**ABSTRACT**

Average salary increases for 4,136 faculty in the field of engineering are reported for 1983-1984 and 1986-1987, as part of the College and University Personnel Association's annual faculty salary studies. Included are comparative data for 120,580 faculty at 167 public colleges and 235 private colleges, representing 44 academic disciplines. In 1983, 54 public colleges and 37 private colleges reported on engineering faculty salaries, while 58 public and 40 private colleges reported in 1986. Between 1983 and 1986, average salaries of faculty in this field increased 25.3% at public colleges and 17.8% at private colleges. For 1986-1987, the average salary for engineering faculty was above the average faculty salary in the other 43 disciplines (17% above for public colleges and 31% above for private colleges). Included is information on: the number of faculty by academic rank, including new assistant professors; salaries by academic rank; the ratio of average salaries to total salaries of all institutions in both years; comparisons with the Consumer Price Index of changes in cost-of-living for both years; and comparisons with 43 other disciplines. The disciplines and participating institutions are listed. (SW)

SALARY-TREND STUDY OF FACULTY IN ENGINEERING

FOR THE YEARS

1983-84 AND 1986-87

"PERMISSION TO REPRODUCE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

Richard D. Howe  
Appalachian State Univ.

THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)"

Since 1982-83 the College and University Personnel Association (CUPA) in Washington, D.C., in cooperation with Appalachian State University in Boone, North Carolina, has conducted annual national faculty salary studies by discipline and rank each year through 1986-87. Each year two separate studies are conducted, one for public senior colleges and universities which are members of the American Association of State Colleges and Universities (AASCU) in Washington, D.C., and the other for private senior colleges and universities. The list of private institutions is provided by the American Council on Education in Washington, D.C.

Salary data for each study were collected and tabulated for full-time teaching faculty in 44 selected academic disciplines including engineering. The disciplines were chosen from among those defined by the Higher Education General Information Study (HEGIS) Taxonomy and by A Classification of Instructional Programs (CIP), 1981. The definition of the discipline/major field of engineering in the CIP is as follows:

A summary of groups of instructional programs that describe the mathematical and natural sciences gained by study, experience, and practice and applied with judgement to develop ways to economically utilize the materials and forces of nature for the benefit of mankind.

This article presents a summary of the overall average salary increases in the discipline/major field of engineering from the "baseline year" of 1983-84 to and including the "trend year" of 1986-87 for both public and private institutions. Of the 215 institutions which participated in CUPA's PUBLIC (AASCU)

E 020 792

study of 1983-84, 167 also participated in 1986-87. Data from those same 167 institutions were used in both the baseline year and the trend year. Of the 355 institutions which participated in CUPA'S PRIVATE study of 1983-84, 235 also participated in 1986-87. Data from those same 235 institutions were used in both the baseline year and the trend year.

In addition to listing the average salaries in engineering for both public and private participating institutions by rank, including "new assistant professor," and listing the faculty mix percentage (FAC MIX PCT) and the salary factor, comparisons are made between the two studies for each of the two study years (1983-84 and 1986-87) and with the CPI (Consumer Price Index) of changes in cost-of-living.

The CPI is based on prices of food, clothing, shelter and fuels, transportation, medical care, entertainment, and other goods and services that people buy for day-to-day living. In examining trends in faculty salary it is important to consider any changes in the economy and the CPI yields a more precise representation of "real" salary increases over time.

The salary is based on a nine- or ten-month academic year salary of full-time faculty only. It does not include any faculty members teaching less than 51 percent. Salary for summer academic work, fringe benefits, and perquisites are not included in the salary data. The average salary is based on the study information with the assumption that all employees were full-time. The average salary displayed is an average of all faculty salaries reported for a given rank and discipline.

The "NUM" means the number of faculty members whose salaries were included to compute the average salary.

The "N/IN" means the number of institutions that reported salary data for a given academic rank and discipline/major field.

