Entrepreneurship File

ABSTRACT

This guide is intended to serve as a program planning model for a workshop or series of workshops to promote awareness and share information on the newly created Ohio Entrepreneurship File, one of five state data files operated on the computerized Ohio Career Information System (OCIS). The guide includes background information on the project for which the file was developed and workshop planning recommendations that describe logistical, organizational, and control issues relative to conducting the workshop. The guide also includes generically prepared presentations on the following topics: sharing information on the automated resource data base, discussing severalmodel programs in entrepreneurship and training, explaining the activities of the Ohio Entrepreneurship Education Task Force, and discussing specific ideas for local partnerships. Fifteen handouts are also provided. These address such topics as using the nominal group technique; the Ohio Entrepreneurship File Survey; a list of characteris ics (descriptors) used in the file; and instructions for contacting and using OCIS. Also included are fact sheets on the Entrepreneurship Training Pilot Project, Small Business Enterprise Center, and Small Business Management Program; a workshop evaluation form; and a list of members of the Ohio Entrepreneurship Education Task Force. FOREWORD

Fublic leaders in the state of Ohio have looked increasingly at small business and entrepreneurial development as a means to revitalize the state's economy and to rejuvenate its human resources. To help increase the statewide dissemination and utilization of relevant entrepreneurship education/training resource information, the National Center helped create an automated database of approximately 700 resources across Ohio. Called the "Ohio Entrepreneurship File," the database is available through the ongoing state operated computer network known as the Ohio Career Information System (OCIS).

The purpose of this planning guide is to serve as a model or template for organizing and conducting workshops that promote the awareness and use of the "Ohio Entrepreneurship File." The generic content and process information in the guide was prepared for delivery through any network of interested educators, job trainers, economic development specialist, or technical assistance providers.

The National Center wishes to thank the many individuals who helped produce the "Ohio Entrepreneurship File" and this workshop planning guide.

First and foremost, appreciation is extended to Mr. Robert Roliardi and Ms. Claire Durgin of the Houghton Mifflin Company, which provided the computer support services to this effort.

Additionally, special thanks go to Ms. Marrilyn Shipman and Ms. Anne Lika of the Ohio Career Information System within the

Ohio Division of Vocational and Career Education. Marrilyn and Anne provided substantial technical advice, review and moral support which increased greatly the efficiency of our efforts.

Appreciation is also extended to the members of the Ohio Entrepreneurship Education Task Force who supplied mailing labels for their respective service networks. These contributions served as the core of our survey efforts to more than 3,000 potential resource providers. The task force members include:

ir. Leon Albert Eark Technical College

M. Catherine Ashmore National Center for Research in Vocational Education te Ohio State University

r. Robert Bailey Ohio Technical Transfer Organization te Ohio State University

Ms. Susan Brusk Tunior Achievement of Central Ohio, Inc.

Mr. Larry Casterline Business and Marketing Education Vision of Vocational Education

Mr. Jim Cummins Agricultural Education ivision of Vocational and Career Education

Mr. Mark Davidson Vational Federation of Independent Business

Ms. Shery Dickey Small & Developing Business Separtment of Development

Procedure is also extended to Mr. John M. Bebris, Project Director, and Ms. Geannina Guzman, Graduate Research Assistant, ondured he survey and prepared this planning guide. Thanks also go to Ms. Judy Balogh and Ms. Crickett Park who reviewed that a this guide and provided sage editorial advice. Special thanks are extended to Ms. Victoria Gray without whose exceptional thanks are extended to Ms. Victoria Gray without whose exceptional constitutional skills and typing prowess neither the database nor this guide would exist.

Ray D. Ryan Executive Director

EXECUTIVE SUMMARY

This guide serves as a program planning model for a workshop or series of workshops whose primary purpose is to promote awareness and share information on the newly created OHIO ENTREPRENEURSHIP FILE (ENTR). ENTR is one of five state data files operated on the computerized OHIO CAREER INFORMATION SYSTEM (OCIS). In addition, the program model includes an opportunity to promote awareness and share information on other entrepreneurship education/training efforts undertaken in Ohio.

The model program is designed as a full-day activity and for delivery through any number of different state-sponsored education, employment training, or economic development systems. Generically prepared presentations include--

- o sharing information on the automated resource database;
- o discussing several model programs in entrepreneurship education and training (e.g., JTP-OHIO entrepreneurship training pilot project);
- o explaining the activities of the Ohio Entrepreneurship Education Task Force; and
- o discussing specific ideas for local partnerships.

To assist potential workshop sponsors, this workshop planning guide contains--

- o project background information;
- o workshop planning recommendations that describe logistical, organizational and control issues relative to conducting the workshop;

PROJECT BACKGROUND

The Need

The Ohio Department of Education, through its Division of Vocational and Career Education, sponsors the Ohio Entrepreneurship Education Task Force, whose members represent various state agencies and organizations that operate service delivery networks for entrepreneurial development. The task force conducts efforts to encourage linkages and partnership activities between all these organizations statewide.

In support of these state task force initiatives, JTP-OHIO through its State Education and Grants Advisory Council funded a database development project that was successfully completed in November 1984. Since that time, there has been increased interest in entrepreneurship as a job-creation and economic development activity for Ohio. The database developed in 1984 covered about 700 entrepreneurship training and consulting resource organizations. The database needed to be updated, developed further, made available on a continuous basis, and made more accessible.

The Project

The purpose of this project was to help increase collaborative linkages in support of local self-employment and entrepreneurship training programs. To attain this goal, the

National Center for Research in Vocational Education sought to enhance the statewide dissemination and utilization of relevant entrepreneurship education/training resource information.

To accomplish the projects' dissemination and utilization objectives, National Center focused on two tasks--

- Help develop an automated database of entrepreneurship education, training, and technical assistance resources.
- Plan statewide outreach/promotion campaign.

The refinement and further development of an automated entrepreneurship training resource database served as the primary focus of this effort. Using the data gathered in 1984 as a springboard, National Center staff concentrated on--

- expanding the breadth of resources captured;
- standardizing the data inputs and outputs; and
- making the database available on a continuing basis through the automated Ohio Career Information System (OCIS).

To ensure maximum dissemination and utilization of the resource information, National Center staff assisted OCIS in promoting the use of the database. Project staff prepared a model "train the trainer" workshop program package for use with various state service delivery systems. In addition, project staff planned and conducted a "Legislative Breakfast" to brief interested state officials on the database and on other entrepreneurship efforts conducted in Ohio.

Expected Outcomes

As a result of this effort, an up-to-date, automated data file on entrepreneurship education and training resources (Ohio Entrepreneurship File--ENTR) was added to the ongoing Ohio Career Information System. In addition, a model workshop program package was prepared to help promote the use of the new database by various state operated service networks.

Audience

The principal target groups for this proposed dissemination and utilization effort comprised local educators, job training service providers, and economic development specialists.

Sponsorship

This project was sponsored by the Division of Vocational and Career Education, Ohio Department of Education in cooperation with the State Education and Training Grant Advisory Council and JTP-Ohio.

WORKSHOP PLANNING RECOMMENDATIONS

The following workshop planning recommendations are based on the National Center's experience in conducting a series of statewide workshops in a similar effort for the Ohio Division of Vocational and Career Education. These nine recommendations should be considered and adapted in light of sponsor agency goals/objectives and local site coordination constraints.

As an initial step, workshop planning staff should develop a tentative, 1-day workshop agenda. Planning staff should seek senior program management input and approval on the proposed agenda to ensure program congruence and agency commitment to the workshop efforts.

As a second step, planning staff should identify and obtain commitment from the desired number of individuals to serve as local workshop coordinators. Senior program management assistance toward this end will prove invaluable. Other sources of potential assistance may include existing partnership agreements with other state agencies, members of the Ohio Entrepreneurship Education Task Force, and/or the National Center.

