IDENTIFIERS Excellence in Education

ABSTRACT

Trends on college campuses within the United States as of 1985 are reported, with attention to early campus responses to national reports calling for educational reform. Also considered are faculty hiring practices, perceptions about institutional status, college linkages with business and industry, changes in enrollment, and the use of long-range planning and other administrative practices. A total of 398 two- and four-year colleges and universities responded to the study questionnaire (an 85% response), and the data were statistically adjusted to represent national trends. In response to national reports, two themes were emphasized: the need to measure student learning and to emphasize the competencies that students should gain through their studies. More than 80% of responding colleges had recently or were currently reviewing the curriculum. Almost all of these reviews focused on mathematical or computer-related skills, writing, or competencies such as communication and reasoning. Increased enrollments were occurring for part-time and older students, as well as commuters and foreign students. While 21% of the schools reported a net loss in faculty positions compared to the previous year, 32% reported no change, and 48% reported a net gain in faculty positions. Detailed statistical tables, the questionnaire, and technical notes are included. (SW)

HIGHER EDUCATION PANEL REPORT NUMBER 71

FEBRUARY 1986

American Council on Education

AMERICAN COUNCIL ON EDUCATION

Robert H. Atwell, President

The American Council on Education, founded in 1918, is a council of educational organizations and institutions. Its purpose is to advance education and educational methods through comprehensive voluntary and cooperative action on the part of American educational associations, organizations and institutions.

The Higher Education Panel is a survey research program established by the Council for the purpose of securing policy-related information quickly from representative samples of colleges and universities. Higher Education Panel Reports are designed to expedite communication of the Panel's survey findings to policy-makers in government, in the associations, and in educational institutions across the nation.

ACKNOWLEDGMENTS

This survey was developed by ACE staff as part of a continuing project to monitor and report on changing practices in higher education. We are grateful to the Lilly Endowment for its foresight in providing financial support for these surveys.

Special thanks are due to members of the Advisory Committee for the Campus Trends project, who cheerfully and conscientiously offered suggestions on both the questionnaire and the report. Thanks are also due to members of the HEP Advisory Committee and to many ACE staff members who suggested ideas for survey topics. Data processing services for the survey were ably provided by Boichi San and Bernard Greene. The contributions of Clare McManus, Shirley Kahn and Wendy Sams to the preparation of this report are gratefully acknowledged.

BACKGROUND AND HIGHLIGHTS

This report offers findings from the second in a series of surveys of Campus Trends. These surveys are designed to provide timely information on changes taking place in the policies and practices of American colleges and universities.

For this second report, campus actions on curricular change are given major attention along with early campus responses to national reports calling for education reform. This report also examines faculty hiring practices, perceptions about institutional status, college linkages with business and industry, changes in enrollment, and the use of long-range planning and other administrative practices. Major highlights include:

- The recent national reports on higher education are being discussed on the nation's campuses. As of summer 1985, 6 in 10 institutions reported discussions among senior administrators, 45 percent reported discussions in faculty meetings, and 24 percent reported discussions in meetings of their boards.
- Campus officials identified a variety of areas where changes are already being planned in response to the reports. Two related themes are drawing the greatest attention: the need to measure student learning and to emphasize the competencies that students should gain through their studies.
- Curricular change continues to occupy center stage on the nation's campuses. More than 80 percent of responding colleges and universities were currently reviewing the curriculum or had recently done so.
- Almost all of these reviews involved attention to mathematical or computer-related skills, writing or such other competencies as communication and reasoning.
- Half or more of the four-year institutions are currently considering increased attention to international matters and foreign language study. There also is new attention to values or ethics. 61 percent of baccalaureate colleges and 54 percent of universities reported this as a topic currently being discussed.
- About 4 in 10 colleges have experienced sizeable enrollment changes during the 1980s. The most notable changes involved shifts away from full-time students and toward part-time and older students. Also striking is the evidence of significant increases in commuter students and foreign students.
- Fully 21 percent of institutions reported a net loss in faculty positions compared to a year earlier. However, 32 percent of colleges reported no change and almost half (48 percent) reported a net gain in faculty positions.
- Only 45 percent of institutions reported that the level of faculty compensation was better today than several years ago. Another 15 percent reported that faculty compensation was worse today.
- Most colleges hired new faculty during 1984-85, and were about as likely to hire faculty in term or contract positions as in tenure-track positions.
- About 1 in 4 institutions reported that they had retrenchment procedures underway to cut back on the number of faculty. Close to half said they had procedures to retrain faculty for changing program needs.
- Almost all of the nation's colleges and universities have procedures in place for long-range planning (87 percent) and for program review (83 percent). Regular monitoring of student attrition is also widespread (86 percent). More than half of the institutions have developed procedures for systematic faculty planning.
- Close to half of the nation's colleges and universities have at some time completed an analysis of the economic impact of their institution on their state or surrounding community.
- Campus use of personal computers appears to be growing. Close to half of colleges and universities now offer writing courses that are based on micro-computer use.
- Among the nation's colleges and universities, almost all have formal links with the corporate community. About two-thirds of these institutions offered courses, both credit and noncredit, for business employees on company premises.
- Close to half of the institutions reported participation in partnerships with business to foster state or regional economic development. About 4 in 10 institutions reported that they were active in partnerships with the business community to assist the high schools in their area.

