ABSTRACT

In fall 1985, a follow-up survey was administered to the 1985 graduating class of John Tyler Community College (JTCC) in order to document graduate successes in the job market and in the pursuit of advanced study; to provide feedback to the administration and faculty as a basis for upgrading educational offerings and services; and to provide a summary of student opinions about their experiences at JTCC. Questionnaires were mailed to 207 graduates, requesting information on student characteristics, evaluation of student and academic services, employment experiences, and educational status. Study findings, based on a 63% response rate, included the following: (1) 52% of the respondents were female, 55% were married, 42% were between 25 and 34 years of age, 79% were white, and 61% had attended on a full-time basis; (2) job placement and counseling services received the largest number of negative ratings of all services and programs at the college; (3) 61% attended JTCC to pursue a career; (4) 91% rated instructional quality as "superior" or "good"; (5) 69% said faculty advising was "superior" or "good"; (6) 75% were employed full-time and an additional 13% were employed part-time; (7) two-thirds held jobs related to their fields of training; (8) only 18% were currently attending school; and (9) of those in school, only 3 students cited transfer problems. PREFACE

Assessing educational outcomes has become a focal point of discussion among educators in recent years in light of the new criteria adopted by the Southern Association of Colleges and Schools (SACS) and other regional accrediting agencies. A significant measure of our success in the postsecondary arena is what happens to our graduates.

Each fall, John Tyler Community College surveys its graduates to determine the extent to which the College has been successful in assisting them to achieve their goals for enrolling as well as to determine their accomplishments in the job market or in pursuit of further studies.

Several persons have been instrumental in the completion of this project: Myra Goodman, who analyzed the data and wrote the narrative; Marlene Jinkins and Linda Coake who typed the report and summarized the students' comments; and staff in the Administrative Data Processing unit and Reprographics. Special appreciation is extended to the graduates who took the time to share their experiences while here at the College as well as since graduation in order to improve educational offerings and services for future students.

We trust that the information presented in this report will be beneficial to the faculty and administration as we attempt to better meet the changing needs of our students as well as the businesses, industries, and government where they will seek employment.

Carol S. Hollins, Coordinator Institutional Research

ABSTRACT OF THE STUDY

Research Report 86-5

April 22, 1986

1985 GRADUATE FOLLOW-UP STUDY

The annual follow-up survey was administered this past fall to the 1985 graduating class of John Tyler Community College. The purpose of the survey was primarily three-fold: (1) to document graduate successes in the job market and in the pursuit of advanced study; (2) to provide feedback to the administration and faculty as a basis for upgrading educational offerings and services; and (3) to provide a summary of student opinions to other College staff in order to improve services.

A total of 207 graduates who completed all requirements in one of the College Transfer, Occupational/Technical, or Certificate programs in June 1985 constitute the population for this study. Based on the initial survey request and two follow-up mailings to non-respondents, a response rate of 63 percent was achieved. Below is a summary of the principal findings in five areas: (1) Background Information; (2) Evaluation of Student Services; (3) Evaluation of Academic Services; (4) Employment Status; and (5) Educational Status. A list of findings and recommendations follows an overall summary of this study.

BACKGROUND INFORMATION ON GRADUATES

Graduates were asked to provide descriptive information concerning their backgrounds for presentation in aggregate form. Of the 132 respondents:

- 48 percent were male and 52 percent were female;

- 36 percent said they were single, 55 percent said they were married, and the remainder indicated they were divorced, separated or widowed;

ffice of Institutional Research • John Tyler Community College • Chester, Virginia 2383

- 29 percent indicated they were between 18 - 24 years old, 42 percent were between 25 - 34 years old, 21 percent were between 35 - 44 years old, 7 percent were between 45 - 59 years old, and 1 percent was 60 years old or over;

- 79 percent were white, 18 percent were black, and 2 percent

were Asian or Pacific Islander;

- 64 percent said Fall was their first quarter enrolled and 57 percent indicated Spring was their last quarter enrolled; - 61 percent indicated they were enrolled on a full-time basis

primarily, while 39 percent said they were part-time;

- 76 percent said they attended classes primarily during the day and 23 percent indicated attending classes at night;

- The primary reason why graduates chose to attend JTCC was because of its courses and programs, followed by close to home and inexpensive.

Totals may not add up to 100 percent due to graduates who MOTE: chose not to respond to a particular survey item.

2/3

EVALUATION OF STUDENT SERVICES

The 1985 graduates were asked to evaluate seventeen different services and facilities at the College using a 5-point scale (1 = superior, 2 = good, 3 = fair, 4 = poor, and 5 = did not use). Below is a summary of the most positive and neutral responses as well as those that were least utilized.

Those services and facilities that received the most positive rating, i.e. over 50 percent of all graduates gave either a superior or good rating, were:

	Positive Ratings
1. Admissions and Records	90%
2. Bookstore	82%
3. Parking	81%
4. Business Office	78%
5. Library/Learning Resources	77%

It should be noted that Parking facilities received the largest number of superior ratings (35 graduates or 26 percent).

The most neutral responses or those that did not rec ive more than 50% on any ratings on the scale, were recorded in the following areas:

	Positive	Did Not Use	Negative
1. Student Lounge and Food Services	49%	2%	46%
2. Recreational Facilities	46%	28%	20%
3. Counseling Studies	45%	26%	25%
4. Developmental Studies	43%	44%	5%
5. Continuing Education	42%	45%	9%
6. Extended Learning Institute	40%	47%	7%
7. Financial Aid	37%	48%	9%
8. Student Activities	33%	43%	18%

Finally, those services or facilities which at least half of the respondents or more said they did not use were:

		Did Not Use
1.	Veterans Affairs	66%
2.	Co-op Program	64%
	Learning Assistance Center	57%
4.	Job Placement	54%

The largest number of poor responses were recorded in Job Placement (13 percent), followed by Counseling Services (6 percent).

EVALUATION OF ACADEMIC SERVICES

Below is a synopsis of student responses concerning instruction at John Tyler Community College.

PRIMARY GOAL OF GRADUATES:

When graduates were asked to specify their primary goal in attending JTCC, 14 percent said to complete courses to transfer, 61 percent cited pursuing a career by obtaining an Associate degree, 17 percent said to obtain a Certificate, 4 percent cited Personal Satisfaction, and 2 percent gave other goals.

SATISFACTION WITH COLLEGE PROGRAM AND SERVICES:

Nine out of ten of the graduates said they were either very satisfied or somewhat satisfied with the programs and services provided by the College to assist them in achieving their goal. Remaining responses included 5 (or 4 percent) who were undecided, and 3 (or 2 percent) who were somewhat dissatisfied. An additional 1 percent chose not to respond to this item.

COMPLETION OF DEVELOPMENTAL COURSES:

Almost one-half of the graduates who responded (45 percent) indicated that they had completed one or more developmental courses; 46 percent said that they had not completed such courses. An equal proportion of College Transfer and Occupational/Technical graduates completed developmental courses, while 3 out of every 4 of the Certificate graduates indicated that they had completed one or more developmental courses.

CERTIFICATION OR LICENSING OF GRADUATES: One-third of the graduate respondents indicated that they had been certified or licensed in their chosen fields. Of this number, almost all were Occupational/Technical graduates, specifically Nursing students (95 percent of the Nursing graduates who responded indicated successful completion of State licensing requirements). In addition, 87 percent of the Funeral Services graduates said they had been licensed.

QUALITY OF INSTRUCTION IN MAJOR:

An overwhelming majority of the respondents (91 percent) rated the quality of instruction in their major as superior or good; only 7 percent said that instruction in their major was fair. The latter rating was given by students in the following programs: Management (2 students), Electronics (2), Funeral Services (1), Nursing (1), Data Processing (1), Business Administration (1), Automotive (1) and Instrumentation (1). It is pleasing to note that none of the graduates indicated that instruction in their major was poor.

QUALITY OF INSTRUCTION NOT IN MAJOR: Eighty-seven percent of the graduates rated the quality of instruction outside of their major curriculum as superior or good. Nine percent gave a fair rating, I percent said poor and 2 percent did not respond. Only one graduate, in the Funeral Services curriculum, gave a rating of poor.

