ABSTRACT

This is one of a series of reports which provide definitions of and descriptive data on the variables used in the Comparative Study of Phase IV of the Individually Guided Education (IEG) Evaluation Project. Phase IV investigated three curriculum programs specifically designed to be compatible with instructional programming for the individual student: (1) the Wisconsin Design for Reading Skills Development (WDRSD); (2) Developing Mathematical Processes (DMP); and (3) Prereading Skills (PRS). Information on instructional methods and pupil outcomes for grades 2 and 5 was collected from achievement monitoring and domain referenced tests, teacher logs, and classroom observations. This paper focuses on reading skills achievement. It reports data by schools and by school type and curriculum group for the eight administrations of the achievement monitoring tests. Results are given for each of the 12 WDRSD skills content aggregations. It is not clear that school type or curriculum has a significant effect on achievement for either grade. Appendices, the bulk of the volume, contain all forms and versions of the tests. (BS).

MISSION STATEMENT

The mission of the Wisconsin Research and Development Center is to improve the quality of education by addressing the full range of issues and problems related to individualized schooling. Teaching, learning, and the problems of individualization are given concurrent attention in the Center's efforts to discover processes and develop strategies and materials for use in the schools. The Center pursues its mission by

- conducting and synthesizing research to clarify the processes of school-age children's learning and development
- conducting and synthesizing research to clarify effective approaches to teaching students basic skills and concepts
- developing and demonstrating improved instructional strategies, processes, and materials for students, teachers, and school administrators
- providing assistance to educators which helps transfer the outcomes of research and development to improved practice in local schools and teacher education institutions

The Wisconsin Research and Development Center is supported with funds from the National Institute of Education and the University of Wisconsin.

Abstract

This report is one in a series of papers which provide definitions of and descriptive data on the variables used in the Comparative Study of Phase IV of the IGE Evaluation Project. Specifically, it deals with a single variable--Reading Skills Achievement--and reports data by schools and by school type and curriculum group for the eight administrations of the achievement monitoring tests. A more detailed description of the design of the study and the expected relationships among the variables is provided in Project Paper 80-2 (Romberg, Webb, Stewart & Nerenz, 1980) and the reader may find that report helpful in understanding the data discussed here.

INTRODUCTION

The IGE Evaluation Project has as a central objective the identification of features of IGE schooling which contribute to successful instruction, especially in reading skills and mathematics. Although the first four phases of this project focused on different aspects of IGE, they were designed to provide complementary data bases resulting in a comprehensive description of this form of schooling. With this goal in mind, Phase IV was designed to supplement information collected in Phases I and III by providing detailed information on a small number of curricular and instructional variables. That is, whereas these phases investigated organizational, system, general means of instruction, and general achievement variables, the main purpose of Phase IV was to investigate the three R & D Center-produced curriculum programs whose instructional procedures and materials were specifically designed to be compatible with instructional programming for the individual student. These programs are the Wisconsin Design for Reading Skills Development (WDRSD) (Otto, 1977), Developing Mathematical Processes (DMP) (Romberg, 1977), and Prereading Skills (PRS) (Venezky & Pittelman, 1977).

Phase IV was divided into two parts--the Descriptive Study and the Comparative Study--and information on the design and procedures used during each portion may be found in Project Papers 79-42 and 80-2 (Webb & Romberg, 1979; Romberg, Webb Stewart, & Nerenz, 1980.) Briefly, each part was designed to provide detailed information on two variables--means of instruction and pupil outcomes--using achievement monitoring

and domain referenced tests, teacher logs, and classroom observations. In addition, a smaller amount of information on background, organizational, and program variables was obtained using principal, unit leader, and teacher interviews. This paper focuses on the data obtained from the reading skills achievement monitoring tests and reports aggregated general objective scores for Grade 2 and Grade 5 students from 11 schools over eight test administrations.

DATA COLLECTION AND ANALYSIS

Test Development and Administration

The reading skills achievement monitoring tests were designed to provide information on a large number of skills from the three elements of the WDRSD program and yields a measure of change in achievement for the entire group rather than for individual children. At Grade 2, data were obtained for 25 reading skills, and 26 objectives were tested at Grade 5. A list of skills, code numbers, and corresponding test items is provided in Tables 1 and 2.

In developing these tests, item statistics obtained in the WDRSD Descriptive Study were considered and test development procedures and correlational and reliability estimates are reported for these items in Project Papers 79-29 (Dunham, Nerenz, & Webb, 1979), and 79-2, 79-5, and 79-8 (Nerenz, 1979a-c). The small number of items and skills from the Descriptive Study tests which were eliminated from the Comparative Study tests because of low biserial correlations or unclear graphics (2 skills at Grade 2, 3 skills at Grade 5), were replaced by skills and items having high biserial correlations on a break-in testing (Stewart, 1976) and to which a considerable amount of instructional time had been allocated in the Descriptive Study.

Once skills had been identified and items were selected, the items were randomly assigned to one of four Grade 2 and Grade 5 test forms.

331	F	9	card filing rules	17		9	11
345	F	12	catalog cards: selecting source	18		19	20

Thus, while all of the forms had the same number of items, all of the skills were not tested on each of the forms. The children at each grade were then divided into four groups. The four test forms were rotated among these groups over the test administrations as shown in Table 3 such that each group was administered the same test form on two occasions--once during the October to January administrations and once during the February to May administrations.

Analysis

As part of the analysis, the reading skills were aggregated into specific and general objectives. This process is described in detail in Project Paper 80-3 (Nerenz & Webb, 1980) and the relationship of the skills which were tested to the 12 general objectives is summarized in Figures 1-6.

This paper reports objective easiness scores on these general objectives for each school and for groups of schools having the same curriculum program and school type. The scores were calculated by dividing the number of correct responses by the number of possible responses and are reported as a percentage. The larger the percentage, the easier the skill.

Figure 6. Grade 5 WDRSD study skills content aggregations.

III

RESULTS AND DISCUSSION

Grade 2

Information on achievement across the eight achievement monitoring test administrations is provided in Table 4. The percentage of correct responses and overall gain in achievement from Test Time 1 (October) to Test Time 8 (May) are first reported for each school individually. In addition, a mean percentage correct and an average gain score are provided for the three school type/curriculum groups -IGE/WDRSD, IGE/non-WDRSD, and non-IGE/WDRSD.

Phonic Analysis--Consonants (01). It is clear that students at many of the schools had not mastered the skills comprising this general objective at Test Time 1 and that by Test Time 4 scores at all of the 11 were close to or above the mastery level (80% correct). It is interesting that scores for the IGE/WDRSD schools were the lowest of all groups both at Time 1 and at Time 8, but that these schools also showed the largest gains over the entire investigation period. With the exception of two schools (Schools 372 and 901), students seemed to have reached their highest level of proficiency at Test Times 4-7, with the highest scores for six of the nine schools occurring at Test Time 7.

Phonic Analysis--Vowels (02). Scores on this group of skills are much more similar both among schools and across the three groups of schools at Test Time 1 than they were for the previous general objective and there are few large differences at Test Time 8 with scores for all schools being close to, but not generally exceeding 80% correct. Again, the group of schools having the lowest Time 1 scores showed the largest gains. It is interesting that the highest scores for this objective are generally not found in Periods 4-7; in contrast to General Objective 01, the largest percentages of correct responses for Objective 02 occurred in Period 8 at almost half of the schools.

Phonic Analysis--Silent Letters (03). Test scores at Time 1 for this general objective were the lowest of all the Word Attack general objectives (Code numbers 01-05) and there was considerable variation among schools, with the percentage correct ranging from .17 (School 466) to .79 (School 476). Although there is something unusual about the large drop in the scores between Times 1 and 2 at School 476 for this objective, it is interesting that schools having the highest and lowest percentages of correct responses belong to the same school type/curriculum group (IGE/WDRSD) and thus, these factors seem relatively ineffective in predicting achievement for these skills. As shown by the overall gain scores, students at most schools achieved substantial improvements over the investigation period, yet only two schools (School 493 and 902) reached mastery levels. With the exception of School 410, where achieve-

ment varies considerably from Period 1 to Period 6, and School 476 where initial achievement was unusually high, students seem to show steady gains with the highest percentages correct observed during Periods 7 and 8.

Structural Analysis (04). As was the case with General Objective 02, there are few large differences among scores for schools or groups of schools for the Structural Analysis skills, especially at Time 8. As on the previous objective, gains from Time 1 to Time 8 were generally quite large. The variation in achievement across test administrations is particularly interesting for this general objective. The IGE/non-WDRSD schools show relatively steady gains with the highest achievement at Time 7 or 8. This is also the case for the non-IGE/WDRSD schools although growth is somewhat more irregular at two of the four schools (Schools 900 and 903). The largest differences are among the IGE/WDRSD schools. At School 466, there are two plateaus - Periods 1-3 and Periods 4-8. There is also no gain between times 1 and 2 at Schools 476 and 507. Finally, students at School 451 seem to be most proficient at Time 5 followed by a plateau and a small decline in performance from Test Times 6 through 8.

Vocabulary Meaning (05). Scores at the 11 schools were very similar at Test Time 1 with gain of 18% to 22% for the three types of schools over the investigative period. Students reached mastery levels (80%) at only one school (School 507) however, with most schools improving

from about 46% to about 67% correct. Highest scores were generally reached at Times 7 and 8 although there is considerable variation in scores across the eight test administrations especially at School 451, while at Schools 466 and 372 the highest percentages correct were scored at Test Times 1 and 3.

Map Skills (06). It is interesting that there were generally very small gains in achievement from Test Time 1 to Time 8 for these skills, with students at four of the eight schools using the WDRSD reaching 80% correct at some point in the investigation period.

Graph and Table Skills (07). Scores for this general objective were the lowest of the three Study Skills areas (Code numbers 06-08), with schools ranging from 25% to 56% correct at Test Time 1. It is interesting that the two groups of schools using the WDRSD scored somewhat higher than the non-WDRSD schools at this test time, although differences were less noticeable at Test Time 8 because of the large gains by all three IGE/non-WDRSD schools. There is no consistent pattern of growth for this general objective. At School 466, scores are slightly irregular with little overall gain. Students at School 451 plateau with 40-50% correct until Test Time 5 when they improve 18% and plateau again with 60-70% correct. Relatively steady gains are shown at School 476 and although they improve only 6% better overall, there is a change of 20% from Time 1 to Time 7. Similar steady gains are followed by a plateau during Times 6-8 at School 507. Such large

differences in the pattern of achievement gains are also characteristic of the seven remaining schools. Since this objective seems to differ from the others examined to this point, particular attention should be given to it when relationships among the time, means of instruction, and achievement variables are considered.

Reference Skills (08). Students at the IGE/WDRSD schools scored the lowest overall at Test Time 1 and evidenced the largest gain from Time 1 to Time 8. The very small average gain for the non-IGE/WDRSD group reflect the loss of 14% at School 903. However, this loss may be due to the testing conditions at Time 8 in that the score differs from Time 7 by -27% and students did evidence a gain of 13% from Time 1 to Time 7. It is interesting that students at five of the schools reached a mastery level of 80% correct at some point during the investigative period compared with four for Map Skills (06) and none for Graph and Table Skills (07). It is interesting that some students seemed to score relatively well at two points during the testing - once near the middle and once at the end at certain schools (Schools 466, 476, 507, 373, 410, 903) - while at other schools students peaked near the middle of the period and then scores declined (Schools 451, 493, 900, 902). These two patterns may be due to the way in which time was allocated and should be investigated further.

