ABSTRACT

The goals of the Arkansas Capacity Building Dissemination Project (Project AID--Arkansas Information Dissemination) were to (1) increase the use of information for decision-making in Arkansas, (2) increase implementation of beneficial programs and practices in Arkansas schools, (3) develop a strong dissemination and communication staff at the Arkansas Department of Education (ADE), and (4) coordinate and strengthen all ADE dissemination efforts. This final project report addresses each of these goals and gives an outline of project activities and accomplishments. After a brief introduction, the three major components and activities of the project are described: building resources, building linkages, and building coordination and leadership. A detailed comparison of ADE dissemination resources before 1980 and at the conclusion of Project AID is also included. The subsequent discussion covers institutionalization of Project AID, its approach to equity issues, its effect thus far, client responsiveness and satisfaction, significant learnings about dissemination, and the establishment of collaborative relationships. Extensive appendices include a variety of related brochures, information sheets, statistics, financial reports, an annotated bibliography on parental involvement, and an end of year report for 1984-85. ## ABSTRACT

The goals of the Arkansas Capacity Building Dissemination Project were to 1) increase utilization of information for decision making in Arkansas, 2) increase implementation of beneficial programs and practices in Arkansas schools, 3) develop a strong dissemination and communication staff at the Arkansas Department of Education (ADE) and 4) coordinate and strengthen all ADE dissemination efforts. The following final project report addresses each of these goals and gives an outline of project activities and accomplishments.

The Arkansas project (Project AID - Arkansas Information Dissemination) is part of the Communication and Dissemination (C & D) section of the ADE, a new section that was formed in 1979 to address concerns about improving decision-making processes in local schools. The work of the section is based on a model for school renewal that includes commitment to change at the local school level, a strong resource base at the ADE and a system of linkers that facilitate improvement at the local level.

The activities of Project AID in the last five years have been planned to work toward project goals and to ensure institutionalization of information services established and refined by the C & D section.

## INTRODUCTION

In 1979 the Arkansas Department of Education General Education Division Director established the Communication and Dissemination (C & D) section, which included the Arkansas Capacity Building Dissemination Project, the National Diffusion Network's State Facilitator's office and the ADE communication office. As a result of the special legislative session of the 1983 Arkansas General Assembly, three programs were added to the section - the APPLE program (Arkansas Parents - Partners in Learning Experiences), the State Recognition Program and educational planning. The C & D section is headed by a cabinet level associate director.

Generally, the responsibilities of the section include producing and/or editing all ADE publications and media productions; managing and operating an electronic communication system involving the ADE and local schools; providing computer and manual searches of education information to local school and ADE professionals; building and maintaining an education resource base (the ADE Information Center), managing the National Diffusion Network's state facilitator office; providing technical assistance and guidance to all school district administrators in formulating plans for school improvement within each district; establishing and managing the APPLE program, which involves teaching parents

how to help their children in school; and coordinating and managing the State Recognition Program.

Management of the C & D section is based on a three circle concept that involves a strong resource base and the linking of that base to those in schools and the ADE who are planning for educational change and renewal. The model outlined below depicts the process for school improvement called educational renewal or ERMA (Educational Renewal Model for Arkansas).

The philosophy behind this model calls for information utilization based on specific needs, as determined by district personnel, commitment from the districts and a strong base for providing resources and alternatives from which choices can be made. The other component, linkage, provides technical assistance to districts in assessing their needs, setting goals and making choices that will help them achieve these goals.

Organization of the C & D section in 1979 and funding of the Arkansas Capacity Building Dissemination Project have provided for the development of a large component of the resource base in the renewal model and have allowed for coordination of many communication efforts within the ADE to the local schools and general public.

### Major Components and Activities

Major activities of Project AID can be described as both on-going activities and special projects and all of the project's activities can be classified in the three major areas of organization established by the National Institute of Education for capacity building dissemination projects - building resources, building linkages and building coordination and leadership.

### Building Resources

Prior to the establishment of the Arkansas Capacity Building Dissemination Project and the ADE Communication & Dissemination Section, professionals in the ADE did not have a central collection of education resources or information services for their use. To obtain information on educational issues, ADE staff members relied upon small, scattered collections of information that were incomplete and hard to access. Technical assistance in developing resources and publications was virtually unavailable within the ADE.

Professionals in local school districts were having even more trouble finding resources and technical assistance. Approximately three-fourths of the children in Arkansas attend districts with enrollments of less than 5,000 students and more than half of Arkansas' districts have less than 500 students. Many of the students are from culturally deprived areas and their school districts, suffer from a lack of options for school improvement and because of isolation from resources that could aid in better decision making.

A major activity of Project AID was to address the problem of uncoordinated resources and technical skills within the ADE and the lack of access to these resources by local school professionals. Project staff are continuously involved in building a resource base that addresses the information needs of ADE and local school professionals. Prior to 1979 and Project AID, there was no professional library or research center in the ADE. Professionals in the Department maintained their own collections with little knowledge of resources that others had available.

The Department now has an Information Center that not only has access to computerized data bases such as ERIC (Educational Resources Information Center, ECER (Exceptional Child Educational Resources) and SPIF (School Practices Information File), but also accesses on a daily basis the education networks of the National School Public Relations Association and the Council of Chief State School Officers.

Identification of new data bases continues with the active involvement of Project AID staff in the Arkansas Committee on Networking, the Arkansas Information/Referral System Task Force and the Arkansas Library Association.

The Information Center collection has grown from no resources to include approximately 1,000 titles, subscriptions to approximately 50 professional journals, the ERIC microfiche collection and a large collection of curriculum guides from schools across the nation.

Through a cooperative agreement established with the Arkansas State Library in 1980, ADE professionals also have access to a large reference collection and the expertise of reference librarians. Project AID staff continue to do manual searching using the State Library's collection in order to supplement resources available through the Information Center.

The base of education resources available to ADE and local school professionals was also strengthened with the coordination of all statewide dissemination activities within the Department into the C & D section, including the communication office, the National Diffusion Network and Project AID.

In using the educational renewal model for providing information services to school professionals, it is vital that the resource base be responsive and useful and that it support a variety of information needs for school improvement. Building and maintaining this resource base has been

a major activity of project staff and is in part responsible for the success of using the renewal model in bringing about constructive change in Arkansas schools.

### Building Linkages

The linkage component of Arkansas' comprehensive dissemination program has been addressed in three ways - primary linkers, secondary linkers and CONNECT\*ED. Prior to the establishment of the new C & D section, the NDN State Facilitator Project had built a highly successful network of approximately 300 NDN adopters in Arkansas. Many of these, however, were selected simply because they were available with sometimes little match between need and program. Because of staff experiences with other dissemination efforts both in the NDN and ESEA Title IV-C, Department personnel recognized a gap between information and program needs and access to and expertise in using the information once it was obtained.

The goal for the linkage component of Project AID has been to establish and maintain a communication and technical assistance network between state department personnel and local school practitioners. To accomplish this, primary linkers (those within the ADE) and secondary linkers (those in local schools) were identified and oriented in using C & D section services and resources. The primary linker group consists of people in various sections of the ADE that work directly with schools in program improvement.

Secondary linkers are those information users in local schools that work with their peers in school improvement efforts and make certain that as broad a survey of information as possible is made in obtaining information and programs to meet their needs. A sample listing of primary and secondary linkers is included in the Appendix.

In planning all linker training sessions and Project AID awareness sessions, personnel in four school districts were consulted for input on specific information needs of educators and on how to address these needs. These four districts were involved in the design of ERMA (Education Renewal Model for Arkansas) and were aware of the types of roles an effective linker should play in working with school professionals.

Another major linkage activity of the C & D section has been the design and development of an electronic communication system linking local school districts and the ADE in information exchange. During 1982, the Department and 22 school districts experimented with a system that involved storing information about Arkansas education in a computer system in Virginia (The Source) and retrieval of this information by district personnel at their convenience. Knowledge gained during this experimental period included:

- 1) Rural, isolated districts had to pay more for access to the system because of long distance phone charges.

2) Training in how to use the system is very important and should be streamlined and include onsite visits.

3) The average hourly cost per district for use of the system was approximately \$40.

From the beginning of this project, participants believed in the value of an electronic information system because of advances in technology, the amount of information that must be dealt with and the lack of speed and efficiency with which information was being received through conventional methods. One concern was also the cost of a system that relies on an information service located outside the state and, for many districts, long distance phone charges.

Based on experience with the pilot system and concerns of the participants, a state-based system has been developed. Through an in-WATS line, local school district personnel can retrieve information that has been entered and stored in the ADE computer. The only cost to a district, if it already has a computer, is for a telephone modem and communication software. The ADE C & D section is responsible for collecting and entering the data and for providing technical assistance to schools joining the system.

