ABSTRACT

The catalog was developed to provide information about more than 200 recommended learning games and toys for all children, especially those with learning problems or physical handicaps. The materials listed provide educational experiences through game formats and help to develop gross and fine motor skills, math and reading readiness skills, cognitive skills, auditory and visual discrimination, communication skills, social emotional skills, life skills, and tactile awareness. The listings are organized alphabetically by toy name within these skill areas. For each listing, the following information is provided: suggested developmental level, suggested interest level, a drawing of the item, brief description, suggested uses, manufacturer and price, and skill areas. In an appendix, a chart indicates the toy's availability from eight distributors across the country. Other items contained in the catalog include definitions of terms, a consumer's guide to purchasing the toys, and a description of the Learning Games Libraries Association. (JDD)

ACKNO WLEDGEMENTS

The Learning Games Libraries Association and the Illinois Division for Early Childhood, both associated with "he Illinois Council for Exceptional Children, extend thanks to the many persons who voluntarily gave of their time and talents in the development of the Learning Materials Catalog. Many stages of effort were needed to bring the project to completion including:

- * identifying and evaluating appropriate materials
- * describing materials and the suggested activities to utilize them
- * developing the catalog format, transferring information, and proofreading/editing the final product

The catalog was possible only because of the dedication and work of the following:

Catalog Revision Committee

Dennis Sykes, Co-Chair, Catalog Revision Committee; Coordinator, Resource Access Project, University of Illinois

Carol Domroese, Committee Co-Chair; Learning Disabilities Consultant Janet Mutter, Recreation Specialist

Ruth Peaslee, Head Children's Librarian, Oak Park Public Library Carolyn Speakman, Media Specialist

Special thanks to: Mary Roddy, Education Materials' Consultant - Future Child

Others who assisted in special ways

Judith Frank-Gonwa, Special Education Consultant; President, The Learning Games Libraries Association

Daniel Hampson, Media Consultant

Lynn Moore, Early Childhood Specialist, Illinois State Board of Education Mary Sillins, Learning Disabilities Consultant Gertrude Zill, Educational Materials' Consultant

Near West Chapter 557 of the Council for Exceptional Children and other Oak Park, Illinois special education staff

Mary Carapella, Chris Carlson, Carolyn Circo, Jo Ann Dunn, Pat Healey, Kathy Irving, Jill Widing, Sue Wolowitz, Sue Wortman, and Chris Zielinski.

Others who p' 'ided assistance

Madeline man, Jayne Amhaus, Mary Ann Billings, Debbie Breger, Jackie Crain, Jean Bra Pavenport, Debbie Diamond, Louise Dunning, Mary Gehrig, Ivy Goldstein, Bar Javaras, Kathy Johnson, Dr. Miing-Gon John Lian, Dr. Barbara Lowentha l Miller, Jean Stockham, and Dennice Ward.

- * This edition of the LEARNING MATERIALS CATALOG has been co-sponsored
- * by the Illinois Council for Exceptional Children, the Resource Access
- * Project at the University of Illinois, and the Region 5 Office of Human
- * Development Services, Project Head Start, U.S. Department of Health and
- * Human Services.

HOW TO USE THE CATALOG

Each catalog page contains information to assist in selection and use of the materials. Whether used in a Learning Games Library or elsewhere, it is designed to help parents and professionals in working with children. Following is a list of the components of a catalog page with a brief definition of each:

<u>Title</u> found at the top center of each catalog page. You will find items organized alphabetically by title within each section of the catalog beginning with the visual skills area.

Suggested Developmental Level This describes the chronological age range in which most children can learn the skills required by this toy. It was determined by concensus of a committee of special and regular educators. Children develop at different rates; consequently you may find your child "ready" for . game or toy at some time within the range listed. Do not hesitate to use an item before or after the age ranges listed if that seems to make good sense to you and if your child is interested in it.

Suggested Interest Level The interest level in some cases is different from the developmental level. A child may remain interested for various reasons even after the learning required to use the item has been mastered. In addition, a child who is disabled, who has a learning difficulty or a developmental delay, may not be ready to learn a given skill when most other children do. Some games and toys were purposely selected to reach the interest level of these children who are learning particular skills at a later chronological age.

Graphic The drawings provide a picture of the item to assist you in making choices before you go to the shelf to make your final selection.

Brief Description The few sentences offer basic information including, when possible, size, number of pieces, and the material of which the game/toy is rade.

Suggested Uses Specialists in education wrote and refined the sequence of steps you will find on the catalog pages. The intent was to list easiest uses first with more difficult steps following. Do not feel you must start with step one. If step one is too difficult, build in smaller, easier steps. Or, if you find that step one is too easy, move to a step that is right for your child. We encourage you to begin with a success level — one that is enjoyable for the child.

Manufacturer and Price This information is found in the Lower left hand corner and is provided for those persons wishing to order the item shown on the catalog page. Use the grid in the appendix to assist you in finding where you may purchase/order. (See "Buying Sense" in the introduction for further details.)

<u>Skills</u> The lower right hand corner of each catalog page has a listing of the main category (first letter capitalized) followed by sub-categories appropriate for the item on that catalog page. An asterisk appears before the skill area considered the main category for the game or toy shown on a page. Following are skill areas ared in the catalog with definitions of terms on subsequent pages.

DEFINITIONS OF TERMS

Visual_Skills Looking Activities

- visual awareness as an early learning skill, the infant recognizes movement, shape, then mother's face. Toys such as mobiles can be used to develop this skill.
- visual discrimination seeing differences between objects and pointing to two that are the same in a group of three or more.
- visual matching moving beads or other objects as for a game to match like
 objects.
- visual tracking teaching the eyes to move in a left to right direction as in reading; teaching the eyes to follow a moving object.
- visual sequencing placing objects/cards/letters/words in the same order as the model, to form a pattern.

visual memory - remembering what was seen.

Auditory Skills (Hearing Activities)

- sound awareness 1. hearing. 2. indicating where a sound is coming from.
 3. recognizing an object by a sound.
- auditory discrimination telling if sounds or words are the same or different.
- auditory sequencing putting sounds together to copy a pattern as with infant/toddler toys; using rhythm instruments to match a series of sounds.

auditory memory - repeating a pattern of sounds, words, or a sentence.

Tactile Skills (Feeling Activities, Learning by Touch)

feeling - experiencing sensations on the skin.

- tactile stimulation purposeful touching of the skin to help the child develop the nervous system.
- tactile awareness recognizing different textures, shapes, letters, numbers, using only touch.

4

tactile discrimination - determining whether textures are the same or different, using only touch.

Communication Skills (Communicating Activities)

- playing with sounds sounds a baby makes with the lips and/or tongue.
- imitating sounds babbling, trying to copy adult sounds.

6

- following directions learning to follow more than one oral direction at a time with directions gradually becoming more complicated.
- labeling naming objects, actions or words that describe objects and actions.
- structuring the sentence imitating others, children learning how words are joined to make a sentence; older children practicing.
- talking with meaning telling of ideas and feelings so that others can understand.

Gross Motor Skills (Big Muscle Activities)

- locomotion moving from place to place through crawling, walking, skipping,
 running.
- balance standing, hopping on one foot, roller skating, walking on a beam.
- motor planning following a plan to accomplish tasks such as buttoning, tying, throwing a ball.
- body awareness knowing where different parts of the body are without looking at them whether lying down, standing, or upside down.

Fine Motor Skills (Small Muscle Activities)

- whole hand grip picking things up, holding on to things such as when grabbing a rattle.
- hand-eye coordination using dressing skills such as snapping, buttoning, tying, lacing; catching; working puzzles; playing pick-up-sticks.
- pincer grip using the fingers and thumb together as when tracing, coloring, writing, tearing, working puzzles, sewing or lacing cards, stringing beads.
- bilateral activities using both sides of the body, one after the other or at the same time such as erasing a chalk board, jumping rope.
- dexterity doing things with fingers or hands easily and/or quickly.
- directionality knowing where to begin and then which way to go as when using cursive writing or following the dots.

Cognitive Skills (Thinking Activities)

shape concepts - recognizing basic shapes such as circle, square, triangle.

size learning to discriminate size, shape, weight, learning the words weight used to describe objects and the opposite; examples: big-little, textures heavy-light, rough-smooth.

color - learning color names and identifying objects by color.

form - discovering that a form can change shape without changing size as with clay, water or sand; seeing how shapes compare as in working puzzles with

- a pattern as a guide.
- depth understanding perspective as in a picture, a dimension beyond flatness.
- sequence putting events in the order they happened, or putting objects in a pattern while observing a model.
- ranking putting objects in order of size, color, weight, etc.
- classification/categories sorting or putting things in similar groups.
- cause effect if ____ happens first, determining what will happen next.

Social Emotional Skills (Play Activities Alone or With Others)

- solitary play when a child plays alone making up his own games.
- parallel play when two children are close to each other but there is little or no interaction between them even when they both have the same type toy. The children do not "share" the experience of play.
- group play when two or more children interact to share the same experience, structure, rules; give and take is needed.
- imitative play when a child watches another person's actions and tries to repeat them.
- imaginary play when a child or children act out an action or situation without using props.

Life Skills (Activities Basic to Daily Living)

- self help activities to help a child become independent as in dressing, opening/closing doors, feeding oneself.
- environmental awareness activities to help a child gain an understanding of oneself, the family, the community, changes in seasons, the holidays, safety rules.

Mathematic Skills (Use of Numbers)

- math readiness math concepts/vocabulary: more-less, greater-fewer, long-longer-longest, short-tall, big-small: counting including rote counting (saying number names from memory): one-to-one correspondence (counting one number to one object): numeral recognition.
- word problems/story problems practical application using basic operations of addition, subtraction, multiplication, division.
- consumer math comparison of size or cost, money, measurement, fractions,
 time, geometry.

Reading Skills (Use of Letters/Words For Meaning)

reading readiness - developing a readiness for reading in such activities as the infant babbling, the young child making animal sounds, hearing

stories read; seeing differences in shapes, using puzzles; learning sounds the letters make.

reading comprehension - understanding of a story read to the young child; later the understanding of words/phrases/sentences/stories read by the child.

BUYING SENSE

If you wish to order learning materials in any quantity, you may want assistance and guidance in making wise purchases. The Learning Games Libraries Association members will be happy to provide you with information which we find useful in our own selection and purchasing process.

It is well worth the effort to comparison shop in order to use your money wisely. As you shop be aware of the fact that different names may be given to the same item or a very similar item in the catalogs of various companies.

Check for sturdiness and workmanship as you determine your selections. Items selected for this catalog were chosen with these characteristics in mind. The best price may not be the best buy when considering long term usage by a large number of persons. Some items may be available in toy and discount stores. Take advantage of the best buys wherever they may be.

Ask many questions of salespersons with whom you work. Prices may change on a yearly basis and you will want to inquire about when new catalogs will be available; this differs with various companies. Sales occur on a yearly basis, not necessarily coinciding with the issuing of new catalogs. Once you become aware of the month of sales, make a calendar and follow it to increase your buying power.

Gather a wide range of catalogs in preparation for selecting materials for your game/toy library. Some companies will specialize in particular types of materials, such as early childhood or materials specifically recommended for children who are visually or hearing impaired. While a few materials are highly specialized, most materials will provide enjoyable learning experiences for nearly all children who use them. Specialization occurs in the use materials receive.

An annual update of this catalog is planned. If you have materials that have worked well with a child, please send information about them using the following format: name of materials, developmental level, interest level, a picture from a catalog if possible, description and suggested use, manufacturer and price. All suggestions should be directed to: Catalog, LGLA/IDEC, Box 4002, Oak Park, IL 60303.

Please refer to the appendix for assistance in locating where the learning materials may be purchased.

WHY THE CATALOG WAS DEVELOPED

The Learning Materials Catalog 1986 has been developed to provide names of and information about recommended learning games and toys for all children, especially those with learning problems or physical handicaps. The materials found in the catalog provide educational experiences through game formats. They help to develop motor skills, math and reading readiness skills, higher level concepts, auditory and visual discrimination, language skills, and tactile awareness.

Originally developed by the Near West Chapter 557 of the Council for Exceptional Children and the Oak Park Public Library, the catalog came under revision in 1984 when a catalog revision committee of the Learning Games Library Association was established:

- to gather from specialists throughout Illinois the names of materials recommended for parents to use in the home in teaching their children specific skills
- 2. to incorporate information on catalog pages which would provide parent/caregiver and learning specialists with help in selecting and using materials

While the catalog may benefit classroom teachers, game and toy librarians, and specialists in hospitals or other facilities, the primary intent of the catalog is to offer assistance to parents/caregivers, special education teachers, and teachers of mainstreamed special students who use the <u>Learning Materials Catalog</u> within a Learning Games Library.

9

THE LEARNING GAMES LIBRARIES ASSOCIATION

The Learning Games Libraries Association had its origin in the Learning Games Library established in Oak Park in 1976. Currently the Oak Park Public Library Maze Branch, 845 Gunderson, Oak Park, Illinois, 60304, serves as a pilot for a growing network of Learning Games Libraries throughout the state.

Should you wish to join the Learning Games Libraries Association and receive continuing information about new materials and locations of Learning Games Libraries and/or to become a part of the networking system, contact:

Learning Games Libraries Association

Box 4002

Oak Park, Illinois 60303.

