ABSTRACT

The report presents information on characteristics affecting supply and demand of special education professional personnel in Michigan public schools. Five sections address the following topics: (1) instructional-ancillary personnel and student counts (staffing and comparison of staff with student counts, personnel and student ratios for school year 1984-85); (2) personnel attrition and retention rates (number of staff assigned from 1977-78 through 1983-84 still in special education assignments in 1984-85); (3) certificate endorsements 1978 through 1985 (endorsements for instructional-ancillary personnel recommended by teacher training institutions in 1984-85); (4) instructional personnel approvals from 1979 through 1985 still in special education assignments in 1984-85 (recommendations for teacher approvals from 1979 through 1985); and (5) administrative-supervisory personnel and student count (recommendations for administrator approvals received from 1979 through 1985 and a comparison of administrative staff with student counts). Fifteen data tables are contained in the text. A glossary of terms and a map of special education services planning regions are attached. (CL)

SPECIAL EDUCATION PROFESSIONAL PERSONNEL IN MICHIGAN SCHOOLS
1977 through 1985

Introduction

The Michigan Department of Education (MDE) has developed a number of personnel reports over the years. This compilation is a continuation of these previous investigations that deal with characteristics that affect the supply and demand of special education professional personnel in Michigan public schools. In completing this report, some information from previous reports was used.

The report is divided into five sections, with specific information addressed under each.

Section I: Instructional-Ancillary Personnel and Student Counts

- A. Staffing of special education instructional-ancillary personnel and ancillary personnel and comparison of staff with student counts.
- B. Instructional and ancillary personnel in 1984-85 distributed by age, by assignment, by educational attainment and by region.
- C. Personnel and student ratios for school year 1984-85.
- D. Instructional and ancillary personnel newly assigned in special education in 1984-85.
 1. Number of staff newly assigned who were newly graduated or with zero years of teaching experience.
 2. Number of staff newly assigned who had one or more years of teaching experience.

Section II: Personnel Attrition and Retention Rates

- A. Number of staff assigned in school years 1977-78 through 1983-84 still in special education assignments in 1984-85 and number of staff no longer in special education assignments.
- B. Cumulative attrition or retention rates for instructional and ancillary personnel, by certificate endorsement area, for school years 1977-78 through 1984-85.

Section III: Certificate Endorsements, School Years 1978 through 1985.

- A. Endorsements for instructional-ancillary personnel recommended by the teacher-training institutions in 1984-85.
- B. Comparison of 1984-85 staff with those of previous years.

Section IV: Instructional Personnel Approvals: 1979 through 1985

- A. Recommendations for teacher approvals received by Special Education Services from 1979 through 1985.
- B. Number of recommendations that were granted as temporary approvals, continuing approvals, and emergency approvals.

Section V: Administrative-Supervisory Personnel and Student Count

- A. Administrators and supervisors employed in special education in school year 1984-85 and the number of those employed in school years 1977-78 through 1983-84 still in special education administrative assignments in 1984-85.
- B. Recommendations for administrator approvals received by Special Education Services from 1979 through 1985 and a comparison of administrative staff with student counts.

Limitations of the Data

In determining the number of special education personnel, the following were not considered due to resource and time constraints:

1. Number of qualified special education personnel who are available but not registered as potential personnel;
2. Number of special education professional personnel in nonpublic schools;
3. Number of available and qualified substitute teachers;
4. Number of other special education personnel, both professional and paraprofessional, such as work study coordinators, curriculum resource consultants, physical education teachers, etc.

The report is limited to the manipulation of data on prior and currently employed special education professional personnel, on personnel with special education certificate endorsements, and on those granted special education temporary or emergency approvals for special education assignments. The quantitative characteristics of numbers were utilized to reflect comparative tendencies of the specified variables.