CONNECT\*ED provides daily updates on information for Arkansas educators. This has been especially important since the beginning of statewide school improvement efforts in 1983 which include new educational standards that must be

met by each school district by 1987. CONNECT\*ED is also an electronic linker of the ADE and school districts that improves dissemination capacity tremendously and gives each district access to the same information as any other district. Plans are for the system to include all 361 Arkansas school districts and to provide electronic mail, bulletin boards and data transfer capabilities. Until all districts are part of the CONNECT\*ED system, a paper version will be mailed to all Arkansas school district bi-weekly.

### Building Coordination and Leadership

Activities to build coordination and leadership have been varied in perspective and participants. Major activities of the project in building coordination and leadership include 1) coordinating dissemination activities of the ADE, 2) providing technical assistance and resources to school administrators in planning for school improvement, 3) working with Arkansas' new educational cooperatives in program and resources planning and 4) providing in-depth linker and information services to several of the lowest achieving school districts in Arkansas.

Coordinating dissemination activities of the ADE was one of the major reasons the ADE Director created the C & D section. This action was important in helping ADE staff realize that coordination of dissemination activities was a major goal of the director and thus of Project AID. This goal has been addressed in several ways. In 1981, project

staff and members of the Department's Dissemination Council directed a pilot study to determine what types of information ADE professionals needed to have available in computerized school district files that would help them when working with districts in school improvement. Three districts were randomly selected and were used as a mechanism for bringing together ADE professionals that provided services to these districts. Sessions were held on each district and participants were asked to share information on specific activities for program improvement they were involved in within that district as well as what each person felt he/she needed to know about activities others are involved with in order to be more effective. The Dissemination Council committee categorized and synthesized the collected information and reported the results to ADE associate directors. As a result of this study, a project involving a local school district and the ADE was funded through Title IV-C that addressed the management of information going from the ADE to the districts and from the district to the ADE. This study was also the basis for the development of CONNECT\*ED, the electronic communication system that links the ADE and local schools.

Coordination of ADE dissemination activities was strengthened further because of the inclusion of all ADE sections in planning and designing CONNECT\*ED. Since all information to be included in CONNECT\*ED is reported to the communication office, it has been easier for the communication staff to provide broader coverage of ADE

programs and activities in other publications. With the expansion of CONNECT\*ED, further coordination of these types of activities will be possible.

The C & D section has also played a major role in building leadership skills in Arkansas educators. Act 7 of the 1983 Extraordinary Session mandates that all school districts will have on a file with the ADE by July 1, 1985 a six-year plan for school improvement. The requirements of Act 7 are based on the planning experiences of school districts that have used the ERMA model for school improvement. As described earlier, this model depends on commitment to change at the local level, an effective linker system and a strong resource base. The model also builds success into school improvement efforts by involving the school's community, staff and students in planning. Better communication among all involved in education is a side effect of educational renewal that has proven to be extremely beneficial.

C & D staff were responsible for developing guidelines and report forms for Act 7, providing the resource base necessary in making educational change and providing technical assistance to school district administrators in meeting the requirements of the act. In the fall of 1984, approximately 450 Arkansas educators attended 14 workshops on educational planning that were designed and presented by C & D staff. Approximately 450 packets of information on

setting goals and doing needs assessment surveys were mailed to local school administrators.

In an effort to help all Arkansas school districts meet the new education standards, legislation was passed in 1983 that created a pilot system of eight educational cooperatives. Project AID staff have been involved in planning and developing these co-ops and their services in a variety of ways. In the last year over 100 packets of information on various topics were provided to co-op staff through the ADE Information Center. Technical assistance in using computers in communication and information retrieval has also been provided, along with workshop and planning support. Most of the 14 planning workshops presented by the C & D section were offered to school administrators through cooperatives. The co-ops have been able to provide program support for their schools through NDN awareness and training sessions on specific programs. Plans are for all Arkansas districts to eventually participate in an educational cooperative, thus providing an avenue for expansion of C & D services to all schools.

The building of leadership skills and linkages was addressed in a special project, Dissemination and School Improvement, designed and carried out by Project AID staff in 1981. After the delivery of hundreds of packets of information to local school professionals and interviews with some of the recipients, AID staff became concerned about the utilization of information by school personnel

once it had been disseminated and about the effect access to a wide variety of information could have on school improvement. The consensus of the staff was that intensive activity with a few districts while continuing to process requests received at large would not only give the staff more experience with school improvement and linkage processes, but would also be more beneficial to those school districts and thus the students. The districts chosen to participate in the project had a variety of populations, goals and problems and were at various stages in goal setting and planning. Linkage activity in all the districts varied to meet the specific needs of the schools. Through this study, dissemination activities from the ADE were improved and streamlined to be more responsive and professionals in the districts were made aware of resources available to help them in program improvement efforts.

### Institutionalization of Project AID

The acceptance and value of services and expertise provided through Project AID is evidenced by the inclusion of funding for staff and maintenance and operation of the Information Center in the budget for the next biennium. This budget was approved by the State Board of Education and presented to the Arkansas Legislature in January 1984.

C & D section services have also been supported through Chapter 2, the National Diffusion Network and state funds since 1979. With the addition of three new programs (APPLE, State Recognition and Educational Planning), monetary support for the section has been broadened and made more stable. Chapter 2 funds are currently being used by Information Center staff in working with the educational cooperatives in their development.

All functions of Project AID will continue after support from the National Institute of Education ends.

### Project AID's Approach to Equity Issues

Project AID has been sensitive to the problems of inequality in the schools for many types of children and adults. Based as it is in a Southern state with a 23 percent minority population and with many districts where black children are in the majority, project staff have tried to develop resources which will help improve programs and practices for those children.

The first step in addressing the issue of educational equity was to develop a specialized resource base of information on equity topics. Information Center staff maintain a special file of information on "Women and Minorities in Education" and use this file along with ERIC and other data bases to prepare packets of materials on equity issues that have been specifically requested by educators. Over the last five years, approximately 100 packets have been prepared for Arkansas educators on such topics as sex equity, women in education, migrant education, bilingual education, desegregation and magnet schools.

A major activity in addressing the concern of educational equity for minority students was the special project described in the "Building Coordination and Leadership" section of this report. Some of the school districts involved in the Dissemination for School Improvement project have a majority of black students and had the lowest scores on the statewide assessment. (A breakdown of information on these schools is included in the appendix.) After intense linkage activity with educators in the project schools, information requested by these educators focused on basic skills achievement and improving the self-concept of students. Perhaps most beneficial to the students, though, was the realization by teachers and administrators participating in the project that there was a wealth of information available to them from the ADE and other sources to aid in their school improvement efforts.

The first step in addressing the issue of educational equity was to develop a specialized resource base of information on equity topics. Information Center staff maintain a special file of information on "Women and Minorities in Education" and use this file along with ERIC and other data bases to prepare packets of materials on equity issues that have been specifically requested by educators. Over the last five years, approximately 100 packets have been prepared for Arkansas educators on such topics as sex equity, women in education, migrant education, bilingual education, desegregation and magnet schools.

A major activity in addressing the concern of educational equity for minority students was the special project described in the "Building Coordination and Leadership" section of this report. Some of the school districts involved in the Dissemination for School Improvement project have a majority of black students and had the lowest scores on the statewide assessment. (A breakdown of information on these schools is included in the appendix.) After intense linkage activity with educators in the project schools, information requested by these educators focused on basic skills achievement and improving the self-concept of students. Perhaps most beneficial to the students, though, was the realization by teachers and administrators participating in the project that there was a wealth of information available to them from the ADE and other sources to aid in their school improvement efforts.

As a result of this project, other ADE sections have focused on the special needs of schools with large minority populations in Arkansas.

Project AID staff have also been active in the Association of Women Education Supervisors (AWES). AWES is an organization made up of supervisors in the ADE that meets monthly to discuss equity issues for women and minorities in schools and other organizations. AWES provides support, both emotional and monetary, to women who are aspiring to be educational administrators. AWES and the ADE annually sponsor the Women's Leadership Forum. The purpose of the Forum is to bring together women across the state who are isolated from others who have the same goals. In 1984, Project AID staff was responsible for planning, organizing and promoting the Forum and staff members have also served as officers for AWES.

#### Impact of Project AID

The impact of Project AID can best be described by relating the numbers of requests for information and assistance received over the last five years. Educators at the local school level, at colleges and universities and the ADE have requested an average of over 775 information packets annually. The impact of the project can also be seen in the fact that school districts in 75 percent of the state's counties have made specific requests for information. Adoptions of NDN programs have greatly increased in

the last five years because of the effectiveness of the C & D section in matching needs to programs. The APPLE (Arkansas Parents - Partners in Learning Experiences) program, which had as a goal for 1984 the training of 100 leaders for local APPLE programs, has already trained over 300 leaders. Workshops and awareness presentations on C & D section services have been given to approximately 4000 Arkansas educators since 1980.

The ADE C & D section has also played a major support role in the school reform movement in Arkansas. The Quality Education Act of 1983 established the Education Standards Committee to draft recommended standards for Arkansas schools for adoption by the Arkansas General Assembly. Research results, on which the recommended standards were based, were provided to Standards Committee members by the Information Center. Support was also provided through the communication office for writing, editing and publishing of the new standards.