Membership benefits include:

- * assistance in establishing a Learning Games Library,
- * an information packet on Learning Games Libraries,
- * opportunity to receive mailing concerning the updates of this catalog,
- * newsletters,
- * access to a network of persons interested in developmental learning materials.

Timing is crucial in the learning process. Learning Games Libraries can provide learning experiences at the proper times in the children's lives and help children develop to their fullest potential. Public libraries or other organizations can serve the needs of the entire community, including exceptional children and their families, by making the learning games easily accessible to the public.

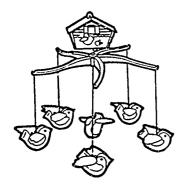

Through workshops presented in connection with LGLs and provided jointly by special education personnel and the library staff, caregivers can learn to recognize potential learning problems in their young children and can further learn to use the materials more effectively with the youngsters.

Members of the Learning Games Libraries Association and the Illinois Division for Early C. Idhood wish you well in you use of this catalog.

BIRD CRIB MOBILE

Suggested	Developmental	Level	3-6mos	Suggested	Interest	Level	3-6mos	

Brief Description:

Figures fly around when mobile bey is wound up. As the forms move, a music box plays softly.

Suggested Uses:

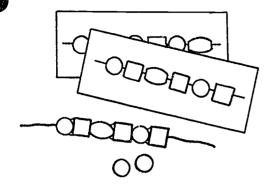

- 1. Set up mobile for infant. Turn music box on.
- 2. Observe child's response. Note length of time child maintains gaze. Watch whole body movements, such as kicking and arm waving.
- 3. Remove mobile when infant appears uninterested or irritated by it.
- 4. Repeat mobile use on a daily basis.

Manufacturer	Chicco	Skills: * Visual:	awareness, tracking

BUILDING BEAD PATTERNS

Suggested Develo	nmental Level	2-5	Suggested Inte	erest Level	2-5	
buggesteu bevero	Shingiffer Passet	2 3	buggesten inte	Lice i Mc VCI	2 3	

Brief Description:

Contains 40 1" red beads in 3 shapes which match 16 laminated pattern cards.

Suggested Uses:

- 1. Give the child a pattern and a large number of beads. Have the child string the bead onto a string to match the pattern.
- 2. Have the child count the number of beads on the string.
- 3. Have the child create his own bead patterns. Then have the child describe the pattern.
- 4. Verbally give the child directions on how to create a pattern. For example, "String one circle, two squares, etc."

	BUNNY 'N CARRO	OT MULTI-TEXTURE PUZZLE
Sugges	ted Developmental Level 2-5	Suggested Interest Level 2-5
1		Brief Description: This puzzle offers texture as well as shape and color discrimination. Durable artificial fur (backed with plastic foam) and crepe foam rubber pieces fit into a bright, heavy chipboard tray, 8-1/4" x 11-1/2". 12 pieces.
Sug	gested Uses:	
1.	As a beginning activity, take it. If this is successful, to of putting pieces back in the	out one piece and have the child replace ake out two or more pieces and play a game correct places.
2.	The younger child can assemble learning to match the outline	e the puzzle on the printed pattern sheet, d shapes.
3.	The older child can assemble sheet, learning the visual sk shapes together.	the puzzle without the aid of the pattern ill of fitting positive and negative
4.	To develop color recognition, color as the piece is put in	the child can be asked to identify each place.

BUSY BLOCKS

Suggested	Developmental	Level	1-3	Suggested	Interest	Level	1-3	

Brief Description:

Busy Blocks consist of durable washable plastic. Blocks are shaped as blocks and balls which contain pleasant sounding rattles. Each shape is contoured to assist child with stacking and constructing. Many balls have smiling faces to inspire imaginary play.

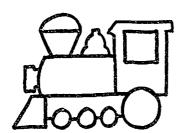

- l. Hand child a smiling ball. Place a contoured square in front of him or her. Place the smiling ball on top of the square. Give child a triangle shape to use as a hat.
- Play find-the-block. Hide one and have child describe the one that is missing.
- 3. Give child three shapes to stack. Share new shapes with child and provide child with opportunity to explore use of shapes. Minimize number of shapes as child is learning to construct. Introduce new shapes as child demonstrates comfortable and spontaneous exploration.
- 4. Give child a simple story and stimulate child to show what happens within story.

		Skills:

		Social Emotional: imaginary play

CHOO-CHOO LAURI RUBBER PICTURE PUZZLE

Suggested D	evelopmental	Level	2-5	Suggested	Interest	Level	2-5

Brief Description:

This puzzle offers texture as well as shape and color discrimination.

- 1. As a beginning activity, take out one piece and have the child replace it. If this is successful, take out two or more pieces and play a game of putting pieces back in the correct place.
- 2. The younger child can assemble the puzzle on the printed pattern sheet, learning to match the outlined shapes.
- 3. The older child can assemble the puzzle without the aid of the pattern sheet, learning the visual skill of fitting positive and negative shapes together.
- 4. To develop color recognition, the child can be asked to identify each color as the piece is put in place.

Manufacturer	Lauri, Inc.	Skills: * Visual: visual discrimination
		Fine Motor: pincer grip
Price Range	0-10	Cognitive: shape concept, color

CLOWN - LAURI RUBBER PICTURE PUZZLE

Suggested	Developmental	Level	3-5	Suggested	Interest	Level	3-5

Brief Description:

Made of crepe foam rubber. Puzzles can be assembled either side up. Pieces are single-colored parts and shapes cut on conceptual lines. 8-1/4" x 11-1/2" x 3/16" thick, one piece frames. 15 pieces.

- 1. As a beginning activity, take out one piece and have the child replace it. If this is successful, take out two or more pieces and play a game of putting pieces back in the correct places.
- 2. The younger child can assemble the puzzle on the printed pattern sheet, learning to match the outlined shapes.
- 3. The older child can assemble the puzzle without the aid of the pattern sheet, learning the visual skill of fitting positive and negative shapes together.
- 4. To develop color recognition, the child can be asked to identify each color as the piece is put in place.

Manufacturer	Lauri	* Visual: visual discrimination
		Fine Motor: pincer grip
Price Range	0-10	Cognitive: shape concept, color

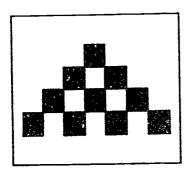

COLORED INCH CUBES AND DESIGNS

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

Designed for use with Colored Inch Cubes. Patterns increase in difficulty. Materials include 32 sturdy 6 1/4" x 5 1/2" cards printed on heavy, varnish-coated stock and instructions. 96 hardwood cubes. 16 each: red, blue, yellow, green, orange, and purple.

Suggested Uses:

- 1. Child looks at the picture, then puts the identical blocks on top of the picture.
- 2. Next, child looks at the picture and makes the identical block design next to the picture.
- 3. Use blocks for counting activities.
- 4. Show child a card, take it away, ask child to make the design from memory. Hint: designs start easy and get harder, be sure you look at the numbers on the back of the cards and put them in order before beginning to use the materials.

CRIB TOY RODS

Suggested Developmental Level 3-10mos. Suggested Interest Level 3-10mos.

Brief Description:

No Illustration Available

Wooden rods designed to be used with Laplandia Developmental Infant Toys. The three tods (each must be ordered separately) provide flexibility in use for crib or playpen and are especially of use to the handicapped child who may have exceptional needs in positioning of the body. Available: Crib Toy Rod, L-Bow Toy Rod, and Simple Toy Rod.

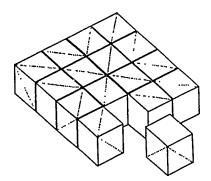

- 1. Place rod across crib, playpen (or other place where child must be positioned in exceptional manner).
- 2. Choose simple wooden shape to be secured on rod.
- 3. Shapes on rod may be changed with ease.

Manufacturer	Laplandia	Skills: * Visual: awareness, tr	acking.
Price Range	10-20, 20-30		

DESIGN CUBES SET

	Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8	
--	-----------	---------------	-------	-----	-----------	----------	-------	-----	--

Brief Description:

Set of 16 plastic cubes, each with 6 different faces, plus 20 pattern cards offer a graduated series of shape and pattern matching activities. Cubes measure 1-1/2 inches.

- 1. Show child how to place cubes on top of pattern cards. Encourage child to do this.
- 2. Have child build pattern by placing cubes next to cards.
- 3. Encourage child to create his/her own design.
- 4. As a memory task, show child a card. Take it away after approximately five seconds. Ask child to make the design with blocks. If child is unsure while working, show the design again.

	DIMENSIONAL PUZZLE
Sugge	sted Developmental Level 3-4 Suggested Interest Level 3-4
	Brief Description: 12 inner and 12 outer shapes, to be matched and then placed into the base. Self-correcting.
Su	ggested Uses:
1.	Encourage the child to use the puzzle alone before you play with the child. Observe how the child uses the puzzle.
2.	Take out the top row of large shapes (determine which is top before you begin). Ask child to replace them. Do this with second row, then the third row.
3.	Take out all the shapes. Take the small piece out of the large pieces. Ask the child to sort pieces by color. Another time you may say, "put all the shapes like this one (show the circle or a different shape) in a pile."
4.	As you point to an empty space, ask the child to find the piece that goes there. Or you may pick up a piece and ask the child to find the place
5.	where it goes. Help the child if needed. When the child is ready, name the common shapes as the child plays with the puzzle.
6.	When the child is ready, encourage the child to put the entire puzzle together.
7.	

EYE-HAND INTEGRATION EXERCISES (SET I)

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8	
-----------	---------------	-------	-----	-----------	----------	-------	-----	--

Brief Description:

No Illustration Available

The exercises in Set I begin with straight and curved lines, then increase in difficulty. The more advanced exercises in Set II teach students to identify missing parts of a whole and to improve their visual-motor coordination. Children progress from drawing straight lines to more complex designs of numerous lines in various directions.

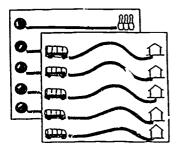

- 1. Using the pointing finger, have the child trace one or more lines.
- 2. After practice with step one, give the child a marking pen to use in tracing all the lines on a card.
- 3. Teach the child how to erase with a tissue or cloth, using one hand, then the other (good as a bilateral activity - development of both sides of the body).

Manufacturer	DLM Teaching	Skills: * Visual: visual sequencing
	Resources	Fine Motor: hand-eye coordination,
Price Range	10-20	bilateral activities
		Reading: reading readiness

EYE-HAND INTEGRATION EXERCISES (SET II)

Suggested Developmental Level 4-8	Suggested Interest Level	4-8
-----------------------------------	--------------------------	-----

Brief Description:

Pre-writing practice teaches child to identify missing parts of a whole. The set consists of: 77 exercises on laminated cards, 2 black tip marking pens, 2 wiping cloths.

Suggested Uses:

- Using the pointing finger, have the child trace first a shape on the card, Len trace the shape over the dots below.
- 2. After practice with step one, give the child a marking pen to use in tracing a shape on the card, then encourage the child to draw the shape over the dots below.
- 3. On the picture cards, have the child draw in the missing parts.

Manufacturer	DLM Teaching	Skills: * Visual: visual discrimination
	Resources	Fine Motor: hand-eye coordination
Price Range	10-20	Reading: reading readiness

FIGURE-GROUND ACTIVITY CARDS

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

Each picture has two cr three objects keyed in the upper right-hand corner that also appear in the picture below. The child must locate and circle the keyed objects. Components: 9 durable 11" x 7-1/2" cards printed on both sides. Two black felt-tip marking pens. Two wiping cloths. Instructions and classroom storage box.

Suggested Uses:

- Find and circle the hidden objects in the picture using the nonpermanent marker.
- 2. Make up a story about the people in the picture. Who is there? What are they doing? What will happen next?

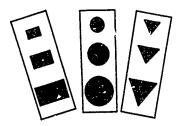

Manufacturer	DLM Teaching	* Visual: visual discrimination
	Resources	Cognitive: form
Price Range	10-20	Communication: labeling, sender
		structure

26

Suggested Developmental Level 3-5 Sugg	gested Interest Level 3-5	
--	---------------------------	--

Brief Description:

A game for learning size discrimination with shapes—circles, squares, triangles and rectangles in crepe foam. Each is in 3 sizes (and its own color).

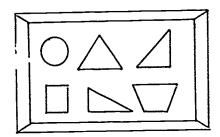

- 1. Place strips on paper and trace shapes with crayon.
- 2. Color shapes.
- 3. Count shapes.
- 4. Name the shapes.
- 5. Fit shapes into foam.
- 6. Name the shapes.
- 7. Use terms: big/bigger/biggest.

FORM PUZZLE

Suggested	Developmental	Level	3-4	Suggested	Interest I	evel 3	-4
00000000	Developmental	20101	J 7	Dugges wed .	THEGLESE F	TCACT -	

Brief Description:

Geometric shapes intended as a first step to working puzzles. Base can be used for drawing and coloring.

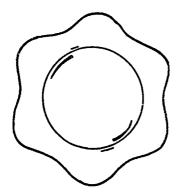

- 1. Place Form Puzzle near child with pieces in place. Observe child to determine if child is interested.
- Early steps: remove a corner piece, replace, remove...hold toward child...encourage child to take puzzle piece and put into place on board. If child shows no interest at first, continue removing, replacing pieces, encouraging child to join play.
- 3. If child has difficulty finding place for a piece, point to correct space. Help in replacement only after child has tried and you sense an unability to fit piece into its space.
- 4. Sorting pieces by shape: show child a shape...place this shape on top of a like shape. Say: "Find one like this one," as you hold up one of the shapes.
- 5. For older child developmentally, hold up a shape (example: square), say "This is a square." "Find where the square goes." Follow procedure with other shapes.
- 6. More difficult step: Say: "Find a blue rectangle." "Can you find where it goes?"