COURSE CONTENT IN MAJOR: When asked to evaluate the course content in their major curriculum, an encouraging 91 percent of the graduates rated it as <u>superior</u> or <u>good</u>. Only 7 percent rated course content fair and none of the graduates rated it <u>poor</u>. One percent chose not to respond to this item.

FACULTY ADVISING:

Sixty-nine percent rated faculty advising as superior or good (up by 4 percent compared to 1984 graduates), 26 percent said advising was fair or poor, and 4 percent did not address this item. Fair ratings were cited by 8 Management graduates, 3 graduates each in Police Science, Human Services, and Instrumentation, 2 graduates each in Nursing, Data Processing and Architecture and 1 each in Business Administration, General Studies, Funeral Services, Automotive, Electronics and Machine Shop. Six graduates in the following Occupational/Technical programs gave a poor rating: Data Processing (2 graduates) and one graduate each in Funeral Services, Nursing, Beverage Marketing and Electronics.

ACCESS TO FACULTY:

The majority of the graduates (76 percent) rated access to faculty as superior or good, while 17 percent rated access as fair, 4 percent gave a poor rating and 3 percent did not provide a response. Graduates evaluating faculty access as poor were enrolled in Data Processing (2 graduates) and 1 each in Nursing, Beverage Marketing and Electronics.

LAB EQUIPMENT AND FACILITIES:

Almost three-fourths of those who responded evaluated lab equipment and facilities as superior or good. Eighteen percent rated equipment and facilities as fair, 5 percent said poor and 5 percent failed to address this item. Poor ratings were given by 2 Data Processing graduates, 2 Electronics graduates and one each in Nursing, Management and Architecture.

COST OF BOOKS AND SUPPLIES:

The cost of books and supplies received one of the most negative of all ratings by graduates, with only 2 percent giving a superior rating and 42 percent indicating a good rating. Forty-three percent stated that the cost was fair, 8 percent cited poor, and 4 percent failed to address this item.

Poor ratings were given by two Nursing and two Data Processing graduates, and one each in Funeral Services, Management, Beverage Marketing, Police Science, Human Services, Automotive and Instrumentation.

OVERALL QUALITY OF INSTRUCTION:

The majority of the graduates (86 percent) rated the overall quality of instruction at JTCC as superior or good (down by 8 percent compared to 1984 graduates). Eleven percent gave a fair rating and only one graduate (enrolled in Funeral Services) gave a poor rating. One student did not respond to this item.

WOULD YOU RECOMMEND THE COLLEGE: Almost 9 out of every 10 graduates indicated they would recommend JTCC to a person seeking to complete the same program. Five percent failed to address this item. The remaining graduates who said they would not recommend the College were enrolled in Management (3 or 16 percent of all Management respondents), Data Processing (2 or 15 percent), Nursing (2 or 9 percent), Business Administration (1 or 50 percent), Funeral Services (1 or 12 percent), and Electronics (1 or 7 percent).

EMPLOYMENT STATUS

The following is a summary of the employment status of the 1985 graduates. Where significant differences exist, the program and degree are specified.

EMPLOYED FULL OR PART TIME

Three out of every 4 graduates said they were employed on a full-time basis (down by 6 percent compared to 1984 graduates). Thirteen percent were employed part-time and the remainder indicated full-time military service (1 percent), unemployed and not seeking work (1 percent), and unemployed and seeking work (7 percent or 6 percent higher than 1984 graduates). College Transfer students were employed at a rate slightly less than Occupational/Technical and Certificate graduates, 75, 82 and 81 percent, respectively.

SOURCE OF JOB:

The largest percentage of graduates (31 percent) gave a variety of sources when asked how they found out about their present job, including mailing out resumes and previous employment. An additional 28 percent said friend, 11 percent gave newspaper, 6 percent said faculty members, 4 percent said job placement and 1 percent cited the co-op programs.

DID GRADUATE
HOLD JOB WHILE
ENROLLED AT
JTCC:

Graduates were asked if they held their present jobs during their studies at JTCC and one-third said yes. Almost one-half responded no and 17 percent did not address this question. A larger proportion of

Occupational/Technical and Certificate graduates did not hold their present jobs in comparison to College Transfer graduates. Specifically, Nursing, Data Processing, Funeral Services, Electronics and Engineering students tended not to hold their present jobs while enrolled. In contrast, all of the Police Science graduates held their present jobs while at JTCC.

SALARY:

due to the confidential nature of Possibly individual's salary, about one-third (32 percent) of the graduates chose not to respond to this item. those graduates that did respond, one-fourth reported salaries in the range of \$15,000 - 19,999, 18 percent indicated \$10,000 - 14,999, and 10 percent said \$20,000 - 24,999. An additional 7 percent indicated they earned \$25,000 - 29,999 and 1 percent cited \$30,000 or more. Salaries of less than \$5,000 annually were given by 2 percent of the respondents, and 7 percent said they earned between \$5,000 - 9,999. Most of these graduates were employed on a part-time basis or working outside of their fields of training. The highest salaries (\$25,000 or more) were cited by graduates in the following areas: Funeral Services, Electronics, Nursing, Data Processing, Management, Instrumentation and Engineering.

JOB RELATED TO FIELD OF STUDY:

Two-thirds of the graduates indicated that their current job is either directly or somewhat related to their fields of training. Fifteen percent said their jobs are not related and 17 percent failed to address this item.

EDUCATIONAL STATUS

Only 18 percent of all graduates indicated they are currently attending school. This percentage is down slightly, since 21 percent of the 1984 class said they were in school and 25 percent of the 1983 class attended school. Summary information is presented below for those who enrolled in school. (NOTE: Totals will not add up, because almost 80 percent of the graduates did not address these items.)

CLASSIFICATION:

The majority of the graduates in school indicated junior status (9 or 7 percent), while several other classifications were given: freshman (5 or 4 percent), sophomore (7 or 5 percent), and seniors (3 or 2 percent). In addition, 2 or 50 percent of the College Transfer graduates said they were in school, 22 or 19 percent of the Occupational/Technical and none of the Certificate graduates said they were pursuing further studies.

8

CURRENTLY IN SCHOOL FULL OR PART-TIME:

Of those attending school, 13 (or 10 percent) said they were full-time and 16 (or 12 percent) were part-time. In each of the degree programs, half of the students attended school full-time and the other half attended school part-time.

STUDYING IN SAME FIELD:

Fourteen percent of the graduate respondents indicated that they are pursuing the same field of study in school, however, 8 percent said they are not. The remainder are not pursuing advanced study.

PROBLEMS TRANSFERRING:

Of those in school, 18 (or 14 percent) said they had no problems transferring. Two graduates (or 1 percent) cited problems in having transfer credits accepted and 1 graduate said he/she had problems in meeting admission requirements. It is interesting to note that none of the College Transfer graduates had problems transferring. Transfer problems were cited, however, by Occupational/Technical graduates.

COMPARISON OF INSTRUCTION:

Graduates were asked to compare instruction at their current institution with that at JTCC. Thirteen graduates (or 10 percent) said "about the same," 3 or 2 percent said "JTCC is better," and 3 or 2 percent said "there is no comparison." It is noteworthy that none of the graduates said that their present institution's instruction is better in comparison to JTCC.

For the most part, graduates who were in school reported enrollment at one of the following educational institutions (in descending order):

John Tyler Community College	12
Virginia State University	8
Virginia Commonwealth University	6
Old Dominion University	3
St. Leo College	1

PRINCIPAL FINDINGS AND RECOMMENDATIONS

Below is a list of principal findings based on the 1985 graduates who responded to the follow-up survey.

- In evaluating academic support services and facilities, graduates gave the most positive ratings to the following: Admissions and Records, Bookstore, Parking, Business Office, and Library/Learning Resources.
- 2. Job Placement and Counseling Services received the largest number of negative ratings of all services and programs at the College.
- 3. Services and facilities that were least used by the 1985 graduates were: Veterans Affairs, Job Placement, Co-op Program, and the Learning Assistance Center.

