginia

Dr. Leon H. Ginsberg, Chancellor
West Virginia Board of Regents
950 Kanawha Boulevard, East
Charleston, West Virginia 25301
(304) 348-2101
