ABSTRACT

The report presents general information and statistical data about schools, their staffs and students, as well as administrative staff data concerning Montgomery County Public Schools, Maryland (MCPS). The data are generated from existing computer files to provide in one document much of the data commonly requested of schools; to ensure standard definitions, formats, and statistical procedures to generate the data uniformly across all schools and administrative units; and to provide a reference for those who need accurate consolidated data to conduct planning and decision-making activities. This year, for the first time, some of the data are presented in graph rather than tabular formats. The ninth annual report is organized as follows: (1) introduction, (2) definition of terms and data elements, (3) tables of enrollments and variable distributions, (4) county summary profiles, (5) school and alternative center profiles, (6) office and department profiles, and (7) specialized statistical reports about MCPS. (MLF)

SECTION I

INTRODUCTION

SECTION I

INTRODUCTION

PURPOSE

The Statistical Profiles: 1986-87 is the ninth annual report. It is one of two companion reports issued by the Department of Educational Accountability. The other is the Annual Test Report. Together they provide a set of comprehensive information about Montgomery County Public Schools (MCPS) for use by the Board of Education, school system staff, county government, and the public. The Annual Test Report documents and analyzes systemwide testing results on a school-by-school basis. The Statistical Profiles reports general information and statistical data about schools, their staffs and students, as well as staff data concerning MCPS administrative offices.

Virtually all of the data elements reported in the Statistical Profiles are available in other official school system reports. A list of these specialized statistical reports about MCPS is included in Section VII. Providing these data in a single document, however, serves three important purposes:

It provides in one document much of the data commonly requested of schools.

It assures standard definitions, formats, and statistical procedures to generate the data uniformly across all schools and administrative units.

It makes available a consolidated reference for MCPS staff, members of the Board of Education, the County Council, and other government agencies which need uniform, accurate data to conduct their ongoing planning and decision-making activities.

PROCESS AND DESIGN

The data in this report are generated from existing computer files and central office reports and require no additional data collection directly from schools. Though there are many advantages in drawing the

data from existing files, there are disadvantages as well. Each of the data sources was designed to serve specific purposes, generally unrelated to publication of the Statistical Profiles. When all of these sources are pulled together, the differences among them lead to apparent discrepancies. The selection of the data categories, the form of the statistics reported, and "as of" dates for data are examples of areas where differences occur.

With each annual issue, efforts have been made to improve this publication through improved data collection and storage, fewer manual calculations, better explanations of differences where they appear, and modified page layouts. For the last two years, a computerized Statistical Profile Data Base was used in analyzing and printing the information for this report. This relational database also makes the information in Statistical Profiles available for other types of analyses throughout the year. This year, for the first time, some of the data are presented in graph rather than tabular formats.

Schools in this year's Statistical Profiles are presented alphabetically within each high school cluster within the administrative areas. The high school clusters include a map showing the schools within the cluster. In most cases, schools shown on the cluster maps "feed" 100 percent of their students into the school at the next level within the cluster. Schools that split their population when entering the next level are shown in both clusters.

To facilitate location of data for a particular school, the Table of Contents lists the schools alphabetically by high school cluster within area. In addition, an alphabetical listing of all schools with page references follows the Table of Contents. It will enable the reader to locate a school if its cluster is unknown.

ORGANIZATION OF THE REPORT AND TYPES OF DATA REPORTED

The report is organized into seven sections: introduction, definition of terms and position categories, tables of enrollments and variable distributions, county summary profiles, area summaries and individual school and alternative center profiles, office and department profiles, and specialized statistical reports. Each section is briefly described below.

Section I. INTRODUCTION: This section describes the report and its purpose, and presents the organization of the report with the types of data reported.

Section II. DEFINITION OF TERMS AND DATA ELEMENTS: Along with a listing of data elements, their definitions, and sources is a list of selected position classifications by position category.

Section III. TABLES OF ENROLLMENTS AND VARIABLE DISTRIBUTIONS: Enrollment data on the school system, a comparison of selected MCPS data to other large school systems, school openings and closings, and distributions of selected data elements are resented in the following tables:

Table 1 Rank and enrollment for the 50 largest school districts in the nation for the year 1985-86.

