## ABSTRACT

This curriculum guide contains materials for a 17-unit course in advanced technical drafting, a followup to the basic technical drafting course in the industrial arts curriculum for grades 10-12. It is intended for use by industrial arts teachers, supervisors, counselors, administrators, and teacher educators. A three-page course overview provides a brief course description; indicates target grade level, prerequisites, course goals, and course objectives; presents an introduction to the course; and suggests a time frame. The detailed, nine-page course outline follows. A unit teaching guide in a column format relates objectives to topics, student activities, teacher activities, and resources. The 17 units cover these topics: review of basic technical drafting, functional drafting, inking, surface development and intersections, secondary auxiliary views and revolutions, graphic charts and diagrams, detailed thread representation, map drafting, basic descriptive geometry, electrical and electronic drafting, technical illustration, architectural drafting, pipe drafting, aerospace drafting, structural drafting, computers in design and drafting, and welding drafting. Extensive appendixes include a tool list, safety information, suggested assignments (problems) from texts, over 80 pages of sample work sheets, crossword and wordfind puzzles with solutions, and a bibliography. (YLB)

## EQUAL OPPORTUNITY STATEMENT

In compliance with Title VI, Title IX and Section 504 of the Rehabilitation Act of 1973, this Educational Agency upholds the following policy: THIS IS AN EQUAL OPPORTUNITY INSTITUTION AND IS DEDICATED TO A POLICY OF NONDISCRIMINATION IN EMPLOYMENT OR TRAINING. QUALIFIED STUDENTS, APPLICANTS OR EMPLOYEES WILL NOT BE EXCLUDED FROM ANY COURSE OR ACTIVITY BECAUSE OF AGE, RACE, CREED, COLOR, SEX, RELIGION, NATIONAL ORIGIN, OR QUALIFIED HANDICAP. ALL STUDENTS HAVE EQUAL RIGHTS TO COUNSELING AND TRAINING.

This public document was published at a total cost of \$2,100; 700 copies of this public document were published in this 1st printing at a cost of \$3.00 each. The total cost of all printings of this document, including reprints is \$2,100. This document was published by Louisiana Department of Education, Office of Vocational Education, Post Office Box 94064, Baton Rouge, Louisiana 70804 for the dissemination of vocational education curriculum materials for new and changing occupational fields under authority of Public Law 94-482. This material was printed in accordance with the standards for printing by state agencies established pursuant to R.S. 43:31.

## FOREWORD

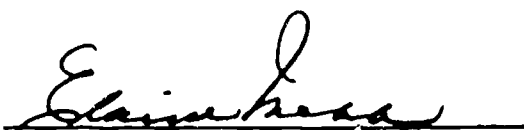

This publication is a guide for the improvement of instruction in Industrial Arts Education for the State of Louisiana. It should be of benefit to industrial arts teachers, supervisors, counselors, and administrators. These operational guidelines will help local administrators, teacher educators, and industrial arts teachers to determine the extent to which their programs are meeting the needs of our youth. Industrial Arts Education Programs must be organized to meet the needs of all students.

A constant concern of educators is the construction and revision of curriculum. Industry and technology are the core of industrial arts instruction. Both are constantly changing; therefore, curriculum and instruction must change in order to provide students a realistic and accurate understanding of industry and its function in our complex technological society.

THOMAS G. CLAUSEN, Ph.D.  
STATE SUPERINTENDENT OF EDUCATION

## ACKNOWLEDGEMENTS

This publication represents the cooperative efforts of personnel in the Louisiana Industrial Arts Association and the Industrial Arts Section in the Office of Vocational Education, Louisiana State Department of Education. Special recognition goes to Project Director, Dr. Thomas L. Eppler, Northwestern State University, who was instrumental in the development of the guide. Special commendation goes also to the following writing team members who worked diligently to produce this guide: Bill Bischoff, Johnny Hamilton, and Dennis Robbins.

Title:

Advanced Technical Drafting

Course Description:

Advanced technical drafting is designed as a follow-up to basic technical drafting. It is a graphic language used to convey necessary and specific information that expresses and records ideas for those who produce, use, and service products.

Advanced technical drafting involves the preparation of detailed drawings including inking, surface development, intersection, graphic harts, diagrams, threads, map drafting, descriptive geometry, electrical/electronic drafting, and secondary auxiliary view and revolutions. A survey of specialized areas, such as pipe, architectural, aerospace, computer, welding, and structural drafting, is also included.

Target Grade Levels:

This course is designed for students in grades 10, 11, and 12.

Prerequisite:

Basic Technical Drafting

General Program Goals:

In advanced technical drafting, the student will have an opportunity to develop additional skills in drafting techniques from the fundamentals of drafting through the technical aspects of drafting.

Specific Objectives:

1. To review the following areas of Basic Technical Drawing: safety, orthographic projection, dimensioning, pictorials, sectional drawing, and working drawings.
2. To recognize situations in which functional drafting techniques may be used effectively and prepare a functional technical drawing for that situation.
3. To describe the need for, and uses of, inked drawing and make an inked drawing of high quality.
4. To visualize the surface development of three-dimensional objects and make accurate surface developments using parallel-line development, radial-line development, and triangulation.

5. (A) To describe the use of the auxiliary projection plane, explaining the relationship to the regular planes, and explain the use of three types of auxiliary reference planes.  
(B) To provide information on the revolution, defining surfaces and other features and the relation of this method to drafting and design.
6. To read, interpret, and construct basic graphic charts and diagrams.
7. To make drawings of threads using detailed thread representation.
8. To provide information on the techniques used in making the various kinds of maps and the methods of gathering map data.
9. To graphically define the basic geometric elements and shapes, make drawings of the three basic lines, make drawings of an oblique plane, describe principles of geometric location, and prepare a drawing that covers the four fundamentals of solving all descriptive geometry problems.
10. To provide information on the various kinds of electrical and electronic drawings and on electrical and electronic components, units, and sub-assemblies, their symbols, and designations.
11. To describe the nature and use of technical illustration and provide information on basic techniques used in technical illustration.

#### Introduction:

Advanced Technical Drafting is a course designed to expand upon the information presented in Basic Technical Drafting. The content is such that it has value for those who plan to work in any phase of industry, including positions in engineering, management, education, skilled or semi-skilled occupations, office work, sales and promotion, service and repair, and many other fields. Each student is given the opportunity to expand the ability to express ideas in pictorial form, to describe the shape of objects through the use of drawings, and to read and to understand projection methods. Technical accuracy is necessary, and related mathematics, science, and technical vocabulary are taught simultaneously with practical activities.

This curriculum guide and outline will serve as a guide for teaching Advanced Technical Drafting. The implementation of the objectives and activities presented in this guide is recommended for the development of the advanced technical drafting student.

This curriculum guide will cover two semesters of work for one unit of credit. This course is open to all tenth, eleventh, and twelfth grade students that have successfully completed Basic Technical Drafting. The class should meet one hour per day, five days per week for 36 weeks (180 days).

## TIME FRAME

	Orientation	2 Hours
Unit I	Review of Basic Technical Drafting	10 Hours
Unit II	Functional Drafting	10 Hours
Unit III	Inking	5 Hours
Unit IV	Surface Developments and Intersections	15 Hours
Unit V	Secondary Auxiliary Views and Revolutions	15 Hours
Unit VI	Graphic Charts and Diagrams	15 Hours
Unit VII	Detailed Thread Representation	18 Hours
Unit VIII	Map Drafting	15 Hours
Unit IX	Basic Descriptive Geometry	15 Hours
Unit X	Electrical and Electronic Drafting	15 Hours
Unit XI	Technical Illustration	15 Hours

Optional Areas plus time used for opening and closing of school, school activities, or for placing extra emphasis where the instructor deems necessary

30 Hours

Total

180 Hours

## ADVANCED TECHNICAL DRAWING

### A YEARLY OUTLINE

#### I. REVIEW OF BASIC TECHNICAL DRAWING

##### A. Safety in the Drafting Room

1. Student responsibilities
2. Safe use of equipment

##### B. Orthographic Projection/Multiview Drawing/Shape Description

1. Three-view projection
2. Alphabet of lines

##### C. Dimensioning

##### D. Pictorials

1. Use of pictorial drawing
2. Types of pictorial drawing
  - a. Isometric
  - b. Oblique
  - c. Perspective

##### E. Sectional Drawing

1. Purpose of sectional drawing
2. Types of sectional drawing
  - a. Full
  - b. Half
  - c. Offset
  - d. Broken out
  - e. Removed

##### F. Working Drawings

1. Applications of working drawings
2. Methods of layout

#### II. FUNCTIONAL DRAFTING

##### A. Classes of Functional Drafting

1. Class 1: In-company or local working drawing
2. Class 2: For fields of industry or engineering
3. Class 3: General functional

- B. Simplified Drafting
  - 1. Definition
  - 2. Functionalism
  - 3. Utility
- C. Unnecessary Views and Detail
- D. Other Simplified Techniques
  - 1. Base-line dimensioning
  - 2. No arrowheads
  - 3. Templates
  - 4. Timesaving symbols
- E. Overlays
  - 1. Composite overlay
  - 2. Pressure-sensitive overlay
- F. Tape Drafting
  - 1. Opaque
  - 2. Transparent

### III. INKING

- A. Nature and Purpose of Inked Drawings
  - 1. High quality tracings
  - 2. Copying methods
- B. Drawing Ink
  - 1. Special characteristics
  - 2. Types of ink
- C. Basic Inking Instruments
  - 1. Ruling pens
  - 2. Technical pens
    - a. Kinds of points
    - b. Advantages
- D. Basic Techniques for Inking Straight Lines
- E. Basic Techniques for Making Circles and Arcs
- F. Order of Inking
  - 1. Arcs
  - 2. Horizontal lines
  - 3. Vertical lines
  - 4. Remaining lines

#### IV. SURFACE DEVELOPMENTS AND INTERSECTIONS

- A. Drafting for Sheet Materials
- B. Development of Seams and Laps
- C. Parallel-line Development
  - 1. Cylinder
  - 2. Two-piece, or square, elbow
  - 3. Four-piece elbow
- D. Radial-line Development
  - 1. Cones
  - 2. Pyramids
- E. Triangulation
- F. Intersections
  - 1. Prisms
  - 2. Cylinders
  - 3. Combinations

