ABSTRACT

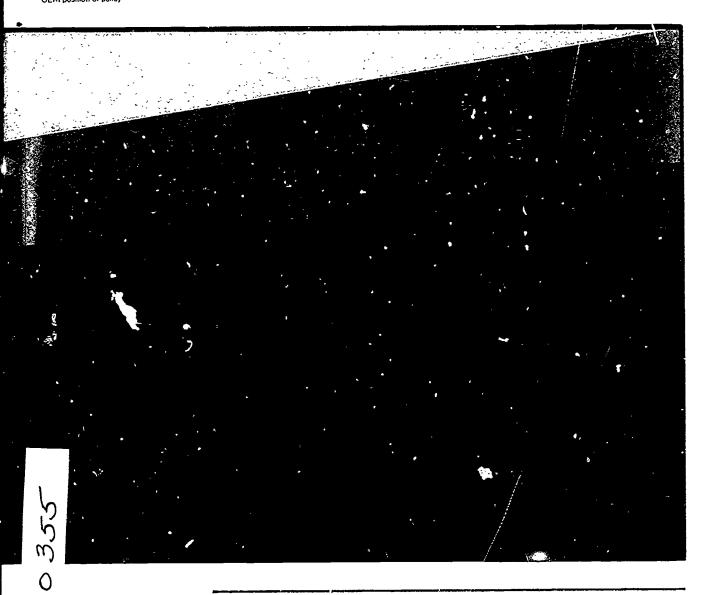

This document, consisting of 7 chapters, 25 figures, and 303 tables, provides statistical data on most aspects of United States education, both public and private, from kindergarten through graduate school. The chapters cover the following topics: (1) all levels of education; (2) elementary and secondary education; (3) postsecondary, college, university, adult, and technical education; (4) federal programs for education and related activities; (5) outcomes of education; (6) international education; and (7) learning resources and technology. Information is presented on a variety of subjects, including the number of schools and colleges, teachers, enrollments, graduates, educational attainment, finances, federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, educational characteristics of the labor force, government finances, and economic trends is provided. Included among data not appearing in previous editions are the following: number and level of degrees held by the population; trend data on the proportion of high school graduates going to college; teacher and general public opinion polis; the number of special education teachers; state legislation on the provision of gifted and talented education and special education; curent expenditures for public schools; number of colleges awarding degrees; and trends in expenditures of institutions of higher education. A short introduction highlights major findings, and each chapter contains a brief overview of significant trends. A guide to sources, definitions, and an index are included. (MLF)

Foreword

The 1988 edition of the Digest of Education Statistics is the 24th in a series of publications initiated in 1962. (The Digest has been issued annually except for combined editions for the years 1977-78, 1983-84, and 1985-86.) Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from kindergarten through graduate school. The Digest includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics. The publication contains information on a variety of subjects within the field of education statistics, including the number of schools and colleges, teachers, enrollments, graduates, educational attainment, finances, Federal funds for education, employment and income of graduates, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data.

The Digest is divided into seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education and Related Activities, Outcomes of Education, International Education, and Learning Resources and Technology. To qualify for inclusion in this publication, material must be nationwide in scope and of current interest and value. The introduction supplements the tabular materials in chapters 1 through 7 by providing a brief overview of current trends in American education. Information on the structure of the statistical tables is contained in the Guide to Tabular Presentation. The Guide to Sources provides a brief synopsis of the surveys used to generate the tabulations for the Digest. Also, a "Definitions" section is included to help readers to understand the terms used in this publication.

In addition to updating many of the statistics that have appeared in previous years, this edition contains a substantial amount of new material, including:

- Number of degrees held by the population, by level of degree;
- Trend data on the proportion of high school graduates going to college;
- New data from teacher and general public opinion polls;

- · Data on the number of special education teachers;
- State legislation on the provision of gifted and talented education and special education;
- Current expenditures for public schools, by function;
- Number of colleges awarding degrees, by level and field; and,
- Trends in expenditures of institutions of higher education, by type and control of institution.

Thomas D. Snyder was responsible for the overall development and preparation of this report. A number of other people have contributed in one way or another to the development of this *Digest*.

Foremost among these contributors is W. Vance Grant, who served as an editor of this series from 1962 to 1986. His developmental work has made this publication the widely used and respected report it is today. This report was prepared under the direction of Leo J. Eiden.

We also wish to acknowledge Charlene Hoffman for her technical assistance in preparing the Digest. Ms. Hoffman was responsible for Chapter 4, Federal Programs for Education and Related Activities, and for the tables on degrees conferred. Jerry West was responsible for developing a number of new analyses dealing with public attitudes towards education and educational characteristics of young adults. Henry Gordon prepared tables relating to economic outcomes of education and educational characteristics of the population. Pat Brown was responsible for tables on college enrollment. Celeste Loar compiled tabulations on international education and on faculty and teachers. Lisa Avallone developed a number of tables dealing with special education and State education legislation. Zola Brown prepared tables on libraries and public school enrollment. Bill Sonnenberg developed a special computer analysis on school districts. Judi Fries provided editorial assistance, and Phil Carr managed typesetting and layout.

This year's edition of the *Digest* has received extensive reviews by individuals within and outside the Department of Education. We wish to thank these persons for their time and effort. Within the Office of Educational Research and Improvement (OERI), W. Vance Grant, Bruno Manno, and David Orr provided reviews of the entire manuscript. Elainé El-Khawas (American Council on Education), Jewell C. Gould (American Federation of Teachers), Dean Honetschlager (National Governors'

iii

Association), and Ramsay W. Selden (Council of Chief State School Officers) also reviewed the entire document. OERI staff who reviewed portions of the manuscript were: Mary K. Batcher, Milton Chorvinsky, Richard P. Cook, Charles D. Cowan, Leo J. Eiden, William J. Fowler, Martin M. Frankel, Mary Frase, Susan T. Hill, Paul F. Mertins, Mary R. Papageorgiou, John P. Sietsema, Suzanne E. Triplett, George H. Wade, Jeffrey W. Williams, and Douglas A. Wright.

In the past, the *Digest of Education Statistics* has proved to be of interest and value to educational researchers and administrators, government officials, the

communications media, the business community, and the general public. Recently, we have begun a program to expand the scope of materials included in the *Digest* to make it even more comprehensive. We welcome comments and suggestions to improve future editions. We trust that the users of this 24th edition will find it even more valuable than its predecessors.

Paul R. Hall, Director Crosscutting Education Statistics and Analysis Division August 1988

Enro	ollment, Teachers, and Schools
1.	Estimated number of participants in elementary and secondary education and in higher education: Fall 19879
2.	Enrollment in educational institutions, by level and by control of institution: 1869-70 to fall 19909
3.	Enrollment in educational institutions, by level and control of institution: Fall 1980 to fall 1995
4.	Teachers in elementary and secondary schools, and senior instructional staff in institutions of higher education, by control of institution: Fall 1970 to fall 1995
5.	Educational institutions, by level and control of institution: 1976-77 to 1986-87
Enro	llment Rates
6.	Percent of the population 3 to 34 years old enrolled in school, by age: April 1940 to October 1986
7.	Percent of the population 3 to 34 years old enrolled in school, by race/ethnicity, sex, and age: October 1986
Educ	ational Attainment
8.	Years of school completed by persons age 25 and over and 25 to 29, by race: 1910 to 1986
9.	Years of school completed by persons age 18 and over, by age, sex, and race/ethnicity: 1986
10.	Number of persons age 18 and over who hold a bachelor's or higher degree, by field of study, sex, race, and age: Spring 1984
11.	Highest educational level and degree earned by persons age 18 and over, by sex, race, and age: Spring 1984
12.	Years of school completed by persons age 25 and over, by State: April 1980