Table 2 The schools closed and/or opened in MCPS in the past four years and those projected for opening in September 1987.

Table 3 MCPS enrollment for the five-year period 1983 to 1987 and the projection for FY 1988. A corresponding graph showing enrollment trends from 1976 to 1993 is also included.

Tables 4-6 The county's range and distribution of values for a selected set of the data elements for elementary, junior/intermediate/middle, and senior high schools.

The last three tables are especially useful in analyzing the data for a single school. Comparing the data elements for any one school with the range and distribution tables enables the reader to note differences among schools and whether a particular school is high, average, or low for a given measure.

Section IV. COUNTY SUMMARY PROFILES: This section contains six summaries of school profiles, including one summary of all schools and centers in the school system; one summary for all regular schools; three summaries by school level -- senior high schools, junior high/intermediate/middle schools, and elementary schools; and one summary of alternative centers.

Section V. SCHOOL AND ALTERNATIVE CENTER PROFILES: Individual school profiles, including cluster maps, are featured in this section. Alternative center profiles for the nine centers/schools are also included. In addition, a composite profile for the ten Interagency Programs is included for the first time.

Each of the profiles in this and the previous sections report two years of pupil data, 1985-86 and 1986-87, and one year of staff data, 1986-87. The three types of data in each profile may be categorized as general school data, student characteristics and enrollment data, and staff characteristics and positions.

The general school data elements reported as part of each profile are enrollment capacity, student/professional staff ratio, percent utilization, student mobility rate, average pupil attendance, percent of students transported, and special programs available. Senior high profiles include the number of diplomas awarded. Average class size is reported for the elementary schools as a school average and for two categories in the secondary schools: required English courses and all other academic subjects.

The student data include enrollment totals and minority group membership distributions as of September 30, 1986. Proportions of students by sex are not included because they were predictably close to 50 percent in all schools. This data element is included for the alternative centers' student population where this generality did not apply.

The staff data include the number of positions in full-time-equivalents (FTE) as well as the number of persons (N) occupying those positions as of November 6, 1986. Staff serving in more than one school or position are shown in each school or position in terms of actual FTEs allocated where possible. The major exceptions are for speech pathologists and ESOL teachers who, in many cases, are shown only in their base schools. Staff characteristics reported are the highest degree attained, years of experience, ethnic background, and sex.

Section VI. OFFICE AND DEPARTMENT PROFILES: The profiles for the administrative offices and departments are listed alphabetically by department and division within each office. Each profile shows the name, address, phone number, staff breakdown by race and sex, and director of the department. Staff totals for the 1986-87 school year are included.

Section VII. SPECIALIZED STATISTICAL REPORTS ABOUT MCPS: This is a list of specialized statistical reports about MCPS.

SECTION II

DEFINITIONS OF TERMS AND DATA ELEMENTS

SECTION II

DEFINITIONS OF TERMS AND DATA ELEMENTS

The data elements and their sources and definitions are described below.

ALTERNATIVE CENTER

Definition: A separate MCPS school/center providing programs for children with special education needs.

Source: 1986-87 Listing of Montgomery County Public Schools, Department of Information

AVERAGE CLASS SIZE - Elementary

Definition: This ratio is calculated by dividing the regular student enrollment (as of September 30, 1986) by the number of attendance sections. No Special Education or Head Start pupils are included. Average Class Size will be reported as a total for each elementary school.

Source: MCPS Elementary Class Size Report - Attendance Sections as of October 30, 1986

AVERAGE CLASS SIZE - Secondary

Definition: This ratio is calculated by dividing the regular student enrollment (as of September 30, 1986) by the number of classes. No Special Education pupils are included. Average Class Size will be reported for two areas; English (required courses) and All Other Academic Subjects.

Source: MCPS Secondary Class Size Report as of October 30, 1986

DEFINITIONS AND TERMS OF DATA ELEMENTS (Continued)

AVERAGE PUPIL ATTENDANCE

Definition: This percentage is calculated by dividing the average number of students attending by the total number of students enrolled during the year.