Sentence Meaning Skills (10). Students at all eleven schools scored very well on these skills at Test Time 1 with all percentages

correct near or above 80%. Performance was very consistent across test times with the exception of School 903 at Test Time 2, and there are perfect scores (1.00) for 15 of the test time/school entries, 7 at the non-WDRSD schools.

Passage Meaning Skills (11). The range in scores was relatively small - 59% to 74% correct - at Test Time 1 with means for the three groups differing by only 3%. Students at the non-IGE/WDRSD schools showed the smallest and the largest gains over the eight administrations, although most generally small or negative changes in achievement reflected a rising pattern of scores over the early periods followed by a decline rather than an absolute lack of change in achievement.

Summary of Grade 2 Achievement Scores

There are several interesting aspects of these achievement scores. First, it is clear that school type and curriculum do not have a consistent effect upon achievement: neither IGE nor non-IGE schools scored consistently higher or lower across the 10 objectives. This is also true of WDRSD and non-WDRSD schools. Second, although the pattern of gains in achievement across test administrations is not consistent within schools or skills, there do appear to be three more regularly occurring types of change in scores - a steady gain over all eight periods, a gain to Period 4-6 followed by a decline, and a gain, usually near Time 4, followed by decline and another gain at or near the end of

the investigation period. Further investigation into the time and means of instruction variables which accompany these patterns should be considered. Third, it is clear that the gain scores actually reflect only a portion of the actual achievement and are most effective in describing results only when the first pattern of achievement, steady gain, is considered.

Grade 5

Information on achievement across the eight achievement monitoring test administrations is provided in Table 5. The percentage of correct responses and overall gain in achievement from Test Time 1 (October) to Test Time 8 (May) are first reported for each school individually. In addition, a mean percentage correct and an average gain score are provided for the three school type/curriculum groups - IGE/WDRSD, IGE/non-WDRSD, and non-IGE/WDRSD.

Phonic Analysis--Silent Letters (03). At Test Time 1, scores for the three groups of schools differed by only 13% with most schools averaging about 50% correct and WDRSD schools generally scoring somewhat higher than non-WDRSD schools. Gains by Test Time 8 were not large for many of the schools and there were a considerable number of declines in achievement. As might be expected from this set of gain scores, no schools showed steady increases and scores at one school steadily declined (School 493). The most frequent pattern of achievement is

generally quite flat with minor increases and declines but no recognizable high point at any place in the eight testings.

Structural Analysis (04). Scores for the three groups of schools differed by only 2% at Test Time 1. By Time 8, however, scores differed by 9% and the non-IGE/WDRSD showed the largest gains. In looking at the patterns of achievement over time, ten of the eleven schools show high percentages correct followed by declines in achievement over the eight testings. For example, at School 410 students gained 21% from Time 1 to Time 2, then scores declined almost to their original level by Time 6 followed by another large gain at Time 8. This pattern of achievement varies considerably from the more steady gains seen at Grade 2 and differences in time and means of instruction should be considered.

Map Skills (06). Average scores for the three groups of schools were very similar at Times 1 and 8 with ranges at both times over 20%. Unlike the Word Attack skills (03 and 04), there were no overall declines in achievement from Time 1 to Time 8 and gains averaged about 10%. There are also more steady gains than on the two previous skills (Schools 466, 493, 900, 901) although very little gain overall is also shown at Schools 451, 507, 372, 410, and 903.

Graph and Table Skills (07). Time 1 and Time 8 scores are very similar at most of the schools and gains larger than 10% from Time 1 to Time 8 were evidenced at only two schools (Schools 466 and 902). These gain scores may be deceiving, however, since the highest and lowest percentages correct across the eight testings differ by 10% or more at ten of the 11 schools and thus a pattern of steady increases to a high score at Time 8 was not characteristic.

Reference Skills (08). As was the case for the two preceding Study Skills areas, scores for individual schools and for groups of schools differed very little at Test Time 1 and large gains from Time 1 to Time 8 were not evidenced at most of the schools. It is interesting, however, that increases in achievement were largest and most frequent for non-IGE/WDRSD schools and were lowest for IGE/non-WDRSD schools. Overall, then, there was relatively stable achievement at seven of the 11 schools (Schools 466, 451, 476, 372, 410, 493, and 903) and large gains up to the middle test administrations followed by declines during later testings at two more schools (Schools 507 and 901). Given these relatively clear differences in patterns achievement, differences in the time and means of instruction variables should be considered.

It is also interesting that for the three Study Skills combined, students exceeded a mastery level of 80% correct only once - General Objectives 06: Map Skills, School 451, Test Time 6. Thus, it appears that even though students generally maintained or improved their skills, they all had not completely learned the material in these specific areas.

Word Meaning Skills (09). Scores at Test Time 1 were very similar for the three groups of schools and, as indicated by the positive gain scores, students generally improved over the eight testings. It is interesting that the largest and most consistent gains were evidenced by the non-IGE/WDRSD schools. There are large differences in achievement patterns for this skill: little change (Schools 466, 476, 372), steady increase (School 900), or increases and declines (Schools 451, 410, 902). Scores at Schools 507 and 493 are of particular interest in that there is no change in achievement for several periods (School 507 Periods 1-7; School 493, Periods 3-8) contrasted by a single gain of 10% or more between the remaining test times. It would be interesting to examine the relationship of instruction to achievement in these particular cases.

Sentence Meaning Skills (10). Students generally scored quite high on this general objective at Test Time 1, with five of the eleven schools above 75% correct. Although only six schools achieved this level correct at Time 8, nine of the 11 exceeded that criterion at some point in the testing. It is also interesting that several of the negative gain scores are due to large decreases in achievement between Test Time 7 and Time 8 (Schools 451, 372, 903) and thus may be due more to the way in which tests were scheduled and administered rather than to actual student learning. This relationship between Time 7 and Time 8 test scores should be further investigated if time/gain correlations are to be used.

Passage Meaning Skills (11). As was the case for the two previous Comprehension skills, Time 1 scores varied very little and gains for many of the schools were not large. This relatively flat pattern of scores is characteristic of six schools (Schools 466, 476, 507, 372, 493, 900) with larger increases and declines at another three (Schools 451, 410, 903). The scores at Schools 901 and 902 vary considerably from these more frequent patterns and the intervention of instruction between Test Times 1 and 4 at School 902 and between Times 1 and 2 at School 901 might be investigated. Overall, however, there were not instances of students approaching or exceeding a mastery level of 80% correct for this skill and it appears that of the three Comprehension skills (Code numbers 09, 10, 11) students generally were very proficient at only one - Sentence Meaning Skills (10).

Summary of Grade 5 Achievement Scores

As at Grade 2, it is not clear that school type or curriculum has a significant effect on achievement, although in several instances (code numbers 03, 04, 08, 09) non-IGE/WDRSD schools did seem to show larger and more frequent gains. It is also interesting that steady gains in achievement are less characteristic of growth on the general objectives than at Grade 2 and there are more instances of small and unstable changes, resulting in a generally flat pattern of scores, as well as more cases where scores improve and then decline by Time 8. Because of these more frequent gains and declines, the relationship of time allocations to achievement should be carefully considered. However, since there are large declines from

Time 7 to Time 8 for several schools on particular objectives, the use of Time 8 scores in time/gain correlations may be inappropriate. In addition, the use of overall gain scores should be reconsidered since much of the growth evidenced during Test Times 4-6 is not reflected in the Time 8 scores and thus in the overall gain.

APPENDIX A

Grade 2 Achievement Monitoring Tests

The four forms (A-D) of the Grade 2 achievement monitoring tests which were used in the Reading Skills Comparative Study of Phase IV of the IGE Evaluation Project are included in this appendix. In that some of the test forms were changed slightly between the first and second administrations, a copy of the instructions and the two versions of the tests (October and November) are provided when appropriate.

Test Administrator's Manual¹
Reading Inventory 2B

Phase IV
IGE Evaluation
October 1978

¹Revised November 1978

Published by the Research and Development Center for Individualized Schooling. The project presented or reported herein was performed pursuant to a grant from the National Institute of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the National Institute of Education, and no official endorsement by the National Institute of Education should be inferred.

Materials for Testing

Each child will need:

- a Reading Inventory 2B booklet
- a sharpened pencil with an eraser
- a cleared desk top or space to work

Each test administrator will need:

- this test administrator's manual
- a Reading Inventory 2B booklet for demonstration
- extra sharpened pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing

Familiarity with Directions

Directions to be read to children are printed in regular type. Directions to the test administrator are printed in *italic*. Since all directions given to the children must be read word for word, the test administrator should study the directions (starting on page 2) prior to testing. Familiarity with test directions is enhanced by working with a copy of the test in hand.

Identification Information

On each booklet cover there are blanks for identification information. The test administrator will need to enter both the child's name and ID number prior to testing. The blanks for "Month" and "School" can be filled in either before or after testing.

Directions for Administering Reading Inventory 2B

Read the directions on the test booklet cover silently as I read them out loud.

This is a test about reading skills. There are questions about letter sounds, words, sentences, and stories. There also are questions about reading maps, graphs, and tables. When you're not sure of an answer, mark the answer you think is right.

Now look at the example box below. I am going to read a nonsense, or pretend, word to you. Listen carefully and decide which letter makes the beginning sound of the word. Ready? Tuv. [*Pronounce tuv so that it rhymes with love.*] Tuv. Which letter makes the beginning sound? [*Wait for a response.*] The letter t does, so fill in the circle beside t in the example box. [*Pause.*] Open your booklet to page 1. [*Pause.*]

Pace children through the questions. Wait until all children have completed a question before proceeding to the next question.

Questions 1-4 involve the use of nonsense words. Pronounce the nonsense word so that it rhymes with the real word in parentheses.

I am going to ask you a few more questions about nonsense, or pretend, words. Listen carefully and fill in the circle beside your answer. Ready?

Question

- 1 What vowel sound do you hear in this word?
Pide [side] . . . pide [side].
- 2 Is the vowel sound in this word long or short?
Pide [side] . . . pide [side].
- 3 There are several rules that tell us how to pronounce vowels in words. This question is about the middle vowel rule. This rule tells how to pronounce words that have only one vowel in the middle. Decide whether I pronounce the nonsense word as the rule says it should be pronounced. Fill in the circle beside yes if I pronounce the word according to the rule. Fill in the circle beside no if I do not pronounce the word according to the rule. Ready?
Fep [pep] . . . fep [pep].
- 4 There are several rules that tell us how to pronounce vowels in words. This question is about the final vowel rule. This rule tells us how to pronounce words that have the only vowel at the end of the word. Decide whether I pronounce the nonsense word as the rule says it should be pronounced. Fill in the circle beside yes if I pronounce the word according to the rule. Fill in the circle beside no if I do not pronounce the word according to the rule. Ready?
Za [pay] . . . za [pay].