Once agreement has been reached with the desired number of site coordinators, a third step would constitute the transmittal to local coordinators of a list of minimal requirements for a host site and a range of possible workshops dates. Several common facility needs at all locations might include—

- an auditorium that will seat at least 100 people,
- adequate available parking space,
- a lunchroom nearby that could be used by participants to MINIMIZE the time needed for a lunch break,
- access to coffee facilities,
- podium/microphone depending on size of room, and
- two or three breakout rooms for small group sessions. In scheduling the proposed workshops, planning staff should establish sufficiently long time intervals between individual workshops so as to maintain adequate control over the entire effort.

As the dates for the individual workshops become fixed, planning staff should conduct a fourth step that includes site visits to all workshop locations. On these visits, planning staff should review operational progress with local coordinators and inspect proposed host facilities to confirm adequacy of workshop sites.

Fifth, planning staff may want to assist local coordinators with centralized promotion and registration for the individual workshops. Using various mailing lists available through the sponsoring agency and sister state agencies, planning staff can blanket the state with promotional material and workshop invitations/registrations. As registration forms arrive, planning staff can send to registrants confirmation letters (step six) and thereby monitor progress on each individual workshop site.

As a seventh step, planning staff need to prepare workshop packets to be given to each workshop participant as they "check in." Each packet should include, at a minimum, the following (see sample in appropriate sections of this guide) --

- agenda;
- Ohio Entrepreneurship File (ENTR) brochure;
- Ohio Career Information System materials, including the Ohio Entrepreneurship File User's Guide;
- sample survey forms;
- other program fact sheets;
- workshop evaluation form;
- list of Ohio Entrepreneurship Education Task Force members; and
- participant list.

Planning staff should encourage site coordinators to add to the final packet any additional material on relevant local information.

As an eighth step, planning staff should establish a procedure to collect and organize the data generated by the two brainstorming sessions. This will help staff as they later synthesize and report the outcomes of the workshop effort.

Finally (step nine), planning staff should establish a procedure to collect and organize the evaluation forms completed by workshop participants. This will help staff later as they synthesize and report the impact of the workshop effort.

SAMPLE AGENDA

The sample agenda that follows lists time lines, content/
process issues, and potential resources for a model workshop
program on the OHIO ENTREPRENEURSHIP FILE (ENTR) and other
entrepreneurship education/training efforts in Ohio.

The overall workshop program represents a 6-hour activity beginning at 9:00 a.m. and adjourning at 4:00 p.m.

TIME	ISSUES	RESOURCES
9:00 a.m.	REGISTRATION Depending on site and/or resource con- straints, coffee should be available for early arrivals. Policies/ procedures for registra- tion should be determined by sponsoring agency.	Local site coordinator and/or staff.
9:20 a.m.	WELCOMESite coordi- nator should welcome guests, introduce speakers, and review agenda.	Local site coordinator and/or sponsor agency representative.
9:40 a.m.	KEYNOTE SPEAKER Local site coordinator or sponsor agency representative should introduce speaker. Appropriate local leader should discuss role of entrepreneurship educa-	Source networks from which to solicit speakers in- cluding JTP-Ohio, title III program planning staff, Ohio Division of Vocational and Career Education, Ohio Technology Transfer Organization, Ohio Department of Development.

TIME

ISSUES

RESOURCES

tion/training in the economic development process. Presentation should be motivational and focus on coordination of resources and partnership development.

Small Business Enterprise Program, local chamber of commerce, local elected officials.

10:00 a.m.

OHIO ENTREPRENEURSHIP FILE (ENTR) -- National Center staff person will describe ENTR and provide background on project. OCIS staff person will describe the host database and instruct audience on how to access ENTR through OCIS.

Staff from the Ohio Career Information System and the National Center for Research in Vocational Education.

11:00 a.m.

SMALL GROUP PRACTICUM--Workshop participants break out into small groups to practice on personal computers available on site. Workshop sponsor should determine on what basis to divide the small groups. Some common denominator should be used. It is not advisable to divide group into random subgroups.

Staff from the OCIS and the National Center. If PCs are unavailable from an external source, then workshop may need to be planned at 1 of 27 state-supported data centers running OCIS.

NOON

LUNCH--If possible, lunch should be provided in nearby facilities to minimize "downtime." If lunchroom is unavailable, consider having lunch catered.

If sponsoring agency is unable to subsidize lunch costs, consider recovering costs through registration fees.

TIME

ISSUES

1:00 p.m.

SMALL GROUP BRAIN-STORMING I--Reconvene small groups on the same basis as they divided before lunch. Using the "Nominal Group Technique," or some similar group process, ask small groups to generate ideas on how to creatively use and/or apply the ENTR data file in coordinating or delivering local pro-Local site grams. coordinator may want to assign workshop staff persons to serve as small group facilitators rather than burden potential participants. This will also allow for better execution and control of the group process.

RESOURCES

Flip charts, overhead projectors, and other larger supplies may be available at the host site. Sponsoring agency may be able to supply these as well. Local site coordinators may seek out a planning partner who may be able to supply these items. Smaller supplies-e.g., paper, pens, masking tape, index cards--should be supplied by sponsoring agency.

Use HO-1, "Nominal Group Technique: Leader's Guide" as a group process model for this and subsequent small group sessions. Use HO-1 as the focal piece in describing the purpose and expected results of the sessions.

2:00 p.m.

OTHER OHIO PROGRAMS-Local site coordinator/
host should introduce
panel of speakers. At
a minimum, speakers
should represent those
entrepreneurship programs identified in
the Program Fact
Sheets section of
this guide.

For help in identifying other programs, contact the National Center, the Ohio Division of Vocational and Career Education, the JTP-OHIO-Title III Program Planning Office, Ohio Department of Development--Office of Small and Developing Business.

TIME

ISSUES

RESOURCES

3:00 p.m.

SMALL GROUP BRAINSTORMING II--Reconvene small groups as
before. Using same
group process,
ask small groups
to generate
recommendations to
sponsor agency on how
best to integrate and
use information
learned today in improving program performance, coordination,
and leverage.

See comments for 1:00 p.m. brainstorming session.

3:45 p.m.

REPORT BACK TO LARGE GROUP--Site Coordinator and/or sponsor agency representative asks small group facilitators to summarize results of brainstorming sessions.

Nothing special is required.

4:00 p.m.

ADJOURN--Sponsor agency representative and/or local site coordinator should thank speakers and participants for attending. Leave group with a challenge for future or a motivational "pearl of widsom."

Nothing special is required. Some Staff help may be needed in cleaning up and collecting material.

NOMINAL GROUP TECHNIQUE (NGT): LEADERS GUIDE*

- 1. Present the question to the group verbally and in writing.
- Silent generation of ideas in writing.
 - a. Have the written question in front of the group.
 - b. Resist non-process clarifications.
 - c. Model good group behavior.
 - d. Discourage members from disrupting the group.
 - e. Allow five minutes for this activity.
- Round-Robin recording of ideas.
 - Members contribute ideas one person at a time, in sequence.
 - b. Members have the right to pass (encourage them to participate).
 - c. Do not discuss the ideas at this time.
 - d. Hitchhiking OK.
 - e. Omit duplicate items.
 - f. Record the ideas in the members own words.
- 4. Serial discussion.
 - a. Pace the discussion.
 - b. Do not force the authors of ideas to defend themselves.
 - c. Recognize differences but do not allow arguments (the purpose of discussion is to clarify ideas not resolve differences).
- Preliminary vote.
 - a. Select the number of items on which each member will vote: five, seven, or nine.
 - b. Provide each member with the appropriate number of 3 x 5 cards.
 - c. Allow time for the members to select what they think are the best ideas from the list.
 - d. Members then place the item number in the upper left hand corner of the card and the item description in the center of the card. They are not to rank order the items yet.
 - e. Wait for the group to complete this task before going on.
 - f. Members then select the most important item first and rank it "7" (or 9, or 5) and place the rank number in the lower right hand corner of the card and underline it "1". Next they select the most important item of the remaining ones and rank it "6" (or 8, or 4). They continue to assign ranks in an alternating manner until all of the items they have selected have been ranked.
 - g. Record the votes on a tally sheet.
 - h. Add the votes to determine the total for each item.

