ABSTRACT

This report provides statistics on the revenue, expenditure, debt, and financial assets in 1984 of school systems in the United States as a whole, in each state, and in individual school systems having enrollments of 15,000 or more. The data were collected by the United States Census Bureau during its 1984 Annual Survey of Government Finances. The report consists of an introductory text and nine tables. The introduction describes the scope of the Census Bureau's school finance data collection activities, major findings of the 1983-84 survey, and sources and limitations of the data. The first two tables display national totals of public school financial data. Statewide aggregates for general revenue and general expenditure appear in tables 3 and 4 with corresponding percent distributions in tables 5 and 6. Table 7 presents state totals for indebtedness and for cash and security holdings. Table 8 contains financial statistics for 393 public school systems (including some community and junior college systems) with enrollments greater than 15,000. Per pupil amounts for these systems are presented in table 9. (PGD)

INTRODUCTION

The U.S. Census Bureau conducts an Annual Survey of Government Finances as authorized by law under Title 13, United States Code, Section 182. The 1984 survey, similar to other annual surveys and Census of Governments conducted for many years, covers the entire range of governmental finance activities—revenue, expenditure, debt, and assets.

The 1984 Governmental Finance Series (series GF84) contains 8 parts: No. 1, *State Government Tax Collections in 1984*; No. 2, *Finances of Employee-Retirement Systems of State and Local Governments in 1983-84*; No. 3, *State Government Finances in 1984*; No. 4, *City Government Finances in 1983-84*; No. 5, *Governmental Finances in 1983-84*; No. 6, *Local Government Finances in Selected Metropolitan Areas and Large Counties: 1983-84*; No. 8, *County Government Finances in 1983-84*; and No. 10, *Finances of Public School Systems in 1983-84*.

This report provides statistics on the revenue, expenditure, debt, and financial assets of school systems, presented for the Nation, for States, and for individual school systems having 15,000 or more enrollment.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope of the Census Bureau's school finance data collection activities, major findings of the 1983-84 survey, and sources and limitations of data.

Tables 1 and 2 display national totals of public school financial data. Statewide aggregates for general revenue and general expenditure appear in tables 3 and 4 with corresponding percent distributions in tables 5 and 6. Table 7 presents State totals for indebtedness and cash and security holdings.

Table 8 contains financial statistics for public school systems with enrollments greater than 15,000. Per pupil amounts for these same systems appear in table 9.

SCOPE

This report includes data on the finances of the following types of publicly operated educational agencies classified by the Bureau of the Census as school systems:

1. Independent school systems
 - a. Elementary and secondary systems operating as independent governmental units; and

- b. Local government higher education systems operating as independent governmental units;

2. Dependent school systems

- a. Elementary and secondary systems that are integral agencies of county, municipal, township, or State governments; and

- b. Local government higher education systems that are integral agencies of county or municipal governments.

There are 483 local higher education systems. These systems exclude the finances of State government institutions of higher education. Tables 1, 2, and 4 display totals for this grouping under the heading "Higher Education."

For a summary of the major types of units that the Census Bureau includes in the universe of school systems, see table A.

Table A. Public School Systems and Fall Enrollment: 1982

Type of system	Number of systems	1981 fall enrollment (1,000)
All public school systems.....	16,389	43,551
Independent school districts.....	14,851	35,614
Dependent school systems.....	1,538	7,938
State.....	24	176
County.....	578	3,420
Municipal.....	286	3,429
Township (and "town")	650	912
EXHIBIT: Local institutions of higher education.....	483	3,425

The statistics reported for 1983-84 pertain to school system accounting periods that ended June 30, 1984, or at some date within the previous 12 months, subject to certain exceptions.¹

FINDINGS

Public school systems in the United States received \$133.9 billion from all revenue sources and made expenditures totaling \$130.6 billion in fiscal year 1983-84. Total revenue increased \$9.2 billion, or 7.4 percent, and expenditure \$8.3 billion, or 6.8 percent, over the previous fiscal year.

The Federal share of public school funding declined for the fourth straight year. It rose in absolute terms, however, for the first time since 1981. Federal aid increased 5.9 percent from \$8.2 billion in fiscal year 1982-83 to \$8.7 billion in fiscal year 1983-84. Table B displays the Federal, State, and local contributions in funding public school systems.

