ABSTRACT

This companion document designed to assist support persons in gaining the necessary understanding, awareness, and knowledge to participate effectively in the individualized education/employment program (IEP) process; five other companion documents; and an inservice guide comprise a series developed for assisting disabled persons in their transition from school to work. Its intended audience includes all school-community support persons involved in the IEP process--field coordinators, school administrators, community agency representatives, and regular teachers. The background and the purpose for having IEPs are presented in a clear and descriptive format. Specific suggestions are then provided regarding how to implement the school-community supportive services necessary for a smooth and successful transition of handicapped youth from education to work at the secondary and postsecondary levels. Sample student needs and support team member needs inventories are included. Step-by-step instructions are also provided for designing and completing the IEP form. A bibliography concludes the document. (YLB)

Extending Horizons: IEP Planning is specifically designed to assist support persons in gaining the necessary understanding, awareness, and knowledge to participate effectively in the individualized education program (IEP) process. This publication not only will assist schools to meet the federal requirement of The Education for All Handicapped Children Act but also will provide step-by-step instructions for designing and completing the IEP plan. This document also provides specific suggestions regarding how to implement the school-community supportive services necessary for a smooth and successful transition of handicapped youth from education to work. The rationale and the background for the purpose of having IEPs as well as making the IEP work as a management tool are presented in a clear and descriptive format. All school-community support persons involved in the IEP process (e.g., field coordinators, school administrators, community agency representatives, and regular teachers) will find this publication useful.

MAKING THE INDIVIDUALIZED EDUCATION/EMPLOYMENT PROGRAM (IEP) WORK

Why Have IEPs?

In 1975 Congress passed Public Law 94-142, The Education for All Handicapped Children Act. This law specified that each handicapped child has the right to a free appropriate public education and that the delivery of this education must be directed or guided by an individualized education program (IEP) prepared annually. The IEP is the management tool by which the progress of each handicapped student is monitored.

Students who are handicapped, ages 3 through 21, are protected under Public Law 94-142 in which there are federally mandated, minimal specifications regarding who must be included in the IEP meeting. The following participants must be included in the IEP meeting:

- A representative of the local district other than the student's teacher, who is qualified to provide or supervise the provision of special education
- The student's teacher
- One or both of the student's parents or guardians
- The child when appropriate

Additional persons as appropriate for each child should be included in IEP meetings also. See the bibliography in which are cited additional resources (McKinney and Seay 1979; Phelps and Batchelor 1979) for additional information relative to the specific procedures of the IEP meeting, as required by Public Law 94-142.

In 1978 it was estimated that approximately 625,000 handicapped young people were leaving our nation's schools annually. It was projected that only 21 percent of that population would become fully employed; 40 percent would become underemployed and would function at the poverty level; and 26 percent would be on welfare (Buzzel and Martin, July 1978). Preparing youth for successful employment through preparation of school-community persons as teams for their support is an important goal for society. Utilizing the individualized education program (IEP) as a management tool assists handicapped students enrolled in vocational education at secondary and postsecondary levels to make a smooth transition from school to work. As students approach completion of their programs, an individualized employment program (also IEP) is developed to ensure that the needs of the employee and employer are being met. By extending the IEP concept into the employment phase, problems that may arise at the employment site can be prevented or dealt with quickly with minimal interruption to productivity.

Establishing the IEP Support Team

Selection of the IEP support team based on the individual needs of each student is key to successfully implementing the IEP. Support teams should be coordinated by a field coordinator who can be based in either the school, business or industry, or a rehabilitation facility. The field coordinator assists each student in selecting support team members appropriate to the student's interests and needs. The major role of team members is to plan jointly with the handicapped individual to identify and clarify mutual needs and expectations of the student, the teacher, and the employer. In order to implement effectively a smooth and successful transition of youth from vocational education to work, the support team members must be chosen with the needs of each individual student in mind. The needs of the student are the central focus of the support team. Support teams ideally will include more types of members than the four required by law. (See those listed in figure 1.) Composition of support teams will vary for each individual student, depending upon the needs identified for each student.