Population

13.	Estimates of resident population, by age: July 1, 1960 to July 1, 198621
14.	Estimates of school-age resident population, by race and sex: July 1, 1960 to July 1, 1986
15.	Total and school-age resident population, by State: 1970 to 1986
Chai	racteristics of Families With Children
16.	Families,
	by family status and presence of cwn children under 18: 1970, 1980, and 1985
17.	Characteristics of families with own children under 18, by family status and race/ethnicity: 198525
18.	Poverty status of persons, families, and children under 18, by race/ethnicity: 1959 to 1986
Opin	ions on Education
19	Average grade that the public would give the schools in their community and in the Nation at large: 1974 to 1987
20.	Items most frequently cited by the general public as the chief problems facing the local public schools: 1970 to 1987
21.	Opinions on key aspects of public schools by parents and teachers of public school students: 1987
22.	Beliefs held by the parents and teac :ers of public school students about what activities and programs would "help a Ic" to improve education: 1987
Finai	nces
23.	Total expenditures of educational institutions related to the gross national product, by level of institution: 1959-60 to 1986-87
24.	Total expenditures of educational institutions, by level and control of institution: 1899-1900 to 1987-88
25.	Estimated total expenditures of educational institutions, by level, control of institution, and source of funds: 1975-76 to 1985-86
26.	Direct general expenditures of State and local governments for all functions and for education, by level and State: 1984-85
27.	Direct general expenditures per capita of State and local governments for all functions and for education, by level and State: 1984-85

28.	Gross national product, State and local expenditures, personal income, disposable personal income, median family income, and population: 1929 to 1986
29.	Gross National Product Price Deflator, Consumer Price Index, and education price indexes: 1919 to 1986
2. Ei	ementary and Secondary Education
Enro	llment
30.	Historical summary of public elementary and secondary school statistics: 1869-70 to 1985-86
31.	Enrollment in public elementary and secondary schools, by grade: Fall 1973 to fall 1986
32.	Enrollment in public elementary and secondary schools, by level and State: Fall 1981 to fall 1987
33.	Enrollment in public elementary and secondary schools, by grade and State: Fall 198648
34.	Enrollment in public elementary and secondary schools, by grade and State: Fall 1985
35.	Membership and attendance in public elementary and secondary schools, by State: 1980-81 and 1985-36
36.	Average daily attendance in public elementary and secondary schools, by State: 1969-70 to 1985-86
37.	Enrollment in public elementary and secondary schools, by race or ethnicity and State: Fall 1984
38.	Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level and control of program: October 1965 to October 1985
39.	Public school pupils transported at public expense and current expenditures for transportation: 1929-30 to 1984-85
40.	Children 3 to 21 years old served in special education programs, by type of handicap: I976-77 to 1986-87
41.	Percentage distribution of handicapped persons 3 to 21 years old receiving special education services, by educational environment: 1984-85
42.	Special education teachers employed in public elementary and secondary schools, and pupil-teacher ratios, by type of handicapped pupils taught: 1976-77 to 1984-85
43.	State legislation on gifted and talented programs and number of students receiving services in public elementary and secondary schools, by State: 1986-87
44.	Enrollment in grades 9 to 12 in public and private schools compared with population 14 to 17 years of age: 1889-90 to fall 1986

High	School Seniors, Completions, and Dropouts
77.	High school graduates compared with population 17 years of age: 1869-70 to 1986-8798
78.	General Educational Development (GED) credentials issued, by age of recipient: 1974 to 198699
79 <i>.</i>	Public high school graduates, by State: 1969-70 to 1987-88

80.	High school dropouts among persons 14 to 34 years old, by age, race/ethnicity, and sex:
	October 1970, 1975, 1980, and 1986
Educ	cational Achievement
81.	National Assessment of Educational Progress in reading for ages 9, 13, and 17, by selected characteristics of participants: 1974-75, 1979-80, and 1983-84
82.	Percent of students at or above selected reading proficiency levels, by race/ethnicity and age: 1970-71 to 1983-84
83.	Percent of students writing at a minimal level or better, by sex and race/ethnicity, by age: 1974, 1979, 1984
84.	Writing performance of 4th, 8th, and 11th graders, by selected characteristics of students: 1984
85.	Student values and attitudes toward writing, by grade level: 1984
86.	National Assessment of Educational Progress in mathematics for ages 9, 13, and 17, by selected characteristics of participants: 1977-78 and 1981-82
87.	National Assessment of Educational Progress in science for ages 9, 13, and 17, by assessment area and selected characteristics of participants: 1976-77 and 1981-82
88.	Scholastic Aptitude Test score averages for college-bound high school seniors, by sex: 1966-67 to 1986-87
89.	Scholastic Aptitude Test score averages, by race/ethnicity: 1975-76 to 1986-87
90.	Scholastic Aptitude Test score averages, by class rank and sex: 1975-76 to 1985-86
91.	Scholastic Aptitude Test score averages, by intended area of study: 1977-78 to 1986-87
92.	Scholastic Aptitude Test score averages, by State: 1974-75 to 1986-87111
93.	American College Testing (ACT) score averages, by sex: 1970 to 1987
94.	Average number of Carnegie units earned by high school graduates, by area of study and selected student and school characteristics: 1982
95.	Average number of Carnegie units earned in vocational courses by high school graduates, by selected student characteristics and area of study: 1982

Student Activities and Behavior

96.	High school courses taken by persons age 16 and over, by sex, race, and age: Spring 1984
97.	Participation of high school seniors in extracurricular activities, by selected student characteristics: 1972 and 1982
98.	Incidence of student infractions and disciplinary actions and changes in amount of classroom disruption in public secondary schools, by school characteristics: 1983-84
99.	Teacher perceptions of changes in disruptive student behavior, by school characteristics: 1986-87
100.	Percent of teachers rating selected factors as limiting their ability to maintain order, by school level and metropolitan status: 1986-87
101.	Trends in drug use among high school seniors, by type of drug and frequency of use: 1975 to 1986
State	e Regulations
102.	Ages for compulsory school attendance and compulsory provision of services for special education students, by State: 1987
103.	Average number of days per school year, classes per day, hours of class per day, and minutes per class in public high schools, by selected school characteristics: 1984-85
104.	Carnegie units required for high school graduation, by State: 1980 and 1987
105.	States using minimum-competency testing, by government level setting standards, grade levels assessed, and expected uses of standards: November 1985
106.	States requiring testing for initial certification of teachers, by authorization, year enacted, year effective, and test used: April 1987
Reve	nues and Expenditures
107.	Revenues for public elementary and secondary schools, by source of funds: 1919-20 to 1985-86
108.	Revenues for public elementary and secondary schools, by source and State: 1985-86
109.	Revenues for public elementary and secondary schools, by source and State: 1984-85
110.	Summary of expenditures for public elementary and secondary education, by purpose: 1919-20 to 1979-80
111.	Current expenditures for public elementary and secondary education, by State: 1959-60 to 1987-88
112.	Current expenditures for public elementary and secondary education, by function and State: 1985-86

166.	Earned degrees conferred by institutions of higher education, by level of degree and sex of student: 1869-70 to 1989-90
167.	Earned degrees conferred by institutions of higher education, by level of degree and State: 1984-85 and 1985-86
168.	Associate degrees conferred by institutions of higher education, by type of curriculum: 1973-74 to 1985-86
169.	Associate degrees and 1- to 4-year awards, by length and type of curriculum: 1982-83 to 1985-86
170.	Associate degrees and other subbaccalaureate awards, by length and type of curriculum and sex of student: 1985-86
171.	Associate degrees and other subbaccalaureate awards, by length and type of curriculum and sex of student: 1984-85
172.	Bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of student and field of study: 1985-86
173.	Bachelor's, master's, and doctor's degrees conferred by institutions of higher education, by sex of student and field of study: 1984-85
174.	Bachelor's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1985-86
175.	Master's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1985-86
176.	Doctor's degrees conferred by institutions of higher education, by discipline division: 1970-71 to 1985-86
177.	Degrees conferred by institutions of higher education, by control of institution, level of degree, and discipline division: 1985-86