Source: Annual Report on Enrollment, Attendance and Promotion for School Year 1985-86

CLUSTER

Definition: A high school cluster includes all the junior, intermediate, middle, and elementary schools that "feed" their students to that high school. The cluster maps included with each high school group are not drawn to a uniform scale because of space limitations.

Source: Department of Educational Facilities Planning and Capital Programming

DEPARTMENT

Definition: An MCPS administrative unit whose director reports to the superintendent or to an associate superintendent

Source: Personnel Master File and Position Control File as of November 6, 1986; MCPS Directory 1986-87 (November 1986)

DIPLOMAS AWARDED

Definition: The total number of diplomas awarded includes all those awarded in June and in August for the 1985-86 school year. Those students who were early graduates (eleventh graders) are also included.

Source: High School Diplomas by Type of School: June and August, 1986

DEFINITIONS OF TERMS AND DATA ELEMENTS (Continued)

ENROLLMENT

Definition: Total enrollment includes each grade level, Head Start, and special education attendance sections. Special education enrollment includes only students in self-contained classes. Students with special needs and mainstreamed students are not identified as special education students. Enrollment in alternative centers and Interagency Programs is classified as elementary or secondary rather than by grade level.

Source: The number of students, by grade level, listed in the MCPS Official Enrollment Report by Grade, School, and Area as of September 30, 1985 and September 30, 1986

ENROLLMENT CAPACITY

Definition: The estimated number of students that can be accommodated in the building, based on an allocation of space for different grades and types of programs.

Differences may be noted this year because two formulas were used instead of one. The secondary school capacity formula is based on the state Interagency Committee's definition of capacity and has been used for the past decade. However, since application of this formula has been overstating capacities and the enrollment picture has changed dramatically in the elementary schools, a new formula adopted by the Board of Education which more accurately represents how our schools are operating was used for the elementary schools.

Source: Department of Educational Facilities Planning and Capital Programming

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

FEEDER SCHOOL

Definition: A school which sends its students to another school for the next higher grade level (e.g., an elementary school that "feeds" a junior high school by sending its sixth graders to the junior high for seventh grade).

Feeder schools will be shown as part of the cluster maps at the beginning of each high school cluster. Most schools "feed" 100 percent of their students to the same school. Those in which the population goes on to more than one school will be shown on both of the cluster maps.

Source: Department of Educational Facilities Planning and Capital Programming

HOURS OF SCHOOL DAY

Definition: The time during which the school is open for classes. This is given as the beginning and ending time of the school day for students.

Source: Office of the Deputy Superintendent of Schools

INTERAGENCY AND ALTERNATIVE PROGRAMS

Definition: A program that provides continuity of instruction to students who cannot function in a regular school because of disruptive behavior, substance abuse, court involvement, and/or family dysfunction. The educational program and resources at each site are similar, but the objectives and target populations vary.

Source: Interagency and Alternative Programs. August 1986. Office of the Associate Superintendent for Special and Alternative Education.

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

OFFICE

Definition: An administrative unit headed by the superintendent or an associate superintendent.

Source: Personnel Master File and Position Control File as of November 6, 1986; MCPS Directory 1986-87 (November 1986)

POSITION CATEGORY

Definition: A logical consolidation, by job role, of the position classifications in effect July 1, 1985, for the 1985-86 data and July 1, 1986, for the 1986-87 data. The position categories used in the profiles are listed with their position classifications at the end of this section.

Source: Personnel Department list of personnel classifications for MCPS

Positions reported were identified from two personnel files: (1) the Personnel Master File and (2) the Position Control File. The computer program identified the required data based on current staff in the positions (as of November 6, 1986)

PUPILS TRANSPORTED

Definition: The percentage of pupils bused to school.

Source: MCPS Transportation Report (Run date October 10, 1986)

RACE/ETHNIC BACKGROUND

Definition: The number and percentage of students enrolled on September 30, 1985, and September 30, 1986, based on the race/ethnic categories established by the U.S. Department of Health and Human Services.

Source: Official Minority Group Membership of Pupils Report as of September 30, 1985 and September 30, 1986

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

RECEIVING SCHOOL

Definition: A school which receives students from another school for promotion to a higher grade (e.g., a junior high school that receives elementary school students promoted from the sixth to the seventh grade).