Procedures

The report analyzed data on special education professional personnel as they relate to such factors as age, educational attainment, teaching experience, certificate endorsement area and supply. Computer tape copies of the Michigan Professional Personnel Register (MPPR) and the Teacher Certification Master File (TCMF) compiled by the Teacher Preparation and Certification Services for school years 1977-78 through 1984-85 were used as data bases. These data sources contain descriptive information on employed professional personnel with special education assignments in the state's public schools: basic classroom teachers and/or teacher consultants for the mentally impaired, POHI, emotionally impaired, visually impaired, hearing impaired, and learning disabled; teachers of the speech and language impaired; school social workers, school psychologists; occupational/physical therapists; and directors and supervisors. Records on personnel emergency and temporary approvals maintained by the Special Education Services office were also used to gauge availability of personnel supply. Special education reports generated from SE-4568 data were used in determining unduplicated student head counts.

To assure that information collected through a number of MDE data gathering forms were valid for the specific purposes of this report, different codes of the same terms were reconciled for consistency of meanings across these forms: TE-4290, DS-4096, and DS-4061 for personnel information, and SE-4568 for student statistics by age and disability category. Corresponding personnel groupings such as directors and supervisors (Administrators) and classroom teachers and teacher consultants (e.g., teachers and teacher consultants for LD, EMI, POHI, etc.) were determined to better reflect more meaningful information. Data tables and charts include areas of certificate endorsements with corresponding Special Education and Teacher Certification codes to facilitate review. Terms used are defined in Attachment A. Specific alpha and numeric codes are likewise included in the Attachment.

To determine personnel supply, data concerning employee attrition and hiring were compared with those of special education student counts over an eight-year period. Personnel totals were compared with student unduplicated counts (SE-4568) statewide and by region to show student to staff ratios.

Personnel totals were determined by a computer run of Department data based on form TE-4290. Social security numbers of personnel were compared over time to identify employees who were newly assigned or reassigned to special education. Incidences of non-reassignment were considered indications of attrition. Causes of attrition were not investigated.

EXPLANATION OF DATA

Section I: Instructional-Ancillary Personnel and Student Counts

Staffing of special education instructional and ancillary personnel and comparison with student counts.

Table 1 shows totals of instructional and ancillary personnel employed over an eight-year period, from school years 1977-78 through 1984-85. Although the numbers of employed personnel with Learning Disabled (SM) certificate endorsements increased significantly over the years studied, there were more personnel with mentally impaired certificate endorsements, 3,496 or 32.3% of totals for 1977-78 and 3,449 or 27.5% for 1984-85. The gradual increase of aggregated personnel totals stopped in 1981-82, but began to increase again in 1983-84. Data do not include special education personnel in nonpublic/parochial schools and other special education-assigned professionals such as work study coordinators, curriculum resource consultants, physical education teachers, etc.

Table 1-a and Chart 1 compare staffing and student enrollment patterns. Using the 1977-78 levels as the base for comparison, Chart 1 shows levels of increases of 1,733 or 16% of personnel and 11,787 or 7.6% of students for school year 1984-85. Percentages of increase were more for personnel in relation to corresponding student enrollment increases. The percentage of personnel increase for 1984-85 exceeds the percentage of increase in student counts.

Instructional and ancillary personnel in 1984-85 distributed by age, by assignment, by educational attainment, and by region.

Tables 2 and 2-a present a limited profile of instructional and ancillary personnel employed in school year 1984-85. As in the preceding tables, personnel with certificate endorsements in mentally impaired exceeded those of other endorsements: 3,449 or 27.5% of the total 12,552 employed for the year. Of this total, 9,954 or 79% were females; 6,047 or 48% belong to the 31-40 age group; 7,193 or 57% completed Master's degrees; and 4,884 or 39% were assigned to provide instructional services to handicapped students Pre-K through Grade 12. One percent or 113 were assigned to do administration-related functions.

Table 3 shows the school year 1984-85 employment by region. It indicates that 5,605 or 44.7% of the total 12,552 were employed in Region V, where there is the most concentration of handicapped students. Region I has the least number of instructional personnel, 361 or 2.9% of the state total. Of the total 12,552 personnel employed, 429 or 3.4% had SL (hearing impaired) certificate endorsements.

Attachment B is a state map with the five special education planning regions delineated.

Personnel-Student Ratios, 1984-85

Personnel and student counts were reviewed to determine staff to student ratios.

Table 4 shows personnel-student ratios that include all instructional/ancillary personnel and all handicapped students. The overall average ratio is 1 employee to 13.3 students. This ratio is provided to allow geographical comparisons for planning purposes. It is not intended to reflect the actual level of service as it does not include all staff or provide data on students receiving multiple services.