178.	Number of institutions of higher education conferring degrees, by level of degree and discipline division: 1985-86
179.	First-professional degrees conferred by institutions of higher education, by sex of student, control of institution, and field of study: 1981-82 to 1985-86
180.	First-professional degrees conferred in dentistry, medicine, and law, by sex: 1949-50 to 1985-86
181.	Associate degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1984-85
182.	Bachelor's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1984-85
183.	Bachelor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1984-85
184.	Master's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1984-85
185.	Master's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1984-85
186.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group and sex of student: 1976-77 to 1984-85
187.	Doctor's degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1984-85
188.	First-professional degrees conferred by institutions of higher education, by racial/ethnic group, major field of study, and sex of student: 1984-85
189.	Earned degrees in architecture and environmental design conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
190.	Earned degrees in business and management conferred by institutions of higher education, by level of degree and sex of student: 1955-56 to 1985-86
191.	Earned degrees in communications conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
192.	Earned degrees in computer and information sciences conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
193.	Earned degrees in education conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86

194.	Earned degrees in engineering conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
195.	Earned degrees in English and literature conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
196.	Earned degrees in modern foreign languages conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
197.	Earned degrees in French, German, and Spanish conferred by institutions of higher education, by level of degree: 1949-50 to 1985-86
198.	Earned degrees in health professions conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
199.	Earned degrees in the life sciences conferred by institutions of higher education, by level of degree and sex of student: 1951-52 to 1985-86
200.	Earned degrees in mathematics conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
201.	Earned degrees in the physical sciences conferred by institutions of higher education, by level of degree and sex of student: 1951-52 to 1985-86
202.	Earned degrees in chemistry, physics, and electrical engineering conferred by institutions of higher education, by level of degree: 1949-50 to 1985-86
203.	Earned degrees in psychology conferred by institutions of higher education, by level of degree and sex of student: 1949-50 to 1985-86
204.	Earned degrees in public affairs and services conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
205.	Earned degrees in social sciences conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
206.	Earned degrees in economics, history, political science and government, and sociology conferred by institutions of higher education, by level of degree: 1949-50 to 1985-86
207.	Earned degrees in visual and performing arts conferred by institutions of higher education, by level of degree and sex of student: 1970-71 to 1985-86
208.	Statistical profile of persons receiving doctor's degrees, by field of study: 1985-86

202.	by field of study: 1984-85
210.	Doctor's degrees conferred by 60 large institutions of higher education: 1976-77 to 1985-86245
Outo	comes
211.	Colleges and universities offering remedial instruction or tutoring, by type and control of institution: 1980, 1984, and 1985
212.	Participation in higher education by the high school class of 1980, by attendance status, sex, race/ethnicity, socioeconomic status, and ability level: Fall 1980 to fall 1983
213.	Mean number of semester credits completed by bachelor's degree recipients, by major and course area: 1972 to 1976 and 1980 to 1984
214.	Highest level of education attained by 1980 high school seniors, by selected student and school characteristics: Spring 1986
215.	Highest level of education attained by 1980 high school seniors, by race/ethnicity and October 1980 postsecondary education attendance status: Spring 1986
216.	Highest level of education attained by 1980 high school seniors, by socioeconomic status and race/ethnicity: Spring 1986
217.	Changes in scores on Graduate Record Examination and professional school admission tests: 1964 to 1985
Stud	ent Charges and Student Financial Assistance
218.	Average undergraduate tuition and fees and room and board rates in institutions of higher education, by type and control of institution: 1964-65 to 1987-88
219.	Average undergraduate tuition and fees and room and board rates in institutions of higher education, by control of institution and State: 1986-87
220.	Percent of undergraduates receiving financial aid and average amount awarded per student, by type and source of aid and selected student characteristics: 1986-87
221.	Scholarship and fellowship awards of institutions of higher education, by control of institution: 1959-60 to 1985-86
222.	Pell Grant revenue of institutions of higher education compared to current-fund revenue and tuition, by type and control of institution: 1982-83 to 1985-86
Incor	me
223.	Current-fund revenue of institutions of higher education, by source: 1975-76 to 1985-86

224.	Current-fund revenue of public institutions of higher education, by source: 1975-76 to 1985-86
225.	Current-fund revenue of private institutions of higher education, by source: 1975-76 to 1985-86
226.	Revenue of institutions of higher education, by source of funds: 1919-20 to 1985-86
227.	Voluntary support for institutions of higher education, by source and purpose of support: 1949-50 to 1985-86
228.	Current-fund revenue of institutions of higher education, by control of institution and State: 1984-35 and 1985-86
229.	Current-fund revenue from State and local governments for institutions of higher education, by State: 1982-83 to 1985-86
230.	Current-fund revenue received from the Federal Government by the 100 institutions of higher education receiving the largest amounts: 1985-86
Ехре	enditures
231.	Current-fund expenditures and expenditures per full-time-equivalent student in institutions of higher education, by type and control of institution: 1970-71 to 1985-86

Introduction

In the fall of 1987, about 58.4 million persons were enrolled in American schools and colleges (table 1). About 3.4 million were employed as elementary and secondary school teachers and as college instructors. Other professional, administrative, and support staff of educational institutions numbered 3.5 million. Thus, in the fall of 1987, approximately 65 million Americans were involved, directly or indirectly, in providing or receiving formal education. In a Nation with a population of about 243 million, more than 1 out of every 4 persons participated in the educational process.

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s and peaked in 1971 (table 2). This enrollment rise was caused by the baby boom, a dramatic increase in the births following World War II. From 1971 to 1984 total elementary and secondary school enrollment decreased steadily, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in public elementary and secondary schools showed a small increase in the fall of 1985 (table 3). Enrollment in kindergarten through grade 8 rose from 27.0 million in fall 1985 to an estimated 28.0 million in fall 1987. Enrollment in the upper grades declined from 12.5 million to an estimated 12.2 million over the same period. This trend of increasing public school enrollments is expected to continue, but trends in elementary and secondary enrollments are expected to contrast sharply.

Fall 1985's increase in preprimary and early elementary enrollment indicates a new trend that will affect elementary and secondary schools for a number of years. Projections of the Center for Education Statistics (CES) indicate that public elementary school enrollment will continue to increase, reaching 29.4 million in 1990 and 30.7 million in 1995 (table 3). Between fall 1987 and fall 1990, elementary enrollment is projected to grow by 5 percent, while secondary school enrollment is expected to decline by 7 percent. The new wave of pupils will then begin to cause increases at the secondary school level. Annual increases in enrollment in grades 9 through 12 are expected for a number of years beginning in the early 1990s.

College enrollment in fall 1987 was estimated at 12.5 million—remaining at the record levels of the previous fall. Total college enrollment is not expected to change significantly between 1987 and 1990, despite decreases in the traditional "college-age" population (table 2). The number of persons in the 18- to 24-year-old age group peaked in 1981 and then began a decline that is expected

to continue throughout most of the next decade (table 13). However, recent trends suggest that total enrollment will remain relatively high because of the increased participation of older women students and also because of a high rate of college attendance for recent high school graduates. Although total enrollment may remain relatively stable, some shifts of students from full-time to part-time status are expected.

About 2.6 million elementary and secondary school teachers were engaged in classroom instruction in the fall of 1987 (table 4). This represents a small increase from the number of teachers employed a year earlier. The number of public school teachers in 1987 was about 2.3 million and the number in private schools was estimated at 0.4 million. About 1.5 million teachers were teaching in elementary schools, while about 1.1 million were employed at the secondary level (table 4).

Overall, the trend over the past 10 years has been for the number of public school teachers to remain relatively stable, while enrollment has declined. The result has been a continuing decrease in the pupil-teacher ratio. In the fall of 1987 there were 17.7 pupils per teacher compared with 19.7 pupils per teacher 10 years earlier. The declining pupil-teacher ratio reflects the trend toward smaller classes and more specialized education programs (table 51).