METHODS

The Higher Education Panel forms the basis of an ongoing survey research program created in 1971 by the American Council on Education. Its purpose is to conduct specialized surveys on topics of current policy interest to the higher education community.

The Panel is a disproportionate stratified sample of 1,040 colleges and universities, divided into two half-samples of 520 institutions each. Institutions were drawn from the more than 3,200 colleges and universities listed in the National Center for Education Statistics' *Education Directory, Colleges and Universities*. All institutions in the population were grouped according to the Panel's stratification design, which is based primarily upon institution type, control, and size. For any given survey, either the entire Panel, a half-sample or an appropriate subgroup is used.

The survey operation is dependent upon a network of campus representatives who, through their presidents, have agreed to participate. The representatives receive the Panel questionnaires and direct them to the most appropriate campus official for response.

The sample for this study consisted of 468 two-year

colleges, four-year colleges and universities in one of the half-samples. Specialized religious institutions (such as rabbinical seminaries) were excluded. The questionnaire (see Appendix A) was mailed on May 30, 1985, with the request that it be completed by the academic vice-president or another senior official with a broad view of the institution. After a series of mail and telephone followups, 398 responses were received or 85 percent of those surveyed. Actual respondents included: provosts, deans, or academic vice presidents: 33 percent; assistant or associate academic vice presidents (or deans): 28 percent; presidents: 12 percent; and other: 27 percent.

Data from responding institutions were statistically adjusted to represent 2,623 four- and two-year colleges and universities. This adjustment means that the report's findings can be interpreted as generally representative of all two-year and four-year colleges and universities across the country. The technical notes (see Appendix B) contain a description of the stratification design, the weighting methodology and a comparison of respondents and nonrespondents.

FINDINGS

During 1984–1985, the nation's colleges and universities were the focus of several national reports calling for curricular reform. This survey shows that these reports have not gone unheeded: indeed, campus administrators can identify a variety of topics on which changes are being discussed. Especially notable is the evidence of strong interest in ways to assess student learning. The survey also documents that, apart from the reports, a widespread process of curricular review and change is taking place on the nation's campuses.

Other survey results make it clear that college administrators are beset with some basic challenges in the mid-1980s, including shifts in enrollment, low faculty compensation, changing program needs, poor preparation levels of entering students, and pressures to maintain adequate library and computer resources to support their academic programs.

Detailed tables appear at the end of the text.

Response to National Reports

Survey results document that the recent national reports on higher education are being discussed quite widely on the nation's college campuses. Such discussions have most often involved faculty and senior administrators; in some instances, they have included a college's board of trustees (see Table 1). As of summer 1985, 6 in 10 institutions reported discussions among senior administrators, 45 percent reported discussions in faculty meetings, and 24 percent reported discussions of the reports in meetings of their boards.

This survey captured early responses, certainly, but it suggests that the various reports may have significant impact. About 1 in 4 institutions reported that changes are being discussed in response to the reports. Others—ranging up to half of institutions—said that some recommended practices are already in place (see Table 2).

Figure 1 summarizes the recommendations receiving the most attention from the reports issued by the National Endowment for the Humanities, the Association of American Colleges, and the National Institute of Education. Two related themes are drawing the greatest attention: the need to measure student learning and to emphasize the competencies that students should gain through their studies. Two AAC recommendations—to prepare graduate students for teaching and to give equal importance to teaching and research in evaluating faculty—have received considerable attention by universities (see Table 2).

Notably, a good many institutions reported that they already have in place several of the recommended practices (Table 2). More than half already have their best faculty teach core courses, for example, and close to half give major emphasis to the freshman year.

The combination of responses—those actively considering a change and those already having appropriate practices—gives an indication of the likely contours of the college curriculum in the near future. Combining the two responses, for example, it can be seen that 82 percent of the nation's colleges and universities support a new emphasis on academic competencies and 73 percent agree on the importance of

FIGURE 1
Report Recommendations
Receiving the Most Discussion

well-defined statements of what knowledge is essential to an undergraduate education.

Baccalaureate colleges are notable for the major extent to which they already follow many of the recommendations. Thus, 7 in 10 baccalaureate colleges already require two years of liberal arts coursework, 2 in 3 have their best faculty teach core courses, and more than half give emphasis to freshman year experiences.

Among universities, about half already require two years of liberal arts for all students and already assign strong faculty to teach core courses. A good proportion of universities (17 percent and 27 percent, respectively) are discussing possible changes in these areas.

Although the recent reports have been criticized for neglecting the special circumstances of community colleges, survey responses show that certain recommendations are quite applicable. Thus, one in three community colleges reported that they already make systematic assessment of student learning and another 44 percent reported that this is being discussed. Close to half of the community colleges are discussing ways to emphasize analysis, communication and other competencies.

Table 2 also reports early reactions of four-year institutions to several recommendations about teacher education, issued by the National Commission for Excellence in Teacher Education in 1985. About one in four institutions are discussing ways to impose more rigorous admissions requirements; similar proportions are discussing ways to develop programs to attract minority students into teacher education. Bac-

calaureate colleges appear to be particularly responsive to the report's recommendation that teacher education be made a campus-wide responsibility: about one in five are discussing this recommendation, and about half already do so.