6. Discussion of the preliminary vote.

- The purpose of this task is to clarify the items. The discussion should be brief.
- Similar items may be combined.
- No vote items may be eliminated. d.

Final yote.

- Should be conducted the same as the preliminary vote. a.
- The final tally is the result of the NGT process.

^{*}Adapted from: Group Techniques for Program Planning. Andre Delbecq, Andrew Van de Ven, and David Gustafson. by

OHIO ENTREPRENEURSHIP FILE (ENTR)

In this section of the workshop planning guide are copies of informational material on the ENTR file itself. These sample copies should serve as masters from which to duplicate sets of the material for inclusion into workshop participant packets. The information pieces include the following items:

HANDOUT NUMBER	NAME	USE
HO-2	FACT SHEET	The FACT SHEET describes the who, what, when, where and why issues related to the ENTR file itself. Use HO-2 as the focal piece in describing the ENTR file.
HO-3	SURVEY	The SURVEY is a sample copy of the actual instrument used to collect the data that now comprises the ENTR file. Use HO-3 as a background piece in describing the nature of the information contained in ENTR.
HO-4	INSTRUCTION	The INSTRUCTION piece is a sample copy of the comparison piece to the survey instrument. HO-4 provides definitions for the response items in the survey. Use HO-4 as background in describing the nature of the information in the ENTR file.
HO-5	CHARACTERISTIC LIST	The CHARACTERISTIC LIST shows the distribution of survey responses in the final database. Use HO-5 as a focal point in discussing the nature of the content of the ENTR file.

OHIO ENTREPRENEURSHIP FILE FACT SHEET

WHAT IS ENTR

The OHIO ENTREPRENEURSHIP FILE, (ENTR) is a computerized data file within the Ohio Career Information System that can provide you with resource information on organizations and programs offering local entrepreneurship education, training, and assistance services.

When requesting information about one of its 700 entries, the ENTR File will list the following:

٥	Contact Information	name, address, phone
O	Organization Type	public agency, foundation, association, business enterprise, 4-year college, 2-year college, adult vocational center, proprietary school, joint vocational school, or comprehensive high school
č	Professional Services	training, counseling, library, referral services, speakers, and/or paid consultants
•	Products Available	pamphlets, resource material, publications, information searches, computer software, and/or audiovisual materials
•	Special Training/ Services	specific business topic areas
Ð	Target Audience	elementary, secondary, adult vocational, postsecondary educators, potential entrepreneurs, and/or special populations

To help you organize your information, the ENTR File can search and list resources by any one (or combination) of its 19 special training/service business topic areas, and/or by any one (or combination) of the 88 counties in Ohio. The ENTR File contains an average of 150 resource entries for every county in Ohio.

WHO BENEFITS

- Potential or Existing Entrepreneurs
- Assistance Agencies
- Educators/Trainers

ENTR identifies local source of education, training, and products which will benefits those who are interested in starting or improving the operation of their own business.

In addition, the resources listed in ENTR will help increase the scope of services and/or training opportunities provided by those who help small business persons.

ADVANTAGES

- Up-to-date information
- Fast retrieval of information
- One-stop source of comprehensive information
- Easy access through simple computer commands
- Printouts make it easy to compare and select appropriate resource follow-up

WHERE IS ENTR

ENTR may be as close as your local high school, vocational center, college/university, public library, Private Industry Council, or state-supported computer data center. The computerized data within ENTR may be accessed throughout Ohio by more than 550 computer terminal sites. All of these sites are a part of the extensive Ohio Career Information System (OCIS) computer and terminal network.

A computer-based guidance information system, OCIS provides instantaneous access to a wealth of national, state and local data about occupations, educational training programs and financial aid. ENTR is one of seven state files, that along with six other national data files make OCIS the largest combined state and national data base in the nation.

The Ohio Entrepreneurship File, ENTR, within OCIS, is a part of the Ohio Department of Education, Division of Vocational & Career Education, Career Development Service.

HOW TO GET ENTR

To find your closest OCIS terminal site, call a near-by state-supported data center (see list on next panel). Ask to be directed to the school/library/agency that can help you access OCIS. Make an appointment at this location to use OCIS and to specifically access the OHIO ENTREPRENEURSHIP FILE. In addition to the assistance from an on-site specialist, each terminal site has a special OHIO ENTREPRENEURSHIP FILE USER'S GUIDE that will help you access ENTR with only a few simple commands.

ADDITIONAL INFORMATION

For additional information, please contact the OCIS staff at the following address and telephone number:

Ohio Career Information System Ohio Department of Education 65 S. Front Street, Room 908 Columbus, Ohio 43266-0308 (614) 462-6771

OHIO ENTREPRENEURSH!P FILE SURVEY

Please complete the Ohio Entrepreneurship File Survey using the instruction page. This survey is to be used to profile small business resources/services available in the State of Ohio. Your completed form will be incorporated into a state-wide database as part of the ongoing Ohio Career Information System (OCIS).

Each listed organization will be asked to provide information on their organization's entrepreneurship education and training resources for current and future entrepreneurs. In addition, this database is intended to serve the educators, job training and economic development communities in Ohio as a resource to plan and operate training and support programs.

Please return your completed survey form to:

INSTRUCIONS FEFOR COMPLETION OF THE OHIO EMREPREE NEURSHIP FILE SURVEY

These instructions are to be used tompletee the Ohio Entrepreneurship File Survey. Please print your responses legibly on the survey question—naire or mark the appropriate answer heatly in the spaces provided.

1. Organization: Please print y oworganiz mation's complete name.

Contact (Dr. Mr. Ms.): Rese sele---ct appropriate salutation and print the name as it should appear on Correspondence.

Person Completing Survey Please print your name if it is different from the contact person.

- 2. Other OCIS Files: These calepries are for internal use only. Please do not mark in this section.
- 3. Organization Type:

Public Service Agency/ \bigcirc mization refers to any government or quasi-government agency.

Foundation refers to any offer ρr —offit philanthropic entity.

Professional/Business Association relefers to membership organizations whose purpose is to promote individual homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric membership organizations whose purpose is to promote individual homeometric membership organizations whose purpose is to promote individual homeometric membership organizations whose purpose is to promote individual homeometric membership organizations whose purpose is to promote individual homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric membership organizations whose purpose is to promote individual homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric members and to enhance the profession/industry as a whole, (e.g., Ohio Homeometric membership membership organization).

Business Enterprise referage "for g profit" organization, a business or corporation.

4-year college refers to p പ്രേധവേഷ്ട്രാൻ school, a 4-year curriculum of study.

2-year college refers to ρ_{top} and α school, a 2-year curriculum of study.

Adult Vocational Center rest to a non-degree continuing education program, post-secondary, focused at adult, but non t part of a 2-year or 4-year college.

Proprietary School refers way privately owned and/or operated educational institution.

J. .t Vocational School has to a harigh school degree program specializing in vocational aining.

Comprehensive High Schoolefers to a public or private four year secondary school and includes middle and/or jumplish schools.

4. Om rganization Scope

R efers to the geographic limit(s) of the organization's target namarket.

5. Per ofessional Services

Select any or all services provide by your organizations from the list that follows:

Training: Teaching or instruction provided to increase pre-roficiency in a specific needs area.