- 4. The primary goals of graduates in attending JTCC were (in descending order): 61 percent said to pursue a career by obtaining an Associate degree, 17 percent said to obtain a Certificate, 14 percent said to complete courses to transfer, and 4 percent cited personal satisfaction.
- 5. A majority of the respondents (91 percent) rated the quality of instruction in their major as "superior" or "good."
- 6. Sixty-nine (69) percent said faculty advising was "superior" or "good"; 26 percent rated it as "fair" or "poor."
- 7. Three-fourths of the graduates rated access to faculty as "superior" or "good," while 21 percent gave a "fair" or "poor" rating.
- 8. The cost of books received one of the most negative of all ratings by graduates. Only 44 percent rated the cost as "superior" or "good," 43 percent said "fair," and 8 percent gave a "poor" rating.
- 9. Nine out of ten graduates said they would recommend the College to a person seeking to complete the same program.
- 10. Three out of every 4 graduates said they were employed on a full-time basis (down by 6 percent compared to last year). An additional 13 percent are employed on a part-time basis.
- 11. Two-thirds of the graduates indicated that their jobs are related to their fields of traini
- 12. Only 18 percent of the graduates said they were currently enrolled in an advanced program of study. This percentage is down slightly from those who pursued additional education in the 1984 and 1983 graduating classes.
- 13. Of those in school, only 3 students cited transfer problems. All of the students were Occupational/Technical graduates.

Based on the foregoing findings, the following recommendations are made:

- 1. That creative activities be explored, implemented, and evaluated to improve upon Job Placement; i.e., the expansion of information on prospective employers and job openings by Counseling Services staff, divisions, and departments.
- 2. That efforts be made to more clearly articulate the range of Counseling Services available. In addition to ingenuity, this may be accomplished through faculty and staff referrals.
- 3. That the College develop, implement, and evaluate a structured and effective advising system.
- 4. That the College continue to make every effort to keep the cost of books and supplies to a minimum.
- 5. That the College continue to provide students information about advanced educational opportunities.

BACKGROUND

JOHN TYLER COMMUNITY COLLEGE GRADUATE FOLLOW-UP STUDY

BACKGROUND

Each fall, John Tyler Community College conducts an annual survey of the graduates of the previous spring's graduating class. The purposes of the follow-up study are: (1) to document student successes in the job market and in pursuit of advanced study; (2) to provide feedback to the College's administration and faculty as a basis for upgrading educational offerings and services; and (3) to provide the results of student opinions to other College personnel in academic and student services in order to improve services.

A total of 207 graduates who completed one of the College's Transfer, Occupational/Technical, or Certificate curriculums in June 1985 comprise the population of this study. The initial questionnaires were mailed to all graduates on November 1, 1985. Follow-up letters were sent at two-week intervals—November 15, 1985 and December 3, 1985—to all non-respondents. The response rate was as follows:

Total	132/207	63 percent
3rd mailing	31/207	15 percent
2nd mailing	57/207	27 percent
lst mailing	44/207	21 percent

The response rate dropped in comparison to last year's rate of 71 percent. The 1983 survey response rate was 62 percent.

A general description of the respondents based on a summary of general demographic questions follows.

TABLE 1
SEX OF GRADUATE RESPONDENTS

Sex	Frequency	Percent
Male	63	48
Female	69	52
Total	132	100

Table 1 gives the sex of the graduates who responded to the survey; forty-eight percent were male and 52 percent were female. This breakdown is somewhat dissimilar to the College's enrollment by sex which is 40 percent male and 60 percent female.

TABLE 2
MARITAL STATUS OF GRADUATE RESPONDENTS

Marital Status	Frequency	Percent
Single	48	36
Married	73	55
Other	8	6
No Response	3	2
Total	132	99*
*Rounding Error		

The majority of the graduate respondents are married (73 or 55 percent), followed by those who are single (48 or 36 percent), "other" (8 or 6 percent) and 3 graduates who chose not to respond to this item.

TABLE 3
AGE OF GRADUATE RESPONDENTS

Age	Frequency	Percent
Age 18-24	38	29
25-34	56	42
35-44	28	21
45-59	9	7
60 & over	1	1
Total	132	100

Table 3 gives the age distribution of the 1985 graduates who responded to the survey. Graduates the age range 25-34 accounted for 56 persons or 42 percent of all gradu ... This response was similar to that given by the 1984

graduate respondents, which accounted for 43 percent in the age range of 25-34. Thirty-eight or 29 percent of the 1985 graduates indicated their age was between 18-24 (the traditional college age group). The remaining graduates (28 or 21 percent) were between 35-44, nine or 7 percent were in the age bracket of 45-59 and 1 respondent was 60 years or older.

TABLE 4
ETHNIC STATUS OF GRADUATE RESPONDENTS

Ethnic Status	Frequency	Percent
White	105	79
Black	24	18
American Indian & Alaskan Native	0	0
Asian & Pacific Islander	3	2
Hispanic	0	0
Total	132	99*
*Pounding Error		

*Rounding Error

The ethnic status of the graduates is presented in Table 4. Of those graduates who responded, 79 percent were white, 18 percent were black, and 2 percent were in an "other" category. This breakdown is remarkably similar to the 1983 and 1984 graduate respondents; 79 percent white, 17 percent black, and 3 percent "other."

TABLE 5
QUARTER IN WHICH GRADUATES FIRST ENROLLED

Quarter	Frequency	Percent
Fall	85	64
Winter	18	14
Spring	12	9
Summer	9	7
No Response	8	6
Total	132	100

As reflected in past follow-up studies, the majority of respondents (64 percent) began their studies at JTCC during the Fall. Subsequent quarters exhibit a steady decline in first quarter enrollment which is consistent with total student enrollment. Fourteen percent of the respondents said their

first quarter was Winter, 9 percent gave Spring as their first quarter, and 7 percent indicated Summer was their first quarter enrolled. Six percent did not respond to this item.

TABLE 6
QUARTER IN WHICH GRADUATES LAST ENROLLED

Quarter	Frequency	Percent
Fall	22	17
Winter	12	9
Spring	76	57
Summer	16	12
No Response	6	4
Total	132	99*

^{*}Rounding Error

Again, as in previous studies, over half of all respondents (57 percent) indicated that Spring was their last quarter of enrollment. Fall was given as the last quarter of enrollment for 17 percent of the respondents, followed by 12 percent in the Summer and 9 percent in the Winter.

TABLE 7
FULL-TIME OR PART-TIME STATUS OF GRADUATES

Status	Frequency	Percent
Full-time	80	61
Part-time	51	39
No Response	1	1
Total	132	101*
# 0 P (* *		

^{*}Rounding Error

Three out of every 5 graduates (61 percent) stated that they pursued their studies primarily on a full-time basis, while 39 percent attended primarily as part-time students. This is in direct contrast to overall student enrollment in which 18 percent of all students are full-time and 82 percent are part-time. Theoretically, the goal of most full-time students is graduation in comparison to part-time students, who desire mainly to complete one or more courses.

TABLE 8
DAY OR NIGHT CLASS ATTENDANCE

Primary Class Attendance	Fraquency	Percent
Dav	100	76
Night	31	23
No Response	1	1
Total	132	100

Three-fourths of the respondents (76 percent) stated they attended classes primarily during the day while 23 percent indicated they attended classes at night. The same rationale for full- and part-time students would apply to these findings. Most full-time students attend classes during the day, their goal being completion of requirements for graduation. Part-timers tend to couple work and school and are desirous of completing only a few courses. If graduation is a goal, it is a long-term one.

TABLE 9
RANK ORDER OF GRADUATES' REASONS FOR ATTENDING JTCC

Reasons	Primary	Secondary
Close to home	2	1
Inexpensive	3	2
Open admissions policy	4	4
Courses/Programs	1	3
Financial Aid	5	6
Job requirements	6	5
Other	77	7

As anticipated, the primary reason why students chose to attend John Tyler Community College was because of its courses and programs. This finding has been the primary reason in the previous three annual follow-up studies. Other primary reasons were (in descending order): close to home, inexpensive, open admission policy, financial aid, job requirements and "other" reasons. Secondary reasons were (in descending order): close to home, inexpensive, courses/programs, open admissions policy, job requirements, financial aid, and "other" reasons, which are specified in the Appendix of this report.

