ABSTRACT

This eighth annual issue is one of two companion reports that provide comprehensive information about Montgomery County (Maryland) Public Schools, for school system staff, the education board, county government, and public. This report offers general information and statistical data about schools, their staffs and students, and school administrative offices. The data ensure standard definitions, statistical procedures for uniform data, and references for educators and government agencies. The report is organized into six sections: (1) purpose and organization of the report, types of data reported, and definitions of terms and data elements; (2) selected data about the county and school system, including school openings and closings, planning projections for population, income, and housing, and distributions of selected data elements reported in school profiles; (3) six summaries of school profiles, including all schools and centers in the system, regular schools, school levels, and alternative centers; (4) cluster maps, individual school profiles, and alternative center profiles; (5) a list of county school system administrative offices and departments; and (6) a list of specialized statistical reports about county public schools. The table of contents lists schools alphabetically by high school cluster and by page references. (CJH)

i. INTRODUCTION

STATISTICAL PROFILES: 1985-86

This report, the eighth annual issue, is one of two companion reports, the Annual Test Report and the Statistical Profiles, issued by the Department of Educational Accountability. Together they provide a set of comprehensive information about Montgomery County Public Schools (MCPS) for use by the Board of Education, school system staff, county government, and the public. The Annual Test Report documents and analyzes system-wide testing results on a school-by-school basis. The Statistical Profiles reports general information and statistical data about schools, their staffs and students, as well as staff data concerning MCPS administrative offices.

Virtually all of the data elements reported in the Statistical Profiles are available in other official school system reports. A list of these specialized statistical reports about MCPS is included in Section VI. Providing the data in a single document, however, serves three important purposes:

- o Reducing the response burden formerly required of school personnel by including in one document much of the data commonly requested of schools
- o Assuring standard definitions, formats, and statistical procedures to generate the data uniformly across all schools and administrative units
- o Providing a reference for MCPS staff, members of the Board of Education, the County Council, and other government agencies which need accurate consolidated data to conduct their ongoing planning and decision-making activities

The data in this report are generated from existing computer files and central office reports and require no additional data collection directly from schools. Though there are many advantages in drawing the data from existing files, there are disadvantages as well. Each of the data sources was designed to serve specific purposes, generally unrelated to publication of the Statistical Profiles. When all of these sources are pulled together, the differences among them lead to apparent discrepancies. The selection of the data categories, the form of the statistics reported, and "as of" dates for data are examples of areas where differences occur.

CHANGES IN THE 1985-86 STATISTICAL PROFILES

With each annual issue efforts have been made to improve this publication through improved data collection and storage, fewer manual calculations, and better explanation of differences where they appear. This year a new, computerized Statistical Profile Data Base was used in analyzing the information for this report. This relational data base makes the information in Statistical Profiles available for other types of analyses throughout the year.

In addition, the kinds of entries have been modified or added to each year when the change appears to present a more accurate picture of the school system or will otherwise benefit the user. The school order within this year's Statistical Profiles is changed from showing schools within the administrative areas to listing them alphabetically by school level within each high school cluster. The high school clusters are arranged alphabetically and include a map showing the schools within the cluster. In most cases, schools shown on the cluster maps "feed" 100% of their students into the school at the next level within the cluster. Schools that split their population when entering the next level are shown in both clusters.

This year two new data elements, "Special Programs" and "Percent Utilization", have been added to all school profiles. Secondary school profiles now report "Average Class Size" for two categories: required English courses, and all other academic subjects. Senior high school profiles will also show the number of diplomas awarded for the graduating class of the previous school year. These new data elements are defined in the section "Definition of Terms and Data Elements" at the end of this introduction.

Several data elements have been dropped from the Statistical Profiles this year. Each school's marking period is no longer reported because all schools are now on the nine week grading period. The item "Property Destruction" has been deleted because it is often affected by random occurrences and does not contribute to a clear impression of a school. The number of rooms is not reported because the new data element "Percent Utilization" combined with enrollment capacity gives a more effective picture of how a school's building space is being used. Since the schools are arranged by high school cluster, the administrative area summaries are no longer included.