Changes in the Curriculum

Curricular change continues to occupy center stage on the nation's campuses. More than 80 percent of responding colleges and universities were currently reviewing the curriculum or had recently done so (see Table 3).

Receiving major emphasis in the reviews that are currently underway are the skills or competencies to be gained from college study (see Figure 2). Almost all of these reviews involved attention to mathematical or computer-related skills (86 percent), writing (86 percent) or such other competencies as communication and reasoning (88 percent).

General education requirements still occupied attention at most institutions (80 percent) although not as widely as last year (87 percent, as reported in *Campus Trends, 1984*). A new area of attention involves issues in science and technology: two-thirds of institutions reported that they currently are looking at such issues as they relate to the curriculum.

Some distinctive differences can be seen between two-year and four-year institutions (see table 3). Half or more of the four-year institutions are currently considering increased attention to international matters and foreign language study. There also is new attention to values or ethics: 61 percent of baccalaure-

FIGURE 2
Areas of Curricular Review, 1985
(Percent currently considering each topic)

ate colleges and 54 percent of universities reported this as a topic currently being discussed. Two-year institutions, in contrast, are giving greater emphasis to career preparation: 65 percent of the two-year institutions are considering ways to give greater curricular attention to career preparation, compared to 45 percent of baccalaureate colleges and 30 percent of universities.

Despite these differences, the general pattern is impressive: widespread review of the curriculum continues, with both two-year and four-year institutions giving special attention to the general education component of the curriculum and the skills or competencies that students should acquire through their studies.

Changes in Enrollment

Most of the information on enrollment changes among America's colleges and universities is reported either for the nation as a whole or for a particular institution. The national picture in recent years has been one of relative stability: overall enrollment from 1981 to 1984 has remained at about 12.4 million students.

The information shown in table 4 gives another view: this shows the pattern of change over the last four years by type of institution and by various characteristics of students. Two general observations seem appropriate:

First, despite little enrollment change in the aggregate, a good many colleges have experienced major changes in their enrollment. About 4 in 10 institutions reported significant changes over four years, a relatively short period of time for monitoring enrollment change. As expected, the most notable changes involved shifts away from full-time stu-

dents and toward part-time and older students. Also striking is the evidence of significant increases in commuter students and foreign students, as reported by about one in five institutions.

For baccalaureate colleges, the most striking change was in part-time students: close to half (45 percent) reported significant increases in part-time enrollment (see figure 3) and 33 percent reported significant increases in commuter students.

Second, American higher education remains remarkably diverse. For each student characteristic, some colleges reported net gains while others reported net decreases. Among two-year institutions, for example, where the dominant trends involve increasing part-time and older students, at least one-third of these institutions reported significant increases in full-time students over the past four years. So too, although 1 in 5 baccalaureate colleges and universities reported significant decreases in full-time students, as many as 32 percent of baccalaureate colleges and 25 percent of universities reported significant gains in full-time enrollment.

Interesting, too, in this regard, are the changes that were reported in the academic ability of entering students: although 12 percent of all institutions reported significant erosion, another 21 percent said they had experienced significant gains.

It is difficult to interpret the study's results regarding hispanic and black students (see table 4), in light of reports that minority enrollment has decreased recently. Results here show that a small proportion of institutions (14 percent) made gains in minority enrollment over the four-year period while only a few experienced decreases. Because the survey sought information for a four-year period, results may understate recent experience.

FIGURE 3
Colleges Reporting Increased
Part-time Enrollment
Over the Past Four Years

Changes in Faculty

The study's results regarding faculty hiring practices also reflect a diversity of experience among colleges and universities. Fully 21 percent of institutions reported a net loss in faculty positions compared to a year earlier. This represents a very sizeable decline. The contrast is also striking, however: 32 percent of colleges reported no change and almost half (48 percent) reported a net gain in faculty positions. These net gains were reported by higher percentages of baccalaureate colleges and universities than by two-year institutions (figure 4). This may reflect the special budgetary pressures felt by many two-year institutions recently.

Most colleges hired new faculty during 1984-1985, and were about as likely to hire faculty in term or contract positions as in tenure-track positions (see Table 5). There also is an extensive use of part-time faculty: 39 percent of institutions reported that part-time faculty were used in more than one-fourth of courses. This was true of only 24 percent of baccalaureate colleges and 22 percent of universities, however, in contrast to 55 percent of two-year colleges.

About 1 in 4 institutions reported that they had retrenchment procedures underway to cut back on the number of faculty (see Table 5). As another strategy, close to half of the institutions said they had procedures to retrain faculty for changing program needs; this was especially typical at two-year institutions (reported by 52 percent), compared to baccalaureate

colleges (29 percent) and universities (42 percent).