Public school systems spent over \$81 million, or about 62 percent of their general expenditure on salaries and wages. Spending for the construction of school facilities declined for the fourth straight year to \$4.2 billion.

Indebtedness of public school systems totalled \$36.1 billion at the end of fiscal year 1983-84.

REVENUE

School system revenue totaled \$133.9 billion in fiscal year 1983-84. This consisted primarily of general revenues of \$133.5 billion and a small amount of employee-retirement revenue (\$415 million).²

Table C shows the distribution of general revenue between intergovernmental and own source revenue. The relationship between these two categories of revenue fluctuates greatly from State-to-State (see table 5). For example, public school systems in New Hampshire derived 89.9 percent of their revenue from

own sources and only 10.1 percent from intergovernmental funding. School systems in New Mexico, however, obtained 13.7 percent of their revenue from own sources with the remainder coming from other governments.

Table C. General Revenue of Public School Systems: 1983-84

Item	Amount (millions of dollars)	Percent
General revenue, total.....	133,450	100.0
Intergovernmental revenue.....	70,995	53.2
From State sources..	60,526	45.4
Federal aid distrib- uted by States.....	7,384	5.5
Directly from Federal Government.	1,291	1.0
From other local governments.....	1,794	1.3
From own sources.....	62,454	46.8
Taxes.....	41,633	31.2
Property.....	40,340	30.2
Other.....	1,293	1.0
Parent government contributions.....	10,688	8.0
Current charges.....	6,002	4.5
Interest earnings...	2,236	1.7
Other.....	1,895	1.4

State governments distributed most of their education money as part of basic foundation aid programs but also provided amounts for vocational and special education, transportation aid, food service, and capital outlay.

The proportion of revenue contributed by the Federal Government to public school systems has continued to decline. After peaking at slightly under 9 percent of all school system general revenue in 1979-80, the Federal share dropped to 6.5 percent in 1983-84. Federal Government aid totaled \$8.7 billion in 1983-84, down 4.7 percent from 1979-80. It expended \$1.3 billion directly to school systems in 1983-84, a major part of

Table B. Percent of Public School General Revenue by Original Source of Funding

Source	1976-77	1979-80	1980-81	1981-82	1982-83	1983-84
Total.....	100.0	100.0	100.0	100.0	100.0	100.0
State.....	39.8	44.7	44.9	45.4	45.1	45.4
Federal.....	8.1	8.9	8.5	7.0	6.6	6.5
Local.....	52.1	46.3	46.6	47.6	48.3	48.1
Taxes.....	34.3	28.7	29.0	30.0	31.1	31.2

these payments being funded through Public Law 874, commonly called the impact aid program. Most Federal revenue is channeled indirectly to local public school systems through State governments. About \$7.4 billion was distributed under various programs including the Elementary-Secondary Education Act, vocational education, school lunch and milk, and education consolidation and improvement block grants.

Taxes and parent government contributions comprised 83.8 percent of all general revenue received by school systems from their own sources. Parent government contributions are amounts appropriated by governments to finance their dependent school systems. Property tax receipts fund the major portion of these contributions. While property tax revenue was the single most important source of locally derived revenue, other taxes were significant for school systems in certain States. Louisiana is unique inasmuch as school systems received approximately \$423 million, or over 63 percent of all 1983-84 tax revenue, from local sales tax collections. Other States with significant amounts of nonproperty tax revenue include Kentucky, New York, and Pennsylvania.

EXPENDITURE

Public school systems expended \$130.6 billion in fiscal 1983-84 including \$177 million in employee-retirement expenditure for school district-administered systems (listed in footnote 2). Table D shows the distribution of general expenditure—i.e., excluding retirement system payments—by object and level of instruction.

Table D. General Expenditure of Public School Systems: 1983-84

Item	Amount (millions of dollars)	Percent
General expenditure, total...	130,375	100.0
Intergovernmental.....	424	0.3
Direct.....	129,952	99.7
Current operation...	120,228	92.2
Salaries and wages	81,334	62.4
Other.....	38,894	29.8
Capital outlay.....	7,281	5.6
Construction.....	4,207	3.2
Other.....	3,074	2.4
Interest on debt....	2,442	1.9
Direct expenditure by level of instruction:		
Elementary and secondary.....	119,927	92.0
Higher education....	7,583	5.8

Amounts reported as intergovernmental expenditure include only payments to State governments and local school building

and leasing authorities that are classified by the Census Bureau as special district governments. Expenditures made by one school system to another are excluded to avoid totaling duplicative amounts.