The recommended standards were approved by the State Board of Education and mandated by the General Assembly during a special legislative session in the fall of 1983. Each school district in Arkansas must meet these recommended standards by 1987 or be merged with the closest district that does meet the standards. Because of the challenge to districts in meeting the new standards and the necessity for using information in making successful change, the services of the C & D section have been used more in 1984 than ever

before. The Information Center alone received over 1,000 specific requests for information in 1984.

The impact of Act 7 on the way school districts in Arkansas operate has also increased the demand for C & D services, as local school administrators begin planning for school renewal. Guidance, technical assistance and support in making drastic changes in local schools has been necessary. Since the C & D section has operated in the linker and resource base roles of the educational renewal model since it was created, section staff members have easily transferred this process to helping local schools.

#### Client Responsiveness and Satisfaction

Because of local school experiences with dissemination efforts of the National Diffusion Network and ESEA Title IV-C and because of the isolation of local school personnel from information resources and services, local educators have been quick to respond to and accept the information services offered by Project AID. In 1980, the staff of Project AID conducted awareness activities for more than 3,000 educators, including those secondary linkers that attended ten regional training workshops. To date, school district personnel in over 75 percent of the state's counties have been served through the Information Center. All 361 districts receive ADE publications produced by the C & D communication office and leaders in over 100 school

districts have been trained for participation in the APPLE program.

A good example of the coordination and effectiveness of C & D services is the response to an article in a recent issue of CONNECT\*ED, which is published by the communication office. Included in the issue was a short paragraph about the availability from the Information Center of a packet of information on passing millage increases in school elections. Over 200 Arkansas school districts must pass millage increases in March 1985 in order to meet the new education standards. The day after the CONNECT\*ED issue was mailed, the Information Center received almost 50 requests for the packet. A total of 106 millage increase packets were mailed to school districts and educational co-ops based on this article.

A indication of client satisfaction with C & D services can be gotten from the return of search evaluation forms that are included in each information packet produced by the Information Center. Over 90 percent of the evaluations that are returned have the packets rated as very or generally relevant and very useful. A copy of the packet evaluation form is included in the Appendix.

#### Significant Learnings About Dissemination

Because of the newness of a comprehensive dissemination section in the ADE and experiences in the educational renewal process, various methods of dissemination have been

used by the C & D section. Several special projects were designed and carried out by the C & D section in order to learn more about effective dissemination. Three of these projects have been the computerized school district data base study done in 1981, the Dissemination and School Improvement project involving seven of the lowest achieving districts in the state and CONNECT\*ED, the experiment in electronic communication.

Significant learnings about dissemination and knowledge utilization include the following:

- 1) The more specific the disseminated information is to the needs of the requestor, the more this information will be used in decision making.
- 2) It is important to be pro-active in some dissemination efforts, so that information needs can be anticipated and preparations made to meet these needs.
- 3) For institutionalization of information services to be effective, project staff need to have high visibility within the organization.
- 4) Identification of the capacity-building program as a project made users of dissemination services think of the program as "temporary" and made institutionalization harder.
- 5) Access to new data bases and other resources enabled project staff to be more responsive to

educators' needs. It is important to stay informed about and trained in the use of new resources and technology.

### Collaborative Relationships

From the beginning of Project AID, collaborative relationships have been sought and have been necessary to the effectiveness of C & D services. In 1980, technical assistance in dissemination techniques and resource building was received from the staffs of the Southwest Educational Development Laboratory (SEDL) and Project CITE in Austin, Texas. The project has also cooperated with SEDL on numerous activities, including coordinating The Resource Learning Conference in Arkansas. The project director serves on the SEDL Regional Exchange Board.

The Arkansas State Library (ASL) has been a valuable ally and has been supportive in providing shared resources and the expertise of reference librarians. Manual searches of the ASL collection that complement searches done in the ADE Information Center continue to be done. Project AID and ASL staff have also worked together on committees such as the ASL Government Documents Advisory Council, the ADE Statewide Dissemination Advisory Committee and the Arkansas Committee on Networking.

Cooperative relationships have been established with the University of Arkansas at Little Rock, the University of Central Arkansas, the Arkansas Information and Referral Task Force and the Council of Chief State School Officers that

involve sharing resources and experiences. Collaborative efforts in dissemination, awareness and knowledge utilization training with the National Diffusion Network State Facilitator's office have been natural because of the organization of the C & D section, which includes both the NDN State Facilitator's office and Project AID. Many of the activities described in this report have been co-operative efforts between these two offices.

# ERMA a process for making schools better

## ERMA

stands for Educational Renewal Model for Arkansas, a practical, workable method for improving school districts. Through ERMA positive change happens from within a school district — according to its own goals, needs and priorities.

## ERMA

helps a school district answer the following questions:

- Where do we want to be?
- Where are we now?
- How can we get to where we want to be?
- How will we know when we have arrived?

how **ERMA** does it

## ERMA

works through people to accomplish school improvement. First, ERMA helps local district people build a commitment to make things better in schools. Then it helps them organize for change. And last, it links them with the resources they need to improve.

It is a sound formula for bringing about school improvement. And three pilot school districts, Sheridan, Kingston and Wynne, have proved that it works. People are willing to work for improvement that they have had a part in planning, and in ERMA everyone, teachers, students, parents, administrators, is involved.

## ERMA

made in Arkansas

## ERMA

was designed in Arkansas schools by Arkansas educators. It is a way to bring about school improvement with local district focus. It is especially effective in small schools where there is sometimes little time or personnel for such effort.

The Arkansas Department of Education asked three pilot districts to decide what was needed to make the state goals work in their districts. There was no mandate, just small grants to support the process and the offer of help from the outside when needed. The job of pilot districts was to design a renewal system which would work in local districts, which took into account their assets and their limitations, their makeup and their size.

## ERMA

was the result. It works on the principle that the people in schools have the capacity to make them better if they are willing to identify and own the problems and to work together toward solutions. Simple? No. It involves much planning together and hard work but it is possible where people care about the kind of education their children get.

the **ERMA** linkers

## ERMA

calls for getting help when a school district decides it needs help. This way, the help, whether in the form of a consultant, information or a new program, takes hold and makes change possible because it addresses real needs.

One person in the school district,

who coordinates the project usually on a part-time basis, is the **internal linker**. Working with the school district from the outside is an **external linker** who helps connect the school district with all the outside resources needed to support the process of improvement.

where linkers get help for **ERMA**

The Arkansas Department of Education, in response to the needs identified by the renewal school districts, is building a resource base of support for them. It includes:

- Human Resources
- Educational information and research
- Staff development
- Successful programs

This base has meaning only if it is

able to meet the needs identified by local school districts. It is constantly expanding to cover those needs.

No one has all the answers in education and no one has to have. Children are too diverse and education is too complex for that. But local districts do need access to answers. Building a resource base that will contain those answers is the role which the Department of Education plays in ERMA.

do-it-yourself change

## **ERMA**

is a cycle of educational change which becomes self-sustaining because local people work to make it that way. Through ERMA, local districts have access to the best information available on school improvement. They learn from others' mistakes and successes. And they develop an increased awareness of what people can do to solve their own educational problems.

**A user's manual and resource guides are available for ERMA from the Arkansas Department of Education.**

## APPLE

**Arkansas Parents:  
Partners in  
Learning Experiences**

Parents are important people because they lay the foundation for all their children's learning experiences.

Parents sometimes worry about the role they play in their children's success in school. They want to know the questions to ask the teacher. They want to know how to help at home. And there's always too little time.

Now there's an opportunity to close some of these gaps between a child's school day and a parent's desire to help out — **REALLY HELP** — at home.

It's called **APPLE**. It's for parents who want to help their children achieve. **APPLE** stands for Arkansas Parents: Partners in Learning Experiences. **APPLE** offers down-to-earth, basic tools parents can use to improve communication with their child's teacher and to help their child in school. It is available statewide in local schools from the Arkansas Department of Education.

**APPLE** includes:

- A television special each fall in September about parents helping their children which will be aired on the Arkansas Educational Television Network (AETN), Channels 2, 6, 9, 13 and 19 in September to kick off the annual activities.

- Monthly programs on those AETN channels where parents will be given useful, meaningful ideas and training in specific skills such as:

- how to talk to their children,
- how to improve study habits,
- how to assist with math and reading,
- how to know what kinds of expectations for achievement are realistic during childhood developmental stages and
- how working parents can use their time effectively when they help with their children.

- Meetings in your community school where people trained in this area will further help parents close the gap between school and home.

- Training guides, brochures and other literature to supplement the television and school meeting training.

For details, contact your local school or **APPLE** at the Arkansas Department of Education, State Education Buildings, Room 103A, Little Rock, AR 72201, or telephone Marlene Parker, 371-2181.

This is what **APPLE** is all about.  
It is a way to get to the core of education.

