ABSTRACT

This booklet provides a brief review of programs selected by school administrative units in North Carolina that received mini-grants, funded by the Department of Public Instruction Support Services Area and designed to enhance educational programs. These exemplary educational programs were made available through the National Diffusion Network (NDN). Subject areas among NDN programs are mathematics, science, and technology, including use of the computer. There are also programs in writing, reading, language arts, social studies, and programs for gifted and talented student. Some programs are designed to improve inservice and preservice education, adult education, and health and physical education. A brief introduction to the booklet describes the work of the NDN. This is followed by descriptions of the programs that include information on: (1) what the program is; (2) what it provides; (3) the program's effectiveness and expectations; and (4) the North Carolina schools currently using the program. (JD)

Introduction

During the 1985-86 school year, the Support Services Area of the Department of Public Instruction established the Mini-Grant Initiative. This initiative provides opportunities for local school administrative units to strengthen, expand, and enhance their educational programs using a minimum amount of time and resources, while gaining maximum benefits for students and teachers.

Funds from several programs in the Support Services Area—child nutrition, exceptional children, E.C.I.A. Chapter 1, E.C.I.A. Chapter 2, and migrant education—were pooled to support the mini-grant initiative. In December, 1986, the State Board of Education approved allocations totalling \$302,640 for 82 separate mini-grant projects. Sixty-three (63) different administrative units received these grants, and thirty-two (32) different National Diffusion Network programs were adopted.

Our goal is to make every school in North Carolina an effective school, and we believe the installation of proven effective programs can help make effective schools.

"Effective Programs Make Effective Schools" provides a brief review of the programs selected by administrative units during the 1986-87 school year. I encourage you to read this publication to learn how some of North Carolina's schools are using NDN programs to strengthen the education of young people.

A. Craig Phillips, State Superintendent Department of Public Instruction

SO. . . YOU WANT TO KNOW MORE ABOUT THE NDN

WHAT IS THE NATIONAL DIFFUSION NETWORK?

The National Diffusion Network (NDN) is a federally funded system that makes exemplary educational programs available for adoption by schools, colleges and other institutions.

It does so by providing dissemination funds to exemplary programs, called Developer Demonstrator projects, for two purposes: (1) to make public and nonpublic schools, colleges and other institutions aware of what they offer, and (2) to provide training, materials and follow-up assistance to schools and others that want to adopt them.

NDN also provides funds to State Facilitators whose job is to serve as matchmakers between NDN programs and schools and organizations that could benefit from adopting the programs.

WHAT MAKES THE NDN DEVELOPER DEMONSTRATOR PROJECTS DIFFERENT FROM COMMERCIAL PRODUCTS?

Several important things. NDN Developer Demonstrator project staff do not just hand a program to a school and expect the school to figure out how to use it. Instead, NDN program directors help local schools adopt their programs to suit each school's unique needs. To do that, the director of the program provides training lasting from one day to a week or more to staff members in the adopting school. The director also provides follow-up assistance in the form of additional training, visits, telephone consultation and newsletters. Sometimes a program director or a State Facilitator arranges for all adopters of a particular program in a region or state to form a network so they can share successful approacnes and solve common problems. All NDN services are provided at little or no cost to adopters.

HOW DOES NDN ASSURE THAT A PROGRAM IS EFFECTIVE AND WORTHY OF REPLICATION IN OTHER SCHOOLS?

Before a program can become eligible for funding as a part of the NDN, it must be approved by the Department of Education's Joint Dissemination Review Panel (JDRP). A program requesting a review by the panel must provide evaluation data that prove that the program is effective in the school in which it was developed or field tested, and that it could be used successfully in other schools. By October, 1984, 383 programs had been approved by the panel, and 90 of them were receiving federal dissemination funds to help other schools adopt them.

WHAT KINDS OF PROGRAMS ARE AVAILABLE FOR ADOPTION THROUGH THE NDN?

NDN programs can meet the needs of students of every age—preschool through adult—and the needs of teachers, administrators, and other school personnel.

Subject arear represented among the NDN programs are mathematics, science, and technology, including use of the computer and calculator for enhancing learning in various subjects. There are also programs in writing, reading, language arts, social studies, and programs for gifted and talented students.

Some programs are designed to improve pre-service and in-service teacher training. Other fields represented include special education, career and vocational education, adult education, and health and physical education. Some programs are directed toward processes to improve school administration and management and thereby improve instruction.

IS IT POSSIBLE TO SEE A DEVELOPER DEMONSTRATOR PROGRAM IN ACTION?

Yes. Each Developer Demonstrator program receiving federal dissemination funds maintains a demonstration classroom or school where visitors are welcome. These programs are located across the United States. In addition, many of the programs have demonstration sites in states other than the one in which they were developed. NDN State Facilitators can arrange for risits to a demonstration school or to an adoption site.

HOW DOES A SCHOOL MAKE AN ADOPTION?

The first step is to contact one of the NDN State Facilitators. Their job is to help schools and other organizations learn about and adopt NDN programs. Often, for example, they hold "awareness conferences" featuring one or more NDN programs and invite educators to attend. They also work with educators in identifying the needs in a particular school and in determining which NDN program offers a solution. When a school decides to adopt an NDN program, the facilitator arranges for the program's developer to provide training to staff in the adopting school. In addition, if a school requires financial assistance to make an adoption, the facilitator usually knows about funding sources and procedures for applying for a grant under various federal, state or local programs or from private foundations or industry. Some facilitators sponsor meetings for administrators on how to apply for financial assistance.