KNOBBED RAINBOW PUZZLE

Suggested	Developmental	Lavel	2-5	Suggested	Interest	Level	2-5

Brief Description:

Wooden puzzle with knobs for ease in finger gripping. 9 pieces.

Suggested Uses:

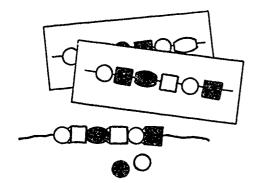

- 1. Remove one piece; have the child replace it. Play this "game" as a preliminary step to puzzle making.
- 2. Have the child take out all pieces and you, the adult, replace them. You are "modeling" what the child is to do as he or she watches.
- 3. As the child is learning to make the puzzle, you may verbalize by saying: "a little higher," or "down a little," or other simple directional words.
- 4. Talk about the colors in the completed puzzle. Name the colors of the rainbow as you touch the pieces from left-to-right. Remove pieces in order. Have the child replace from left-to-right, saying names of colors.
- 5. Be sure to praise as the child meets with success.

LARGE COLORED BEADS AND PATTERNS

Suggested I	Development	al Level	2-5	Suggested	Interest	Level		2-5	
	<u> </u>			00			_		

Brief Description:

Brightly colored beads for stringing. For older child, the vocabulary for shapes includes "cubes," "spheres," "cylinders," and "ovals."

Suggested Uses:

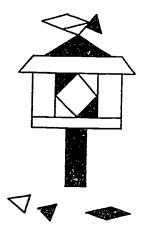

- 1. Give child the correct number, size, and color of beads shown on a card and have him or her match the pattern of beads to the card.
 - a. first, match beads directly on the cards
 - b. second, match beads next to cards
 - c. third, string beads.
- 2. Give child random choice of beads and a card and have him or her match the beads to the cards.
- 3. Count beads.
- 4. Give the child verbal directions on how to form a pattern. For example, say, "String one blue cube, two green cylinders, five yellow spheres, etc." This activity is for an older child.

LARGE PARQUETRY BLOCKS AND DESIGNS

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

Large parquetry blocks in 3 shapes: square, diamond, and triangle. Blocks come in 6 nontoxic colors: red, yellow, blue, orange, green, and purple. All blocks have rounded edges and are available in wood or plastic. Pattern sheet included. Large parquetry designs have cards that measure 8-1/2" x 11" and are printed on durable varnish-coated stock. Instruction booklet included.

Suggested Uses:

- 1. Encourage child to use parquetry blocks to duplicate designs with correct color and shape. First make on top of design and then next to it.
- 2. Encourage child to wake his/her own design with parquetry pieces.
- 3. Show child a parquetry block. Say, "Find all the pieces you can that are the same color." If the child seems interested play the game in short sessions each day for a series of days.
- 4. Play the game of "Find the shape that is the same as this one" as you point to a shape.

LAURI HOUSE PUZZLE

Suggested Developmental Level 3-5	Suggested Interest Level 3-5
-----------------------------------	------------------------------

Brief Description:

Made of crepe foam rubber. Different textures on each side (krinkle and suede) and bright, clear-through colors permit assembly with either side up and reversal of left-right orientation. Pieces are single colored parts or shapes cut on conceptual lines. All puzzles have 8-1/4" x 11-1/2" x 3/16" thick, one-piece frames. Replacement pieces available.

- Before the child uses the puzzle, talk about the house, its pieces, where the roof and door are, etc.
- 2. Verbally guide the child as he or she assembles the puzzle.
- 3. Ask child to assemble the house with the "smooth" side 'p-another time with the rough side up.
- 4. Switch the texture of some pieces and ask the child to feel the puzzle and—with eyes closed—tell which piece is different.
- 5. Discuss and name colors and shapes.

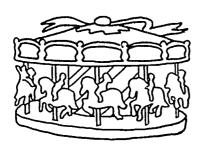

Manufacturer	Lauri, Inc.	Skills: * Visual: discrimination
		Fine Motor: hand-eye coordination
Price Range	0-10	Cognitive: shape concept, color

LEARNING TO LOOK

Suggested Developmental Level 3-8 Suggested Interest Level 3-8

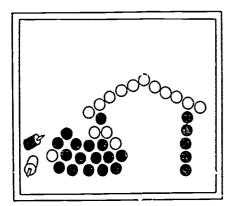

Brief Description:

Materials include 2 sets of illustrated picture cards. Children identify simple to more complex representations of objects. The difficulty level increases from shape recognition activities to the perception of shapes in everyday scenes.

- 1. Talk about the pictures. For very young child say, "Point to the house (bus, kite, etc.)."
- 2. For the child (approximately 3-5), show a shape card, say "Find one like this one in the picture." Show the child what you mean. (This can be a difficult concept for children to learn.)
- 3. The purpose of the Flip Flaps is to cover a section (perhaps allow only 1/4 of original picture to show) so that the child has a small section in which to concentrate the search.

Manufacturer	Ideal	Skills: * Visual: visual awareness, visual
		discrimination, visual memory
Price Range	0-10	Cognitive: shape concept

Brief Description:

Lite Brite is a pegboard that lights up. A light within the box shines through the designs and the colorful translucent pegs to illuminate the artwork. The set includes 369 pegs, 15 designs to copy, 9 blank sheets, and instructions.

Suggested Uses:

- 1. This game requires the child to remember the letter symbol which stands for a particular color. At first you will want to tell your child that "Y" stands for yellow. "Find all of the yellow pegs and put them in the place where you find "Y" on the Lite-Brite design sheet." Continue with each color one at a time. Check to find out if all the "Y" places have been found before going on to the next color.
- 2. After a while you may make a chart for your child on which you have printed:
 - Y (yellow color next to it)
 - G (green color next to it)

etc.

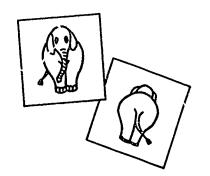

- 3. Watch the designs so that your child uses easy ones at first and progresses to more difficult ones.
- 4. Let the child choose between two pictures which you have selected, in order to present an opportunity for decision making.
- 5. When the child is ready for it, place a blank sheet into the Lite-Brite and have him or her create a picture.

MEMORY CARD MATCHING GAME; FRONTS AND BACKS

Suggested Developmental Level 4-10 Suggested Interest Level 4-10

Brief Description:

Match pairs of familiar objects to develop early language skills.

- 1. A beginning activity will involve vocabulary. "This is a ..." "What is this?" Allow the child time to respond.
- Once the child is familiar with the pictures, put two to four cards before the child; ask the child to tell you about them. You may question, "Which is the front?" or "Which is the back?"
- 3. When playing the game as "concentration," begin with four cards, build gradually to ten. As success is met, add more pictures to the game.
- 4. The game may be played by one player matching fronts to backs. Or, laying out 10 or more cards, two or more players may participate.

---	----------------	--------

Brief Description:

Six different pictures to be made by turning the wooden cubes. Picture guide included.

Suggested Uses:

- To avoid frustration on the part of the child, assist the child through early exploration in the use of the puzzles. Take out a block of a completed puzzle. Replace it. Then have the child do the same.
- 2. Take the puzzle apart, being careful to keep the correct pieces facing up. Work with the child in putting it together. Have the picture set up as a guide.
- 3. Make up a story about the puzzle for the child; encourage the child to help you make up a story.
- 4. If necessary, have the child place puzzle pieces directly on top of the picture as a pattern in putting the puzzle blocks into correct positic..
- 5. When the child is able, encourage the child to make decisions about putting a puzzle together, with minimal help from you, the adult.
- 6. When you are sure the child will not be confused by the experience, have some fun putting different pieces together with other puzzles—to make funny pictures.

VERSA-TILES: LEARNING ABOUT OUR WORLD

Suggested	${\tt Developmental}$	Level	4-10	Suggested	Interest	Level	4-10	
-----------	-----------------------	-------	------	-----------	----------	-------	------	--

Brief Description:

Game format introduces students to a wide range of facts about such topics as geography, social science, art, language, and cultures. Includes three books (96 pages) and one Versa-Tiles-12 Answer Case.

- Problems are solved by placing tiles corresponding to the question number on lettered answer spaces in the case.
- 2. Exercises are self-corrective by turning the answer case over and checking the colorful pattern formed on the back of the tiles.
- 3. The child knows that all answers are correct when the geometric pattern matches the one printed on the exercise page.
- 4. Versa-Tiles build in successful reinforcement with the exercises.

VISUAL CLOSURE CARDS

Suggested	Developmental	Level	3-6	Suggested	Interest	Level	3-6	
	•							

Brief Description:

An 18 card set of easily recognized objects. One card in the set shows a complete drawing, while its counterpart indicates a broken pattern. With the use of these cards, children develop confidence in completing visual closures and object identification.

- 1. Have the child match the complete drawing with the broken pattern.
- 2. Show the child the broken pattern card and ask the child to identify it.
- 3. As the child sees the complete drawing, ask him/her to use the finger to trace the broken pattern.

Manufacturer	Ideal	Skills: * Visual: visual discrimination

VISUAL RECALL FLASH CARDS

Suggested Developmental Level4-8	Suggested Interest Level 4-8	
----------------------------------	------------------------------	--

Brief Description:

Cards provide practice in recognition and recall. 60 flash cards, 30 pictorial and 30 shape cards, $7-1/2" \times 3-1/4"$, stress object, shape, and color sequencing. Pupils can respond verbally or use the 27 response cards which compliment the shape card units.

- 1. Have child identify pictures on the flash cards.
- 2. Give child 10 shape cards. Have child sort them by shape. Another time ask child to sort by color.
- 3. Put two picture cards out. Cover them. Ask child to tell you what was seen. When child has met with success for a day or two with this activity use three cards. Then move to flash card with four items pictured.
- 4. Should the child make errors on two or more sequences, stop the activity. The next day, move back to an easier level.

WHAT'S WRONG HERE (REVISED EDITION)

L	Danala	Y 1	1. 0	0 . 1	, ,
suggestea	Developmental	rever	4-8	Suggested Interest Level	4-8

Brief Description:

Set of 24 8-1/2" x 10" cards picturing familiar scenes with incorrect details. Use of material appears on ca.d backs. Guide included.

Suggested Uses:

- Have the child describe where the picture takes place (farm, home, outdoors). Talk about the whole scene rather than any specific detail.
- 2. Have the child talk about some of the things that are wrong in the picture and why they are wrong.
- 3. Pick out something normal in the picture and have the child tell, write, or draw something about it.
- 4. Ask a short question; the child is to answer yes or no. For example:

Do dogs bark? (yes).
Do worms sing? (no).

If the child answers "no," ask the child to explain why.

AUDITORY FAMILIAR SOUNDS

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

Includes fifty recorded familiar environmental sounds such as a man's voice, a woman voice, a dog barking, and a bell ringing. Black-and-while drawings are matched to sounds heard on an audiocassette tape. The cards are 6 1/2" x 6 3/4" and are of medium-weight stock. Instructions included.

Suggested Uses:

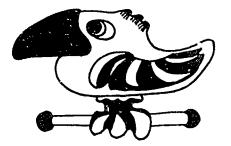

- 1. Have child identify pictures.
- 2. Have him/her listen to tape and find picture. Start with a few sounds and pictures and gradually increase number as child's ability increases.
- 3. Have child listen to a sound on tape and tell you what he/she hears without using pictures.
- 4. When child sees the picture ask him/her to make correct sound.
- 5. As he/she listens to tape, have him pantomime what he is hearing.
- 6. Have child make up a short story and use some of sounds on tape. You may start by giving him 2 or 3 sounds to build his story around. Later he may pick out sounds.

BAMBINA - CHILDREN'S RHYTHM INSTRUMENTS

Suggested Developmental Level 2-5 Suggested Interest	Level	2-5
--	-------	-----

Brief Description:

Bear/Penguin Jambourine. Brightly colored plastic tambourine consisting of five sets of stainless steel bells, inserted within rim. Frog/Monkey Handbells with six ball bells complete with sturdy handle. Frog maracaras are fanciful with moving eyes moving eyes & multicolored plastic ribbon. Castanets feature duck, clown, panda & frog characters. Elastic ties & finger indentation helps child for easy clapping.

Suggested Uses:

- 1. Hand child one instrument. Play with the same instrument as the child enjoys the instrument.
- Play instrument in a simple rhythm. Model rhythm pattern for child. Assist child to imitate rhythm.
- 3. Play a familar rhythm for child.
- 4. Rotate instruments as child beats out a rhythm.
- 5. Help child create his own rhythm.
- 6. Play a simple beat in sequence for child. Encourage child to beat out the same rhythmical pattern.

## SOUND/PICTURE MATCH-UPS

Suggested	Developmental	Level	2-6	Suggested	Interest	Level	2-6	

## Brief Description:

A game for auditory discrimination practice. Included are: six full-color illustrations of everyday environments, taped sounds associated with an object in each scene. Match up sounds and pictures by placing a 2-1/2" square picture card on a numbered square at the bottom of the board. Instructions included.