#### V. SECONDARY AUXILIARY VIEWS AND REVOLUTIONS

- A. Secondary Auxiliary Projection
- B. Axis of Revolution
  - 1. Axis perpendicular to horizontal
  - 2. Axis perpendicular to vertical
  - 3. Axis perpendicular to profile
- C. Rules of Revolution
  - 1. View unchanged except in position
  - 2. Distance parallel to axis unchanged
- D. Kinds of Revolution
  - 1. Single revolution
  - 2. Successive revolutions

#### VI. GRAPHIC CHARTS AND DIAGRAMS

- A. Line Charts
  - 1. Trends or changes
  - 2. Steps in drawing

- B. Engineering Charts
  - 1. Experimental information
  - 2. Nomographs

- C. Bar Charts
  - 1. Definition
  - 2. Types
    - a. One-column
    - b. Two-column
    - c. Horizontal bar
    - d. Multiple-bar
  - 3. Steps in drawing

- D. Pie Charts
  - 1. Definition
  - 2. Steps in drawing

- E. Pictorial Charts
  - 1. Definition
  - 2. Examples

- F. Organization and Flow Charts
  - 1. Definition
  - 2. Examples

## VII. DETAILED THREAD REPRESENTATION

- A. Schematic Representation (Review)
- B. Simplified Representation (Review)
- C. Drawing Detailed Representation Screw-Threads
  - 1. Sharp V
  - 2. Square screw threads
  - 3. Acme screw threads
- D. Screw Thread Norms
  - 1. Thread series for Unified and American National Standard Screw threads
  - 2. Classes of fits for Unified and American National Standard Screw threads
  - 3. Screw-thread specifications

E. Specifying Fasteners

1. Lock nuts
2. Cap screws
3. Machine screws
4. Set screws
5. Wood screws
6. Keys
7. Rivets

VIII. MAP DRAFTING

A. Careers in Mapping

1. Civil engineering
2. Draftsman under the supervision of the design engineer

B. Scales and Map Size

1. Decimals
2. Kilometer
3. Graphic scale

C. Contour Maps

1. Lines of constant level
2. Spacing
3. Technical pens
4. Surveying

D. Geological Mapping

1. Makeup and structure of the earth surface and interior depths
2. Geological surface map
3. Geological sections

IX. BASIC DESCRIPTIVE GEOMETRY

A. Points

1. Definition
2. Projections
3. Fixed points

B. Basic Lines

1. Normal
2. Inclined
3. Oblique

C. Planes

1. Definition
2. Basic planes
  - a. Plane one (normal)
  - b. Plane two (inclined)
  - c. Plane three (oblique)

X. ELECTRICAL AND ELECTRONICS DRAFTING

A. Career Opportunities

1. Preparation
2. Electrical or electronic draftsman
3. Electronic environment

B. Terms for Understanding Electricity and Electronics

1. Electricity
2. Voltage and current
3. Resistance
4. Units
5. Formulas

C. Graphic Symbols

D. Circuits

1. Series
2. Parallel
3. Combination

E. Drafting Practices

F. Diagram Procedure

1. Single-line
2. Schematic or elementary
3. Connection or wire
4. Interconnection

G. Printed-Circuit Drawings

IX. TECHNICAL ILLUSTRATION

A. Definition

B. Kinds of Illustrations

1. Pictorial
2. Cutaway assembly
3. Exploded assembly

4. Hidden and telltale sections
5. Peeled section
6. Film slides and transparencies

C. Tools, Equipment, and Supplies

D. Line Shading

1. Definition
2. Types of air burshes
  - a. Oscillating needle
  - b. Pencil type
  - c. Poster type
3. Air supply
4. Supplies and materials
5. Procedure for air brushing

XII. ARCHITECTURAL DRAFTING

A. Defined

B. Architecture Evaluated

1. Show functional patterns
2. Well engineered
3. Aesthetic value

C. Basic Drawings

1. Plan (floor)
2. Elevation
3. Perspective
4. Exterior wall section

D. Styles of House Construction

XIII. PIPE DRAFTING

A. Types of Pipe

1. Steel
2. Cast iron
3. Copper
4. Plastic

B. Pipe Connections

1. Screwed
2. Flanged
3. Welded
4. Soldered
5. Bell and spigot
6. Cementing

C. Pipe Fittings

D. Valves

1. Gate
2. Globe
3. Check

E. Pipe Drawings

1. Single-line orthographic
2. Double-line orthographic
3. Single-line isometric
4. Double-line isometric

F. Dimensioning

G. Sizes of Standard Pipe

XIV. AEROSPACE DRAFTING

A. Major Aircraft Components

1. Wings and airfoil
2. Landing gear
3. Power plant

B. Aircraft Drafting Practices

C. Undimensioned Drawings

D. Typical Drawings

XV. STRUCTURAL DRAFTING

A. Type of Work Performed (Structural Draftsman)

1. As a detailer in an architect's or engineer's office
2. Construction company's shop drawing
3. Government and agencies which control construction and design of public buildings, bridges, and other structures

B. Structural Steel Shape

1. ASTM
2. AISC

C. New Vocabulary Words

XVI. COMPUTER DRAFTING

A. Definition of Terms

1. Computer
2. Design drafter
3. Documents
4. Automated design
5. Programmer
6. Program
7. Computer language
8. On-line operation
9. Off-line operation

B. Function of Computer-Aided Design in Drafting

C. How the Computer Functions in Computer Graphics

D. Digitizer

1. Manual digitizer
2. Mechanized or automated digitizer

E. Artwork Generators

F. Automatic Drafting Machines

G. Plotters

H. Computer Graphics and the Drafter's Future

XVII. WELDING DRAFTING

A. Welding Processes

1. Fusion
2. Gas
3. Arc
4. Thermit
5. Gas and shielded arc
6. Resistance

B. Welding Drawing Symbols

C. Welded Joints

1. Butt
2. Lap
3. Corner
4. Edge
5. T

ORIENTATION: RULES, REGULATIONS, AND SAFETY 2 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
The student should be able to identify the state, parish, school, and room rules and regulations, (including basic safety rules) that apply to the drafting room.	State Rules Parish Rules School Rules Classroom Rules (including basic safety)	Read and sign rules and regulations handout sheet.	Discuss the various rules and regulations that apply to your particular situation.  Make handout sheets for students to read and sign, including general rules, regulations, and basic safety rules.	State Handbook Parish Handbook School Handbook  Book 17, p. 1A  Example in Appendix

UNIT I: REVIEW OF BASIC TECHNICAL DRAFTING 10 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>work safely in the drafting room.</p> <p>carry out the student responsibilities.</p> <p>use the drafting equipment safely.</p> <p>show knowledge of orthographic projection/multiview drawing/shape description.</p> <p>show knowledge of three-view projection.</p> <p>list all kinds of lines listed in the alphabet of lines.</p> <p>demonstrate a knowledge of dimensioning and dimensioning practices.</p>	<p>A. UNIT IV. SURFACE DEVELOPMENT AND INTERSECTIONS 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>visualize the surface development of three-dimensional objects.</p> <p>make accurate surface developments using parallel-line development, radial-line development, and triangulation.</p>	A. Drafting for Sheet Materials	Read related material on surface developments and intersections.	Assign plates where needed.	Book 4, Ch. 18 Book 8, Ch. 13 Book 16, Ch. 21 Book 3, pp. 90-101 Book 7, Plate, pp. 88-93 Book 17, pp. 21A-21N
	B. Development of Seams and Laps		Present material on surface developments and intersections. Lecture, give examples of visual models	Book 4, p. 355 Book 8, p. 359
	C. Parallel-Line Development <ol style="list-style-type: none"> <li>1. Cylinder</li> <li>2. Two-piece, square, or elbow</li> <li>3. Four-piece elbow</li> </ol>	Make drawings assigned. Make paper models from patterns developed from drawing assignments.	Assign drawing on parallel line development. Assign models that pertain to objects being drawn.	Book 4, p. 357 Book 8, p. 360, pb, 13-1 Book 16, p. 338
	D. Radial-Line Development <ol style="list-style-type: none"> <li>1. Cones</li> <li>2. Pyramids</li> </ol>	Make drawing assigned from the area cones and pyramids.	Assign appropriate drawing from radial-line development.	Book 4, p. 357 Book 16, p. 343
	E. Triangulation	Review triangulation.	Demonstrate triangulation techniques.	Book 4, p. 347, Fig. 18-34 Book 16, p. 349 Fig. 18-35
	F. Intersections <ol style="list-style-type: none"> <li>1. Prisms</li> <li>2. Cylinders</li> <li>3. Combinations</li> </ol>	Observe demonstration of techniques for drawing intersections. Make drawing assigned from chapter on Intersections. Unit test.	Demonstrate techniques used in drawing intersections of prisms, cylinders. Assign drawing on Intersections.	Book 4, pp. 353-356 Book 16, p. 354  Book 4, p. 358 Book 8, pb. 13-10 p. 362. Book 16, p. 361 *Book #3, pp. 95, 97, 101 *Book #7, pp. 90,91, 93 *Book 17, pp. 21-G, 21-K, 21-M
			Audiovisual - transparencies, overhead projections.	*Suggested plates, Assign where appropriate.