Salaries and wages, predominantly teachers' salaries, continue to be the largest object expenditure totaling 62.4 percent of general expenditure in 1983-84. Salary expense increased by 6.4 percent from 1982-83 to \$81.3 billion. Capital spending went up 1.7 percent to \$7.3 billion in 1983-84.

Coverage of elementary and secondary education finances is far more comprehensive than the coverage given to higher education finances. Expenditure reported for elementary and secondary education includes all units classified by the Bureau of the Census as public elementary and secondary school systems.³

Higher education expenditure accounted for only 5.8 percent of total general expenditure of public school systems. The higher education institution data included in this report, however, pertain to only those institutions classified by the Bureau of the Census as school systems. Most of these systems are locally controlled community colleges.⁴ In many States, though, community colleges are either totally or partially administered and funded by State governments.⁵ State-controlled higher educational institutions (both 4-year and community colleges) are excluded as these are classified as State dependent agencies rather than as local school systems. Thus, the higher education expenditure data in this report represent only a small portion of all publicly operated higher education institutions.

Table E shows, by State, average per pupil amounts for several types of elementary and secondary educational expenditures.⁶ Proper analysis of interstate comparison requires caution. Such factors as cost of living within given areas, extent of special educational programs offered, and transportation requirements can all significantly influence per pupil costs but may not be particularly helpful in describing the quality of basic educational programs.

INDEBTEDNESS

At the end of fiscal 1983-84, indebtedness of public school systems totaled \$36.1 billion. Of this amount, 95.2 percent, or \$34.4 billion represented long-term obligations. Approximately \$3.2 billion of long-term debt was issued in fiscal 1983-84, while \$3.7 billion was retired.

³State-by-State descriptions of those units classified by the Bureau of the Census as school systems are given in *Governmental Organization* (1982 Census Governments, Vol. 1).

⁴The University of the District of Columbia and Washburn University (Topeka, KS) are major exceptions. These are locally controlled 4-year degree granting institutions. Senior colleges in the City University of New York, which were classified as locally controlled in previous years, were reclassified State dependent effective for the 1982-83 fiscal year.

⁵All or most of the community colleges in the following States are classified by the Bureau of the Census as State institutions of higher education and are, therefore, excluded from this report: Alabama, Alaska, Arkansas, Colorado, Connecticut, Delaware, Georgia, Hawaii, Kentucky, Massachusetts, Minnesota, Nevada, New Mexico, Oklahoma, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, Washington, West Virginia, and Wisconsin.

⁶The enrollment data used in calculating the per pupil amounts presented in table E is from 1983 pupil membership from National Center for Education Statistics, "Public School Enrollment, United States, Fall 1983," table 1.

¹Excludes expenditure for interest on debt. ²Includes interfund transfers into employee-retirement funds operated by the parent government or by the school system itself, which are omitted from the expenditure data presented elsewhere in this report.

National totals for public school indebtedness have changed very little in the last several years. In contrast, many States have reported a great deal of change in the extent of indebtedness. Since 1980, particularly large decreases in debt outstanding have occurred in Alabama (-30.8 percent), California (-38.8 percent), Maryland (-27.5 percent), Massachusetts (-32.3 percent), Ohio (-28.5 percent), and Rhode Island (-35.9 percent). Significant increases in public school debt have occurred since 1980 in Alaska (+81.4 percent), Louisiana (+23.3 percent), New Mexico (+60.1 percent), South Carolina (+83.7 percent), Texas (+25.5 percent), Utah (+23.4 percent), and Wyoming (+50.3 percent).

Public school system indebtedness in Texas exceeded by far indebtedness reported by any other State. School debt outstanding in Texas was \$5.6 billion at the close of fiscal year 1983-84 or \$2.4 billion larger than in New York, the next highest State. As seen in table F, 15 of the 42 governments with the largest education debt are in rapidly expanding areas in Texas.

Indebtedness figures included in table 7 pertain only to debt issued in the name of an independent school district or by the parent government for a dependent school system. Thus, this report excludes the following debt obligations: debt issued by school building authorities and by certain municipalities (such as Atlanta, Milwaukee, Newark, and San Francisco) for the con-

struction of education facilities; general obligation debt not issued distinctly for the support of schools, such as in the District of Columbia and Hawaii; and indebtedness of the Chicago School

Finance Authority, a special district government created in January 1980, that had \$524 million outstanding in long-term bonded indebtedness as of August 31, 1984.