### Suggested Uses:

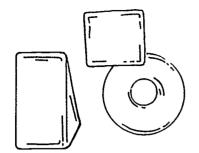

- 1. Look at pictures. Talk about what the picture shows.
- 2. Listen to tape. Assist child in matching sound heard to card showing the correct object.
- 3. Listen to tape. Have child try to imitate the sound and tell what makes that sound.
- 4. Go for a walk. Listen to sounds around. Tell what makes the sound.
- 5. Walk around the house. Turn on/off faucet, open/close door, etc.—only those objects safe for the child to use. Listen, label, imitate sound if there is interest.

Manufacturer	DLM Teaching	Skills: * Auditory: auditory discrimination
	Resources	Communication: labeling

### BABY SHAPES

Suggested Developmental Level 6-15 mos. Suggested Interest Level 6-15 mos.

Brief Description:

Five colorful shapes which may be used for squeaking, grasping, rolling, and squeezing.

# Suggested Uses:

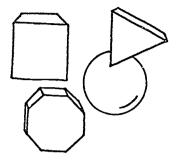

- 1. Hand the squeaker shape to child. Give time for child to feel shape.
- 2. Rotate objects one at a time.
- 3. Vary shapes and presentation.
- 4. Squeeze shape in hidden position for child to look and discover source of sound.

Manufacturer	Galt	Skills: * Tactile: feeling, stimulation
		Fine Motor: whole hand grip
Price Range	10-20	Auditory: awareness

#### BAG OF SHAPES

Suggested	Developmental	Level	1-5	Suggested	Interest	Level	1-5	

## Brief Description:

This drawstring bag is filled with 10 pairs of naturally finished hardwood shapes. Children may play a variety of sorting and matching games.

### Suggested Uses:

- 1. Sort by shape. Show child what you mean as you say, "Find one like this one."
- 2. Build towers alternating shapes; put cone at top.
- 3. Take turns reaching into bag without looking. Pick up one shape and identify it. Take it out of bag to see if you or child guessed right. Can be done as a group game.

#### BODY PARTS PUZZLE

Suggested	Developmental	Level	3-8	Suggested	Interest	Level	3-5

#### Brief Description:

11 1/2" x 17" puzzle which may be used with or without frame. A wide range of positions may be explored. Body parts are labeled under form. Additional nine poses are illustrated on cards for child to copy.

## Suggested Uses:

- 1. Remove hair from form. Point to outline of hair. Point to printed word.
- 2. Encourage child to place hair back on boy.
- 3. Point to face, requesting that child remove face. Emphasize printed word for face.
- 4. Assist child in removing each piece. Head to toes printed on form.
- 5. When child has mastered piece placement, remove outer frame. Demonstrate that body may be moved into different positions.
- 6. Present child with one illustrated card. Have child place body parts in position illustrated.
- 7. Complete the nine positions.
- 8. Encourage child to move boy into different positions and to draw the body position.

#### DRIZZLE THE DRAGON

Suggested	Developmental	Level	1-5	Suggested	Interest	Level	1-5	
00	•							

Brief Description:

Drizzle, the dragon, is made of washable material.

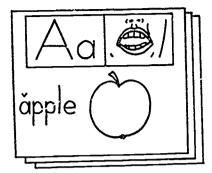

# Suggested Uses:

- 1. The child can make up stories using the purpet or have a conversation with the puppet. Encourage language and creativity.
- 2. Give the child situations or an idea and let him or her finish the story.
- 3. Ask the child questions and have him or her answer in the character.
- 4. Ask the child to put the puppet in various positions: in, out, up, down, next to, above, below.

Manufacturer	Tub_Buddies	Skills: * Communication: talking with meaning
		Social Emotional: gloup play,
Price Range	0-10	solitary play, imaginary play

Suggested Developmental Level	3-8	Suggested	Interest	Level	4-8	
-------------------------------	-----	-----------	----------	-------	-----	--

Brief Description:

The 40 card set, 8 1/2" x 11", focuses on consonant, short vowel, long vowel, digraph, and voiced and voiceless sounds. Each card features a letter symbol with a word and drawing of the word and sound, a picture of the oral cavity making the sound in isolation, and an on-off speech signal. Teacher's guide included.

#### Suggested Uses:

- 1. Using mirror and cards, show child how sounds look when they are made.
- 2. Using a consonant card, ask child to listen while you read a story slowly (choose a familiar story). Ask child to raise his/her hand each time the sound on the card is heard.
- 3. Ask child if the sound you have selected is in his/her name.
- 4. Cut out magazine pictures that contain a specific sound. Have child help you if they can.
- 5. Have child tell you more words that contain the sound selected. Remember you are working with sounds, not letter names.

# OPPOSITES (SET I)

Suggested Developmental Level 3-8 Suggested Interest Level 3-8

Brief Description:

Open and closed, wet and dry...learn what opposites are all about. Each set contains 60 cards, 4 1/2" x 2 3/4" illustrating the concept of opposites by featuring 6 examples each of 5 word opposites.

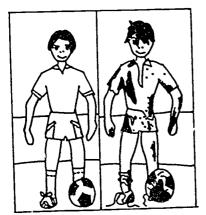

#### Suggested Uses:

- 1. Have child divide cards into pairs of opposites. Show child what this means end talk about it if they do not understand.
- 2. Divide the cards so that opposites are in two different stacks. Give to child one stack, you take the other. Lay out all the cards face up in front of you. Have child do the same in front of him or her. Now you pick up a card. Ask child to find the opposite. Take turns doing this
- 3. Play concentration. Use only a few sets of the matching opposites (perhaps six pair). Lay the cards face down. Play as you would usuall play concentration.
- 4. Increase the number of cards played for concentration until you are using all the cards.

Manufacturer	Ideal	Skills: * Communication: talking with meaning
		Cognitive: cause-effect
Price Range	0-10	Visual: visual discrimination

# Q: where is the dog?

A: The dog is in the doghouse

#### Brief Description:

A game for language development. Students learn 10 common prepositions: at, behind, between, down, in, on, through, to, under, and up with these thirty 4-3/4" x 6" cards. The front of each card pictures an activity involving a preposition. On the reverse side, students answer questions using appropriate prepositions in a complete sentence. Instructions included.

#### Suggested Uses:

- Talk about a picture. Ask child to describe what she or he sees. Repeat
  the portion of the sentence which uses the prepositional phrase in order
  to emphasize it.
- 2. Using a cup and spoon (or other objects) put the spoon "by" the cup and use a sentence including the phrase "the spoon is by the cup." Place the spoon in various places, encouraging the child to describe what you have done.
- While the child is looking at the picture, ask questions on back of card. Help with answers as needed.
- 4. Have child hide object. When adult finds it, adult describes where the object was found, such as: "You put the marble in the cup."
- 5. Hide an object. Ask child to look for it. When child finds the object, talk about where it was found, that is: "under the pillow," or "in the cup," or "behind the door."

#### PUPPET PLAYMATES - BODY PUPPETS

Su _e gested	Developmental	Level	3-8	Suggested	Interest	Level	3-8	

Brief Description:

Full-sized body puppets of four community helpers.

# Suggested Uses:

- 1. Draw a face. Put it under the opening for the face. Talk about the body puppet. What does that person do? How do such persons help us? What do they wear?
- 2. Put the puppet body on the child. Have the child look into a mirror. Suggest moving his or her hands. Talk about what is seen in the mirror.
- 3. With the puppet body on the child, ask the child to use his or her hands to show something the community helper does for us. Ask a question as if the child is a policeman or a doctor.
- 4. Two children or child and adult put on two of the puppets. Encourage talk as if these persons were those community helpers.

Conversation could be: What are you going to do today?

I am going to help boys and girls cross the street.

5. Play a riddle game. You might say: I help boys and girls. When they are sick I tell them how to get better. Who am I?

The child may guess doctor or nurse, then may put on the puppet body of whichever one was guessed.

## BABY GYM

Suggested	Developmental	Level	6-12mos	Suggested	Interest Level	6-12mos

Brief Description:

Sturdy exerciser with two handles and two sound activity forms. Plastic bar is adjustable.

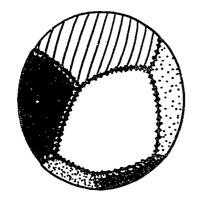

## Suggested Uses:

- 1. Place crib gym across crib or playpen when child is alert.
- 2. Touch one form on gym.
- 3. Move each part of the exerciser for child to maintain interest.
- 4. Observe child's movements.
- 5. Remove when child tires of the gym.
- 6. Do not leave child unattended when playing with gym.
- 7. Remove all loose fitting clothing prior to using crib gym.

Manufacturer	Ambi	Skills: * Gross Motor: motor planning
Price Range	20-30	

Suggested Developmental Level 1-12mos. Suggested Interest Level 1-12mos.

## Brief Description:

Soft foam, covered in bright "dayglo" colors, and an audible bell at its core makes this 6 in. (15 cm) ball ideal for the visually handicapped.

## Suggested Uses:

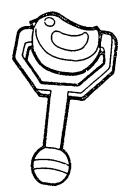

- Encourage child to explore use of ball: to feel, hear, gently toss catch. (You may wish to cup your hands under child's, tossing ball a few inches, catch with child.)
- 2. Tell child you are going to roll ball to him or her. When seated short distance apart ask if child is ready, then roll ball to child's hands. Continuing to talk, ask child to roll ball to you (your voice is the focus).
- 3. As you sense child is gaining confidence, tell child to listen for ball because, "The ball will not be traveling directly to your hands." Roll close but not directly to child's hands.
- 4. Using steps 2 and 3, ask child to stand. Stand short distance from them. Throw ball to the child.

#### LAURI TEACHING TILES

Suggested	Developmental	Level	2-8	Suggested	Interest	Level	2-8

## Brief Description:

Floor game. Eighteen pieces: six each circles, squares and triangles all perimeter punched with 3/8" diameter holes for pegging or lacing. Complete range of primary and secondary colors in each shape. Circles are 8-1/2" diameter. Made of washable, durable, quiet and safe 3/16" thick crepe foam rubber. Includes suggested activites.

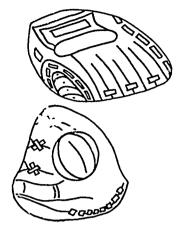

#### Suggested Uses:

- 1. Talk about the shapes, colors, and sizes of the vinyl floor shapes. Until these make sense to the child, he will have difficulty playing this game.
- 2. One of the primary objectives of this game is to give instructions and have the child follow them. At first only easy instructions are given and only one at a time. "Put your foot on a square." Increase the difficulty as your child is ready for it and asks for more difficult instructions.
  - 3. Variations: ask the child to "stand on a <u>yellow</u> mat" or "put all the <u>circles</u> over there," or show the child the picture of a simple triangle and ask him or her "to find all the shapes that are like that one."
  - 4. Small muscles are used as the child laces the edges of the shapes.

Manufacturer	Lauri, Inc.	Skills: * Gross Motor: motor planning_
		Cognitive: shape concept, color
Price Range	30-40	Fine Motor: hand-eye coordination

Suggested Developmental Level 2 1/2-5 Suggested Interest Level 2 1/2-5

Brief Description:

Can be used for persons with a minimal amount of coordination. Roll and catch or throw and catch. The No Miss Mitt is made of special velvet so that the lightweight, Velcro striped, 3" diameter ball needs only to touch the mitt at any point to be caught. Mitt has a soit lining and can be worn on either hand. Comes in a set of 2 mitts and a ball. Green color.

#### Suggested Uses:

- 1. Encourage child to explore mitt and ball.
- 2. Sit on floor across from child. Ask child to put mitt on either hand, positioning mitted hand on floor. Roll ball to mitt so that it hits mitt and sticks to it.
- 3. After successful experiences with step 2, put a mitt on your hand. Ask child to roll ball to you. Move mitted hand to show how this can be done. Now have child take mitt. Roll ball to child's mitted hand, but roll so child must move hand somet! .es to "catch" ball.
  - 4. Follow steps 2 and 3 with standing/catching activities.

#### PUSH ALONG CLOWN

# Suggested Developmental Level 9mos-2yrs Suggested Interest Level 9mos-2yrs

Brief Description:

No Illustration Available

Plastic clown is secured by a pole and lightweight handle. As child pushes clown, large feet move on a tread. Accompanied by pleasant clicking sound.

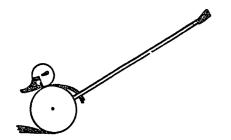

## Suggested Uses:

- 1. Insure child can walk with a steady, balanced gait.
- 2. Attach pole to clown.
- 3. Model the movement of clown as it is pushed across a smooth surface.
- 4. Hand toy to child, guiding the pushing movement.
- 5. As child pushes comfortably, give him/her time for independent movement.
- 6. Supervise use of the toy to insure that handle is not detached.

Manufacturer	Kiddicraft	Skills: * Gross Motor: locomotion, motor

## RATTLE KEYS

Suggested	Developmental	Level	3-6mos.	Suggested	Interest	Level	3-6 mos.

Brief Description:

Four colorful keys with different indentations are connected by a sturdy plastic ring.

# Suggested Uses:

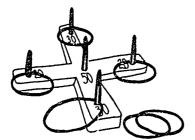

- 1. Hand child toy when not distracted by other toys or objects
- 2. Allow child to explore each key.
- 3. Child may use toy for grasping or teething.

Manufacturer	Ambi	Skills: * Gross Motor: motor planning
		Tactile: stimulation
Price Range	0-10	

#### RING TOSS

	Suggested Development	tal Level	4-7	Suggested	Interest	Level	4-7
--	-----------------------	-----------	-----	-----------	----------	-------	-----

## Brief Description:

Ring toss is a crisscrossed wooden form with five stakes. Each stake is accompanied by a painted number to assist in scoring. Five coded rings may be used for tossing activity.