Question

- 5 Here is a sentence with four words below it. Find the word that is made up of two words and also makes the best sentence. Fill in the circle beside the word you choose. Read along silently as I read the sentence out loud. [*Do not read the answer choices.*]
 _____ seven years old.
- 6 There are three phrases, each with a word underlined. One of the underlined words tells us that something belongs to someone or something. Decide which underlined word tells us that something belongs to someone or something and fill in the circle beside your answer. [*Read the phrases once.*]
I'll walk teacher's pencil grass hut
- 7 Look at the two words beside number 7. Are the meanings of these two words the same, opposite, or different? [*Do not pronounce words or help with pronunciation.*]
- 8 Does the double o in this word have a long sound or a short sound? [*Do not pronounce the word or help with pronunciation.*]
- 9 Some words have more than one meaning. Which meaning is correct for the underlined word in this sentence? [*Do not pronounce words or help with pronunciation.*]
- 10 Some letters don't make sounds in a word. What are the silent letters in this word? There can be more than one. Fill in the circle below each silent letter. [*Do not pronounce word or help with pronunciation.*]
- 11 Which answer choice shows this word divided correctly into its syllables? Fill in the circle beside your answer. [*Do not pronounce the word or help with pronunciation.*]
- 12 Here is a sentence with four answer choices below it. Which answer choice tells us something belongs to someone or something? Read along silently as I read the sentence out loud. [*Do not read the answer choices.*]

The tree's apples are red, so I'm picking them today.

Read the story silently as I read it aloud. Then I will ask you a question about it.

Linda gave Max and Doug the dirty clothes. It was their turn to wash. Doug found the soap and some coins. They saw Judy at the laundromat. She was folding some clothes. Max began to drop the money into the washing machine. Then Doug put in the clothes and soap.

Question

13 What did Max begin to drop into the washing machine?

soap money clothes

Look in the story to find the word that will answer the question.

Read the story silently as I read it aloud. Then I will ask you a question about it.

Dad bought some vegetables at the market. He put 5 apples in a bag. Dad shopped for some meat. He bought some flowers at the market too.

14 What is the whole story about?

putting apples in a bag
shopping at the market
some vegetables

Read along silently as I read these sentences out loud. You are to believe that these first sentences are true. Decide what you know from them. Then I will read the last sentence and you decide whether it is right or wrong. Ready?

15 When lightning hits telephone poles, phones in the area do not work. All the telephones are 'working.' [Pause.]

Lightning didn't hit the telephone poles.

16 This is a number grid. The numbers on the edge of the grid name the cells. Fill in the circle at the end of Column 2.

17 This question has a table of the animals 3 farmers own. [Pause.] Who has only 2 sheep?

Question

Look at the map. [Pause.]

18 Who lives 4 houses away from Mac on Center Avenue?

19 Which word would come first if these words were in alphabetical order? You do not need to know how to pronounce the words to answer this question. [Do not read the answer choices out loud.]

20 This is a bar graph of the number of runs schools made during baseball season this year. Use it to answer the question.
[Pause.]

Dark School made 40 more runs than what school?

Directions for Administering Reading Inventory 2C

Read the directions on the test booklet cover silently as I read them out loud.

This is a test about reading skills. There are questions about letter sounds, words, sentences, and stories. There also are questions about reading maps, graphs, and tables. When you're not sure of an answer, mark the answer you think is right.

Now look at the example box below. I am going to read a nonsense, or pretend, word to you. Listen carefully and decide which letter makes the beginning sound of the word. Ready? Tuv. [Pronounce tuv so that it rhymes with love.] Tuv. Which letter makes the beginning sound? [Wait for a response.] The letter t does, so fill in the circle beside t in the example box. [Pause.] Open your booklet to page 1. [Pause.]

Pace children through the questions. Wait until all children have completed a question before proceeding to the next question.

Questions 1-3 involve the use of nonsense words. Pronounce the nonsense word so that it rhymes with the real word in parentheses.

I am going to ask you a few more questions about nonsense, or pretend, words. Listen carefully and fill in the circle beside your answer. Ready?

Question

- 1 What are the first three letters of this word?
Thrid [rid] . . . thrid [rid].

- 2 Two vowels are often sounded together to make a new sound. The answer choices are ew, oi-oy, and ou-ow. Oi-oy are grouped as one answer choice because they sound alike. Ou-ow are grouped as an answer choice because they sound alike, too. What sound made by two vowels do you hear in this word? Stoil [soil] . . . stoil [soil].

- 3 There are several rules that tell us how to pronounce vowels in words. This question is about the middle vowel rule. This rule tells how to pronounce words that have only one vowel in the middle. Decide whether I pronounce the nonsense word as the rule says it should be pronounced. Fill in the circle beside yes if I pronounce the word according to the rule. Fill in the circle beside no if I do not pronounce the word according to the rule. Ready?
Zem [beam] . . . zem [beam].

Question

- 4 This question is about base words, or root words. Find the answer choice where only the root, or base, word is underlined and fill in the circle beside it. [*Do not pronounce the word or help with pronunciation.*]
- 5 There are three phrases, each with a word underlined. One of the underlined words tells us that something belongs to someone or something. Decide which underlined word tells us that something belongs to someone or something and fill in the circle beside your answer. [*Read the phrases once.*]
- bird's cage couldn't you birds fly
- 6 Look at the underlined letters in these two words. Do the underlined letters in both words have the same sound or different sounds? Fill in the circle next to your answer. [*Do not pronounce words or help with pronunciation.*]
- 7 Look at the two words beside number 7. Are the meanings of these two words the same, opposite, or different? [*Do not pronounce words or help with pronunciation.*]
- 8 Does the double o in this word have a long sound or a short sound? [*Do not pronounce the word or help with pronunciation.*]
- 9 Some words have more than one meaning. Which meaning is correct for the underlined word in this sentence? [*Do not pronounce words or help with pronunciation.*]
- 10 Some letters don't make sounds in a word. What are the silent letters in this word? There can be more than one. Fill in the circle below each silent letter. [*Do not pronounce word or help with pronunciation.*]
- 11 Here is a sentence with four answer choices below it. Which answer choice tells us something belongs to someone or something? Read along silently as I read the sentence out loud. [*Do not read the answer choices.*]
- Sally said, "Isn't this your book?"
- Read this sentence silently as I read it out loud. Then I'll ask a question about it.
- 12 After Ann picked some roses, she took the baby for a walk.
- What did Ann do first?
- picked some roses took the baby for a walk

Question

Read the story silently as I read it out loud.
Then I will ask you a question about it.

It was a hot day. Jack turned on the hose. Then Jack sprayed water at the limp flowers. Andy and Susan wanted to run into the water. They laughed and ran through the cold water. Tracy hid behind the flower box. She didn't want to have wet clothes.

13 Who didn't want to have wet clothes?

Tracy Susan Andy

Look in the story to find the word that will answer the question.

14 This question has a table of the animals 3 farmers own. [Pause.]

How many horses does Farmer Smith have? Fill in the circle beside your answer.

15 Look at the map and map key to answer this question. [Pause.]

How would you travel from Wand to Fish?

16 This is a number-letter grid. The numbers and letters on the edge of the grid name the cells.

How many symbols are in column 6?

Read the story silently as I read it out loud.
Then I will ask you a question about it.

First Nancy played on the swings. Then she climbed the monkey bars. Later Nancy went down the slide. Finally, she played in the sandbox.

17 What is the whole story about?

climbing swings playing sandbox

Question

Look at the map. [Pause.]

- 18 Amy started at her house and walked 4 blocks down Main Street. Where did she end up?

This is a bar graph of the number of runs schools made during the baseball season this year. Use it to answer the question. [Pause.]

- 19 How many runs were made by East School and West School together?

- a cleared desk top or space to work

Each test administrator will need:

- this test administrator's manual
- a Reading Inventory 2D booklet for demonstration
- extra sharpened pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing

Familiarity with Directions

Directions to be read to children are printed in regular type. Directions to the test administrator are printed in *italic*. Since all directions given to the children must be read word for word, the test administrator should study the directions (starting on page 2) prior to testing. Familiarity with test directions is enhanced by working with a copy of the test in hand.

Identification Information

On each booklet cover there are blanks for identification information. The test administrator will need to enter both the child's name and ID number prior to testing. The blanks for "Month" and "School" can be filled in either before or after testing.

Directions for Administering Reading Inventory 2D

Read the directions on the test booklet cover silently as I read them out loud.

This is a test about reading skills. There are questions about letter sounds, words, sentences, and stories. There also are questions about reading maps, graphs, and tables. When you're not sure of an answer, mark the answer you think is right.

Now look at the example box below. I am going to read a nonsense, or pretend, word to you. Listen carefully and decide which letter makes the beginning sound of the word. Ready? Tuv. [*Pronounce tuv so that it rhymes with love.*] Tuv. Which letter makes the beginning sound? [*Wait for a response.*] The letter t does, so fill in the circle beside t in the example box. [*Pause.*] Open your booklet to page 1. [*Pause.*]

Pace children through the questions. Wait until all children have completed a question before proceeding to the next question.

Questions 1-5 involve the use of nonsense words. Pronounce the nonsense word so that it rhymes with the real word in parentheses.

I am going to ask you a few more questions about nonsense, or pretend, words. Listen carefully and fill in the circle beside your answer. Ready?

Question

- 1 What are the first three letters of this word?
Striv [*sieve*] . . . striv [*sieve*].
- 2 What vowel sound do you hear in this word?
Nate [*gate*] . . . nate [*gate*].
- 3 Is the vowel sound in this word long or short?
Nate [*gate*] . . . nate [*gate*].
- 4 Two vowels are often sounded together to make a new sound. The answer choices are ew, oi-oy, and ou-ow. Oi-oy are grouped as one answer choice because they sound alike. Ou-ow are grouped as an answer choice because they sound alike, too. What sound made by two vowels do you hear in this word? Prown [*town*] . . . prown [*town*].
- 5 There are several rules that tell us how to pronounce vowels in words. This question is about the final vowel rule. This rule tells us how to pronounce words that have the only vowel at the end of the word. Decide whether I pronounce the nonsense word as the rule says it should be pronounced. Fill in the circle beside yes if I pronounce the word according to the rule. Fill in the circle beside no if I do not pronounce the word according to the rule. Ready?
Ji [*my*] . . . ji [*my*].

Question

- 6 Here is a sentence with four words below it. Find the word that is made up of two words and also makes the best sentence. Fill in the circle beside the word you choose. Read along silently as I read the sentence out loud. [*Do not read the answer choices.*]
- I know _____ have fun.
- 7 This question is about base words, or root words. Find the answer choice where only the root, or base, word is underlined and fill in the circle beside it. [*Do not pronounce the word or help with pronunciation.*]
- 8 Look at the underlined letters in these two words. Do the underlined letters in both words have the same sound or different sounds? Fill in the circle next to your answer. [*Do not pronounce words or help with pronunciation.*]
- 9 Look at the two words beside number 9. Are the meanings of these two words the same, opposite, or different? [*Do not pronounce words or help with pronunciation.*]
- 10 Does the double o in this word have a long sound or a short sound? [*Do not pronounce the word or help with pronunciation.*]
- 11 Which answer choice shows this word divided correctly into its syllables? Fill in the circle beside your answer. [*Do not pronounce the word or help with pronunciation.*]
- 12 Here is a sentence with four answer choices below it. Which answer choice tells us something belongs to someone or something? Read along silently as I read the sentence out loud. [*Do not read the answer choices.*]

They're going over there to see their new horse.

Read the story silently as I read it out loud.
Then I will ask you a question about it.

Many trees grow in the forest. Many little animals live there. Some big animals live there too. Some people live there also. The forest has many ponds and one little river.

- 13 What is the whole story about?

many trees

the forest

big animals

ponds and rivers

Question

Read along silently as I read these sentences out loud. You are to believe that these first sentences are true. Decide what you know from them. Then I will read the last sentence and you decide whether it is right or wrong. Ready?

