### ABSTRACT

Written for margant nurses, this manual is intended to simplify and speed up the process of entering pertinent medical information onto the Migrant Student Record Transfer System (MSRTS) data base. It is designed to be used in conjunction with the indepth technical information in the National MSRTS Health Users Manual and includes page references to that document. The first section explains in detail the Health Data Entry Form and gives specific directions for completing each section: identifying data, patient history, family history, immunizations, screenings and laboratory tests, and health problems. Sample problem situations and solutions are included. Subsequent chapters provide basic information about the medical record (the output document prepared from the Health Data Entry Form), filing system requirements for migrant student health records, how to handle records when students move, how to make corrections and deletions to the records, and how to handle sensitive data (child abuse, neglect, etc.). The reference and resource section provides: a directory of migrant nurses by parish, codes and abbreviations used in the health records, a glossary of eight terms and acronyms used in MSRTS health records, and ordering information for two medical references. (JHZ)

### BULLETIN 1711

This public document was published at a cost of  $\frac{3.31}{1.00}$ . One hundred and thirty-two copies of this public document were published in this first printing at a cost of  $\frac{436.92}{1.000}$ . The total cost of all printings of this document, including reprints, is  $\frac{436.92}{1.0000}$ . This document was published by the Louisiana Department of Education, P. O. Box 44064, Baton Rouge, LA 70804 to provide procedures to fulfill the role of MSRTS Specialist and of Migrant Nurse at the local level, under authority of Public Law 97-35, Chapter 1 Education Consolidation and Improvement Act and regulations issued thereunder. This material was printed in accordance with the standards for printing by state agencies established pursuant to R.S. 43:31.

### FOREWORD

This manual represents the combined efforts of MSRTS Specialists, Migrant Nurses, Technical Assistants, and Data Entry Specialists from throughout the State of Louisiana who were a part of the MSRTS Manual Revision Committee. They truly were the logical authors because of their day to day experiences with the Migrant Student Record Transfer System at local, regional, and State levels. Without the expertise and insight of each one of these people, publication of this informative and comprehensive guide would have been impossible. I gratefully acknowledge the following committee members:

### INTRODUCTION

The migrant nurse is an individual, professionally prepared in both nursing and education who works toward improving, protecting, and maintaining the health of her pupils, their families, and school personnel. Her preparation enables her to provide services for prevention and early detection of health problems and to utilize health experiences for health counseling and health education.

Through an organized program with objectives and goals based on specific guidelines in all areas of health services, the migrant nurse strives to complete the circle of education's total approach; to instill the ideals of self-preservation, of hope; and most importantly, to reinforce feelings of self-worth in each child.

The migrant nurse knows and complies with all State and parish school laws, regulations, and recommendations.

The goal of this manual is to enable migrant nurses and MSRTS specialists throughout the State of Louisiana to enter pertinent medical information onto the Migrant Student Record Transfer System data base with ease.

Our intent is to simplify all record-keeping procedures and to expedite efficient time-management. For further explanations and more indepth technical information, refer directly to the National M.S.R.T.S. Health Users Manual.

# Health Data Entry Form

10 "

### SAMPLE

The Health Data Entry Form is the input document and is the only means of reporting medical data about the student.

### GUIDELINES

- This form <u>must always be</u> completed in <u>red</u> ink. Accuracy and legibility are important essentials.
- A dated copy <u>must be</u> retained in a pending file until the updated medical record is received and checked.
- All work submitted <u>must be</u> dated using the month and day mailed.
- If you do not receive a medical record within three weeks after sending in the Health Data Entry Form, notify the terminal center at the State migrant office.

### DO NOT RESUBMIT DATA!!!

- in this manual, the problems and solutions are sequentially numbered in the text and correspond with the numbered sections shown in the samples.

### IDENTIFYING DATA

This information is used to identify the student for whom the medical service(s) was provided.

	MFA1	TH DATA ENTRY FORM	AND THE PART OF TH
REPORTER 20:	STUDENT NO.:		DATE OF BIRTH!
ENCOUNTER 8: 3	NAME: (LAST)	7	

The spaces numbered above <u>must be</u> completed correctly before <u>any</u> health data can be entered.

