IDENTIFIERS *United States (South)

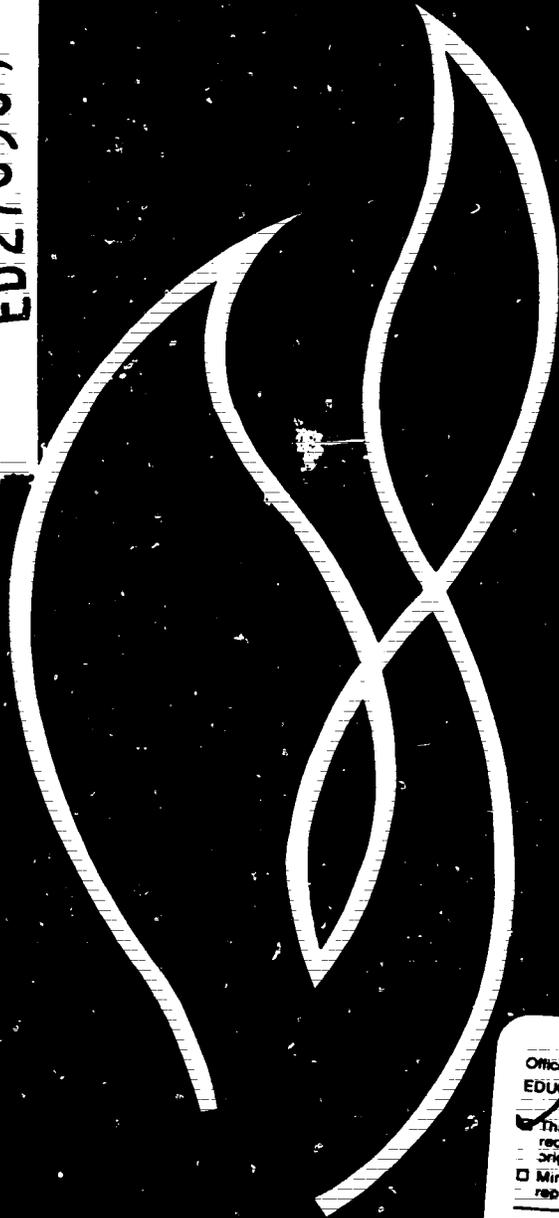

ABSTRACT

Data are presented on higher education in the South in 1986, including 67 tables and brief descriptions of the latest available statistics for the United States, the Southern Regional Education Board (SREB) region, and the 15 individual SREB-member states. Information is grouped under six headings: population, education, and economy; institutions and enrollment; degrees; institutional finances; student finances; and faculty. Findings include the following: enrollment growth in SREB states (6%) is almost five times greater than the nationwide increase, although the college enrollment rate in SREB states is below the national average; more than one-third of the college students in SREB states are enrolled in two-year colleges; part-time students now represent over 40%, and women 53% of all college enrollments; in SREB states, black students represent 14% of college enrollments; the number of black college students has fallen nationwide; about half of the student aid awarded by SREB state-supported programs is based on the financial need of the students, nationwide the figure is 85%; both nationally and in SREB states, the proportion of state taxes going to higher education fell between 1982 and 1984. A list of SREB-member state agencies responsible for coordination of higher education is provided, including addresses, phone numbers, and top officials. (SW)