The FAC MIX PCT is the percentage of faculty in a given discipline/major field who hold a given academic rank. For example, a FAC MIX PCT factor of .33 for associate professor of engineering in the 1983-84 public study means that 33 percent of the faculty in that discipline/major field hold the rank of associate professor.

The SALARY FACTOR for a given rank of a given discipline/major field is the ratio of the average salary to the total average salary of all institutions in each of the four studies: PUBLIC 1983-84, PUBLIC 1986-87, PRIVATE 1983-84 and PRIVATE 1986-87. For example, a SALARY FACTOR of 1.13 for assistant professors in the discipline/major field of engineering in the 1983-84 public study means that their salaries are 13 percent higher than the average of all assistant professors in all institutions in that study.

NEW ASST PROF is the grouping of assistant professors who were hired for the first time in the fall of the study year (1983-84 or 1986-87). All information for this group was included in the ASST PROF group for reporting purposes. This group is used mainly for new hiring information.

ALL MAJOR FIELDS is the entire data base for all 44 disciplines/major fields in each of the four studies. It is used to compare, among other things, the discipline/major field of engineering with the entire data base for each study.

Of particular import to the reader is noting the size of the sample on which each percentage or dollar value is based. The smaller the number in the group, the greater the effect of extreme scores on a descriptive statistic such as the average. It should be noted also that any large disparity in the sample sizes between the "baseline year" of 1983-84 and the "trend year" of 1986-87 will lessen the reliability and validity of any conclusions that one might make based on a simple comparison of averages.

## RESULTS OF THE TWO PUBLIC (AASCU) STUDIES, 1983-84 AND 1986-87

In the PUBLIC 1983-84 salary study in the above table, the reader may note that the discipline/major field of engineering was reported in 54 of the 167 public (AASCU) institutions. The average salary of the 1,163 faculty was \$30,563. This average salary was approximately 14 percent (1.14) higher than the average salary of \$26,895 for all 36,612 faculty in ALL MAJOR FIELDS in the 1983-84 public study.

In the PUBLIC 1986-87 salary study in the above table, the discipline/major field of engineering was reported in 58 of the same 167 public (AASCU) institutions. The average salary of the 1,316 faculty was \$38,306. This average salary was approximately 17 percent (1.17) higher than the average salary of \$32,670 for all 38,815 faculty in ALL MAJOR FIELDS in the 1986-87 public study.

The increase in average salaries for all faculty in engineering after three years in the public institutions studied was 25.3 percent (\$38,306 minus \$30,563 equals \$7,743). The CPI of increased cost-of-living between October 1983 and October 1986 was 9.2 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 16.1 percent or an average of 5.4 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the public institutions studied was 21.5 percent (\$32,670 minus \$26,895 equals \$5,775). In comparison to the discipline/major field of engineering (25.3%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 3.8 percent (25.3% minus 21.5% equals 3.8%) less than faculty in the discipline/major field of engineering.

Since the discipline/major field of engineering is one of the "older" disciplines, the reader may note that the faculty mix percentage is higher at the professor rank than at the assistant professor rank in the public studies;

0.35 vs. 0.26 (1983-84), respectively; and 0.34 vs. 0.28 (1986-87), respectively. The differences in faculty mix percentage at the ranks of professor and assistant professor in ALL MAJOR FIELDS for both public studies is as follows: 0.31 vs. 0.28 (1983-84) and 0.34 vs. 0.28 (1986-87), respectively. In other words ALL MAJOR FIELDS had a lower percentage of professors and a higher percentage of assistant professors in the 1983-84 public study; however, currently (1986-87) the percentages for full and assistant professors are the same in comparison to engineering.