NA Not applicable.

CASH AND SECURITY HOLDINGS

School district governments had financial assets at the end of fiscal 1983-84 amounting to \$25.5 billion. Approximately \$2.7 billion was held in the 12 school employee-retirement funds included in this report. Of the remainder, \$16.4 billion was held as cash and deposits and \$6.3 billion represented securities. Holdings of dependent school systems are excluded from this report since they cannot be separated from the assets of their parent governments.

SOURCES AND LIMITATIONS

The Census Bureau obtained data in this report from four principal sources:

Organization—The research conducted as part of the Census Bureau's 1982 Survey of Governmental Organization identified the universe of public school systems. Consult the report *Governmental Organization* (Vol. 1, 1982 Census of Governments) for a description of the methodology and the findings of this survey. That report includes extensive tabular presentations on numbers of public school systems, schools, and enrollments. Counts of the school systems in the finance survey will differ slightly from those included in *Governmental Organization*. These differences occur because the finance survey excludes school systems which, due to overlapping of reporting responsibilities, would cause financial data to be double-counted.

Higher education—Finance data were obtained from questionnaires used in the Higher Education General Information Survey conducted by the National Center for Education Statistics as part of a joint data collection agreement between the Census Bureau and the U.S. Department of Education.

Mail canvass—Statistics for elementary and secondary school systems in Alaska and in the District of Columbia as well as the employee-retirement systems are based on information received in response to a mail canvass of individual systems.

Central collection—State education agencies conduct surveys of elementary and secondary education systems that obtain finance data as part of a larger data collection effort. A high percentage of this information is often compatible with Census Bureau categories. In an effort to reduce respondent burden, the Census Bureau concluded a series of agreements with all States except Alaska to share their data for this survey. The specific data collection procedure used in each State is listed below.

1. Completion of Census Bureau questionnaires by State officials: Maryland, Nevada, Oregon, West Virginia, and Wyoming.
2. Compilation from State education agency source documents by Census Bureau staff: Alabama, Hawaii, New Mexico, Rhode Island, Tennessee, and Utah.
3. Computer tape reformatted by Census Bureau staff: Arizona, Arkansas, California, Georgia, Idaho, Indiana, Louisiana, Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, North Dakota, Ohio, Oklahoma, Vermont, and Wisconsin.
4. Computer tape of data reformatted by State education agency: Illinois, Iowa, Kansas, Minnesota, Missouri, New York, Pennsylvania, South Dakota, Texas, and Washington.
5. Computer printouts of data reformatted by State education agency: Colorado, Connecticut, Delaware, Florida, Kentucky, Mississippi, North Carolina, South Carolina, and Virginia.

These central data collection arrangements did not always provide sufficient information to meet all the needs of the Census Bureau survey. In those instances, other sources—most often different State offices—supplied information to supplement the basic data. The most common types of data needing supplementation were school lunch finances, indebtedness, cash and security holdings, and capital fund transactions. The procedures for incorporating these additional data with the core information required careful detailing to avoid duplication or under reporting.

Data in this report are subject to inaccuracies in classification and processing. The Census Bureau exerted effort to keep such errors to a minimum through care in examining, editing, and tabulating the data shown herein.

For information on the availability of school finance data on computer tape, contact Chief, Governments Division, Bureau of the Census, Washington, DC 20233 or call (area code 301-763-7366).

ACKNOWLEDGMENT

The generous cooperation of State education agency personnel is gratefully acknowledged. The time and effort extended by these officials made it possible to produce this report while imposing a minimum of respondent burden on local school officials. We also appreciate very much the helpful assistance of local school officials who either provided statistics in the first instance or who resolved data problems.

SUMMARY

Table 1. Summary of Public School System Finances: 1983-84 and 1982-83

(Millions of dollars)

Note: Because of rounding, detail may not add to totals. Revenue from State sources for State dependent school systems is included as intergovernmental revenue from State rather than as parent government contributions.

- Represents zero or rounds to zero.

¹To avoid duplication, interschool system transactions are excluded.

NA Not available.