Secondary Level

It is assumed that each student enrolled in a secondary vocational program had an IEP team that worked with him or her the previous year. Because these team members are already familiar with the student, they can make a very significant contribution to the student's support team.

The field coordinator should ask the student to identify additional team members who may assist in this transitional process. Whether it is a neighbor who might help with transportation, a teacher with whom the student has worked or works closely, or an employer, these student-selected members will serve on the support team with an important knowledge base and a positive attitude.

Community agency specialists who have needed expertise and provide services that may enhance the student's transition are important resources to involve on the support team. For example, a blind student may involve a counselor from a vision center who has the most recent information on adaptive devices for the blind. Representatives from the Epilepsy Foundation, the speech and hearing center, the YWCA and YMCA, the Special Olympics, and crippled children's services, are examples of possible community resources that may provide speech, recreational, or physical therapy, or specialized counseling for the student. Specialists on the support teams can provide essential input concerning students' capabilities, skills, and interests. The field coordinator should take responsibility for including these specialists on the support teams as appropriate.

1. Team leader
2. Student
3. Vocational education personnel
4. Special education personnel
5. Academic teacher
6. Counseling personnel
7. Administrators/supervisors
8. Rehabilitation personnel
9. Parent, guardian, spouse
10. Employers
11. Peers, friends
12. Union representatives
13. Community service agencies, as appropriate

Figure 1. Suggested composition of support teams

Students who qualify for rehabilitation services should also involve their rehabilitation counselors on the support teams. The Rehabilitation Services Commission at state level is organized into two bureaus: The Bureau of Services for the Visually Impaired, and the Bureau of Vocational Rehabilitation, which serves disabled individuals other than the visually impaired.

When members of the support team have been identified, they should be invited to be on the team by either the student or the field coordinator. Ideally, the student should request the assistance of his or her prospective support team members. The field coordinator, however, may need to assist the student by contacting support persons to explain how their assistance and involvement contribute to the student's successful transition from school to work. The field coordinator should be certain that each initial contact is followed by a confirming letter.

The student who is actively involved with support team meetings follows the recommendations of the support team. The IEP should include the annual goals and short-term instructional objectives of the student as well as the suggestions, recommendations, and strategies that the support team generates to assist the student. Through the use of the IEP and incorporating in it the efforts of the support team, the students can successfully move from school to work.

Postsecondary Level

The process for setting up the postsecondary support team is very similar to the process used for establishing the secondary support team. An exception is that of the postsecondary student who may be able to take a greater degree of responsibility than a secondary student for identifying possible support team members. Postsecondary students frequently tend to be somewhat more mature than do secondary students.

The postsecondary student may more likely take initiative than does the secondary student in the following areas:

- Identifying the existing needs that must be met to make a smooth transition from school to work, such as
 - Transportation
 - Adaptive devices
 - Tutors, note takers, readers, etc.
 - Job contacts
- Making the arrangements for having team meetings
- Deciding the purpose and agenda of the team meeting
- Contacting team members
- Asking for assistance when needed

The field coordinator is ultimately responsible for facilitating each student's transition from school to work and needs to closely monitor the progress the student makes. By coordinating field resources for the support team process, the coordinator serves as a liaison person for the student or team members when needed. In providing liaison for support team members during the student's transition and through careful planning of inservice sessions for teams, the coordinator can provide experiences for support persons that enable their enhancing the experiences of the student.

Student Needs Inventory

A student inventory to determine individual needs is given to each student. (See the following Sample Student Needs Inventory.) This inventory can be completed by the student or with the assistance of another person (e.g., teacher, counselor, field coordinator) depending on the student's ability.

The Student Needs Inventory provides background information about each student and addresses needs in the following areas:

- Job search skills
- Adapting the work site
- Independent living skills

SAMPLE STUDENT NEEDS INVENTORY—continued

II. Of all the interests which you have rated in I, list the four (4) which you feel are most important:

- (1) _____
- (2) _____
- (3) _____
- (4) _____

III. Please list any *other* topics about which you would like information:

- (1) _____
- (2) _____

IV. What kind of work do you want to do after you graduate?

- (1) _____ (2) _____

Have you made any contacts with employers in these areas?