2

HIGHLIGHTS

- The population of the SREB states — nearly 81 million people — is expected to grow at twice the nationwide rate until at least the turn of the century. The 15- to 24-year-old age group will be a smaller proportion of the population by that time; minorities will represent a larger proportion of this young adult population.
- The number of high school graduates will decline through the 1980s, but increases in the 1990s will raise the number in the SREB states to above the 1980 levels.
- Personal income per person in the SREB states stands at 91 percent of the United States average and there has been little relative gain by the SREB states in the last 10 years. The amount of state and local taxes collected for every \$1,000 of personal income in the SREB states is 87 percent of the national average. State and local government spending on a per person basis in the SREB states stands at 83 percent of the national average. So far in the 1980s this gap between the SREB states and the national average has widened.
- In the SREB states the college-going rate remains below the national average. So far in the 1980s, however, enrollment has increased 6 percent — almost five times the nationwide increase.
- More than one-third of the college students in the SREB states are enrolled in two-year colleges. Part-time students now represent over 40 percent, and women 53 percent of all higher education enrollments.
- For the first time in decades, the number of black students in college has fallen nationwide. In the SREB states there has been a small increase. Even with this increase, black students represent only 14 percent of the enrollment.
- Women receive over half of associate, bachelor's, and master's degrees awarded in the SREB states, 35 percent of doctoral degrees, and 27 percent of the degrees awarded in law, medicine, dentistry, and veterinary medicine.
- Black students receive 15 percent of the associate degrees, 11 percent of the bachelor's degrees, 9 percent of the master's degrees, 5 percent of doctoral degrees, and 4 percent of the degrees in law, medicine, dentistry, and veterinary medicine awarded in the SREB states. These percentages are declining.
- For years, the amount of state tax dollars per citizen in the SREB states going to higher education had been above the national average, but it now stands at the national average. Both nationally and in the SREB states, the proportion of state taxes going to higher education fell between 1982 and 1984.
- State resident undergraduate students now pay tuition and required fees of more than \$1,000 per year in most SREB state-supported four-year colleges. The comparable figure at two-year colleges is about \$425.
- About half of the student aid awarded by SREB-state programs is based on the financial need of the students; nationwide the figure is 85 percent.
- In the last two years faculty salary increases have exceeded inflation. However, salaries have not risen enough to close the gap created over the last 10 years when the opposite was true.

FOREWORD

Thirty years ago the Southern Regional Education Board published its first *Fact Book on Higher Education* chronicling the development and progress of higher education. This 1986 edition, which follows the 1984 biennial edition, continues the tradition of emphasizing significant national, regional, and SREB-state trends affecting decisions about higher education. Population, education, and economic trends are described. Trends in higher education — institutions and their enrollments, degrees granted, finances, costs to students and financial aid provided them, and faculty salaries — are reported.

To present the latest available information, the *SREB Fact Book* relies on the annual SREB-State Data Exchange with state higher education agencies. This regional survey — now in its 17th year — is widely recognized as among the most accurate and timely sources of data on state higher education appropriations, faculty salaries, full-time-equivalent enrollments, degree output, and tuition and fees. In some cases preliminary data are used. We appreciate the cooperation of state higher education agencies in the region. We also wish to thank several federal agencies for providing unpublished data: the National Science Foundation, the U.S. Bureau of Health Professions and various offices of the Department of Education, including Student Financial Assistance, Postsecondary Education, Center for Statistics, the Region IV office, and the Office for Civil Rights.

Since the publication of the last edition of the *SREB Fact Book*, Oklahoma has become a member of the Southern Regional Education Board. We are pleased to add Oklahoma data in the *SREB Fact Book, 1986*. In virtually all cases, historical trends have been recalculated to include Oklahoma data in the regional statistics. This recalculation means that averages and totals for the "SREB States" in this *SREB Fact Book* are not comparable to those published in previous editions — the 1986 totals and averages reflect a 15-state region; the 1972 through 1984 biennial *SREB Fact Books* reflect a 14-state region.

Suggestions and comments concerning the information and its presentation in the *SREB Fact Book* are welcomed.

Winfred L. Godwin
President

SREB STATE PROFILES 1986

The SREB *Fact Book on Higher Education, 1986* contains 67 tables presenting the latest available statistics for the United States, the SREB region, and the 15 SREB states individually. Organized under six headings, the tables include trend data helpful to higher education planners and decision-makers.

The "SREB State Profiles," (pages 2 through 7) present a selection of statistics from each of the six headings: *population, education, and economy; institutions and enrollment; degrees; institutional finances; student finances; and faculty*. The numbers in parentheses refer to the particular tables elsewhere in the *Fact Book* that contain more complete information and a full citation of sources.

These profiles provide a convenient "at-a-glance" overview of the progress and position of higher education in the region and individual SREB states. The reader should be careful to take into account the wide range of interstate differences that can affect the comparability and relative rankings of the data. SREB's approach to comparative data is to compile as many related measures as feasible and evaluate them to see if they all support similar conclusions, and to question dramatic findings to see if they represent real differences or statistical quirks.

SECTION 1 POPULATION, EDUCATION, AND ECONOMY

NOTES: The "adult" population consists of persons 25 years old and above. U.S. average percent of adult population with college degrees is 16.2 percent. U.S. average per capita personal income in 1984 was \$12,789.