WHAT IF THE PROGRAM A SCHOOL WANTS TO ADOPT IS LOCATED IN ANOTHER STATE?

That's no problem; the NDN was developed so that educators would have access to exemplary programs, whether these programs are located in the same state or not. NDN brings the program to the school or district that wants it.

HOW MUCH DOES IT COST TO ADOPT AN NON PROGRAM?

The cost varies. NDN's aim is to provide adoption assistance at minimal cost. State Facilitators are supported by NDN grants, so there is no cost for their services, and there is little or no cost for training. An adopter usually pays for any required curriculum materials and for release time for teachers to attend training. Some schools help meet adoption costs with a grant under a state program of Chapter 1 and 2 of the Education Consolidation and Improvement Act or with funds from other sources, including the private sector.

WHAT IS THE RESPONSIBILITY OF A SCHOOL IN MAKING AN ADOPTION?

Each Developer Demonstrator program has basic requirements to be met by adopters. Adop ing schools, for example, are usually required to implement certain basic features of the program, such as regular monitoring of students' academic progress or the use of certain activities. Some programs may require the adopting schools to compile pre- and post-test scores or other appropriate measures of effectiveness and growth in order that the adopted program's benefits can be accurately evaluated. Each adopter agrees to an adoption plan which outlines roles and responsibilities of the parties concerned.

CAN NDN REALLY HELP SCHOOLS IN NORTH CAROLINA?

Many teachers, administrators and other educators think so. In 1985-86 alone, NDN programs were installed in more than 1,000 schools in North Carolina. An estimated 1,900 teachers and 195 school administrators received training in the use of NDN programs; approximately 68,000 students were served by these adoptions Several evaluations of the NDN show that it is meeting its goal of helping schools improve education through the dissemination of effective programs.

WHERE CAN YOU GET MORE INFORMATION ABOUT NDN PROGRAMS?

WHAT THEY ARE SAYING.....

BLTM

• A thoroughly useful workshop —

Teacher

• A great benefit to me -

Teacher

• Very applicable to my classroom —

Teacher

• What a great way to teach typing and spelling skills. A good supplement to reading instruction.—

Teacher

CERES

Fantastic! Impressed. Interesting. Looking forward to getting the program started in my class —
 Teacher

• Time well spent. I feel our students will benefit greatly.—

Teacher

CLIMB

 I really like the way CLIMB is organized—it will help us with the North Carolina Competency Curriculum.—

Teacher

 I thought the workshop was excellent. All the ideas were helpful and the CLIMB individual record per child will be an important addition to our cumulative folders.—

Teacher

• The training was great. The CLIMB program with the organized listing of skills encourages teachers to use textbooks as a tool and not an absolute guide —

Teacher

EPSF

• I am looking forward to implementing the program -

Teacher

• This is the program I've been looking for.—

Teacher

ICE

• The program is well outlined and doesn't take too much planning time —

Teacher

• I'm introduced to many practical ideas that I know that I can use —

Teacher

 The overall program seems to be very good and very needed. Finally, I have something to use to get children thinking that will be educational and fun —

Teacher

KIDS KITS

KIDS KITS has made me more aware of the curriculum, more in tune with my collection and its
development, more responsive to teacher needs, more involved with the students on a one-to-one basis,
and has increased my role in demonstrating to the teachers and students a variety of ways of sharing their
newly acquired knowledge through production techniques.—

Media Coordinator

• I think KIDS KITS are absolutely fantastic. My class was motivated just by looking in the box and seeing all of these materials right at their fingertips. They were so eager and proud to show off their work.—

Teacher

• It makes le .rning so much more exciting.—

Teacher

 Andy was just beaming when he came home from school. He couldn't wait to tell us what they had been doing with KIDS KITS. I think it's wonderful —

Parent

SINEP

• I was impressed by the scope of what was presented in a few hours. --

Teacher

• Excellent hands-on activities—

Teacher

CONSERVATION FOR CHILDREN

CONSERVATION FOR CHILDREN IS-☐ A program designed to increase conservation awareness, understanding, and action of elementary school children through a variety of basic skill activities designed for use in the classroom. Conservation for Children teaches about the interdependence of plants and animals, requirements of life, energy sources and use, pollution problems, recycling, and other conservation concepts based on scientific principles ☐ Nationally validated for students in grades 1-6. CONSERVATION FOR CHILDREN PROVIDES— ☐ Grade level conservation guides which combine basic skill practice in the areas of: Language arts Math Social studies Science All levels guide (activities, resource) ☐ Criterion-referenced tests, correlation tales to link basic skills with conservation topics, class record sheet for tabulation of student needs. ☐ A minimum one-day awareness/training for teachers. CONSERVATION FOR CHILDREN EFFECTIVENESS AND EXPECTATION— ☐ Evaluation data confirms that students using the materials for a minimum of 30 minutes per week master 80% of the learning objectives. In addition 75% of the parents of 2,000 students in the evaluation study responded in writing that they had observed their children implementing conservation practices at home which they had never seen before the children used the program.