- 14 Jane's family lives next door to Bill's family. When Jane's mother goes shopping, Jane stays at Bill's house. Today Jane is playing in her own yard. [Pause.]

Jane's mother is not shopping.

Read the sentence silently as I read it out loud. Then I'll ask a question about it.

- 15 Jimmy helped feed his baby sister after he set the table.

What did Jimmy do last?

helped feed his baby sister

set the table

- 16 Look at the map. [Pause.]

Which highway is the airport on?

- 17 This is a number-letter grid. The numbers and letters name the cells.

Fill in the circle in cell F5.

- 18 This is a bar graph of how far people live from the zoo. Look at the graph. [Pause.]

Kay is 15 miles closer to the zoo than who?

- 19 Which word would come first if these words were in alphabetical order? You do not need to know how to pronounce the words to answer this question. [Do not read the answer choices out loud.]

APPENDIX B

Grade 5 Achievement Monitoring Tests

The four forms (E-H) of the Grade 5 achievement monitoring tests which were used in the Reading Skills Comparative Study of Phase IV of the IGE Evaluation Project are included in this appendix. In that some of the items on particular test forms were changed after the first administration and since a machine-scorable answer sheet was used resulting in changes in some item formats, a copy of the test instructions and the two versions of the test itself (October and November) are provided.

DIRECTIONS SHEET FOR ADMINISTERING READING INVENTORY 5E

Materials for Testing

Each student will need:

- a Reading Inventory 5E booklet
- a sharpened pencil with an eraser
- a cleared desk top or space to work
- a ruler

Each test administrator will need:

- this directions sheet
- a Reading Inventory 5E booklet for demonstration
- extra sharpened pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing
- extra rulers

Identification Information

Students should be directed to print the following information on the test booklet cover: first and last name, school, and month of testing.

INTRODUCTION TO TEST

SAY: Read the directions on the cover silently as I read them out loud.

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables and using references.

Mark all answers in your booklet by circling the letter for your choice. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn to page 1 and begin.

Note: Students should be able to read and understand the directions and questions for all of the test items. You may answer questions about pronunciation except for test items 1 and 2.

Phase IV
IGE Evaluation
October 1978

Published by the Wisconsin Research and Development Center for Individualized Schooling. The project presented or reported herein was performed pursuant to a grant from the National Institute of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the National Institute of Education, and no official endorsement by the National Institute of Education should be inferred.

1. Some letters do not make sounds in a word. Mark each silent letter in the word receive.

A. r
B. e
C. c
D. e
E. i
F. v
G. e

2. Which syllable of about has the accent, the first syllable or the second syllable? Mark the answer choice that shows the accent on the correct syllable.

A. a' bout
B. a bout'

3. Which word in the sentence below tells that something belongs to someone or something?

The cat cut its paws so we'll wrap them.

A. its
B. paws
C. we'll
D. none

go on to the next page

4. Select the suffix that will make the base word fit the definition given.

SKILL + _____ = having or showing skill.

- A. -ful: full of, likely to, the amount that will fill, having the ways of.
- B. -en: to make or become, to get or give, made of.
- C. -hood: the condition or time of being, all the members in a group.
- D. -ist: a person who, a person who is skilled in or works at, a person who believes in.

5. Read the sentences in (1) and decide what the underlined nonsense word stands for. Then look at the unfinished sentence in (2) and select the one answer choice you think best completes the sentence. (The nonsense word has the same meaning in both sets of sentences.)

(1) The boy next door had many cays. He was able to make friends easily, get good grades, and think of different things to do. I'm sorry he moved away.

(2) Because the old man in Jenny's made-up story had a number of cays, he was

- A. very strong
- B. an interesting character
- C. rather dull to read about
- D. extremely large and scary

go on to the next page

6. Which answer best describes what the whole passage is about?

Camels can go many days without food because they store up fat in their humps. Some camels have one hump. Others have two humps. A camel's stomach holds a lot of water so that it can go without water for a long time. Because camels are very strong, they can travel long distances on the desert and carry heavy loads. Some camels have to carry tents, tent poles, food, and people. Their wide feet with soft padded bottoms keep them from sinking into the desert sand. Have you ever tried walking in hot sand? Camels can also close their noses to keep out the sand.

- A. A camel's stomach holds lots of water.
- B. Camels can go many days without food.
- C. Camels can close their noses.
- D. Camels are good travelers in desert lands.

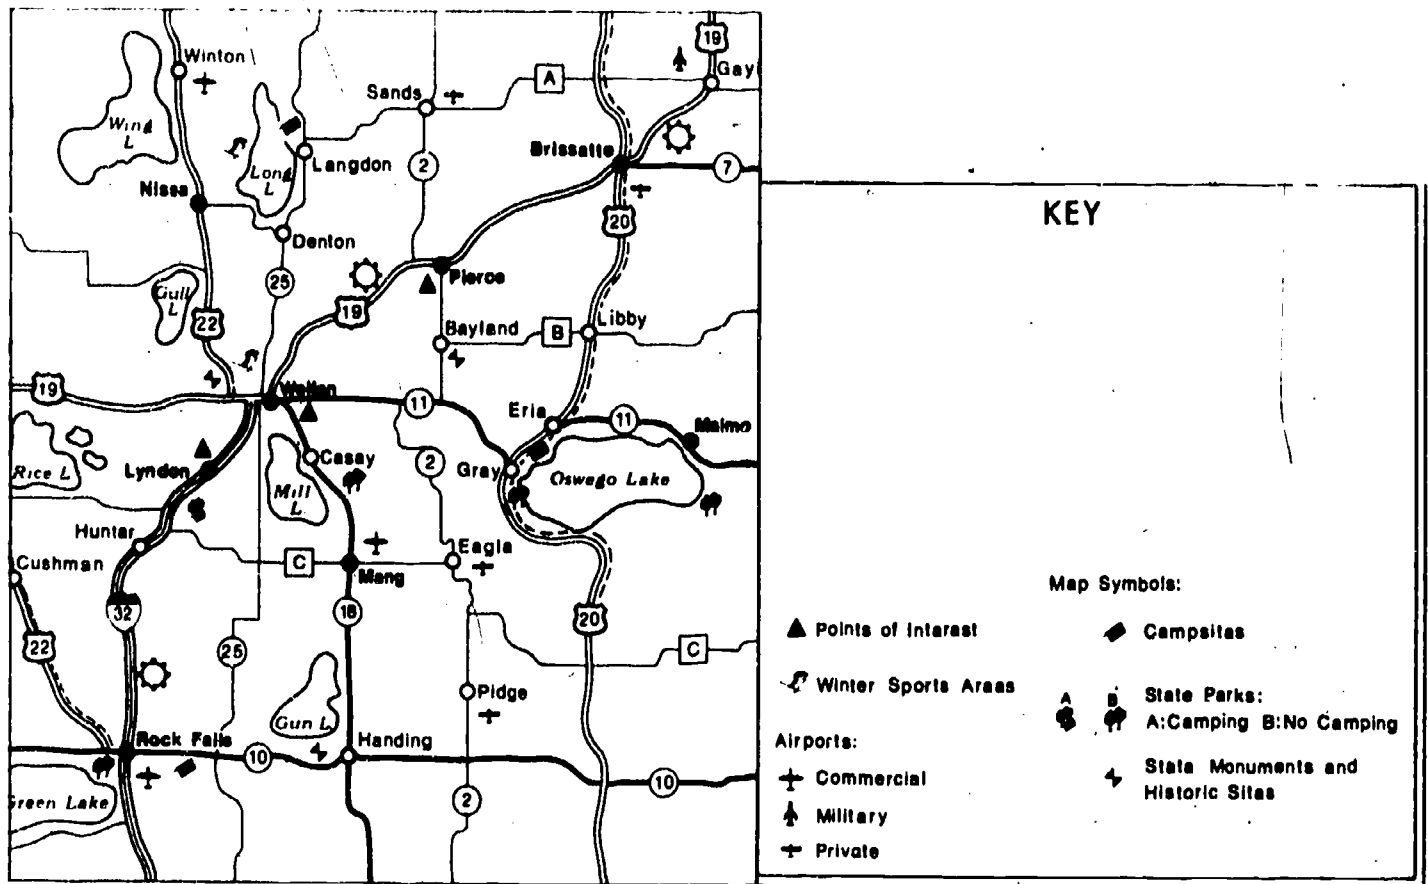

7. Use the information in the paragraph to decide whether the sentence below it is right or wrong:

Mountains are formed in different ways. Sometimes, forces in the earth cause the crust to crack. Then there are forces that cause one side of the crack to slide higher than the other side. All mountains formed in this way are called block mountains. Dome mountains are formed in another way. These mountains are formed when melted rock flows under other rocks and pushes these rocks upward. The Sierra Nevada Mountains were formed when forces caused one side of a crack to slide above the other side. The Black Hills and the Henry Mountains were formed when melted rock flowed under granite rock and pushed the granite upward.

The Sierra Nevada Mountains are block mountains.

- A. right
- B. wrong

USE THIS MAP TO ANSWER QUESTIONS 8 AND 9.