OHIO CAREER INFORMATION SYSTEM (OCIS)

In this section of the workshop planning guide are information materials on the Ohio Career Information System (OCIS). These materials serve as samples of OCIS fact sheets that should be duplicated and included in the workshop packets for distribution to workshop participants. On the following pages you will f ind these handouts:

HANDOUTT NUMBER	NAME	USE
но−6 но−7	INTRODUCTION SUCCESS STORY	The INTRODUCTION and SUCCESS STORY pieces describe OCIS background, operations and user facts. Use HO-6 and HO-7 as focal pieces in describing the who, what, when, where and why of OCIS.
HO-8	GENERAL INSTRUCTIONS	The GENERAL INSTRUCTIONS provide step-by-step instructions on how to access OCIS and how to log on to individual files within the system. Use HO-8 as the focal piece in "walking through" the procedures used to access OCIS.
но-9	PRINTED RESOURCES	The PRINTED RESOURCES to use with OCIS identifies and describes various published resources that can supplement the information on OCIS. Use HO-9 as a referral source to other assistance and information.
но-10	STATE-SUPPORTED DATA CENTERS	The two lists of STATE-SUPPORTED DATA CENTERS identify contact points where OCIS software is being run. Use HO-10 as a referral source to nearest points of local contact for information on accessing both OCIS and the ENTR file.

HO-6

INTRODUCTION

The Ohio Career Information System (OCIS) is a computer-based guidance information system designed to provide remote instantaneous state and national data regarding occupations and educational institutions.

The data are organized in separate "files". The occupation file contains data concerning over one thousand occupations, including employment projections and salary information for a number of occupations in Ohio. Education files include a complete listing of two-year, four-year and graduate colleges in the nation. Additional files include Ohio vocational and proprietary schools, state and national financial aid, health careers, armed services occupations, adult continuing education, and Ohio career education activities.

Through a terminal located in a school, social service agency, or library, a student, counselor, or client may type simple commands to request certain information. The computer responds immediately by typing the desired information from computer-stored data files. In this way, each user can interact in a unique manner with the vast amount of information.

OCIS is an integral part of the Ohio Department of Education, Division of Vocational & Career Education, Career Development Service.

For additional information please contact:

Ohio Career Information System Room 902 - 65 South Front St. Columbus, Ohio 43215 (614) 462-6771

OCIS: A SUCCESS STORY

Ohio is a national leader in the development and implementation of a state-wide computerized career information delivery system. The Ohio Career Information System has the largest combined state and national data base in the nation. Ohio is the only state to completely integrate and coordinate the services of Vocational Education, Career Education, the State Occupational Information Coordinating Committee, and a computerized career information system. OCIS has proven to be a valuable resource to individuals at all levels of the career development process.

Ohio was one of the original states to receive funding from the Department of Labor to develop a model career information delivery system beginning in August, 1975. The Ohio Department of Economic and Community Development was the original grantee. Guidance Information System (GIS), as developed by the Houghton-Mifflin Publishing Company, was selected as the primary program vendor. In January, 1976, OCIS was transferred to the Ohio Bureau of Employment Services. OCIS was transferred to the Ohio Department of Education, its current location, in July, 1982. The final transfer has resulted in unprecedented growth.

OCIS is a computer-based guidance information system that provides instantaneous remote access to a wealth of educational and occupational data. The data are organized in several separate "files". Data on 1044 occupations are included in the National Occupation File. State information includes employment projections and salary information for 350 occupations in Ohio. The education files include 1777 four-year colleges, 1775 two-year colleges, 1521 graduate schools, and 430 proprietary schools. Other files include national and state financial aid, vocational education, health careers, armed services occupations, and a career education activities file. Simple commands allow the user to enter specific characteristics to identify institutions or occupations of greatest interest.

OCIS is an integral part of the Ohio Department of Education, Division of Vocational & Career Education, Career Development Service. The Ohio Department of Education has distributed OCIS computer tapes to twenty-six state-supported computer data centers which have mainframe capacity to provide the program to local school systems. Thirty-eight large school districts, post-secondary institutions, and libraries run tapes internally. Approximately 600 terminal sites are presently accessing OCIS from these mainframe computers, including the majority of Ohio's public schools. Sixteen JTPA mainframe computers within the Ohio JTPA Computer Network are providing OCIS statewide.

FACTS ABOUT OCIS

- The format and national data base for OCIS is the largest and most frequently used system in the United States.
- Ohio has the largest state data base integrated with a national data base of any computerized guidance system in the nation.
- OCIS is the primary delivery format for information generated by the Ohio Occupational Information Coordinating Committee.
- 4. Ohio is the only state to completely integrate and coordinate the services of Vocational Education, Career Education, SOICC, and a career information delivery system (OCIS).
- OCIS has proven to be a valuable tool in the implementation of a number of Division goals including: career education, vocational guidance, sex equity, the education of the handicapped, and adult education.

USERS OF OCIS

Users can retrieve information from OCIS in one of two ways; the direct method and the search method. In the direct method, the user enters a code number and receives a printout on a specific educational institution, occupation, or source of financial aid. In the search method, the user selects characteristics of particular interest and the computer identifies the educational institutions, occupations, or sources of financial aid that match the characteristics selected.

The school files provide the user with a wealth of relevant data, including address, phone number, tuition costs, academic programs, admission data, extracurricular activities and other important facts about the school.

The occupational files provide job description, employment and salary data, required levels of training, addresses for related information, and several other important facts regarding occupations.

The financial aid files identify specific sources for scholarships and financial aid.

The system is a valuable career guidance tool. Middle school students can use the system to explore careers that may be of interest to them. High school students can use the system to select a post-secondary education institution or develop a resume and conduct a successful job interview. Adults can use the system to identify career options, obtain additional training, or upgrade their resume. Handicapped individuals can use the system to identify occupations for which their handicaps are irrelevant.

School districts in Ohio have funded the Ohio Career Information System through Career Education, JTPA, Departmental Budgets, i.e., Guidance, Computer Services, Placement, and Instructional.

If we can answer any additional questions, please contact the OCIS staff:

GENERAL INSTRUCTIONS

COMPONENTS

A local OCIS installation has only a few main components. The first component is made of the various User Guides. The User Guides (OCIS, SOCC, VOCA, PROP OHIO at present) contain all the characteristics of each information file and the instruction letters and codes that are necessary for conducting a search in the Ohio Career Information System.

The second component, the Facilitator's Manual (3-ring binder), is a comprehensive guide to all the information stored in the computer. It lists the name and code number of every training program and occupation included in the OCIS program. The Facilitator's Manual is especially helpful if an individual already has a particular college or occupation in mind and wants to directly access detailed information.

The next component is a terminal. The terminal looks and operates much like a typewriter. It is used to communicate with the OCIS computer and produces a printout which shows, in printed form, the instructions and responses from the computer.

The last component is simply a telephone. By dialing a special telephone number, you will be able to "place a call" from your terminal to the OCIS computer. In some, but not all systems, an accoustical coupler is also used. The coupler is a special cradle for the telephone receiver which connects the phone directly to the computer terminal.

GAINING ACCESS_TO OCIS

Establishing contact with the OCIS computer is no more difficult than making an ordinary telephone call. Below you will find the <u>general</u> sign on procedure. Specific sign on procedures vary with each computer. Check with the manager of your computer site for specific detailed instructions.

SIGN ON PROCEDURE

- Make sure that all terminal plug connections are securely made and that power is available at your electrical outlet.
- Set the accoustical coupler mode switch (Half Duplex or Full Duplex) to the position used on your system.
- 3. Turn on the computer terminal and the accoustical coupler if it is separate from the terminal.
- 4. Be certain that the terminal switch is to "LINE" position.
- 5. Pick up the telephone and call the computer by dialing your assigned number.
- 6. When the computer "answers" with a high-pitched squeal, put the phone receiver into the accoustical coupler.