SOURCES: U.S. Department of Commerce, Bureau of the Census, *1980 Census of Population, "General Social and Economic Characteristics,"* PC80-1-C1 and PC80-1-C2 (Washington, DC: U.S. Government Printing Office, 1983); U.S. Department of Commerce, Bureau of Economic Analysis, "Survey of Current Business," Vol. 65, No. 8 (August, 1985).

POPULATION, EDUCATION, AND ECONOMY

Highlights

- Over one-third of the nation's population is in the SREB states — nearly 81 million people. The population growth rate in the SREB states has been nearly twice the nationwide growth rate, and is expected to remain so until the turn of the century. More than 60 percent of this projected growth is to take place in Florida and Texas; about half of the SREB states may have increases below the national average. Unlike the national trend, the trend in the SREB states is toward increases in the proportion of the population living in metropolitan areas (see Table 1).
- Between now and the turn of the century, the “Aging of America” will become more and more evident in the SREB states. Young adults, those 15 to 24 years old, who account for one of every five people in 1980, will be only 13 percent of the total population in the year 2000 (see Table 2).
- Minorities will represent a larger proportion of the school- and college-age populations in the years ahead. In the last census, black, Hispanic, or other minorities were one of every four persons in the SREB states; one of every three persons in the population under 5 years of age (see Table 3).
- In the last 10 years, public elementary and secondary school enrollments have declined, but much less in the SREB states (4 percent) than in the nation (13 percent). Minority students represent over one-third of elementary and secondary school enrollments (public and private) in the SREB states (see Table 4).
- Adults in the SREB states average fewer years of formal education than adults nationwide. Nearly 23 percent (almost 10 million people) have not completed 9th grade — a level of education often used to define “functional literacy” — compared to 18 percent nationwide. In the SREB states 60 percent of adults are high school graduates whereas 67 percent of the nation's adults have completed high school. The gap in adults with college degrees is less, which reflects the SREB states' dramatic success in providing access to higher education and the migration of college-educated people to the SREB states (see Table 5).
- By the end of the 1980s, it is projected there will be 70,000 (8 percent) fewer high school graduates in the SREB states than in 1980. But, in the 1990s, the number of high school graduates is expected to increase sharply in the SREB states while it is to fall sharply nationally. This will raise the number of high school graduates in the SREB states to above the 1980 level (see Table 6).

- Income per person in the SREB states reached \$11,662 in 1984 — 91 percent of the national average of \$12,789. There has been little relative gain by the SREB states in the last 10 years. Total employment has grown faster than nationwide, but unemployment rates are higher. A shift from an agricultural, mining, and manufacturing base to a trade and service economy has generally spurred metropolitan strength and weakened non-metropolitan economies. Until recently, areas dependent upon oil and gas revenues have been high economic growth areas (see Table 7).
- State and local tax revenues have been increasing at a faster rate than personal income. Over the two-year period for which the most recent data are available, state and local tax revenues in the SREB states grew 19 percent to \$85 billion; personal income grew 17 percent to \$925 billion. Both increases were slightly less than the comparable nationwide growth. For every \$1,000 of personal income, \$106 in state and local tax revenues were collected nationally; in the SREB states, the tax revenues were \$92 (see Table 8).
- State and local governments in the SREB states spend over \$2,100 per person — 83 percent of the national average. In the 1970s, state and local expenditures per person in the SREB states moved closer to the national average, but so far in the 1980s, the gap has widened (see Table 10).

SECTION 2 INSTITUTIONS AND ENROLLMENT

PERCENT CHANGE IN HIGHER EDUCATION ENROLLMENT 1980 TO 1984

ENROLLMENT OF ALL STUDENTS

ENROLLMENT OF BLACK STUDENTS

SOURCES: SREB analysis of U.S. Department of Education, Center for Statistics data tapes of fall enrollments in higher education 1980 and 1984; and *Chronicle of Higher Education*, July 23, 1986.