Teacher salaries, which lost purchasing power to inflation during the 1970s, began to rise faster than the inflation rate in the 1980s. The rising salaries reflect both an interest of State and local education agencies in boosting teacher salary schedules and the increasing experience and education levels of teachers (table 54). According to data from the National Education Association, the value of teachers' salaries, after adjustment for inflation, rose about 17 percent between 1980-81 and 1986-87. The average salary for teachers in 1986-87 was \$26,551, and the average salary increase over the previous year was more than twice the inflation rate (table 57).

Some improvements have been registered in the area of reading proficiency of elementary and secondary school students. Reading proficiency of 9-, 13-, and 17-year-olds rose between 1970-71 and 1983-84 (table 81). In 1970-71, 58 percent of the 9-year-olds read at or above the basic level, compared to 64 percent in 1983-84. Although the reading proficiency of minority children remains below that of other students, blacks have made very large gains. For example, the proportion of black 9-year-olds reading at a basic level or above rose from 22 percent in 1970-71 to 39 percent in 1983-84. Also,

23

scores on the Scholastic Aptitude Test (SAT), administered by the College Board, have risen in recent years. After a decline during the 1970s, the combined mathematics and verbal SAT scores increased 16 points between 1980-81 and 1984-85 (table 88). In 1985-86 and 1986-87, there was no increase in the combined SAT scores. Despite some evidence that achievement has risen in recent years, there is still reason for concern. A 1982 international mathematics test highlighted the relatively low level of achievement of U.S. high school seniors compared to their peers in other countries (table 290). A major study of writing achievement found that even 11th grade students had considerable difficulty with analytic writing assignments (table 83).

The number of high school graduates in 1985-86 totaled over 2.6 million. About 2.4 million graduated from public schools and about 0.3 million graduated from private schools. The number of high school graduates has been declining since its peak in 1977, when 3.2 million persons earned their diplomas. Although the number of graduates has been lower in recent years, the proportion of 17-year-olds graduating from high school increased during the early 1980s. However, between 1983-84 and 1986-87, there was a slight dip in the proportion of young people graduating from high school (table 77).

The number of postsecondary degrees to be conferred during the year 1987-88 is estimated to be: 424,000 associate degrees; 989,000 bachelor's degrees; 290,000 master's degrees; 33,500 doctor's degrees; and 74,400 first-professional degrees. The number of bachelor's degrees is expected to be at or near an all-time high. The other figures are down slightly from their peaks, reached in 1983 (associate); 1977 (master's); 1985 (first-professional); and 1973 (doctor's) (table 166).

The Bureau of the Census has collected annual statistics on the educational attainment of the population in terms of years of school completed. These data indicate that between 1970 and 1986 the proportion of the adult population 25 years of age and over with 4 years of high

school or more rc se from 55 to 75 percent. The percent of adults with at least 4 years of college increased from 11 to 19 percent over the same time period (table 8).

Expenditures for public and private education from preprimary through graduate school totaled about \$269 billion in 1985-86, and preliminary estimates indicate that they will reach \$309 billion in 1987-88 (table 24). The expenditures of elementary and secondary schools are expected to total about \$185 billion for 1987-88, while institutions of higher education will spend about \$124 billion. The outlays of public schools and colleges are expected to reach \$251 billion, while the privately controlled institutions are expected to spend about \$58 billion. Viewed in another context, the total expenditures for education during recent years has amounted to nearly 7 percent of the gross national product and is expected to remain at that same level in 1987-88 (table 23).

The statistical highlights in this section of the report provide a quantitative description of the current American education scene. It is clear from the large number of participants, the number of years that people spend in school, and the vast sums expended by educational institutions that the American people have a high regard for education. The increase in graduation ratios, reading proficiency, and SAT scores suggest that some improvements in learning have been made in recent years.

Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Although many of the surveys conducted by the Center are complete, census-type surveys, all surveys are subject to design, reporting, and processing errors, and errors due to nonresponse. More informa. on survey methodologies can be found in the Guide to Sources.

CHAPTER 1

All Levels of Education

The purpose of this chapter is to provide a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and higher education and from the general population to present a composite picture of the American educational system. It contains tables which show the total number of persons enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. The chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population, illiteracy, and opinions about schools. Economic indicators and price indexes have been added to assist researchers in preparing comparative analyses.

Figure 1 provides a graphic presentation of the structure of education in the United States. The right side of the chart indicates the three levels of education (elementary, secondary, and postsecondary); the left gives the approximate age of persons at each level. As the chart indicates, pupils ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 or 2 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in high school. Pupils normally complete the entire program through grade 12 by age 17 or 18.

High school graduates may enter a 2-year college, a technical institution, a 4-year college or university, or a professional school. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal-vocational programs. Academic courses completed at a 2-year college are transferable for credit at 4-year colleges and universities. A technical institution offers postsecondary technical training leading to a specific career.

An associate degree requires at least 2 years of collegelevel work, and a bachelor's degree normally can be earned in 4 years. At least 1 year beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in requirements for admission and in length of programs. Medical students, for example, generally complete a 4-year program of premedic studies at a college or university before they can enter the 4-year program at a medical school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the Center for Education Statistics. In addition, substantial contributions have been drawn from the work of other groups, both government and nongovernment, as indicated in the source notes of the appropriate tables. Information on survey methodologies can be found in the Guide to Sources in the Appendix and in the publications cited in the source notes.

Highlights

- In the fall of 1985, total elementary and secondary school enrollment increased for the first time since 1971. This increase was concentrated in the lower elementary grades. The pattern of enrollment growth at the elementary level and of enrollment declines at the secondary school level is expected to continue for several years. Between 1987 and 1990, public elementary enrollment is expected to rise 5 percent, while public secondary enrollment is expected to fall by 7 percent. Overall, enrollment is expected to increase by 0.6 million students or about 1 percent. (Table 2)
- Over the past 10 years there has been a slight increase in the proportion of students in private schools and colleges. Between 1977 and 1987, the proportion of elementary and secondary school students in private schools rose from 11 percent to 12 percent. At the same time, the proportion of college students in private institutions rose from 22 percent to 23 percent. (Table 2)
- College enrollment rose to a record level in fall 1986 and remained at this high level in 1987. College enrollment is expected to remain steady through 1990 because of the continuing increases in the attendance rates of certain age groups. Some decline in college enrollment is ...pected in the early 1990s because of the shrinking numbers of 18- to 24-year-olds. (Tables 3 and 6)
- The proportion of certain age groups attending school has risen dramatically over the past two decades. In 1986, about 39 percent of 3- and 4-year-olds attended school compared to only 12 percent in 1966. The proportion of 30- to 34-year-olds attending college doubled from 3 to 6 percent. (Table 6)
- Increases in the amount of education completed by Americans continued in 1986. In 1986, 75 percent of the population 25 years old and over had completed high school and 19 percent had completed 4 years of college. This represents a significant increase from

1975 when 62 percent had completed high school and 14 percent had 4 years of college. (Table 8)