- Follow the specific sign on procedure for your computer. You should obtain these instructions from the OCIS Coordinator of your agency.
- After the sign on sequence, the terminal will ask you "Which File?", You should answer with the appropriate file name (SOCC, VOCA, ALIF, PROP, OHIO, AIDS, SAID, GRAD, ASOC, INFO, COL2, COL4, see page B-3), and press the RETURN KEY.
- The computer will type a "?". You are now ready to use OCIS by typing in various instruction letters followed by the characteristic numbers that interest you.
- 10. Remember, when you finish typing an instruction, you must press the RETURN KEY to tell the computer to print the response.

The "Sign Off" procedure is on page B-12.

ACCESSING OCIS

There are two ways to access the information through OCIS, the Direct Access Method and Structured Search Method.

DIRECT ACCESS METHOD

This method should be utilized when the user knows what specific information is needed. such as a particular occupation or four-year college. The user looks up the desired information in the OCIS Instructor's Manual (CGL4, COL2, SOCC, GRAD, AIDS, VOCA, ALIF, PROP, OHIO, ASOC, INFO, or SAID) and types the command letter "P" (for print, see command letters, pages B-5 through B-8) and the number of that occupation or training program. The terminal will produce a printout containing the requested information. An additional command "I" (see command letters, page B-5 through B-8) will print out additional characteristics associated with the occupation or training program. To request both the "P" and number of that occupation or training program.

SAMPLE

- User requests information on duties of an Orientation Therapist for the Blind.
- User looks up Orientation Therapist for the Blind (#664) in the SOCC Section of the Facilitator's Manual (3-ring Notebook).
- 3. User goes to the terminal and types in Access Code P664 or I664 or B664.
- 4. User receives printout of Orientation Therapist for the Blind.

STRUCTURED SEARCH

Those who are uncertain regarding which occupations or types of training to investigate should use the indirect or structured search method. This method can narrow the number of possible occupations or training programs to those which suit an individual's interests, aptitudes and personal desires.

The search is conducted by choosing the appropriate file (such as SOCC.or COL4) that will provide the type of information sought, and then by selecting those characteristics within that file which best describe individual interests, aptitudes or specific needs.

To execute the search requires the use of instruction letters called "Commands", that must be typed on the terminal followed by the corresponding number to the left of the characteristic, occupation, or training program. Remember, when you finish typing a command/instruction, YOU MUST PRESS THE RETURN KEY.

BASIC COMMANDS

CODE	COMMAND	CODE	COMMAND
Α	ADD Characteristic	Р	PRINTS out your desired infor-
s	SUBTRACT Characteristic		mation

rmed Services Occupations File	AIDS
	ASOC
nformation on the World of Work	INFO

COMMANDS

The COMMAND LETTERS which follow explain how to use OCIS to its best advantage to obtain information.

There are several command letters which can be used to search OCIS. Each one has a special purpose.

BASIC COMMANDS

A (ADD)

The "A" command, followed by a characteristic number, tells the computer to ADD, or include, all the occupations or colleges which have that characteristic.

EXAMPLE:

When using the SOCC File, if you type "A4", you tell the computer to include only those occupations which involve working with people most of the time; sharing ideas with them.

S (SUBTRACT)

The "S" command, followed by a characteristic number, tells the computer to SUBTRACT, or leave out, all the occupations or colleges which have that characteristic.

EXAMPLE:

When using the SOCC file, if you type "S15", you tell the computer to leave out all occupations which require above average numerical ability.

D (DELETE)

The "D" command, followed by a characteristic number, tells the computer to DELETE, or erase, this characteristic from your list of choices. The "D" command allows you to change your mind about characteristics or commands you have entered.

EXAMPLE:

when using the SOCC File, if you type "D101", you tell the computer to DELETE from consideration your previous entry of associate dagree required or preferred.

E (EITHER/OR)

The "E" command, followed by two or more characteristic numbers separated by slashes (/), tells the computer to add or include the occupations or colleges which have at least one of the characteristics you specified.

EXAMPLE: When using the SOCC file, if you type "E101/102, you tell the computer to include all occupations requiring or preferring as an entry level, an Associate or Bachelor's Degree.

C (CHECK)

The "C" command, followed by an occupation or college code number, tells the computer to CHECK to see if that occupation or college is <u>still</u> on the list of qualifying options. If it is not, the computer tells you why. Also, if an occupation or college does not appear on your list, this command allows you to ask why it did not qualify.

EXAMPLE: When using the SOCC file, if you type "C664", you tell the computer to CHECK if Orientation Therapist for the Blind is still on your list of qualifying occupations. If it is, the computer types "664 Orientation Therapist for the Blind is on the list". If it is not, the computer types "664 Orientation Therapist for the Blind is not on the list" and indicates which characteristics you have used are true and which are false to cause that occupation to be dropped from your list. If an occupation or college does not appear on your list after your search, you type "C" and the occupation or college code number. The computer will tell you why that particular occupation or college was not included on your list.

When you have finished typing your search commands and you want to see which occupations (or colleges) meet all of your qualifications, use the NAME command.

N (NAME)

When the number of occupations or colleges qualifying is less than the UPPER LIMIT (normally 25), type "N" to obtain their names.

L (LIST)

The "L" command tells the computer to list all the commands used in your search. Characteristics you have deleted will not be listed.

This command may be used if you become confused during your OCIS search.

P (PRINT)

The "P" command can be used in two ways:

1. When you have the names of the occupations or colleges that meet your qualifications, you can obtain more information about a specific occupation or college by typing "P" followed by the appropriate code number. EXAMPLE: "P664".

P (PRINT) Cont'd.

2. If you want information about ALL of the occupations or colleges that meet your qualifications, simply type "P".

I (ITEMIZE)

The "I" command can be used in two ways:

- 1. The "I" command, followed by an occupation or college code number, (2002) tells the computer to ITEMIZE or print out all the characteristics **** 100 are true for that occupation or college.
- 2. The "I" command, when not followed by an occupation or college code number, prints all the characteristics which are true for each occupation or college on your qualifying list.

FT (FROM-TO)

The "FT" command can follow the ITEMIZE command to indicate specific ranges of characteristics (up to 10 pairs). The "FT" command can be used in two ways:

- 1. The "I" command, followed by an occupation or college code number and the "FT" command (1662F115T130) causes the computer to list only those characteristics between #115 and #130 which are true for a specific occupation or college.
- 2. The "FT" command, used with the "I" command when not followed by an occupation or college code number (IF115T130), causes the computer to list those characteristics between #115 and #130 which are true for all occupations or colleges on your qualifying list.

In the absence of an "F", the computer assumes the first characteristic number to be 1. In the absence of a "T", the computer includes all characteristics through the end of the file.

As with the ITEMIZE command, the two forms of the BOTH command can be followed by the FROM-TO command to focus on specific ranges of characteristics in the ITEMIZE portion of the BOTH command.

By typing an "FT" range by itself; not in conjunction with "I" or "B", you can set specific ITEMIZE ranges that remain in effect as long as you work with the same file or until you supersede it by setting another "FT" range.

If "FT" follows an "I" or "B", that range is in effect until that "I" or "B" finishes.

B (BOTH)

The "B" command performs the functions of both the PRINT and ITEMIZE commands. The "B" command can be used in two ways:

B (BOTH) Cont'd.

- If the "B" command is followed by an occupation or college code number (B662), the PRINT and ITEMIZE commands are activated for only that occupation or college.
- The "B" command, when not followed by an occupation or college code number performs, in turn, the PRINT and ITEMIZE functions for <u>all</u> occupations or colleges on your qualifying list.

R (RESTART)

The "R" command tells the computer to start over again in the same file. "R" erases the "A", "S", and "E" commands from your command list.

The "U", "K", and "Z" commands are not affected by the RESTART command, but may be changed by the QUIT command.

Q (QUIT)

The "Q" command tells the computer to QUIT the present file. The computer responds with "Which File?" If you wish to change to a different file, type the code name of the file you want. If you want to quit using the Ohio Career Information System, type "NONE".

