ABSTRACT

This courseware evaluation rates the "Pregnancy and You" program, developed by Intellectual Software and sold by Career Aids, Inc. The courseware was rated by a team of home economists participating in a network designed to identify and evaluate courseware and disseminate reviews for vocational and technical teachers, media staff, and administrators. Part A describes "Pregnancy and You" in terms of subject area (pregnancy, maternal, child health), and hardware requirements (Apple II, IBM PC, or Macintosh), and indicates its suitability for use as a tutorial for ninth-grade through adult levels. Listed next are appropriate instructional grouping (individual and small groups) and time estimate (45 minutes). Availability information includes cost (\$44.95), policies, and contact address. Part B contains the Courseware evaluation criteria in eight categories; reviewer ratings appear as yes, somewhat, no, or not applicable, with explanatory comments. Part C summarizes the evaluation. The strengths of this program are that it individualizes technical information, is accurate and easy to use, and requires little supervision. Weaknesses include intensive reading, little audiovisual variety, lack of stimulation, and failure to review or give additional information. A summary section indicates that this courseware received the following overall ratings in the eight categories: subject matter has educational value--yes; technical presentation, student interaction, program interaction, student evaluation, and documentation are all adequate -- somewhat; and work behaviors and application programs -- not applicable. The final rating recommends this courseware with reservations, suggesting its use with self-motivated students. (SK)

The evaluation of this courseware program was conducted by a team participating in the Courseware Evaluation Network. The Network, established in 1985, is coordinated by the National Center for Research in Vocational Education under the sponsorship of the U.S. Department of Education, Office of Vocational and Adult Education. The purpose of the Network is to identify, evaluate, and disseminate courseware reviews for vocational and technical education.

Each Network team includes three members, at least one of which is, or recently has been, a vocational or technical teacher in the subject matter area of the courseware being evaluated. The evaluation represents a synthesis of the opinions of the team members. It is suggested that the evaluation be used as a first screening device for courseware and that the teacher also evaluate the courseware program on the basis of specific student needs.

The Courseware Evaluation Form and Guide used for all of the Network evaluations was developed by the National Center and is available through its cost-recovery system.

Part B: Courseware Evaluation Criteria

Indicate the applicability of each section to the courseware being evaluated by checking either "___ A" (applicable) or "___ N/A" (not applicable). If a section is not applicable, proceed to the next section. If a section is applicable, check the column that indicates how well the courseware meets each criterion. Include any comments.

Part C: Courseware Evaluation Summary

1. SUMMARY COMMENTS

Identify strengths of the courseware:

Individualizes technical information (special populations - pregnant teens).

Accurate information provided efficiently.

Easy to use.

Little supervision required.

identify weaknesses of the courseware:

Intensive reading.

Little visual or auditory variety

Lacks stimulations

Doesn't review information or give additional information for those who don't understand

Describe uses of the courseware in an instructional setting:

Individualization of course information

Small group.

2. SUMMARY OF SECTION

Rate the quality of the courseware for each applicable section of this form by checking the appropriate column; if not applicable, check N/A.