Finally, the hiring rate of new assistant professors in engineering is high in the public studies: 4.7 percent (55/1,163) in 1983-84 vs. 3.5 percent (1,290/36,612) in ALL MAJOR FIELDS in 1983-84. Also, the hiring rate of new assistant professors in engineering in 1986-87 was 4 percent (53/1,316) vs. 3.8 percent (1,487/38,815) in ALL MAJOR FIELDS that same year. In other words the hiring rate in the discipline/major field of engineering is more than for ALL MAJOR FIELDS in both the public studies of 1983-84 and 1986-87.

#### RESULTS OF THE TWO PRIVATE STUDIES, 1983-84 AND 1986-87

In the PRIVATE 1983-84 salary study in the above table, the reader may note that the discipline/major field of engineering was reported in 37 of the 235 private institutions. The average salary of the 741 faculty was \$35,026. This average salary was approximately 32 percent (1.32) higher than the average salary of \$26,553 for all 21,861 faculty in ALL MAJOR FIELDS in the 1983-84 private study.

In the PRIVATE 1986-87 salary study in the above table, the discipline/major field of engineering was reported in 40 of the same 235 private institutions. The average salary of the 916 faculty was \$41,263. This average salary was approximately 31 percent (1.31) higher than the average salary of \$31,548

for all 23,292 faculty in ALL MAJOR FIELDS in the 1986-87 private study.

The increase in average salaries for all faculty in engineering after three years in the private institutions studied was 17.8 percent (\$41,263 minus \$35,026 equals \$6,237). The CPI of increased cost-of-living between October 1983 and October 1986 was 9.2 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 8.6 percent or 2.9 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the private institutions studied was 18.8 percent (\$31,548 minus \$26,553 equals \$4,995). In comparison to the discipline/major field of engineering (17.8%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 1 percent (18.8% minus 17.8% equals 1.0%) more than faculty in the discipline/major field of engineering.

Because the discipline/major field of engineering is one of the "older" disciplines, the reader may note that the faculty mix percentage is higher at the professor rank than at the assistant professor rank in the private studies: 0.46 vs. 0.23 (1983-84), respectively; and 0.42 vs. 0.28 (1986-87), respectively. This differs from ALL MAJOR FIELDS for both private studies: 0.30 vs. 0.32 (1983-84), respectively; and 0.31 vs. 0.31 (1986-87), respectively. In other words ALL MAJOR FIELDS has a lower percentage of professors and a higher percentage of assistant professors than engineering in both private studies.

Finally, the reader may note that the hiring rate of new assistant professors in engineering in the private studies exceeded the hiring rate in ALL MAJOR FIELDS both in 1983-84, 4.4 percent (33/741) vs. 3.9 percent (856/21,861), respectively, and in 1986-87, 5.2 percent (48/916) vs. 5.0 percent (1,173/23,292), respectively.

## CONCLUDING REMARKS

This article presented salary-trend information on the academic discipline/major field of engineering and compared that information with 43 other academic disciplines/major fields over a period of three years: the "baseline year" of 1983-84 and the "trend year" of 1986-87. Two studies, one for public (AASCU) institutions, and the other for private institutions were conducted for the baseline year and for the trend year--a total of four studies. A total of 4,136 faculty in the discipline/major field of engineering participated and were included in the overall total of 120,580 faculty in all 44 disciplines/major fields in all four studies. The same 167 public (AASCU) institutions and the same 235 private institutions in the United States participated in the baseline year and the trend year.

Although many interpolations and extrapolations of the data may be made, a few of the more important ones are as follows. First, the average faculty salary in the discipline/major field of engineering is currently (1986-87) some 17 and 31 percent above the overall average faculty salary of the other 43 disciplines/major fields for both the public and private studies, respectively. The average faculty salary for engineering in the private institutions was 18 percent more in comparison to that in the public institutions in 1983-84. The overall salary factor in the private institutions is now (1986-87) 14 percent more compared to that for the public institutions: 1.31 vs 1.17, respectively.