EVALUATION OF STUDENT SERVICES

EVALUATION OF STUDENT SERVICES

Graduates were asked to evaluate several services and facilities at John Tyler Community College. Utilizing a five-point Likert-type scale, the possible responses include: "superior," "good," "fair," "poor," and "did not use," The summary of student ratings is provided below:

TABLE 10
ADMISSIONS AND RECORDS

RATING	FREQUENCY	PERCENT
Superior	27	20
Good	92	70
Fair	12	9
Poor	0	•
Did Not Use	0	
No Response	1	11
TOTAL	132	100

Overall, Admissions and Records was the most positively rated component by the graduate respondents. Table 10 indicates that ninety percent of the graduates rated Admissions and Records as "superior" or "good," 9 percent rated the department "fair," and 1 person did not respond to this item.

TABLE 11 BOOKSTORE

FREQUENCY	PERCENT
27	20
82	62
18	14
4	3
0	-
1	1
132	100
	27 82

Eighty-two percent of the graduates rated the Bookstore as "superior" or "good," 14 percent rated it as "fair," and 3 percent rated it as "poor." One person chose not to respond to this item. (See Table 11.)

TABLE 12 BUSINESS OFFICE

RATING	TREQUENCY	PERCENT
Superior	19	14
Good	85	64
Fair	15	11
Poor	0	=:
Did Not Use	ł	ń
No Response	5	4 _
TOTAL	132	99 *

^{*} Discrepancy due to rounding.

Table 12 shows that the Business Office received a "superior" or "good" rating from 78 percent of the respondents. Eleven percent gave the Business Office a "fair" rating, and 6 percent stated that they did not use the services of the Business Office. Four percent chose not to address this item.

TABLE 13 CONTINUING EDUCATION

RATING	FREQUENCY	PERCENT
Superior	10	7
Good	46	35
Fair	9	7
Poor	2	1
Did Not Use	59	45
No Response	6	4
TOTAL	132	99 A

^{*}Discrepancy Jue to rounding.

The Office of Continuing Education was given a "superior" or "good" rating by 42 percent of the respondents (Table 13). An almost equal percent (45) indicated that they did not use the service, while 7 percent rated it "fair," I percent rated the service "poor," and 4 percent chose not to respond. The use of graduates to rate this office is somewhat of a distortion since services are open to individuals and groups both on and off campus.

fablt in

Poor	3	1
Pid Hot Use	84.	G/a
No Rasponsa	15	11
TOTAL.	13.	37.

^{*}Discrepancy due to rounding.

Students were asked to rate the Co-op Program at the College. Although the College does not have an organized program for Co-op services, there are some departments that provide cooperative education. An expected (see Table 14), 64 percent of the respondents indicated they "did not use" the service, 4 percent rated it "superior," 15 percent rated it "good," 4 percent gave a "fair" rating, 1 percent rated it "poor," and 11 percent did not respond to this item.

TABLE 15
COUNSELING SERVICES

RATING	FREQUENCY	PERCENT
Superior	11	8
Good	49	37
Fair	25	19
Poor	8	6
Did Not Use	34	26
No Response	5	4
TOTAL	132	100

Table 15 shows that Counseling Services were rated "superior" or "good" by 45 percent of all respondents, 19 percent gave a "fair" response, 6 percent gave a "poor" rating, and over one-fourth (26 percent) gave a somewhat disturbing response of "did not use." Four percent did not address this item. It seems that clarity is needed among students as to what constitutes "counseling services."

TABLE 16 FINANCIAL AID

RATING	FREQUENCY	PERCENT
Superior	14	11
Good	34	26
Fair	9	7
Poor	3	2
Did Not Use	63	48
No Response	9	7
TOTAL	132	101 *

^{*}Rounding Error

Almost half of the respondents (48 percent) indicated that they "did not use" the services of the Financial Aid Office (see Table 16). Slightly over one-third (37 percent) gave the office a "superior" or "good" rating, 7 percent rated it "fair," and 2 percent gave it a "poor" rating. Seven percent did not respond to this item.

TABLE 17

^{*}Rounding error

Fifty-seven percent of the graduate respondents stated that they "did not use" the services offered by the Learning Assistance Center. In descending order, 27 percent rated the Center "superior" or "good," 7 percent rated it "fair" and 1 percent rated it "poor." Seven percent did not address this item.

EVALUATION OF ACADEMIC SERVICES

EVALUATION OF ACADEMIC SERVICES

Below is a numerical list of the 1985 graduates who responded to the survey instrument according to the program of study completed. Although several students received dual degrees (in areas such as Buriness Administration, Accounting and Child Care Aide), they are counted only once.

. College Transfer Business Administration General Studies Science	(4) 2 1 1
. Occupational/Technical Funeral Services Nursing Accounting Data Processing Management Hotel Restaurant Inst. M Beverage Marketing Secretarial Science Police Science Human Services Architecture Automotive Instrumentation Engineering Technology Electronics	gmt. (112) 8 22 1 13 19 2 2 2 5 8 2 4 5 5 15

*Rounding Error

Table 27 gives the graduate's primary goal for attending the College. Overall, the majority of the graduates' primary goals are consistent with their degree received. All of the College Transfer graduates said their primary goal was to transfer. Seventy-two percent of the Occupational/Technical graduates cited upgrading job skills by obtaining an Associate Degree as their primary goal in attending. Only 12 percent gave their primary goal as college transfer, 7 percent to obtain a Certificate, 4 percent selected personal satisfaction and 3 percent chose another reason for attending. An overwhelming percentage of Certificate graduates (87 percent) indicated that obtaining a certificate to improve employment and career skills was their primary goal. Only 1 or 6 percent of the Certificate graduates stated transfer

as his primary goal. Three graduates chose not to respond to this item (2 Occupational/Technical graduates and 1 Certificate graduate).

^{*} Rounding Error

Graduates were asked to evaluate the extent to which they are satisfied with the programs and services that the College provided to assist them in achieving their goal (Table 28). Almost all of the graduates who responded (93 percent) indicated that they were satisfied with the programs and services the College provided. Only 5 percent of the graduates were undecided and 4 percent were dissatisfied. The following is a breakdown by program of study of those who were undecided: Business Administration (1), Data Processing (1), Management (1), Human Services (1) and Instrumentation (1). The graduates who were dissatisfied with the programs and services provided were enrolled in

Electronics (2), Funeral Services (1), and Nursing (1), One graduate chose not to respond to this item.

Rounding Error

Table 34 gives the graduate respondents' perception of faculty advising at the College. Sixty-nine percent of the graduates rated faculty advising as "superior" or "good." This rating is four percentage points higher than the graduate respondents in 1984. This should still be a point of major concern. Twenty-two percent of the respondents gave a rating of "fair," 4 percent rated advising as "poor," and 4 percent did not respond to this item.

An analysis by degree and programs shows that of the 29 graduates that gave a "fair" rating, 2 (or 7 percent) were College Transfer students enrolled in Business Administration and General Studies. One Certificate graduate (5 percent) enrolled in Machine Shop gave a "fair" rating. Ninety percent of the respondents that gave a "fair" rating were Occupational/Technical graduates who were enrolled in the following

41 42

areas: Management (8), Police Science (3), Human Services (3), Instrumentation (3), Nursing (2), Data Processing (2), Architecture (2), Funeral Services (1), Automotive (1) and Electronics (1). Graduates who rated faculty advising as "poor" were all Occupational/Technical students enrolled in Data Processing (2) and one student each in Funeral Services, Nursing, Beverage Marketing and Electronics.

^{*}Rounding Error

The majority of the graduates (76 percent) rated access to faculty as "superior" or "good," while 17 percent said "fair", 4 percent gave a "poor" rating and 3 percent did not address this item (Table 35). Proportionately, College Transfer (75 percent), Occupational/Technical (77 percent) and Certificate (74 percent) graduates gave a "superior" or "good" rating. One College Transfer graduate and 1 Certificate graduate

gave a "fair" rating and were enrolled in General Studies and Clerical Studies, respectively. Ninety-one percent of the students that gave a "fair" rating were enrolled in the following Occupational/Technical programs: Management (5), Data Processing (3), Human Services (3), Instrumentation (3), Architecture (2), Funeral Services (1), Nursing (1), Police Science (1), and Electronics (1). All of the "poor" ratings were given by Occupational/Technical graduates enrolled in the following areas: Data Processing (2), Nursing (1), Beverage Marketing (1), and Electronics (1).