INSTITUTIONS AND ENROLLMENT

Highlights

- The college enrollment rate of adults aged 15 to 44 in the SREB states is below the national rate; 105 of every 1,000 adults attend college compared to 118 nationwide. Black adults enroll in college at lower rates than white adults (see Table 13).
- For every SREB state resident who is a first-time student and leaves his or her home state to attend college, 1.3 out-of-state students enter that state to attend college. In three-fourths of the SREB states the ratio is higher than this average (see Table 15).
- Over 3.5 million students attended higher education institutions in the SREB states in the fall of 1984. So far in the 1980s, enrollment growth in the SREB states (6 percent) is almost five times greater than the national increase (see Table 16).
- Two-year college enrollments in the SREB states now approach 36 percent of the region's higher education enrollments. Two-year college enrollments grew over 9 percent between 1980 and 1984 (see Table 17).
- A larger percentage of students attend public colleges and universities in the SREB states than nationally. In the SREB states, 84 percent of undergraduate students, 81 percent of graduate students, and 56 percent of those students studying medicine, dentistry, and law are in public colleges and universities (see Table 18).
- Part-time students now account for over 40 percent of higher education enrollments in the SREB states. Part-time enrollments in the SREB states grew 15 percent between 1980 and 1984, compared to a nationwide increase of only 3 percent (see Table 21).
- A majority (53 percent) of students in higher education in the SREB states are women; in 1976, women accounted for 47 percent of the enrollments in higher education. Since 1980, the enrollment of women has increased 9 percent in the SREB states, compared to a 3 percent increase nationwide (see Table 22).
- The enrollment of Hispanic students in the SREB states, 89 percent of whom attend colleges in Florida and Texas, continued to increase sharply between 1980 and 1984 (26 percent). Since 1976, Hispanic representation in colleges and universities in the SREB states has increased from 3 percent to 5 percent of total enrollment (see Table 23).
- For the first time in decades the number of black students enrolled in higher education fell nationwide — over 3 percent between 1980 and 1984. In contrast, the SREB states show a 2 percent increase in the number of black college students. Even with this increase, black representation in higher education was down to 14 percent in 1984 (see Table 24).

South Carolina	438	132	0.20	0.30	0.30
Tennessee	571	201	0.29	0.34	0.35
Texas	2,024	795	0.32	0.35	0.39
Virginia	763	283	0.25	0.38	0.37
West Virginia	208	79	0.32	0.34	0.38

* These figures represent the ratio of total college enrollment to the population aged 18 to 24. The percentage of the 18 to 24 year old population who attend college is not shown, but this "participation ratio" is often used as an approximation. Due to variations among states in the degree to which vocational-technical school enrollments are counted in collegiate enrollments, students attending college outside their state of legal residence, and because over a third of college students are over 24 years old, this "participation ratio" should be interpreted with caution.

West Virginia	15,180	8,072	2,636	17,114

NOTES: See Appendix for definitions of institutional categories. Full-time-equivalent enrollments (FTE) were calculated according to the following formula: undergraduate FTE equals undergraduate credit hours divided by 15; graduate FTE (including law students) equals graduate credit hours divided by 12; non-collegiate FTE equals non-collegiate clock or contact hours divided by a factor specified by the respondent to yield credit hours which are then divided by 15. Non-collegiate enrollments from vocational schools under state departments of education in Arkansas, Florida, Louisiana, and West Virginia were not reported. Shifts in the categories of institutions reporting for each state are due to changes in the numbers and types of degrees granted. Calculations are based on reports of credit hours creditable toward a degree or other formal award, including courses offered at extension centers. Excluded are correspondence, non-credit and "short" courses, and medical, dental, optometry, and veterinary medicine enrollments.

TABLE 26

Undergraduate and Graduate Engineering Enrollments

	Undergraduate		Graduate	
	Enrollment 1984	Percent Change 1981- 1984	Enrollment 1984	Percent Change 1981- 1984
United States	429,499	2.2	93,165	20.1
SREB States	121,752	-2.5	23,284	42.3
SREB States as a Percent of U.S.	28.3		25.0	
Alabama	9,995	5.5	848	65.9
Arkansas	2,324	-8.7	199	-1.0
Florida	11,322	18.0	2,437	74.1
Georgia	6,040	-15.9	1,208	9.2
Kentucky	3,096	-4.5	728	34.8
Louisiana	10,173	-21.3	1,251	19.1
Maryland	7,422	16.9	3,016	208.1
Mississippi	3,142	-0.4	309	22.1
North Carolina	8,202	1.9	1,328	70.2
Oklahoma	5,514	-15.8	1,321	38.6
South Carolina	4,826	2.4	857	37.3
Tennessee	9,841	-2.9	1,336	-3.9
Texas	28,944	-2.1	5,703	24.9
Virginia	8,379	2.7	2,141	61.3
West Virginia	2,532	-22.6	602	-11.3

NOTE: The notable increase in graduate engineering enrollments in Maryland between 1981 and 1984 is largely accounted for by the increased enrollment of part-time graduate students at Johns Hopkins University— from 242 in 1981 to 1,784 in 1984.