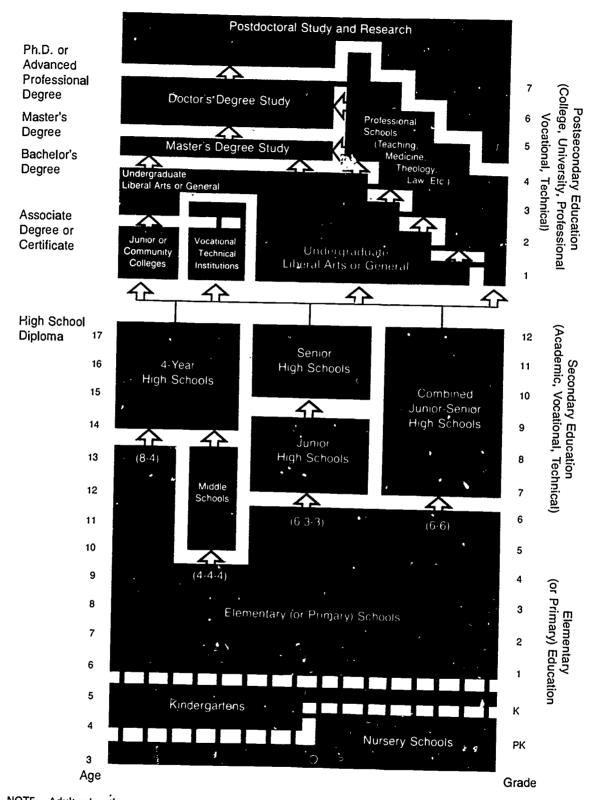

- About 15 percent of persons over 18 had completed a bachelor's or higher degree in 1984. More than 3 percent held a master's degree, 1 percent held a professional degree (e.g., medicine or law), and 0.5 percent held a doctor's degree. (Table 11)
- Between 1970 and 1985 there were substantial shifts in the composition of families. In 1970, 50 percent of families were married-couple families with children under 18 compared to 39 percent in 1985. In contrast, the proportion of families headed by women (no husband present) who had children under 18 rose from 6 percent to 10 percent. Altogether, more than 1 out of 5 children under 18 lived with one parent in 1985. (Tables 16 and 17)
- According to results of a nationwide survey, Americans have rated public schools more favorably in recent years. Those surveyed felt that the two larges problems facing schools were drugs (30 percent) and discipline (22 percent). (Tables 13 and 20)
- A 1987 survey asked parents and teachers to name activities that would "help a lot" to improve educa-

Ą

- tion. The activities most frequently mentioned by parents were: 1) having the school notify the parents immediately about any problems involving their child; 2) having parents limit television until all homework is finished; 3) providing counseling and support services to children with emotional, mental, social, or family problems. (Table 22)
- The proportion of State and local government funds spent on education declined between 1970 and 1985 because of the drop in elementary and secondary enrollment and the expansion of other services. Elementary and secondary schools are expected to spend about 60 percent of this total and colleges and universities are expected to account for the remaining 40 percent. (Table 28)
- Education expenditures are expected to rise to a record high of \$309 billion in the 1987-88 school year. Elementary and secondary schools are expected to spend about 60 percent of this total and colleges and uni versities are expected to account for the remaining 40 percent. Approximately 6.8 percent of the gross national product is spent by elementary and secondary schools and colleges and universities. (Tables 23 and 24)

Table 1.—Estimated number of participants in elementary and secondary education and in higher education: Fall 1987

(In millions)

Participants	All levels (elementary,	Elemer	schools	land a	
rancipants	secondary, and higher education)	Total	Public	Private	Institutions of higher education
1	2	3	4	5	6
Total	65.2	50.7	44.5	6.3	14.5
inrollment ²		45.9 2.6 2.2	40.2 2.3 2.0	5.7 0.4 0.2	³12.5 ⁴0.7 1.3

Includes colleges and universities, but excludes noncollegiate postsecondary institutions.

²Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Elementary and secondary includes most kindergarten and some nursery school enrollment. Excludes preprimary enrollment in schools that do not offer first grade. Higher education comprises full-time and part-time students enrolled in degree-credit and nondegree-credit programs in universities, other <-year colleges, and 2-year colleges.

Preliminary data.

Includes full-time and part-time faculty with the rank of instructor or above.

NOTE. - The enrollment figures include all students enrolled in elementary and secondary schools and in colleges and universities. The data for teachers and other staff in public and private elementary and secondary schools are reported in terms of full-time equivalents. The staff data for institutions of higher education include all professional, administrative, and support personnel. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, Center for Education Statistics, unpublished projections and estimates. (This table was prepared January 1988.)

Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, these totals may differ from figures shown in other tables, and direct comparisons

NOTE. — Elementary and secondary enrollment includes pupils in local public school systems and in most private schools (religiously affaiated and nonsectarian), but generally excludes

pupils in subcolleg-ete departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Elementary enrollment includes a relatively small number of prekindergarten pupils. Higher education enrollment includes students in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Some data have been revised from previously published figures. Secause of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; Statistics of Public Elementary and Secondary School Systems; Statistics of Nonpublic Elementary and Secondary Schools; academic year and fall reports on enrollment in institutions of higher education; and Center for Education Statistics, "Common C "e of Data" and "Fall Enrollment in Colleges and Universales" surveys; and unpublished projections. (This table was prepared May 1988.)

with earlier years should be avoided.

**Dets for 1869-70 through 1949-50 include resident degree-credit students enrolled at any time during the academic year. Data for the years 1959 through 1996 include all resident and exten sion students enrolled at the beginning of the fall term.

*Estimated,

*Higher education enrollment data are preliminary.

^{*}Based on "Early Estimates" surveys,

Projected.

⁻ Data not available.

^{*}Preliminary data.

*Includes teachers in local public school systems and in most private schools (religiously afflicted and nonsectarian). Excludes subcullegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Teachers are reported in terms of full-time equivalents.

³Estimated on the basis of enrollment.

NOTE.—Some data have been revised from previously published figures.

SOURCE U.S. Department of Education, Center for Education Statistics, "Common Core of Data;" and unpublished projections. (This table was prepared January 1988.)

^{*}Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Excludes teaching assistants.

Estimates based on retrojection, by the Bureau of the Census, of 1940 census data on education

NOTE. — Data for 1975 and subsequent years are for the noninstitutional population. Some data have been revised from previously published figures.

SOURCE. U.S. Department of Commerce, Bureau of the Census, U.S. Cansus of Population. 1960, Vol. 1; Current Population Reports, Series P-20; Series P-19, No. 4; 1960 Census Monograph, Education of the American Population, by John K. Folger and Charles B. Nam, and unpublished data. (This table was prepared August 1987.)

by age.

Persons of Hispanic origin are included, as appropriate, in the white or in the black and other races" category.

¹Civilian noninstitutional population.
²Includes persons of Hispanic origin.
³Persons of Hispanic origin may be of any race.

— Pata not available.

NOTE. — Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 people are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations. Because of rounding, details may not add to totals.

SOURCE U.S. Department of Commerce, Bureau of the Census, "Current Population Survey," unpublished data. (This table was prepared September 1987.)

Data for private elementary and secondary schools are estimated. Total expenditures for colleges and universities include current fund expenditures and additions to plant value. Excludes expenditures of noncollegiate postsecondary

institutions. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

'Some private elementary and secondary school revenues come from Federal, State, and local sources. However, comprehensive data are not available to delineate the sources of revenues for private schools.

NOTE — Estimates of expenditures by source of funds are derived from data collected on revenue sources. Federally supported student aid that goes to higher education institutions through students' tuition payments is shown under "All other" rather than "Federal." Such payments would add substantial amounts and several percentage points to the Federal share. For example, approximately \$6.8 billion was spent on financial aid through students in 1983-84, which amounts

to about 3 percent of total education expenditures for that year. Other Federal programs, not included in this table because they do not support regular educational institutions, would increase the Federal share even further. Typical examples of these payments would be Federal support for libraries and museums. Additionally, the Federal contribution to education through tax expenditures is not reflected in this table. Because of rounding, details may not add to totals.

'Data for years prior to 1983 include expenditures for government fiscal years ending during that particular calendar year. Data for 1983 and later years are the aggregations of expenditures for government fiscal years which ended on June 30 of the stated year. General expanditures exclude expenditures of publicly owned utilities and liquor stores, and of insurence-trust activities. Intergovernmental payments between State and local governments are excluded. Payments to the Federal Government are included.

Population of the United States including Armed Forces overseas; includes Alaska and Hawaii beginning 1980. Annual data are for July 1 through 1968 and are averages of quarterly data beginning 1959. Quarterly data are averages for the period.

- Data not available.

NOTE. - Some data have been revised from previously published figures.

CHAPTER 2

Elementary and Secondary Education

Growing concern about the quality of education in elementary and secondary schools has prompted careful examinations of student learning experiences. Results from a number of achievement tests have highlighted the mediocre performance of students in mathematics, reading, and writing. Moreover, minority students have scored much lower than the average in these important areas. Other analyses have focused on the resources and outcomes of education institutions. The evaluation of these issues has caused increased information needs that are only partially met by available data.