## Suggested Uses:

- 1. Place ring toss within arm reach of child.
- 2. Give child color rings and encourage child to threw spinning right to left.
- 3. Encourage child to continue to look at ring toss while throwing.
- 4. Play with child and begin to add each score...keeping scores on one digit basis. Use paper and pencil if necessary.
- 5. Encourage child to remember score. Start recording scores from memory.

Manufacturer	Saxonia	* Gross Motor: balance, motor
		planning

#### THE TWO FRIENDS

Suggested	Developmental	Level	2-6	Suggested	Interest	Level	2-6	

## Brief Description:

The boy and girl are represented as 3 ft. photographs. Divisions conform to body parts (20 pieces each).

## Suggested Uses:

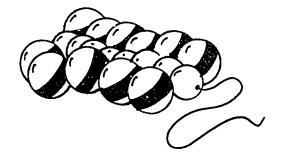

- With puzzle complete, talk about body parts, pointing to face of puzzle, ask child to point to his/her face, (neck, knee, elbow, foot, etc.).
- 2. Take one part away, ask child to replace. Help if needed.
- 3. Remove both arms, ask child to replace. Talk about how they best fit.
- 4. Mix entire puzzle, ask child to put together.
- 5. Using very large paper, have child lie on it, face up. Draw around child, color, cut out and make into a puzzle.

Manufacturer	Childcraft	Skills: * Gross Motor: body awareness
		Visual: visual discrimination
Price Range	10-20	Fine Motor: hand-eye coordination

#### TROLLER

Suggested	Developmental	Level	6-18mos	Suggested	Interest	Level	6-18mos

Brief Description:

Multi-sized balls are attached to a pull string. As the toy is pulled balls rotate in a colorful array.

# Suggested Uses:

- 1. Sit with child on the floor in a side-by-side position.
- 2. Pull toy toward child.
- 3. Place the pull toy within child's reach and extend the string for him to pull.
- 4. Watch child's activity.
- 5. Change to standing position. Demonstrate, pulling toy around the room.

#### ACTION ACTIVITY CENTER POP-UPS

Suggested	Developmental	Level	6-18mus.	Suggested	Interest	Level	6-18mos.

Brief Description:

No Illustration Available

Activity center with three fine motor devices. Achild is required to turn, pull or press levers to activate sound. Each successful approximation provides sound and a movement of colorful balls.

## Suggested Uses:

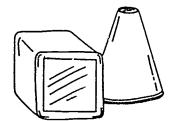

- Give child time to feel levers.
- Start with yellow squared press lever. Place child's hand on lever and gently press down. Hold child's hand down until sound is made. Clap with child.
- 3. Model pull lever procedure for child. Take child's hand. Place it in a secure "pull down" lever position. Give child the feeling of pulling lever.
- 4. Place child's hand over turn/twist lever. Turn lever left to right with child.
- 5. Provide child with time to explore each lever.
- 6. Practice with child...turning, pulling, or pressing lever.
- 7. Use words "turn," "pull," "press," as cues to activity.

Manufacturer	Battat	Skills: * Fine Motor: whole hand grip,

20-30

Price Range

Suggested Developmental Level 3-8 Suggested Interest Level 3-8

Brief Description:

Twelve 8-1/2" x 8-1/2" stencils include a chick, turkey, dog, lamb, rooster, bird, fish, cat, pig, hen, and sitting and lying rabbits. Instructions included.

## Suggested Uses:

- l. Have child trace a stencil. The child may then color or paint it and cut it out.
- 2. Stencils may help the child become familiar with the name of the animal and also may be used to develop associations. For example:
  - A. This is a pig. A pig says "Oink."
  - B. This is a rooster. It lives on a farm.
  - C. This is a dog. A dog can live in the city, in the country, or in my house.
- D. These birds (rooster, chick, turkey, hen) live on a farm. People feed them.

This bird (bird in flight) lives in a nest in a tree and looks for its own food.

E. Dogs, cats, and rabbits are good pets. Pigs, lambs, and roosters are not pets.

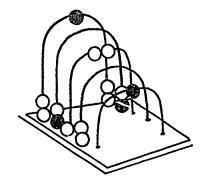

01 /11

- F. This animal has 2 legs. This one has 4 legs.
- 3. Have the child point out different parts of the animal's body: the tail, the eyes, the whisker, etc.
- 4. Use stencil to make rubbings by laying paper over stencil, then rubbing with side of crayon.

Price Range	20-30	Social Emotional: imaginary play		
		Cognitive: form, color		

#### EYE-HAND INTEGRATION EXERCISES (SET II)

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	48

#### Brief Description:

Young learners gain practice in prewriting by tracing and copying these excercises on laminated cards. Use of special marking pens and wiping cloths allow the cards to be used again and again.

The more advanced excercises in set II teach students to identify missing parts of a whole and to improve their visual—motor coordination. Children progress from drawing straight lines to more complex designs of numerous lines in various directions.

## Suggested Uses:

- 1. Using the pointing finger, have the child trace first a shape on the card, then trace the shape over the dots below.
- 2. After practice with step one, give the child a marking pen to use in tracing a shape on the card, then drawing the shape over the dots below.
- 3. On the picture cards, have the child draw in the missing parts.

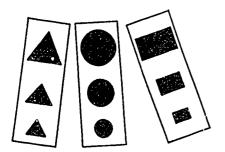

Manufacturer	DLM Teaching	* Fine Motor: hand-eye coordination
	Resources	Visual: visual discrimination
Price Range	10-20	Reading: reading readiness

Skills:

#### FIT-A-SIZE--RUBBER SHAPES

Suggested	Developmental	Level	3-5	Suggested	Interest	Level	3-5	

Brief Description:

Manipulative introduction to the concept of relative size, using the four most common shapes. Small-medium-large progression provides maximum conceptual clarity. Set of eight 3" x 8" x 3/16" panels receive twenty-foour fit-in shapes. Eight contrasting colors.

### Suggested Uses:

- With pieces and boards put together, discuss size of shapes by using terms, "small, smaller, smallest" and "large, larger, largest."
- 2. Add color to questions: "Find the smallest yellow shape."
- 3. Add shape to questions: "Find the red square," or even more complex, "Find the biggest blue circle."
  - 4. Use as puzzles, with pieces mixed from two dissimilar shapes such as circle and triangle, have child replace pieces. With pieces mixed from similar shapes, such as square and rectangle, have child replace pieces into form board.

Manufacturer	Lauri	Skills: Visual: visual discrimination
		* Fine Motor: pincer grip, hand-eye
Price Range	0-10	coordination; Cognitive: color,
		shape concept, classification

FOAM BATHTUB BLOCKS
Suggested Developmental Level 1-4 Suggested Interest Level 1-4
Brief Description:
Nineteen pastel colored shapes made of foam. The surface of the blocks facilitates shapes to stick together without water. A net is included for air drying.
Suggested Uses:
<ol> <li>Encourage child to spontaneously play with blocks in or outside tub. May be used safely in tub or out.</li> </ol>
2. Communicating with the child during parallel play include vocabulary words such as, "I will put the yellow triangle on the green block" or "I will put the white on a blue." Allow conversation to be a listening experience for the very young child or one of the child repeating some words heard.
3. As imaginary play, the adult could say, "Let's build a little house." or " a big building." "What would a little boat look like floating on the water." "Let's float a little boat with a tall stack." "Pile up a tall skyscraper."

### LOCO AIR PRESSURED ACTIVITY CENTER

Suggested Developmental Level 3-18 mos. Suggested Interest Level 3-18 mos.

Brief Description:

A sturdy self-contained activity box--two colorful rubber pressure suction levers activate clear plastic dome and block containing colorful beads. A lever may be used to move shapes.

### Suggested Uses:

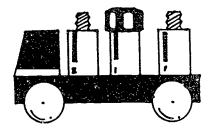

- 1. Encourage child to explore the material. If necessary guide the child's hand to the yellow suction pocket and say "press," or show the child as you press, and say, "press" or "push." Continue in this way with other parts of the toy (moving from left to right), saying "pull" at the lever.
- 2. Allow the child practice time. As the child is exploring, talk to the child about the sound the toy makes. You might say, "listen," as the sound is made.
- 3. When child becomes aware of the beads popping and moving, talk to the child about this. You might point to the place where the movement is occurring as the child presses the air suction pocket or lever.
- 4. Model words...push, press, pull... etc. to describe what is occurring even if the child does not understand your words. Your conversation with the child is an important step in language development, even when the child cannot understand all of the words.

#### NUTS AND BOLTS TRUCK

_								
Suggested	Developmental	Level	3-4	Suggested	Interest	Level	3-4	
	Developmental	20101	J 7	Ougge Colecte	THECTESE	DCACI	J 7	

### Brief Description:

Colorful wooden truck with six nuts attached to three bolts. Crafted to stimulate fantasy play and fine motor skills.

# Suggested Uses:

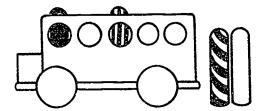

- 1. Remove all nuts from truck.
- 2. Assist child in turning end nut. Model the forward clockward turn for child. As child has placed nut in screwing thread turn, help child screw nut in place.
- 3. Hand child an additional nut for him to turn on top of secured nut.
- 4. Hand child nut and watch where he screws it to truck.
- 5. Give child opportunity to screw.
- 6. Count as child screws each nut in place.
- 7. Complete truck, giving child time to use it in fantasy play.
- 8. Encourage child to unscrew each bolt. Demonstrate counterclock movement.
- 9. Repeat procedure with child's level of development.

#### OLD FASHIONED BUS

uggested Developmental Level 2-	-4 Suggested Interest Level 2-4
---------------------------------	---------------------------------

Brief Description:

Wooden bus with eight hole pegs. Pegs help child to use fingers.

### Suggested Uses:

- 1. Give child bus to roll back and forth.
- Remove one peg at a time. Place pegs back into bus, according to each color cluster.
- 3. Hand child one peg at a time to place in the bus.
- 4. Ask child to hand you yellow men, red men, blue men, and green men.
- 5. Count each man as child places them in the bus.

Manufacturer	Skills: Saxonia * Fine Motor: hand-eye coordin				
-		Social Emotional: imaginary play			
Price Range	0-10	Cognitive: color			

#### PEEK-A-BOO DOORS

Suggested	Developmental	Level	6-18 mos.	Suggested	Interest	Level	6-18 mos.

Brief Description:

No Illustration Available

Activity box featuring four doors which open to bright animal forms or mirror. Each form may be pulled or pushed activating bell or horn sounds. A fourth door contains an unbreakable mirror.

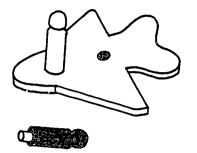

#### Suggested Uses:

- Open green door with bright red bear. Place child's hand on bear. Pull bear lever. Give child practice in pulling lever. Child will enjoy sounds produced.
- Encourage child to pull up blue door. Place child's hand on yellow car.
   Push gently...experience the sound.
- Turn toy around presenting two new doors...wait to see how child works the doors.
- 4. If child fails to open door, slide open green door. Move yellow bird up and down. Give child practice time.
- 5. Slide red door...watch to see if child looks at himself in mirror.
- 6. Press each man on top of magic doors. Watch to see if child pops each man.

Manufacturer	Battat	Skills: * Fine Motor: whole hand grip,				
		pincer grip, hand-eye coordination				
Price Range	10-20					

Suggested Developmental Level 2-4 Sugge ted Interest Level 2-4

Brief Description:

Four transportation shapes made of thick form have large holes. Hardwood pegs may be place in transportation shape.

### Suggested Uses:

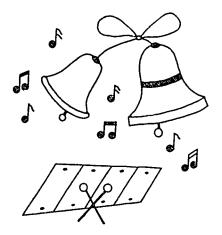

- 1. Hand child boat shape....giving child time to examine holes.
- 2. Provide child with one peg. Point to hole. When child places peg in hole, hand him the next peg.
- 3. Count as child places a peg into the form.
- 4. Encourage child to count with you.
- 5. Complete one transportation form. Ask the child to tell you how many pegs are in the shape.

Manufacturer	Lauri	Skills: * Fine Motor: hand-eye coordination

#### RINGLE BELL

Suggested	Developmental	Level	1-5	Suggested	Interest	Level	1-5	
	o o i o i o pino ii o a i	~~.~		0 -00 - 0	1	~~.~		

Brief Description:

Plastic rings of various colors stack into a pyramid. A bell is in the base of the form.

### Suggested Uses:

- Have the child take apart the bell if she or he can. You may start, making sure child is watching.
- 2. Show child how to stack circles from smallest to largest. Then you may put one circle, child next one—take turns until child can put entire pyramid together. This takes a lot of coordination.
- 3. You will want to replace stacking process many times with child. As you do so use words to describe, like small, smaller,..., bottom,..., top, colors of rings, big, bigger (as you take pyramid of shapes apart).

#### SNIP-LOOP SCISSORS

uggested Developmental Level4-8	Suggested Interest Level 4-8	
---------------------------------	------------------------------	--

Brief Description:

Designed for students having difficulty with cutting. These continuous-loop plastic handles are spring-loaded for fast opening action and ease in cutting. Fine steel blades have blunt ends for safety.

