## **ABSTRACT**

Follow-up data on 1983-1984 bachelor's degree graduates of 14 Michigan public and private institutions are presented. For each field of study, data are provided on: average monthly and yearly starting salaries, the number of graduates, the percentage unemployed, the percentage employed in Michigan, and the percentage in graduate school. The relative demand by academic major for the graduates is also indicated for the following unemployment rates: none to 4.9%, 5 to 9.9%, 10 to 14.9%, 15 to 19.9%, 20 to 24.9%, 25 to 29.9% and higher than 30%. Also provided is a historical summary of the efforts (from April 1983 through May 1985) of the Michigan College and University Placement Association to promote a statewide follow-up report for all Michigan college graduates. (SW)

## ACKNOWLEDGEMENTS

The placement directors of Michigan colleges and universities who participated in this follow-up study are given recognition for their extra efforts. A special thanks is also extended because they so graciously cooperated in this research project, and we are requesting continuing cooperation as we attempt to make this report an annual project of the Michigan College and University Employment Research Institute.

Two former presidents of the Michigan College and University Placement Association are especially acknowledged for their time and efforts expended on development of the follow-up questionnaire. Robert A. Large, Director of Cooperative Education and Placement Services, Ferris State College, was President of MCUPA for the 1982-83 school year, and he was instrumental in the initial development of this project. During 1983-84, Brian Walby, Director of Placement, University of Detroit, provided momentum for collection of data from participating institutions.

Several MCUPA committee members assisted as well with this project. They included: Charles D. Alexander, Director of Placement, Central Michigan University; Dr. Chester C. Arnold, Director of Placement, Western Michigan University; Joanne M. Burns, Director of Career Services, Eastern Michigan University; John A. Crusoe, Director of University Placement Services and Cooperative Education, Wayne State University; Deborah Orr May, Director of Career Planning and Placement, University of Michigan; and Paul E. Ripley, Director of Placement and Career Planning, Lake Superior State College.

With preparation of the final report, the fine efforts of our new Institute staff are acknowledged: Phyllis Montague and Bill Riley. These individuals helped with consolidation of the data and printing the final report.

To all who participated in the compilation of this report, we say thank you.

John b. Shingleton

## GENERAL STATEMENT

For several years now, members of the Michigan College and University Placement Association (MCUPA) have been interested in preparation of a statewide follow-up report for all Michigan college graduates. An historical summary of MCUPA efforts is provided below.

## **APRIL 1983**

Discussion regarding the feasibility of a statewide follow-up report was initiated at the Spring business meeting of MCUPA by then President Bob Large. Comments on the topic were mixed and the new President of MCUPA, Brian Walby, and Bob Large planned to research the topic further during the summer.

## SUMMER 1983

A feasibility study was mailed to four-year colleges and universities in Michigan in order to further review their thoughts on this project.

## SEPTEMBER 1983

Reports of the feasibility study were discussed at the Fall MCUPA Conference by Bob Large. Although a number of concerns were noted, most members responding to the study reported an interest in compiling an aggregate report. A motion was made and carried that MCUPA should collect data from four-year public institutions for the first year of the project. A request by Bob Large for \$300 as start-up funding was passed by the membership.

## NOVEMBER 1983

Bob Large and Brian Walby met at Michigan State University in East Lansing with Jack Shingleton and Patrick Scheetz in order to review and modify the existing format for data collection.

### JANUARY 1984

The first follow-up survey forms were sent to all Michigan four-year public and private institutions asking them to return the completed forms along with related comments by March 1, 1984.

## APRIL 1984

During the Spring MCUPA meeting, Brian Walby and Bob Large presented information concerning areas of both consistency and controversy on the existing format. Agreement on an adapted format and process was reached on all but one aspect of the project. A committee of four-year public representatives (including one representative from a four-year private and one from a two-year college) was established.

-iii-

#### MAY 1984

During the Michigan Mindpower Conference II sponsored by State Senator William A. Sederburg at Michigan State University on May 22, 1984, another recommendation for collection of follow-up data was proposed. As a major objective of this conference, more effective career development, planning and placement services were encouraged for Michigan's higher education institutions. As a major recommendation for achievement of this objective, the Michigan Mindpower Conference II proposed that an institute be established with one of several duties being: conduct an annual survey of graduates from Michigan colleges and universities for the purpose of obtaining placement rates and other data pertinent to occupational

## SEPTEMBER 1984

Jack Crusoe updated the Statewide Follow-Up group on the Governor's subcommittee meetings on Occupational Supply and Demand. Jack Crusoe and Jack Shingleton met with the Governor's Commission. The working draft of the final report for the Governor's Commission on the Future of Higher Education in Michigan recommended that the state collect and publish placement data, cited colleges and universities as the best source of this information, and approximated potential costs.

## OCTOBER 1984

A meeting of the entire follow-up committee took place at Michigan State University. A reporting format was finalized and the group agreed to prepare a 1984 report of Bachelor degree recipients for all four-year schools who were able to participate.

## NOVEMBER 1984

A letter and finalized MCUPA Follow-Up form were mailed to directors of placement at all four-year schools. This mailing also included a copy of the Program Category Dimensions of the Classification of Industrial Programs (CIP codes). This structure was used to combine the totals for academic programs from the various colleges and universities. This mailing served as a briefing for colleges and universities regarding data that would be requested during the

## FEBRUARY 1985

In a final mailing, it was requested that four-year schools return their results to Brian Walby by April 5th. This letter also quoted the Governor's Subcommittee on Occupational Supply and Demand which recommended that ". . . a uniform database be implemented, including all the state's public and private two and four-year colleges and universities, to assist in statewide policy decisions, and that the database include . . . postgraduate placement data to guide student career counseling and program planning."

## APRIL 1985

To date the following four-year schools have submitted their data. Some concerns still exist, but most schools plan to adapt their 1984-85 studies so they will be compatible with the existing MCUPA format.

## Data are included from:

Adrian College Albion College Central Michigan Univ. Hope College Eastern Michigan Univ. Mercy College Ferris State College

Grand Valley State Michigan State Univ. Hillsdale College

Michigan Tech Univ. Northern Michigan Univ. Spring Arbor College Western Michigan Univ.

## MAY 1985

Final results from the MCUPA follow-up study were forwarded to Placement Services at Michigan State University as they were received in May, 1985. Since it seemed that funding for an institute was forthcoming, so computer hardware and research personnel would be available to complete this study, preparation of the final report was delayed. Finally in September, 1985, word was received that funding was received for the institute. Efforts began immediately for purchase of equipment and hiring of institute personnel. Finally in January of 1986, equipment and personnel were available to produce this report.

## JANUARY 1986

This final report was prepared with aggregate data from participating institutions. Sections are included in this report on:

- Average starting salaries for Bachelor's degree graduates by academic major.
- Placement rates for each academic major graduated by participating institutions.
- Percentages of graduates employed in Michigan.
- Percentages of graduates attending graduate school.
- Relative supply and demand by academic major.