Join. Help your child.

Partners in Learning Experiences

Appendix D

Information on State Recognition Program

The STATE RECOGNITION PROGRAM is divided into four components: the School Recognition Program, the Teacher Recognition Program, the Student Recognition Program and the Governor's Academic Competition. A summary description of each component is as follows:

#### SCHOOL RECOGNITION PROGRAM

**PURPOSE:** To identify five exemplary programs currently in operation which show evidence of stimulating a significant increase in the level of student performance in one or more content areas

#### SELECTION CRITERIA:

1. The district must have specific objectives for the identified groups of students.
2. The district must have clearly identified methods and programs which have been used to meet the learner objectives.
3. The district must have credible evaluation data, including student test scores, which show improvement over the two years immediately preceding the application.
4. The district's program must be capable of being replicated at another site.

**FUNDING AVAILABLE:** Five grants of up to \$10,000 each

#### TEACHER RECOGNITION PROGRAM

**PURPOSE:** To encourage greater effort on the part of individual teachers and to make possible the sharing of their exemplary practices with other teachers

#### SELECTION CRITERIA:

1. The practice to be used must be a new and creative effort to increase student performance in a specific content area.
2. The practice must have implications for use beyond the classroom in which it is developed.
3. The practice must be matched to the identified needs of the students.
4. The practice must be different from those already available and in use, although it may involve a new combination of these.

**FUNDING AVAILABLE:** Grants of any amount up to \$1,000

## STUDENT RECOGNITION PROGRAM

**PURPOSE:** To encourage local districts to develop and disseminate programs which give recognition to students who achieve high academic excellence in the same way recognition is now given to high achievement in athletics

### SELECTION CRITERIA:

1. The recognition program should be designed to recognize high academic achievements on the part of the students in as many areas of the following as possible: English, Mathematics, Science, Social Science, Foreign Languages and Computer Science.
2. The selection process should involve students, teachers, administrative personnel or any combination of these.
3. The students should be recognized publicly by way of a school assembly, a districtwide publication, recognition at a school board meeting or another appropriate method.

**FUNDING AVAILABLE:** Grants of \$2,000 for dissemination of program

**PURPOSE:** To identify in each school district those students who make the largest academic gains in a given school year and designate these students as master learners

**SELECTION CRITERIA:** Nominations by school districts with supporting evidence of academic gains made by the student(s) will be submitted to the State Recognition Panel.

**RECOGNITION:** Five Master Learner State Award winners will be presented with plaques from the State Recognition Program.

## GOVERNOR'S ACADEMIC COMPETITION

The State Recognition Panel will set criteria for an annual competition with awards and prizes in such critical areas as Math, Science and Social Studies. The competition will involve both regional and statewide examinations and contests with schools being encouraged to prepare students for excelling in these events.

Note: We were unable to hold our own academic competition this year. Instead, we honored 135 student winners of various educational competitions held in the state. The State Recognition Banquet was held at the Little Rock Excelsior in May. The students were able to invite three guests to attend with them. The guests could be any combination of the following: parent(s), teachers, school principal or school superintendent.

CONNECT\*ED Brochure

**CONNECT\*ED**

When You  
Absolutely,  
Positively  
Have To Know  
NOW

Would these reasons make electronic networking interesting to you?

- \*Your desk is a mountain of paper and somewhere within is a document you need NOW.
- \*Your district needs information today on action the state legislature's education committee took on a bill.
- \*Your publication isn't due again for another three weeks but people in your organization have information they must pass on to their audiences NOW for it to be useful.
- \*You want to learn what action was taken by Congress on an important appropriations bill that will affect your district's share of federal grant aid.
- \*Your district needs access to current information on curriculum trends, classroom management or communications tips.
- \*There is an EASY-TO-USE system available to solve your communication needs NOW.

Reasons like those cited and many others are what have led to the development of electronic information systems for communication. Education agencies at various levels across the country have developed these networks during the past 18 months.

The Arkansas Department of Education began last year a pilot project to explore the usefulness of a state network of electronic information called CONNECT<sup>ED</sup>. It links school districts to the Department, to each other and to thousands of others in the country via micro-computers, telephones and a data base where information is stored for retrieval by users at their convenience.

#### RESULTS

CONNECT<sup>ED</sup> provides school administrators and teachers with access to important, current information which they can use on a selective basis, depending on their needs. It helps them to become good managers of the information flow. To date, indications of what the CONNECT<sup>ED</sup> network can mean for education communication in Arkansas include awareness of information management as it applies to everyone who has a need to communicate; better internal communication among all areas of the Department; better information flow within the Department and from the Department to school districts in the pilot; and training and awareness about uses of computers. The rising costs of printing and mailing the Department's publications, letters and memoranda also make it imperative that today's technology be put to use for communication with and among the schools.

#### WHAT'S INCLUDED IN CONNECT<sup>ED</sup>

What's included in CONNECT<sup>ED</sup>? First, there is ONLINE ARKANSAS, the ADE's online newsletter. Selections in ONLINE ARKANSAS can be made from: 1) a calendar listing education events and meetings, 2) articles on current education news and issues in Arkansas, 3) tracking of education legislation during the Arkansas General Assembly, 4) a reference file called FYI and 5) an electronic survey. Second, Education USA Newsline and Information Network provides twice daily executive news summaries and timely access to national education information. Third, THE SOURCE provides access to the education network and also includes more than 1,000 national data bases and electronic mail capability. Each district participating in CONNECT<sup>ED</sup> can have access to any of these data bases. Charges are made based on the amount of time each district is connected to THE SOURCE computer. Some districts must also pay long distance telephone charges to hook into a computer party line.

The first transmission of ONLINE ARKANSAS took place on January 25, 1983. Twice weekly updates are made of State Roundup, the news section of ONLINE ARKANSAS. Other sections are updated when new information is available.

Coordinators were chosen in each school district for training and data collection on costs and usage. Accessing the Arkansas system involves dialing a telephone number, entering some commands and then choosing what information is to be read from a menu of options. Hard copy of this information can also be obtained by hooking a printer to the system.

### PARTICIPANTS

Participants in the pilot represent a range of district sizes from the largest in the state to some of the smallest.

Participants are Alma, Ashdown, Bald Knob, Brookland, Cabot, El Dorado, Fort Smith, Helena-West Helena, Jonesboro, Marshall, Monticello, Newark, Pine Bluff, Oak, Plainview-Rover, Pulaski County, Stuttgart, Thornton, Sheridan and Westside. The Arkansas Association of Educational Administrators and the University of Arkansas at Little Rock College of Education also are members.

### WHAT EQUIPMENT IS NEEDED

To link to an electronic information system, equipment needed is a terminal or a computer with a modem (a piece of equipment that makes the connection between the computer and the telephone lines and translates the electronic blips and beeps to a language that the receiving computer understands) and communication software.

### COST

CONNECTED services are available to Arkansas educators through THE SOURCE and the National School Public Relations Association. Sign-up costs include:

SOURCE (one-time fee)	\$ 90.00
Education USA Newslines and Information Network (yearly fee)	100.00
ONLINE ARKANSAS	No Cost

### ONLINE COSTS

Computer time for the minutes you are tapped into CONNECTED costs \$20.75 an hour. You pay only for the minutes you use, and are billed directly by THE SOURCE, the transmission system upon which CONNECTED is built.

### FOR MORE INFORMATION

CONNECTED demonstrations will be provided on request. Contact Dianne Woodruff or Dianne Williams at the Arkansas Department of Education, State Education Buildings, Room 102A, Little Rock, AR 72201, or telephone (501) 371-1563 or 371-5037.

ADE Policy Statement on Communication and Dissemination

## POSITION STATEMENT ON COMMUNICATION AND DISSEMINATION

The Arkansas Department of Education, in administering the state responsibility for the public schools, shall maintain clear communication with all its publics and shall provide access to information, practices and programs which will promote school improvement.

The communication and dissemination functions of the Department will be to:

- (1) Keep the public informed about all educational developments in Arkansas in a manner that can be easily understood and interpreted.
- (2) Strengthen all lines of communication to and from the media, the general public, school personnel and the Department of Education staff.
- (3) Maintain an information retrieval and storage center to identify, collect and make available educational research and other information about programs and practices which merit dissemination.
- (4) Connect schools districts with exemplary programs developed elsewhere and help them implement those programs which they find meet local needs.
- (5) Assist school districts, upon request, to improve their communication systems and to develop techniques to use information, programs and other resources more efficiently.
- (6) Coordinate these activities through a section with primary responsibility for communication and dissemination.

Passed December 14, 1981 by  
Arkansas State Board of Education.