### Suggested Uses:

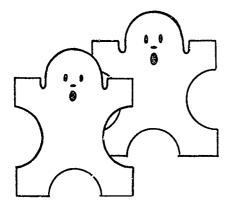

- 1. As a first step place your hand over child's hands to assist in cutting action.
- 2. Child may grasp upper handle and rest the lower handle on table. Help child push down on upper handle which puts pressure against the table. This action should allow child to cut paper independently.
- 3. Another method may be to have child grasp scissors with both hands while cutting.

Manufacturer	Ideal	Skills: * Fine Motor: whole hand grip, hand-eye
		coordination, bilateral activities,
Price Range	0-10	dexterity

#### **STACROBATS**

Suggested	Developmental	Level	3-8	Suggested Interest Level 3-8	

Brief Description:

32 clowns included, 2 1/4" tall and 5/16" thick, quiet, safe, and sturdy. Made of crepe foam rubber in assorted bright colors.

### Suggested Uses:

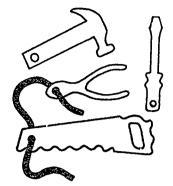

- 1. Encourage child to put clowns together as he/she wishes.
- 2. Show child how to fit pieces together and balance them.
- 3. Talk to child about the different colors. If child is in early learning stages, point to a clown, say name of color, then have child say name of color.
- 4. Ask child to sort clowns by color.

Manufacturer	Lauri	Skills: * Fine Motor: pincer grip, dexterity
		Cognitive: color, classification
Price Range	0-10	

#### TOOL SLINGER

Suggested Developmental Level	2-5	Suggested	Interest	Level	2-5	
-------------------------------	-----	-----------	----------	-------	-----	--

Brief Description:

Eight quiet rubber tools are placed on a flexible plastic tube sling. A permanently arranged wooden peg facilitates clasping.

### Suggested Uses:

- 1. Extend plastic tube in position which will help child to thread.
- 2. Hand child the hammer with hole facing child.
- 3. Point to tube and model threading of hammer on tube.
- 4. Give child one tool at a time while threading.
- 5. When all tools are threaded....clasp the tube.
- 6. Encourage child to open tube.
- Provide child with practice time.

### ANATOMICAL PUZZLE SET: WHAT ARE LITTLE BOYS MADE OF?

Suggested Developmental Level 4-12 Suggested Interest Level 4-12

### Brief Description:

Six "layers" of puzzle pieces. Each layer is made up of eight pieces and presents a simplified version of the skeletal system, respiratory system, and circulatory system, internal organs, muscles, external features of the unclothed body, and the clothed body. The plastic pieces are color-coded and are set in a board with finger grooves for easy removal of pieces.

### Suggested Uses:

- 1. Encourage the child to use puzzles and to ask questions about them. Ask the child questions such as, "What do you think is going on inside your body right now?" Show the circulatory system and ask, "Can you find the heart?"
- Place the puzzles one on top of the other with the skeletal system at the bottom and the clothed child on the top. Talk to the child about the many things that go on inside of us to make our bodies work well. Ask the child to help you remove the top puzzle and talk about the importance of keeping your body clean by bathing and washing with soap and water. Taking that puzzle off, talk about systems of the body and how they work for us.
- 3. You may wish to point to your body or that of the child to show where the body organs are located within the body.
- 4. Talk about specific body parts if the child seems interested. Find books at the library that will be at the child's interest level.

Manufacturer	Didax	* Cognitive: classification, cause-
		effect

#### ATTRIBUTE BLOCKS

Suggested	Developmental	Leve 1	3-12	Suggested	Interest	Laval	3-12
Duggesteu	релеторшенсят	PEAGI	3-12	ouggesteu	Interest	rever	3-12

Brief Description:

Desk set - The large pieces average approximately 2 1/2" by 2 1/2" and the small pieces average 1 1/2" x 1 1/2". Made of polypropylene. Set contains: 5 different shapes, 3 colors, 2 sizes 2 thicknesses, 60 pieces, one sorting tray.

### Suggested Uses:

- 1. Have child explore uses of the materials.
- 2. Have child sort according to shape or color or thickness.
- 3. For very young child you do not have to use names of the shapes. Example: show a triangle and say, "Find one like this one." Accept one the same size or a different size. The color may be different also.
- 4. For the school age child, you may ask the child to find things like the following:
  - all yellow thick pieces, all thin circles, or all the red thick pieces.
- 5. More complex activities for the child who can sit longer and enjoys figuring things out:

Arrange rings of string. These may be different colors of string. Ask child to place in one ring: all yellow and red large circles. When child has finished doing this, the next instuctions may be: find all the yellow and red small pieces with corners. Help as needed. When these instructions have been completed, ask child to find all blue pieces with corners.

6. Instruction book provides many kinds of activities.

#### COLOR LOTTO

Suggested	Developmental	Level	2-6	Suggested	Interest	Level	2-6
UUGG CU CU U	Developmental	DCVCI	***	04664044	THECTESE	22101	

### Brief Description:

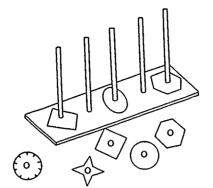

28 cm square wood inlay tray with 3 sets of 9 colored squares for developing color recognition. Guide included.

#### Suggested Uses:

- 1. At earliest level teach colors. "This is yellow. Find one like it." After child finds and compares, say, "Is it the same?"
- 2. Have child match squares off board, all of single color in a pile.
- 3. Encourage child to make designs, using own creativity.
- 4. Play "Follow Directions." Tell child to find a green one and put it here. Do this with the nine positions. Correct child if mistake is made.
- 5. Make pattern for child of one set of squares. Tell child to put squares on top matching what you nave done, or to the side of your design.

Manufacturer	Judy Instructo	Skills: * Cognitive: color
		Visual: visual discrimination
Price Range	0-10	Fine Motor: pincer grip, hand-eye
		coordination, dexterity

Brief Description:

Match colors and shapes. A variety of plastic color and shape pieces are included as .11 as spindles on which to place the pieces. The materials are housed in a plastic box with lid.

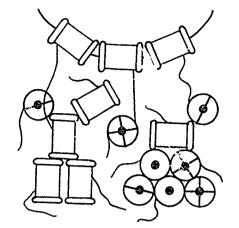

## Suggested Uses:

- 1. Select two shapes and place them before the child. Ask the child to find more like these shapes and place each in the right pile. Do this with hree (four, etc.) shapes as the child is ready for this.
- Place a different shape in front of the pegs on one of the stands. Ask the child to find more like those shapes and put them on the peg by the sample shape. Ask the child to count the shapes on the peg. Count with the child if necessary.
- 3. Place a different colored shape in front of each peg of the stands and ask the child to find more of that color, placing them on the corresponding peg. If the child is confused by the shape and color differences, show the child how to continue with a color even when the shape changes.
- 4. Give verbal instruction to the child by saying, for example: "Find a red square, now find a yellow circle, now find a blue star, etc." This can be very difficult for a child to do. Help if the child wants help. Try to avoid frustration for the child because the toy will no longer be pleasurable when that occurs.
- 5. Have the child tell you what to do. Follow the directions of the child as she or he directs you in finding a particular shape or color. You may encourage the child to say, "Find one like this one" if the child does not know the color or shape names.

Suggested Developmental Level 2-5 Suggested Interest Level 2-5

Brief Description:

Set of 25 leels includes a long lace. The reels are used for threading, sorting, or stacking.

#### Suggested Uses:

- 1. Place cotton reels on floor near child. Allow child to explore their use without direction.
- 2. For early learning, encourage stacking. Place reel on top of a reel child has just put down. Observe if child follows your example. If not, add another to stack...observe what child does...continue process.
- 3. For color sorting activity, hold a reel in one hand...say "Find one like this one"...help child if necestary...then, "Find another." Follow this pattern for sorting out one color of reels.
- 4. Threading reels: For early learning (3 or 4 years developmentally) hold threading portion for child, start to put a reel on lace, remove, ask child to put it on lace. Continue to hold lace for child as child puts reel on.
- 5. Varieties of threading sequences may be encouraged:
  - a. in random order
  - b. by single color
  - c. or, following a pattern, i.e., red, yellow, red, yellow, etc.

#### GAZO^30 SHAPE AND SORT KEY HOUSE

Suggested Developmental Level <u>18 mos.-5</u> Suggested Interest Level <u>18 mos.-5</u>

#### Brief Description:

Portable plastic house is divided into six compartments with six animals and six geometric forms of different colors with corresponding keys. Gazoobo provides practice in sorting with a wide range of fine motor experiences.

## Suggested Uses:

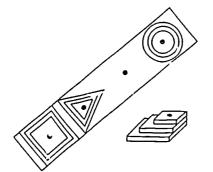

- 1. Rotate Gazoobo to insure child has seen each shape/color compartment.
- 2. Hand child circle form and point to hole model placement of circle in hole if child has problems. As child locates appropriate holes, hand him two shapes to discriminate. Rotate Gazoobo as child sorts shapes handed to him.
- 3. Hand child two animal shapes while pointing to elephant hole. As child successfully sorts, provide him with additional shapes.
- 4. Give child practice cime. Note when he is not simply guessing the shape. Proceed to the next step when child is comfortably sorting simple shapes and animal shapes.
- 5. Introduce key ring when child has mastered sorting task. Point to one color key, encou ge child to select color coded compartment. Give child time to insert appropriate key. Watch child as he inserts each key according to color match.

#### GEOMETRIC SHAPE STACKER

					_			
Suggested	Developmental	Level	2-5	Suggested	Interest	Level	2-5	

#### Brief Description:

Four shapes are arranged stacked according to size. Each shape is presented to allow a child to discriminate between three distinct sizes. Geometric shape stacker is 17" with brightly colored wooden forms.

#### Suggested Uses:

- 1. Give child one circle. Encourage child to match all circles in one stack. Select each shape and instruct child to identify each shape. Demonstrate stacking each shape for the child.
- 2. Place one of each shape on the board. Give child the opportunity to complete each shape on the board.
- 3. Have child point to the smallest shape, medium size shape, and largest shape.
- 4. Use the words "Show me the smallest circle, triangle, square, rectangle, medium size or the largest shape."

#### GUMMED STAMPS; PICTURE/WORD PHONICS

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8

## Brief Description:

These stamps are particularly useful in developing phonics skills and vocabulary development. The set includes short vowel words and illustrates blends and digraphs. There are 180 stamps in the set with two each of the five sheets of stamps, and each stamp is 3 1/4" x 2 3/4".

#### Suggested Uses:

- 1. Cards may be sorted by the child in the following ways: animals, things to eat, furniture, words starting with "c," etc.
- 2. A more complex sorting can occur with words with a specific vowel sound such as short "e."
- 3. Ask the child to make a sentence using a specific word.
- 4. Place words together that could make a sentence. Say a sentence aloud, adding needed words.
- 5. Take a stack of 5-8 words. Line up from longest to shortest word.

Note: It is recommended that stamps be glued to tag board slightly larger than sump, then laminated for long term use. Place in hox for storage.

#### HARDWOOD SHAPE AND COLOR DOMINOES

Suggested Developmental	Level	4-8	Suggested Interest Level 4-8	
-------------------------	-------	-----	------------------------------	--

	$\bigcirc$		_
	$\bigcirc$		
		>	
$\langle$		9	

Brief Description.

Dominoes are made of hardwood.

## Suggested Uses:

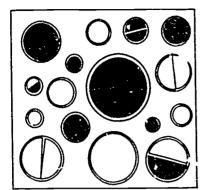

- 1. As an early learing experience with all dominoes turned up, encourage child to match dominoes by shape. You may wish to take turns, placing one domino to match: child, you, child, etc.
- 2. Next step, match dominoes by color, again taking turns.
- 3. As a step to learning the game, with dominoes turned face down, take one domino placing it for starter. Decide if the game will be shape matching. Then play game so that adult and child play as one person. Deal out six dominoes, face up. Take a turn. Play game as you would dominoes, but with one player, one winner -- both of you win.
- 4. As another step to playing the game, this time with dominoes of players face up, pllay as two players, but give child help as needed.
- 5. Play game following rules of dominoes, dominoes dealt visible only to players, deciding if you are playing colors or shapes dominoes.
- 6. As a more difficult game, play matching dominoes by both color and shape. This requires matching of shape and color in same figure.

Skills:

Suggested Developmental Level 1-5 Suggested Interest Level 1-5

Brief Description:

Colorful pieces fit together to form rectangles, squares, triangles, and a trapezoid. Young children manipulate the easy-to-hold pieces and explore basic shape relationships. 20 x 20 cm board holds 20 pieces.

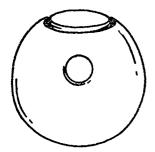

#### Suggested Uses:

- Encourage child to spontaneously use the Infant Fitting Board.
   As pieces are removed observe how child replaces them.
- 2. Remove one piece.... replace.... remove same piece.... give to child to replace.
- 3. Remove two pieces.... replace.... remove same pieces.... give to child to replace. If child has difficulty, repeat procedure.
- 4. Remove all pieces. Follow child's lead. If child plays with pieces separate from board, encourage this play. If child wants to replace pieces on board, talk to child, giving cues: "Find one like this one, put it here"or "Put the red one here."
- 5. Depending on child's age, teach child how to replace all pieces of puzzle. Steps to teaching child: You model, replacing all pieces. Let child help if child wants to. If interest remains high, repeat process, encouraging child to help. Gradually follow child's lead in replacing pieces, helping only as needed.
- 6. As child and you work/play together, praise for each success: "Nice job." "Good work." "Very good." Smile as you say the words. You may wish to hum a tune as you work if this is not distracting to the child.