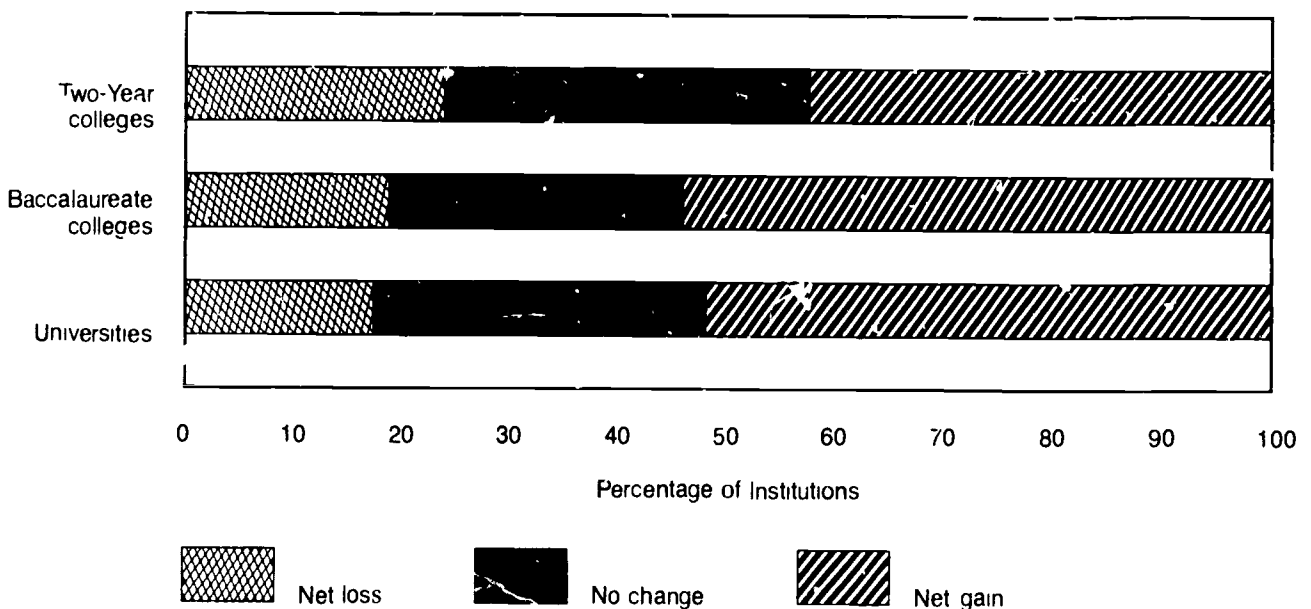

Table 6 reflects changes in the profile of faculty due to the cumulative impact of hiring practices over the past five years. Part-time faculty have increased, especially at two-year institutions. Some increases in full-time faculty are also noted, more so at baccalaureate colleges than at other types of institutions.

Notably, about 1 in 5 institutions reported gains in the representation of women faculty during the last five years (see Table 6). However, very modest progress was reported in improving the percentage of minority faculty: only 12 percent of institutions reported any gains. In fact, the figures for baccalaureate colleges show almost as much erosion in the representation of minority faculty (5 percent) as gain (8 percent) during the last five years.

In view of the rising average age of college faculty today, there has been concern that older faculty will be reluctant to retire and, in particular, will increasingly opt to stay on until age 70 or beyond. This survey suggests that there has been no significant change in this regard as of mid-decade: only 6 percent of institutions reported an increase in the number of faculty over the age of 65; another 7 percent of institutions reported a significant decrease in the percentage of their faculty who are over 65. It can be noted, however, that 10 percent of universities reported a significant increase in the number of faculty over 65.

Table 7 shows expected changes in faculty over the next five years, differentiated by broad subject areas.

FIGURE 4
Change in Faculty Positions
Compared to a Year Earlier

A predictable pattern emerges: more than half of the nation's colleges and universities expect to see significant increases in their faculty in computer and information sciences (including 73 percent of universities), and about 4 in 10 expect significant increases in business faculty. Notably, half of baccalaureate colleges expect an increase in business faculty, a proportion that is higher than that given by other institutions.

Relatively few other subject areas are mentioned as likely to experience significant faculty growth. This may reflect the difficulties of making such predictions by subject area. Two other areas—engineering and mathematical sciences—were mentioned by more than one-quarter of universities. Vocational-technical fields were mentioned by about 3 in 10 two-year institutions. The health professions were mentioned by 16 percent of institutions.

Administrative Policies and Practices

Figure 5 summarizes responses regarding a number of administrative practices used by academic institutions today. The survey findings attest to a general move on the nation's campuses toward systematic planning and procedures. Thus, as of 1985, almost all of the nation's colleges and universities have procedures in place for long-range planning (87 percent) and for program review (83 percent). Regular monitor-

ing of student attrition is also widespread (86 percent). More than half of the institutions have also developed procedures for systematic faculty planning, which may involve analysis of expected changes in faculty hiring, tenure rates, retirements, or other matters.