SOURCES: Engineering Manpower Commission, *Engineering and Technology Enrollments, Fall 1981 (1982) and 1984 (1985)* (Washington, DC: American Association of Engineering Societies).

SECTION 3 DEGREES

**PERCENT CHANGE IN BACHELOR'S DEGREES
AWARDED IN SELECTED FIELDS, 1978 TO 1983**

NOTE: See Table 31 for definitions of subject area categories.

SOURCES: U.S. Department of Education, Center for Statistics; unpublished data for 1977-78 and 1982-83.

45

DEGREES

Highlights

- In the SREB states, the number of associate degrees increased at the national rate (5 percent) between 1979 and 1983, but the increase in the number of bachelor's degrees was slightly below the national average (see Tables 27 and 30).
- The number of master's degrees has declined more in the SREB states (7 percent) than the nationwide decline of 4 percent (see Table 33).
- The number of doctoral degrees remained virtually unchanged, but the number of degrees in medicine, dentistry, law, and other first professional fields rose 12 percent in the SREB states — twice the national rate of increase (see Tables 38 and 40).
- Women received over half of the associate, bachelor's, and master's degrees awarded in the SREB states in 1982-83 (see Tables 27, 30, and 33), but only 35 percent of the doctoral degrees (see Table 37), and 27 percent of the degrees awarded in law, medicine, dentistry, and veterinary medicine (see Table 40).
- The number of associate degrees granted to black students between 1979 and 1983 in the SREB states increased more than nationally, with black students receiving 15 percent (see Table 29). The number of bachelor's degrees awarded to black students is declining and, consequently, black students now receive less than 11 percent of all bachelor's degrees in the SREB states (see Table 32).
- Master's, doctoral, and first professional degrees awarded to black students have declined sharply, though less sharply than nationally. Black students receive 9 percent of the master's degrees, 5 percent of the doctoral degrees, and 4 percent of the first professional degrees awarded in the SREB states. These percentages are declining (see Tables 35, 38, and 41).
- Since 1978, there have been dramatic shifts in the fields in which students take their degrees. Business and management degrees have increased most dramatically, followed by degrees in the sciences and technology. SREB-state increases have been proportionally greater than the national increases. Education and social and behavioral science degrees have declined most, though less in the SREB states than nationally. Health professions degrees at the doctoral level have shown remarkable increases, especially in the SREB states (see Tables 31, 34, and 39).

NOTES: For 1977-78 the subject areas were defined as follows: humanities (fine and applied arts, foreign languages, letters, theology), education, business and management, sciences and technologies (agriculture, architecture and environmental design, biological sciences, computer and information sciences, engineering, mathematics, physical sciences), social and behavioral sciences (area studies, home economics, psychology, public affairs and services, social sciences), and health professions. Excluded for 1977-78 were communications (general and other), law, library science, military sciences, and interdisciplinary studies. For 1982-83 the subject areas were defined as follows: humanities (foreign languages, letters, liberal arts and general studies, philosophy and religion, theology, visual and performing arts), education, business and manage-

— Data not available.

NOTES: "Program" is defined according to the Higher Education General Information Survey (HEGIS) classifications in effect prior to conversion to the Classification of Instructional Programs (CIP).

Complete information on terminations and consolidations of doctoral programs is not available; however, significant numbers of such program eliminations are known to have occurred in several SREB states.

SOURCE: SREB Doctoral Information Exchange, 1971 through 1985.

SECTION 4 INSTITUTIONAL FINANCES

STATE APPROPRIATIONS FOR OPERATING EXPENSES OF HIGHER EDUCATION

TWO-YEAR CHANGE, 1984 TO 1986

PER \$1,000 OF PERSONAL INCOME

SOURCES: M.M. Chambers and Edward R. Hines, *Appropriations of State Tax Funds for Operating Expenses of Higher Education, 1985-86* (Washington, D.C.: National Association of State Universities and Land-Grant Colleges, 1985); U.S. Bureau of Economic Analysis, *Survey of Current Business*, Vol. 65, No. 8 (Washington, D.C.: U.S. Government Printing Office, 1985).