End of Year Report for February 15, 1984 through February 15, 1985

NIE Capacity Building Dissemination Project  
Arkansas Department of Education

End of Year Report for Fifth Project Year

Grant or Contract Number: NIE G-80-0023

Period : February 15, 1984 to February 15, 1985

Date of Submission: April 12, 1985

Name of Agency: Arkansas Department of Education

Title of Project: Arkansas Capacity Building Dissemination  
Project

Project Director: Dr. Sara Murphy

NIE Project Officer: Dr. Arch K. Steiner

## Abstract

The fifth year of Project AID, Arkansas Capacity Building Dissemination Project, was marked by services provided to a record number of educators in over 97% of Arkansas counties. In response to the new education standards established by the 1983 Special Legislative Session, staff members played a key role in providing access to resources and research as educators worked to implement new programs.

Increased awareness of the Information Center and of its services in this final grant year has been especially noticeable among new Arkansas Department of Education personnel. Improved use of resources, including staff time and search skills, has made the Information Center an effective tool for educational professionals around the state.

## NARRATIVE REPORT

Activities for the fifth and final year of Project AID (Arkansas Information Dissemination) were varied, mainly in response to new challenges faced by Arkansas educators. Many of these challenges came as a result of new educational standards mandated by the 1983 Special Legislative Session. With school professionals addressing the need to meet these new standards by 1987, information services and increased access to resources continued to be vital to the improvement of education in Arkansas.

The objectives and activities of the communication and dissemination (c and d) section this past year were designed to meet the growing information needs of local school professionals and to provide Arkansas Department of Education (ADE) professionals with support services to help them be better prepared when serving Arkansas school districts. Specifically, objectives for this year were 1) to increase awareness and use of section services by a wider constituency of the ADE and public schools, 2) to improve delivery of information products, 3) to manage better the quality, content and amounts of information dissemination from the ADE and 4) to expand and formalize the linkage system.

Activities which were implemented to meet these objectives included participation of all five offices of the Communication and Dissemination section: the information center; the state facilitator's office of the National Diffusion Network (NDN); the communication office; the teacher, student and school recognition program and the parent involvement program, Arkansas Parents: Partners in the Learning Experiences (APPLE).

Objective 1. To increase awareness and of section services by a wider constituency of the ADE and public schools.

The need for local school professionals to revise education programs to fit the mandated standards has increased the need for awareness of the information services already available to them through the ADE. During this grant year school district personnel in over 97% of the counties in the state have been served by Project AID, a 21% increase over the first project year. These services included workshops, awareness presentations and packets of information on specific topics.

A series of teleconferences sponsored by the NDN continue to play an important role in increasing awareness of the C and D section. The first, Technology in the Content Areas, was attended by approximately 70 educators at seven down link sites around the state (see attachment # 11). Project AID provided research information in helping develop APPLE, the new parent involvement program in the C and D section. Sessions to train parents as educators have reached over 1,500 parents across the state. A documentary and followup monthly television series on how to help your child achieve at school have been viewed by untold numbers of Arkansas parents and educators (see attachment # 8).

Objective 2. To improve delivery of information products.

With increased awareness of information services available from the ADE, the delivery of actual services and not just awareness of them have become more efficient. The Information Center has been involved in helping schools implement new programs mandated by the Special Legislative Session. Anticipation of a heavy demand for information on certain topics has prompted the preparation of pre-packaged packets covering elementary guidance, G/T programs and

homework policies. These, along with prepared packets of information on how to develop a district wide six year plan and how to pass a successful millage have enabled the Information Center to give "same day service" to over 400 requestors.

Another anticipated need for information was developing and including a parent involvement bibliography in the APPLE Training Manual (see attachment # 9). Several requests for documents from this bibliography have been received by the Information Center.

Improved delivery of information in the form of a statewide electronic communication system became operational in October 1984. At that time CONNECT\*ED became a statebased system using an in-WATS line and the ADE mainframe computer (see attachment # 10). Daily updates of information for Arkansas educators as well as current developments in the state legislature when it is in session have been accessed by approximately 40 school districts and educational cooperatives across the state.

Objective 3. To manage better the quality, content and amounts of information disseminated from the ADE.

Coordination of ADE Communication efforts have been especially important this year because of the increased need to communicate directly with schools about ways to revise educational programs and because of the necessity to keep the public aware of how tax dollars are being spent for education improvement. Improvement of communication through distance learning was the topic of a teleconference sponsored by the Southwest Educational Development Laboratory in April. The Information Center supervisor served as the ADE site coordinator with approximately 50 people attending the three day forum. The role and implications of distance learning were particularly helpful to Arkansas educators considering the rural and isolated areas of the state. Information provided by the various contributors was added to the ADE Information Center collection.

Improving electronic search skills has been an important step in enhancing the quality of information services. Three workshops on improving data base search skills were attended by the information center staff this past year. The ERIC Clearinghouse on Math, Science and

Environmental Education co-sponsored, with Project AID, a workshop on using the ERIC database. About 20 people from Arkansas and Louisiana attended the meeting. Two separate workshops updating and improving BRS search strategies were also attended by information center staff.

A Writing Style Guide developed by C and D staff in collaboration with other ADE personnel has improved the uniformity, correctness and content of ADE publications.

Objective 4. Expand and formalize the linkage system.

An effective voluntary linker system continues to function among educators in the school districts. Added to this is a growing network of professionals located in newly established educational cooperatives around the state. Professionals in the co-ops have requested and disseminated information from Project AID. They have also hosted workshops given by C and D staff and attended by teachers and administrators in the member school districts.

Increased awareness of C and D services among ADE professionals along with new personnel added to the ADE through mandates from the Special Legislative Session have provided the Information Center with an effective cadre of in-house linkers.

National Institute of Education

Regional Program

Annual Project Report on Estimated Impact of Project Activities

Name of Project Arkansas Capacity Building Dissemination Project

Project Director Dr. Sara Murphy

Date: April 12, 1985

INSTRUCTIONS

Column I: Please give your best estimate of the numbers of people in each category who have been direct users of your services in the past year (or three project quarters). A direct user, is identified as the person for whom the service was intended. For example, if a principal or school clerk calls with a request for information for a district administrator, the information would be put in the category of "district personnel."

Column II: Briefly describe the kinds of services that were provided to each group i.e., information packets, workshops, consultations for new programs, etc. Be as specific as your current record keeping will permit.

Please submit these forms to your project officer.

BEST COPY AVAILABLE

	Approximate Numbers of Direct Users	Kinds of Services Provided
Teachers	380	Packets of information were provided to requestors. The subject of each request was researched and the contents of each packet tailored to meet the specific needs of the requestors.
School Bldg. Administrators: Includes Principals & Administrators	912	Includes over <u>400</u> packets on needs assessment, goals and objectives as well as over <u>300</u> packets on successful techniques for passing a millage increase, <u>212</u> packets were researched on specific topics ranging from homework policies to salary scales for non-certified personnel.
District Personnel: Includes Curriculum Coordinators, Specialists & Supervisor	151	<u>126</u> packets of information provided on specific topics. Awareness presentation on Project AID to LEA staff-about <u>25</u> in attendance.
Intermediate Unit Personnel: Includes Teacher Centers & Co-ops.	61	With the establishment of five new educational co-ops this year, services to intermediate personnel have increased. Packets of information were prepared on specific topics ranging from establishing a G/T program to information on surrogate parents for handicapped children.
LEA Personnel -Chief & Admin. Staff -Other	308	<u>158</u> packets of information on specific topics were prepared for ADE professionals. Approximately <u>150</u> resource materials were circulated within the department along with notices of meetings and <u>Federal Register</u> information.
School Boards	-	
State Legislators	-	
Parents	3	Information packets were provided to <u>3</u> parents serving on advisory committee for school districts.
Students - Graduate Students & University Faculty	87	Computer printouts from ERIC and other databases were provided on a variety of topics concerned with educational research.
Others (Name) State Agencies Private Citizens, Private Agencies	49	Information packets were provided for professionals at the schools for the deaf, blind and correctional unit, as well as professional researchers.

## Relationship of NIE Priorities to Project Activities

NIE is interested in collecting information (anecdotal or quantitative) on the ways in which our funded projects have made a difference for educational practitioners and decision makers. Please describe below any project activities or accomplishments during the past year that relate to priorities outlined in NIE's authorizing legislation. If there are no activities within any priority category, please leave it blank. Otherwise, please describe the activity with a focus on "outcomes" or project contributions toward the priority.

- (A) improvement in student achievement in the basic educational skills, including reading and mathematics

Improvement in the teaching of basic skills continues to be a priority with the Arkansas Department of Education (ADE). During this final grant year Project AID staff worked toward this improvement by providing information packets and technical assistance on such topics as reading, mathematics, language arts and curriculum development. Of the 1,076 packets of information provided to Arkansas educators this year, over 100 were concerned with basic skills.

Project AID provided research information to ADE reading specialists implementing Act 44 of the 1983 Special Legislative Session (see attachment # 5). Information center resources were also used in writing the new course content guides for Arkansas public schools.

(B) overcoming problems of finance, productivity, and management in educational institutions;

In response to the need for educational planning established by Act 7 of the 1983 Special Legislative Session (see attachment # 6), Project AID prepared and disseminated over 400 packets of information on conducting district wide needs assessments and developing philosophies, goals and objectives. Along with communication and dissemination (c & d) staff, workshops on how to write a six year plan were held at several locations in the state.

