ABSTRACT

Fall 1987 data on student characteristics, course characteristics, and personnel in the Washington community colleges are presented in this report. The first section provides summary data on headcount and full-time equivalent (FTE) enrollments for 1983 through 1987; information on FTE's by funding source; and a comparison of state-supported FTE's by college. The next section focuses on student characteristics, providing data on full-/part-time status, age group, median age, gender, race, subject area, and new/continuing status. The third section presents enrollment data by course characteristics, with tables showing enrollment by funding source, course intent, subject, time, and location. Finally, personnel data are presented, including statistics on teaching faculty by employment status; numbers and percentages of employees and students by race, sex, and full-/part-time status; and the age structure of faculty and administrators. Selected findings include the following: (1) in fall 1987, the Washington community colleges served 163,278 students, representing an increase of 2.8% over 1986; (2) the average campus served 5,900 headcount and 3,300 FTE students; (3) the fastest-growing student groups were young students under 20 years of age and those 40 to 45 years of age; and (4) 42% of all students enrolled in fall 1987 were new to the college. (EJV)

State-supported FTEs have been increasing slightly each year since 1983, consistent with small increases in state funding levels. FTE limits for 1987-89 are the same as 1986-87, so colleges reduced the size of fall classes to allow for more equal quarterly enrollments. Contract-supported FTEs come from courses tailored to the specific educational needs of a business or organization which pays the costs of instruction. Student-funded FTEs include recreational courses and other courses of an avocational or personal enrichment nature. avocational or personal enrichment nature.

COMPARISON OF STATE-SUPPORTED FTES BY COLLEGE

Nineteen colleges experienced the systemwide pattern of decreased enroll-ments over last fall as measured by FTEs in courses supported by state funds. One college continued the same enrollment levels as last year (less than one percent growth or decline). Seven colleges had enrollment increases.

1307	07,800	40.0%	15.0	77,633	33.4%	4.0

A smaller percentage of part-time students (enrolled for less than 10 credits) enroll in Washington community colleges (53 percent) than do community colleges nationally (67 percent). Budget cuts at the beginning of this decade forced cuts in courses normally taken by part-time students. As a result, fewer working people and those with home commitments are able to enroll in community colleges than in the past.

Full-time students average 15 credits each and generate three quarters of all the FTEs.

STUDENTS BY AGE GROUP Fall Quarters 1983 thru 1987

AJ9/ISD85

9

STUDENTS BY AGE GROUP -- STATE AND CONTRACT SUPPORTED

Fall Quarters 1983 thru 1987

The fastest growing student groups were young students under 20 years of age and those 40-45 years of age. The under 20 age group made up 27.5 percent of course effort. Those 40 and over comprised 12.6 percent of the FTE. The average student was enrolled full time for 9.1 credits. The under 20 group enrolled for 13.0 credits; the 20-29 age group, which is declining in size, enrolled for 9.8 credits; the 30-39 age group, also declining in size, enrolled for 7.5 credits; and the 40 and over group enrolled for 5.9 credits.

	-0.4%	1.6%	1.2%	2.1%	-1.7%

Among state-supported courses, the academic category has experienced the most growth. This is largely due to growth in the number of both vocational and transfer students enrolled in math and English courses.

Basic skills courses serve those who are illiterate, those who are enrolled in Adult Basic Education programs to complete ninth-grade education, those working to obtain a high school diploma, those who need English-1s-a-Second-Language training, and those whose skills are below the level necessary to complete college-level work. The decline reflects a change in the way basic skills FTEs are counted. Headcounts in basic skills remained unchanged from Fall 1985.

Vocational FTEs have declined annually because programs in the trade and industrial area have have been reduced or eliminated due to low employment demand.

AJB/ISD8

BASIC SKILLS & DEVELOPMENTAL STUDIES COURSES -- STATE-SUPPORTED Fall 1987

Developmental Studies

These are college preparatory and remedial courses. These students tended to enroll full-time. They enrolled in academic and vocational courses along with remedial courses (nine credits in non-developmental and four credits in developmental studies courses on the average).