INSTITUTIONAL FINANCES

Highlights

- SREB-state governments annually appropriate over \$10.4 billion of tax funds for the operating expenses of institutions of higher education. Between 1975 and 1985, the percentage increase in SREB-state higher education appropriations was greater than that of the nation as a whole and the amount of state tax dollars per citizen going to higher education was above the national average. However, recent tax revenue shortfalls in Louisiana and Texas have moved the SREB states' rate of increase below the national rate, and appropriations stand at the national average of \$129 per person (see Table 44).
- Appropriations for higher education operating expenses have historically accounted for a larger proportion of state taxes in the SREB states than nationwide. Higher education receives 16 percent of state taxes in the SREB states, compared to the nationwide figure of 13 percent. However, both nationally and in the SREB states, the proportion of state taxes going to higher education fell between 1982 and 1984 (see Table 46).
- Higher education is big business; in fact, its \$18 billion total revenues and expenditures are nearly the same as the gross revenues of the two largest non-energy-related corporations based in SREB states. Since the mid-1970s, increases in revenues and expenditures of public colleges and universities in the SREB states have been greater than the nationwide increases (see Tables 47 and 49).
- Public higher education institutions in the SREB states depend more on state appropriations than do public colleges nationwide, in part due to relatively lower revenues from tuition. Since the mid-1970s, this dependence has increased in the SREB states, while nationwide the percent of revenues from state appropriations has declined (see Table 51).
- The federal government awarded almost \$3 billion in research grants and contracts to universities and colleges in the SREB states in 1983-84. Among federal agencies, the Departments of Education and Health and Human Services awarded the most funds. Universities and colleges in the SREB states receive 48 percent of funds granted by the Department of Defense for higher education research but only 15 percent of National Science Foundation funds (see Table 52).
- The top 100 research universities in the country receive 86 percent of all federal research and development awards to higher education — the "top 20" or "top 100" list does not change much from year to year, nor does the share of funds. Johns Hopkins University in Maryland, which received \$243 million for its Applied Physics Laboratory, remained the top-ranked institution. An additional \$1.5 billion was awarded to other universities in the SREB states, more than half of which went to the 26 other universities in SREB states ranked in the top 100 (see Table 53).

NOTE: Appropriations exclude dollars for capital outlay and debt service. Also excluded are monies from sources other than state tax funds and all monies from federal sources, local sources, or student fees. The amounts include funds for health programs, state scholarship and other financial aid programs, and higher education coordinating or governing boards.

NOTE: "Auxiliary Enterprises" includes those essentially self-supporting operations which exist to furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics. Note that not all states support teaching hospitals through higher education budgets. "All Other" includes federal appropriations (other than contracts and grants), private gifts, grants and contracts, endowment income, sales and services of educational activities, independent operations, and other sources.

SECTION 5 STUDENT FINANCES

SOURCE: K.R. Reeht and J.S. Davis, *15th Annual Survey Report, 1983-84 Academic Year (1983)*, and *17th Annual Survey Report, 1985-86 Academic Year (1986)* (Deerfield, IL: National Association of State Scholarship and Grant Programs).

STUDENT FINANCES

Highlights

- In SREB state-supported institutions, the undergraduate tuition for state residents rose 5 percent between 1984-85 and 1985-86 — 10 percent in four-year institutions, 3 percent in two-year colleges. State resident undergraduate students now pay tuition and required fees of more than \$1,000 in most SREB state-supported four-year colleges. At two-year colleges, the comparable figure averages less than half this amount, about \$425 (see Table 56).
- Over \$819 million in federal student aid (Pell Grants) was awarded on the basis of need to over 834,000 students in the SREB states. Since 1980, the amount of funds to students in the SREB states increased 34 percent. This increase was above that for the nation because the number of students in the SREB states receiving aid increased only 3 percent while the nationwide increase was 11 percent. Students attending accredited proprietary institutions now receive 20 percent of Pell grant funds. The average grant to SREB states' students was just under \$1,000 per student (see Tables 55 and 57).
- Additional federal student aid funds amounting to over \$335 million were awarded to about 625,000 students in the SREB states through the college work study program, the national direct student loan program, and supplemental educational opportunity grant program (see Tables 58 and 59).
- Nearly \$228 million in scholarships and grants were awarded by SREB-state programs in 1985-86. About half of this aid was based on the financial need of the students. In contrast, 85 percent of the aid awarded by state programs nationwide was based on the financial need of students (see Table 61).