In reporting staff characteristics, the previous five categories reported for "Highest Degree Status" and "Years of Experience" are condensed into three categories.

ORGANIZATION OF THE REPORT

The report is organized into six sections:

- Section I. Purpose and organization of the report; definitions of terms and data elements
- Section II. Selected data about the county and the school system, including school openings and closings; county planning projections for population, income, and housing; and distributions of selected data elements reported in the school profiles
- Section III. Six summaries of school profiles, including one summary of all schools and centers in the school system, one summary for all regular schools, three summaries by school level - senior high schools, junior high/intermediate/middle schools, elementary schools, and one summary of alternative centers
- Section IV. Cluster Maps, individual school profiles; and
Alternative center profiles for the nine centers/schools
- Section V. List of the county school system administrative offices and departments
- Section VI. List of specialized statistical reports about MCPS

To facilitate location of data for a particular school, the "Table of Contents" lists the schools alphabetically by high school cluster. In addition, an alphabetical listing of all schools with page references follows the "Table of Contents". It will enable the reader to locate a school if a school's cluster is unknown.

TYPES OF DATA REPORTED

Section II presents the following six tables of planning projections and distributions of selected socioeconomic, staff, and student-related variables:

Table 1 - the schools closed and/or opened in the past five years and those projected for opening in September 1986.

Table 2 - MCPS enrollment for the five-year period FY 1982-FY 1986 and the projection for FY 1987.

Table 3 - county planning projections for population, income, and housing units for the calendar years 1980, 1985, and 1990.

Tables 4-6 - the county's range and distribution of values for a selected set of the data elements for elementary, junior/intermediate/middle, and senior high schools. Comparing the data elements for any one school with these distributions will enable the reader to note differences among schools and whether a particular school is high, average, or low within that distribution.

The data elements reported in the school and alternative center summaries and individual profiles, Sections III and IV, may be categorized as general school data, student characteristics and enrollment data, and staff characteristics and positions. The school profiles report two years of data, 1984-85 and 1985-86, for students and one year, 1985-86, data for staff.

The general school data elements reported as part of each profile are enrollment capacity, student/professional staff ratio, percent utilization, student mobility rate, average pupil attendance, percent of students transported, and special programs available. Senior high profiles include the number of diplomas awarded. Average class size is reported for the elementary schools as a school average, and for two categories in the secondary schools: required English courses and all other academic subjects.

The student data include enrollment totals and minority group membership distributions as of September 30, 1985. Proportions of students by sex are not included because they were predictably close to 50 percent in all schools. This data element is included for the alternative centers' student population where this generality did not apply.

The staff data include the number of positions in full-time-equivalents (FTE) as well as the number of persons (N) occupying those positions as of November 12, 1985. Staff serving in more than one school or position are shown in each school or position in terms of actual FTEs allocated where possible. The major exception is for speech pathologists, who, in many cases, are shown only in their base schools. Staff characteristics reported are the highest degree attained, years of experience, ethnic background, and sex.

The administrative offices and departments, Section V, are listed alphabetically by department and division within each office. Each listing shows the name, address, phone number, staff breakdown by race and sex, and director of the department. Staff totals for the 1985-86 school year are included.

¹ Average daily attendance and student mobility were redefined two years ago; they are not comparable to that reported prior to 1983-84.

The data elements and their sources and definitions follow:

DEFINITIONS OF TERMS AND DATA ELEMENTS

ALTERNATIVE CENTER

Definition: An MCPS school providing programs for children with special education needs. Statistical profiles are included for those centers that report their enrollment and attendance as independent units and are, therefore, listed in the MCPS Official Enrollment Report for September 30, 1985.

Source: MCPS Directory 1985-86 (November 1985), Department of Information

AVERAGE CLASS SIZE - Elementary

Definition: This ratio is calculated by dividing the regular student enrollment (as of September 30, 1985) by the number of attendance sections. No Special Education or Head Start pupils are included. Average Class Size will be reported for the elementary schools as a total for each school.

