ABSTRACT

Average salary increases for 3,116 faculty in the field of philosophy and religion are reported for 1983-1984 and 1986-1987, as part of the College and University Personnel Association's annual faculty salary studies. Included are comparative data for 120,580 faculty at 167 public colleges and 235 private colleges, representing 44 academic disciplines. In 1983, 91 public colleges and 201 private colleges reported on salaries of faculty in philosophy and religion, while 108 public and 208 private colleges reported in 1986. Between 1983 and 1986, average salaries of faculty in this field increased 23.4% at public colleges and 17.3% at private colleges. For 1986-1987 the average salary for faculty in religion and philosophy was about 2% above the average faculty salary in the other 43 fields for public colleges, while it was 2% below the average for other disciplines at private colleges. Included is information on: the number of faculty by academic rank, including new assistant professors; salaries by academic rank; the ratio of average salaries to total salaries of all institutions in both years; comparisons with the Consumer Price Index of changes in cost-of-living for both years; and comparisons with 43 other disciplines. The disciplines and participating institutions are listed. (SW)

SALARY-TREND STUDY OF FACULTY IN PHILOSOPHY AND RELIGION

FOR THE YEARS

1983-84 AND 1986-87

Richard D. Howe
Appalachian State Univ

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."

ED287390

Since 1982-83 the College and University Personnel Association (CUPA) in Washington, D.C., in cooperation with Appalachian State University in Boone, North Carolina, has conducted annual national faculty salary studies by discipline and rank each year through 1986-87. Each year two separate studies are conducted, one for public senior colleges and universities which are members of the American Association of State Colleges and Universities (AASCU) in Washington, D.C., and the other for private senior colleges and universities. The list of private institutions is provided by the American Council on Education in Washington, D.C.

Salary data for each study were collected and tabulated for full-time teaching faculty in 44 selected academic disciplines including philosophy and religion. The disciplines were chosen from among those defined by the Higher Education General Information Study (HEGIS) Taxonomy and by A Classification of Instructional Programs (CIP), 1981. The definition of the discipline/major field of philosophy and religion in the CIP is as follows:

A summary of groups of instructional programs that describe the critical examination of the categories for describing reality, the nature and contexts of human experience, the methodology of rational inquiry and criteria of practice (Philosophy); and the investigation of organized forms, beliefs, and practices related to eternal principles or transcendent spiritual entities (Religion).

This article presents a summary of the overall average salary increases in the discipline/major field of philosophy and religion from the "baseline year" of 1983-84 to and including the "trend year" of 1986-87 for both public and private institutions. Of the 215 institutions which participated in CUPA's

This document has been reproduced as received from the person or organization originating it.

Points of view or opinions stated in this document do not necessarily represent official OERI position or policy.

PUBLIC (AASCU) study of 1983-84, 167 also participated in 1986-87. Data from those same 167 institutions were used in both the baseline year and the trend year. Of the 355 institutions which participated in CUPA'S PRIVATE study of 1983-84, 235 also participated in 1986-87. Data from those same 235 institutions were used in both the baseline year and the trend year.

This study lists the average salaries of philosophy and religion faculty for both public and private participating institutions by rank, including "new assistant professor," the FAC MIX PCT (faculty mix percentage) and the salary factor. In addition, comparisons are made with the CPI (Consumer Price Index) of changes in cost-of-living between the two studies for each of the two study years (1983-84 and 1986-87).

The CPI is based on prices of food, clothing, shelter and fuels, transportation, medical care, entertainment, and other goods and services that people buy for day-to-day living. In examining trends in faculty salary it is important to consider any changes in the economy. Therefore, the CPI was used to yield a more precise representation of "real" salary increases over time.

The salary is based on a nine- or ten-month academic year salary of full-time faculty only. It does not include any faculty members teaching less than 51 percent. Salary for summer academic work, fringe benefits, and perquisites are not included in the salary data. The average salary is based on the study information with the assumption that all employees were full-time. The average salary displayed is an average of all faculty salaries reported for a given rank and discipline.

The "NUM" means the number of faculty members whose salaries were included to compute the average salary.

The "N/IN" means the number of institutions that reported salary data for a given academic rank and discipline/major field.

The FAC MIX PCT is the percentage of faculty in a given discipline/major field who hold a given academic rank. For example, a FAC MIX PCT factor of .41 for associate professor of philosophy and religion in the 1983-84 public study means that 41 percent of the faculty in that discipline/major field hold the rank of associate professor.