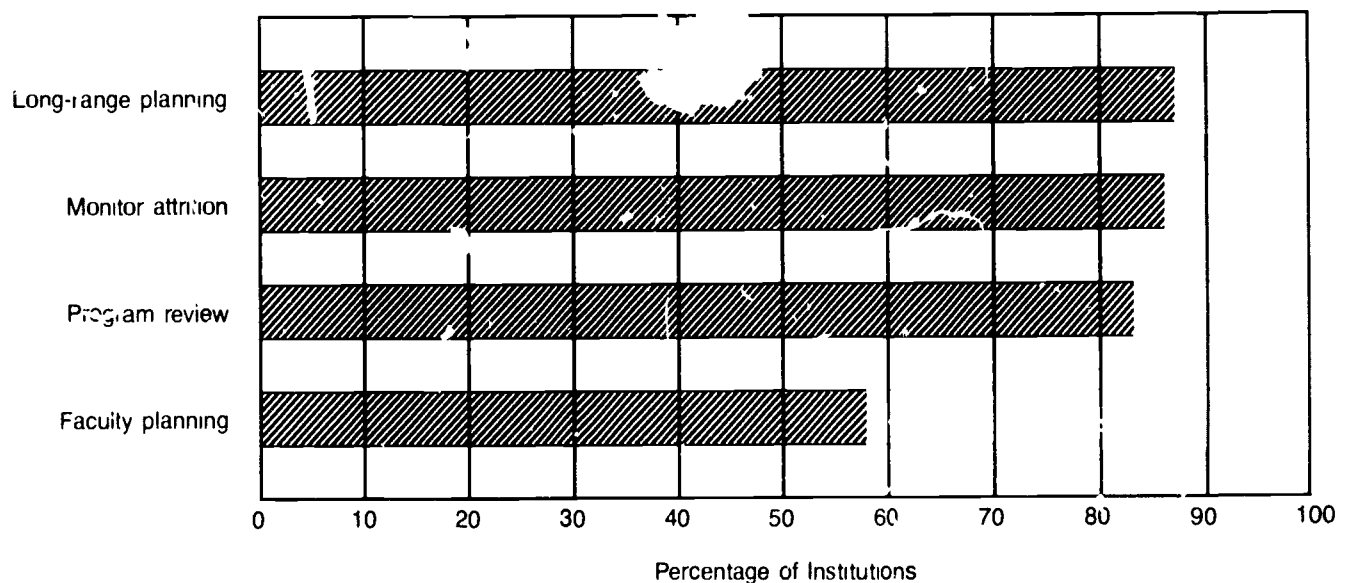

Notably, close to half of the nation's colleges and universities have at some time completed an analysis of the economic impact of their institution on their state or surrounding community (see Table 8). This was particularly so for universities (57 percent) and two-year institutions (45 percent) and less true of baccalaureate colleges (37 percent did so).

Campus use of personal computers appears to be growing. As Table 8 shows, close to half of colleges and universities now offer writing courses that are based on microcomputer use. In contrast, very few institutions—5 percent, overall—require all students to have microcomputers.

Questions were also asked about current practices in making appointments in academic administration. As Table 9 shows, about half of the institutions appoint their academic deans or provosts to a stated term of appointment, usually involving one year. Almost all such positions are subject to formal performance evaluation. About half of the institutions offer sabbatical leave for such positions.

There were differences across institutions on the issue of whether tenure can be granted when persons new to the institution were appointed as academic dean or provost. Among universities, more than half

FIGURE 5
Administrative Practices of
Colleges and Universities, 1985

14

(55 percent) have such a practice. In contrast, only 1 in 10 baccalaureate colleges or two-year colleges have such a practice.

Ties with Business and Industry

Among the nation's colleges and universities, almost all have formal links with the corporate community (see Table 10). Fully 85 percent of these institutions have joint meetings or advisory panels that include corporate officials. Most (75 percent) also have programs by which equipment is loaned, donated or shared between the college and corporations. Scholarship or loan programs were another very typical form of collaboration, reported by 63 percent of colleges and universities. Also, 65 percent of the universities reported that they received financial support from business and industry for research.

A substantial degree of activity also takes place in other, less traditional modes of cooperation. As figure 6 shows, about two-thirds of these institutions offered courses for business employees on company premises; this practice is especially strong at two-year institutions. Jointly developed degree or certificate programs are also offered at a significant number of colleges: 49 percent of two-year institutions had such programs, as did 34 percent of baccalaureate colleges and 21 percent of universities.

Questions were also asked about collegiate participation in partnerships involving the business community (see Table 10). Close to half of the institutions reported participation in such partnerships to foster state or regional economic development; this

was especially true of two-year institutions and universities. About 4 in 10 of these institutions reported that they were active in partnerships with the business community to assist the high schools in their area.

Opinions on Institutional Status

The survey also included several questions asking about the direction of each college's experience on a variety of student, faculty and other matters. Taken together, these responses offer a general view of the institution's status. While the responses are the opinions of academic administrators and probably not based on precise information, they nevertheless offer a valuable benchmark for assessing certain issues affecting higher education today.

The results are summarized in Table 11. Most significant, perhaps, are the areas where large percentages of colleges and universities reported improvements. These include:

	<u>Percent with gains</u>
● Adequacy of academic computer equipment	83 percent
● Ability to attract good students	59 percent
● Job prospects for degree recipients	55 percent
● Ability to serve disabled students	54 percent

Improvements in the availability of academic computer equipment appear to be the most widespread. Similar percentages reported such improvements across types of institutions. Improvements in the abil-

FIGURE 6
Colleges Offering Credit Courses
on Business Premises, 1985

ity to serve disabled students are also notable, although baccalaureate colleges appear to trail behind other types of academic institutions.

Improvements in a college's ability to attract good students were reported rather uniformly across institutions. In view of the continuing problems that occur with the weak preparation levels of entering students (as mentioned below), it is possible that responses on this question reflect administrative improvements in recruiting students as much as they reflect actual changes in the qualifications of entering students.