Packets of information were prepared for superintendents concerned with millage increases needed to meet the new educational standards. Over 300 administrators attended workshops on how to conduct a successful millage campaign. Of the 240 districts asking for a millage increase, 176 passed -- a success rate of over 73%.

The annual School Administrators Workshop which is organized and directed by the c & d section was held on April 11-12, 1984. Workshop activities included sessions on management, finance and administration and communication.

Project AID has provided information and technical assistance to all of the educational co-ops established by Act 103 (see attachment # 7) of the Special Legislative Session.

(C) improving the ability of schools to meet their responsibilities to provide equal educational opportunities for students of limited English-speaking ability, women, and students who are socially, economically, or educationally disadvantaged;

Two-hundred and sixty-eight packets of information were provided to Arkansas educators this final grant year on such topics as special education, migrant education, rural schools, gifted education, women's issues and minorities. C & d staff women have participated in the Association of Women Educational Supervisors (AWES) with the goal of increasing opportunities for women in educational supervision.

(D) preparation of youths and adults for entering and progressing in careers;

Project AID staff members have worked with ADE Guidance, Career Education and Vocational Education personnel in providing requested resources. The Standards for Accreditation adopted by the State Board of Education in February 1984 require career orientation instruction as part of the seventh and eighth grade curriculum. Nine packets of information on career education were prepared for schools meeting this requirement.

- (E) overcoming the special problems of the nontraditional student, including the older student (with special consideration for students over the age 45) and part-time student, and the institution which the students attends:

One packet of information was prepared for a local high school in the process of establishing an adult education program.

- (F) encouraging the study of language and cultures and addressing both national and international education concerns; and

The new Standards for Accreditation require one unit of Global Studies as part of the high school curriculum. Project AID has prepared 31 packets of information on this and other social studies topics. Assistance was given to the ADE foreign language specialist in preparing curriculum materials to meet the new educational standards which require students to take two units of the same foreign language at the high school level.

- (G) improved dissemination of the results of, and knowledge gained from, educational research and development, including assistance to educational agencies and institutions in the application of such results and knowledge.

In carrying out this paragraph, the Institutions shall give attention to the needs of early adolescents and the schools which serve them.

A total of 1,076 packets of information were distributed to education professionals in Arkansas and some other states in this final year of Project AID. This figure is almost double the amount distributed the first year of the project.

Another step toward improving dissemination of information to Arkansas educators was the development of a statewide electronic communication system. By the end of this grant year, 40 school districts and co-ops were connected by telephone and modem to the ADE's mainframe computer (see attachment # 8).

ACT 44 OF 1983  
1ST EXTRAORDINARY SESSION

"AN ACT TO INCREASE THE READING ACHIEVEMENT OF STUDENTS IN ARKANSAS SCHOOLS BY PROVIDING INSERVICE TRAINING IN THE TECHNIQUES OF TEACHING READING TO ELEMENTARY TEACHERS AND PRINCIPALS; AND FOR OTHER PURPOSES."

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

SECTION 1. The Department of Education is hereby authorized and directed to develop and implement an inclusive statewide program to improve the reading skills of students in the public schools of this state. The program shall include inservice training program to assist elementary teachers who desire or are designated as requiring special assistance in improving their skills in teaching reading and to assist elementary principals in improving their skills in the supervision and support of reading programs.

SECTION 2. The intensive inservice training in the teaching of reading provided for in this Act shall be developed and implemented under the direction of reading specialists of the Department of Education and selected inservice teachers who have been identified as having been particularly successful in the teaching of reading. This training shall include, but not necessarily be limited to (1) classroom observation; (2) the use of student inventories for diagnosing reading problems; (3) planning instruction based on test results and classroom inventories; (4) reading activities to improve reading skills; (5) ideas for parent involvement in reading instruction; and (6) the effective use of the teacher's time in planning for instruction in reading.

SECTION 3. Records shall be kept of the activities authorized by this Act and studies shall be conducted to determine the impact of this program on the achievement test score of the students of teachers receiving such special inservice training. Participating schools shall be required to allow the use of their teachers and principals who have received training to assist in the training of other teachers and principals.

SECTION 4. Repealing clause.

EFFECTIVE: February 9, 1984

ACT 7 OF 1983  
1ST EXTRAORDINARY SESSION

"AN ACT TO PROVIDE FOR PLANNING FOR EDUCATIONAL IMPROVEMENT  
BY THE LOCAL SCHOOL DISTRICTS OF THE STATE OF ARKANSAS;  
AND FOR OTHER PURPOSES."

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

SECTION 1. The Title of this Act shall be "The Educational Planning Act of 1983."

SECTION 2. (a) Each school district in this State shall, by July 1, 1985, develop and file with the Department of Education a six-year plan for improving its educational programs. This plan shall be developed with both staff and community input, be compatible with statewide educational goals and reflect the specific needs of the local community, and be reviewed and updated every two years. The updated plan shall be filed with the Department of Education upon adoption.

(b) By October 1 of each school year, each school district shall report to its patrons on the district's progress toward realizing the goals and objectives set out in its long range plan and on proposals for correcting noted problem areas.

(c) In addition to the district-wide educational plan, each school within the district shall annually develop, with staff and community input, a plan for improving its educational programs.

(d) The State Department of Education shall adopt guidelines for the implementation of the Act and shall provide school districts with such assistance as may be needed to enable each district to meet the requirements of this Act.

ACT 103 OF 1983  
1ST EXTRAORDINARY SESSION

"AN ACT TO AUTHORIZE THE STATE BOARD OF EDUCATION TO ESTABLISH NOT TO EXCEED FIVE PILOT EDUCATIONAL COOPERATIVES AS DESCRIBED IN ACT 860 OF 1981, BETWEEN JANUARY 1, 1984 AND JUNE 30, 1985; TO PROVIDE THAT THE STATE BOARD OF EDUCATION SHALL APPOINT A COMMITTEE TO VISIT THE PILOT COOPERATIVES AND REPORT TO THE JOINT INTERIM COMMITTEE ON EDUCATION AND THE STATE BOARD OF EDUCATION; AND FOR OTHER PURPOSES."

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

SECTION 1. The State Board of Education is hereby authorized to establish not more than five (5) pilot educational Cooperatives between January 1, 1984 and June 30, 1985 to test their feasibility for replication in other parts of the State. Any such pilot operation must involve the school districts in at least three (3) counties and meet minimum enrollment and maximum travel distances to be established by the State Board of Education by January 1, 1984. All component school districts are eligible to participate in such pilot Cooperatives. No school district shall be required to participate.

SECTION 2. The State Board of Education shall appoint a study committee of not more than twelve (12) persons to visit the pilot Cooperatives, and report to the Joint Interim Committee on Education and the State Board of Education by December 1, 1984 upon the performance of the Cooperatives and advise for or against their spread to other areas of the State.

SECTION 3. The provisions of this Act shall be supplemental to the provisions of Act 860 of 1981.

SECTION 4. The provisions of this Act shall be in effect on and after December 1, 1983.

SECTION 5. Emergency clause.

# Parents, Don't Miss

## APPLE

Arkansas Parents: Partners in Learning Experiences (APPLE) will be introduced in a documentary, **WHERE THE HEART IS**, at 7 p.m. September 27 on channels 2, 6, 9, 13 and 19 of the Arkansas Educational Television Network (AETN). The documentary takes a look at families in Arkansas and what it means to be a parent today. It offers suggestions to parents for helping children achieve in school and grow into caring, productive adults. The documentary also focuses on good communication in families and teaching responsibility in the home.

Following the program viewers will have the opportunity to call and request a free packet which includes information on how to help your child achieve in school.

The documentary is an introduction to the APPLE Program and will be followed by a monthly series, **PARTNERS IN LEARNING**, which will be aired on AETN the second Saturday of each month at 11:30 a.m. The following schedule lists dates and topics of the series:

### PARTNERS IN LEARNING

- October 13 - Communication and Families
- November 10 - Developing Responsible Young People
- December 15 - Study Skills Begin at Home
- January 12 - Children Should Be Seen AND Heard  
(Developing Language Skills at Home)
- February 9 - Inviting Children To Read
- March 20 - The Numbers Game  
(Helping Your Child With Math)
- April 13 - Between Home and School  
(Parent-Teacher Conferences)
- May 11 - "Go For It"  
(Encouraging Your Child To Achieve)

PARENT INVOLVEMENT

A Bibliography

The following bibliography represents a sampling of the literature dealing with parent involvement in education. Each person receiving a copy of this bibliography can order five (5) articles cited on the bibliography by completing the order form below and mailing it to: ADE Information Center; State Education Buildings, Room 103A; Little Rock, AR 72201.