Source: MCPS Elementary Class Size Report - Attendance Sections as of October 31, 1985

AVERAGE CLASS SIZE - Secondary

Definition: This ratio is calculated by dividing the regular student enrollment (as of September 30, 1985) by the number of classes. No Special Education pupils are included. Average Class Size will be reported for two areas; English (required courses) and All Other Academic Subjects.

Source: MCPS Secondary Class Size Report as of October 31, 1985

AVERAGE PUPIL ATTENDANCE (APA)

Definition: This percentage is calculated by dividing the number of student days of attendance by the number of students belonging/enrolled.

Source: Annual Report on Enrollment, Attendance and Promotion for School Year 1984-85

CLUSTER

Definition: A high school cluster includes all the junior, intermediate, middle and elementary schools that "feed" their students to that high school. The cluster maps included with each high school group are not drawn to a uniform scale because of space limitations.

Source: Department of Educational Facilities Planning and Development

DEFINITIONS OF TERMS AND DATA ELEMENTS (continued)

DEPARTMENT

Definition: An MCPS administrative unit whose director reports to the superintendent or to an associate superintendent

Source: Personnel Master File and Position Control File as of November 12, 1985; MCPS Directory 1985-86 (November 1985)

DIPLOMAS AWARDED

Definition: The total number of diplomas awarded includes all those awarded in June and in August for the 1984-85 school year. Those students who were early graduates (eleventh graders) are also included.

Source: High School Diplomas by Type of School: June and August, 1985

ENROLLMENT

Definition: Total enrollment includes each grade level, Head Start, and special education attendance sections. Special education enrollment includes only students in self-contained classes. Students with special needs and mainstreamed students are not identified as special education students. Enrollment in alternative centers is classified as elementary or secondary rather than by grade level. Postgraduate enrollment (a total of 2 for the county) is noted where applicable.

Source: The number of students, by grade level, listed in the MCPS Official Enrollment Report by Grade, School, and Area as of September 28, 1984 and September 30, 1985

ENROLLMENT CAPACITY

Definition: The estimated number of students that can be accommodated in the building, based on an allocation of space for different grades and types of programs.

Source: Department of Educational Facilities Planning and Development

FEEDER SCHOOL

Definition: A school which sends its students to another school for the next higher grade level (e.g., an elementary school that "feeds" a junior high school by sending its sixth graders to the junior high for seventh grade).

Feeder schools will be shown as part of the cluster maps at the beginning of each high school cluster. Most schools "feed" 100% of their students to the same school. Those in which the population goes on to more than one school will be shown on both of the cluster maps.

Source: Department of Educational Facilities Planning and Development

DEFINITIONS OF TERMS AND DATA ELEMENTS (Continued)

HOURS OF SCHOOL DAY

Definition: The time during which the school is open for classes. This is given as the beginning and ending time of the school day for students.

Source: Office of the Deputy Superintendent of Schools

OFFICE

Definition: An administrative unit headed by the superintendent or an associate superintendent.

Source: Personnel Master File and Position Control File as of November 12, 1985; MCPS Directory 1985-86 (November 1985)

POSITION CATEGORY¹

Definition: A logical consolidation, by job role, of the position classifications in effect July 1, 1984, for the 1984-85 data and July 1, 1985, for the 1985-86 data

Source: Personnel Department list of personnel classifications for MCPS

Positions reported were identified from two personnel files: (1) The Personnel Master File and (2) the Position Control File. The computer program identified the required data, based on current staff in the positions (as of November 12, 1985).

PUPILS TRANSPORTED

Definition: The percentage of pupils bussed to school

Source: MCPS Transportation Report (Run date October 24, 1985)

RACE/ETHNIC BACKGROUND

Definition: The number and percentage of students enrolled on September 28, 1984, and September 30, 1985, based on the race/ethnic categories established by the U.S. Department of Health and Human Services.

Source: Official Minority Group Membership of Pupils Report as of September 28, 1984 and September 30, 1985

¹ Selected position classifications within position category follow the listing of definitions (page 10).

DEFINITIONS OF TERMS AND DATA ELEMENTS (Continued)

RECEIVING SCHOOL

Definition: A school which receives students from another school for promotion to a higher grade (e.g., a junior high school that receives elementary school students promoted from the sixth to the seventh grade).