UNIT V: SECONDARY AUXILIARY VIEWS AND REVOLUTIONS 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>explain the use of three kinds of auxiliary reference planes.</p> <p>explain how to find the true size of an oblique surface.</p> <p>identify the use of the axis of revolution in finding the true shape of an oblique.</p>	<p>A. Auxiliary Projection</p> <ol style="list-style-type: none"> <li>1. Kinds of auxiliary views (review)               <ol style="list-style-type: none"> <li>a. front</li> <li>b. top</li> <li>c. right side</li> </ol> </li> <li>2. Auxiliary plane (review)</li> <li>3. Regular planes (review)</li> <li>4. Secondary auxiliary showing the true size and shape of a surface</li> </ol>	<p>*Notes</p> <p>Review seven steps in preparing a primary auxiliary view by explaining planes.</p> <p>Outline the steps for developing a secondary auxiliary.</p> <p>Draw a secondary auxiliary drawing.</p>	<p>*Explain how inclined surface can be obtained by an auxiliary view.</p> <p>Assign chapter to study.</p> <p>Assign secondary auxiliary drawing(s).</p>	<p>Book 4, pp. 146-149</p> <p>Book 12, pp. 219-220</p> <p>Book 16, pp. 257-270</p> <p>Book 4, p. 147</p> <p>Book 12, p. 221</p> <p>Book 3, pp. 237-240</p>
	<p>B. Axis of Revolution</p> <ol style="list-style-type: none"> <li>1. Axis perpendicular to horizontal</li> <li>2. Axis perpendicular to vertical</li> <li>3. Axis perpendicular to profile</li> </ol>	<p>Evaluate and outline the four most important steps in the development of planes. (Sample - Res. #4, p. 156, fig. 7-25)</p>	<p>Discuss the axis of revolution of work. Apply the two rules of revolution to the movement.</p> <p>Give demonstration of the above.</p>	<p>Book 4, p. 156, Fig. 7-25</p> <p>Book 12, pp. 231-235</p> <p>Book 3, p. 239</p>
<p>20 illustrate the rules of revolution.</p>	<p>C. Rules of Revolution</p> <ol style="list-style-type: none"> <li>1. The view that is perpendicular to the axis of revolution stays the same except in position.</li> <li>2. Distances parallel to the axis of revolution stay the same.</li> </ol>	<p>Prepare a drawing of a revolution about an axis perpendicular to the horizontal plane.</p>	<p>Assign a sketch for students to draw.</p>	<p>Book 4, p. 154, Fig. 7-20</p> <p>Book 16, pp. 265-267</p> <p>Book 12, pp. 231-233</p> <p>Book 3, p. 243</p>
	<p>D. Kinds of Revolution</p> <ol style="list-style-type: none"> <li>1. Single revolution</li> <li>2. Successive revolutions</li> </ol>	<p>Identify the steps in the development of single and successive revolutions.</p> <p>Draw assigned problem.</p> <p>Unit Test</p> <p>*Take notes in notebook.</p>	<p>Assign problem(s) on single revolution and successive revolution.</p> <p>*Use charts, overhead projector, and transparencies.</p>	<p>Book 3, pp. 70-74, Auxiliary</p> <p>Book 3, pp. 75-80, Revolutions</p> <p>Book 17, pp. 19A-19J, Revolutions</p>

## UNIT VI • GRAPHIC CHARTS AND DIAGRAMS

15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>read and interpret basic graphic charts and diagrams.</p>	<p>A. Line Charts</p> <ol style="list-style-type: none"> <li>1. Trends or changes</li> <li>2. Steps in drawing</li> </ol> <p>B. Engineering Charts</p> <ol style="list-style-type: none"> <li>1. Experimental information</li> <li>2. Nomographs</li> </ol> <p>C. Bar Charts</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Types               <ol style="list-style-type: none"> <li>a. one-column</li> <li>b. two-column</li> <li>c. horizontal-bar</li> <li>d. multiple-bar</li> </ol> </li> <li>3. Steps in drawing</li> </ol> <p>D. Pi Charts</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Steps in drawing</li> </ol> <p>E. Pictorial Charts</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Examples</li> </ol> <p>F. Organization and Flow Charts</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Examples</li> </ol>	<p>Read related chapter on Graphic Charts and Diagrams.</p> <p>Review charts and diagrams found in everyday literature.</p> <p>*Place examples of charts and graphs in notebook.</p>	<p>*Present material on basic graphic charts and diagrams.</p> <p>Distribute everyday literature to students for reviewing.</p> <p>Demonstrate techniques and procedures used for drawing graphic charts and diagrams.</p>	<p>Book 4, pp. 463-476</p> <p>Book 8, pp. 727-744</p> <p>Book 18, pp. 157-167</p> <p>Newspapers, magazines, professional journals</p> <p>Book 4, p. 474</p>
<p>construct charts and diagrams.</p>		<p>Make drawings assigned.</p> <p>*Record in notebook.</p>	<p>Assign drawings on basic charts and diagrams.</p> <p>*Audiovisual; transparencies, overhead projection.</p>	<p>Book 4, pp. 475-476</p> <p>Book 8, p. 739</p> <p>Book 18, p. 167</p> <p>*Book 3, p. 143</p> <p>*Book 9, pp. 126-130</p> <p>*Worksheet example in appendix</p>

## UNIT VII: DETAILED THREAD REPRESENTATION 18 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to.</p> <p>demonstrate a knowledge of how to draw screw threads using schematic representation.</p> <p>demonstrate a knowledge of how to draw screw threads using simplified representation.</p> <p>make a drawing of screw threads using detailed representation form.</p> <p>22</p> <p>describe the series, classes of fit, and screw-thread specifications for Unified and American National Standard Screw Threads.</p>	A. Schematic Representation (Review)	Copy information in notebook. Read unit in text.	Assign unit in text for reading. Discuss schematic representation screw threads using text and reference materials. *Illustrate schematic representation screw thread on board.	Book 4, p. 210 Book 8, pp. 763-766 Book 12, p. 249 Book 16, pp. 423-425 Book 18, p. 150
	B. Simplified Representation (Review)	Copy information in notebook. Read unit in text.	Assign unit in text for reading. Discuss simplified representation screw threads using text and reference materials. *Illustrate simplified representation screw threads on board.	Book 4, p. 210 Book 8, p. 766 Book 12, p. 249 Book 16, pp. 423-425 Book 18, p. 151
	C. Detailed Representation 1. Sharp V 2. Square 3. Acme	Copy information in notebook. Read unit in book.	Assign unit in text for reading. Discuss detailed representation screw threads using text and reference materials. *Illustrate detailed representation screw threads on board showing sharp V, square, and acme.	Book 4, pp. 209-211 Book 8, pp. 762-765 Book 12, pp. 244-247 Book 18, p. 149
	D. Screw Thread Norms 1. Thread series for Unified and American National Standard Screw Threads	Draw examples of sharp V screw threads, square screw threads, and acme screw threads.  Draw a screw thread using an assigned thread note.	Assign problem to be drawn using sharp V screw threads, square screw threads, and acme screw threads.  Assign a problem giving the students only a thread note. Indicate the kind of head and nut, thread and bolt length.	Book 4, pp. 223-226 Book 12, pp. 263 & 264 Book 16, pp. 426-434  Book 4, pp. 223-226 Book 12, pp. 263 & 264

## UNIT VIII: MAP DRAFTING 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>Identify the kinds of maps illustrated.</p>	<p>A. Careers in mapping</p> <ol style="list-style-type: none"> <li>1. Civil engineering</li> <li>2. Draftsman under the supervision of design engineer</li> </ol> <p>B. Scales and map sizes</p> <ol style="list-style-type: none"> <li>1. Decimals</li> <li>2. Kilometer</li> <li>3. Graphic scale</li> </ol> <p>C. Contour Maps</p> <ol style="list-style-type: none"> <li>1. Lines of constant level</li> <li>2. Spacing</li> <li>3. Technical pens</li> <li>4. Surveying</li> </ol> <p>D. Geological mapping</p> <ol style="list-style-type: none"> <li>1. Make-up and structure of earth surface and interior depths</li> <li>2. Geological surface map</li> <li>3. Geological sections</li> </ol>	<p>Read chapter on map drafting. Examine techniques for plat of survey, operations map, city map, aerial photo transformed to line drawings, topographic map, geologic map, and structural map.</p> <p>*Answer review questions.</p> <p>Review city map and oil field operations map.</p> <p>Prepare profile study.</p> <p>Complete student lab projects and assignments.</p> <p>Unit Test</p> <p>*Record in Notebooks</p>	<p>Assign chapter on map drafting. Read and answer review questions.</p> <p>*Demonstrate techniques used in map drafting.</p> <p>Assign site plan drawing of teacher's choice. Assist students when needed.</p> <p>Assign profile coordinate map. Assist students when needed.</p> <p>*Audiovisual aids. Overlay - projection.</p>	<p>Book 4, Ch. 22 Book 8, Ch. 21 Book 12, Ch. 21</p> <p>Book 4, p. 460</p> <p>Book 4, pp. 412, 424, 450 Book 4, Fig. 22-24, p. 461 Book 8, p. 605 Book 8, p. 627, plb. 1 Book 12, pp. 395-398 Book 12, p. 398, pbl. 1 &amp; 2</p> <p>Book 4, p. 462, Fig. 22-28 Book 8, p. 627, pbl. 12 Book 12, p. 398, pbl. 3 Book 3, pp. 139 &amp; 140 Book 9, pp. 111 &amp; 112</p>

24

make a plat survey or a site plan.

make a contour map, using profile coordinates to show contour profile.