ADDITIONAL COMMANDS

These commands are used to check and/or alter information output as follows:

M (MODIFY)

The "M" command can be used to MODIFY an existing "A" or "E" command to include one or more additional characteristics.

EXAMPLE: Original Commands: A2A8A128 Modify Command: M2/17

the MODIFY command changes the commands to read: E2/17A8A128

U (UPPER LIMIT)

The UPPER LIMIT of the number of occupations or colleges that print out is normally set at 25. However, this UPPER.LIMIT can be changed by the "U" command. For example, "U50" sets the UPPER LIMIT at 50. "U9999" sets the UPPER LIMIT to the total number of occupations or colleges in the file. Standing along, "U" resets the UPPER LIMIT to the original value when the file was entered (normally 25). The UPPER LIMIT command can be used to control the NAME, PRINT, ITEMIZE, or BOTH commands.

X (EXPAND)

The "X" command can be used to control the ITEMIZE, BOTH, LIST, or CHECK commands.

The program is set so the characteristic numbers as well as their titles are printed out when the "I", "B", "L", or "C" commands are used. However, by typing "X", only the relevant characteristic numbers are printed in future uses of these commands. Typing "X1" returns the system to its original form.

V (VERIFY)

The "V" command tells the computer to explain where its controls are set. There are several explanations available, and they are obtained using variations of the "V" command. This command is used to check the status of the amount of data which can be obtained.

EXAMPLE: When using the SOCC File, "V" tells the computer to explain all information.

"V3" the computer explains what sections of print text are turned off. (Print sections 7 are turned off)

"V4" the computer explains the names of the print sections.

SOCC SECTIONS:

ment Data As of July, 1983

"V6" the computer explains the range at which the FROM-TO command is set and the status of the EXPAND option.

From To List
F 1 T 662
Characteristic titles

"V7" the computer explains where the UPPER LIMIT is set and tells how many occupations qualify.

Upper print limit is 25 occupations 1044 occupations qualify

K (KEEP) and Z (ZERO)

The "K" and "Z" commands can be used to control the PRINT or the BOTH command.

The KEEP and ZERO commands control which sections of text are printed in the "P" and "B" command. All text sections are numbered as shown in the displays printed below. If a section is turned off by the "Z" command, that is not printed.

- Z3 turns off Section 3 K3 turns on Section 3
- Z returns all sections to their original form K turns on all sections

The following sections may be turned on and off using the "K" and "Z" commands.

SIGN OFF

When you have all of the information you need, it is time to sign off the system. This is very important because if not properly accomplished, the next person who tries to access OCIS may get a busy telephone signal.

Type "Q" and computer will respond: "Which File?", then type NONE. The computer will respond with the amount of time the system was used. At that point, you should type "BYE".

NOTE: If you make a mistake while using OCIS, the computer types a message telling you so. Don't worry, a mistake or two doesn't hurt you. Simply try again.

BASIC MAINTENANCE OF THE TERMINAL

For the most part, computer terminals are very reliable when treated with proper care. If difficulties arise involving the terminal, check the list of symptoms and corrective actions below to correct minor problems.

SYMPTOMS

- 1. Telephone number yields busy signal.
- No power, no light, no high-pitched tone.

ACTIONS

- Hang up and dial again.
- 2. Check to see if:
 - a. Machine is switched on;
 - b. Power cord is plugged in both ends:
 - c. Connection between the telephone and the terminal coupler is correct and secure;
 - d. Outlet is providing power;
 - e. Terminal fuse has not burned out.
- Terminal prints "garbage". 3. Dial again for better connection.
 - 4. Be sure you are entering your access code exactly as it has been issued to you. Dial again for better phone connection.
 - Check power connections and dial again.
 - 6. Try each of the following in succession:
 - a. Check paper feed, making sure that it has been inserted correctly, and that you are not at the end of the roll of paper.
 - Remove paper, clear track, and reload.

3. Terminal prints "garbage"

4. Access Code rejected.

5. Cut off in middle of program.

Paper jams or lines overprints.

PRINTED RESOURCES TO USE WITH OCIS

The following list of printed resources are available to use with OCIS.

- Ohio Occupational Almanac a new 600 page publication containing valuable labor market information on over 250 selected occupations with 2,000 or more workers in the state of Ohio. It provides specific information regarding the distribution of occupations among industries. It is a valuable tool in the identification of the types of industries that employ individuals in specific occupations. The Almanac provides a crosswalk between occupational titles and the Standard Industrial Classification.
- Supplement I How to Develop and Use Labor Market Information in Local Occupational Program Planning provides a crosswalk between Standard Industrial Classification and the classification categories in the Yellow Pages listings of a phone book. The Almanac identifies the types of industries that employ individuals in specific occupations. The Supplement then directs job seekers to specific businesses and agencies found in the Yellow Pages.
- The 1984 Chartbook this guide provides detailed information regarding Ohio employment compensation factors and trends. The guide details state and local unemployment rates and characteristics of the unemployed. The guide also highlights the distribution of employment by industry. The Chartbook provides the latest comprehensive report available from the Labor Market Information Division of the Ohio Bureau of Employment Services.
- The Guide to Vocational Preparation and Occupations the VPO provides a crosswalk or link between the titles of vocation education programs and the specific occupational titles. The VPO can be used by teachers, counselors, and students to identify occupations that relate to training in specific vocational education programs.
- Dictionary of Occupational Titles (DOT) includes standardized and comprehensive descriptions of job duties and related information for 20,000 occupations. Occupations are grouped into a systematic occupational structure based on interrelationships of job tasks and requirements. The DOT may be used for matching job requirements and worker skills.
- Selected characteristics of occupations defined in the DOT provides supplemental information concerning physical demands, environmental conditions and restrictions, and training time for DOT defined occupations.
- Occupational Outlook Handbook (OOH) contains detailed information for 250 selected occupations including narratives on the nature of work, training and qualifications, job Outlook, and earnings.

- Guide for Occupational Exploration (GOE) provides grouping of occupations based on interest factors and also provides world-of-work and career awareness through evaluative questions.
- Standard Industrial Classification Manual (SIC) provides a coding system for classifying, collecting, and disseminating data by industry grouping.
- Standard Occupational Classification Manual (SOC) provides a coding system for classifying occupational information by job duties with groups to identify related occupational clusters.
- Occupational Outlook Quarterly periodical designed to keep counselors and education planners abreast of occupational and employment developments.
- Occupational Projections and Training Data provides information and occupational supply and demand conditions and training and qualifications for over 185 selected occupations.
- U. S. Industrial Outlook Handbook provides narrative discussions and statistics on 200 selected industries. U.S. Department of Commerce, Bureau of Industrial Economics.
- Monthly Labor Market Information Newsletter a periodical published monthly by the Ohio Bureau of Employment Services containing statistics and data on labor market information in Ohio.

OTHER PROGRAM FACT SHEETS

This section of the workshop planning guide contains copies of fact sheets on several other entrepreneurship programs in the state of Ohio. These sample fact sheets should serve as masters from which to duplicate sufficient sets for inclusion into workshop participant packets. The fact sheets represent the following programs:

HANDOUT NUMBER	NAME	USE
HO-11	ENTREPRENEURSHIP TRAINING PILOT PROJECT	The pilot project fact sheet describes a comprehensive and individualized entrepreneurship assessment and instruction program for selected dislocated workers to help them increase their success in self-employed activity. Use HO-11 along with HO-12 and HO-13 as references to other entrepreneurship education/training efforts in Ohio.
HO-12	SMALL BUSINESS ENTERPRISE CENTERS	The SBEC fact sheet describes a network of assistance centers designed to provide comprehensive services to small businesses at the local level. Use HO-12 along with HO-11 and HO-13 as references to other entrepreneurship efforts in Ohio.
но-13	SMALL BUSINESS MANAGEMENT PROGRAM	The SBM fact sheet describes an in-depth formal instructional program for teaching small business management to full and part-time small business owners/managers. Use HO-13 along with HO-11 and HO-12 as references to other entrepreneurship education/training efforts in Ohio.