## PARENT INVOLVEMENT: A BIBLIOGRAPHY

#301 Batsell, Gary A. "Parent Education - A Planned Program Pays Off." MIDDLE SCHOOL JOURNAL, vol. 15 no. 1, November 1983, pp. 10-11.

The purpose of the Adolescent Behavior Educational Seminar (A.B.E.S.) project was to present a program on adolescent behavior to the parents of Humboldt Junior High School students in Dewey, Arizona. The A.B.E.S. program was conducted in nine weekly sessions and included presentations and interaction between parents and teachers.

#302 Botwinik, Ruth and others. "Getting Parents Involved." THRUST, vol. 11 no. 2, NOVEMBER 1981, p. 23.

This article includes suggestions on how to get parents involved in the education of their high school-aged children. Emphasis is placed on successful parent-teacher conferences.

#303 Breiling, Annette. "Using Parents as Teaching Partners." READING TEACHER, vol. 30 no. 2, November 1976, pp. 187-192.

The role of parents in affecting children's success in reading is becoming increasingly recognized. This article describes the TITLE I parent involvement program developed in Montgomery County, Md., that helped parents provide motivation, practice and exposure to reading at home.

#304 Builder, Philip. "Parents as Partners in the Teaching of Reading." AUSTRALIAN JOURNAL OF READING, vol. 5 no. 4, November 1982, pp. 216-222.

Children's reading difficulties may be exacerbated by their parents' anxieties and efforts to help. A program to build parents' understanding of the reading process provides invaluable support for a school's efforts in reading remediation.

#305 Cervone, Barbara Tucker and O'Leary, Kathleen. "A Conceptual Framework for Parent Involvement." EDUCATIONAL LEADERSHIP, vol. 40 no. 2, November 1982, pp. 48-49.

In this article the authors present the Parent Involvement Continuum which is a conceptual framework for parent involvement. Several involvement strategies are also presented as part of the continuum.

#306 Criscuolo, Nicholas P. "Parent Involvement in the Reading Program." PHI DELTA KAPPAN, vol. 36 no. 5, January 1982, pp. 345-46.

This article describes the New Haven, Conn., parent involvement in reading program that is a top priority of that district. Components of the program include community tutors, a recipe booklet on how to teach reading at home, a reading advisory board and reading courses for parents.

#307 Cummings, Rhoda and Maddux, Cleborne D. "How to Get Parents Involved in Your Program." ACADEMIC THERAPY, vol. 19 no. 2, November 1983, pp. 227-233.

The authors discuss four groups of parents of handicapped children: the apathetic parent, the burned-out parent, the intimidated parent and the resigned parent. Also presented are sixteen strategies to help get these parents working with teachers of their handicapped children.

#308 Forbes, Eileen and others. "Working With Parents." INSTRUCTOR, vol. 89 no. 8, March 1980, pp. 52-58.

The Home Help Center at Danbrook Elementary School in Anaheim, Calif., is helping parents get involved in their children's education by providing reading games and materials for parents to check out and use at home with children. This is one of eight parent involvement programs described in this article.

#309 Gastineau, Charles L. "The Parent University: Teaching Parents How Children Learn (and Don't Learn)." THRUST, vol. 2 no. 3, January/February 1982, p.30.

As a result of a parent opinionnaire, educators at Lancaster School District started a "parent university" that offers several "courses" on different topics. The Saturday "university" includes sessions on "Assertive Discipline", "Effects of TV on Your Child", "Positive Parenting", "Are You Listening, Mom and Dad?" and "Childhood Illnesses".

#310 Gordon, Ira J. "The Effect of Parent Involvement on Schooling." In: PARTNERS: PARENTS AND SCHOOLS, pp. 4-25. Edited by Ronald S. Brandt. Alexandria, VA: Association for Supervision and Curriculum Development, 1979.

This material is based on a presentation made by Ira Gordon at an ASCD conference in 1978. Gordon explains four models of parent-school-community relationships and cites research evidence of long-term effects of parent involvement programs.

#311 Graika, Thomas. "Parents: Partners in Science." SCIENCE AND CHILDREN, vol. 19 no. 1, September 1981, pp. 13-15.

The author describes the Saturday Science Program offered by the Chicago Museum of Science and Industry to help parents become involved in their elementary-aged children's science education. Activities used in the course for parents are included in this article.

#312 Grant, Carl A. "Preparing Teachers for Parent Involvement." In: COMMUNITY PARTICIPATION IN EDUCATION, pp. 95-114. Boston: Allyn and Bacon, Inc., 1979.

This paper attempts to answer five questions: 1) Why should parents be involved in their children's education? 2) Why should teachers be trained to involve parents? 3) What competencies do teachers need for working with parents? 4) How can teachers be helped to achieve these competencies? and 5) What can be done to enable schools of education to meet the challenge of preparing teachers for parent involvement?

#313 Greenwood, Gordon E. and Kaplan, Leonard. "The Role of the Teacher." In: BUILDING EFFECTIVE HOME-SCHOOL RELATIONSHIPS. pp. 68-92. Edited by Ira J. Gordon and William F. Brievogel. Boston: Allyn and Bacon, Inc., 1976.

This chapter examines the role of the teacher in making home visits and involving parents in their children's education. Tips are given on planning a home visit and on how to have successful visits with parents.

#314 Guttman, Julia A. "Getting Parents Involved in Preschool." EDUCATION DIGEST, vol. 44 no. 3, November 1978, pp. 15-17.

This article describes the Guided Observation program in Rochester, New York that involved parents of three- or four-year-old children. Parents came to school one-half day a week with their children and either attended discussion groups or acted as teaching assistants.

#315 Kessler, Gail. "Parents and Schools Form a New Powerful Partnership." FAMILY LEARNING, vol. 1 no. 1, March/April 1984, pp. 28-32.

Mothers and fathers in ever-increasing numbers are joining together with public schools across the country to share power and responsibility. This article highlights parent involvement efforts in Salt Lake City, San Francisco and Tenafly, New Jersey.

#316 Long, Lynette. "Parents: the Untapped Resource." MOMENTUM, vol. 13 no. 3, October 1982, pp. 21-22.

According to Dr. Long, the development of a close relationship between parent and teacher is essential in today's schools. But a good working partnership takes time to develop. Included in this article is a list of ways teachers can communicate with parents.

#317 Maddux, Cleborne D. and Cummings, Rhoda E. "Parental Home Tutoring: Aids and Cautions." EXCEPTIONAL PARENT, vol. 13 no.4, August 1983, pp. 30-33.

Too often tutoring becomes a negative experience for children and their parents. In this article suggestions are given for parents who are interested in tutoring their handicapped children at home. Parents are cautioned not to jeopardize their relationships with their children.

#318 Marcovich, Sharon J. "Waiting in the Window for Teacher." AMERICAN EDUCATION, vol. 11 no. 6, July 1975, pp. 9-12.

Teachers in Superior, Wisconsin were concerned about parental interest and decided to set up a program of home visits and kindergarten readiness. How the program was established and a typical home visit are described in this article.

#319 Moles, Oliver C. "Synthesis of Recent Research on Parent Participation in Children's Education." EDUCATIONAL LEADERSHIP, vol. 40. no. 2, November 1982, pp. 44-47.

Using recent studies on programs and practices to involve parents in their children's schooling, the author cites some effects of parent participation on achievement, describes how parents participated in the program and lists barriers to home-school collaboration. Also included are highlights from research on tutoring.

#320 Sherrod, Joe R. "Share - A Partnership for Progress." TEXAS OUTLOOK, October 1978, pp. 38-39.

Project SHARE - School and Home Accepting Responsibility for Education - was developed in the Fort Worth Independent School District. Guidelines for the program are: 1) set aside a minimum of one hour each evening for your child to study; 2) check homework and offer help or talk with the child about school; 3) call the school with questions and concerns; 4) encourage reading and 5) attend conferences, programs and meetings.

#321 Smith, Kay M. "The Home as Learning Center: The Family as Educator." CONTEMPORARY EDUCATION, vol. 55 no. 2, Winter 1984, pp. 81-84.

The family can and should provide learning experiences in a child's education, rather than leaving all the responsibility to the school, according to this author. Several activities are suggested that would provide in-home learning experiences and help develop a child's curiosity, exploration, inquiry and discovery.

#322 Strom, Robert D. "The Home-School Partnership: Learning to Share Accountability." CLEARING HOUSE, vol. 57 no. 7, March 1984, pp. 313-317.

Strom says that a need for shared accountability is evident from three conditions and urges us to devise more effective and satisfying ways for including parents as partners in the educational process. Strom also sets forth obligations of both schools and parents in effective partnerships.

#323 Towns, Kathryn and Jones, Bruce T. THE IGNORED, UNTRAINED TEACHERS: PARENTS. Paper presented at the Annual Meeting of the American Educational Research Association. (San Francisco, CA April 8-12, 1979.) ED170069.