SECTION 6 FACULTY

CHANGE IN AVERAGE FULL-TIME FACULTY SALARIES PUBLIC INSTITUTIONS, 1985 TO 1986

FOUR-YEAR COLLEGES AND UNIVERSITIES

TWO-YEAR COLLEGES

*Oklahoma was not an SREB member state in the 1985 data year.

SOURCES: SREB-State Data Exchange with state higher education agencies, 1984-85 and 1985-86.

FACULTY

Highlights

- The average salary of higher education faculty members increased by 103 percent over the last 10 years, standing at \$32,213 in 1985-86. Inflation rose over 150 percent during the same period. This trend has reversed in the past two years, but faculty salaries have not closed the gap created over the last decade (see Table 62).
- Law, engineering, business, science, computer science, and mathematics faculty continue to have salaries above the overall faculty average and tend to get above average raises. In contrast, psychology, social science, humanities, fine arts, and college of education faculty have below average salaries and tend to receive below average raises (see Table 63).
- Faculty in master's level, baccalaureate level, and two-year colleges in the SREB states gained ground on the national salary averages in 1985-86, while salary increases for faculty at the doctoral-granting institutions (which account for nearly half of all full-time faculty) were slightly below the national average (see Tables 64, 65, 66, and 67).

* The United States salary figures are derived from American Association of University Professors data, which uses slightly different definitions for the "doctoral" category. See Appendix for SREB definitions of institutional categories.

NOTES: Salaries for SREB states are reported according to Higher Education General Information Survey (HEGIS) definitions. Salaries reported as 11-12 month appointments have been converted to 9-10 month equivalence by reducing the reported amounts by 2/11. The average salary data for Texas include average budgeted faculty salaries for both full- and part-time faculty.

— Data not available.

* The United States salary figures are derived from American Association of University Professors (AAUP) data. See Appendix for SREB definitions of institutional categories.

NOTES: Salaries for SREB states are reported according to Higher Education General Information Survey (HEGIS) definitions. Salaries reported as 11-12 month appointments have been converted to 9-10 month equivalence by reducing the reported amounts by 2/11. The average salary data for Texas two-year institutions are for full-time faculty in general academic programs only.

SOURCES: SREB-State Data Exchange with state higher education agencies 1984-85 and 1985-86; "The Annual Report on the Economic Status of the Profession, 1985-86," *Academe*, March-April 1986.

**SREB STATE DATA EXCHANGE
DEFINITIONS OF INSTITUTIONAL CATEGORIES***

Category	Definition
Doctoral I	Institutions awarding at least 100 doctoral degrees which are distributed among at least 10 HEGIS categories (2-digit classification) with no more than 50 percent of the degrees in any one category.
Doctoral II	Institutions awarding less than 100 but at least 30 doctoral degrees which are distributed among at least 5 HEGIS categories (2-digit classification).
Doctoral III	Institutions awarding less than 30 but at least 1 doctoral degree.
Master's I	Institutions offering master's level programs in 10 HEGIS categories (2-digit classification) and awarding at least 100 master's degrees.
Master's II	Institutions awarding less than 100 but at least 1 master's degree.
Baccalaureate	Institutions that award the baccalaureate degree as the highest degree.
Two-Year I	Institutions whose awards are exclusively, or almost exclusively, college-parallel associate degrees.
Two-Year II	Institutions whose awards are predominantly associate degrees in college-parallel or vocational/technical fields. (Some certificates or diplomas may also be awarded.)
Two-Year III	Institutions whose awards are predominantly certificates or diplomas, with some associate degrees.
Two-Year IV	Institutions whose awards are exclusively, or almost exclusively, certificates or diplomas. (The degree "Associate in Applied Technology" is included in this category.)
Specialized	Stand-alone institutions with specialized degree programs. These may include medical or health science center and, in some instances, stand-alone law schools, fine arts schools, and engineering schools, etc.

*Used in SREB State Profiles and Tables 14, 45, 56, 62, 64, 65, 66, and 67.

STATE AGENCIES RESPONSIBLE FOR COORDINATION OF HIGHER EDUCATION

This list includes for each state, the state agency or agencies responsible for the coordination of collegiate institutions, including those responsible for two-year college systems where this function is a separate or shared responsibility.