-----------------------------------------------------	----------	-----

## Brief Description:

The rubber stamps are l" square and come in a variety of shapes: triangle, circle, hexagon, asterisk, diamond, rectangle, X, -, star, pentagon, +, and square. The stamps are mounted on clear plastic bases, which allow students to see the designs from above. Instructions are included.

#### Suggested Uses:

- 1. Show card with a specific shape stamped on it. When child finds the stamp that matches, it may be stamped on the paper.
- 2. Show child a stamped pattern such as circle, square, circle, square. Have child continue the pattern. Help as needed. Say "stop" after serveral sequences.
- 3. Make flash cards. Have child color in the shapes (or you may do this). Have child sort shapes into groups that are the same. Ask child to sort by color a different time.
- 4. Ask child to find all shapes with straight lines and all shapes with curved lines (there is only one).

#### TRANSPORT PUZZLE

Suggested Developmental Level 1-6 S	Suggested	Interest	Level	1-6
-------------------------------------	-----------	----------	-------	-----

Brief Description:

Cars, planes, busses, and trucks inserted into spaces on heavy puzzle board.

#### Suggested Uses:

- 1. Talk about the transport items as you point to them.
- 2. Ask the child to take out the items as you name them one by one.
- 3. Have the child sort the items according to system of travel; i.e. water, land, air.
- 4. As you point to the space on the board, tell the child to find the item and put it there. Example: point to left top corner. Say: "Find the bus; put it here."
- 5. Take out all items. Mix them up being careful not to turn them over. Ask the child to put them back. Help as needed.

#### WOBBLY COLORS

Suggested Developmental Level 6-18 mos. Suggested Interest Level 6-18 mos.

### Brief Description:

Circular form board made of durable plastic featuring four primary colors. Each square holds a weighted ball that wobbles when rolls.

## Suggester Uses:

- 1. Hand child wow'le ball, giving him/her time to feel the surface of the ball.
- 2. Take child's hand and have him/her feel the contours of the square and circle indentation.
- 3. Give child one wobble ball and point to the hole.
- 4. After child has successfully placed wobble ball in form, hand him/her a new color.
- 5. As the red wobble ball is given to child say "red ball" "put red ball in hole." 1Prior to each form placement try to get child to tell you the color or point to the color form.
- 6. Initially hand one wobble ball at a time. Encourage child to place each ball in the corresponding form
- 7. As child is able to associate (or pair) each ball with form, present him with all four wobble balls.

### LACE OVER SHOE

Suggested	Developmental	Level	3-6	Suggested	Interest	Level	3-6
Juggesteu	Developmental	TIC A CT	J 0	Juggesteu	THECTESE	nc vc i	J 0

Brief Description:

Teaching toy fits over child's own shoc. Safe, hygienic overshoe has elastic bottom and back. 8" long.

### Suggested Uses:

- 1. First show the child how to slip the canvas on over his or her own shoe.
- 2. Have the child learn to unfasten the bow and unlace the shoe.
- 3. Repeat it until the child has accomplished the task.
- 4. Show the child how to lace the shoe.
- 5. Let the child lace the shoe. Color code if necessary, coloring half the lace with one color, the other half with a different color. This makes tying easier.
- 6. Teach the child to tie and make loops.
- 7. Now let child practice with his/her own shoes.

Suggested	Developmental	Level
-----------	---------------	-------

Suggested Interest Level 3-8

### Brief Description:

A set of 12 illustrated cards and 40 plastic cubes, designed to introduce a young child to the subject of measure, and the concepts of height, width and length.

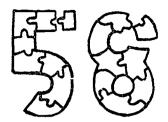

## Suggested Uses:

- 1. Allow the child to explore measuring with the cubes, measuring a favorite toy (small), shoe, a small box. Allow this to be non-directed play (just watch as your child explores).
- 2. With the child measure some familiar objects around the house, encouraging the measurement of relatively small objects, perhaps no larger than a shoe box. Ask questions as the child measures: "Is there another way you can measure the box (or the book, or the calendar)?" Encourage measurement on all planes, that is on the floor, on a wall, etc.
- 3. Using the pictures for "How to Measure," lay the picture on the froor or on a table, and read the question on the card to the child. Encourage the child to measure with the cubes. (It is easier to count the cubes when the colored cubes are used alternately). When the child has finished laying out the measurement, ask the child to count the cubes. Count with the child if necessary.
- 4. After using the "How to Measure" game with the child, use the words "high, wide," and "tall" with the child in your daily conversation. These are math terms and very important ones.

Manufacturer	James Galt, Toys and	Skills: * Mathematics: math readiness			
	Company, Inc.	Cognitive: size, shape concept			
Price Range	10-20	Fine Motor: hand-eye coordination			

Suggested	Developmental	Level	4-8	Suggested	Interest	Leve!	4-8	

Brief Description:

Each 5" tall numeral with its own number value of pieces is in one color to help child assemble it.

### Suggested Uses:

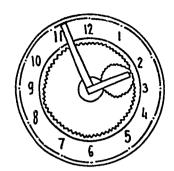

- 1. Sit by the side of child so you and child view numeral in correct position.
- 2. For early learning experience, adult place numeral before child saying name of numeral while putting it together. Start with "l" and complete through age of child the first few times.
- 3. Purpose of activity is to show how many make a number -- the meaning of the number. Have child help you:
  - a. sort pieces by color
  - b. count pieces of each numeral to determine which is next
  - c. assemble numerals in order while saying names of the numerals.
- 4. Encourage child to assemble pieces in random order, identifying numeral after it is complete. This is a difficult level of the activity.

#### LOGICLOCK

Suggested Developmental Level 4-	-8	Suggested	Interest	Level	4-8	
----------------------------------	----	-----------	----------	-------	-----	--

Brief Description:

Proportioned gearing causes the hour hand to move in time, as the minute hand is turned.

### Suggested Uses:

- 1. Point to the numbers on the clock and ask the child to count the numbers aloud with you. If the child cannot do this, he/she is not ready to learn how to use this clock.
- 2. Ask child to tell you when he/she gets up in the morning, then show this on the clock. Do the same with breakfast time, time for school, lunchtime, TV programs, bedtime, etc. If the child is not interested in doing this, he/she may not be ready for learning to tell time by the clock.
- 3. Talk about a specific time. Show this on the clock. Then change the hands and ask the child to show the time you were just talking about. If help is needed, give it.
- 4. Tell the child a time; have the child move the hands on the clock to that time.
- 5. Ask child to match the hands on the play clock with the hands on a real clock.
- 6. Show child a picture of a clock, something you can draw. Show where the hands are pointing (make sure hour and minute hands are clearly different in length). Ask child to match the play clock with the picture of the clock.
- 7. When child is ready, teach telling time: hour, half-hour, minute, five minute intervals.

#### MULTI-LINK NUMBER TRACK

Suggested Developmental Level5-12	Suggested Interest Lev	el <u>5-12</u>
-----------------------------------	------------------------	----------------

1	1	2	3	

Brief Description:

Plastic track designed for use with Multi-Link Cubes. Ten sections snap together to form a number-line trough. Large, easy-toread numerals are printed in black at 2 cm intervals from 1 to 100. Instructions included.

### Suggested Uses:

- l. The counting of concrete objects is necessary in order to understand what numbers mean. Have the child count blocks on or off the track. The on-track counting lets the child see and hear the number.
- 2. Don't make counting into a frustrating experience. Let the child spend most of the time just enjoying the blocks and track.
- 3. Creativity should be a part of the child's learning. The child may discover many possibilities for using the cubes.
- 4. Use a chosen color every second block to illustrate counting by twos.
- 5. After mastering counting, have child practice writing numerals 1-100. Start with 5 numbers. Add additional numbers slowly. Some numbers will be reversed. This is normal. Most reversals will disappear by age 7. Initially concentrate on number sequence rather than on how the numeral was written.

#### NUMERICAL GIRAFFE PUZZLE

Suggested Developmental	Level	4-8	Suggested Interest Level 4-8	
-------------------------	-------	-----	------------------------------	--

Brief Description:

25 numbered pieces in consecutive order. Numerical Giraffe -  $11\ 3/4$ " x  $18\ 7/8$ " size.

### Suggested Uses:

- With giraffe completed, point to numbers one by one in order, asking child what they are. If child cannot do this, ask child to say the numbers with you as you count.
- 2. Let child put together puzzle pieces, top to bottom. Help by counting aloud as child does this.
- 3. Without help, have child put giraffe together, 1-25.
- 4. Have child put puzzle together 25-1.
- 5. Point to a number word, say the number word, have child find puzzle piece and place in correct position. First few times, point to number words in order from one to twenty-five. Later, point to in random order, having child find number and place about where it should go. Help child adjust as puzzle nears completion.
- 6. If you feel child is ready for this, point to a number word, have child read the number word, then find puzzle piece and put into puzzle about where it should go, adjusting pieces later as there is need.

#### ONE-TO-TEN STAIR

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8
04550004	DCVCLOPMCHCGI		1 0	04660004	4		. •

## Brief Description:

The stair consists of ten vertical grooves in which Unifix Cubes are fitted to match the values printed at the top of each groove. Cubes are placed in the grooves to demonstrate each number as a collection of ones. Then the cubes are locked into bars to show that each number is a group or set. Made of durable gray plastic, the stair measures 8 1/2" x 8 7/8". Cubes ordered separately.

## Suggested Uses:

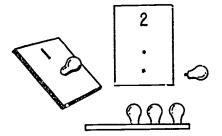

- 1. Let the child enjoy the materials, exploring their use as you "look on."
  You can learn a lot from this observation.
- If necessary, model for the child, talking aloud as you say the number "one," then place one block in the correct groove, and so on with other numbers.
- 3. Compart two stacks, say, "which is bigger?"
- 4. Comparison of numbers may be learned from the Unifix cubes. You may show the child a stack of two cubes and a stack of four. Say, "Low many more are here (point to the four cubes), than here (point to the two)?"

### PEG-IT NUMBER BOARDS

	${\tt Suggested}$	Developmental	Level	2-6	Suggested	Interest	Level	2-6
--	-------------------	---------------	-------	-----	-----------	----------	-------	-----

Brief Description:

Easy-Grip pegs. 4" x 8" Tuctilmat board English and Spanish instructions included. 10 pegboards.

### Suggested Uses:

- Little hands need the large pegs this game offers. Let your child put pegs in holes for that experience along, an important activity in developing small muscle control.
- 2. At first let your child fill the holes with pegs; then ask how many pegs there are on a particular board.
- 3. You know your child best; when he or she is ready, have child trace over the numeral on a board with pointing finger as you tell them the number.
- 4. When your child is ready, suggest putting the boards in numerical order.
- 5. When all activities possible seem to be experienced, have your child close eyes. Place one of the boards before them and have them feel how many pegs there are. Then have them check themselves by opening their eyes.

### PROPORTIONAL NUMBER STICKS

Suggested Developmental Level 1-8	Suggested Interest Level	1-8
-----------------------------------	--------------------------	-----

Brief Description:

Sticks of varying colors, proportional in length to each other.

### Suggested Uses:

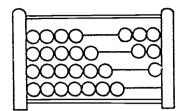

- 1. For young child: building, sorting according to kind.
- 2. Encourage child to build exploratory play.
- 3. Have child build steps from shortest to longest, longest to shortest with the sticks. Use terms long, longer, longest, short, shorter, shortest.
- 4. Have child count out 10 squares and line them up. "Find a stick of that length."
- 5. Choose a stick. "How many squares long do you think it is?" After guessing, lay squares alongside. Check. "Were you right"?
- 6. Use sticks for learning/exploring fractions. Choose a stick. Find two sticks to make the same length. "The short sticks are half as long as the big stick." etc.

### SMALL ABACUS

Suggested	Developmental	Level	4-9	Suggested	Interest	Leve 1	4-9
ougg coccu	Developmental	20101		0000000	THECTCOL	20101	

### Brief Description:

The Small Abacus measures 8 1/2" x 3 1/4" and has five rows of ten beads. Instructions included.

## Suggested Uses:

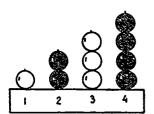

- 1. Ask the child how many beads are on one of the wires? How many wires or groups of beads are on the Abacus?
- 2. Have the child count by groups of 5, then 10. As he grasps this concept, have him count by other groups, 3, 7, etc.
- 3. Start with simple problems, such as covering a certain number of beads and asking the child how many are covered. Or cover 2 beads, "I am taking away 2 beads. How many are left?"
- 4. Slowly introduce addition, subtraction, multiplication, and division. The instruction booklet gives complete details on how to teach these processes.

### STEPPED ABACUS

Suggested	Developmental	Level	2-4	Suggested	Interest	Level	2-4	

Brief Description:

Colorful wooden form featuring ball one through four stacked on a printed ll" wide base. Child may thread each stack and experience simple counting one through four.

## Suggested Uses:

- 1. Remove all balls from stacking base.
- 2. Hand child one white ball and point to first stack. Model threading if child has difficulty.
- 3. Give child two blue balls for threading. Count as child places ball through stacking base.
- 4. Gradually complete spools three and four. Point to numbers in front of each base as each number task is completed.
- 5. Encourage child to remove balls and repeat process.