The areas where the fewest institutions reported improvements are also worth highlighting:

	<u>Percent with gains</u>
● General preparation level of entering students	31 percent
● Ability to attract minority students	33 percent
● Adequacy of library resources	38 percent
● Adequacy of student aid	40 percent

For each of these areas, between 8 percent and 17 percent of institutions also reported that their circumstances were significantly worse today compared to several years ago.

Faculty compensation is another area in which results are troubling: only 45 percent of institutions reported that the level of faculty compensation was better today than several years ago (see Table 11). Another 15 percent reported that faculty compensation was worse and the others—fully 40 percent of institutions—reported no change. In view of the fact that levels of faculty compensation have not kept up with inflation throughout the last decade, the in-

ability of most institutions to make improvements in this area should be cause for serious concern. This problem appears to be particularly acute among baccalaureate colleges, where only 36 percent reported any improvement and 16 percent said that faculty compensation was worse than several years ago.

Summary

This survey of current policies and practices in academe offers a mixed picture: campuses are giving major attention to curriculum reform, expect growing activity in engineering, business and computer-related areas, and have increasingly widespread ties with business and industry. Colleges and universities have taken a number of steps to manage their internal operations wisely in a time of difficult budgetary constraints: long-range planning, monitoring of student attrition, and program review have become common practice. Part-time faculty and nontenured, term appointments have been used rather widely, apparently to gain staffing flexibility. A good number of colleges and universities have also developed programs to retrain faculty in response to changing program needs.

Several problems continue to be of concern, a major one being the weak levels of preparation of entering students. Problems in attracting minority students appear to be a growing concern. Financial problems also remain, especially with regard to faculty compensation, library resources, and student aid.

The nation's colleges and universities will be trying to meet these challenges throughout the rest of this decade. It is hoped that the series of Campus Trends surveys, to be repeated annually, will help document the changes that will be taking place

DETAILED STATISTICAL TABLES

Readers should note that some percentage distributions in the following tables may not total to 100 because of weighting and rounding.

APPENDIX A: SURVEY INSTRUMENT

AMERICAN COUNCIL ON EDUCATION

Higher Education Panel

May 30, 1985

Dear Higher Education Panel Representative:

Attached is Higher Education Panel Survey No. 71, sponsored by the American Council on Education. This is the second in a series of annual surveys designed to obtain general information on campus trends. The questionnaire elicits information on recent or pending changes in a variety of institutional policies and practices affecting faculty, the curriculum, and other areas.

This questionnaire does not seek numerical responses. It asks general questions or seeks opinions about changes in academic policies. The survey should be completed by the academic vice president or, if that is not possible, by another high-level official with a broad view of the institution.

Please understand that your institution's responses will be held in strict confidence. As with all our surveys, the data you provide will be reported in summary fashion only and will not be identified with your institution.

Please return the completed questionnaire by July 15, 1985. A preaddressed envelope is enclosed for your convenience. If you have any questions or problems, please do not hesitate to telephone us collect at 202/833-4757.

Sincerely,

Elaine El-Khawas

Elaine El-Khawas
Acting Panel Director

Attachment

One Dupont Circle, Washington, D C 20036-1193 (202) 833-4757

CAMPUS TRENDS 1984-85

You will note that this questionnaire does not seek numerical responses; it asks a series of general questions and seeks your opinions about policies and practices at your institution. Please answer the following questions with respect to 1984-1985.

I. CURRICULUM

A. Is a general review of curriculum underway or has one recently been completed?

- No
- Yes, currently underway
- Yes, completed within the last few years

If "yes" does it include:

	<u>Yes</u>	<u>No</u>
1. New general education requirements	<input type="checkbox"/>	<input type="checkbox"/>
2. Greater emphasis on writing	<input type="checkbox"/>	<input type="checkbox"/>
3. Greater emphasis on other competencies (communication, reasoning, etc.)	<input type="checkbox"/>	<input type="checkbox"/>
4. An increase in course requirements	<input type="checkbox"/>	<input type="checkbox"/>
5. Greater flexibility for adult learners	<input type="checkbox"/>	<input type="checkbox"/>
6. Increased attention to international matters	<input type="checkbox"/>	<input type="checkbox"/>
7. New attention to foreign language study	<input type="checkbox"/>	<input type="checkbox"/>
8. New attention to issues in science and technology	<input type="checkbox"/>	<input type="checkbox"/>
9. Greater attention to career preparation	<input type="checkbox"/>	<input type="checkbox"/>
10. Greater emphasis on mathematical or computer-related skills	<input type="checkbox"/>	<input type="checkbox"/>
11. More multidisciplinary or "theme" courses	<input type="checkbox"/>	<input type="checkbox"/>
12. New attention to values or ethics	<input type="checkbox"/>	<input type="checkbox"/>
13. New approaches to teacher education	<input type="checkbox"/>	<input type="checkbox"/>

B. Several national reports have called for changes in undergraduate education. Is your institution following any of the recommendations listed below?