- 1. Reporter ID: The six letter identification for the parish reporting the information. (Refer to page 39 for a complete list of all parish short ID's.)
- 2. Date of Encounter: Use the six-digit date (month, day, year) the child was served or the date information was obtained from other resources.
- 3. Encounter Number: Two alpha characters (the nurse's initials) plus two numbers (in most cases this will be 01) which indicate the number of times the student was seen on the day of encounter. Example: Jane Doe, R.N., would code this section as JD01.
- 4. Student Number: This is composed of the eight numbers and three alpha characters which identify the student on the data base.
- 5. Student Name: This will help to identify a student when errors are made in the student number.
- 6. Date of Birth: This could aid you in identifying students with similar names and backgrounds. This portion is optional.

- 6 -

### PATIENT HISTORY

The Patient History section is for recording previous and existing health problems.

τ.

PATIENT	HISTORY	YES/NO
V10	MALIGNANT NEOPLASH	
V12.01	MEASLES	
V12.02	RUBELLA	
V12.03	HUMPS	
V12.04	CHICKEN POX	
V12.05	MHDOPING COUGH	
V12.06	ТВ	-
V12.21	DIABETES	
V12.3	DS BL & ORGANS	
V12.4	DS NS & ORGANS	
V12.41	EPILEPSY	
V12.5	DS CIR SYSTEM	
V12.51	RHEUMATIC FEVER	
V12.6	DS RESP SYSTEM	
V12.7	DS DIGESTIVE SYSTEM	
V13.0	DS URINARY	
V14	ALLERGY MED AGENT	-
V15.0	ALLERGY OTHER AGENT	

- Enter "Y" for "yes" when a condition or disease exists or existed.
- Multiple "no" entries will result in numerous pages of patient data being printed on each record. We prefer that this data not be submitted.
- The Health Problem section is used to record more specific information pertaining to the Patient History section. An example of this use is shown on the next page.

### PATIENT HISTORY VIA HEALTH PROBLEMS

<u>Problem</u>: The student has a severe bee sting allergy which could prove to be a serious medical emergency if not known and noted on the student record.

	<u> </u>	
PATIENT	HISTORY	YES/NO
V10	MALIGNANT NEOPLASM	
V12.01	MEASLES	-
V12.02	RUBELLA	
V12.03	MUMPS	-
V12.04	CHICKEN POX	-
V12.05	MHOOPING COUGH	******
V12.06	TB	-
V12.21	DIABETES	*******
V12.3	DS BL & ORGANS	
V12.4	DS NS & ORGANS	
V12.41	EPILEPSY	
V12.5	DS CIR SYSTEM	
V12.51	RHEUMATIC FEVER	
V12.6	DS RESP SYSTEM	
V12.7	DS DIGESTIVE SYSTEM	
V13.0	DS URINARY	
V14	ALLERGY MED AGENT	
V15.0	ALLERGY OTHER AGENT	YU

### Solution:

- 1. Put a "Y" in "allergy other agent" in Patient History section.
  - Then go to the Health Problem section.
- 2. An "X" must be entered in Primary.
- 3. Identify allergy by specific ICD code number and enter in appropriate column. The ICD code for Bie Sting Allergy is 989.5 which can be found in the ICD codes list.
- 4. Enter a "C" in Type to indicate a chronic condition.
- 5. Enter "U" in Status to indicate that the condition is unresolved.
- 6. Refer to E-H linkage codes and research for appropriate message. In this case, E-H 111 will print the following message: "Insect allergy severe have plan of action in case of sting."
- 7. Enter default CPT code 90760 in the CPT column.
- 8. Enter "U" for undetermined in A/N/U column.
- 9. Enter a condensed message or brief instruction in Outcome as only 39 characters are allowed. The message in this example is: "Have sting kit available at school."

- Enter "Y" for "yes" when a condition or disease exists or existed.
- Multiple "no" entries will result in numerous pages of patient data being printed on each record.
   We prefer that this data not be submitted.

ERIC

### **IMMUNIZATIONS**

This section is for recording the immunizations the student has received to date.

		ADMIN.		HISTORY OF	PREVIOUS	ADMI
IHHUNIZ	ATION	DATE	BATCH #	DATE	DATE	DATE
V03.1	TYPHOID-PARATYP				<del></del>	
V03.2	TUBERCULOSIS (BCG)					
V03.6	PERTUSSIS ALONE					
V03.7	TETANUS TOX. ALONE					
V04.01	POLIO ORAL					
V04.02	POLIO INTUNIZATION					
V04.1	SHALLPOX					
V04.2	MEASLES ALONE					
V04.3	RUBELLA ALONE					
¥04.6	HUMPS ALONE					
V04.8	INFLUENZA					
V06.1	DTP					
V06.12	Td					
V06.4	HTR					

- Six-digit dates which include month, day, and year (MMDDYY) must be used.
- Extra lines are provided to indicate additional immunization dates as required.
- The Batch # portion is optional and does not have to be completed.