41

42

UNIT IX: BASIC DESCRIPTIVE GEOMETRY 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>graphically define the basic geometric elements and shapes.</p> <p>make a drawing of the three basic lines, with proper notations.</p> <p>make a drawing of an oblique plane and describe principles of geometric location.</p>	<p>A. Points</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Projections</li> <li>3. Fixed points</li> </ol> <p>B. Basic Lines</p> <ol style="list-style-type: none"> <li>1. Normal</li> <li>2. Inclined</li> <li>3. Oblique</li> </ol> <p>C. Planes</p> <ol style="list-style-type: none"> <li>1. Plane one (normal)</li> <li>2. Plane two (inclined)</li> <li>3. Plane three (oblique)</li> </ol>	<p>Draw a series of basic geometric shapes and the given basic solids.</p> <p>Develop drawings of a line segment.</p> <p>Make a drawing of the three basic lines assigned by the instructor.</p> <p>Develop a drawing on the point view of a line.</p> <p>Make a drawing of an oblique geometric plane, describing the principles of location.</p> <p>Develop a plate on true shape assigned by instructor.</p> <p>Complete all drawings assigned for this unit.</p> <p>Unit Test</p>	<p>Assign drawing problems from the geometric shapes.</p> <p>Assign plate on a line segment.</p> <p>Assign drawing covering the basic lines.</p> <p>Assign plate on the point view of a line.</p> <p>*Give the students a physical model of an oblique plane. Assign drawing covering oblique plane.</p> <p>Assign plate pertaining to the true shape of an object.</p> <p>*Audiovisual aids</p>	<p>Book 4, Ch. 4 Book 4, Ch. 8 Book 12, Ch. 24 Book 15, pp. 289-293 Book 18, Ch. 6 Book 7, pl. 78, 79</p> <p>Book 4, pp. 166-170 Book 12, pp. 442-443 Book 7, pl. 81</p> <p>Book 4, pp. 168-177 Book 12, pp. 442-443 Book 7, pl. 82-85</p> <p>*Book 7, pp. 78, 81, 84 Book 17, pp. 20A-20R *Book 17, pp. 20K, 20-O, 20R</p> <p>*Sample plates in Appendix</p>

UNIT X: ELECTRICAL AND ELECTRONIC DRAFTING 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
The student should be able to:	A. Career Opportunities 1. Preparation 2. Electrical or electronic draftsman 3. Electronic environment	Read corresponding material in text.	Lecture on career opportunities.	Book 4, pp. 477-479
define the terms used in electrical and electronic drafting.	B. Terms for Understanding Electricity and Electronics 1. Electricity 2. Voltage and current 3. Resistance 4. Units 5. Formulas	Read corresponding material in text.	*Lecture on electrical and electronic drafting.	Book 4, pp. 479-481 Book 8, pp. 549-551
read a graphic symbols chart.	C. Graphic Symbols	Copy graphic symbols into notebook.	Assign graphic symbol chart to be copied in notebook.	Book 2, pg. 470, fig. 23-4 Book 4, pp. 482-483 Book 4, p. 484
26 list the basic elements of a simple electric circuit.	D. Circuits 1. Series 2. Parallel 3. Combination	Read corresponding material in text.  Observe electrical and electronic drawings and identify symbols and types of drawings.	*Demonstrate the electrical house wiring circuit board.  Secure copies of electrical and electronics drawings from local industries and ask class members to identify the symbols and types of drawings.  *Audiovisual aids	Book 9, pp. 488-491

27

47

48

UNIT XI: TECHNICAL ILLUSTRATION 15 Hours

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>identify and select an illustration that provides information by visual methods.</p> <p>name some additional drafting instruments, equipment, and supplies.</p> <p>identify proper use of drawing instruments as a means of preparing accurate illustration.</p> <p>show steps/used in line shading.</p> <p>identify and apply various kinds of airbrush renderings.</p>	<p>A. Definitions</p> <ol style="list-style-type: none"> <li>1. Drawing</li> <li>2. Information</li> </ol>	<p>*Keep notes of discussion.</p> <p>Define technical illustration. Read chapter.</p>	<p>Assign chapter to read on technical illustration.</p>	<p>Book 4, pp. 523-532 Book 2, pp. 512-521 Book 16, pp. 385-414</p>
	<p>B. Types of Illustration</p> <ol style="list-style-type: none"> <li>1. Pictorials</li> <li>2. Graphic charts</li> <li>3. Cutaway assembly</li> <li>4. Exploded assembly</li> <li>5. Hidden and telltale section</li> <li>6. Peeled section</li> <li>7. Film slides and transparencies</li> </ol>	<p>List several kinds of illustration.</p> <p>Draw assigned problems.</p>	<p>Discuss technical illustration with students. Assign problems for class drawing.</p>	
	<p>C. Tools, Equipment, and Supplies</p> <ol style="list-style-type: none"> <li>1. Crew quill pen</li> <li>2. Felt-tip pen</li> <li>3. X-Acto knife</li> <li>4. Paper Stomp</li> <li>5. Two brushes</li> <li>6. Airbrush</li> <li>7. Reducing glass</li> </ol>	<p>Draw assigned problems.</p>	<p>Demonstrate the correct procedure for tool care and identify tools.</p> <p>Assign problems for class drawings.</p>	
	<p>D. Line Shading</p> <ol style="list-style-type: none"> <li>1. Definition</li> <li>2. Techniques</li> </ol>	<p>Draw assigned problems in line shading.</p>	<p>*Show examples of shading object.</p>	
	<p>E. Surface Shading</p>			
	<p>F. Airbrush Rendering</p> <ol style="list-style-type: none"> <li>1. Definition</li> </ol>	<p>Prepare a line drawing of assigned objects.</p>	<p>Demonstrate the use of the airbrush.</p>	
		<p>*Take notes in notebook.</p>	<p>*Use transparencies, films, and charts.</p>	

(Continued)

[illegible]

UNIT XII: ARCHITECTURAL DRAFTING (OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>identify several styles of residential architecture and define architecture.</p> <p>understand the design function and the fundamentals of the construction of a family dwelling.</p> <p>make a detailed drawing of a floor plan, related elevation, and exterior wall section.</p>	<p>A. Styles of Residential Architectural</p> <p>B. Architecture Defined</p> <p>C. Architecture Evaluated</p> <ol style="list-style-type: none"> <li>1. Show functional pattern</li> <li>2. Well engineered</li> <li>3. Aesthetic value</li> </ol> <p>D. Basic Drawings</p> <ol style="list-style-type: none"> <li>1. Plan (floor)</li> <li>2. Elevation</li> <li>3. Perspective</li> <li>4. Wall section</li> </ol>	<p>Read unit in text. Find photographs for and sketch each style of architecture.</p> <p>Write the definition of architecture in your own words.</p> <p>Redesign an existing house room by room. Change existing walls if necessary.</p> <p>Draw a detailed floor plan; include all necessary information for actual construction. Draw a front and side elevation of the floor plan.</p> <p>Draw a typical exterior wall section of the floor plan.</p>	<p>Discuss the characteristics of each style of architecture and show examples of each.</p> <p>Help students write their own definition of architecture.</p> <p>Define architecture for the class.</p> <p>Assign students to redesign an existing house. Remind students to remember traffic patterns from room to room, the structural engineering of the house, and the aesthetic value.</p> <p>Assign students to make a detailed drawing of a floor plan, front and side elevation, and exterior wall section.</p>	<p>Book 4, pp. 378-419</p> <p>Book 8, pp. 631-663</p> <p>Book 12, pp. 413-434</p> <p>Book 16, pp. 533-570</p> <p>Book 18, pp. 320-343</p> <p>Book 4, pp. 381-383</p> <p>Book 8, pp. 631-639</p> <p>Book 12, p. 420</p> <p>Book 16, pp. 537-546</p> <p>Book 18, pp. 320-323</p> <p>Book 4, pp. 378-429</p> <p>Book 8, pp. 631-663</p> <p>Book 12, pp. 413-434</p> <p>Book 16, pp. 533-570</p> <p>Book 18, pp. 320-343</p> <p>Book 3, p. 125</p> <p>Book 17, pp. 32A-32L</p> <p>Book 17, pp. 32A, 32C, 22I</p>

## UNIT XIII: PIPE DRAFTING

(OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>demonstrate an understanding of the different types of piping systems and piping materials.</p>	<p>A. Types of Pipe</p> <ol style="list-style-type: none"> <li>1. Steel</li> <li>2. Cast iron</li> <li>3. Copper</li> <li>4. Plastic</li> </ol> <p>B. Pipe Connections</p> <ol style="list-style-type: none"> <li>1. Screwed</li> <li>2. Flanged</li> <li>3. Welded</li> <li>4. Soldered</li> <li>5. Ball and spigot</li> <li>6. Cementing</li> </ol> <p>C. Pipe Fitting</p> <p>D. Valves</p> <ol style="list-style-type: none"> <li>1. Gate</li> <li>2. Globe</li> <li>3. Check</li> </ol> <p>E. Pipe Drawings</p> <ol style="list-style-type: none"> <li>1. Single-line orthographic</li> <li>2. Double-line orthographic</li> <li>3. Single-line isometric</li> <li>4. Double-line isometric</li> </ol>	<p>Read chapter in text.</p> <p>Study the different kinds of pipe, connections, fittings, and valves. Interpret sample pipe drawing from industry.</p> <p>Study component chart for single-line and double-line screw connection fitting. Sketch the piping system used in the student's home or classroom. Draw a piping system using all or as many components as you can.</p>	<p>Assign students to read chapter in text. Discuss text material and any reference material. Display sample pipe drawings from industry and have students interpret them.</p> <p>Assign students to study the chart on symbols for screw connection fittings. Assign students to sketch an existing piping system with which they are familiar. Assign students to draw a piping system using all or as many components as possible.</p>	<p>Book 16, pp. 483-485</p> <p>Book 16, pp. 485-490</p> <p>Book 9, pp. 93-96 Book 17, pp. 29A-29L Book 9, pp. 93 &amp; 96 Book 17, pp. 29A, 29C, 29I</p>

UNIT XIV: AEROSPACE DRAFTING (OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>list the major aircraft components.</p> <p>list five kinds of aerospace vehicles illustrated in this unit.</p> <p>list the techniques and advantages of undimensioned aerospace drawing.</p>	A. Major aircraft components <ol style="list-style-type: none"> <li>1. Wings and airfoil</li> <li>2. The landing gear</li> <li>3. The power plant</li> </ol>	<p>Read related chapter.</p> <p>Make a sketch of major aircraft components and label parts.</p>	Lecture	<p>Book 4, p. 501</p> <p>Book 4, pp. 502-506</p> <p>Book 8, pp. 423-429</p>
	B. Aircraft Drafting Practices	<p>Make a sketch of five kinds of aircraft and list their respective physical traits.</p>	Discuss techniques in aerospace drafting.	
	C. Undimensioned drawings	<p>Examine the illustrations of undimensioned drawings.</p>	Discuss undimensioned drawings.	<p>Book 4, pp. 506-514</p> <p>Book 8, pp. 407-408</p>
	D. Typical Drawings	<p>Prepare a list of drawings suitable for undimensioned techniques.</p>	<p>Use chart, overhead projector and transparencies.</p>	<p>Book 9, pp. 82-86</p> <p>Book 9, pp. 83 &amp; 85</p>