¹Minor amounts of short-term indebtedness incurred by independent school systems are included in the long-term indebtedness figures and are not separately identifiable. Short-term indebtedness of dependent school systems in many cases cannot be distinguished from the total indebtedness of their parent governments.²Holdings of employee-retirement funds are excluded.³Dependent school system holdings are excluded.⁴Indebtedness of these dependent school systems cannot be segregated from the general obligation indebtedness of their parent governments.

Note: Because of rounding, detail may not add to totals. Interscholar system transactions are included in this table, rather than excluded as in tables 1-4.

- Represents zero or rounds to zero. NA Not available.

¹Fall 1982 enrollments are shown for the 60 local institutions of higher education published in the Education Directory, Colleges and Universities, 1983-84, National Center for Education Statistics. Fall 1983 enrollments for the 333 elementary and secondary school systems in this table were provided by State education agencies.

²\$29,890,000 of school bonded indebtedness incurred by the city of Birmingham.

³\$21,295,000 of school bonded indebtedness incurred by the city of San Francisco. San Francisco Unified School District paid \$4.4 million in fiscal year 1983-84 for debt service.

⁴The following amounts (in thousands of dollars) are excluded from the expenditure data shown herein as they are interfund transfers made into the school system's or its parent government's employee retirement fund: Chicago, \$44,132; Denver, \$22,989; Des Moines, \$1,220; Fulton County, \$3,914; Hawaii Public Schools, \$92,693; Kansas City, MO, \$5,895; New York City, \$572,514; Omaha, \$3,076; Portland, \$5,274; St. Louis, \$6,127; and Wichita, \$280.

⁵\$109,619,000 of school bonded indebtedness incurred by the city of Atlanta. Atlanta Independent School District paid \$4,545,726 in fiscal year 1983-84 to the city of Atlanta for debt service.

⁶Excludes enrollment and financial data for De Kalb Community College.

⁷Excludes \$541,575,000 (as of Aug. 31, 1983) in long-term debt incurred by the Chicago School Finance Authority.

⁸\$108,458,000 of school bonded indebtedness incurred by the city of Newark.

⁹Effective fiscal year 1983, New York State assumed control of the senior colleges of the City University of New York. The 1983-84 financial data reflect activities of only community and technical colleges.

¹⁰\$30,866,000 of school bonded indebtedness incurred by the city of Milwaukee. Intergovernmental expenditure represents debt service payments to the city of Milwaukee.

Note: Because of rounding, detail may not add to totals. Interschool system transactions are included in this table, rather than excluded as in tables 1-4.

- Represents zero or round zero.

NA Not available.

¹\$704 per pupil school bonded indebtedness incurred by the city of Birmingham.

²\$359 per pupil of school bonded indebtedness incurred by the city of San Francisco. San Francisco Unified School District paid \$74 per pupil for debt service.

³The following amounts (in dollars per pupil) are excluded from the expenditure data shown herein as they are interfund transfers made into the school systems, or its parent government's retirement fund: Chicago, \$102; Denver, \$383; Des Moines, \$40; Fulton County, \$106; Hawaii Public Schools, \$577; Kansas City, Mo, \$164; New York City, \$620; Omaha, \$75; Portland, \$104; St. Louis, \$115; and Wichita, \$7.

⁴\$1,629 per pupil of school bonded indebtedness incurred by the city of Atlanta. Atlanta Independent School District paid \$68 per pupil to the city of Atlanta for debt service.

⁵Excludes financial data for the De Kalb Community College.

⁶Excludes \$1,248 per pupil of school bonded indebtedness incurred by the Chicago School Finance Authority.

⁷\$1,908 per pupil of school bonded indebtedness incurred by the city of Newark.

⁸Effective fiscal year 1983, New York State assumed control of the senior colleges of the City University of New York. The 1983-84 financial data reflect activities of only community and technical colleges.

⁹\$380 per pupil of school bonded indebtedness incurred by the city of Milwaukee.

DEFINITIONS OF SELECTED TERMS

Major categories for the Census Bureau's classification of governmental finances, as applicable to school systems, are defined below:

Bond Funds—Funds established to account for the proceeds of bond issues pending their disbursement.

Capital Outlay—Direct expenditure for contract or force account construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current operation expenditure.

Cash and Security Holdings—Cash, deposits, and governmental and private securities (bonds, notes, stocks, mortgages, etc.) except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Construction—Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements and provision of equipment and facilities that are integral parts of a structure. Includes both contract and force account construction.