Specific examples of coding this section are demonstrated on the following pages.

- 10 -

### <u>IMMUNIZATIONS</u>

Problem: The student had a series of DTP shots with dates of 031581, 051781, and 061281. A preschool DTP was administered on 042282; however, the student did not enter school as planned and an additional booster was given on 041583. These immunizations are recorded as shown below:

		ADMIN.		HISTORY	OF PREVIOU	JS ADHIN
IHMUNIZ	ATION	DATE	BATCH #	DATE	DATE	DATE
V03.1	TYPHOID-PARATYP	<u>(2)</u>		_0_		
V03.2	TUBERCULOSIS (BCG)		<del></del>			
V03.6	PERTUSSIS ALCHE					
V03.7	TETANUS TOX. ALONE					
V04.01	POLIO ORAL					
V04.02	POLIO INHUNIZATION					
V04.1	SHALLPOX					
V04.2	MEASLES ALONE					
V04.3	RUBELLA ALONE					
V04.6	HUMPS ALONE					
V04.8	INF LUENZA					
V06.1	DTP	042282		031581	051181	06128
V06.10	Td					
V06.4	HTR _					
VOLL	_(3)	041583				

### Solution:

- l. Record the first series of dates, sequentially, in the three columns indicated under History of Previous Admin.
- 2. Record the first booster administered in the Admin. Date column on the same line.
- 3. Record the most recent booster on the additional line provided by entering the appropriate ICD code and indicating the date in the Admin. Date column. It is not necessary to enter the immunization name as this will be printed automatically.

### IMMUNIZATIONS VIA HEALTH PROBLEMS

<u>Problem</u>: If dates are not available but student has an MCH 14 card, code as shown below via the Health Problems section. Do not enter anything in the Immunizations section.

'			:			بذريسيون	446 - 3	C Maria de		<u> </u>	and a few to the state to be a few to	1 4416

		<del></del>	-				-				-	
	•		-			-	-					
	.: t-							· ·				

### Solution:

- 1. An "X" is entered in the Primary column.
- 2. The appropriate ICD Code is entered. Please check ICD codes for accuracy.
- 3. Status is indicated as "R" for resolved.
- 4. The default CPT code 90760 is entered.
- 5. This column is optional. However, if a message is entered in the Outcome column, A/N/U <u>must have</u> an entry. In this case, "N" for normal is used.
- 6. This column is also optional. If a message is entered it <u>must be</u> brief and contain fewer than 39 characters. "Series complete" is recorded.

22

### IMMUNIZATIONS VIA HEALTH PROBLEMS

<u>Problem</u>: If all dates are <u>not</u> available, and student is still in progress, code as shown below in the Health Problem section.

				- 13				11.0	100			1 14 12 1 A 12 12 14 15 15	ريون و الأجار زوف

- The findings of the screens/labs are indicated in the A/N/U column as "A" for abnormal, "N" for normal, and "U" for undetermined.
- The Outcome column is used to indicate specific results of screens/labs that are other than normal.
- 25 Extra lines are provided to include screens/labs not Thdicated on the Health Data Entry Form.

### SCREENS/LABS

Problem: The student receives general vision, hearing, and oral dental exams. A height and weight measurement, blood pressure check, scoliosis screening, and preventive health care check are also performed.

SCREENS / LABS	A/N/U DUTCOHE
V20.2 HLTH EXAM (PRESCHOOL)

V82.81 90760 SCOLIOSIS	) A REFERRED TO SCOLIOSIS CLIMC
V728 90760 (2)	N PREVENTIVE HEALTH CARE

### Solution:

- 1. Indicate the results by entering "A" for abnormal, "N" for normal, or "U" for undetermined in the A/N/U column with any brief comments in the Outcome column.
  - a. The student wears glasses and has a normal general vision exam with them on.
  - b. The general hearing exam also proves to be normal.
  - c. The oral dental exam reveals that the student needs a private referral.
  - d. The student's height is normal at 60 inches as is a weight of 105 pounds.
  - e. The blood pressure check is also normal at 110/70.
  - f. The scoliosis check reveals the possibility of some abnormality, and the student is referred to the scoliosis clinic for a further check.
- 2. A preventive health care check is performed by the nurse. Because there is no line that contains this ICD code, the code is entered in the first column followed by the 90760 default CPT code. The outcome is indicated as "N" and a brief message "preventive" health care appears.