UNIT XV: STRUCTURAL DRAFTING (OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>identify the various steel shapes employed in structural forms and use proper symbols for each.</p> <p>identify the terms that are common to structural drafting.</p>	<p>A. Types of Work Performed (Structural Draftsman)</p> <ol style="list-style-type: none"> <li>1. Detailer in an architect's or engineer's office</li> <li>2. Making the shop drawing for a construction company</li> <li>3. Preparing drawings for government or other agencies that regulate the construction and design of public buildings, bridges, and other structures</li> </ol> <p>B. Structural Steel Shapes</p> <ol style="list-style-type: none"> <li>1. American Society for Testing and Material (ASTM)</li> <li>2. American Institute of Steel Construction (AISC)</li> </ol> <p>C. Vocabulary Words</p> <ol style="list-style-type: none"> <li>1. bay</li> <li>2. beam</li> <li>3. cantile</li> <li>4. column</li> <li>5. flange</li> <li>6. girder</li> <li>7. gusset plate</li> </ol>	<p>Read related chapters. Have class discussion. Identify structural drafters.</p> <p>Make a drawing of the basic steel shapes and label with proper symbols.</p> <p>*Notes</p> <p>List some terms that are new to you in drafting.</p> <p>*Take notes in notebook.</p>	<p>Lecture.</p> <p>Show students job opportunities.</p> <p>Discuss kinds of structural drafters.</p> <p>Assign drawings of basic steel shapes.</p> <p>Discuss new terms with students.</p>	<p>Book 4, p. 430</p> <p>Book 20, pp. 1-4</p> <p>Book 3, pp. 111-113</p> <p>Book 21</p> <p>Book 9, pp. 97-100</p> <p>*Book 9, pp. 97,100</p> <p>Book 4, pp. 430-444</p> <p>Book 20, pp. 1-196</p> <p>*Example in Appendix</p>

## UNIT XVI: COMPUTERS IN DESIGN AND DRAFTING (OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
The student should be able to:  understand how digitizers, plotters, and CRT video display units function.  understand how computers function in computer graphics.	A. Definition of Terms 1. Computer 2. Design drafter 3. Documents 4. Automated design 5. Programmer 6. Program 7. Computer language 8. On-line operation 9. Off-line operation	Record definitions into notebook.	Lecture on computer-related terms. Assign definitions.	Book 2, pp. 427-427 Book 8, pp. 325-328
	B. Function of Computer-Aided Design in Drafting	Read material in text.	Bring examples of computer aided drawing for class to observe. Take field trip to local industry that uses computer-aided drafting.	Book 2, p. 427 Book 8, pp. 328-329
demonstrate an understanding of the effects of computers on the drafting profession.	C. How the Computer Functions in Computer Graphics	Read related material in text.	Lecture on computer functions	Book 2, pp. 427-428 Book 16, pp. 571-576
	D. Digitizer 1. Manual 2. Mechanized or automated	Read related material in text and view film. Take part in class discussion.	Show a film on computer graphics and lead class in a discussion of the effect of the computer on drafting.	Book 2, p. 429 Book 8, p. 330
	E. Artwork Generators	Read areas in text. Answer questions for discussion at end of chapter.	Present material to class in form of lecture, handouts, or audiovisual presentations. Assign discussion questions at end of chapter.	Book 2, p. 450 Book 2, p. 430 Book 8, pp. 330-336 Book 2, p. 432
	F. Automatic Drafting Machines  G. Plotters  H. Computer Graphics and the Drafter's future	Complete problems assigned by the instructor.	Assign problems.	Book 2, p. 432 Book 16, pp. 580-584 Book 17, prob. 33A-33D Book 17, pp. 33A, 33C
				*Example in appendix

## UNIT XVII: WELDING DRAFTING (OPTIONAL)

OBJECTIVES	TOPICS	STUDENT ACTIVITIES	TEACHER ACTIVITIES	RESOURCES
<p>The student should be able to:</p> <p>list the basic processes for joining metals and identify the standard symbol for welding.</p>	<p>A. Welding Processes</p> <ol style="list-style-type: none"> <li>1. Fusion</li> <li>2. Gas</li> <li>3. Arc</li> <li>4. Thermit</li> <li>5. Gas and shielded arc</li> <li>6. Resistance</li> </ol> <p>B. Welding Drawing Symbols</p>	<p>Read chapter.</p> <p>Draw and label the standard symbols.</p> <p>*List three basic processes of joining metals and give their respective characteristics.</p>	<p>Hold a class discussion on different welding processes.</p> <p>*Show class examples of the different welding processes.</p> <p>*Show film on welding processes.</p>	<p>Book 2, Bh. 24</p> <p>Book 4, Ch. 17</p> <p>Book 18, Ch. 14</p> <p>Book 2, pp. 487-491</p> <p>Book 4, pp. 323-324</p> <p>Book 18, pp. 169-171</p>
<p>35</p> <p>make a drawing of a fabricated part assembled with arc welds; use proper symbols.</p>	<p>C. Welded Joints</p> <ol style="list-style-type: none"> <li>1. Butt</li> <li>2. Lap</li> <li>3. Corner</li> <li>4. Edge</li> <li>5. T</li> </ol>	<p>*Make a chart of the kinds of welds and diagram applications, prepare a pictorial drawing illustrating the five welded joints.</p> <p>Make a welding drawing.</p> <p>*Record in notebook.</p>	<p>Discuss five basic kinds of welded joints.</p> <p>Assign a welding drawing.</p> <p>*Audiovisual aids</p>	<p>Book 2, p. 491</p> <p>Book 4, pp. 325, Fig. 17-8</p> <p>Book 18, pp. 174-175</p> <p>Book 2, p. 489</p> <p>Book 4, p. 325, Fig. 17-8</p> <p>Book 2, pp. 495-497</p> <p>Book 4, pp. 331-332</p> <p>Book 3, pp. 136-138</p> <p>*Book 3, p. 136</p> <p>*Example in appendix</p>

APPENDIX I  
TOOL LIST

ADVANCED TECHNICAL DRAWING  
TOOLS AND EQUIPMENT

Classroom tools and equipment provided by the school include the following:

<u>Item</u>	<u>Quantity</u>	<u>Description</u>
Drafting Table	25	30" x 42" w/five storage drawers
Drafting stools	25	Steel frame 30"
Blueprint machine	1	60"
Paper cutter	1	36"
Pencil sharpener	1	General purpose
Supply storage cabinet	1	Metal
Drawing storage cabinet	1	Metal
Teacher desk w/chair	1	Wood
Drawing board	25	18" x 24" wood/metal edge
Drawing paper	200 sheets	8½" x 11" tracing
Drawing paper	200 sheets	11" x 17" white
Drawing paper	100 sheets	18" x 24" tracing
Set of technical pens		
Contour pen		
Airbrush		
Crow quill pens		
Paper stomps		
X-Acto knife		

The following is a list of tools and equipment to be furnished by the student enrolled in the Advanced Technical Drafting course:

<u>Item</u>	<u>Quantity</u>	<u>Description</u>
Set of drawing instruments	1	General purpose
T-square	1	24" plastic
Triangle	1	45° - 10" clear
Triangle	1	30° x 60" - 8" clear
Scale	1	Architect plastic
Erasing shield	1	Metal
Dust brush	1	8" horsehair
Arnes Lettering Guide	1	Clear plastic
Protractor	1	General purpose, clear plastic
Irregular	1	8" clear plastic

The following is a list of consumable supplies to be furnished by the student enrolled in the Advanced Technical Drafting course:

<u>Item</u>	<u>Quantity</u>	<u>Description</u>
Drafting tape	1 roll	3/4" - 60 yards
Eraser	1	Plastic
Eraser	1	Art gum
Sandpaper pad	1	
Dusting powder	1	12 oz. bottle
Lead holder	1	.05 MM
Leads	2 ea.	4H, 2H, HB
Illustration board	1	18" x 24" white
Felt tip pen		
Scotch tape		
Masking tape		
3 brushes		

## APPENDIX 2

### SAFETY

## DRAFTING ROOM SAFETY

As it is in industry, safety is a primary concern in the drafting classroom. The most important factor in safety is the attitude of the worker. Before proceeding further, read the following safety precautions pertaining to the use of drafting equipment, machines, and material.

- Adequate clearance around drafting tables must be kept according to fire and safety regulations.
- Stools and chairs must be kept out of aisles and placed under tables and desks when not in use.
- Stools must be used so that they rest on all four legs. A "tilted stool" may cause a serious fall.
- Adjustments to drafting tables should be supervised by the instructor. Fingers must be kept clear of the top and hinged area.
- Drafting machine arms, T-square blades, and other equipment must not block aisles.
- Handle dividers, compass, ruling pen, and pencils carefully as they are sources of puncture wounds.
- Points of thumb tacks often break off from the head and remain sticking out of the drafting board. These points should be removed immediately from the board as they may cause injury to the hands. Tape is recommended for mounting paper on drafting boards.
- Pencils, erasers, and other small articles should be picked up from the floor in order to prevent them from becoming the cause of a serious fall.
- Pencils, thumb tacks, and other small articles should not be placed or held in the mouth. These items may be swallowed or cause injury and infection.
- Chemicals must be kept away from the eyes, nose, and throat; and should be used only in an area where adequate ventilation can be provided.
- Always keep hands and fingers clear of the paper-cutter blade.
- The blade of the paper cutter must be kept in the "down" position when the paper cutter is not in use.
- Hands must be kept clear of the light tube and belt-feeding mechanism of the Diazo whiteprinter in order to avoid crushed fingers.
- Playing, scuffling, and other forms of "horseplay," are extremely dangerous. A playful push may cause a bad cut or bruise from contact with the sharp edge of a piece of furniture or equipment.
- Articles and materials must be stored in proper lockers and shelves. Items placed on top of lockers may fall, causing injuries.
- Any injury, no matter how slight, should be reported to the instructor immediately. Infection can result from uncared for minor cuts and scratches.