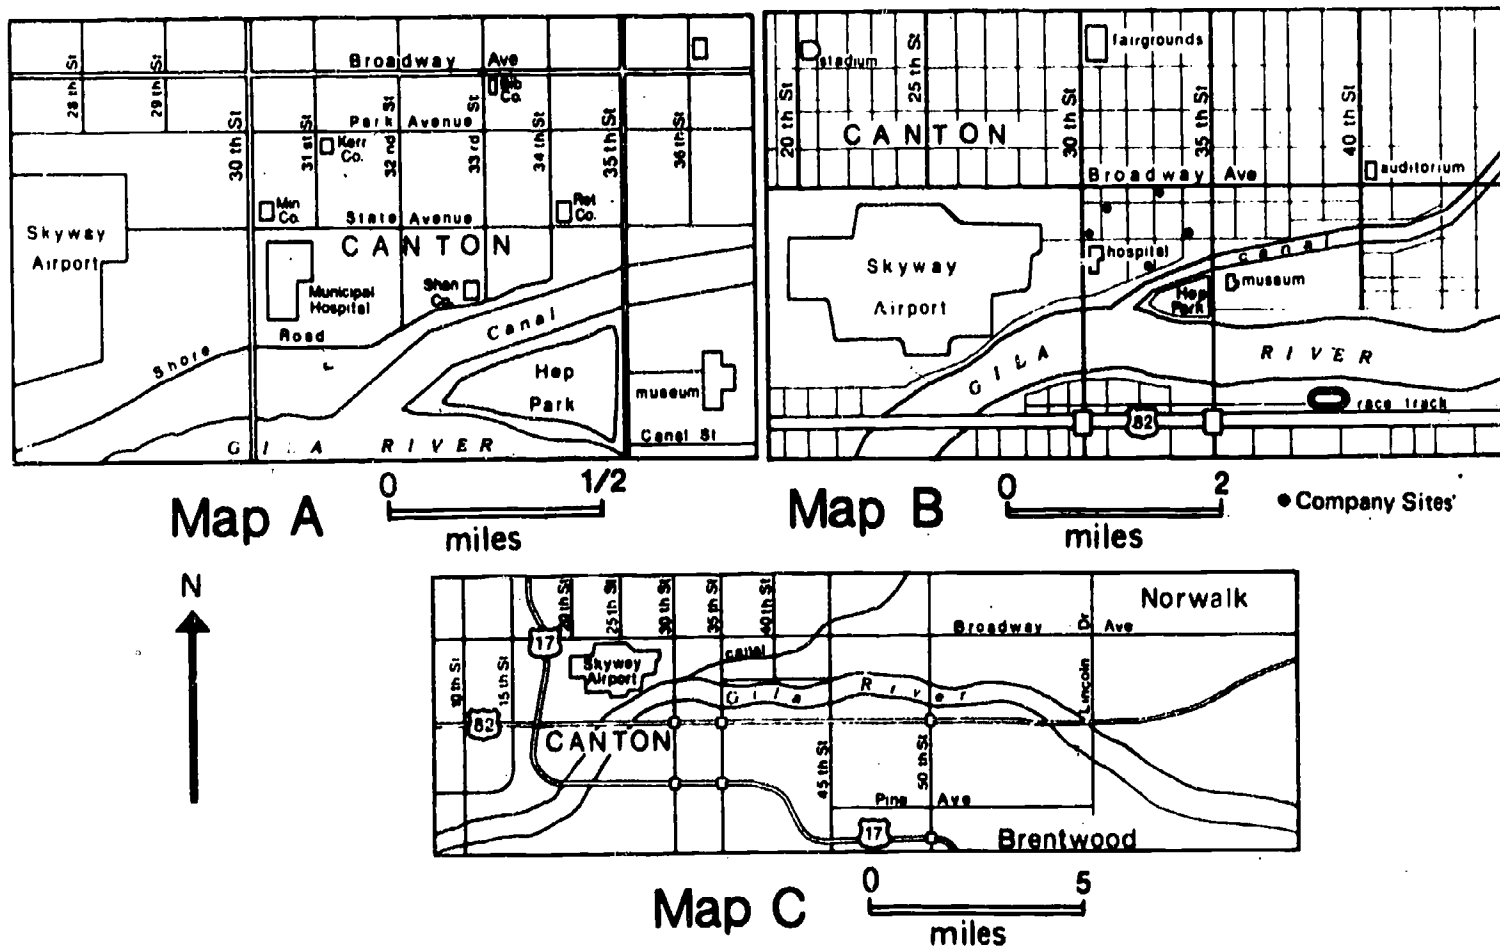

8. How many airports are along Highway ②?

- A. 2
- B. 3
- C. 5
- D. 8

9. Near what town is the state park with camping?

- A. Casey
- B. Grey
- C. Rock Falls
- D. Lyndon

USE THESE MAPS TO ANSWER QUESTIONS 10, 11, AND 12.

10. Which direction do you go from the airport to the park?

- A. northeast
- B. northwest
- C. southeast
- D. southwest

11. How many miles is it from 35th Street to 50th Street?

- A. 1/2
- B. 1
- C. 2
- D. 5

12. From which map can you name the company (Co.) closest to the airport?

- A. A
- B. B
- C. C

COWS FARMS BOUGHT

Key: each  = 4 cows

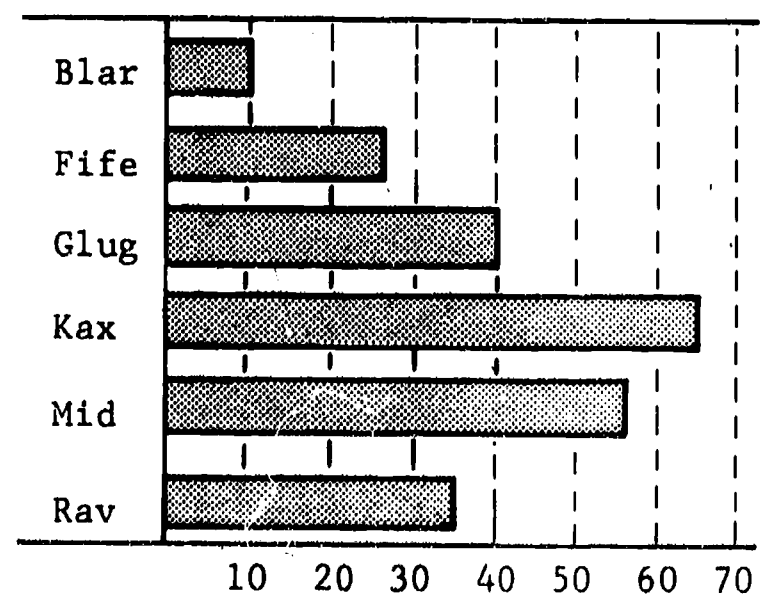

13. On the graph above, which farm bought 10 cows?
- A. Swampy Acres
 - B. Woodland Farm
 - C. Green Pastures
 - D. Maple Tree Trail

14. Use the graph at the right to answer this question:

How many more stores were built in Kax than in Glug?

- A. 10
- B. 15
- C. 25
- D. 40
- E. 65

STORES BUILT IN CITIES

go on to the next page

15. Use the card catalog drawer below labeled A-Bep to show where you would find a card for the book The American Mother Goose.

16. Use the pronunciation key to find the vowel sound of the underlined syllable. Find the answer choice with the same vowel sound.

thermosiphon (thûr' mō si'fən)

- A. deer
B. were
C. tub
D. use

PRONUNCIATION KEY

a – add	o – got
ā – āte	ō – sō
ä – fār	ou – house
â – bâre	oi – toy
e – let	ô – ôr
ē – shē	ōō – cōol
i – it	ōō – tōok
ī – īce	u – tug
	û – rûr

17. Which of the four names would come first if they were card catalog titles?
- A. MacDowell, Edward
 B. Mc Donnell, Philip
 C. Mac Dowell, Edward Alexander
 D. McDonald, Flora
18. Use the catalog cards below to find the book that tells detailed facts about Asia's geography.

A

ASIA - DESCRIPTION AND TRAVEL

574.95 Bourliere, Francois
 B661 The land and wildlife of Eurasia, by Francois Bourliere and the editors of Life. Time [1964]
 198 p. illus., ports., maps (Life nature library)

B

915.9 Withington, William A.
 W77a Asia, with a focus on Southeast Asia [by] William A. Withington [and] Margaret Fisher Hertel. Fidler [1966]
 308 p. illus., maps (1 col.) ports.

C

915 Myron, Robert
 M99t Two faces of Asia: India and China [by] Robert Myron and Abner Sundell. World [1967]
 191 p. illus.
 Bibliography: p. [183]

D

915 Quinn, Vernon
 Q4 Picture map geography of Asia; with maps and drawings by Frand Beaudouin, Lippincott [1946]
 122 p. illus., maps
 Country by country the strange and diverse facts and features of Asia's geography are related with pertinent detail.

19. Pick the correct dictionary entry below the sentence to find the meaning of the underlined word in this sentence:

The detective made a plaster case of the track left by the man.

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5
- F. 6

track (trăk) 1. a print left by a foot, tire, etc. 2. to leave marks or footprints on or with: *Boys tracked the fresh cement. The crowd tracked mud all over the vestibule.* 3. trail of footprints, wheel marks, sparks, etc., left by a moving object: *The Indian scout followed the tracks of the wagon train.* 4. to follow by sight or scent: *The hounds tracked the fox to its den.* 5. path; road: *A wagon track leads across the field.* 6. a specially prepared course used for races: *a race track; a cinder track.*

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables, and using references.

- | | |
|-----------|-------------|
| X. circus | A. ci- rcus |
| | B. cir- cus |
| | C. circ- us |
| | D. circus |

Mark all answers on your answer sheet by filling in the box below your choice. Be sure that the question number on your answer sheet is the same as the question number in your test booklet. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn the page and begin.

19. Pick the correct dictionary entry below the sentence to find the meaning of the underlined word in this sentence:

The detective made a plaster cast of the track left by the man.

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5
- F. 6

track (trāk) 1. a print left by a foot, tire, etc. 2. to leave marks or footprints on or with: *Boys tracked the fresh cement. The crowd tracked mud all over the vestibule.* 3. trail of footprints, wheel marks, sparks, etc., left by a moving object: *The Indian scout followed the tracks of the wagon train.* 4. to follow by sight or scent: *The hounds tracked the fox to its den.* 5. path; road: *A wagon track leads across the field.* 6. a specially prepared course used for races: *a race track; a cinder track.*

DIRECTIONS SHEET FOR ADMINISTERING READING INVENTORY 5F¹

Materials for Testing

Each student will need:

- a Reading Inventory 5F booklet
- a Reading Inventory 5F answer sheet
- a sharpened No. 2 lead pencil with an eraser
- a cleared desk top or space to work
- a ruler

Each test administrator will need:

- this directions sheet
- a Reading Inventory 5F booklet for demonstration
- a Reading Inventory 5F answer sheet for demonstration
- extra sharpened No. 2 lead pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing
- extra rulers

Identification Information

Students should be directed to print the following information on the answer sheet: first and last name, school, and month of testing.

INTRODUCTION TO TEST

SAY: Read the directions on the cover of your booklet silently as I read them out loud.

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables, and using references.

Look at example X in the box. The word circus is divided into syllables in several different ways. Which answer choice shows circus divided correctly? [*Wait for a response.*] Choice B is correct. Find the answer space for example X on your answer sheet. [*Point.*] Mark your answer to example X by filling in the white box below choice B. [*Check to see that students are marking the answer correctly.*]

Mark all answers on your answer sheet by filling in the box below your choice. Be sure that the question number on your answer sheet is the same as the question number in your test booklet. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn the page and begin.

Note: Students should be able to read and understand the directions and questions for all of the test items. You may answer questions about pronunciation except for test items 1 and 2.

October 1978

Published by the Wisconsin Research and Development Center for Individualized Schooling. The project presented or reported herein was performed pursuant to a grant from the National Institute of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the National Institute of Education, and no official endorsement by the National Institute of Education should be inferred.

1. Some letters do not make sounds in a word. Mark each silent letter in the word gnome.

- A. g
- B. n
- C. o
- D. m
- E. e

2. Which syllable of birthday has the accent, the first syllable or the second syllable? Mark the answer choice that shows the accent on the correct syllable.

- A. birth' day
- B. birth day'

3. Add one of the suffixes below to the word explain to make it fit into this sentence:

Judy gave a long _____ for why her work was late.

- A. -ation: the act of, condition of being, result of
- B. -en: to make or become, to get or give, made of
- C. -ity: condition or quality
- D. -or: a person or thing that

4. Read the sentence in (1) and decide what the underlined nonsense word stands for. Then look at the unfinished sentence in (2) and select the one answer choice you think best completes the sentence. (The nonsense word has the same meaning in both sets of sentences.)

- (1) Because the contents of her brother's envelope were pov, Marni did not try to read the letter inside.
- (2) Jody had a pov conversation with his teacher at school. They talked
- A. with Jody's friends
 - B. alone just between themselves
 - C. in Jody's home with his family
 - D. over lunch in the busy cafeteria

5. Does sentence (2) mean the same thing as sentence (1)?

- (1) Although Karen usually likes to walk across town to school, it was so chilly yesterday that her mother drove her to school.
- (2) Because Karen enjoys walking to class in the cold, she refused her mother's offer to take her to school.
- A. yes
 - B. no

6. Which answer choice best describes what the whole passage is about?

Most desert people wear white wool robes. These robes fit very loosely to keep the people cool in the day and warm at night. The dark clothes we sometimes wear would be too warm. Nights in the desert can get quite cold. Many desert people wear head coverings made of long white cloths. They also tie a cloth around their faces to protect their ears, eyes, nose, and mouth from the hot sand. Because of cold weather, some of us cannot wear sandals all year as these people do.