This chapter contains a variety of statistics on public and private elementary and secondary education. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations.

The Center conducts annual surveys of public school statistics and periodic surveys of teacher characteristics and private schools. The "Common Core of Data" is a survey of public elementary and secondary school and school district data available through administrative records of State education agencies. Each State provides summary data on enrollment, staff, revenues, and expenditures. In addition, listings and selected statistics of school districts and schools are obtained. National and State summary statistics from the "Common Core of Data" have been published annually in the *Digest*, and in a series of reports and bulletins.

For many years the Center published comprehensive statistics on the organization, staff, pupils, and finances of public schools in the biennial report, *Statistics of State School Systems*. This publication was discontinued after 1975-76, but it is still cited in many of the historical tables in this chapter.

The Center has also conducted periodic surveys of private elementary and secondary schools for many years. Summary statistics on enrollments, teachers, and schools were collected in the "1985-86 Survey of Private Schools." Additional information on private schools has been made available by the National Catholic Educational Association.

Other recurring reports of the Center which have appeared from time to time are the studies of preprimary education and of offerings and enrollments in high school subjects. The most recent statistics in these areas are summarized in the tables which follow.

This chapter of the *Digest* also utilizes data on student achievement from the National Assessment of Educational Progress; on public school enrollment by race or

ethnicity from the Office for Civil Rights, U.S. Department of Education; on the characteristics, subjects taught, and average salaries of public school teachers from the National Education Association; on mandatory ages of attendance, graduation requirements, and minimum competency testing for students and teachers from the Education Commission of the States; and on the Scholastic Aptitude Test scores of college-bound high school seniors from the College Entrance Examination Board.

The Center is developing a new plan to expand the coverage of its elementary and secondary statistical program. This new survey system will provide more information on the finances of elementary and secondary schools and will allow cross comparisons of teacher, student, and school characteristics. For example, the linking of student performance with teacher and school characteristics may provide the data for a systematic study of successful school environments.

Comparisons of the income and employment of high school graduates and dropouts, and college enrollment of high school graduates are in Chapter 5. Tabulations of international data are in Chapter 6. Additional information on public school libraries and the use of microcomputers in public and private schools is tabulated in Chapter 7 of this report. Further information on survey methodologies can be found in the Guide to Sources in the Appendix.

Highlights

- In fall 1985, public elementary and secondary school enrollments inc. ased for the first time since 1971.
 Enrollment co. ed to increase 0.8 percent in 1986 and 0.9 per in 1987. (Tables 2 and 32)
- In contrast to the declining elementary and secondary school enrollments during the 1970s and early 1980s, there was substantial enrollment growth in preprimary education. Between 1970 and 1980, preprimary enrollment rose by 19 percent. From 1980 to 1985, preprimary enrollment increased an additional 20 percent. Another important aspect of the increasing participation of young children in preprimary schools is the rising proportion in full-day programs. In 1985 about 37 percent of the children attended school all day compared to 17 percent in 1970. (Table 38)
- Despite drops in total elementary and secondary school enrollment during the late 1970s and early 1980s, in-

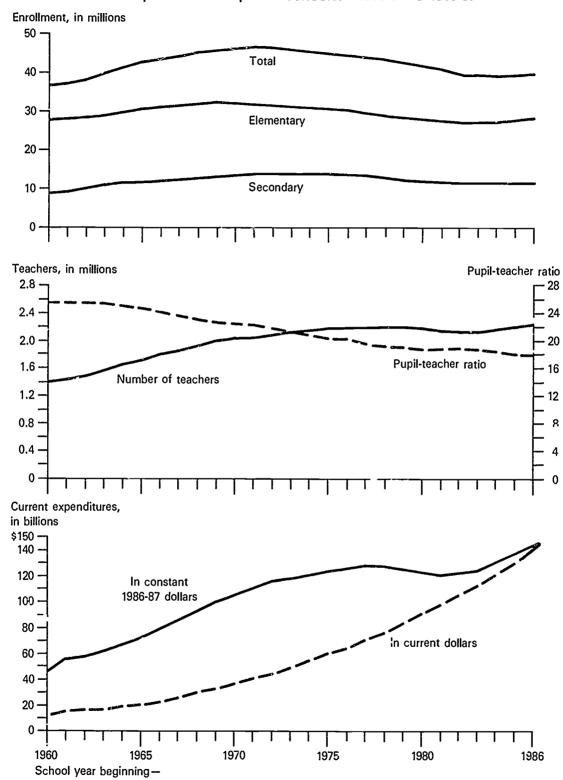

creasing numbers of children were served in programs for the handicapped. In 1976-77, about 8 percent of children were served in these programs compared to 11 percent in 1986-87. Most of this increase may be attributed to the proportion of children who were identified as learning disabled, which rose from 2 percent of all children in 1976-77 to 5 percent of all children in 1986-87. (Table 40)

- Of the 404,000 full-time and part-time private school teachers in 1985-86, about 76 percent were women.
 About 62 percent of the teachers were under age 40.
 Ninety-five percent of the private school teachers had a bachelor's degree or above. (Table 47)
- About one-third of all private schools had a basic tuition (excluding discounts) of more than \$1,500 in 1985-86. There was considerable variation in the tuition charges by different types of schools. Catholic schools tended to charge the least, with 12 percent over \$1,500. Schools with no religious orientation charged the most with 80 percent charging over \$1,500 per year. (Table 48)
- During the 1970s and early 1980s, public school enrollment decreased. For most of this time period the number of teachers was rising. As a result, the pupil-teacher ratio declined markedly. Between 1970 and 1980, the pupil-teacher ratio for public schools fell from 22.3 to 18.8. After 1980, the number of pupils per teacher continued downward, reaching 17.7 in 1987. (Table 51)
- Teachers have expressed more satisfaction with their jobs in recent years. About 85 percent of teachers felt satisfied with their jobs in 1987 compared to 81 percent in 1984. (Table 55)
- The average salary for public scitool teachers has grown rapidly in recent years, reaching \$26,551 in 1986-87. After adjustment for inflation, teachers' salaries rose 17 percent between 1980-81 and 1986-87, recouping the losses in purchasing power suffered during the 1970s (Table 57)
- The number of nonteaching staff employed by public schools has grown at a faster rate than the number of pupils and teachers. In 1969-70, there were 13.5 pupils per staff member (total staff) compared to 9.4 pupils per staff member, total staff in 1986. During the same time period, the proportion of the total staff who were teachers declined from 60 percent to 53 percent. (Table 61)

- Comparisons of the number of public and private high school graduates and the 17-year old population suggest that a larger proportion of young people are graduating from high school than 20 or 30 years ago. At its highest point in 1968-69, there were 77.1 graduates for every 100 persons 17 years of age. This ratio generally declined throughout the 1970s, falling to a low point of 71.4 percent in 1979-80. The graduation ratio then rose, reaching 73.7 percent in 1983-84. The ratio has remained around 73 percent since then. (Table 77)
- Students at ages 9, 13, and 17 were reading better in 1984 than they were in 1971. The improvements in the achievement of minority and disadvantaged urban students between 1971 and 1984 have reduced the gap between their performance and that of other students. However, the average reading proficiency of black and Hispanic 17-year-olds is only slightly higher than that of white 13-year-olds. (Tables 81 and 82)
- Between 1975-76 and 1985-86, combined verbal and mathematics SAT scores increased by 3 points. However, there was considerable diversity among students from different class ranks. Scores for males who were in the top tenth of their class declined by 8 points during this period. In contrast, males who were in the lowest fifth of their class increased their scores by 44 points. This pattern was similar for other groups, with students from the highest class ranks showing decreases or smaller increases than students from the lower class ranks. (Table 88 and 90)
- The proportion of public and private high school seniors who had ever used an illicit drug rose from 55 percent in 1975 to 65 percent in 1981. After 1981 the proportion of seniors who had ever used drugs fell. In 1986, about 58 percent of students said they had used illicit drugs, including 17 percent who had used cocaine. (Table 101)
- States are the most important funding source for public elementary and secondary schools. In 1985-86, 49 percent of all revenues came from State sources, 44 percent came from local sources, and 7 percent came from the Federal Government. (Table 197)
- The expenditure per student in public schools has risen significantly in recent years, even after allowing for inflation. In 1985-86, the average current expenditure per student in average daily attendance was \$3,752. This represents an increase of 20 percent since 1980-81, after adjustment for inflation. (Table 114)

¹Data on population and labor force are from the Bureau of the Census, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce, Population data through 1959-60 are based on total population from the decennial census. Beginning in 1969-70, population data are resident population, excluding armed forces overseas, as of July 1.