In the Parents as Resource Program approximately 160 parents completed a ten-week series of workshops constructed to increase parental self-confidence, to develop awareness of affective childrearing practices and to demonstrate creative use of materials available in every home. Parents in the program seemed to become more concerned about their child's meals, clothes and preparation in school work.

#324 Urich, Ted R. and Lavorgna, Judith P. "A Parent Involvement Program -- Giving Opportunity a Chance." NASSP BULLETIN, vol. 64 no. 432, January 1980, pp. 34-39.

The Parent Involvement Weekend may be successful as a non-traditional parent involvement program in schools. The program design includes teacher inservice and a faculty-home visitation program.

#325 Walberg, Herbert J. "Families as Partners in Educational Productivity." PHI DELTA KAPPAN, vol. 65 no. 6, February 1984, pp. 397-400.

Although evidence shows that the efficiency of the home in fostering learning has declined for several decades, Mr. Walberg observes that cooperative partnerships between home and school can dramatically raise educational productivity. The author also discusses learning trends, family trends, homework and home environment.

## CONNECT\*ED FACT SHEET

CONNECT\*ED is an electronic communication system that links school districts in Arkansas with each other and with the Arkansas Department of Education by using computers and telephone lines. Each member school district has a computer or microcomputer and communications software that enables that district to communicate with the computer at the Department. Information on education in Arkansas is stored in the Department's computer and then retrieved by school districts by using a toll free number. Ten days of news are stored in the Department's computer continuously. Districts can retrieve this information daily or at their convenience.

To join CONNECT\*ED, the following is necessary:

1) Equipment and software:

Any kind of microcomputer can be used to access the CONNECT\*ED system as long as that computer will run communications software that will enable you to get the information from the Department's computer and download or transmit it to a diskette in your microcomputer.

A 1200 baud communications modem is required. This is the speed at which the information will be transmitted to you over the telephone lines. If your modem operates at any other speed, you will not be able to get into CONNECT\*ED.

A printer is necessary to print the data downloaded to and stored on the diskette in your microcomputer.

Communications or modem software is necessary that will enable you to download information. It is important that the software you choose is sophisticated enough to let you manipulate the information you will be receiving and store it on diskettes for future use.

2) ADE approval:

Every district in the state is eligible to participate in CONNECT\*ED. Due to computer and telephone line problems, each district must notify the Department prior to joining the system. This can be done by contacting Dianne Williams, Information Center Supervisor at the Department, (371-5037), for information on access codes, phone numbers and equipment.

CONNECT\*ED is updated daily and includes information on events, regulations and news about what's happening in education in Arkansas. During the legislative session, January 1985, daily updates will also be given on education legislation. THE STARTING DATE FOR OPENING CONNECT\*ED TO ALL DISTRICTS IS DECEMBER 1, 1984.

## CONNECT\*ED OPERATING PROCEDURES

### I. INTRODUCTION

To effectively and efficiently serve all Arkansas school districts with educational news, the Connect\*Ed communication system was developed to accomplish the following:

The most recent ten (10) days of news releases will be maintained on the Arkansas Department of Education (ADE) computer. School districts having the proper communication equipment and ADE approval can retrieve data through the telephone system toll free. Districts can retrieve news each day or, when days are missed, can retrieve missing days up to ten. Day(s) to be retrieved will be the only selection required. Once this selection is made, the data will be transmitted to the district's micro in its entirety and will then be automatically disconnected.

It is suggested that the district place the data on a diskette, disk or tape for printing, for transmission to schools within the district and for future retrieval.

The following procedure outlines the steps necessary to successfully retrieve news data from ADE's computer data base.

### II. PREREQUISITE

#### A. ADE Approval:

Every district in the state is eligible to participate in the Connect\*Ed program. Due to computer and telephone line load problems, it is necessary that each district receive ADE's approval prior to starting. This can be done by contacting Dianne Williams (371-5037). Ms. Williams will give a starting date and can assist in defining equipment requirements.

#### B. Equipment:

1. A communications terminal is required. A microcomputer or larger is suggested. The equipment must be capable of handling communications (usually a communications software package) on the Bell system at a 1200 baud rate.
2. A 1200 baud communications modem is required. Slower or faster rates will not be accepted. The modem must be compatible with the district's micro and the Bell System's dial-up service.
3. A method of accepting the news at 1200 baud and storing for printing and possible future retrieval is required. Diskettes, disk or tape can be used for permanent or semi-permanent storage.
4. A printer is required to print the data from the storage device or from memory if no storage device is used.
5. Communications protocol requirements are:  
"8 bit - no parity - one stop bit" The district's micro must be set up in this manner.

### III. Communication Connect

#### A. Time of Day:

Normal operating hours are 8:30 am to 6:30 am. The two (2) hours, 6:30 am to 8:30 a.m., are used by ADE to back up their entire system and for the current days Connect\*Ed data to be placed in the data base.

#### B. Telephone Numbers:

*Bok #1's  
Operating*

1. The toll free number to be used by districts outside the metropolitan Little Rock area is (1-800-342-3850.)
2. The local number to be used by districts within the metropolitan Little Rock area is (371-5575.) This number can be used by any district within the state but will not be toll free.

C. Connection Problems:

1. If the line is busy, redial at a later time.
2. If you do not receive a "connect" tone, chances are ADE's computer is out of service. Whenever possible, ADE will give prior notice. When down-time is pre-scheduled, Connect ED will be noted. However, there will be times when this cannot be done. Redial at a later time.

D. Logging-in:

When transmission connection has been established always hit the RETURN KEY first!! One of four things may occur:

1. If the screen shows "RSTS V7.2 ADE BLUE SYSTEM....":
  - a. At the prompt "User:" type 100/80 and hit the return key.
  - b. At the prompt "Password" type CNED and hit the return key.
  - c. The CNED will not appear on the screen. Continue to the next step. If you type the wrong "Password", retry will be available.
  - d. At the prompt "ENTER LEA NUM AS 4 DIGITS", type the first four (4) digits of the districts LEA number and hit the return key. If you type in the wrong LEA number, a retry will be available.
2. If the screen shows a message (may be any number of statements) followed by a "\$" sign (this means the last person to use Connect ED did not sign off properly):
  - a. ~~At the "\$" sign~~ type HELLO and hit the return key.
  - b. At the prompt "ENTER LEA NUM AS 4 DIGITS", type the first four (4) digits of the districts LEA number and hit the return key. If you type in the wrong LEA number, a retry will be available.
3. If data is transmitting or miscellaneous data appears (this means the last person to use Connect ED disconnected before completion of transmission):
  - a. The district must wait until data transmission has been completed. The words "HAVE A NICE DAY --- END OF TRANSMISSION" indicates transmission has completed.
  - b. When a "\$" sign appears, follow the same steps in number 2 above.
4. If nothing appears on the screen, Contact Gail Tucker, Data Processing, 371-1762 for further assistance.

IV. Data Transmission

A. Release Data Selection:

Information personalized for each district will appear. This information will show the district what dates they have or have not selected for transmission prior to the current date. By following the instructions that appear,

the district can select all dates that have not been previously selected or can select individual dates of those previously selected (in case one or more dates are lost) but only for the 10 days.

B. "ENTER FUNCTION:" processing

1. "(R)EST=DATES THAT YOU DO NOT HAVE"

The dates that indicate "NO" are the dates the district has not received news information. By hitting the R key followed by hitting the return key, all dates having "NO" will be transmitted. You "do not" have to select each date.

2. "(S)ELECTIVE=SPECIFIC DATE"

Any of the ten (10) dates, even those previously transmitted, can be selected by hitting the S key. At the prompt, enter a three (3) digit month abbreviation followed immediately by a two (2) digit day, e.g. SEP04 followed by hitting the return key.

At the prompt, enter the next selected date, etc., or if the last has been selected, enter 99999 and hit the return key. All selected dates will be transmitted.

3. "(B)YE=STOP TRANSMISSION AT THIS POINT"

If the transmission needs to be terminated at this point, hit the B key followed by hitting the return key. Transmission will be terminated. DO NOT USE "B" AT ANY OTHER TIME.

C. Data Transmission Completion:

When the words "HAVE A NICE DAY --- END OF TRANSMISSION" appear, followed by a "\$" sign, immediately complete the following steps:

1. The district must type BYE/F and hit the return key.
2. Disconnect modem.

"DO NOT DISCONNECT (hang up) DURING TRANSMISSION!"

V. Districts Processing

It is suggested that

A. Storage:

Connect\*Ed data be placed on a disket (or similar storage device) at or immediately after transmission.

B. Printing:

From storage, print the Connect\*Ed data for distribution.

C. Intra District Processing:

Using phone communications, disseminate the Connect\*Ed information to schools within the district.

D. Information Retrieval:

Maintain the Connect\*Ed information on diskettes and upon request, retrieve pertinent data on a date issued or subject area basis.

VI. Problems

A. Equipment/Software Configuration:

Contact Dianne Williams, Communications and Dissemination 371-5037.

B. Connection with ADE Computer:

Contact Gail Tucker, Data Processing, 371-1762