FACT SHEET

ENTREPRENEURSHIP TRAINING PILOT PROJECT

Sponsorship

O This project will be sponsored by JTP-OHIO through the Ohio Bureau of Employment Services.

Operator

o This project will be operated by the National Center for Research in Vocational Education (NCRVE) at The Ohio State University. For more information and assistance, please contact John Bebris, Entrepreneurship Project Director at NCRVE, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210 or (614)486-3655.

Program

To provide a comprehensive and individualized entrepreneurship assessment and instruction program to selected dislocated workers as a means of increasing their success in self-employed activity. Project staff will seek to accomplish the following objectives:

- To assist 25 displaced workers determine the desirability and feasibility of starting a new business.
- o To prepare 15 displaced workers with the competencies to run a business and to create a business plan necessary for venture start-up.
- o To link client entrepreneurs with community resources available for long-term assistance throughout the venture start-up process.

Target Audience

- o Displaced workers from the Columbus SMSA who have aginterest, desire and the potential ability to succeed as entrepreneurs.
- The target audience includes those persons who are eligible under the Title III definition of the dislocated worker. This includes an individual who:
 - Has been terminated or laid-off or who has received a notice of termination or lay-off from employment, is eligible for or has exhausted entitlement to

unemployment compensation, and is unlikely to return to his/her previous industry or occupation; or

- Has been terminated, or has received a notice of termination of employment, as a result of any permanent closure of a plant or facility; or
- 3. Is long-term (15 weeks or more) unemployed and has limited opportunities for employment or reemployment in the same or similar occupation in the area in which such individual resides, including any older individual who may have substantial barriers to employment by reason of age.

Benefits:

By the end of this program, participants will have completed the following:

- A battery of entrepreneurship aptitudes/personality/skills profiles.
- o 30 hours of an entrepreneurship intake/assessment course which includes development of an attendant preliminary business plan. As a format for the course, the instructor will use Beyond A Dream: An Instructor's Guide to Small Business Exploration that was developed by the National Center.
- o 60 hours of individualized, competency based entrepreneurship instruction that will lead to the completion of an individualized business operations manual. Instruction will be based on the National Center's Program for Acquiring Competence in Entrepreneurship, (PACE).
- A formal business plan that has been reviewed and deemed acceptable by a panel of local business experts.
- A financing strategy to seek outside funding opportunities.
- Four business seminars plus three group support meetings.
- Establishes a peer and resource network for future assistance.

Time

The entrepreneurship exploration and instruction phase of the program will last approximately six months from the middle of May 1986 through the end of October 1986. A follow-up period will commence in early November 1986 and end in June 1987. Specifically the time frame for the project will include the following:

			HOURS			
0	Init be 5	ial intake/assessment course will weeks	30			
0	Indi segn	Individualized entrepreneurship instruction segment will last 10 weeks				
0	Four scheduled seminars attended on relevant business topics					
0	Three group support meetings					
		Total program hours	104			
	0	A series of quarterly group support meetings after course conclusion.	6			
	0	Course follow-up has 8 hours free technical assistance.				
		Total follow-up hours	14			
		Total hours	118			

Follow-up Benefits

Having completed the 6 month program, participants will be eligible for follow-up services. These follow-up services include:

- o 8 hours of business consulting from community resources at no cost to the participants
- Quarterly group support meetings in behalf of the program participants that will be coordinated by project staff.

Materials

All required instructional materials will be provided by the National Center. Materials for use in the Entrepreneurship Pilot Program include: Beyond A Dream: A Guide to Small Business Exploration, for use in the 30 hour intake/assessment course and Program for Acquiring Competence in Entrepreneurship (PACE) for use in the individualized instruction phase.

Cost

Program participants will receive instructional materials, take part in the pilot program, and receive the follow-up benefits at no cost to themselves.

GOVERNMENT AGENCIES (sample page)

SMALL BUSINESS ENTERPRISE CENTERS (OHIO DOD)

Ohio Department of Development 30 East Broad Street Columbus, OH 43216

(614) 466-4945 800-282-1085

General Description

The area Small Business Enterprise Center (SBEC) is designed to provide comprehensive service to small business at the local level and to establish a structure for direct local involvement in the Department of Development's efforts to retain jobs and assist in creating new business in Ohio. The SBECs operate in cooperation with local Chambers of Commerce, universities, colleges, trade associations, private industry councils, and other private and public small business resources. The SBEC provides local one-stop shopping for Ohio small businesses. All necessary tools for assisting small business are under one umbrella.

Centers provide access to organizational, financial, marketing, and technical expertise. Centers also supply information on small business development opportunities. Specialized services offered through some enterprise centers include procurement assistance, accelerated management assistance, seed and venture capital sources, and incubator facilities.

Centers have access to state finance and grant program capabilities, the Ohio Technical Transfer Organization, as well as other small business initiatives of the Ohio Department of Development (see description of others in this section).

Who is Eligible

Anyone interested in starting a new business or obtaining help for an existing business is eligible.

SMALL BUSINESS MANAGEMENT PROGRAM TYPE 60

PROGRAM DESCRIPTION

The Small Business Management Program provides an in-depth formal instructional procedure for teaching Small Business Management to full and part-time Small Business owners and managers. The formal class material is aimed at businesses involved in the marketing and distribution of goods and services. The instructional approach shall provide a realistic and logical procedure to help Small Business operators and managers learn how to apply effective financial management procedures to their business; improve their business planning; effective procedures in the marketing of their goods and services, including sales and promotional techniques; and improved management skills. Once this information is known, the Small Business operator/manager will have a sound basis for making management decisions that will provide increased net business income and develop an effective operating unit. The program is designed as a two-year program which it should be noted that some of the original Ohio SBM programs are continuing to offer a three-year curriculum.

PROGRAM OBJECTIVES AND PURPOSES

The major objective of the Small Business Management Program is to assist Small Business owner/managers in meeting their business and family goals through improved management, organization, and operation of their businesses.

Additional Program Goals

To help the Small Business owner/managers understand and apply their learned skills to...

- ... solve the maze of small business recordkeeping
- ... use their business records to manage the business effectively
- ... make more effective business and management decisions
- ... adapt to the ever-changing business world
- ... learn the new technical aspects of their business

INSTRUCTIONAL PROCEDURES

The first year of instruction deals with the understanding of the importance of Small Business to the National economy, the value of sound recordkeeping, business planning and decision making, as well as learning how to use business records to manage their businesses.

The formal three-hour classes are held at the school, or acceptable meeting location, during the normal school year from mid-September through mid-June. Classes meet twice monthly, but a school offering an expanded curriculum may offer classes once a week over a 30-36 week period.

- Introductions and Overview of Small Business
 Definitions, statistics, importance of small business...WHY? self-employment...Success/Failure factors...Emphasis on management...Entre-preneurship...Self-evaluation...Introduction to a total Business Plan.
- More Entrepreneurship
 Management functions...Decision-making...Sources of information and assistance...Licenses, permits and other early considerations.
- 3. Success Tools

 Time Management..Goal Setting...A look at MBO Management by Objectives and an introduction to the unique MBE Management by Exception.
- 4. <u>Introduction to Financial Statements</u>
 The Balance Sheet and the Profit and Loss Statement and basic financial ratios.
 "A first look at the numbers"
- 5. "Starting Right!"

 Opening the Books

 Preparatory work: Inventories...Equipment register...Depreciation and income tax considerations.
- 6. "Keeping Track of What's Going On" Business Records

*The number of classes devoted to small business recordkeeping will vary by school and the knowledge and understanding of their owner/manager enrollees.