	<u>Already in Place</u>	<u>Under Discussion</u>	<u>No</u>
From NIE's <u>Involvement in Learning</u>:			
1. Emphasize the freshman year	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Emphasize analysis, communication, synthesis and problem solving	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Use "active" modes of learning	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Make systematic assessment of student learning	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Require two years of liberal arts courses for all bachelor's degrees	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
From AAC's <u>Integrity in the Classroom</u>:			
1. Improve curriculum structure by stressing areas of instruction	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Deemphasize and change the academic major	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Prepare graduate students for college teaching	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Develop better measures of student progress	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Give equal importance to teaching and research for faculty	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

From NEH's To Reclaim a Legacy:

	<u>Already in Place</u>	<u>Under Discussion</u>	<u>No</u>
1. Give humanities and Western civilization a central place in the curriculum	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Make a clear statement of what knowledge is essential to a good education	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Use original texts in humanities courses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Have the best faculty teach core courses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Develop an integrated sequence of humanities courses	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

From NCETE's A Call for Change in Teacher Education:

	<u>Already in Place</u>	<u>Under Discussion</u>	<u>No</u>
1. Impose rigorous admission and graduation standards for teacher education programs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Develop special minority recruitment programs in teacher education	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Develop experimental teacher education programs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Assign sufficient resources to teacher education	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Make teacher education a campus-wide responsibility	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

C. Has the reaction to the reports at your institution included any of the following?

	<u>Yes</u>	<u>Planned</u>	<u>No</u>
1. Task force or committee to review the report(s)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Discussion of the reports:			
a. in faculty meetings	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. among senior administrators	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. with the board of trustees	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. in specially convened meetings	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Changes in academic programs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Changes in student services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Changes in research and assessment of students	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

II. FACULTY

- | | <u>Yes</u> | <u>No</u> |
|---|--------------------------|--------------------------|
| A. Were any new full-time academic hired in academic year 1984-85 in: | | |
| 1. tenure-track positions | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. term or contract positions | <input type="checkbox"/> | <input type="checkbox"/> |
| B. Compared to a year earlier, was there: | | |
| <input type="checkbox"/> A net <u>loss</u> in faculty positions | | |
| <input type="checkbox"/> A net <u>gain</u> in faculty positions | | |
| <input type="checkbox"/> No change in faculty positions | | |
| C. Was extensive use made of part-time faculty (i.e., for more than about one-fourth of courses)? | <input type="checkbox"/> | <input type="checkbox"/> |
| D. Do you have procedures to retrain faculty for changing program needs? | <input type="checkbox"/> | <input type="checkbox"/> |
| E. Do you have retrenchment procedures underway (to cut back on the number of faculty)? | <input type="checkbox"/> | <input type="checkbox"/> |
| F. How has your institution changed over the past five years in the: | | |

- | | <u>Significant Increase</u> | <u>No Significant Change</u> | <u>Significant Decrease</u> |
|---|-----------------------------|------------------------------|-----------------------------|
| 1. Size of full-time faculty | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Size of part-time faculty | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Percentage of eligible faculty being awarded tenure | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Percentage of faculty on non-tenure track contracts | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Percentage of full-time faculty that are women | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Percentage of full-time faculty that are minorities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. Number of full-time faculty continuing beyond age 65 | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

G. What changes do you expect in the next five years in the number of faculty in.

- | | <u>Significant Increase</u> | <u>No Significant Change</u> | <u>Significant Decrease</u> |
|--|-----------------------------|------------------------------|-----------------------------|
| 1. Arts and humanities | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Foreign languages | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Social sciences | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Biological and physical sciences | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Computer science or information science | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Engineering (exclusive of computer science) | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. Mathematical sciences | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. Health professions | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. Business | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. Teacher education | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. Vocational-technical fields | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

III. ENROLLMENT

How has your institution's enrollment changed over the past four years regarding:

- | | <u>Significant Increase</u> | <u>No Significant Change</u> | <u>Significant Decrease</u> |
|---------------------------------|-----------------------------|------------------------------|-----------------------------|
| 1. Full-time students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. Part-time students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Black students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Hispanic students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Commuter students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Out-of-state students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. Foreign students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. Median age of students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. Academic ability of students | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. Family ability to pay | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 11. Average class size | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

IV. ADMINISTRATIVE PRACTICES AND PLANNING

A. For academic administrative appointments (e.g. dean, provost), does your institution generally:

- | | <u>Yes</u> | <u>No</u> |
|---|--------------------------|--------------------------|
| 1. Make appointments with a stated term | <input type="checkbox"/> | <input type="checkbox"/> |
| If yes, term is: | | |
| <input type="checkbox"/> one year | | |
| <input type="checkbox"/> two or three years | | |
| <input type="checkbox"/> four years or more | | |
| 2. Allow tenure to be granted on appointments of persons new to the institution | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Periodically conduct a formal performance evaluation | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. Offer sabbatical leaves | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Have a budget to support professional development of administrators | <input type="checkbox"/> | <input type="checkbox"/> |