### HEALTH PROBLEMS

This area is used to record health problems. As previously shown, this section can also be used to record data from other sections of the Health Data Entry form as needed.

								est ages			5 Th. 1 1978	west to be a second
	PROPLEMS

						****						
					-	-						
							<b>/</b>					1

A health problem must be coded in the following manner:

- 1. An "X" is entered to indicate a Primary condition.
- 2. The ICD code is entered. Refer to ICD codes list for accuracy.
- 3. Type is indicated as either "A" for acute or "C" for chronic.
- 4. Status is indicated as either "R" for resolved or "U" for unresolved.
- 5. Entering an E-H code is optional as these codes are, in most cases, automatically assigned by the computer based upon the ICD code used. In certain situations, however, this portion may be completed.\*
- 6. A CPT Code is entered to indicate the services provided.
- 7. Indicate the results of the CPT by using "A" for abnormal, "N" for normal, or "U" for undetermined. This is optional, however, if a message is entered in Outcome, A/N/U must be completed.
- 8. Indicate the Outcome if desired or known. This portion is also optional; however, use a condensed message or brief instruction as only 39 characters are allowed. If this column has an entry in it, then the previous A/N/U column must be completed.

<sup>\*</sup> See page 39 in National Health Users Manual for additional information.

### HEALTH PROBLEMS

<u>Problem</u>: The student is diagnosed as having bacterial pneumonia (bilateral, pneumococcal) and is hospitalized, treated, and released.

1.		بين يبدن			: S. 3	*				14 14 14 14 14 14 14 14 14 14 14 14 14 1

### Solution:

- 1. An "X" must be placed in the Primary column.
- 2. The ICD code for bacterial pneumonia is 482.9 and is entered in the ICD column.
- 3. The type is indicated with an "A" for an acute condition.
- 4. The status is indicated as "R" for a condition that has been resolved.
- 5. No entry needs to be made in the E-H codes columns because E-H code 008 is going to be assigned automatically to this problem by the computer. Refer to page 50, Appendix A, of the National Health Users Manual for the listing of these automatically assigned codes.
- 6. The CPT code 90220 is used to indicate the treatment received. Refer to page 61, Appendix C, of the National Health Users Manual. CPT 90220 will print the message "Hospital Care, New, Compreh."
- 7. An "N" is entered in the A/N/U column to indicate a normal response to the treatment rendered.
- 8. A brief message is provided to indicate the hospital name which is "Baton Rouge Charity Hospital."

### HEALTH PROBLEMS

Problem:

A student with multiple cavities and pain present goes to a dentist for treatment.

HEALTH	PROBLEMS			•	•		A COL			to at the day of the	ege there is a

### Solution:

33

- l. An "X" must be placed in the Primary column.
- 2. The ICD code for dental caries is 521.0 and is entered in the ICD column. Note: When the same ICD code has several different CPT codes, indicate the ICD code, Type, and Status on the first line of entry only.
- 3. The type is indicated by entering a "C" for chronic condition.
- 4. The status is indicated as "R" for resolved.
- 5. No entry needs to be made in the E-H codes column.
- 6. Dental CPT codes are used to indicate the various treatments performed. The student had an emergency exam (D0130), an extraction (D7110) with an additional extraction (D7120), and oral hygiene instructions (D1330). They are indicated as shown in the example. Refer to page 77, Appendix E, in the National Health Users Manual for further information.
- 7. An "N" is entered in the A/N/U column to indicate a normal response to the treatment.
- 8. A brief message is provided to indicate the dentist's name and phone number. "Dr. J. E. Bacon, D.D.S. 318+555-4062."

### MEDICAL RECORD (OUTPUT DOCUMENT)

Two copies of the medical record are sent to the migrant nurse once the data is entered at the terminal center. Turnaround time should be no more than three weeks. Upon receiving the medical record, the nurse is to check for accuracy against the duplicate Health Data Entry Form which is in her dated pending file. Once the accuracy of the information has been verified, the duplicate Health Data Entry Form can be destroyed and the new medical record put in the student's folder.

If corrections or deletions are necessary, refer to the appropriate section of this manual for further information.