Contribution From Parent Government—That portion of general revenue from own sources which is appropriated and transferred to a dependent school system by its parent government. Excludes intergovernmental revenue, current charges, and miscellaneous general revenue.

Current Charges—Amounts received from the public for performance of specific services benefiting the person charged and from sales of commodities and services. Includes school lunch sales (gross), tuition paid by individuals, and receipts from centrally administered student activity funds. Excludes amounts received from other governments and interfund transfers.

Current Operation—Direct expenditure for compensation of own officers and employees and for supplies, materials, and contractual services except amounts for capital outlay.

Debt—Long-term credit obligations of the school system or its parent government and all interest-bearing short-term (repayable within 1 year) credit obligations. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, advances and contingent loans from

other governments, and rights of individuals to benefits from school system employee-retirement funds.

Debt Outstanding—All debt obligations remaining unpaid on the date specified.

Direct Expenditure—Payments to employees, suppliers, contractors, beneficiaries, and other final recipients of government payments—i.e., all expenditure other than intergovernmental expenditure.

Employee-Retirement Expenditure—Cash payment to beneficiaries (including withdrawals of contributions) of employee-retirement systems. Excludes cost of administering retirement systems, school system contributions to State-administered employee-retirement systems, and noncontributory gratuities paid to former employees.

Employee-Retirement Revenue—Revenue from retirement contributions received from employees and other governmental or private employers, earnings on investment assets set aside to provide income for retirement system purposes and State government contributions. Excludes contributions from the employing school district (which are intragovernmental transfers).

Enrollment—Count of pupils on pupil rolls as determined by the State education agency.

Expenditure—All amounts of money paid out by a school system—net of recoveries and other correcting transactions—other than for retirement of debt, purchase of securities, extension of loans, and agency transactions. Note that expenditure includes only external transactions of a school system and excludes noncash transactions such as the provision of perquisites or other payments in kind.

Fiscal Year—The 12-month period at the end of which the school district determines its financial condition and the results of its operations and closes its books.

General Expenditure—All school system expenditure other than that classified as employee-retirement or other insurance trust expenditure.

General Revenue—All school system revenue except employee-retirement or other insurance trust revenue.

General Revenue From Own Sources—All general revenue exclusive of intergovernmental revenue. Includes taxes, contributions from parent governments, current charges, and miscellaneous general revenue.

Interest Earnings—Interest earned on deposits and securities including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest expenditure. Note that interest earnings shown under general revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure—Amounts paid for use of borrowed money.

Intergovernmental Expenditure—Amounts paid to other governments as fiscal aid in the form of shared revenues and grants-in-aid, school building authority payments, or in lieu of taxes. Excludes amounts paid to other governments for purchase of commodities, property, or utility services, any tax imposed and paid as such, and employer contributions for social insurance—e.g., contributions to the Federal Government for old-age, survivors', disability, and health insurance for school district employees.

Intergovernmental Revenue—Amounts received from other governments as fiscal aid in the form of shared revenues and grants-in-aid, as reimbursements for performance of general government functions and specific services for the paying government, or in lieu of taxes. Excludes amounts received from other governments for sale of property and commodities. All intergovernmental revenue is classified as general revenue.

Intergovernmental Revenue From Federal Government—Intergovernmental revenue received by the school system directly from the Federal Government. Excludes Federal aid channeled through State governments.

Intergovernmental Revenue From State Government—All intergovernmental revenue received from the State government, including amounts originally from the Federal Government but channeled through the State.

Long-Term Debt—Debt payable more than 1 year after date of issue.

Long-Term Debt Issued—The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included.

Long-Term Debt Retired—The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations.

Offsets to Debt—Cash and investment assets of sinking funds and other reserve funds, however designated, which are specifically held for redemption of long-term debt, including bond reserve funds, deposits with fiscal agents for the redemption of uncanceled debt, and balances in refunding bond accounts held pending completion of refunding transactions.

Other Than Capital Outlay—General expenditure exclusive of capital outlay. Includes current operation, interest on debt, and intergovernmental expenditure.

Property Taxes—Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at classified rates, and taxes on selected types of property, such as motor vehicles or certain or all intangibles.