Courses Reading, Writing, Study Skills Math Social Sciences Sciences General	4,549 134 32	FTEs 1,908 1,267 37 12	Percent of Total Basic Skills 16.6% 11.0% 0.3% 0.1%
General	131	48	0.4%

Adult Basic Education (ABE) & ESL

ABE students generally have academic skills below the ninth grade level or are preparing for the high school graduate equivalency examination (GED). Non-white students participated in ABE at twice the rate that they participated in other courses. Colleges are responding to the greater need for basic skills education of non-white students as indicated in 1980 census data (percent of adults 25 and over who have not completed ninth grade: Black 12.8, Asian 15.6, Native Americans 16.6, Hispanics 31.5 and Whites 9.6 (1980 Census).

ESL students, adults learning basic English, make up 39 percent of all ABE and ESL students. These students enrolled for an average of eight credits in ABE or ESL courses and most did not enroll in any other courses (average of one credit in other courses). The majority of ESL students were Asian (55 percent) and Hispanic (20 percent).

ABE & ESL Headcount 10,686	FTEs 5,637	Percent of Total Basic Skills 49.1%
----------------------------	---------------	-------------------------------------

High School Completion

These courses meet requirements for completion of a high school diploma. Each year the Washington community colleges award more than 1,000 high school diplomas. While these students tended to be younger than those in other courses, there were 72 students 50 or over enrolled in high school completion courses. Students enrolled on the average in six credits of high school completion courses and four other credits.

Headcount 2,968 FTEs Percent of Total Basic Skills 11.2%

<u>Special Needs</u>

Includes courses in practical living skills and pre-vocational training for mildly to severely mentally impaired adults, courses for the visually impaired, and career exploration for special needs students.

ACADEMIC FTES -- STATE SUPPORTED Fall 1983 thru Fall 1987

ACADEMIC: TRANSFER & VOCATIONAL SUPPORT -- STATE SUPPORTED Fall 1983 thru Fall 1987

Academic FTEs have grown 4 percent since 1983, with most growth in the humanities. The 1983-85 data were categorized by HEGIS code; 1986-87 data were categorized by CIP code. Both of these subject area codes were created by the U.S. Department of Education for the classification of instructional programs. The newer CIP codes do not aggregate identically to the HEGIS codes. A small part of the variance between 1985 and 1986 results from the coding changes.

VOCATIONAL FTES BY COURSE AREA

VOCATIONAL COURSES--STATE SUPPORTED Fall 1983 thru Fall 1987

Vocational FTEs in Fall 1987 were 7 percent below the level of 15J3. The 1983-85 data were categorized by HEGIS code, 1986-87 data were categorized by CIP code. Both of these subject area codes were created by the U.S. Department of Education for the classification of instructional programs. The newer CIP codes do not aggregate identically results from the coding change. Additionally, starting in 1985 and 1986 coded some of the vocational support courses as basic skills rather than as vocational (1,197 FTEs in Fall 1985 were moved).

Declines in FTEs were primarily in Trades and Services due to the elimination of programs no longer required because of a changing labor force and in Business and Office due to reductions in marketing and special business courses. Since 1978, 169 programs have been eliminated. In the same period, 212 new entry-level vocational programs have been started to meet the emerging employer and student need.

STATUS FULL-TIME PART-TIME PARAPROFESSIONAL	1983 2,193 1,309	1984 2,185 1,387	1985 2,154 1,430	1986 2,161 1,481	1987 2,153 1,430
AND VOLUNTEER	55	58	66	60	65
TOTAL % Change	3,556 5.5%	3,631 2.1%	3,650 0.5%	3,703 1.5%	3,648 -1.5%

The teaching faculty are those in the classroom. FTEF excludes non-teaching assignments such as counselors, librarians and department chairs. Fall 1987 teaching faculty was comparable for size to Fall 1985, both first years of the biennium.

Part-time faculty give community colleges the flexibility to offer courses outside the expertise of full-time faculty, to offer more evening and off-campus courses, and to adjust course offerings quickly in response to student demand or changes in funding. It is typical of community colleges in Washington and nationally that part-timers represent about 40 percent of the teaching effort.

^{*} State and Contract Supported Students Only

FULL-TIME EMPLOYEES BY AGE GROUP Fail Quarter 1987

The age structure of faculty and administrators in the community college system was nearly identical: one in five under 40, two in five in their forties, and two in five 50 or over. Many of the faculty were hired in the late 1960's and early 1970's when college enrollments were increasing pidly. Fewer faculty have been hired in more recent years. By 2008, 80 percent of the current faculty will have retired or be near retirement (60 or older). To maintain the current full-time faculty size, about 1,000 new teachers will need to be hired between now and the year 2000.

The classified staff was younger than the faculty or administrato.