Refer to National Health Users Manual, pages 2 through 23, for an indepth discussion of the medical record output document. The output document is the medical record received from Little Rock and is not the same as the Health Data Entry Form which is the input document.

- 20 -

IC.

### FILING SYSTEM

The need for an efficient filing system is a major priority. Each migrant nurse can use her own flexible methods, keeping in mind that as her program grows, there may be a need for changes. Feel free to contact the State migrant office and seek suggestions from other migrant nurses. The particular choice of a filing system will depend upon variables such as the number of students, the space available, coordination with the educational program, and the like. Remember, documentation is the primary tool for the evaluation of your performance, and a confidential and practical filing system is an important element in this process.

Nurses are reminded to keep these medical .-cords in <u>locked files</u> to ensure the confidentiality of all student records.

If you are a full-time migrant nurse, you <u>must have</u> a complete and separate file on each child which includes a folder that has the student's name and contains the most recent medical record. A pending file with duplicate copies of all work that has been sent to the terminal center must <u>also</u> be maintained. This is done by simply taking all duplicate copies of work mailed on a specific day, placing them in a file folder, and keeping them separate from the regular files. This method allows the nurse to keep the students' permanent file folders in order and eliminates unnecessary filing. All work sent in <u>must be</u> dated to determine if a call needs to be made regarding turnaround time or to locate an input document quickly if a problem arises.

The previous numbered page in the original document was blank

### STUDENTS WHO MOVE

If additional health information is received after a student has moved out of your parish, this data <u>must be</u> recorded on the Health Data Entry Form and sent to the terminal center. This information will be updated on the student's medical record regardless of whether he has moved to another state or parish. Remember, we are a part of a national information network, and all of the information received on a particular child is forwarded to the state in which the child is presently residing. You need only to send the information to the terminal center in Baton Rouge; it <u>is not</u> necessary to contact any other state or parish.

Any errors found in coding on the medical record <u>must be</u> corrected for students who have moved as well as on all other medical records. The only one who can correct a medical record is the parish that reported this information initially. <u>Make sure that all of your records are correct</u>. Remember, you are responsible for the accuracy of this information.

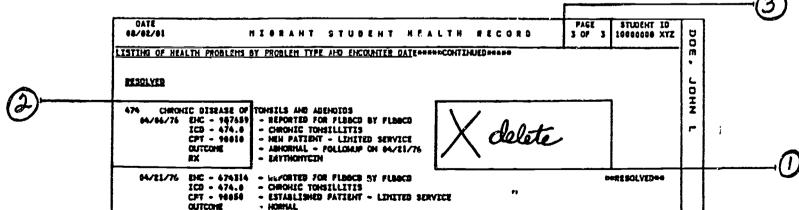

### CORRECTIONS AND DELETIONS

Errors found in the coding of the medical record <u>must be</u> corrected immediately. These corrections may only be made by the parish that reported this health data. You <u>may not</u> correct or delete health information submitted by any other parish or state.

When deleting information that is already on the medical record and is found to be in error or in need of correction, follow the guidelines listed below:

- 1. Use red ink to mark an "X" to the <u>right</u> of the printed data and indicate whether the information is to be deleted or corrected.
- 2. Do not tamper with any code number(s). The numbers <u>must</u> remain legible to allow this material to be deleted by the data entry specialists.
- 3. Send in <u>all</u> pages of the medical record as the record can consist of more than one page of printed data.

When correcting information, staple a Health Data Entry Form with correct information to the above and send to the terminal center.

### MEDICAL SYMBOLS

We must also emphasize that although the data entry specialists deal with medical terminology on a year-round basis, they are <u>not</u> familiar with our medical symbolism. Please refrain from using symbols of any kind on the Health Data Entry Form to reduce inaccuracies and telephone calls.

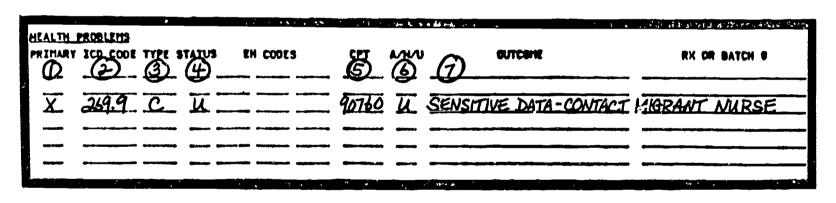

### SENSITIVE DATA VIA HEALTH PROBLEMS

The problem of recording sensitive data eventually presents itself to every nurse. Two examples will be shown which illustrate discretion in the recording of these problems.