B. Does your institution have:

- | | <u>Yes</u> | <u>No</u> |
|---|--------------------------|--------------------------|
| 1. An ongoing long-range planning activity | <input type="checkbox"/> | <input type="checkbox"/> |
| 2. An ongoing formal process of program review | <input type="checkbox"/> | <input type="checkbox"/> |
| 3. Procedures for systematic faculty planning (that looks to expected changes in hiring, tenure rates, retirements, etc.) | <input type="checkbox"/> | <input type="checkbox"/> |
| 4. A collective bargaining agreement covering the faculty | <input type="checkbox"/> | <input type="checkbox"/> |
| 5. Regular monitoring of student attention rates | <input type="checkbox"/> | <input type="checkbox"/> |
| 6. Foundation funds to improve undergraduate education | <input type="checkbox"/> | <input type="checkbox"/> |
| 7. An analysis of the institution's economic impact on its state or community | <input type="checkbox"/> | <input type="checkbox"/> |
| 8. A budgeted position (at least half-time) devoted to instructional improvement | <input type="checkbox"/> | <input type="checkbox"/> |
| 9. Writing courses taught with microcomputers | <input type="checkbox"/> | <input type="checkbox"/> |
| 10. A requirement that all students have microcomputers | <input type="checkbox"/> | <input type="checkbox"/> |

Continued next page

V. BUSINESS & INDUSTRY

A. Does your institution have formal ties with business or industry in your area?

- Yes
 No

If "yes," do these involve.

	<u>Yes</u>	<u>Planned</u>	<u>No</u>
1. Shared or on-loan staff	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Equipment (donations, loans, or shared use)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Credit courses for business employees at business locations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Noncredit courses for business employees at business locations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Scholarship or loan programs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Joint meetings or advisory panels	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Jointly developed and sponsored degree (or certificate) programs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Partnerships designed to assist high schools	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Partnerships for state or regional economic development	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Corporate financial support of research	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

VI. OPINIONS OF CHANGE

A. Compared to several years ago, how would you rate the following?

	<u>Better</u>	<u>Same</u>	<u>Worse</u>
1. Ability of your institution to attract good students	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Ability of your institution to attract minority students	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. General level of preparation of your institution's entering students	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4. Ability of your institution to meet the needs of disabled students	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5. Job prospects for this year's degree recipients from your institution	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Ability of your institution to attract and hold good faculty	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Overall level of faculty morale at your institution	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Quality of faculty-administrator communications	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Adequacy of faculty compensation at your institution	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Adequacy of student aid provided by your institution, including scholarships, fellowships, and loans	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
11. Ability of your institution to respond to enrollment shifts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12. Adequacy of academic computer equipment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
13. Adequacy of other equipment for teaching and research	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
14. Adequacy of library resources at your institution	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Higher Education Panel
 American Council on Education
 One Dupont Circle, N.W.
 Washington D.C. 20036

Name of Respondent _____

Title _____

Department _____

Telephone (_____) _____

If you have any questions concerning this survey, please call the HEP staff collect at (202) 833-4757.

APPENDIX B: TECHNICAL NOTES

Data from the responding Panel institutions were statistically adjusted to represent all of the nation's colleges and universities except specialized and religious institutions (such as rabbinical seminaries). The stratification design for weighting follows.

The weighting technique used was the standard one employed for Panel surveys. Data received from Panel members were adjusted for item and institutional nonresponse within each cell. Then institutional weights were applied to bring the Panel data up

to estimates that are representative of the national population.

Table B-2 compares survey respondents and non-respondents against several variables. Response rates were generally even across institutions. Higher-than-average response rates were recorded for private baccalaureate institutions. Response rates for public baccalaureate colleges and private universities were somewhat lower than average.

TABLE B-1:—Stratification Design

Cell	Type of Institution	Enrollment	Population	Respondents
	Total		2,623	398
1	Large public doctorate-granting	a	104	47
2	Large private doctorate-granting	a	60	20
3	Large public comprehensive	a	92	39
4	Large private comprehensive	a	27	11
7	Large public two-year	a	43	19
8	Public comprehensive	5,500–8,999	56	17
9	Public comprehensive	<5,500	108	21
10	Private comprehensive	<9,000	126	21
11	Public baccalaureate	<9,000	127	17
12	Private baccalaureate	1,350–8,999	166	26
13	Private baccalaureate	<1,350	446	32
17	Public 2-year academic/comprehensive	6,000–8,999	55	16
18	Public 2-year academic/comprehensive	4,000–5,999	72	17
19	Public 2-year academic/comprehensive	2,000–3,999	155	21
20	Public 2-year academic/comprehensive	<2,000	333	23
21	Private 2-year academic/comprehensive	<9,000	129	12
22	Public two-year occupational	2,500–8,999	63	15
23	Public two-year occupational	<2,500	221	16
24	Private two-year occupational	<9,000	240	8

*Institutions that meet one or more of the three following criteria (a) total full-time equivalent (FTE) 1961 enrollment greater than 8,999. (b) FTE 1981 graduate enrollment greater than 749 (c) FY 1979 educational and general expenditures of \$35 million or more

**TABLE B-2:—Comparison of Respondents and Nonrespondents
(In percentages)**

Control and Type of Institution	Respondents (N = 398)	Nonrespondents (N = 70)	Response Rate
Total	100.0	100.0	85.0
Control			
Public	67.3	59.3	88.4
Private	32.7	40.7	84.4
Type and Control			
Public University	31.2	23.7	89.9
Private University	13.1	23.7	78.8
Public Baccalaureate	4.3	8.5	77.3
Private Baccalaureate	14.6	10.2	90.6
Public Two-Year	31.9	27.1	88.8
Private Two-Year	5.0	6.8	83.3