Yes _____

No _____

If Yes, please describe:

Employer

Address

V. Please list previous work experience (volunteer and/or paid).

Employer

Address

Job Duties

- (1) _____

- (2) _____

Your responses to these questions will be very helpful in planning with you throughout the year.

- Personal social skills
- Legislation
- Finances

The degree of student interest can range from "No Interest" to "Very Strong Interest." After rating each item, the student is asked to list the four most important items and any other topics about which the student would like additional information. From an analysis of the student questionnaire responses, one can determine whether there is a need to include additional resources for the support team in areas of student need not already represented on the team. For example, if a student has an interest, or a particular need in the legal rights area, a lawyer may be invited to join the support team as a resource person. A resource person provides input on specific issues, but does not necessarily remain on a continuing basis as a support team member provided the specific need has been met.

Support Team Member Needs Inventory

After student needs have been identified and support team members have indicated their interest in working with a student, the Support Team Member Needs Inventory is administered. (See the following Sample Support Team Member Needs Inventory.) Each prospective support team member will complete an assessment inventory that is comprised of the same areas as those addressed in the Student Needs Inventory. For each item of each area of the support team inventory, the support team person indicates the degree of need for training to enable him or her to provide the support needed by the student. Results from an analysis of these responses are helpful to the coordinator for planning inservice sessions for support team members.

Designing the IEP Form

The IEP form can be designed in any format that is functional for the handicapped student and the school personnel as long as the following components are included:

- **Present level of educational performance**—Herein are described the student's specific achievements to date in each content area. This information is needed for planning annual goals. Although test scores can be indicated, information should be described in meaningful statements of strengths and weaknesses (Parrish and Kok 1980, p. 232).
- **Annual goals**—An annual goal is the estimate of what the student will be able to do by the end of the school year in each content area requiring supportive services. Annual goals are based on the needs of the student and are required for each subject area in which the student is enrolled.
- **Short-term objectives**—The annual goal is broken down into smaller short-term objectives that indicate where a child should be at intermediate points throughout the year. A short-term objective statement includes these components:
 - The learner
 - An observable behavior
 - The conditions under which the objective is to be performed

SAMPLE SUPPORT TEAM MEMBER NEEDS INVENTORY

In order to assist our students effectively in their transition from school to work, it is important that support team persons have the necessary skills to provide needed assistance. Please place an "X" in the appropriate boxes below to indicate the degree of training you believe you need to gain skill in providing assistance to your student(s) in each of the following areas.

SAMPLE NOTICE OF INDIVIDUALIZED EDUCATION PROGRAM MEETING

Copies

- Parent
- Home School File
- Vocational School File

Date: _____

Dear _____

A meeting to develop the individualized education program for this school year for _____ will be conducted as denoted below:

Date _____
Time _____
Place _____

You are requested and encouraged to attend the meeting. Please inform me if you find that the date or time or place is inconvenient. We will attempt to help with any problems.

IEP Procedures

1. This will be an informal meeting.
2. Participants will include _____
3. Information discussed will be confidential.
4. Your copy of the results of the meeting will be kept on file at the school.

Thank you for your assistance in this matter. If you have questions, please feel free to call me at _____

Sincerely

Special Education Vocational Coordinator

PLEASE CUT OFF THIS SLIP AND RETURN IT IN THE ENCLOSED ENVELOPE

I/We will be able to attend
I/We do not wish to attend
the meeting.

I am unable to attend at the above time
but can attend on:
Date _____ Time _____

I/We are sending information to the teacher/coordinator which I/we would like you to consider in drawing up my daughter's/son's educational program. (Medical information, home behavior, special likes or dislikes, etc.)

Student's Name: _____
Address: _____
Parent Signature: _____

Phone: _____
Date: _____

- The standard or criterion that identifies the minimum performance required (McKinney and Seay 1979, p. 4)

An example of an objective written for the first quarter of a food services class is as follows:

"Given a list of vocabulary terms used in recipes (saute, heat, stir) the student will describe each term with 95 percent accuracy."