Instructional and ancillary personnel newly assigned in special education in school year 1984-85.

Social security numbers of personnel were compared to determine instructional and ancillary personnel newly assigned in special education for given years. These additional personnel were either newly graduated and newly employed by the districts in special education or previously assigned in a nonspecial education assignment and newly assigned in special education. Data indicate an increase in personnel in school year 1984-85: 262 or 21.2% more than the 1983-84 total.

Table 5 reflects state totals on increase or decrease of personnel newly assigned in special education over the eight-year period from 1977-78 through 1984-85. The table shows that there were 262 or 21.2% more teachers newly assigned in special education in school year 1984-85 than there were in 1983-84. Of the 1,498 additional teachers in 1984-85, 350 or 23.4% had endorsements to teach the mentally impaired.

Tables 6 and 6-a present a limited profile of beginning or newly graduated instructional and ancillary personnel newly assigned in special education in school year 1984-85. Of the total 452 personnel, 402 or 88.9% were females, and 176 or 38.9% were assigned to provide programs/services to handicapped students in all Grades.

Tables 7 and 7-a present a limited profile of experienced instructional and ancillary personnel newly assigned in special education in school year 1984-85. Of the total 1,047, 876 or 83.7% were females, and 29 or 2.8% were assigned to provide programs and services to handicapped students in the Pre-K to K level. The mean age of the beginning teachers was 30 while that of the experienced group was 36. Reassignment to special education of experienced and older teachers whose regular education assignments were affected by the gradual decreases in student enrollments may be one factor affecting variances in age.

Section II: Retention of Instructional and Ancillary Personnel

Number of staff assigned in school years 1977-78 through 1984-85 still in special education assignments in 1984-85 and number of staff no longer in special education assignments.

A review of the social security numbers of special education teachers was conducted to delineate those who were still assigned from those who were no longer assigned in special education over the eight-year period.

Table 8 shows numbers of instructional and ancillary personnel who remained in special education assignments over the eight-year period. The data indicate the turn-over of personnel: of the 10,819 personnel (Table 1) total for school year 1977-78, 6,754 or 62.4% were still in the same special education assignment in school year 1984-85. Teachers with mental impairment (SA-ST) certificate endorsements make up the largest number of special education personnel.

Cumulative attrition or retention rates for instructional and ancillary personnel for school years 1977-78 through 1984-85.

Table 9 reflects the cumulative retention and attrition patterns of personnel from school years 1977-78 through 1984-85. The figures show that 6,754 or 62.4% of the instructional and ancillary personnel employed in school year 1977-78 were still employed in special education in 1984-85.

Interpretation: Of the 10,819 instructional and ancillary personnel employed in special education for school year 1977-78, 6754 or 62.4% were still in the same special education assignments in 1984-85 and 4065 or 37.6% either left, were reassigned in other areas, or were terminated between school years 1977-78 through 1984-85.

Section III: Certificate Endorsements, School Years 1979 through 1985.

Endorsements for instructional and ancillary personnel recommended by the teacher-training institutions in 1984-85 and how this number compared with those of previous years.

To better assess the available supply of personnel, the numbers of recommendations for certificate endorsements over a six-year period were determined.

Tables 10 and 10-a show numbers of certificate endorsements recommended by teacher-training institutions for approval by the Department of Education. Table 10 reflects actual numbers of initial provisional certificates approved over a six-year period. Figures for school year 1981-82 indicate a slight increase (5%) over the previous year; however, there have been significant decreases in all endorsement categories over the last three years.

Table 10-a shows a total of 678 endorsements recommended by Michigan teacher-training institutions. Eastern Michigan University submitted the most number: 167 or 24.6% of totals. Of the grand total of 819, 17.2% or 141 were recommended for approval by teacher-training institutions in other states. Of the total 270 recommendations for the SA-ST endorsement, 210 or 77.8% were from Michigan universities and colleges.

In assessing numbers of certificate endorsements, no investigation has been done to determine the implications of such factors as the following: (a) possibility of multiple counting of teachers because of multiple endorsements on their teaching certificates; and (b) differences and possible duplications in the definitions of terms used by Teacher Certification Services on one hand and Special Education Services on the other.