Receiving Schools will be shown as part of the cluster maps at the beginning of each high school cluster. Most schools receive 100% of the students from their "feeder" schools.

Source: Department of Educational Facilities Planning and Development

SCHOOL

Definition: An MCPS building which houses a program of elementary or secondary education. Statistical profiles are included for all schools for which enrollment is listed in the MCPS Official Enrollment Report for September 30, 1985

Source: MCPS Directory 1985-86 (November 1985) and the 1985-86 Listing of Montgomery County Public Schools, Department of Information

SPECIAL PROGRAMS

Definition: For the first time, under the heading "Special Programs", each school profile will show any of the following programs offered at the school for the 1985-86 school year: Chapter I, State Compensatory Education, Full Day Kindergarten, Child Development Lab, Magnet School Programs, Community School, Day Care, and Before/After School Care.

The following special education programs will also be shown where they are available: Preschool Education; MOD (Programs for the Moderately and Profoundly Retarded); Elementary or Secondary Learning Center; Auditory, Vision, and Handicapped Programs; Mark Twain Program; Bridge Program; and the Elementary Learning Center Satellite Programs.

The Community School, Day Care and Before/After School Programs are located in schools but are not funded by MCPS.

Each school offers a variety of PTA sponsored and other programs which are not included in Statistical Profiles because of space and time limitations and the absence of clearly defined criteria to categorize such programs.

Source: 1985-86 Guide to Programs and Services for Students with Special Needs in MCPS, Office of Special and Alternative Education. List of magnet schools, for 1985-96, provided by the Office of Magnet Programs. List of community schools; Day Care Facilities by School Feeder Areas, July 1, 1985 through June 30, 1986, provided by the Interagency Coordinating Board.

DEFINITIONS OF TERMS AND DATA ELEMENTS (Continued)

STAFF CHARACTERISTICS

Definition: Four characteristics of staff as listed in the Personnel Master File are reported for 1985-86. These characteristics are:

Highest Degree Status: The highest degree, or degree equivalent, recorded for the staff. This data element is recorded and kept up to date for professional staff but not for supporting services. For this reason it is not reported for supporting services staff and is indicated by DATA NOT AVAILABLE notations. Office/Department Total is not determined because of INSUFFICIENT DATA.

Years of Experience: The total number of years of experience credited to staff members according to the Personnel Master File. For supporting services staff, this reflects number of years of experience in MCPS. For professional staff, this reflects the number of years of creditable experience prior to working with MCPS plus years of experience with MCPS.

Sex: The sex of staff members as recorded in the Personnel Master File

Race/Ethnic Background: The race/ethnic group membership of staff members as recorded in the Personnel Master File

Percentages are based on positions allocated and will not total 100% where vacancies occur.

Source: A computer run, based on the Personnel Master File and Position Control File as of November 12, 1985

STUDENT MOBILITY

Definition: This ratio, expressed as a percentage, is calculated by dividing the total number of student entries and withdrawals by the total annual enrollment.

Source: Data from the MCPS Annual Report of Enrollment, Attendance, and Promotions, August 1985, for the 1984-85 school year

DEFINITIONS OF TERMS AND DATA ELEMENTS (Continued)

**STUDENT/PROFESSIONAL
STAFF RATIO¹**

Definition: The student professional staff ratio is calculated by dividing the weighted enrollment (September 30, 1985)* by the number of professional staff.**

*1/2 times (half-day kindergarten enrollment) + (full-day kindergarten enrollment) + (regular enrollment in Grades 1-12) + 0 times (special education and Head Start enrollment)

**All school-based professional staff except those positions classified as special education, Head Start, resource room, or special needs teachers

Source: MCPS Official Enrollment Report by Grade, School, and Area as of September 30, 1985 and the staffing report computer run, based on the Personnel Master File

UTILIZATION

Definition: The percent utilization is determined by dividing the official enrollment (September 30, 1985) by the enrollment capacity.

Source: Department of Educational Facilities Planning and Development

¹In previous years, the enrollment data used was as of November 30 and the number of staff was as of December 1. This year the data used is one month earlier; the net change between the two months is not significant.