## ADVANCED TECHNICAL DRAFTING

### Suggested Classroom Rules and Regulations Students Should Follow

1. Talking is absolutely forbidden:  
whenever the teacher is talking.  
whenever any examination or quiz is in progress.  
whenever any other student has the floor.  
whenever there is any kind of audiovisual presentation  
in progress, such as a film or filmstrip.
2. Do not talk loudly.
3. Do not make disrespectful remarks to the teacher.
4. Do not bring radios, tape players, or other entertainment devices to class.
5. Do not leave paper or trash in the desks or on the floor.
6. Do not mark or otherwise deface school property. This includes desks, floors, walls, chairs, books, etc.
7. Do not move to another seat other than the one assigned to you without prior approval of the teacher.
8. Do not be tardy for class.
9. Do not leave the classroom without a hall pass.
10. Do not congregate in the doorway before or after class.
11. Do not enter the office and storage room, and do not open cabinets without prior permission to do so.
12. Do all work in class under the teacher's supervision. Only supplementary work or drawings may be done outside of class.
13. Complete all makeup work no later than five days after an absence.
14. Do not do work from other classes in the drafting class without special permission.
15. Other than for official meetings, do not leave to go to another teacher's room without a written note from that teacher and approval from the drafting teacher.

16. Use cover sheets for all quizzes and tests.
17. Use five minutes at the end of each hour to clean up and put away equipment and materials. Signal will be given by the teacher for the start of this cleanup.
18. Remain seated at your desk until dismissed by the teacher (not when the bell rings).
19. Be sure that your desk and stool are in order before leaving the class.
20. Enter and exit through the front door only.

ADVANCED TECHNICAL DRAFTING  
SUGGESTED STUDENT EXPECTATIONS

- I. Students will be expected to bring the following materials to class each day:
  - 1. notebook
  - 2. pencil
  - 3. textbook (when issued)
  - 4. drawing equipment and materials
- II. Students will be expected to be in their assigned seats and prepared to begin class when the tardy bell rings.
- III. Students will be courteous and respectful to their classmates as well as to the teacher during class activities by listening while others speak.

# GRADING CHART FOR TECHNICAL DRAFTING

	Neatness	Accuracy	Line Quality	Lettering
Work is above Criticism A in every item				
Lacking slightly in not B more than one item				
Lacking slightly in not C more than two items				
Lacking seriously in one D item or generally lacking				
<u>This kind of work should</u> <u>be done over</u> D.O. Grade	<u>Crumpled</u>  <u>Inaccurate</u>	<u>Ragged edges</u> <u>Do not roll</u> <u>drawings</u>	<u>Carelessly lettered</u> <u>Omitted drawing</u> <u>guide lines</u>	
Other considerations: Industry, speed, judgment, application, general knowledge, consideration of others, and <u>teacher</u> .				

- Neatness - The absence of undesirable marks from:
1. Measuring
  2. Needlepoints
  3. Tacking
  4. Erasures
  5. Finger marks
  6. High spot rubs (T-square)
  7. Crumpling from rolling
  8. Soil or markings in any way
- Accuracy - The measure of perfection in:
1. Tangency
  2. Measurement
  3. Match-line spacing
  4. Dimensioning
  5. Balancing views
  6. Projection
  7. Proportion of symbols and other representations
- Line Quality - The quality of and conventional correctness of lines:
1. Construction conforming to standards
  2. Weight conforming to standards
  3. Uniform weight of same class lines
  4. Clean cut and not worked over
  5. Limitations correct for center lines, extension, and other lines with breaks
- Lettering - The quality of the free-hand work on plate:
1. Standard inclination (vertical or incline lettering)
  2. Consistent inclination
  3. Standard height for purpose
  4. Consistent height
  5. Guidelines used consistently throughout drawing
  6. Lettering composition--correct spacing
  7. Work spacing as necessary to drawing
  8. Spelling

APPENDIX 3  
SUGGESTED PROBLEMS FROM TEXTS

## ADVANCED TECHNICAL DRAFTING

Suggested drawing assignments for Advanced Technical Drafting course:

- Unit I            Review of Basic Technical Drawing
- Fig. 15-31 (#12, p. 290)
  - Fig. 15-35 (#12, p. 292)
  - Fig. 15-47 (#12, p. 300)
  - Fig. 11-31 (#4, p. 242)
  - Fig. 11-38 (#4, p. 244)
- Unit II           Functional Drafting
- Fig. 16-29 (#4, p. 320)
  - Fig. 16-35 (#4, p. 321)
  - Fig. 16-36 (#4, p. 321)
  - Fig. 16-37 (#4, p. 321)
- Unit III          Inking
- Fig. 13-38 (#4, p. 286)
  - Fig. 13-43 (#4, p. 287)
  - Fig. 13-48 (#4, p. 288)
- Unit IV          Surface Development and Intersections
- Fig. 18-54 (#4, p. 357)
  - Fig. 18-55 (#4, p. 358)
  - P. 13-3 (#8, p. 360)
  - P. 13-10 (#8, p. 362)
  - Fig. 21-41 (#16, p. 358)
- Unit V           Secondary Auxiliary Views and Revolutions
- Fig. 12-35 (#12, p. 227)
  - Fig. 12-36 (#12, p. 228)
  - Fig. 12-37 (#12, p. 229)
  - Fig. 13-10 (#12, p. 236)
  - Fig. 13-11, (#12, p. 237)
  - Fig. 7-29 (#4, p. 158)
  - Fig. 7-59 (#4, p. 160)
  - Fig. 7-62 (#4, p. 162)
  - Fig. 7-65 (#4, p. 163)
- Unit VI          Charts and Diagrams
- Fig. 23-46 (#4, p. 475)
  - Fig. 23-39 (#4, p. 475)
  - Fig. 23-47 (#4, p. 475)
  - Fig. 23-56 (#4, p. 476)
  - Fig. 23-59 (#4, p. 476)

Unit VII	Detailed Thread Representation
	Fig. 24-30 (#16, p. 428)
	Fig. 24-43 (#16, p. 434)
	Fig. 10-46 (#4, p. 223)
	Fig. 10-48 (#4, p. 223)
	Fig. 10-52 (#4, p. 224)
	Fig. 10-55 (#4, p. 224)
	Fig. 14-39 (#12, p. 263)
Unit VIII	Map Drafting
	Fig. 21-1 (#12, p. 398)
	Fig. 21-2 (#12, p. 398)
	Fig. 22-27 (#4, p. 461)

APPENDIX 4  
SAMPLE WORK SHEETS

All the drafting problems in this section are examples only. They are not to be reproduced, especially those used by permission from the following books:

Brown, Walter. Drafting for Industry Workbook. South Holland, Illinois: Goodheart-Willcox Publishing Company, 1980

Levens, A. S. and Cooper, S. J. Problems in Mechanical Drawing. 5th ed. New York: McGraw-Hill Book Company, 1980.

Spence, William P. Drafting Worksheets. Revised. Peoria, Illinois: Bennett Publishing Company, 1981.

Wallach, Paul. Drafting Problems. Encino, California: Glencoe Publishing Company, 1981.

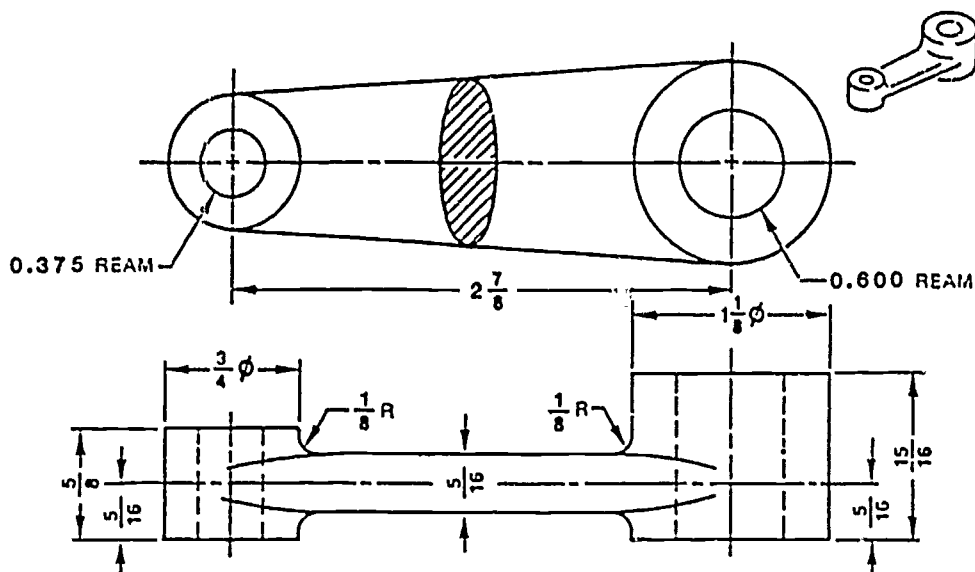

## SAMPLE WORK SHEETS

- Unit I      Review of Basic Technical Drafting  
Problems: 30-C, 117, 97
- Unit IV     Surface Development and Intersections  
Problems: 90, 91, 93, 95, 97, 101, 21-G, 21-K, 21-M
- Unit V      Secondary Auxiliary Views and Revolutions  
Problems: 70, 72, 73, 76, 79, 87, 88, 19C, 19E, 19H
- Unit VI     Graphic Charts and Diagrams  
Problems: 126, 127, 128, 129, 130, 143
- Unit VII    Detail Thread Representation  
Problems: 104, 105, 65, 66, 67, 68
- Unit VIII   Map Drafting  
Problems: 111, 112, 139, 140
- Unit IX     Basic Descriptive Geometry  
Problems: 78, 81, 20-K, 20-O, 20-R, 82
- Unit X      Electrical and Electronic Drafting  
Problems: 28-G, 28-H, 134, 135
- Unit XI     Technical Illustration  
Problems: 23-F, 23-J, 23-L, 141, 142

### \*Optional Areas

- \*Unit XII   Architectural Drafting  
Problems: 32-A, 32-C, 32-I, 125
- \*Unit XIII   Piping Drafting  
Problems: 29-A, 29-C, 29-I, 93, 96
- \*Unit XIV   Aerospace Drafting  
Problems: 83, 85
- \*Unit XV    Structural Drafting  
Problems: 97, 100
- \*Unit XVI   Computer Drafting  
Problems: 33-A, 33-C
- \*Unit XVII   Welding Drafting  
Problem: 136

UNIT I REVIEW OF BASIC TECHNICAL DRAFTING

MAKE A THREE-VIEW WORKING DRAWING.