Table 10-a is a presentation of information for 1984-85 available as of 10-4-85.

Section IV: Instructional Personnel Approvals: 1979 through 1985

Recommendations for teacher approvals received and approved by Special Education Services from 1979 through 1985 and the number that were granted temporary, continuing, or emergency approvals.

Table 11 presents aggregate numbers of classroom teacher approvals granted by Special Education Services over the six years covered by the study. Tables 11-a through 11-f reflect in more detail teacher approvals granted by Special Education Services from 1979 through 1985.

Tables 12 and 12-a likewise present aggregated numbers of teacher consultant approvals by category and by year.

Decreases:	-65	-136	-6	-157	-21
	(-7%)	(-16%)	(-1%)	(-22.1%)	(-3.8%)

Interpretation: The above table indicates that the greatest number of teacher consultant approvals are for teachers of the learning disabled and the least for teachers of the visually impaired. Approvals have decreased over the six-year period.

(-15%)	(-43%)	(-12%)	(-29%)	(+90%)

Interpretation: The above table indicates that the greatest number of emergency teacher consultant approvals was in the area of learning disabled. With the exception of 1984-85, emergency approvals have decreased every year.

Section V: Administrators-Supervisors and Student Counts

Administrators and supervisors employed in special education in school year 1984-85 and the number of those employed in school years 1977-78 through 1983-84 still in special education administration/supervisory assignments in 1984-85.

Table 13 shows actual counts of special education administrators (Directors --AR, Supervisors --AY) for school year 1984-85. The 437 total reflects an increase of 1 or 0.2% over the previous year's total of 436. The number of female administrators (156 or 35.7% of total for year) represents an increase over last year's 151 or 35%. Four hundred twenty-eight of the administrators or 97.9% had Master's degrees or higher.

Table 14 combines the administrator and supervisor counts. It presents administrator counts by year, compares each year totals with previous years, and delineates numbers of those who remained in or left special education administrative assignments. Line A shows 14 or 3.1% less administrators in school year 1983-84 than there were in 1982-83. Line B reflects the degree of administrator turnover: of the 436 employed in 1983-84, 391 or 89.7% were still in special education administrative assignments in 1984-85. Line C depicts a decreasing attrition rate from 33.3% in 1977-78 to 10.3% in 1983-84.

Comparison of administrative staff with student counts and number of recommendations for administrator approvals received by Special Education Services from 1979 through 1985.

Chart 2 shows a comparison of student and administrator counts over a number of years, using school year 1977-78 as the baseline year with a student count of 155,270 and administrator count of 318. Percentages of increase in administrator counts do not seem to closely correlate with increases in student counts.

Tables 15 and 15-a show numbers of administrators (Directors -AR -330 and Supervisors -AY -340) recommended for full and temporary approvals over a six-year period: 1979-80 through 1984-85. Wayne State University has recommended the most number for administrator approvals: 236 (temporary) and 92 (full).

SUMMARY

It is obvious that personnel supply and demand depend upon more factors than were presented in this report. Certain limits on time and other resources have precluded the conduct of a more thorough data collection and analysis.

Since the primary purpose of this report was to present a compilation of relevant data regarding special education personnel employed in Michigan Public Schools, no recommendations have been formulated. It is anticipated that users of the information hereon presented can better determine their use for these data to meet their specific contingencies.

This document has been compiled by Joseph R. Gomez, Jr., Special Education Consultant, Special Education Services. Questions regarding the contents of this study should be directed to Dr. Gomez at (517) 373-8215.

DEFINITION OF TERMS

For the purposes of this report, the following terms were reconciled to assure consistency of meanings across a number of data collection forms. These items, as used in both Special Education Services and Teacher Preparation & Certification Services, are delineated to facilitate data manipulation and analysis. Special Education terms and corresponding coding are used as the primary categories; Teacher Certification terms are combined with the primary categories to which each corresponds.

<u>SPECIAL EDUCATION TERMS USED IN REPORT</u>	<u>CORRESPONDING TEACHER CERTIFICATION TERMS</u>