Alabama

Dr. Joseph T. Sutton, Executive Director
Commission on Higher Education
One Court Square, Suite 221
Montgomery, Alabama 36197-0001
(205) 269-2700

Dr. Charles Payne, Chancellor
State Department of Postsecondary Education
419 S. Perry Street
Montgomery, Alabama 36104
(205) 834-2200
(Two-Year Institutions)

Arkansas

Dr. Paul B. Marion, Jr., Director
Department of Higher Education
1301 West Seventh Street
Little Rock, Arkansas 72201-2993
(501) 371-1441

Florida

Dr. Charles B. Reed, Chancellor
Board of Regents
State University System of Florida
107 Gaines Street, Suite 210
Tallahassee, Florida 32304
(904) 488-4234

Dr. Clark Maxwell, Executive Director
Board of Community Colleges
Department of Education
Collins Building
107 West Gaines Street
Tallahassee, Florida 32304
(904) 488-1721

Dr. Thomas E. Furlong, Executive Director
Postsecondary Education Planning Commission
Knott Building, Room 304
Tallahassee, Florida 32301
(904) 488-7894

Georgia

Dr. H. Dean Propst, Chancellor
Board of Regents of the University System of
Georgia
244 Washington Street, S.W.
Atlanta, Georgia 30334
(404) 656-2200

Kentucky

Dr. Gary S. Cox, Jr., Acting Executive Director
Council on Higher Education
West Frankfort Office Complex
1050 U.S. 127, South
Frankfort, Kentucky 40601
(502) 564-3553

Louisiana

Dr. William Arceneaux, Commissioner
Board of Regents
161 Riverside Mall
Baton Rouge, Louisiana 70801-1389
(504) 342-4253

Maryland

Dr. Shedon H. Knorr, Commissioner
State Board for Higher Education
16 Francis Street
Annapolis, Maryland 21401
(301) 269-2971

Dr. James D. Tschechtelin, Executive Director
State Board for Community Colleges
Jeffrey Building
16 Francis Street
Annapolis, Maryland 21401
(301) 269-2881

Mississippi

Dr. E.E. Thrash, Executive Secretary and
Director
Board of Trustees of State Institutions of Higher
Learning
P.O. Box 2336
Jackson, Mississippi 39225-2336
(601) 982-6611

Dr. George V. Moody, Director
Division of Junior Colleges
State Department of Education
P.O. Box 771
Jackson, Mississippi 39205
(601) 354-6962

North Carolina

Mr. C.D. Spangler, Jr., President
University of North Carolina
General Administration
P.O. Box 2688
Chapel Hill, North Carolina 27514
(919) 962-6981

Mr. Robert Scott, State President
Department of Community Colleges
State Board of Education
Education Building
Raleigh, North Carolina 27611
(919) 733-7051

Oklahoma

Dr. Joe A. Leone, Chancellor
State Regents for Higher Education
500 Education Building
State Capitol Complex
Oklahoma City, Oklahoma 73105
(405) 521-2444

South Carolina

Dr. Charles A. Brooks, Jr., Interim Executive
Director
Commission on Higher Education
1333 Main Street, Suite 650
Columbia, South Carolina 29201
(803) 758-2407

Mr. G. William Dudley, Jr., Executive Director
State Board for Technical and Comprehensive
Education
111 Executive Center Drive
Columbia, South Carolina 29210
(803) 758-6919

Tennessee

Dr. Arliss L. Roaden, Executive Director
Tennessee Higher Education Commission
501 Union Building, Suite 300
Nashville, Tennessee 37219
(615) 741-3605

Dr. Thomas Garland, Chancellor
State University and Community College
System of Tennessee
1161 Murfreesboro Road
Nashville, Tennessee 37217
(615) 741-4821

Texas

Dr. Kenneth H. Ashworth, Commissioner
Coordinating Board, Texas College and
University System
P.O. Box 12788, Capitol Station
Austin, Texas 78711
(512) 462-6400

Virginia

Dr. Gordon K. Davies, Director
State Council of Higher Education
James Monroe Building
101 North Fourteenth Street
Richmond, Virginia 23219
(804) 225-2117

West Virginia

Dr. Thomas W. Cole, Jr., Chancellor
West Virginia Board of Regents
950 Kanawha Boulevard, East
Charleston, West Virginia 25301
(304) 348-2101