- **Methods to meet student objectives and person responsible**—Although this is not mandated by law, team participants have found it helpful to list several methods that can assist the individual responsible for implementing each objective. By listing alternative methods of meeting objectives, the person responsible for that specific objective has a variety of resources to utilize in teaching or in providing support.
- **Projected date and duration of services**—The projected date indicates when the required services specified in the IEP are expected to begin. For example tutoring and early job placement may be initiated at different points in a student's academic program. The duration of services is the length and frequency of the services recommended as part of the individualized education program. The length, the frequency, and the duration of each session should, for example, be indicated, as noted below:
 - 45 minutes daily for 1 school year
 - 30 minutes, 2 times a week for 6 months (Parrish and Kok 1980, p. 232)
- **The extent of participation in regular education programs**—It is important to indicate the circumstances in which the student will be mainstreamed into a regular educational setting. Involvement during regular classes of instruction, mainstreamed lunch, recess, assembly program, and/or physical education settings should be specified within this area of the IEP. The times in which the student is integrated into regular experiences may offer opportunities for need of team member support (Parrish and Kok 1980, p. 233).
- **Appropriate objective criteria for evaluation**—The criteria for measuring the success of a student must be specifically stated in order to judge whether short-term objectives are met. Criteria can be measured in a variety of ways, such as
 - Percent of mastery
 - Time required to perform a task
 - Behavior or performance descriptions (Parrish and Kok 1980, p. 233)
- **Evaluation procedures**—This section can be combined with the previous section if desired. The evaluation procedures consist of a description of the method that will be used to determine attainment of the prescribed objectives as specified in the criteria. Some examples of evaluation procedures include the following:
 - Frequency counts, checklists, anecdotal notes, logs
 - Tests
 - Criterion-referenced performance
- **Evaluation Schedule**—The evaluation schedule simply specifies how often objectives are to be evaluated in order to determine mastery of each specific activity. Such evaluations

must be done at least annually. Adjusting a regular reporting schedule compatible with a school district's reporting schedules may be the appropriate schedule to adopt.

The design of the IEP instrument should accommodate recording the decisions and recommendations of the IEP support team members and can assume a number of formats. (Following are samples of IEP forms—one used at the secondary level and one used at the postsecondary level respectively.) The minimal requirement of the form has been presented; however, the form need not be limited to these few essential components. The forms should be designed to facilitate the needs of the student as well as the corrective plan of the IEP support team. According to Blackenship (1977) "The point to keep in mind is that the process of developing a child's IEP is more important than designing a form" (p. 17).

Completing the IEP Form

In order to assist the support team in completing the IEP, the following suggestions are made:

1. **Select a mutually convenient time and location**—In order to ensure attendance by those required to attend the meeting, it is best to arrange the meeting at the convenience of the majority of the support team.

Who: The team leader, the district representative, parent or guardian, and the handicapped person.

How: Check with team members and determine the preferred time to meet. Attempt to arrange meetings around parents' work schedules and teachers' class schedules.

When: A reasonable length of time before the IEP meeting

2. **Notify all IEP participants**—Federal regulations specify requirements concerning the notification of parents of students, ages 3 through 21. A meeting may be conducted without a parent in attendance if the local district is unable to convince the parent(s) that he or she should attend the IEP conference. It is suggested that a competent and appropriate person be asked to sit in for the parent of the student, if the parent(s) is unwilling to participate. The local district should set up a system of records to document attempts to arrange a mutually convenient time and place. Examples of documentation include telephone logs, copies of correspondence, and detailed records of visits to the parents.

Who: Team leader or district representative.

How: Notify in writing all IEP participants of the date, time, and place of the meeting. Request that an acceptance/rejection slip be returned to the school. (See the following Sample Notice of Individualized Education Program Meeting.)

When: Confirm in writing the time, place, and purpose of the meeting once a mutually agreeable time and place are determined. (See the return acknowledgement in the following Sample Notice of Individualized Education Program Meeting.)

3. **Complete demographic data**—Demographic information such as name, address, and birthdate can be completed prior to the IEP conference. These data should be checked for accuracy at the beginning of the scheduled IEP meeting.