Receiving Schools will be shown as part of the cluster maps at the beginning of each high school cluster. Most schools receive 100 percent of the students from their "feeder" schools.

Source: Department of Educational Facilities Planning and Capital Programming

SCHOOL

Definition: An MCPS building which houses a program of elementary or secondary education. Statistical profiles are included for all schools for which enrollment is listed in the MCPS Official Enrollment Report for September 30, 1986.

Source: 1986-87 Listing of Montgomery County Public Schools,
Department of Information

SPECIAL PROGRAMS

Definition: Under the heading "Special Programs," each school profile will show any of the following programs offered at the school for the 1986-87 school year: Chapter I, State Compensatory Education, Full Day Kindergarten, Child Development Lab, Magnet School Programs, Community School, Day Care, and Before/After School Care.

The Community School, Day Care and Before/After School Programs are located in schools but are not funded by MCPS.

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

The following special education programs will also be shown where they are available: Preschool Education; MOD (Programs for the Moderately and Profoundly Retarded); SPH (Programs for the Severely and Profoundly Handicapped); Elementary or Secondary Learning Center; Auditory, Vision, and Handicapped Programs; Mark Twain Program; Bridge Program; and the Elementary Learning Center Satellite Programs.

The following services are available in all schools on an as-needed basis provided by itinerant teachers: ESOL, Speech/Language, Vision, Auditory, Physical and Occupational Therapy, Bilingual, Diagnostic and Prescriptive Teaching, and Resource Rooms.

In addition, each school offers a variety of PTA-sponsored and other programs which are not included in the Statistical Profiles because of space and time limitations and the absence of clearly defined criteria to categorize such programs. Examples of these programs are "Hands-On Science," "Great Books Program," and "Cultural Arts" programs.

1986-87 Guide to Programs and Services for Students with Special Needs in MCPS, Office of Special and Alternative Education. List of magnet schools, for 1986-87, provided by the Office of Magnet Programs. List of community schools; Day Care Facilities by School Feeder Areas, July 1, 1986, through June 30, 1987, provided by the Interagency Coordinating Board

STAFF CHARACTERISTICS

Definition:

Four characteristics of staff as listed in the Personnel Master File are reported for 1986-87. These characteristics are:

Highest Degree Status: The highest degree, or degree equivalent, recorded for the staff. This data element is recorded and kept up to date for professional staff but not for supporting services. For this reason it is not reported for supporting services staff. Office/Department profiles will not show this because of insufficient data.

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

Years of Experience: The total number of years of experience credited to staff members according to the Personnel Master File. For supporting services staff, this reflects number of years of experience in MCPS.

Sex: The sex of staff members as recorded in the Personnel Master File.

Race/Ethnic Background: The race/ethnic group membership of staff members as recorded in the Personnel Master File.

Percentages are based on positions allocated and will not total 100 percent where vacancies occur.

Source: A computer run, based on the Personnel Master File and Position Control File as of November 1, 1986

STUDENT MOBILITY

Definition: This ratio, expressed as a percentage, is calculated by dividing the total number of student entries and withdrawals by the total annual enrollment.

Source: Data from the MCPS Annual Report of Enrollment, Attendance, and Promotions, August 1986, for the 1985-86 school year

STUDENT/PROFESSIONAL
STAFF RATIO

Definition: The student professional staff ratio is calculated by dividing the weighted enrollment (September 30, 1986)* by the number of professional staff.**

*1/2 times (half-day kindergarten enrollment) plus (full-day kindergarten enrollment) plus (regular enrollment in Grades 1-12) excluding special education and Head Start enrollment.

**All school-based professional full-time-equivalent positions except those positions classified as special education, Head Stat, resource room, or special needs teachers.

DEFINITIONS TERMS AND DATA ELEMENTS (Continued)

Source:

MCPS Official Enrollment Report by Grade, School, and Area as of September 30, 1986 and the staffing report computer run, based on the Personnel Master File

UTILIZATION

Definition:

The percent utilization is determined by dividing the official enrollment (September 30, 1986) by the enrollment capacity. Note: Please see "enrollment capacity."