²Fall enrollment.

Data for 1870-71.

*Estimated by the Center for Education Statistics.

*Prior to 1919-20, data are for the number of different persons employed rather than number of positions.

*Because of the modification of the scope of current expenditures for elementary and seconds, schools, data for 1959-60 and later years are not entirely comparable with prior years.

Includes summer "Looks, community colleges, and adult education. Beginning in 1959-60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools.

*Excludes community colleges and adult education,

*Include: supervinors, principals, teachers, and other nonsupervisory instructional staff.

10 Estimated by tala National Education Association.

"Excludes current expenditures not allocable to pupil custs.

12 A.D.A. means average daily attendance in elementary and secondary schools.

13Includes interest on school debt.

"The expenditure figure used here is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

"Per-day rates derived by dividing annual rates by average length of term.

-Data not reported.

NOTE. - Kindergarten enrollment includes a relatively small number of nurser, school pupils. Because of round on details may not add to totals. Some data have been revised from previously published figures.

*Data have been revised from previo							Less than 0.05		<u>-</u> I	1				

Includes a relatively small number of prekindergarten pupils.

Figures are shown in normal progression and indicate enrollment in successive grades of the pupils who entered the first grade in fall 1975, including retarded and accelerated pupils. Because of retardation, school retention rates should not be calculated directly from first-grade enrollment.

"Included in "elementary ungraded."

"Included in "secondary ungraded."

NOTE. - Because of rounding, details may not add to totals

*Data have been revised from previously published figures. *Data not reported.

73

¹Data estimated by State education agencies. ²Includes a relatively small number of prekindergarten students. ³Includes imputation for nonreporting State.

^{*}Actual data.

*Beginning in 1983, data include students enrolled in public schools on Federal bases and other special arrangements,

^{*}Actual 1987 data include students enrolled in public schools on Federal bases and other special

arrangements.

*Baginning in 1986, data include State vocational/technical schools.

⁻Data not available

NOTE. - Some data have been revised from reviously published figures.

^{&#}x27;The U.S. total represents an undercount because prekindergarten enrollment

data are not reported by many States.

Data represent a count as of the 40th day of the term rather than the 100th day as reported in previous years. The 40th day counts tend to be slightly lower

than 100th day counts,

³Data include enrollment in State vocational/technical centers, which were not reported in previous years.

⁻Data not reported or not applicable.

SOURCE, U.S. Department of Education, Center for Education Statistics, Common Core of Data Survey, (Thic table was prepared October 1987.)

secondary schools, by grade and State: Fall 1986

- Data not available.

NOTE. — Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation, they are included in the table to nermit various types of aggregations. Enrollment data for 5-year-Glds include only those students in preprimary programs. Because of rounding, details may not add to totals.

Noncategorical Number of teachers employed	_	-	_	_	_	15,338	24,403	24, 138	_

The noncategorical designation was discontinued after 1983 84. Data for 1984 85 are not directly comparable to figures for previous years.

NOTE. — Teacher counts are based on reports from 49 States and the District of Columbia only (New Mexico did not report on special education personnel until 1984-85. Figures from U.S. Territories and the Bureau of Indian Affairs are not included). Totals for all conditions exceed sums for individual conditions because some special education teachers have not been categorized in some State reports. Teacher counts include those serving 0 to 21-year-old population, while participant counts refer only to the 3- to 21-year-old population.

SOURCE. U.S. Department of Education, Office of Special Education and Rehabilitative Services, Annual Report to Congress on the Implementation of Public Law 94-142, various years, and unpublished tabulations. (This table was prepared June 1987.)

Data not available.

^{&#}x27;Includes a relatively small number of secondary ungraded and postgraduate students.

NOTE - Includes enrollment in public schools that are a part of State and local school systems and also in most nonprofit-making private schools, both religiously

affiliated and nonsectarian. Excludes enrollment in subcollegiate departments of institutions of higher education, residential schools for exceptional children, and Federal schools. Because of rounding, details may not add to totals. Some figures have been revised from previously published data.

*Includes special education				olo NOT	F. Tahulatus					

^{&#}x27;Includes special education, vocational/technical, and alternative schools.

²Data represent an undercount of approximately 5 percent because some schools were not included in the survey universe.

Data not available.

NOTE. - Tabulation includes only schools which offer first grade or above.

SOURCE. U.S. Department of Education, Center for Education Statistics, "Private Elementary and Secondary School Universe" survey. (This table was prepared May 1986.)

'Estimated.					by level is determ	nined by reporting	units. Kindergarten	includes a relative	ly small number of	

¹Estimated. ³Data have been revised from previously published figures.

³Proliminary.

*Projected.
- Data not available.

NOTE. — Data for teachers are expressed in full-time equivalents. Distribution of unclassified teachers by level is estimated. Distribution of elementary and secondary school teachers

by level is determined by reporting units. Kindergarten includes a relatively small number of nursery school teachers and students. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, National Center for Education Statistics. Statistics of Public Elementary and Secondary Day Schools; Center for Education Statistics, "Common Core of Data" survey and Projections of Education Statistics, unpublished tabulations. (This 'able was prepared May 1988.)

⁻ Data not reported.

²Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

Data for most years are partly estimated.

^{*}This figure is from a sample survey and should not be compared directly with the data for earlier years.

*Because of expanded survey coverage, data are not directly comparable to

figures for earlier years.

Data not available.

NOTE. - Enrollments and numbers of schools should be regarded as approximations only. These totals differ from those in other tables because this table represents data reported by school districts rather than by States. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, Center for Education Statistics, "Common Core of Data" survey. (This table was prepared April 1988.)

'Derived from Current Population Reports, Senes P 25, of the Bureau of the Census, U.S. Department of Commerce.

²Includes graduates of public and private schools.

³Data for 1929-30 and preceding years are from Statistics of Public High Schools end exclude graduates of high schools which failed to report to the Office of Education.

4For most years, private school data have been estimated based on periodic private school surveys. For years through 1957-58, private includes data for sub-collegiate departments of institutions of higher education, and residential schools for exceptional children.

*Data have been revised from previously published figures.

Estimated.

-Data not available.

NOTE. - includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some of the figures have been revised slightly since originally published.

^{&#}x27;Data estimated by State' education agencies.

NOTE .- Data include graduates of regular day school programs, but exclude graduates of other programs and persons receiving high school equivalency certificates. They also exclude graduates of subcollegiate departments of institutions of higher education, Federal schools for American Indians and on Federal installations, and residential schools for exceptional children.

SOURCE, U.S. Department of Education, Co. or for Education Statistics, "Common Core of Data" survey. (This table was prepared January 1988.)

^{*}National total includes estimate for nonresponding State.

Actual data.

Data not reported.

^{*}Revised from previously published data.

^{*}Beginning in 1983-84 graduates from adult programs are excluded. Actual 1986-87 data; excludes graduates from adult programs.

⁻Data not available.

SOURCE: U.S. Department of Education, Na , nal Institute of Education, National Assessment of Educational Progress, The Reading Report Card. (This table was prepared May 1986.)

The 4 items for the scale were. (1) newspaper subscription, (2) magazine subscription, (3) more than 25 books in home, and (4) encyclopedia at home.