Second, the CPI of October 1986, in comparison to the CPI of October 1983, indicates that the faculty in engineering, in both the public and private institutions, received overall salary increases for three years above the cost-of-living. Engineering faculty salaries in the public institutions exceeded that of faculty in ALL MAJOR FIELDS by 3.8 percent during this same period, whereas engineering faculty salaries in the private institutions lagged

behind faculty in ALL MAJOR FIELDS by 1 percent. Engineering in the public institutions have some catching up to do in salary in comparison with their colleagues in the private institutions.

Third, since the discipline/major field of engineering is one of the older disciplines, there is a marked difference between the number of faculty with the rank of full professor and assistant professor in the public and in the private institutions. The full professor rank is already "top heavy" in both the public and private institutions. The full professor rank appears to be decreasing, whereas the assistant professor rank seems to be increasing in both the public and private institutions. It seems a smaller percentage of new assistant professors are being hired in the public institutions.

Now that a rather significant data base on individual faculty member salaries has been developed, it is anticipated that additional salary-trend studies will be effected in engineering, and in other disciplines/major fields, on an annual basis.

---

Richard D. Howe is the originator and director of the annual CUPA faculty salary studies. He is a professor of leadership and higher education, and history at Appalachian State University, Boone, North Carolina. Lynette Tuttle is a research analyst in the Office of Equal Opportunity Programs, Appalachian State University, Boone, North Carolina.

Arkansas College (AR)	Columbia College (MO)
Asbury College (KY)	Concordia College (MI)
Augsburg College (MN)	Cooper Union for the Advancement of Science and Art, The (NY)
Aurora University (IL)	D'Youville College (NY)
Averett College (VA)	Defiance College, The (OH)
Avila College (MO)	DePaul University (IL)
Azusa Pacific University (CA)	DePauw University (IN)
Babson College (MA)	Dickinson College (PA)
Bard College (NY)	Doane College (NE)
Barnard College (NY)	Dordt College, Inc. (IA)
Barry University (FL)	Drake University (IA)
Beaver College (PA)	Drew University (NJ)
Bellarmino College (KY)	Eastern College (PA)
Benedictine College (KS)	Eckard College (FL)
Bethune-Cookman College (FL)	Elmhurst College (IL)
Biola University (CA)	Emory & Henry College (VA)
Birmingham-Southern College (AL)	Erskine College (SC)
Bishop College (TX)	Ferrum College (VA)
Boston College (MA)	Findlay College (OH)
Boston University (MA)	Fouthoune College (MO)
Bradley University (IL)	Forham University (NY)
Briar Cliff College (IA)	Franklin and Marshall College (PA)
Bridgewater College (VA)	Furman University (SC)
Bryant College (RI)	Gannon University (PA)
Bryn Mawr College (PA)	George Washington University, The (DC)
Bucknell University (PA)	Georgetown University (DC)
Butler University (IN)	Gonzaga University (WA)
Canisius College (NY)	Graceland College (IA)
Capital University (OH)	Greensboro College (NC)
Carroll College (MT)	Guilford College (NC)
Catawba College (NC)	Hamline University (MN)
Cedar Crest College (PA)	Hartwick College (NY)
Cedarville College (OH)	Hawaii Loa College (HI)
Centenary College (NJ)	Heidelberg College (OH)
Central College (IA)	Hood College (MD)
Central Wesleyan College (SC)	Hope College (MI)
Christian Brothers College (TN)	Huntington College (IN)
Clark University (MA)	

Participating Institutions, continued:

Husson College (ME)	Norwich University (VT)
Huston-Tillotson College (TX)	Ohio Northern University (OH)
Illinois Benedictine College (IL)	Oklahoma Baptist University (OK)
Illinois College (IL)	Ottawa University (KS)
Immaculata College (PA)	Otterbein College (OH)
Iona College (NY)	Our Lady of the Holy Cross College (LA)
Ithaca College (NY)	Palm Beach Atlantic College (FL)
John Brown University (AR)	Parks College (MO)
John Carroll University (OH)	Pikeville College (KY)
Johns Hopkins University (MD)	Presbyterian College (SC)
Johnson C. Smith University (NC)	Queens College (NC)
Kansas Wesleyan (KS)	Quincy College (IL)
Kanyon College (OH)	Reed College (OR)
King's College (PA)	Regis College (MA)
La Roche College (PA)	Rider College (NJ)
Le Tourneau College (TX)	Ripon College (WI)
Lincoln Memorial University (TN)	Rockford College (IL)
Loyola College in Maryland (MD)	Rockhurst College (MO)
Lubbock Christian College (TX)	Sacred Heart College (NC)
Luther College (IA)	Saint John's University (MN)
Lycoming College (PA)	Saint Joseph College (CT)
Lynchburg College (VA)	Saint Joseph's College (IN)
Malone College (OH)	Saint Mary College (KS)
Manhattanville College (NY)	Saint Paul's College (VA)
Marist College (NY)	Saint Vincent College (PA)
Mary Baldwin College (VA)	Saint Xavier College (IL)
Marymount College (NY)	Salem College (NC)
Marymount Manhattan College (NY)	Salve Regina--The Newport College (RI)
Maryville College (TN)	Scarritt Graduate School (TN)
Marywood College (PA)	School of the Ozarks, The (MO)
Mercy College (NY)	Seattle University (WA)
Mercy College of Detroit (MI)	Seton Hill College (PA)
Meredith College (NC)	Siena College (NY)
Merrimack College (MA)	Siena Heights College (MI)
Millikin University (IL)	Simpson College (IA)
Molloy College (NY)	Sioux Falls College (SD)
Monmouth College (NJ)	Southern California College (CA)
Moravian College (PA)	Southern Methodist University (TX)
Morningside College (IA)	Southwestern College (KS)
Morris Brown College (GA)	Spalding University (KY)
Mount Mary College (WI)	Springfield College (MA)
Mount Marty College (SD)	St. Bonaventure University (NY)
Mount Saint Clare College (IA)	St. Francis College (NY)
Mount Saint Mary's College (MD)	St. Mary's University (TX)
Mount Vernon College (DC)	St. Norbert College (WI)
Muskingum College (OH)	Suffolk University (MA)
Nazareth College (MI)	Sweet Briar College (VA)
Nazareth College of Rochester (NY)	Syracuse University (NY)
Neumann College (PA)	Taylor University (IN)
North Central College (IL)	Texas Christian University (TX)
Northwestern College (IA)	Texas Lutheran College (TX)
Northwestern College (IN)	

Participating Institutions, continued:

Transylvania University (KY)  
Tri-State University (IN)  
Trinity College (JC)  
Trinity College (VT)  
Trinity University (TX)  
University of Dayton (OH)  
University of Dubuque, The (IA)  
University of La Verne (CA)  
University of Miami (FL)  
University of Portland (OR)  
University of San Diego (CA)  
University of Scranton (PA)  
University of the South, The (TN)  
University of Tulsa (OK)  
Ursuline College (OH)  
Valparaiso University (IN)  
Villa Maria College (PA)  
Virginia Union University (VA)  
Viterbo College (WI)  
Wabash College (IN)  
Wagner College (NY)  
Walsh College (OH)  
Warner Pacific College (OR)  
Washington and Jefferson College (PA)  
Washington and Lee University (VA)  
West Virginia Wesleyan College (WV)  
Western Maryland College (MD)  
Westmar College (IA)  
Westminster College of Salt Lake City (UT)  
Whitman College (WA)  
Whittier College (CA)  
Widener University (PA)  
William Jewell College (MO)  
William Marsh Rice University (TX)  
William Penn College (IA)  
Wilmington College (OH)  
Wilson College (PA)  
Wittenburg University (OH)  
York College of Pennsylvania (PA)

TOTAL: 235