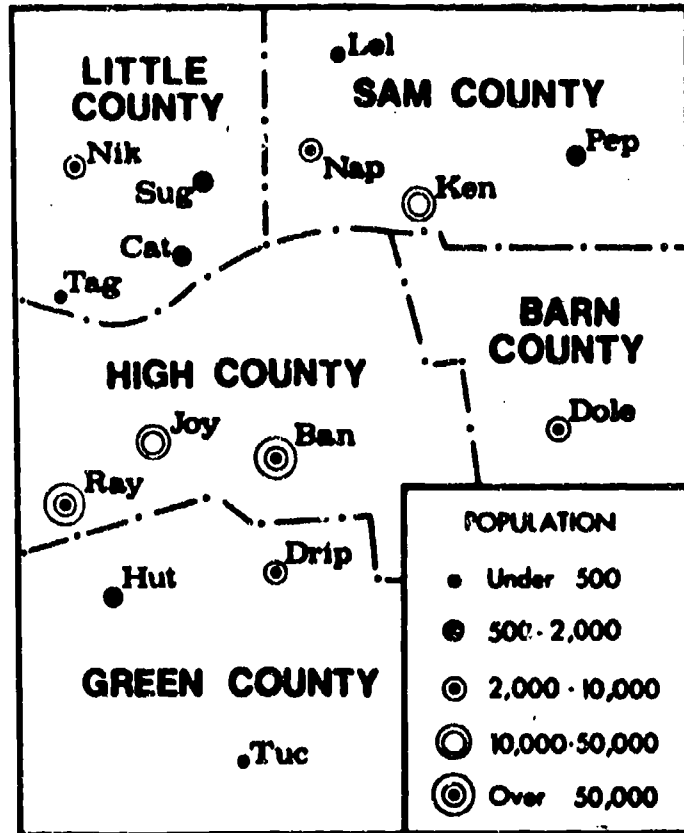

- A. Many desert people wear head coverings.
- B. The clothes people wear in desert lands are very different from ours.
- C. The robes desert people wear fit very loosely.
- D. Nights in the desert are quite cold.

7. Look at the timeline and decide when the event written below would have occurred. Answer choices are the letters on the timeline.

He scrubbed the empty tank and carefully cleaned off the larger stones.

USE THIS MAP TO ANSWER QUESTIONS 8 AND 9.

8. A city in Little County has 3,456 people. Which city is this?
- A. Cat
B. Sug
C. Tag
D. Nik

An Eye for Elephants

Book A**ALASKA**

In 1867 William Seward bought Alaska for the United States from Russia for a little over seven million dollars. At that time many people thought Alaska was all ice and snow, so they called the purchase "Seward's Icebox." Almost 100 years later, in 1959, Alaska became the 49th state in the United States. Today it is the largest state and has the fewest number of people living in it. The largest number of jobs in Alaska are with the government. The second largest number of jobs are in fishing and preparing the fish for market. Salmon and king crab are the two most valuable sea products.

Facts About Alaska		Products	Dollar Value per Year
Population	226,000	Oil	100,000,000
Size	586,000 square miles	Processing	91,000,000
Capital City	Juneau	Fish	57,000,000
Governor	Keith Miller	Salmon	38,000,000
Average Temperature		Natural Gas	50,000,000
Winter	-9° F	Sand and Gravel	15,000,000
Summer	55° F	Animal Skins	6,000,000
		Seal Skins	2,000,000

Book B**ALASKA**

Although some people had thought it was foolish to buy Alaska from Russia, today the value of the resources taken from this area, such as the fish, minerals, and timber, has paid back the purchase price hundreds of times. When Alaska became a state in 1959, it was the first new state in 47 years. It was the only state that was separated from the United States by another country. Also, it is the largest state in size. Alaska is famous for its snow-covered mountains and beautiful scenery. It has the fourteen highest mountains and most of the active volcanoes in the United States.

About Alaska		Major Products	Yearly Dollar Value
Size	586,000 square miles	Animal Skins	6,000,000
Population	128,000	Fish	57,000,000
Governor	Walter Hickel	Gold	30,000,000
Capital	Juneau	Natural Gas	30,000,000
Temperature		Oil	60,000,000
Summer: average	59° F	Processing	
warmest	100° F	Food	45,000,000
Winter: average	-9° F	Wood	15,000,000
coldest	-76° F		

19. Check the facts about Alaska given in Book A and Book B above. How do the books answer this question:

How many people in Alaska have jobs?

- A. Only A answers
- B. Only B answers
- C. A and B answer the same
- D. A and B answer differently
- E. Neither A nor B answers

USE THIS STORY AND OUTLINE TO ANSWER QUESTION 20.

How to Build a Terrarium

A terrarium is a tiny garden under glass. It can be made from any kind of glass bottle or goldfish bowl large enough to put your hand into. All that is needed is a little gravel, sand, rich soil, and something to plant.

To start to build a terrarium, first put a layer of gravel on the bottom of the container. Next put a layer of sand over the gravel. Finally add a layer of soil deep enough to allow the plants to grow.

Now the terrarium is ready for planting. Good plants to use are moss, ferns, or small pine trees, all of which grow well in a terrarium. Seeds can also be planted. Some good ones to try are orange or grapefruit seeds.

After planting the garden, water it. Then put a cover on the terrarium. If there is no cover, use plastic wrap to seal the top. Place the terrarium in a well-lighted place, but not in direct sunlight. The terrarium will never need to be watered again because none of the water will evaporate.

I. Materials needed

- A.
- B. Gravel
- C.
- D. Soil
- E.

II. Steps in building

- A. Put in gravel layer
- B.
- C.

III. Plants to use

- A. Moss
- B.
- C.

IV. Seeds to use

- A.
- B. Grapefruit

V. After planting

- A.
- B.
- C. Place in well-lighted place

20. Which subtopic goes under the main topic II. Steps in building?

- A. Mix the sand and gravel
- B. Water plants
- C. Cover the terrarium ✓
- D. Plant seeds and ferns
- E. Put in sand layer

DIRECTIONS SHEET FOR ADMINISTERING READING INVENTORY 5G¹

Materials for Testing

Each student will need:

- a Reading Inventory 5G booklet
- a Reading Inventory 5G answer sheet
- a sharpened No. 2 lead pencil with an eraser
- a cleared desk top or space to work

Each test administrator will need:

- this directions sheet
- a Reading Inventory 5G booklet for demonstration
- a Reading Inventory 5G answer sheet for demonstration
- extra sharpened No. 2 lead pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing

Identification Information

Students should be directed to print the following information on the answer sheet: first and last name, school, and month of testing.

INTRODUCTION TO TEST

SAY: Read the directions on the cover of your booklet silently as I read them out loud.

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables, and using references.

Look at example X in the box. The word circus is divided into syllables in several different ways. Which answer choice shows circus divided correctly? [*Wait for a response.*] Choice B is correct. Find the answer space for example X on your answer sheet. [*Point.*] Mark your answer to example X by filling in the white box below choice B. [*Check to see that students are marking the answer correctly.*]

Mark all answers on your answer sheet by filling in the box below your choice. Be sure that the question number on your answer sheet is the same as the question number in your test booklet. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn the page and begin.

Note: Students should be able to read and understand the directions and questions for all of the test items. You may answer questions about pronunciation except for test item 1.

1. Which syllable of puppy has the accent, the first syllable or the second syllable? Mark the answer choice that shows the accent on the correct syllable.

A. pup' py
B. pup py'

2. Which word in the sentence below tells that something belongs to someone or something?

The bird thinks it's time to eat his worms.

A. it's
B. his
C. worms
D. none

3. Add one of the suffixes below to the word organize to make it fit into this sentence:

Mrs. Jones will do a good job as the _____ of the cookie sale.

A. -al: of, like, or suitable for; the act or process of
B. -er: a person or thing that; a person living in; a person having to do with; more
C. -ive: of or having to do with; likely to; given to
D. -ure: act or result; condition of being; a thing or group that

4. Does sentence (2) mean the same thing as sentence (1)?

(1) Using three bright constellations as a guide to his campsite, John found his way through the dark rocky canyon that lay between two steep mountains.

(2) John didn't get lost in the rough country below two mountains since he knew how to get his directions from several groups of stars.

A. yes
B. no

5. Which answer choice best describes what the whole passage is about?

One type of cloud is thin, white, and filmy and is made of ice crystals. Another type of cloud is big, white, and puffy and appears when the weather is fair. When this cloud turns black, we know that there might be a thunderstorm. Thunderstorms bring lightning and rain. A still different kind of cloud has no exact form and usually covers the whole sky. This cloud is seen most often in the winter. Winter brings cold weather. Another cloud is a thick, gray cloud that may bring rain or snow.

- A. One type of cloud is made of ice crystals.
- B. Some clouds bring thunderstorms.
- C. Rain and snow might come from thick, gray clouds.
- D. There are different kinds of clouds.

6. Use the information in the paragraph to decide whether the sentence below it is right or wrong.

There are many different kinds of fruits. Fruits are formed from the part of the plant that makes the seeds. In some fruits the seed is inside a pit. The pit forms from the inside layer while the part we eat covers the pit. These fruits are called drupes. A peach is a drupe. An olive is a fruit that has a pit. We eat the outer layer of the olive. Another kind of fruit has a core like an apple where small seeds are stored. We eat the food found around the core. Apples and these kinds of fruits are called pomes. Another kind of fruit is the berry. In this kind of fruit, the seeds are found throughout the fleshy material which we eat. Tomatoes and watermelons are berries.