When: Prior to the IEP meeting.

4. **List present level of educational performance with respect to both strengths and weaknesses**—The interpretation of all diagnostic data relevant to the student under consideration should be available to the support team members. Levels of performance should be written in terms of strengths, weaknesses, level of academic achievement, aptitudes, and learning modalities.

Who: The team leader should request input from vocational and academic teachers and other appropriate diagnosticians who may have administered any tests.

How: Levels of performance should be written in terms of strengths, weaknesses, level of academic achievement, aptitudes, and learning modalities.

When: Interpretations of tests should be completed immediately following testing and then discussed and transferred to the IEP form during the IEP meeting (McKinney and Seay 1979, p. 17).

5. **Specify and prioritize annual goals**—Goals should be an outgrowth of the needs, interests, and educational expectations of the student (McKinney and Seay 1979, p. 17). The individualized nature of the IEP assumes that the annual goals and services indicated are designed to meet that single student's needs, not the classes' needs.

Who: The IEP support team including the student has the responsibility to establish goals that are attainable in one year. The field coordinator is directly responsible for assuring that appropriate annual goals are selected.

How: Annual goals can be established through an analysis of the following:

- The student needs inventory that specifies the needs and interests of the student
- Present level of performance of the student
- Students' career goal, if specified, and
- Graduation and course requirements of the school district

When: Annual goals are established at the IEP conference with input and agreement from all participants.

6. **Specify short-term objectives**—It is recommended that short-term behavioral objectives are written for each annual goal using the criterion-referenced procedures for measuring success in performance.

Who: Although the team leader is ultimately responsible for coordinating the IEP process, the objectives themselves should be written by the academic, vocational, and special education teachers responsible for teaching the content of each objective.

How: A criterion-referenced objective should include four essential components:

- a. The specified learner,
- b. The conditions under which an objective is performed,
- c. The specific behavior that is sought or anticipated, and
- d. The criteria or standards needed to determine whether the objective has been successfully completed.

For more information on how to write objectives, see Robert F. Mager's book, *Preparing Instructional Objectives*, in the Bibliography.

When: Objectives should be written each week, quarter, or semester at the support team meeting.

7. **Specify the methods for completing each objective and the person responsible**—Support team members provide ongoing support by attending planning meetings, monitoring the methods necessary to complete each objective, and providing counsel as appropriate to the student. The IEP support team meets periodically to assure that progress is made toward each objective.

Who: Each IEP support team member takes responsibility for monitoring one or more of the objectives. The field coordinator, however, coordinates all team leaders to assure that all objectives are met in a timely manner.

How: The team leader calls team meetings to coordinate, monitor, and brainstorm successful methods needed to meet the objectives. Many times the student may request the team leader to call a meeting.

When: Meetings should be held as often as necessary to ensure completion of the goals and objectives. At a minimum, team meetings should be held once a quarter.

8. **Specify the projected date for initiation and the duration of service**—Taking into consideration the present level of performance and the specified goals, IEP team members should determine when the supportive services needed to meet the goals should be initiated and for how long they will be needed. For example, if tutoring is necessary for the duration of enrollment in a history class in which the student is mainstreamed, then the tutoring service and the date of initiation should be specified in the IEP. The duration, including the length and frequency of the service, should also be indicated.

Who: The team leader with input from the support team should specify the projected date for initiation and duration of support services such as tutors, note takers, readers, and so forth.

How: Services such as note takers, readers, tutors and resource room support are indicated on the appropriate section of the IEP. A team member should take responsibility for being certain that each resource support is provided as specified in the IEP.

When: Services needed to provide a free appropriate public education are decided at the IEP meeting.

9. **Recommend student placement**—The support team's critical task is to recommend the appropriate placement in the least restrictive environment where the student can profitably receive the specified services and resources (McKinney and Seay 1979, p. 17).

Who: IEP support team.

How: The students' placement is recommended by examining the needs, interests, present levels of performances, and annual goals of the student, supportive services, and resources required and available.

When: IEP support team meeting.