- 7. Pricing

 Maximizing Gross Profit
 Calculating and using the breakeven point, and formulating a pricing strategy.
- 8. Forecasting Profits and the Cash Flow Part I
- 9. Forecasting Profits and the Cash Flow Part II
- 10. Estimating Sales by Class and Department
 Setting the profit objective...Make a sales forecast...Estimate Gross
 Profit and Operating Profit.
- 11. Understanding and Using Financial Statements and Significant Ratios
- 12. <u>Current Assets Management</u>

 Projecting monthly Cash Flow...Determing a credit policy...Determining the most profitable inventory.
- 13. Short-Term Financing

 Develop a short-term financial forecast...Determine a working capital policy...Determine goals of trade credit and commercial bank loans...

 Establish and maintain a good bank relationship.
- 14. Fixed Asset Strategies

 Lease/Purchase decisions and cost/benefit considerations to buy or not to buy.

- 15. Capital Planning
 Planning capital needs Balance Sheet analysis
 Forecasting inventory levels and asset accounts
- 16. <u>Understanding and Evaluating Money Sources</u>
 Banking relations...Financing...Trade credit...Internal sources.
- 17. <u>Income Tax Planning and Management</u>
 Investment credits...Depreciation schedules.
- 18. Developing a Business Plan
 Why they are important factors to be considered...Building in credibility
 ...The plan as a fluid document.
- **Additional conferences, seminars, workshops, or short classes taught by the teacher/coordinator may be scheduled at different times throughout the year.

* * * * * * * * * * * * * * *

YEAR 2 CURRICULUM (Advanced)

Unit

- 1-4 Financial planning through the use of Visicalc (training on micro-computer) 6-12 hours.
- 5. <u>Financial Statement Analysis</u>
 Interpreting the Profit and Loss Statement and Balance Sheet, and computing key ratios.
- 6. Computing Return on Investment Learn ways to reduce expenses and accounts receivable, increase sales, gross margin and turnover, and use financial leverage.
- 7. Small Business Advertising

 How an effective promotional program can help, developing an ad budget, and examining the media available in the local area.
- 13. Improving Your Business Image
 Improving customer relations, examing your own business image, and developing an effective public relations program.
- 14. <u>Self-Motivation</u>

 Re-setting your goals and your own self image.
- 15. Management by Exception
 Dealing only with problem areas.
- 16. <u>Developing a Management Team</u>

 Using different external and internal sources effectively.
- **A local school may insert different teaching units into its curriculum, or teach units in a different sequence. It must be remembered, however, that the

basis of the SBM program is to train Small Business owners the importance of sound recordkeeping; how to analyze and manage their businesses using their records, and improving their management and marketing skills.

PHYSICAL FACILITIES, EQUIPMENT, AND INSTRUCTIONAL MATERIALS

The following facilities and equipment must be provided for this program:

- Classroom with a minimum of 720 square feet for afternoon and evening classes.
- Office with a minimum of 250 square feet with telephone available.
 Classes may be conducted in the existing facilities of local
 Marketing Education departments and Joint Vocational Schools
 if there is a classroom and office available during the time
 the SBM classes meet.
- 3. Equipment The specialized equipment and supplies for this program will cost approximately \$3500 (1978 prices).

 Detailed information relative to equipment and supplies, teaching units, and instructional materials can be obtained from: Marketing Education, Room 915, 65 South Front Street, Columbus, Ohio 43215.

TEACHER CERTIFICATION

Any teacher holding a valid teaching certificate in Marketing Education, who has participated in the pre-service workshop, (conducting the Small Business Management Program), and has demonstrated realistic and practical Small Business planning and analysis procedures and techniques will be approved. It is strongly suggested the potential instructor has at least two (2) years of recent experience in either managing or operating a Small Business.

OR

The instructor-applicant for the Small Business Management Program must have the following:

- * College degree (preferably in Business Administration or Education) and two (2) years of recent, satisfactory work experience as an owner and/or manager of a small business.
- * Holds a high school diploma (or equivalent) and has five (5) years of recent satisfactory work experience as an owner and/or manager of a small business.

Plus, this person has participated in the pre-service workshop, will be issued a one-year Adult Marketing Education teaching certificate for this specific program.

WORKSHOP EVALUATION

The workshop evaluation form that follows (HO-14) is designed to help workshop sponsors collect information from workshop participants on the level of knowledge gained through their experience and the change, if any, in their attitudes toward entrepreneurship. Workshop planners may wish to use HO-14 as a starting point from which to develop their own workshop evaluation system that captures information of particular interest to the sponsoring agent.

1 2 3 4 5

OHIO ENTREPRENEURSHIP WORKSHOP EVALUATION

Please indicate your attitudes about each of the following statements regarding entrepreneurship education and training. This information provides your input for use by the State Entrepreneurship Education Task Force. It is completely anonymous.

Mark the form using the following scale by circling the appropriate number as follows:

- 1 = Strongly Disagree
- 2 = Disagree
- 3 = Undecided
- 4 = Agree
- 5 = Strongly Agree
- This workshop gave me new insights into the need 1 2 3 4 5 for increased entrepreneurship education/training in Ohio. Prior to attending the workshop I considered 1 2 3 4 5 entrepreneurship education and training the responsibility of others. After attending the workshop, I feel that my 1 2 3 4 5 organization should be more involved in entrepreneurship education and training. The ENTR file will be useful to my organization 4. 1 2 3 4 5 in promoting entrepreneurship. At this workshop I made contacts that will help 1 2 3 4 5 my organization be more involved in entrepreneurship education and training. This workshop was of benefit to me because of 1 2 3 4 5 the new ideas I can bring my organization. Career education programs from elementary school 1 2 3 4 5 thru secondary should include entrepreneurship learning. Vocational education programs at the high school 1 2 3 4 5 level should teach entrepreneurship competencies as a career option.

Ohio's 2-year technical schools should include

entrepreneurship education as part of their

associate degree programs.

- 10. The sample programs provide new ideas concerning 1 2 3 4 5 what my organization can do.
- 11. My community should provide more training and 1 2 3 4 5 counselling for potential entrepreneurs.
- 12. I believe additional meetings of this kind should 1 2 3 4 5 be conducted.
- 13. The database available through the Ohio Career 1 2 3 4 5 Information System will be useful to me.

BASIC BACKGROUND OF PARTICIPANT

Circle the appropriate as follows:

- My organization is
 - Public Education
 - Public Sector/Government 2.
 - Non-Profit Sector
 - Private/For-Profit Sector 4.
- 15. If you represent public education, is your responsibility in
 - Prevocational/Career Ed./Academic
 - Vocational and Secondary Schools
 - 3. 2-Year Colleges
 - 4-Year Colleges
 - Adult/continuing education at any location
- 16. If you represent the public sector, is your agency
 - National 1.
 - 2. State
 - 3. Local
- If you represent the non-profit sector, is your organization a
 - Professional Association
 - 2. Foundations
 - Public Service/Organization 3.
 - 4. Clearinghouse Database
 - 5. Educational Institution
- 18. If you represent the for-profit sector, is your organization a
 - 1. Business service provider
 - 2. Private enterprise in the community

 - Clearinghouse/Database
 Business/Industry Association

OHIO ENTREPRENEURSHIP EDUCATION TASK FORCE

The 29-member Ohio Entrepreneurship Education Task Force met for the first time in late fall of 1983. These high-level decision makers inside and outside of state government met to determine ways in which their respective service delivery networks could work together to infuse entrepreneurship education into all levels of education statewide.

As an initial step, the task force undertook a joint effort to determine the extent of available entrepreneurship education/training resources and to share this information with all interested parties. The result of this effort included the publication of a directory, Entrepreneurship Resources In Ohio; the initial research and development of an automated database; and the execution of five leadership awareness workshops, "Entrepreneurship for Ohio's Future," held across the state.

The Ohio Entrepreneurship File project is an extension of these earlier efforts. Attached is a list of members who comprise the Ohio Entrepreneurship Education Task Force (HO-15).