^{*}Rounding Error

Almost three-fourths of those who responded to the question about the College's lab equipment and facilities said they are "superior," or "good", 18 percent said they are "fair," 5 percent gave a "poor" rating, and 5 percent did not respond to this item (Table 36). The total

number of responses to this item are exactly the same as the responses of the 1984 graduates. College Transfer graduates rated the equipment and facilities as "good," with the exception of a General Studies graduate.

Almost 3 out of every 4 Occupational/Technical students gave lab equipment and facilities a "superior" or "good" rating. The remainder (29 percent) either rated the lab equipment and facilities as "fair," "poor," or provided no response. "Fair" ratings were given in the following disciplines (in descending order): Nursing (5 or 23 percent of the Nursing graduates), Instrumentation (4 or 80 percent), Automotive (3 or 75 percent), Data Processing (2 cr 15 percent), Management (2 or 10 percent), Engineering (2 or 40 percent), Architecture (1 or 50 percent), Funeral Services (1 or 12 percent), Human Services (1 or 12 percent), and Electronics (1 or 7 percent). "Poor" ratings were given by the following graduates: Data Processing (2 or 15 percent), Electronics (2 or 13 percent), Architecture (1 or 50 percent), Management (1 or 5 percent), and Nursing (1 or 4 percent).

Seventy-five percent of the Certificate graduates rated the lab equipment and facilities "superior" or "good," while 6 percent or 1 Child Care Aide graduate gave a "fair" rating. Nineteen percent of the Certificate graduates did not respond to this item.

^{*}Rounding Error

Table 37 shows that the majority of the graduate respondents (83 percent) felt that their evaluation by instructors was "superior" or "good," 12 percent rated it as "fair," 1 percent gave a "poor" rating, and 3 percent did not respond to this item. It is interesting to note that 100 percent of the College Transfer students gave a rating of "superior" or "good." Eighty-two percent of the Occupational/Technical students gave a rating of "superior" or "good," while 14 percent said it was "fair," 2 percent said "poor," and 2 percent did not address this item. The majority of the Certificate students (87 percent) gave a "superior" or "good" rating. Overall, only 2 students gave this item a "poor" rating (Funeral Services and Electronics).

^{*}Rounding Error

Generally, classroom size received positive ratings by graduates. Eighty-five percent rated class size as "superior" or "good" (Table 38). This percentage was also given by the 1984 graduate respondents. Eleven percent of the 1985 graduates rated class size as "fair," I percent gave a "poor" rating, and 3 percent did not address this item. Two persons gave class size a "poor" rating; one was enrolled in Data Processing and the other was a Police Science student.

^{*}Rounding Error

One of the most negative of all evaluations was received concerning the cost of books and supplies. As presented in Table 39, only 2 percent gave a "superior" rating, and 42 percent said the cost was "good." In combining "superior" and "good," however, this is the highest positive rating of the cost of books and supplies by graduates since 1982. Forty-three percent of the graduate respondents stated that the costs are "fair." This is the lowest percentage of "fair" ratings since 1982. Eight percent cited "poor," and this percentage is also the lowest since 1982. Four percent failed to address this item. following Ъy students in the given ratings were Occupational/Technical programs: Nursing (2), Data Processing (2), Funeral Services (1), Management (1), Beverage Marketing (1), Police Science (1), Human Services (1), Automotive (1), and Instrumentation

47

(1). There were no College Transfer or Certificate graduates that gave this item a "poor" rating.

^{*}Rounding Error

Almost 9 out of every 10 graduates indicated that they would recommend JTCC to a person seeking to complete the same program (see Table 41). Five percent of the graduates did not address this item. The remaining graduates who said they would not recommend the College were enrolled in the following programs: Management (3 or 16 percent of all Management graduate respondents), Data Processing (2 or 15 percent), Nursing (2 or 50 percent), Funeral Services (1 or 12 percent) and Electronics (1 or 7 percent). It is noteworthy that all Certificate graduates said they would recommend the College.

EMPLOYMENT STATUS

EMPLOYMENT STATUS

The employment status of members of the 1985 graduating class who responded to the survey is presented in Table 42. Sixty-eight percent of the graduate respondents aid they were employed on a full-time basis (down by 6 percent compared to last year). Thirteen percent of the graduates were employed part-time, and the remainder indicated full-time military service (1 percent), unemployed and not seeking work (1 percent), and unemployed and seeking work (7 percent), the latter of which is 6 percent higher compared to last year. A total of 13 graduates or 10 percent did not respond to this item. An analysis of the data shows that Occupational/Technical graduates and Certificate graduates are employed at a similar rate, 82 and 81 percent, respectively. College Transfer graduates are employed at a rate slightly less than other graduates (75 percent).

When graduates were asked "how did you find out about your (present) job," a variety of responses were given (Table 43). The largest percentage of the graduates indicated "other" (31 percent) as the source of their jobs, followed by friend (28 percent), job placement (4 percent), and co-op program (1 percent). Twenty percent of the graduates provided no response. "Other" sources are provided in the section on "Student Comments" in this report.

Graduates were asked if they held their present jobs during their studies at JTCC (Table 44). One-third of the graduates (34 percent) said "yes," almost one-half (49 percent) said "no" and 17 percent did not respond to this question. When responses were reviewed by degree, a larger proportion of Occupational/Technical and Certificate graduates

their jobs a "fair" or "poor" rating. An additional 19 percent did not respond to this item. It is interesting to note that none of the College Transfer graduates gave a "superior" or "good" rating. One graduate gave a "fair" rating, 2 gave a rating of "poor" and one did not respond to this item. The two graduates that gave a "poor" rating were not employed in a job related to their field of training (see Table 49).

Almost three-fourths of the graduates (71 percent) indicated they had "superior" or "good" relations with their colleagues (Table 50). Seven percent indicated "fair" relations with their co-workers. Only (1 percent) 1 graduate in the Funeral Services program said that relations were "poor."

Graduates who were working gave a wide range of responses when asked to indicate the level of satisfaction they had with their salaries. Forty-one percent rated their salaries as "good," 22 percent said "fair," 8 percent said "superior" and 7 percent indicated "poor." An additional 21 percent did not respond to this item. As in previous graduate studies, Occupational/Technical students gave the higher ratings concerning salaries, followed by Certificate, then College

percent chose not to respond to this item. As in past surveys,

Occupational/Technical graduates reported greater opportunities for job

advancement than Certificate or College Transfer degree recipients.

The majority of the graduates (62 percent) rated the overall aspects of their current job as "superior" or "good," "fair" ratings were given by 14 percent and 2 percent said "poor" (see Table 53). Twenty-one percent gave no responses. Overall, Occupational/Technical graduates gave their jobs the most positive ratings (67 percent rated "superior" or "good"), followed by Certificate graduates (43 percent). No ratings of "superior" or "good" were given by College Transfer graduates. Two Occupational/Technical graduates and one Certificate

graduate rated their jobs as "poor." These respondents were enrolled in the following programs: Management (1 or 5 percent), Human Services (1 or 12 percent) and Welding (1 or 33 percent).

EDUCATIONAL STATUS

Only 18 percent of the graduates indicated they were currently enrolled in school on a full-time or part-time basis (Table 54). The majority of the graduates enrolled (7 percent) indicated "junior" status, while 4 is cent gave "freshman" classification, 5 percent were "sophomores," 2 percent were "seniors," and 82 percent did not respond. Specifically, two students who were enrolled in the following College Transfer programs indicated junior status: Business Administration and Science. The remaining College Transfer graduates did not respond to this item. Five students who were enrolled in the following Occupational/Technical programs indicated freshman status: Nursing, Data Processing, Management, Human Services, and Instrumentation.

Table 56 gives the responses to the continuous strong as to whether or not graduates were pursuing the same field of study in school. Seventy-seven percent did not respond to this item, presumably because they were not currently attending school. Of the 22 percent who responded, 19 (or 14 percent) said "yes," they were pursuing the same fields, while 11 (8 percent) said "no," they were not. All of the College Transfer graduates attending school were pursuing the same field of study.