The SALARY FACTOR for a given rank of a given discipline/major field is the ratio of the average salary to the total average salary of all institutions in each of the four studies: PUBLIC 1983-84, PUBLIC 1986-87, PRIVATE 1983-84 and PRIVATE 1986-87. For example, a SALARY FACTOR of 0.94 for assistant professors in the discipline/major field of philosophy and religion in the 1983-84 public study means that their salaries are 6 percent lower than the average of all assistant professors in all institutions in that study.

NEW ASST PROF is the grouping of assistant professors who were hired for the first time in the fall of the study year (1983-84 or 1986-87). All information for this group was included in the ASST PROF group for reporting purposes. This group is used mainly for new hiring information.

ALL MAJOR FIELDS is the entire data base for all 44 disciplines/major fields in each of the four studies. It is used to compare, among other things, the discipline/major field of philosophy and religion with the entire data base for each study.

Of particular import to the reader is noting the size of the sample on which each percentage or dollar value is based. The smaller the number in the group, the greater the effect of extreme scores on a descriptive statistic such as the average. It should be noted also that any large disparity in the sample sizes between the "baseline year" of 1983-84 and the "trend year" of 1986-87 will lessen the reliability and validity of any conclusions that one might make based on a simple comparison of averages.

RESULTS OF THE TWO PUBLIC (AASCU) STUDIES, 1983-84 AND 1986-87

In the PUBLIC 1983-84 salary study in the above table, the reader may note that the discipline/major field of philosophy and religion was reported in 91 of the 167 public (AASCU) institutions. The average salary of the 421 faculty was \$26,940. This average salary was approximately the same (1.00) as the average salary of \$26,895 for all 36,612 faculty in ALL MAJOR FIELDS in the 1983-84 public study.

In the PUBLIC 1986-87 salary study in the above table, the discipline/major field of philosophy and religion was reported in 108 of the same 167 public (AASCU) institutions. The average salary of the 523 faculty was \$33,257. This average salary was approximately 2 percent (1.02) higher than the average salary of \$32,670 for all 38,815 faculty in ALL MAJOR FIELDS in the 1986-87 public study.

The increase in average salaries for all faculty in philosophy and religion after three years in the public institutions studied was 23.4 percent (\$33,257 minus \$26,940 equals \$6,317). The CPI of increased cost-of-living between October 1983 and October 1986 was 9.2 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 14.2 percent or an average of 4.7 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the public institutions studied was 21.5 percent (\$32,670 minus \$26,895 equals \$5,775). In comparison to the discipline/major field of philosophy and religion (23.4%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 1.9 percent (23.4% minus 21.5% equals 1.9%) less than faculty in the discipline/major field of philosophy and religion.

The reader may note that the faculty mix percentage in philosophy and religion is higher at the professor rank than at the assistant professor rank

in both the public studies: 0.35 vs 0.23 (1983-84) and 0.41 vs 0.24 (1986-87), respectively. The differences in faculty mix percentage at the ranks of professor and assistant professor in ALL MAJOR FIELDS for both public studies are as follows: 0.31 vs. 0.28 (1983-84) and 0.34 vs. 0.28 (1986-87), respectively. In other words ALL MAJOR FIELDS has a lower percentage of professors and a higher percentage of assistant professors compared to philosophy and religion in both of the public studies.

Finally, the hiring rate of new assistant professors in philosophy and religion was lower in the 1983-84 public study in comparison to that of ALL MAJOR FIELDS: 3.1 percent (13/421) vs. 3.5 percent (1,290/36,612), respectively. However, the hiring rate of new assistant professors in philosophy and religion in 1986-87 was higher than ALL MAJOR FIELDS: 4.0 percent (21/523) vs. 3.8 percent (1,487/38,815), respectively.

RESULTS OF THE TWO PRIVATE STUDIES, 1983-84 AND 1986-87

In the PRIVATE 1983-84 salary study in the above table, the reader may note that the discipline/major field of philosophy and religion was reported in 201 of the 235 private institutions. The average salary of the 1,061 faculty was \$26,316. This average salary was approximately 1 percent (0.99) lower than the average salary of \$26,553 for all 21,861 faculty in ALL MAJOR FIELDS in the 1983-84 private study.

In the PRIVATE 1986-87 salary study in the above table, the discipline/major field of philosophy and religion was reported in 208 of the same 235 private institutions. The average salary of the 1,111 faculty was \$30,865. This average salary was approximately 2 percent (0.98) lower than the average salary of \$31,548 for all 23,292 faculty in ALL MAJOR FIELDS in the 1986-87 private study.