<u>Problem #1</u>: A student is involved in a child abuse and neglect situation.

Rationale: The area of child abuse and neglect has no ICD code number. Because of the sensitive nature of this subject, the observed signs of malnutrition are indicated as the primary problem. During investigation of the malnutrition, the abuse and neglect were discovered.

### Solution:

- 1. An "X" must be placed in the Primary column.
- 2. The "observed" sign or symptom is used as the problem and the respective ICD code used. In this case, the ICD code for malnutrition is 269.9 and is entered in the ICD column.
- 3. Type is coded as "C" to indicate a chronic condition.
- 4. Status is indicated as "U" for an unresolved problem.
- 5. The 90760 CPT default code is used because it indicates the student's age.
- 6. A "U" is placed in the A/N/U column.
- 7. Provide a brief message such as "sensitive data contact migrant nurse." Remember only 39 characters are allowed in this column.

### SENSITIVE DATA VIA HEALTH PROBLEMS

Problem #2: An unmarried, high school student is diagnosed as being pregnant after sudden and repeated episodes of nausea and vomiting during school.

Rationale: Pregnancy of unmarried teens carries with it a certain stigma, and some nurses feel reluctant to attach such a "label" to the student by having this appear on the medical record. Many students share this information with the migrant nurse as "confidential, priviledged information" and never intend for it to be recorded anywhere.

		***************************************	• •									<del></del>
								. (.)				

### Solution:

47

- 1. An "X" must be placed in the Primary column.
- 2. The "observed" sign or symptom is used as the problem and the appropriate ICD code used which, in this case, is 787.0 for nausea and vomiting.
- 3. Type is coded as "A" for an acute condition.
- 4. Status is reported as "U" for unresolved.
- 5. Default code 90760 is used in the CPT column.
- 6. Place a "U" in the A/N/U column.
- 7. A brief message such as "sensitive data contact migrant nurse" is indicated. Remember that only 39 characters are allowed in this column.

### SENSITIVE DATA VIA HEALTH PROBLEMS

For other sensitive data such as alcoholism, drug dependency, and any other "priviledged information," always use the 90760 default CPT code and in the outcome column indicate a contact person for more specific information. A name, address, and phone number are not necessary because the computer will automatically print this information on the medical record with the corresponding short ID of the state and parish providing the information.

### HELP!!!

When a questions arises, please call the State migrant office collect at 504+342-3521 or 504+342-4151 Monday through Friday during regular working hours.

Guessing causes many unnecessary problems and delays.

REMEMBER, IF YOU DON'T CALL US, WE'LL CALL YOU!!!

The previo

### ORDERING INFORMATION

### INTERNATIONAL CLASSIFICATION OF DISEASES

ICD-9-CM Edward Brothers

Edward Brothers

Phone 313+769-6511

Post Office Box 991 Ann Arbor, Michigan 48106

Volume I (numerical)

Volume II (alphabetical)

A two volume set costs \$33.00 (softbound) or \$38.00 (hardbound). A single volume costs \$18.25, and you must specify the volume desired. Prepaid orders only. Allow two to three weeks for delivery. Make checks payable to ICD-9-CM.

### CURRENT PROCEDURAL TERMINOLOGY

CPT-4, Order Department American Medical Association Post Office Box 10946 Chicago, Illinois 60610

Phone 312+751-6000

The fourth edition (one volume) costs \$23.45 and will be available after October 10, 1983.

Prepaid orders only.
Make checks payable to the American Medical Association.

### GLOSSARY

ICD (International Classification of Diseases) - a specific code number designed to describe the clinical picture of the student.

CPT (Current Procedural Terminology) - a specific code number designed to describe the treatment or services provided.

DEFAULT CODE (90760) - the CPT code that indicates a student's age. It is used when no appropriate CPT code can be located or when treatment is pending or unknown.

HEALTH DATA ENTRY FORM - the input document and the only means of reporting medical data on the student.

MEDICAL RECORD - the output document that is sent to the nurse after the data has been entered.

INPUT DOCUMENT - another name for the Health Data Entry Form.

OUTPUT DOCUMENT - another name for the medical record.

TURNAROUND TIME - The time it takes for a medical record to be received by the nurse after being submitted to the State terminal center for data entry (three weeks maximum).