SCALE 1:1

This drawing is from the following source and is used by permission.  
Hallach, Paul. Drafting Problems. Encino, California: Glencoe Publishing Company, 1981.

DESIGN/WORKING DRAWINGS

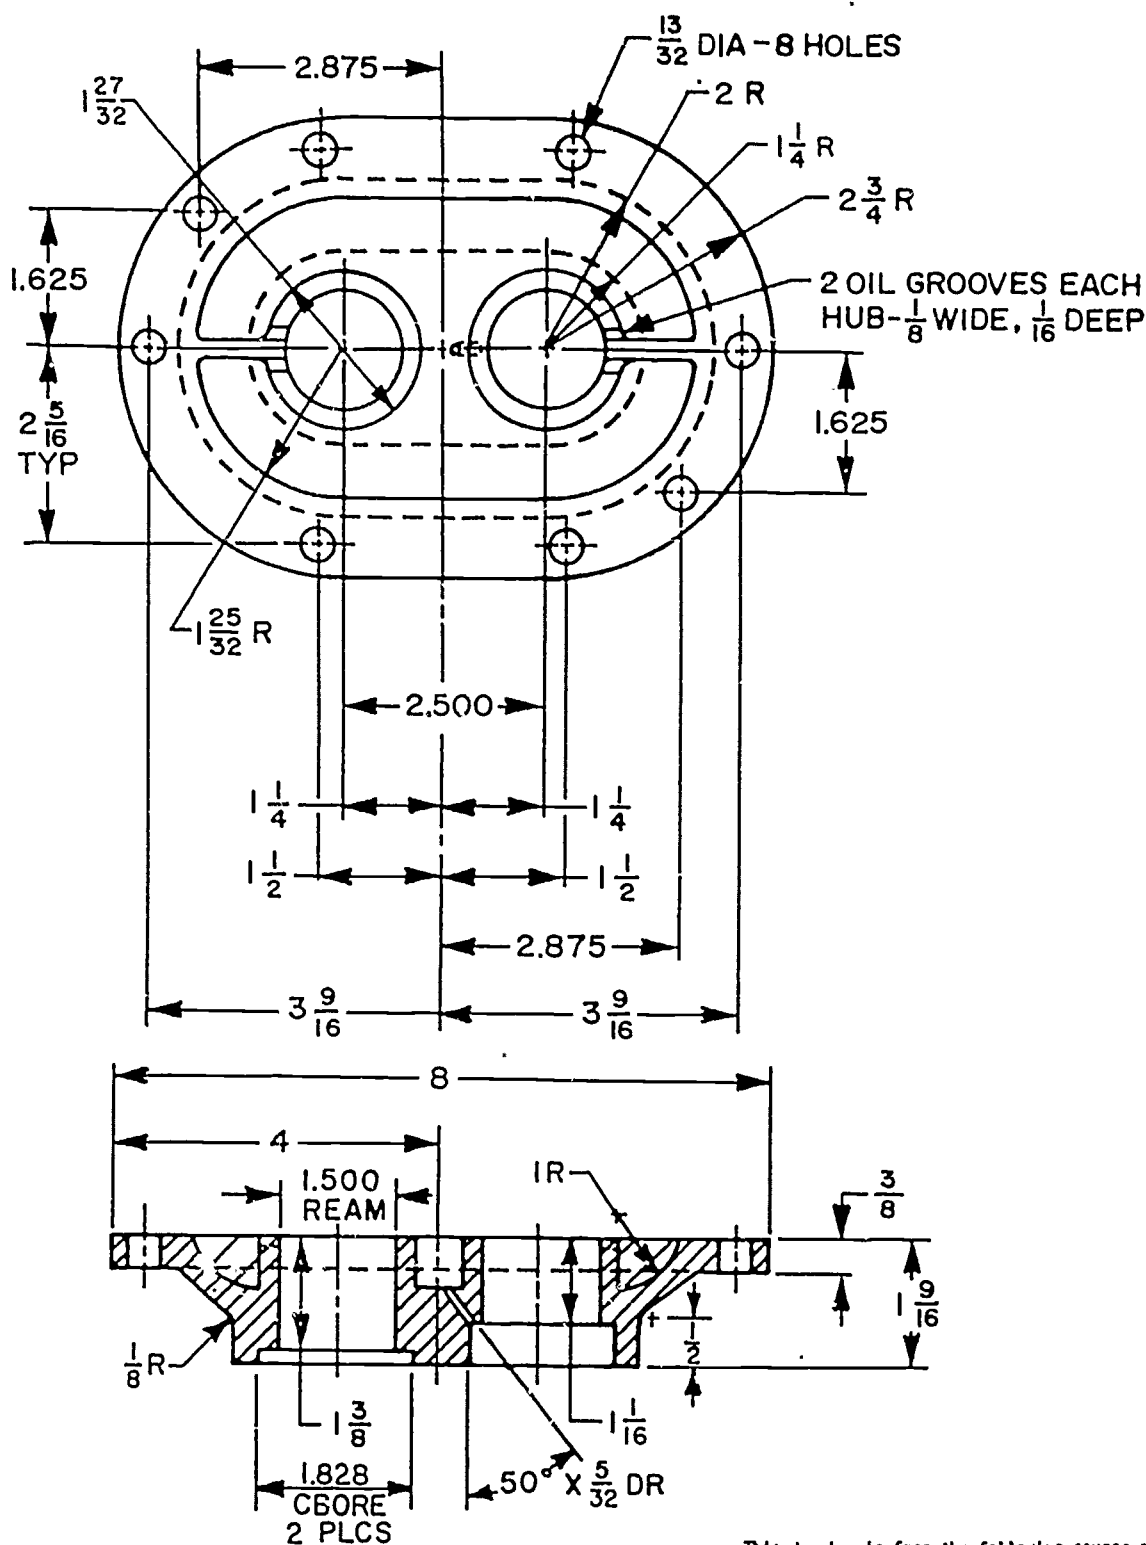

NAME

SECTION

DATE

PROBLEM  
30-C

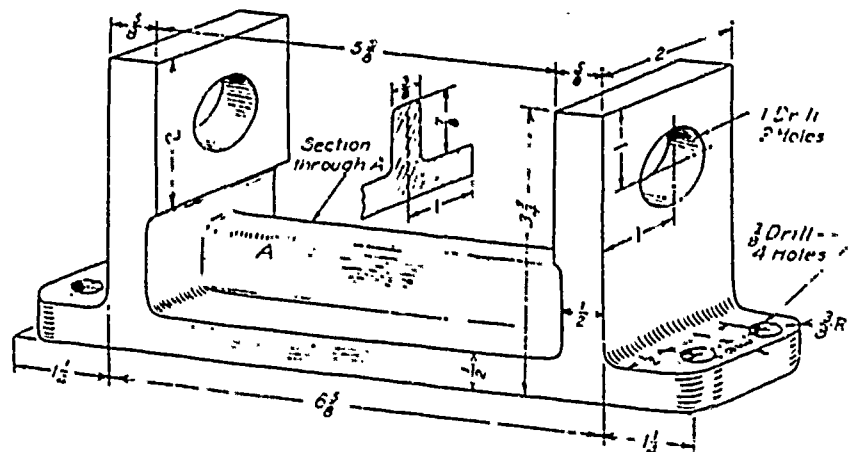

MAKE A DETAILED WORKING DRAWING OF THE PART SHOWN. USE SHEET NO. 115. CHANGE ALL DIMENSIONS TO DECIMAL LIMIT DIMENSIONS WITH THE FOLLOWING TOLERANCES. .XXX =  $\pm .003$ , .XX =  $\pm .010$ . DELETE ALL UNNECESSARY DIMENSIONS. INDICATE BY USE OF SYMBOLS ALL FLAT SURFACES AS 125 MICROINCHES AND ALL BORED AND COUNTERBORED HOLES AS 63 MICROINCHES IN TEXTURE.

GEAR COVER PLATE

This drawing is from the following source and is used by permission.  
Brown, Walter. Drafting for Industry Workbook.  
South Holland, Illinois: Goodheart-Willcox Publishing Company, 1980.

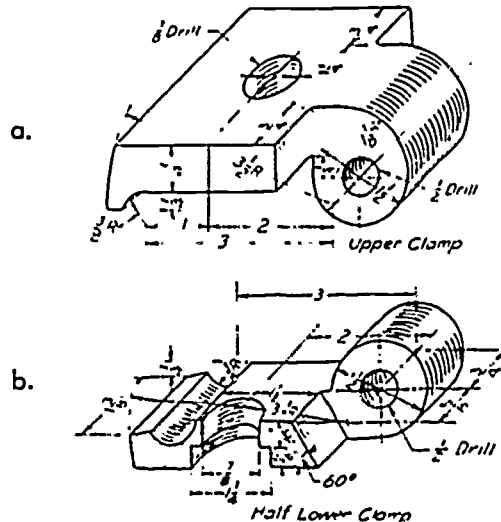

## 1 Support

Make a working drawing of the *Support*. Dimension completely and indicate the surfaces you assume to be finished. Show a revolved or removed section of the web. Suggested scale:  $\frac{1}{2}$  size. (Millimeters may be used, with a scale of 1:2.)

## 2 Clamp

This drawing is from the following source and is used by permission.  
Levens, A. S. and Cooper, S. J. *Problems in Mechanical Drawing*. 5th ed. New York: McGraw-Hill Book Company, 1980.

Make full-size working drawings of the two parts of the *Clamp*.

Draw c assembly of the *Clamp* (open at 45°) with sections as deemed necessary.

UNIT IV SURFACE DEVELOPMENT AND INTERSECTIONS

1. Using instruments, draw the right-side and auxiliary views to show the true shape of the sloping surface. (Refer to Chapter 7.)

2. Draw an auxiliary view, showing the true shape of the sloping surface. Use the offset method in drawing the curve. (Refer to Chapter 7.)