The majority of the graduates the were in school reported that they did not have problems transferring (14 percent). Each of the graduates who had problems transferring (3 percent) was a graduate of one of the Occupational/Technical programs. "All credits were not accepted" was cited by 2 graduates (one was enrolled in Data Processing and one in Engineering Technology). Only one graduate indicated that he had

(one each in Data Processing, Engineering and Electronics). It is interesting to note that none of the graduates indicated that their present institution's instruction is better in comparison to JCCC.

INDINGS AND RECOMMENDATIONS

PRINCIPAL FINDINGS AND RECOMMENDATIONS

Below is a list of principal findings based on responses to the follow-up survey instrument given by the 1985 graduates.

- 1. In evaluating academic support services and facilities, graduates gave the most positive ratings to the following: Admissions and Records, Bookstore, Parking, Business Office, and Library/Learning Resources.
- 2. Job Placement and Counseling Services received the largest number of negative ratings of all services and programs at the College.
- 3. Services and facilities that were least used by the 1985 graduates were: Veterans Affairs, Job Placement, Co-op Program, and the Learning Assistance Center.
- 4. The primary goals of graduates in attending JTCC were (in descending order): 61 percent said to pursue a career by obtaining an Associate degree, 17 percent said to obtain a Certificate, 14 percent said to complete courses to transfer, and 4 percent cited personal satisfaction.
- 5. A musity of the respondents (91 percent) rated the quality of
- 6. Sixty-nine (69) percent said faculty advising was superior or good;
 26 percent rated it as fair or poor.
- 7. Three-fourths of the graduates rated access to faculty as superior or good, while 21 percent gave a fair or p : rating.
- 8. The cost of books received one of the most negative of all ratings by graduates. Only 44 percent rated the cost as superior or good, 43 percent said fair, and 8 percent gave a poor rating.
- 9. Nine out of ten graduates said they would recommend the College to a person seeking to complete the same program.

70

- 10. Three out of every 4 graduates said they were employed on a <u>full-time</u> basis (down by 6 percent compared to last year). An additional 13 percent are employed on a <u>part-time</u> basis.
- 11. Two-thirds of the graduates indicated that their job is related to their fields of training.
- 12. Only 18 percent of the graduates said they were <u>currently enrolled</u> in an advanced program of study. This percentage is down slightly from those who pursued additional education in the 1984 and 1983 graduating classes.
- 13. Of those in school, only 3 students cited transfer problems. All of the students were Occupational/Technical graduates.

Based on the foregoing findings, the following recommendations are made:

- That creative activities be explored, implemented, and evaluated to improve upon Job Placement; i.e., the expansion of information on prospective employers and job openings by Counseling Services staff, divisions, and departments.
- 2. That efforts be made to more clearly articulate the range of Counseling Services available. In addition to ingenuity by Counseling Staff members, this may be accomplished through faculty and staff referrals.
- 3. That the College develop, implement, and evaluate a structered and effective advising system.
- 4. That the College continue to make every effort to keep the cost of books and supplies to a minimum.
- 5. That the College continue to provide students information about advanced educational opportunities.

GRADUATES' COMMENTS

OCTOBER - DECEMBER 1985

COMMENTS

PLEASE TAKE A FEW MOMENTS AND PROVIDE ANY GENERAL COMMENTS THAT YOU CARE TO MAKE ABOUT JOHN TYLER COMMUNITY COLLEGE'S PROGRAMS OR SERVICES.

DIVISION OF BUSINESS

ACCOUNTING:

- I found the faculty and staff to take a personal interest in the students and their needs. The atmosphere is so very warm and friendly I find it hard to turn John Tyler loose for another college.

BEVERAGE MARKETING:

- I am currently enrolled at Tyler. It is my desire to complete the Business Administration program and transfer to VCU or VSU.

DATA PROCESSING:

- John Tyler's programs are excellent for people looking for a job skill.
- I would recommend JTCC to anyone interested in securing a degree in D.P. I enjoyed it tremendously. It was inconvenient to "fight the crowds" in the computer room and at registration. I was well trained for my profession at John Tyler. A basic course in terminal operations would have been helpful. Thank you, John Tyler Community College!
- I am a handicapped student. I found that the consideration and support of the faculty is excellent. Accessibility to all areas is good.
- The courses were very educational and I enjoyed them very much. But after I graduated, I tried to find a job as a computer programmer and couldn't, mainly because of my job skills.
- It provides a good start for any field you could enter. It gave me the chance to obtain knowledge to get my first job.
- I would recommend John Tyler to anyone.
 It is good to have some kind of degree. However, if I had known that VSU would not accept my credits because they are of a lower level of study, I would never have attended Tyler. I can sincerely say, however, that the time spent at Tyler was 100% positive; nothing negative can be associated with it.
- Good instructors and course content. I enjoyed Tyler.
- Some of the business courses are not challenging they put you to sleep in class. I feel this is presentation rather than course content. Some of the teachers are teaching by rote rather than studying to present the material better. Business Management and Personnel are two of those classes.
- I enjoyed my four years at JTCC. Although it was a hectic pace, the instructors were fair and did an EXCELLENT job of presenting the material. I personally would like to see it turned into a four year school. I believe we have enough people in this area who would support it.

GENERAL COMMENTS, Cont'd.

- I enjoyed the classes at JTCC. I feel I received as much from associations with other students and faculty as from the courses I took. The challenge and sense of accomplishment alone was worthwhile. My primary objective, however, was to add the AAS degree to my experience in the job to qualify me for advancement.
- Very nice college.
- The teachers at John Tyler are superior to most other teachers in education. They are people who really care for the students (most of the teachers). I would like to see more community participation.
- I was told John Tyler would help people look for a job if the person signed up. Well I did and the counseling center did nothing. Therefore I was on my own. As you see from this questionnaire, I did not (and I looked) find a job related to my field of study.
- Please scratch me off all surveys unless you want extremely specific names.

POLICE SCIENCE:

- Overall, provided are the services that I needed. Had real problems on occasion getting the classes I needed at night.
- JTCC was a very successful institution in regards to my education. The faculty and staff are an asset to the institution. The hard work the faculty did has paid off in my education.
- 1. I enjoyed my classes. 2. The course is relevant (Police Science) but needs to be updated. 3. The instructors are excellent. 4. The books cost too much money could be saved by just having paper backs!
- The college has given me a great deal of confidence, and overall the staff and faculty have been very helpful. I have no regrets.

SECRETARIAL SCIENCE:

- The instructors I have been priviled to study under have acted as teachers, counselors, and friends. Their encouragement and concern helped me through a very difficult time of life.
- I was particularly impressed with the high quality of the staff at Tyler. I also feel the courses in which I was enrolled were, in most cases, excellent. By my attending Tyler, I feel if I were to pursue my college studies further that I have been provided with an excellent background by which to do so. I feel that with Tyler's excellent staff and instruction and the overall cooperative and friendly environment of the school among students and instructors, that Tyler rates very high marks as a community college.

DIVISION OF COMMUNICATIONS AND SOCIAL SCIENCES

CHILD CARE AIDE:

- The Child Care program has helped me greatly to increase my knowledge in my field. Johnny Humphrey was always there when I needed her and most all of the teachers were excellent in their teaching. The Child Care program was

GENERAL COMMENTS, Cont'd.

- excellent when I first enrolled eleven years ago, and it continued to get better.
- Johnnie Humphrey is the best instructor in Day Carc courses. She really knows her stuff and goes over and beyond the call of duty. I hope you appreciate her as much as we do.
- I feel Tyler offers a great Child Care program. Mrs. Humphrey is a fantastic coordinator and instructor. I gained tremendous knowledge and advanced my teaching abilities.
- I found my experience at John Tyler to be very rewarding. I was made to feel comfortable even though it had been 20 years since I had attended College. I have only the highest regard for Johnnie Humphrey. She was very encouraging, support we and an excellent teacher.