Manufacturer	Brio	Skills: * Mathematics: math readiness

### TACTILE SANDPAPER NUMBERS

Suggested Developmental Level 4-8 Sug	ggested Interest Level	<b>∔−</b> 8
---------------------------------------	------------------------	-------------

## Brief Description:

Each numeral is "printed" in fine yellow sand on a card base and stands on a fine black baseline. In plastic box. Card size: 4 1/2" x 2 5/8". Numeral size: 2 1/2".

### Suggested Uses:

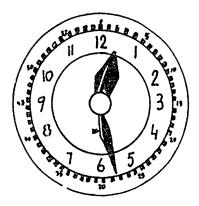

- Put numerals in correct order. Explain to child the purpose of dot at bottom of card (to indicate it is the bottom so numeral is correctly placed).
- 2. Say "one" and have child trace I with a downward movement of writing hand. If needed, guide childs hand in correct movement or talk it through (as with "2" - "up-around-down-over." Be consistent in the words you use.
- 3. In random order (when child is ready for this), have child say numeral, then trace. When child is able, encourage doing these two things simultaneously.
- 4. With eyes closed, have child feel a numeral, and then with eyes open check self.

# THE ORIGINAL JUDY CLOCK

1	D		, ,	0 1	T		1.0
suggestea	Developmental	rever	4-8	Suggested	interest	Level	4-8

### Brief Description:

The Original JUDY Clock has movable hands, visible functioning gears, and elapsed-time bezel. The permanently assembled hardboard clock is 12-3/4" x 13-1/2". Teacher's Guide is included.

## Suggested Uses:

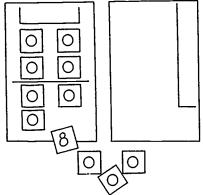

- Let the child manipulate the arms on the clock and turn them clockwise.
   Show the child how to do this.
- 2. Have the child identify the numbers from 1 to 12.
- 3. Begin teaching the child to tell time hourly, then by minutes.
- 4. Associate times of the day to some of the child's activities in the day.
- 5. When the child is ready, show the child how to tell time by the second.

#### UNIFIX INSET PATTERN BOARDS

Suggested Developmental Level 4-8	Suggested Interest Level _	4-8

#### Brief Description:

These two-sided sturdy plastic boards have a raised pattern on one side on which individual Unifix Cubes can be locked. To use the reverse of the board, the cubes are removed and placed in the groove. A set of number cards from 1-10 is included with the set of 10 Pattern Boards.

# Suggested Uses:

- 1. Use the side on which cubes can be locked as an early experience. Have the child watch you matching number "l" to the number one. Say "one" as you do so. Then have the child copy what you have done. Do this with all numbers.
- 2. Let the child enjoy the cubes, placing them on the locking side of the Unifix board.
- 3. Starting with number one Unifix board on the linear side, ask the child to watch as you place the number one in position as you say "one," then place one cube on the board. Do this with the other numbers. Extend the experience to a day for each number (more or less) depending on the level of the child's understanding.

#### ALPHABET BINGO

Suggested	Developmental	Level	4-7	٤	gested	Interest	Level	4	<del>-</del> 7	

Brief Description:

An alphabet recognition game. Each playing card square features an upper case letter and its lower case partner.

# Suggested Uses:

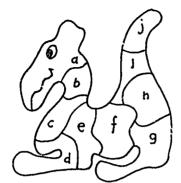

- Select playing card squares which match a Bingo card. Place them before child. Have child match squares to card.
- 2. For the young/learning child, play the game with a partner.
- 3. Two ways of playing the game are: a). Use "flash cards" showing child what he or she is to look for; b). Say sound of the letter, have child find card and place it over appropriate space.

Manufacturer	Trend	Skills: * Reading: reading readiness
		Visual: visual discrimination
Price Range	0-10	

#### ALPHA DRAGON

Suggested	Developmental	Level	3-6	Suggested	Interest	Level	3-6

Brief Description:

Alphabet game with capital letters and lower case letters. Upper case letters under each removable piece. 12" x 18".

#### Suggested Uses:

- 1. Ask child to tell you letter sounds or names as you point to them in order on completed puzzle.
- 2. A basic learning experience for this board is matching lower to upper case letters. Should child have difficulty, print lower next to upper case letters on a piece of paper in this way: a A b B c C (small letter first for this puzzle).
- 3. Remove "a, b, c, d;" mix them, have child replace. This is an early learning experience. Always starting with the letter "a," remove "a through e," gradually removing more letters.
- 4. Sing the alphabet song while pointing to completed puzzle.
- 5. Name a letter and have child find it and put it into the puzzle board. Keep paper with "a  $\Lambda$  b B" near by in case it is needed for matching.
- 6. Have child name each letter while putting entire puzzle together.

--------------------------------------------------------------	-------------------	---------------	-----	-----------	----------	-------	-----	--

## Brief Description:

26 sturdy plastic racers. Self-checking cars can only be connected end-to-end in correct alphabetical order. Set of 26 poly racers, each 5" long.

# Suggested Uses:

- 1. Practice abc's by putting cars in order alphabetically.
- 2. Begin with 3 to 5 cars, adding more as your child masters these.
- 3. Take ones your child is learning and:
  - a) mix up order and have child put in correct order.
  - b) have child close eyes and take one away. Guess which one is missing.
- 4. Use cars for imaginative play, encouraging your child to talk about letter car being used.

#### CHILDCRAFT TACTILE LETTER BLOCKS

Suggested Development	al Level	4-8	Suggested	Interest	Level	4-8	

#### Prief Description:

These large, precision-fit wood blocks provide a kinesthetic experience that reinforces letter and number recognition.

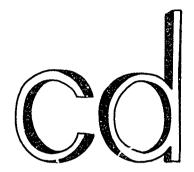

#### Suggested Uses:

- 1. Initially encourage child to discover how letters may be removed from block base.
- 2. Sit by side of child. Taking a letter block, trace raised letter. Remove letter. Trace in groove. Observe to see if child copies you. Continue to trace other letters.
- 3. Select a letter with which child is familiar such as first letter of child's name. Trace letter while saying sound of letter. Encourage child to copy what you have just done.
- 4. For unfamiliar letters: trace...say sound...repeat modeling of these letters. One sound/letter per day or week. Consonants first. Vowels are more difficult because of the many sounds they may have.
- 5. As child enjoys use of wooden alphabet letters, play games:
  - a. select a letter...trace...say sound...say a word that starts with letter...encourage child to say word starting with same letter sound.
  - b. Play riddle game..."I'm thinking of a word that starts with (example, "d")." Give sound of letter while tracing it...give more clues...four legs...barks...always tracing and saying sound of letter. Encourage focus of game on the letter.

Manufacturer	Childcraft	Skills: * Reading: reading readiness			
		Cognitive: shape concept, sequence			
Price Range	40-50	Visual: visual discrimination			

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

5" upper and lower case letter forms. Made of durable Tactilmat, letters are washable are easy to handle.

#### Suggested Uses:

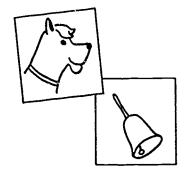

- 1. Ask the child to make his/her body look like the letter of the alphabet.
- 2. Feel the letter. Guide the child's hand in tracing the letter (guide in the correct forming of the letter). Say the words as the child and you trace, as for the letter "a": "around, up, down."
- 3. Tell the child the sound of the letter. Play a game of telling a word that begins with that letter; you say "one," the child says "one."
- 4. Spell words for the child, like "dog, cat, can." Spell words that name objects, but not words that use capital letters such as the child's name. Place letters in alphabetical order. Help child as needed, always praising for any success. Always begin left and move to right with letters.

LADDER GAMES: SIGHT WORD BUILDERS

Suggested 1	Developmental	Laval	4-8	Suggested	Interest	Laval	4-8	
Suggested	Developmental	rever	4-0	Suggested	Interest	rever	4-0	

#### Brief Description:

Students learn 52 early reading words and numerals from 1 to 6. Materials include two 18" x 24" gameboards. 52 word cards, four markers, a spinner, and instructions.

# Suggested Uses:

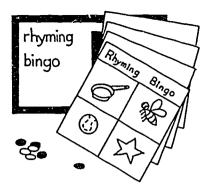

- i. For lower skill levels play "Show me." Parent selects several cards, reads one of the words child is to pick up and say word parent has read. If successful, child takes turn.
- 2. Rules can vary to increase chance of winning for low skill levels. e.g. adult may give clue by saying the word in parts and have child slide it together to say the word. (example: d-o-ll, child says, doll).
- 3. For higher skill levels, players must say word seen.
- 4. Language skills can be incorporated by adding requirement that player use word in a sentence.
- 5. Math skills can be incorporated by using a common die. Whatever numeral is spun must be found on the die before proceeding.

# RHYMING PUZZLES (IDEAL)

Sugges	ted Developmental Level <u>4-8</u>	Suggested Interest Level 4-8					
	spoon 3	Brief Description:  Children match rhyming pictures, rhyming words, and words to pictures. Immediate positive reinforcement occurs as childrenn match cards specially cut to fit together.					
Sug	gested Uses:						
	Flay "name the picture." Make	e sure the child knows the labels for the ning puzzle parts.					
2.	Have child identify a picture and find another picture that rhymes.						
<b>3.</b> i	Have child identify a picture and find a word that rhymes.						
4.	Have child read a word and find a word that rhymes.						
	5. Using a picture or word as a starter, say as many rhyming words (real or nonsense) as child and you can think of.						
Manufa	cturer <u>Ideai</u>	Skills: Auditory: auditory discrimination					
		Cognitive: classification					
Price	Range <u>0-10</u>	Fine Motor: pincer grip					
		* Reading: reading readiness					

#### RHYMING PUZZLES (INCENTIVES FOR LEARNING)

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8	

#### Brief Description:

12 round puzzles. Each puzzle measures 7-1/4" in diameter and is die-cut into four pieces. One side of each piece is a pictorial representation of the rhyming word which is spelled out on the other side.

# Suggested Uses:

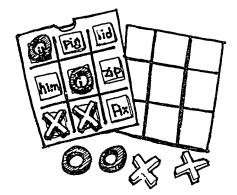

- 1. Begin with picture side (concrete) before moving to word side (abstract).
- 2. Talk about the picture, making sure child can name each picture.
- 3. Given one piece of the puzzle, have student find the other rhyming words and pieces. You may ask child to think of additional rhyming words.
- 4. (More advanced use). Without looking at pictures, play game of one person telling word to other person. Take turns saying a word that rhymes.

#### SHORT VOWEL TIC TAC TOE

Suggested	Developmental	Level	4-8	Suggested	Interest	Level	4-8	

#### Brief Description:

This game consists of one 12" x 12" sturdy cardboard game grid, five rubber X's and 0's, and five durable game cards. Each of the five vowel cards has nine phonetically regular words on each side. Instructions included.

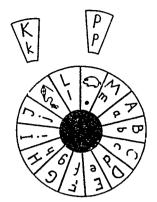

#### Suggested Uses:

- 1. Use this game with child who is able to sound out words, at least at a beginning level.
- Without the X's and O's, play a sounding out game with child. Pointing to a word, parent says word slowly and in parts in one of two ways: "b-ib" or "bi-b." Child tries to say word fast. This may be called the "Slow/Fast" game.
- 3. Play a rhyming game. Point to a word. Say the word to child. See how many words you and child can say that rhyme with that word. Then move on to a new word. Nonsense words are acceptable.
- 4. If needed, prepare "reminder sheet" for child so that the starting letter of the picture word has the short vowel sound. You may find these in magazines or draw your own. Examples: a picture of astronaut or apple, e elephant or eggs, i igloo or indian, o octopus, u umbrella. Remove reminder sheet as akill increases.
- 5. Play game like tic-tac-toe. As word is correctly said, player places marker.

Manufacturer	DLM Teaching	Skills: * Reading: Reading Readiness
	Resources	Fine Motor: Pincer Grip
Price Range	10-20	Auditory: Auditory Discrimination

Suggested Developmental Level 4-8 Suggested Interest Level 4-8

Brief Description:

Self-correcting puzzles. Students match lower and upper case letters to illustrations of common objects in the set. Letters A-M on the blue puzzle, and N-Z on the gold. Instructions included.

#### Suggested Uses:

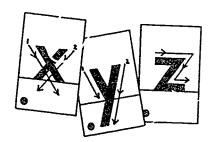

- 1. At first use pictures only. Talk to child about pictures. Point to a picture and say name of picture. Then point to picture and ask child to say name.
- 2. Take turns playing "teacher" by nameing a picture; then other person names something that starts with same sound.
- 3. Using pie wedge pieces on which letters are printed, tell child sound. Then tell child something that starts with that letter. Be sure to include name of picture on the wheel as you play.
- 4. Have child match letters to pictures. In using puzzle, use sound of letter, rather than name.
- 5. As a more difficult step, name letter and ask child to match it with a picture.

#### **APPENDIX**

# A GUIDE TO ASSIST IN LOCATING LEARNING MATERIALS

To assist you in locating many of the materials found in this catalog so that they may be purchased for individual or group use, a grid has been developed which shows several sources for you to consider. We have selected eight distributors who each carry a variety of educational materials and toys, many of which are found in this catalog.

The grid is several pages long and displays the materials in alphabetical categories. The  $\underline{X}$  indicates that the material is distributed by the particular company.

Below, please find the company names, addresses, and telephone numbers of the distributors found on the grid. We hope that the grid will be of benefit to you as you select and purchase learning materials.