Public School Systems—Includes independent school district governments and dependent school systems. Independent school district governments are organized local entities providing public elementary, secondary, and/or higher education which, under State law, have sufficient administrative and fiscal autonomy to qualify as governments. Dependent school systems lack sufficient autonomy to be counted as separate governments and are classified as dependent agencies of some other government—a county, municipal, township, or State government.

Revenue—All amounts of money received by a school system from external sources—net of refunds and other correcting transactions—other than from issuance of debt, liquidation of investments, or as agency and private trust transactions. Note that revenue excludes noncash transactions such as receipt of services, commodities, or other "receipts in kind."

Salaries and Wages—Amounts paid for compensation of school system officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

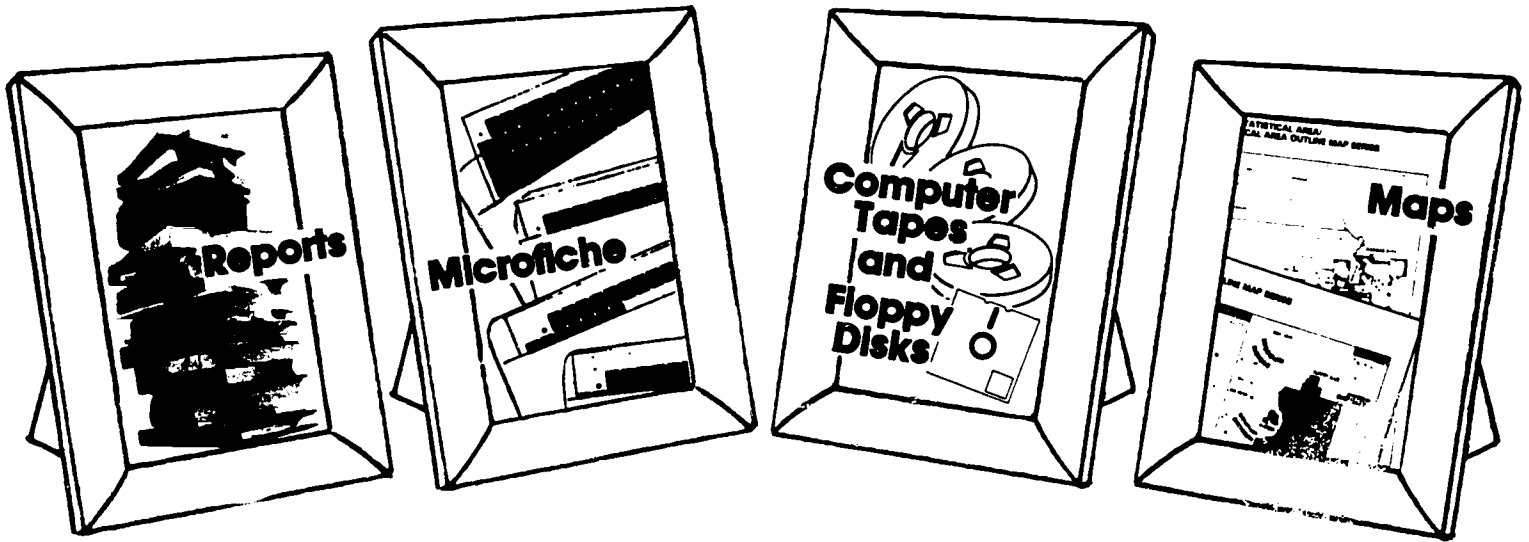

School Lunch Sales—Gross collections from cafeteria sales to children and adults.

Securities—Stocks and bonds, notes, mortgages, and other formal evidences of indebtedness.

Short-Term Debt—Interest-bearing debt payable within 1 year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

Taxes—Compulsory contributions exacted by a school system for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that school system tax revenue excludes any amounts from shares of State-imposed-and-collected taxes, which are classified as intergovernmental revenue.

If You Liked This Report Just Wait Till You Meet the Rest of the Family

In the Census Catalog and Guide: 1985

This report may be just one of several in the Census family you need. The best way to find out is to see the whole family of data products the only place you'll find them ALL described—in the **Census Catalog and Guide**.

It shows the family tree—a host of relatives on paper, tape, floppy disk or fiche. It names the Census Bureau specialists in your field and—in thousands of towns and cities—libraries and data centers that can help you. Also, individual guides to a dozen statistical subjects give you the family background you need.

Buy it today and meet the family!