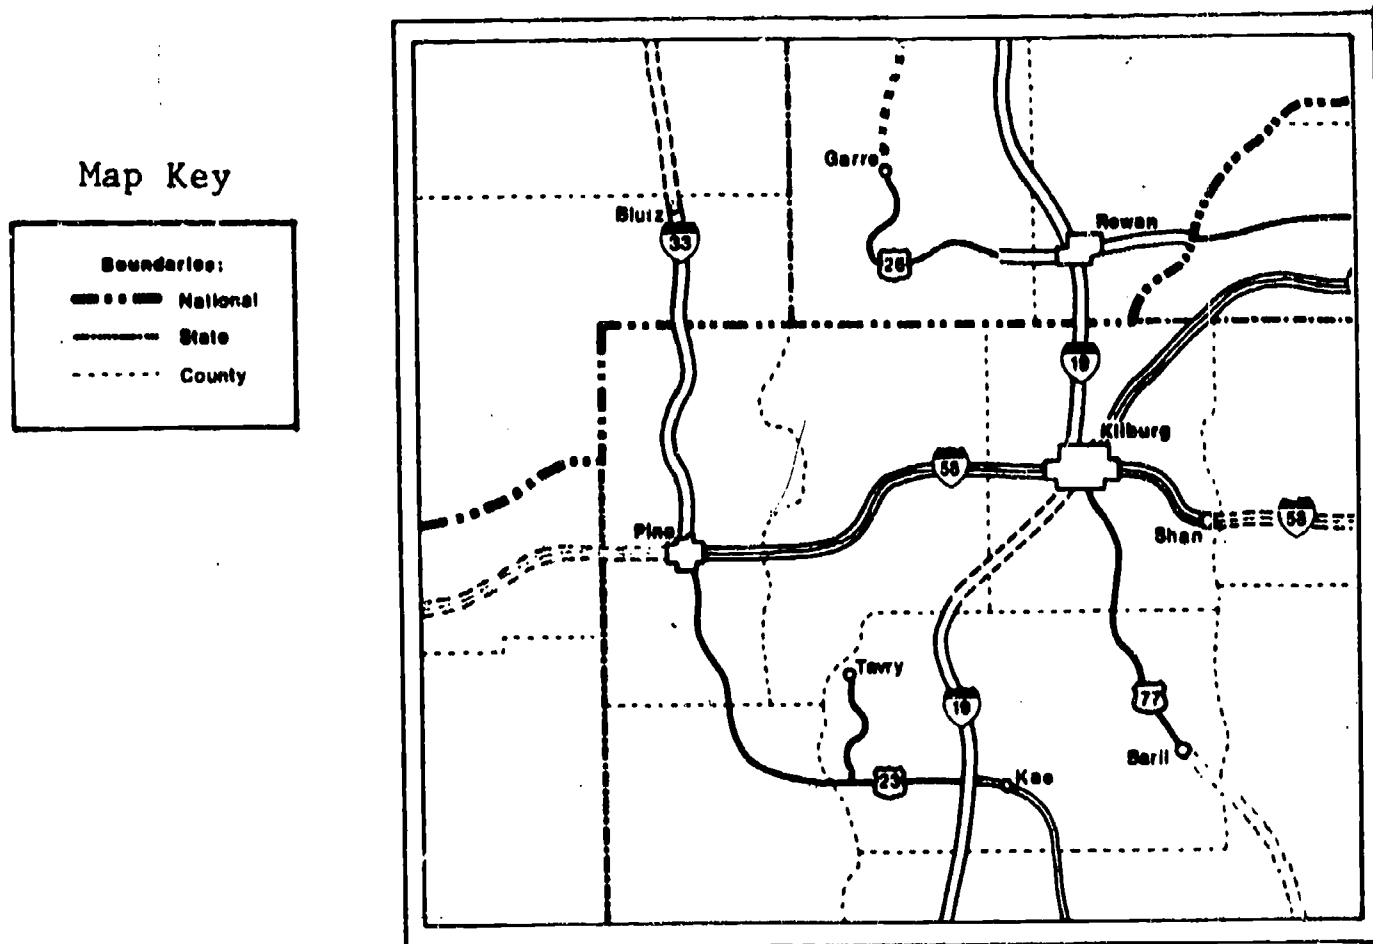

An olive is a pome.

- A. right
- B. wrong

7. Look at the timeline and decide when the event written below would have occurred. Answer choices are the letters on the timeline.

They walked to the hardware store and bought a couple of quart cans of paint--one of blue and one of green. With wild schemes in their minds, they also bought some smaller cans of yellow, red, and orange.

8. On the map above, Baril and Tavry are in the same
- country only
 - country and state only
 - country, state, and county
-
9. Which of the four titles would come first if they were catalog cards?
- Stamp Collector's Guide
 - St. Patrick's Day
 - St. Valentine's Day
 - Strange Disappearance of Arthur Cluck

- D. pages 101-2
- E. probably not in this book

Copyrighted index deleted

16. Use the card catalog drawer below labeled Sub-Tra to show where you would find a card for the book:

The Totem Casts a Shadow

Book A**ALASKA**

In 1867 William Seward bought Alaska for the United States from Russia for a little over seven million dollars. At that time many people thought Alaska was all ice and snow, so they called the purchase "Seward's Icebox." Almost 100 years later, in 1959, Alaska became the 49th state in the United States. Today it is the largest state and has the fewest number of people living in it. The largest number of jobs in Alaska are with the government. The second largest number of jobs are in fishing and preparing the fish for market. Salmon and king crab are the two most valuable sea products.

Facts About Alaska		Products	Dollar Value per Year
Population	226,000	Oil	100,000,000
Size	586,000 square miles	Processing	91,000,000
Capital City	Juneau	Fish	57,000,000
Governor	Keith Miller	Salmon	38,000,000
Average Temperature		Natural Gas	50,000,000
Winter	-9° F	Sand and Gravel	15,000,000
Summer	55° F	Animal Skins	6,000,000
		Seal Skins	2,000,000

Book B**ALASKA**

Although some people had thought it was foolish to buy Alaska from Russia, today the value of the resources taken from this area, such as the fish, minerals, and timber, has paid back the purchase price hundreds of times. When Alaska became a state in 1959, it was the first new state in 47 years. It was the only state that was separated from the United States by another country. Also, it is the largest state in size. Alaska is famous for its snow-covered mountains and beautiful scenery. It has the fourteen highest mountains and most of the active volcanoes in the United States.

About Alaska		Major Products	Yearly Dollar Value
Size	586,000 square miles	Animal Skins	6,000,000
Population	128,000	Fish	57,000,000
Governor	Walter Hickel	Gold	30,000,000
Capital	Juneau	Natural Gas	30,000,000
Temperature		Oil	60,000,000
Summer: average	59° F	Processing	
warmest	100° F	Food	45,000,000
Winter: average	-9° F	Wood	15,000,000
coldest	-76° F		

17. Check the facts about Alaska given in Book A and Book B above. How do the books answer this question:

How much money is gold worth each year?

- A. Only A answers
 B. Only B answers
 C. A and B answer the same
 D. A and B answer differently
 E. Neither A nor B answers

USE THIS STORY AND OUTLINE TO ANSWER THE QUESTION BELOW.

Australia and the United States

Australia has many things in common with the United States. Both countries are about the same size, and both were colonized by the British. So both countries share a common ancestry and speak the same English language.

But in other ways Australia is very different from the United States. Australia is a large island and a whole continent. The U.S. is neither an island nor an entire continent, but the population of the U.S. is ten times that of Australia. And because of location, Australia has seasons opposite the U.S.; while the U.S. enjoys summer, Australia has winter.

Australia has many unusual animals not found naturally in the U.S. One of these is the platypus, which is a fur covered mammal which has a bill and webbed feet like a duck. The emu, a large bird that cannot fly, and the kangaroo are both unique to Australia.

The U.S. has some animals that don't appear in Australia. One of these is the bison. The whooping crane is a large graceful bird, and the few that are left can be found in the U.S. The grizzly bear, common in the U.S., is not found in Australia.

I. Similarities

- A.
- B.
- C. Common ancestry
- D.

II. Differences

- A. Australia an island, U.S. not
- B.
- C.
- D. Seasons are opposite

III. Animals of Australia

- A.
- B.
- C. Kangaroo

IV. Animals of the U.S.

- A.
- B.
- C. Grizzly bear

18. Which subtopic goes under the main topic II. Differences?

- A. Both are landlocked
- B. Australia always has winter
- C. English language
- D. U.S. smaller than Australia
- E. Australia a continent, U.S. not

1. Which syllable of puppy has the accent, the first syllable or the second syllable? Fill in the box below the answer choice that shows the accent on the correct syllable.

A. pup' py
B. pup py'

2. Which word in the sentence below tells that something belongs to someone or something?

The bird thinks it's time to eat his worms.

A. it's
B. his
C. worms
D. none

3. Add one of the suffixes below to the word organize to make it fit into this sentence:

Mrs. Jones will do a good job as the _____ of the cookie sale.

A. -al: of, like, or suitable for; the act or process of
B. -er: a person or thing that; a person living in; a person having to do with; more
C. -ive: of or having to do with; likely to; given to
D. -ure: act or result; condition of being; a thing or group that

4. Does sentence (2) mean the same thing as sentence (1)?

(1) Using three bright constellations as a guide to his campsite, John found his way through the dark rocky canyon that lay between two steep mountains.

(2) John didn't get lost in the rough country below two mountains since he knew how to get his directions from several groups of stars.

A. yes
B. no

5. Which answer choice best describes what the whole passage is about?

One type of cloud is thin, white, and filmy and is made of ice crystals. Another type of cloud is big, white, and puffy and appears when the weather is fair. When this cloud turns black, we know that there might be a thunderstorm. Thunderstorms bring lightning and rain. A still different kind of cloud has no exact form and usually covers the whole sky. This cloud is seen most often in the winter. Winter brings cold weather. Another cloud is a thick, gray cloud that may bring rain or snow.

- A. One type of cloud is made of ice crystals.
- B. Some clouds bring thunderstorms.
- C. Rain and snow might come from thick, gray clouds.
- D. There are different kinds of clouds.

DIRECTIONS SHEET FOR ADMINISTERING READING INVENTORY 5H¹

Materials for Testing

Each student will need:

- a Reading Inventory 5H booklet
- a Reading Inventory 5H answer sheet
- a sharpened No. 2 lead pencil with an eraser
- a cleared desk top or space to work
- a ruler

Each test administrator will need:

- this directions sheet
- a Reading Inventory 5H booklet for demonstration
- a Reading Inventory 5H answer sheet for demonstration
- extra sharpened No. 2 lead pencils with erasers
- a "Testing: Do Not Disturb" sign for the door
- a list for students absent from testing
- extra rulers

Identification Information

Students should be directed to print the following information on the answer sheet: first and last name, school, and month of testing.

INTRODUCTION TO TEST

SAY: Read the directions on the cover of your booklet silently as I read them out loud.

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables, and using references.

Look at example X in the box. The word circus is divided into syllables in several different ways. Which answer choice shows circus divided correctly? [Wait for a response.] Choice B is correct. Find the answer space for example X on your answer sheet. [Point.] Mark your answer to example X by filling in the white box below choice B. [Check to see that students are marking the answer correctly.]

Mark all answers on your answer sheet by filling in the box below your choice. Be sure that the question number on your answer sheet is the same as the question number in your test booklet. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn the page and begin.

Note: Students should be able to read and understand the directions and questions for all of the test items. You may answer questions about pronunciation except for test item 1.

¹Revised November 1978.

This is a test about reading skills. There are questions about words, sentences, and stories. There also are questions about reading maps, graphs, and tables and using references.

Mark all answers in your booklet by circling the letter for your choice. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn to page 1 and begin.

Phase IV
IGE Evaluation
October 1978

Published by the Wisconsin Research and Development Center for Individualized Schooling. The project presented or reported herein was performed pursuant to a grant from the National Institute of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the National Institute of Education, and no official endorsement by the National Institute of Education should be inferred.

1. Some letters don't make sounds in a word. Mark each silent letter in the word wreath.

A. w
B. r
C. e
D. a
E. t
F. h

2. Which word in the sentence below tells that something belongs to someone or something?

The tree's apples are red, so I'm picking them today.

A. tree's
B. apples
C. I'm
D. none

3. Read the sentences in (1) and decide what the underlined nonsense word stands for. Then look at the unfinished sentence in (2) and select the one answer choice you think best completes the sentence. (The nonsense word has the same meaning in both sets of sentences.)

(1) Everyone in sixth grade is doing a social studies project. Because Sarah is working very talply on hers, it is going to be very good. Although Sarah may take longer to do her work, it may be the best in the sixth grade!

(2) Hester showed she could mow the lawn talphy by doing it

A. early in the morning.
B. until it was just right.
C. as quickly as possible.
D. with her family's new mower.

4. Does sentence (2) mean the same thing as sentence (1)?

- (1) Although Kelly knew that the salamander sitting on the stick was harmless, she still jumped back and dropped the stick on the ground.
- (2) When she spotted the resting animal, Kelly, although she knew she wouldn't be hurt, leaped without thinking and let the twig fall from her hand.