10. **Specify the extent of participation in regular education**—Since participation in regular education is not only encouraged to the maximum extent possible in the least restrictive environment, but is mandated in Public Law 94-142 (The Education for all Handicapped Children Act), this must be specified on the IEP.

Who: The team leader should specify on the IEP the extent of participation in regular education.

How: Enroll students in regular physical education activities, academic classes, lunch periods, or assemblies as appropriate for the capabilities of each.

When: The extent of participation of students in regular education should be determined at the IEP meeting and reviewed at each support team meeting throughout the year.

11. **Specify the criteria and schedule of the evaluation procedures**—In order to determine student progress, evaluation procedures must be specified in the IEP. The evaluation design establishes the criteria, the procedures for measuring the criteria, and the schedule (dates) for determining the progress of the student.

Who: The IEP support team members are responsible for evaluation of student progress. The analysis of evaluation data collected about participant progress and the model is completed by the coordinator or anyone else designated the responsibility to do so.

How: Evaluation procedures are established at the initial IEP meeting. (See no. 6, d, p. 26). The evaluation process should be reviewed at IEP meetings.

When: At each IEP support team meeting, the objectives should be evaluated to determine the progress of the student and the appropriateness of the objectives.

12. **Obtain approval of the IEP team members**—Once all the steps previously described have been completed, those members of the support team who concur with the IEP plan sign it. If parents have chosen not to attend, the signature of the person who represents the parent role should sign the IEP. A telephone conference or a home visit may be utilized to inform and explain the individualized education program plan to the parents. The home school district is responsible for the development of the IEP. One should document carefully the steps taken by school officials and/or the team leader to involve the parent in the IEP process and conference.

Who: The team leader or a person designated by the school administrator

How: Signatures should be obtained at the IEP meeting.

When: Each school district will determine any policies relating to developing the IEP at the IEP meeting.

CONCLUSION

The IEP must be reviewed once a year, as mandated by Public Law 94-142. Teachers and other support team persons are encouraged, however, to convene IEP teams more frequently than once a year.

It is important that the team review with the student periodically the progress being made in meeting the IEP goals and objectives. If by chance the teacher finds that the projected goals or objectives cannot be completed as specified in the IEP plan, changes or modifications can be agreed upon by the support team. These changes can be requested by any member of the support team, but it is the local school district which is held responsible for carrying out the IEP process (Halloran 1978, p. 41).

Parents have the right to appeal any decision made by the school district by requesting an impartial due-process hearing regarding a proposed change in the placement of their son or daughter. The philosophy projected herein is that a team meeting can be called at any time that is mutually convenient to the support team members. In fact, support teams are encouraged to meet as often as necessary to review the progress made by the student and to ensure that the proper course of action is taken to plan for the student's transition from school to work.

THE NATIONAL CENTER MISSION STATEMENT

The National Center for Research in Vocational Education's mission is to increase the ability of diverse agencies, institutions, and organizations to solve educational problems relating to individual career planning, preparation, and progression. The National Center fulfills its mission by:

- Generating knowledge through research
- Developing educational programs and products
- Evaluating individual program needs and outcomes
- Providing information for national planning and policy
- Installing educational programs and products
- Operating information systems and services
- Conducting leadership development and training programs

ORDERING INSTRUCTIONS

To order additional copies of the *Extending Horizons* Series, please use order number and title. Orders of \$10.00 or less should be prepaid. Make remittance payable to the National Center for Research in Vocational Education. Mail order to:

The National Center for Research
in Vocational Education
National Center Publications, Box F
1960 Kenny Road
Columbus, Ohio 43210-1090

Prices listed are in effect at the time of publication of this book. All prices include postage and handling. Prices are subject to change without notice.

Quantity Discounts

Orders of five (5) or more items, as listed by publication number and title, with a total dollar value for the order of:

- \$ 50 to \$100, the discount is 5%
- \$101 to \$200, the discount is 10%
- \$201 to \$300, the discount is 15%
- \$301 to \$400, the discount is 20%
- \$401 and above, the discount is 25%

International Orders

All orders, in any amount, from outside the United States and its possessions are to be paid in U.S. currency. Additional postage and handling charges may be added for foreign shipments if necessary.