The increase in average salaries for all faculty in philosophy and religion after three years in the private institutions studied was 17.3 percent (\$30,865 minus \$26,316 equals \$4,549). The CPI of increased cost-of-living between October 1983 and October 1986 was 9.2 percent. A more realistic increase, therefore, in average faculty salaries over the three-year time period is 8.1 percent or 2.7 percent each year above the cost-of-living.

The increase in average salaries for all faculty in ALL MAJOR FIELDS after three years in the private institutions studied was 18.8 percent (\$31,548 minus \$26,553 equals \$4,995). In comparison to the discipline/major field of philosophy and religion (17.3%), therefore, the faculty in ALL MAJOR FIELDS increased their salaries by 1.5 percent (18.8% minus 17.3% equals 1.5%) more than faculty in the discipline/major field of philosophy and religion.

In the discipline/major field of philosophy and religion, the reader may note that the faculty mix percentage at the professor rank is more than at the assistant professor rank in the private studies: 0.42 vs. 0.26 (1983-84), respectively; and 0.42 vs. 0.26 (1986-87), respectively. This is different from ALL MAJOR FIELDS for both private studies: 0.30 vs. 0.32 (1983-84), respectively; and 0.31 vs. 0.31 (1986-87), respectively. In other words ALL MAJOR FIELDS has a lower percentage of professors and a higher percentage of assistant professors compared to philosophy and religion in both private studies.

Finally, the reader may note that the hiring rate of new assistant professors in philosophy and religion in the private studies was less than the hiring rate in ALL MAJOR FIELDS both in 1983-84, 2.9 percent (31/1,061) vs. 3.9 percent (856/21,861), respectively; and in 1986-87, 4.0 percent (44/1,111) vs. 5.0 percent (1,173/23,292), respectively.

CONCLUDING REMARKS

This article presented salary-trend information on the academic discipline/major field of philosophy and religion and compared that information with 43 other academic disciplines/major fields over a period of three years: the "baseline year" of 1983-84 through the "trend year" of 1986-87. Two studies, one for public (AASCU) institutions, and the other for private institutions were conducted for the baseline year and for the trend year--a total of four studies. A total of 3,116 faculty in the discipline/major field of philosophy and religion participated and were included in the overall total of 120,580 faculty in all 44 disciplines/major fields in all four studies. The same 167 public (AASCU) institutions and the same 235 private institutions in the United States participated in the baseline year and the trend year.

Although many interpolations and extrapolations of the data may be made, a few of the more important ones are as follows. First, the average faculty salary in the discipline/major field of philosophy and religion is currently (1986-87) some 2 percent above in the public institutions and 2 percent below in the private institutions the overall average faculty salary of the other 43 disciplines/major fields. The average faculty salary for philosophy and religion in the private institutions was 1 percent less in comparison to that in the public institutions in 1983-84. The overall salary factor in the private institutions is now (1986-87) 4 percent less in comparison to that for the public institutions: 0.98 vs 1.02, respectively.

Second, the CPI of October 1986, in comparison to the CPI of October 1983, indicates that the faculty in philosophy and religion, in both the public and private institutions, received overall salary increases for three years above the cost-of-living. The salary increase of the philosophy and religion faculty salaries in the public institutions exceeded faculty in ALL MAJOR FIELDS during

this same period by 1.9 percent, whereas philosophy and religion faculty salaries in the private institutions lagged behind ALL MAJOR FIELDS by 1.5 percent. Philosophy and religion faculty in the private institutions have some catching up to do in salary in comparison to their colleagues in the public institutions and ALL MAJOR FIELDS.

Third, in the discipline/major field of philosophy and religion the full professor rank has a greater percentage compared to the assistant professor rank for both the public and private studies. The full professor rank appears to be increasing at a greater rate in the public institutions compared to the private institutions. It seems approximately the same percentage of new assistant professors are being hired in the private institutions in comparison to the public institutions.

Now that a rather significant data base on individual faculty member salaries has been developed, it is anticipated that additional salary-trend studies will be effected in philosophy and religion, and in other disciplines/major fields, on an annual basis.

Richard D. Howe is the originator and director of the annual CUPA faculty salary studies. He is a professor of leadership and higher education, and history at Appalachian State University, Boone, North Carolina. Co-author J. Beth Carlton is a research analyst in the Office of Equal Opportunity Programs at Appalachian State University, Boone, North Carolina.