- A. yes
B. no

5. Which answer choice best describes what the whole passage is about?

A robin uses materials like grass, twigs, leaves, string, and mud to make its nest. A robin builds its nest in the spring. A duck piles loose grass on the ground and lines this nest with its own feathers. Because its feathers are so fluffy, ducks have very soft beds. The oven bird was given its name because of the strange shape of its nest. It uses leaves and grass to form a nest that looks like an oven. Some birds make floating nests out of water plants. Cliff swallows form mud and straw into little round nests.

- A. Ducks use feathers in their nests.
B. Mud and straw are used by some birds to make little nests.
C. Birds make nests out of many different materials.

6. Use the information in the paragraph to decide whether the sentence below it is right or wrong:

Cathy likes to play pinball. To start the game, she shoots a steel ball to the top of the machine. Many of the bumpers are numbered. Each time the ball hits one of the numbered bumpers, she scores points. Sometimes the ball hits all the numbered bumpers. This means that she wins a free ball. Once in a while the scoreboard bell rings. Then Cathy knows she has won a free game. Many times the tilt light flashes. This tells her that the game is over and she hasn't won anything. On Tuesday Cathy played a game of pinball. All of a sudden the scoreboard bell on the machine rang.

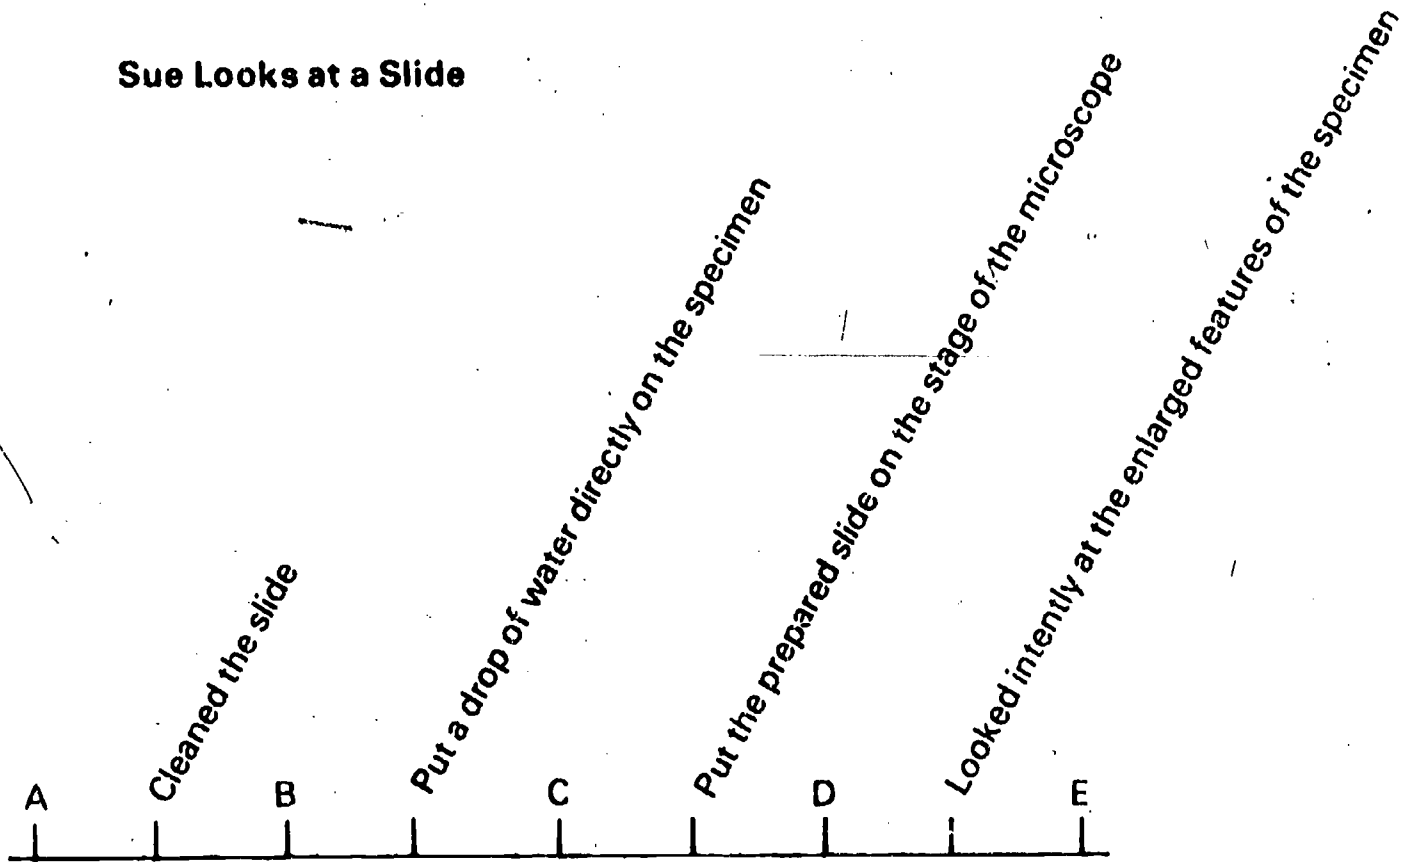

The tilt light flashed during Cathy's game.

- A. right
B. wrong

Book A**ALASKA**

In 1867 William Seward bought Alaska for the United States from Russia for a little over seven million dollars. At that time many people thought Alaska was all ice and snow, so they called the purchase "Seward's Icebox." Almost 100 years later, in 1959, Alaska became the 49th state in the United States. Today it is the largest state and has the fewest number of people living in it. The largest number of jobs in Alaska are with the government. The second largest number of jobs are in fishing and preparing the fish for market. Salmon and king crab are the two most valuable sea products.

Facts About Alaska		Products	Dollar Value per Year
Population	226,000	Oil	100,000,000
Size	586,000 square miles	Processing	91,000,000
Capital City	Juneau	Fish	57,000,000
Governor	Keith Miller	Salmon	38,000,000
Average Temperature		Natural Gas	50,000,000
Winter	-9° F	Sand and Gravel	15,000,000
Summer	55° F	Animal Skins	6,000,000
		Seal Skins	2,000,000

Book B**ALASKA**

Although some people had thought it was foolish to buy Alaska from Russia, today the value of the resources taken from this area, such as the fish, minerals, and timber, has paid back the purchase price hundreds of times. When Alaska became a state in 1959, it was the first new state in 47 years. It was the only state that was separated from the United States by another country. Also, it is the largest state in size. Alaska is famous for its snow-covered mountains and beautiful scenery. It has the fourteen highest mountains and most of the active volcanoes in the United States.

About Alaska		Major Products	Yearly Dollar Value
Size	586,000 square miles	Animal Skins	6,000,000
Population	128,000	Fish	57,000,000
Governor	Walter Hickel	Gold	30,000,000
Capital	Juneau	Natural Gas	30,000,000
Temperature		Oil	60,000,000
Summer: average	59° F	Processing	
warmest	100° F	Food	45,000,000
Winter: average	-9° F	Wood	15,000,000
coldest	-76° F		

17. Check the facts about Alaska given in Book A and Book B above. How do the books answer this question:

How large is Alaska?

- A. Only A answers
- B. Only B answers
- C. A and B answer the same
- D. A and B answer differently
- E. Neither A nor B answers

18. Use the index below to decide which pages tell about this topic:

the eruption of Mt. Pelée, Martinique

19. Use this story and outline to answer the following question:

Olympic Games

The Olympic Games are held every four years. The Olympic flame has been the symbol of the Olympics since the first games were held in Elis, Greece. These first games honored the Greek gods, but the modern Olympics have been held for the best athletes to compete together in peace and friendship.

The Olympic games are divided into summer and winter games. In the summer games, athletes compete in track and field events like relays, hurdles, and pole vaulting. Summer team events include basketball, soccer, and volleyball. In the winter games, most of the sports like skiing and bobsledding or figure skating and hockey are played on either snow or ice.

Each athlete spends many months or even years training for the Olympics. All these athletes must be amateurs, and in each event a country can enter only three individuals or one team. A gold medal is given for first place, a silver medal for second place, and a bronze medal for third place. But the biggest prize is the honor of competing in the Olympics.

I. History

- A. Held every four years
- B. Olympic flame is symbol
- C.
- D.
- E.

II. Summer games

- A. Track and field events

|-----------|------------|
| X. circus | A. ci-rcus |
| | B. cir-cus |
| | C. circ-us |
| | D. circus |

Mark all answers on your answer sheet by filling in the box below your choice. Be sure that the question number on your answer sheet is the same as the question number in your test booklet. When you're not sure of an answer, mark the answer you think is right. If you don't understand the directions for a question, raise your hand and I will come and help you. Turn the page and begin.

Phase IV
IGE Evaluation
November 1978

Published by the Wisconsin Research and Development Center for Individualized Schooling. The project presented or reported herein was performed pursuant to a grant from the National Institute of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the National Institute of Education, and no official endorsement by the National Institute of Education should be inferred.

1. Some letters don't make sounds in a word. Fill in the box below each silent letter in the word wreath.

2. Which word in the sentence below tells that something belongs to someone or something?

The tree's apples are red, so I'm picking them today.

- A. tree's
- B. apples
- C. I'm
- D. none

3. Read the sentence in (1) and decide what the underlined nonsense word stands for. Then look at the unfinished sentence in (2) and select the one answer choice you think best completes the sentence. (The nonsense word has the same meaning in both sets of sentences.)

(1) Everyone in sixth grade is doing a social studies project. Because Sarah is working very talply on hers, it is going to be very good. Although Sarah may take longer to do her work, it may be the best in the sixth grade!

(2) Hester showed she could mow the lawn talply by doing it

- A. early in the morning.
- B. until it was just right.
- C. as quickly as possible.
- D. with her family's new mower.

4. Does sentence (2) mean the same thing as sentence (1)?
- (1) Although Kelly knew that the salamander sitting on the stick was harmless, she still jumped back and dropped the stick on the ground.
- (2) When she spotted the resting animal, Kelly, although she knew she wouldn't be hurt, leaped without thinking and let the twig fall from her hand.
- A. yes
B. no

5. Which answer choice best describes what the whole passage is about?

A robin uses materials like grass, twigs, leaves, string, and mud to make its nest. A robin builds its nest in the spring. A duck piles loose grass on the ground and lines this nest with its own feathers. Because its feathers are so fluffy, ducks have very soft beds. The oven bird was given its name because of the strange shape of its nest. It uses leaves and grass to form a nest that looks like an oven. Some birds make floating nests out of water plants. Cliff swallows form mud and straw into little round nests.

- A. Ducks use feathers in their nests.
B. Mud and straw are used by some birds to make little nests.
C. Birds make nests out of many different materials.
6. Use the information in the paragraph to decide whether the sentence below it is right or wrong:

Cathy likes to play pinball. To start the game, she shoots a steel ball to the top of the machine. Many of the bumpers are numbered. Each time the ball hits one of the numbered bumpers, she scores points. Sometimes the ball hits all the numbered bumpers. This means that she wins a free ball. Once in a while the scoreboard bell rings. Then Cathy knows she has won a free game. Many times the tilt light flashes. This tells her that the game is over and she hasn't won anything. On Tuesday Cathy played a game of pinball. All of a sudden the scoreboard bell on the machine rang.

The tilt light flashed during Cathy's game.

- A. right
B. wrong