HUMAN SERVICES:

- I feel very much at home at JTCC. The nursing program seems to offer a challenge not found in the Human Services field.
- Overall my 2 years in the Human Service Program were great! I learned so much about myself and others in the Social service field. I enjoyed all my courses and each instructor was very educated in his/her field. However, in my last year I felt that the Program Head, Yvette Ridley, was very busy and showed a lack of concern for her students. She is a very intelligent woman and I nold a lot of respect for her. Yet, I feel that I along with other students suffered a great deal our last year of school.
- I was satisfied with the program and services. I would like a part-time job at a work shelter or a place like Mary Carter Brown House. I have found only substitute work at a Day-care (child) center. I would like a permanent part-time job in child daycare, but so far I have not gotten it.
- John Tyler has enriched me greatly on an educational basis and the instructors are to be highly commended. I only wish that I could have attended for the whole four years. The instructors aren't the type who give you the impression that they have theirs and you got yours to get. They are very helpful and considerate.
- I feel very fortunate to have attended and graduated from John Tyler. The course work was stimulating, challenging and interesting. The experience of going to college was beneficial to me in many ways. I grew as a person in confidence and self esteem as well as growing in my field of interest. I received an excellent education which prepared me for my present job in Mental Health which I love. Hopefully I will eventually go on to get my BA in psychology and John Tyler has prepared me to do this with confidence.

TEACHER AIDE:

- I really enjoyed myself while attending JTCC. I would do it all over again. Only my family and myself really know all the fine education that I received during my two year stay. JTCC, keep up the good work.
- The services at John Tyler were very satisfactory. I truly enjoyed attending the college while I was there.
- John Tyler has an excellent program and wonderful services. I intend to come back to attend JTCC to pursue a Human Services degree. I thought I would never attend college because I lacked a high school diploma or GED. I have successfully completed my course at the school and I am well on my way to a dynamic career. Thank you JTCC!

DIVISION OF ENGINEERING TECHNOLOGIES

ARCHITELIURAL TECH:

- The institution is not progressive enough to maintain pace with current technological advances, i.e., most lab equipment is outdated. This problem could be corrected at minimal expense by leasing electronic and computer equipment such as surveying instruments or computer aided drafting stations rather than being stymied for years from a previous capital expenditure.
- I feel your school has a good program in the auto field, but there was always a shortage of equipment.
- I was pleased that John Tyler offered the courses I was interested in attending. Dave Horne is a good teacher (evaluated on only 2 courses I had under his instruction). Some teachers were very biased in their opinions and were not listening to students when they talked (F. Wilson) (had him twice). Overall John Tyler helped me achieve a new goal I was looking for. I have recommended the school to others; some of these have and are attending.

ELECTRONICS:

- I enjoyed every minute at John Tyler College. The relationship between students, instructors, counselors, and other personnel at the college is unexcelled. I hope to come back shortly and take other classes. There is one small problem. John Tyler is on a quarterly system and Virginia State is on the semi-annual system. This presents a problem in the transfer of credits. Virginia State started me off with a Fortran class. The instruction was excellent but the equipment was an antiquated key punch system that continually was in need of repair. It absorbed too much time waiting for the machines, then waiting for the programs to be run. I withdrew until the first of the year, when, I'm told, the new equipment will be in operation. My time is such that driving 20 miles is too costly just to wait my turn. If it had not been for the antiquated system at Virginia State, I would have possibly signed up for a class at John Tyler in the fall. I'm hoping after the first of the year to be back on schedule in both colleges.
- In the electronics curriculum I feel more emphasis should be placed on trouble shooting. I felt that the course was geared more toward transferring to a four year college rather than working as a technician with a two year associate degree.
- I feel that John Tyler Community College has fully prepared me for furthering my education at a 4 year university. The instructors and students at John Tyler were always friendly and courteous. I would not hesitate in recommending the College to a friend.
- I feel that John Tyler is an excellent school and provides quality training in the field of electronics. Basically the school could use more equipment and improvement in its current lab equipment for electronics. Over all I feel proud of my training received at John Tyler!
- Keep up the good work!
- It serves the task of community college with a trade oriented basis very well but in the area of "pre college" (4 years) the courses are limited. No calculus and etc. The night school instructors quality varies widely

GENERAL COMMEN'IS, Cont'd.

- from excellent to questionable. Thanks for having the school available, it allowed me to develop a new career in a caring inexpensive environment.
- In regard to the programs and services, I have no complaints. The instructors are the weak point in the administration. The electronics instructors seem to be more concerned with appearance of a students work rather than actual operation. The instructors are known to ramble on about non-relative items rather than test items that should have been covered. The result was often very low grades with very high curves. Come exam time, the students often have no idea what will be tested due to continuous flip-flapping of the instructors. This, to me, is what causes so many curriculum changes from electronics.

ENGINEERING TECHNOLOGY - GENERAL

- I feel my studies at John Tyler Community College greatly developed my skills and study habits. The course content was very relevant to my field of study and prepared me to enter into an Engineering curriculum which I was not prepared to undertake directly out of high school. I am presently living with three other former JTCC Engineering Tech. students and all of us feel we received at least as good if not better preparation for junior level courses than students who have been at a university for two years. I have been told many times by other students that they wish they had started at a junior college to receive a more stable base for their education.
- JTCC has a much better learning atmosphere due to the friendlier attitude of the faculty.

INSTRUMENTATION:

- I was very pleased with the availability of a tutoring service thru the Learning Center because of the difficulty I encountered with one teacher's attitude and teaching method.

MACHINE SHOP:

- I plan to further my employment opportunities in my career field as a machinist. I plan to go into a machinist position in the near future.

WELDING:

- (refers to finding out about job) After completing welding course, I decided to re-enroll in the Electronics Eng. course and I applied to Safeway for p/t employment to help finance my studies as I could get no financial aid to attend school. During welding I was employed if Winn-Dixie p/t.
- (refers to job related) I have to wait until next Feb. to receive my certification in Welding and though I have applied at several places, I was not offered employment due to no on the job experience and no certification.
- (refers to opportunity for advancement) Since I had been employed in Grocery store, 3½ years at Winn Dixie in high school and during my Welding, I have a great deal of training and feel I can advance rapidly at Safeway. I plan to give it a try.

GENERAL COMMENTS, Cont'd.

- (refers to continuing education) After completing Welding, I re-enrolled to study Electronics Eng., Sept. 15, 1985. I found that this would require a great deal of study time and I would not be able to attend class all day and work half the night and keep up. I asked for financial aid, and received none. My father is dead and my mother is unemployed and could not help me, so I will not attend the Winter Semester.

DIVISION OF MATHEMATICS AND NATURAL SCIENCES:

FUNERAL SERVICES:

- John Tyler offers the only AAS Degree in Funeral Service in Virginia (the first and only that I know of). I was proud to have attended JTCC for that one reason. I would like to suggest that the AAS degree program in Funeral Services be required as a minimum standard for all Virginia students entering the Funeral profession and planning to be licensed by the Commonwealth of Virginia. (If the state board would agree, it would enhance standards and quality of people)
- The mortuary science curriculum was in such a mess that I doubt if the Lord Almighty could straighten it out. You need some fresh blood in your teaching staff and not that tells how to do things his way. I just took my V₁. Board Exam yesterday and my National Board in June, and not one of the exams asked how did things. That's a minor complaint about your school. If you would like more comments contact me. If I were you folks I would really be concerned about the reputation your school has in this state.
- John Tyler Community College was very instrumental in assisting me to reach a life-long goal. . .licensure as a Funeral Director/Embaluer. As a Military Servicemember, the Academic Faculty was very supportive of me when my military duties interfered with my academic schedule. I salute the entire Funeral Service Faculty.
- John Tyler C.C. offers an opportunity for apprentices at funeral homes to work and go to school at the same time. The instructors at JTCC were always willing to give their time to help you out with any problems.
- The programs and services at John Tyler are outstanding, especially the Funeral Service Program. Not because I am a former graduate of that program, but because it is the only one in the state. To think that a person can come from as far as New York State exemplifies the outstanding achievements which are made at JTCC. The services provided by the staff at JTCC demonstrates the uniqueness of our alma mater. I enjoyed my stay. I hope to attend at a later date for an update courses related to my field.
- Funeral Services faculty (especially Mr. Binga and Mr. Thornton) were very supportive. They are concerned individuals committed to improving the image of the John Tyler Community College Funeral Service Program among local funeral directors. Request the administration support the Funeral Service Program (funeral supplies & literature) to the fullest.