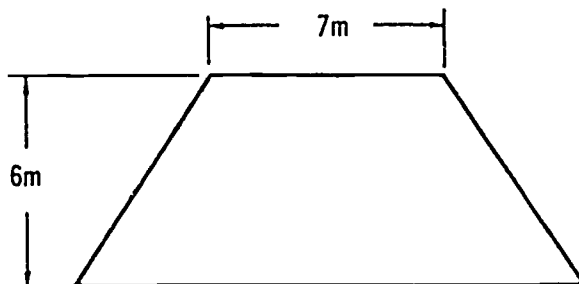

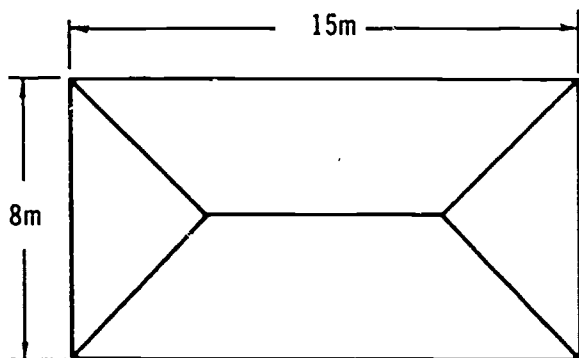

This drawing is from the following source and is used by permission.  
 Levens, A. S. and Cooper, S. J. Problems in Mechanical Drawing. 5th ed. New York: McGraw-Hill Book Company, 1980.

Title: Auxiliary Views

NAME OF SCHOOL _____		Drawn by: _____ Date: _____	90
----------------------	--	--------------------------------	----

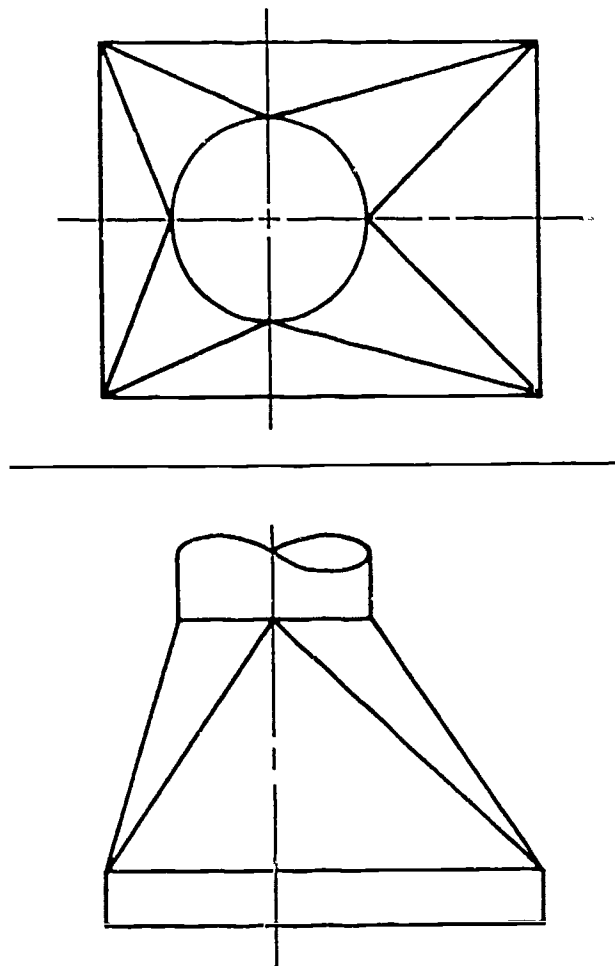

Make a pattern (development) of the roof surfaces and calculate the number of square meters in the entire roof.

This drawing is from the following source and is used by permission.  
 Levens, A. S. and Cooper, S. J. Problems in Mechanical Drawing, 5th ed. New York: McGraw-Hill Book Company, 1980.

Title: Development

Develop the lateral surface of the *Transition Piece* that connects the circular duct and the rectangular opening.

Title: Development

NO. 132

UNIT IX      BASIC DESCRIPTIVE GEOMETRY

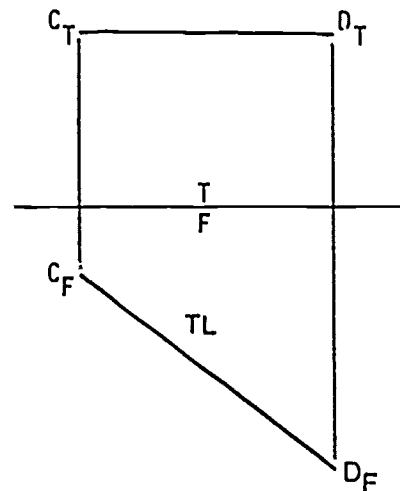

The true length of a line segment may be seen on a plane that is parallel to the line segment. Study the examples below, and refer to Chapter 8 in the text. T = Top; F = Front.

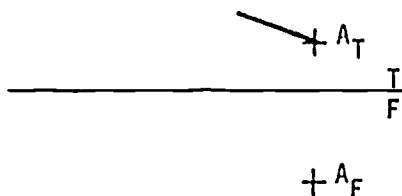

Line AB is parallel to the T-plane.

Line CD is parallel to the F-plane.

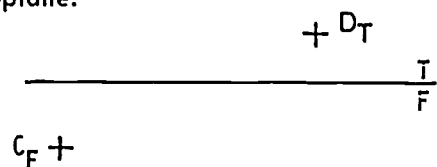

1. Line AB is parallel to the T-plane and is 40 mm long. Complete the two views of the line.

Title: TL of Line Segment

2. Line CD is parallel to the F-plane and is 50 mm long. Complete the two views of the line. Point D is below the T-plane.

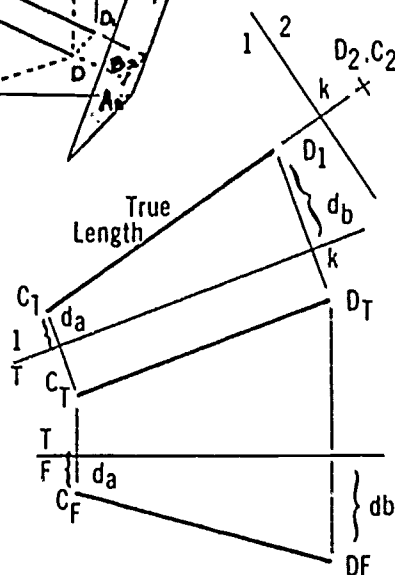

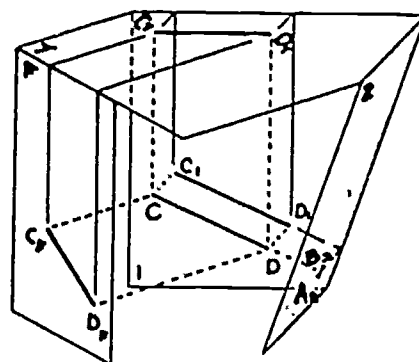

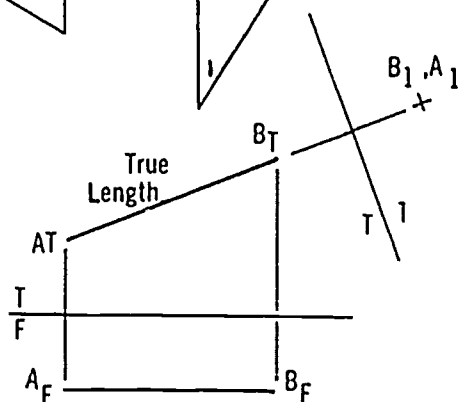

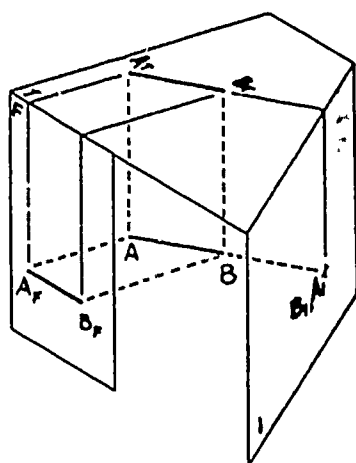

This drawing is from the following source and is used by permission.  
Levens, A. S. and Cooper, S. J. Problems in Mechanical Drawing. 5th ed. New York: McGraw-Hill Book Company, 1930.

The point view of a line is shown on a plane that is perpendicular to the line. Study the examples below.

Determine the point view of pipe m. Also, show pipe n in all views. In the appropriate view, label the perpendicular distance "d" between the pipes.

This drawing is from the following source and is used by permission.  
Levens, A. S. and Cooper, S. J. Problems in Mechanical Drawing, 5th ed. New York: McGraw-Hill Book Company, 1980.

ACROSS CLUES

2. TO DRAW ONE FIGURE WITHIN ANOTHER
4. LINES COMING TOGETHER AT A POINT
8. THE PERIMETER OF A CIRCLE
10. PORTION OF A CIRCLE
11. WHEN AT 45 DEGREES, IS CALLED A MITER
13. CLOSED CURVE IN THE FORM OF A SYMMETRICAL
19. AT RIGHT ANGLES TO THE HORIZONTAL PLANE
20. A FIVE-SIDED FIGURE
21. A THIN, FLAT PART JOINING LARGER PARTS
22. NOT HAVING A COMMON CENTER
23. THE OUTLINE OF A CIRCLE
24. TO SHOW LINES SHORTER THAN THEIR TRUE LENGTHS

DOWN CLUES

1. FRONT VIEW OF A HOUSE
3. HAVING A COMMON CENTER
5. TO EXTEND FROM
6. A THREE-SIDED FIGURE
7. A SIX-SIDED FIGURE
8. A CLOSED CURVE
12. A LINE AT A RIGHT ANGLE TO ANOTHER LINE
14. A FOUR-SIDED FIGURE HAVING ALL SIDES EQUAL AND 90 DEGREE ANGLES
15. CENTRAL LINE OF A DRAWING
16. DRAW WITHOUT AID OF DRAFTING INSTRUMENTS
17. AN EIGHT-SIDED FIGURE
18. PART OF A LINE

ANSWERS: DRAFTING PUZZLE