NURSING:

Nursing curriculum doesn't adequately prepare you for the volume of work
 (i.e. much larger patient load) as staff nurse. Also, I feel as if I was
 inadequately prepared to handle the "paperwork" aspects of nursing

GENERAL COMMENTS, Cout'd.

- (i.e., transcribing Drs. orders, etc.). I'm not sure how these could be incorporated into the program, though.
- Before coming to John Tyler, my income as a waitress barely helped me survive. I always wanted to be a nurse and now I am. I'm independent and enjoy my job. John Tyler graduates have a very good reputation I've found since working at the VA.
- I feel that John Tyler gave me a good strong basis for my nursing career. The course was hard but very fair. I felt well prepared for state boards and did very well. I felt well prepared to go to work and make good, sound decisions as a professional nurse.
- The open admission policy is greatly appreciated by many who might not have been able to get a college education without it. In my program of study (nursing) I have found that I am, in most situations, clinically above average than Baccalaureate Degree nurses. I owe this to the nursing instructors and their superior professionalism.
- I feel that my years attending JTCC were of great value. As a woman in my 30's, the goal of becoming a registered nurse would have been beyond my grasp; however, thanks to the relatively inexpensive and high quality of education I received at JTCC I was able to fulfill a life-long goal and I am now practicing in the profession of my choice.
- Nursing Program In the last quarter we cared for up to 5 patients. This is essential and recommend you continue because in the hospital we usually don't get fewer that 6 patients and as many as 12 to care for. I think JTCC has an excellent nursing program.
- I intend to continue my education in 1986. Plan to work on my baccalaureate degree in nursing on a part-time basis. I was disillusioned with Tyler's nursing program because of poor teaching abilities of some of the instructors. This added so much to the difficulty of the program.
- I was able to meet my goals without any difficulty with the help of JTCC Nursing faculty.
- John Tyler is an inspiring school. It provides for advanced education in a short length of time and at a reasonable cost. The scheduling of classes is flexible for the working person and the instructors overall are beneficial. The Nursing Program is extremely challenging and "nerve racking" but very informative and comprehensive for state boards.

SCIENCE:

- The quality of the instruction I received at JTCC was no less than excellent, particularly in Chemistry and Mathematics. I would and have recommended JTCC to prospective students. I graduated from JTCC with an Associate in Science Degree and transferred to VCU. Unfortunately, Tyler offered only Freshman courses in Science and Mathematics. Perhaps this situation will change when enrollment and demand for higher level courses increase. I would like to add, however, that all of my credits did transfer, and the English and Humanities/Social Science courses required for the A.S. Degree have almost completely fulfilled the English and Social Science requirements for a B.S. in Chemistry. I was impressed by the variety of courses and programs at Tyler, and I liked the small class size, but the school's best feature is its instructors. They are competent and never too busy to speak with a student.

A.8 WHY DID YOU CHOOSE TO ATTEND JOHN TYLER COMMUNITY COLLEGE? (Respondent chose "Other" and wrote:)

BUSINESS DIVISION

SECRETARIAL SCIENCE:

- Quality of programs and staff. (Given as secondary reason.)

DIVISION OF COMMUNICATIONS AND SOCIAL SCIENCES

CHILD CARE AIDE:

- Scholarship
- To upgrade job

DIVISION OF 'NGINEERING TECHNOLOGIES

ELECTRONICS:

- Interest shown by instructors and other personnel.

DIVISION OF MATHEMATICS AND NATURAL SCIENCES:

FUNERAL SERVICES:

- ONLY Funeral Services school in VA.
- B.2. WHAT WAS YOUR PRIMARY GOAL IN ATTENDING JTCC? (Respondent wrote the following by "other.")

DIVISION OF MATHEMATICS AND NATURAL SCIENCES:

FUNERAL SERVICES:

- To meet VA State Board of Funeral Directors & Embalmers requirements.
- Prerequisite for Funeral Service License prior to changing professions.
- B.8. WOULD YOU RECOMMEND THE COLLEGE TO A PERSON SEEKING TO COMPLETE THE SAME PROGRAM? (Respondent circled "no" and wrote:)

DIVISION OF BUSINESS

BUSINESS MANAGEMENT:

- Credits are not easily transferred to a four year college.
- I would recommend a four-year university if financially able.
- Because VSU wouldn't accept the majority of the courses taken at Tyler.

A.B WHY DID YOU CHOOSE TO ATTEND JOHN TYLER COMMUNITY COLLECT: (Respondent chose "Other" and wrote:) (Cont'd)

DATA PROCESSING:

- Because of certain instructors.
- I feel that even with an Associate in Applied Science Degree in Data Processing, it is almost impossible to obtain employment in that field. It seems that most employers do not regard John Tyler or their programs very highly.

ELECTRONICS:

- Job Placement
- Career Change

DIVISION OF MATHEMATICS AND NATURAL SCIENCES:

FUNERAL SERVICES:

- I really need about ten pages to answer this. Your mortuary science program needs very <u>drastic</u> changes made. If you want more comments on improvements contact me. Sincerely, David L. Boor

NURSING:

- Respondent circled "yes" and wrote "and I have done so."
- Do not like the way the Nursing program is set up. Quality of instruction at times was very poor.
- Too demanding. Would recommend 4 yr degree if possible.

- D.3. ARE YOU CURRENTLY PURSUING THE SAME FIELD OF STUDY THAT YOU COMPLETED AT JOHN TYLER COMMUNITY COLLEGE?
- Respondent circled "no" and wrote, "I changed from Engineering Technology to Engineering (still Mechanical).
- General Engineering
- D.4. DID YOU HAVE ANY PROBLEMS TRANSFERRING TO THE INSTITUTION YOU ARE NOW ATTENDING?
- I transferred here into Engineering Technology which accepted almost everything (I was a junior). In Mechanical Engineering some technology credits are not accepted.
- D.5. HOW DOES THE QUALITY OF INSTRUCTION AT JOHN TYLER COMMUNITY COLLEGE COMPARE TO THAT OF THE SCHOOL YOU ARE NOW ATTENDING?
- The university setting is much different from a community college setting. The instruction at John Tyler is very close to one on one student-teacher communication. At a university you are in a crowd and treated very indifferently by instructors.

APPENDIX

November 15, 1985

Jour HELP 1

Dear Graduate:

Just a reminder . . .

Two weeks ago we mailed you a questionnaire to determine your current activities, as well as to have you evaluate John Tyler Community College. This survey is part of an ongoing effort to improve our academic and student services. Your comments are vital to this overall assessment.

Please take a few moments, complete the enclosed survey, and mail it back right away. A second questionnaire and self-addressed envelope are enclosed for your convenience. Please be assured that your comments will be summarized along with those of other graduates. The questionnaire is coded for follow-up purposes only.

Thank you for assisting us in this important study in order that we may better serve future students.

Respectfully,

Carol S. Hollins

Coordinator

Institutional Research

ERĬC

PLEASE RESPOND

December 6, 1985

Dear Graduate:

Did you forget?

About a month ago you should have received a questionnaire from John Tyler Community College that was sent to all 1985 graduates. This survey is part of our ongoing study of the College's academic program and student services. Your comments are most important and will be handled with strict confidence. The results will assist the College administration and faculty in future program planning.

In case you never received a copy of the questionnaire or misplaced it, another one is enclosed for your convenience, along with a self-addressed, stamped envelope. The questionnaire is coded for follow-up purposes only. Please take the time to complete it and mail it in today. If you have already mailed your questionnaire, consider this a thank you.

We appreciate your cooperation in this important effort. Your comments will greatly assist us in serving future students.

Respectfully,

Carol S. Hollins

Coordinator

Institutional Research

GRADUATE FOLLOW-UP SURVEY INSTRUMENT

Dear Graduate:

We are conducting our annual survey of graduates in an effort to: (1) determine the extent to which the College assisted you in reaching your goal(s); (2) ascertain information concerning your present occupation or student status; and (3) evaluate the effectiveness of JTCC's academic and student services.

Your input is invaluable to us. Please take a few minutes and complete all items that are applicable. Kindly circle (1) the number next to the appropriate response or fill in the blank.

Thank you for your assistance.

F. W. Nicholas, Sr. President, JTCC