³Students in this group attend schools in communities with a population under 10,000 where most of the residents are farmers or farm workers.

Students in this group attend schools in or around cities with a population greater than 200,000 where a high proportion of the residents are on welfare or are not regularly employed.

^{*}Students in this group attend schools in or around cities with a population greater than 200,000 where a high proportion of the residents are in professional or managerial positions.

⁻Data not available.

NOTE.—The NAEP scores have been evaluated at certain performance levels. A score of 300 tadept) implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 (intermediate) implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 (basic) implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 in plies an ability to follow written directions and select phrases to describe pictures.

1984.	75.1	70.6	79.5	76.4	68.4	76.2

Standards for minimal performance level differ by grade level.

NOTE.—Five levels of proficiency were defined for each task: non-rateable, unsatisfactory, minimal, adequate, and elaborated. Non-rateable responses included those that were blank, off task, and unreacable. Unsatisfactory responses were those that failed to reflect a bease understanding of the purpose of the writing. Minimal responses recognized the elements needed to complete the task, but were not managed well enough to ensure that the intended purpose

of the writing was achieved. Adequate responses included the features critical to accomplishing the purpose of the writing and were likely to have the intended effect. Elaborated responses went beyond the merely adequate, reflecting a higher level of coherence and elaboration.

SOURCE, U.S. Department of Commerce, Bureau of the Census, Current Population Reports, Series P-70, No. 11, Educational Background and Economic Status: Spring 1984. (This table was prepared October 1987.)

^{*}Socioeconomic status was measured by a composite score on parental education, family

income, father's occupation and household characteristics.

*Includes courses in academic and other areas.

^{*}Less than 0.05 credit.

NOTE, - The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1 year course. Because of rounding, details may not add to totals.

^{*}Ages 7 to 16 or high school graduation.

*Mandates services for deaf, blind, deaf-blind, and autistic children from birth; mandates services for orthopedically impaired, severely mentally handicapped, and trainable mentally handicapped from age 3.

³Must have parental signature for leaving school between ages of 16 and 18.

⁴May leave after completion of eighth grade.

Wir phase in mandated services for 3-year-old developmentally disabled children by 1988.

The ages are 6 to 17 for New York City and Buffalo.

Services for birth to 2-year-old handicapped children are provided by the State Human Services Department.

^{*}Mandates services for deaf-blind and "failure to thrive" from birth.

[&]quot;Services mandated from 4 years, 7 months.

1ºPermits parental waiver of kindergarten at age 5.

1'Mandates services for vision impaired and hearing impaired from age 4.

^{127/}Just complete academic year in which 16th birthday occurs.

¹³Mandates services for visually impaired, hearing impared, and deaf-blind from birth.

Social Services Department.

Legislation in 1983 called for development of a minimum course of study and criteria for high school graduation standards and for grade-to-grade promotion. Local school districts were to implement standards.

*Local option.

*A new program of State testing for grade 4 began in 1985 and expanded to grades 6 and 8 in 1996. The 9th grade State proficiency test, begun in 1990, was administered for the final

Beginning in fall 1985, 3rd grade students had to demonstrate acceptable performance on criterion-referenced tests in math and reading before promotion to the 4th grade. Beginning us. 1988-89 school year, students must pass school readiness test to be eligible for first grade. *Students have three options: paper and pencil test; performance test; or course. First time

taken (Grade 9) must be paper and pencil test.

*The Kansas Minimum Competency Assessment (MCA) was reestablished by 1984 legislative action (SB 473). The MCA will be in effect for 5 school years, 1984-85 through 1988-89.

*Legislation + 1984 required the State superintendent to recommend process of using test results for promotion and graduation to the 1996 legislature.

*Grade 8 was added beginning with 1996-87 school year.

*Although first class assessed graduated in 1987, the first class required to pass for graduation will be the class of 1989.

19Students are tested in elementary, middle, and high school. Some local districts test at grades

other than 4, 8, and 12.

"Grades 3, 6, and 8 are given an annual standardized achievement test. Local school districts use the results as a diagnostic tool.

12Locally-based tests in the areas of English composition, math, and reading are required at least onc. - grades 1-4. Test in grades 5-8 and 9-11 will be implemented no later than 1989-90.

"Test was given in Oklahoma during the 1978-79 school year. There has been no followup to the program. However, a plan for Statewide testing was submitted for legislative action January

¹⁴The South Carolina Education Improvement Act of 1984 specified that the 11th grade test being used to gather baseline data be replaced in 1985-86 school year with an exit exam in the 10th grade. All students graduating in 1990 and after must pass the exam.

"Local districts use the State-designated tests at grades 3, 6, 8 for remediation and to advise

on grade retention. The Tennessee high school test, first taken at grade 9, is required for graduation.

*Texas HB 72 (1984) mandated the new testing program. New requirements became effective in 1985-86 school year.

¹⁷Vermont Basic Competency Program requires students to master the basics before they complete 8th grade.

NOTE. - Some States have dates for assessing the first high school graduating class but do not expect to use the results to determine whether students will graduate.

SOURCE, U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems; and Center for Education Statistics, "Common Core of Data" survey. (This table was prepared January 1988.)

^{*}Data revised from previously published figures,
*Data estimated by State education agencies,
*U.S. total includes CE3 imputations for nonreporting States.

^{*}Actual data.
*Includes an estimated \$144,942,000 for summer schools, adult education, and community colleges.
*Data no. reported.

NOTE. - Beginning in 1980-81, expenditures for State administration are excluded. Some data have been revised from previously published figures. Because of rounding, details may not add to totals.

CHAPTER 3

Postsecondary Education

A salient characteristic of postsecondary education in this country is its diversity. A great variety of types of colleges and universities offer a wide range of programs. For example, a junior college usually offers only the first 2 years of training at the college level, but a university normally offers a full undergraduate course leading to a bachelor's degree as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs which are designed to prepare students for specific careers. Other types of postsecondary education providers, such as community groups, churches, and businesses, offer learning opportunities to adults. This variety of institutions serves a wide scope of individual needs but poses many problems of coverage and definitions for researchers.

In recent decades, postsecondary education has become more accessible to all segments of the population. The growth of public junior colleges and low-cost institutions means that the expenses of students attending these institutions can be held to a minimum. Federal and other programs also have attracted many students to higher education who otherwise would have found it difficult to finance a college education. However, in recent years, student charges at colleges and universities have risen rapidly. This issue becomes more of a concern when viewed in the light of the declining traditional college-age population. This demographic change will have a considerable impact on the enrollment profiles and financial posture of many institutions.

The National Center for Education Statistics collects annual statistics on institutions of higher education to address these problems and other concerns about colleges and universities. The "Higher Education General Information Survey" (HEGIS) obtains data from each college and university on its enrollment; faculty and faculty salaries; degrees conferred; and finances, including revenues, expenditures, and property. Some of these data have been published in the annual reports Education Directory, Colleges and Universities and Fall Enrollment in Colleges and Universities. Other specialized reports on degrees conferred, faculty salaries, and revenues and expenditures have been issued from time to time. This chapter provides an overview of the latest statistics from the HEGIS surveys. It also predicts historical data that enable the reader to obserrange trends in American higher education. In it presents summary data from the Bureau of the Cen-

sus on the characteristics and the majors of college

students; and from the Equal Employment Oppcounity Commission on the race/ethnicity, academic rank, and sex of college faculty members.

The Center has undertaken a major expansion in data collection at the postsecondary level in a survey called "Integrated Postsecondary Education Data System" (IPEDS). This new study provides a comprehensive overview of postsecondary education by incorporating a survey system with a consistent set of definitions and survey forms for all types of postsecondary institutions. This new data set will be featured in future editions of the *Digest* and other Center publications.

In this edition of the *Digest*, data on the number of postsecondary institutions have been tabulated from the first of the IPEDS surveys. Additional data on post-secondary institutions from the triennial survey, "Participation in Adult Education," compare adult learning activities by demographic characteristics of participants. Data on price indexes and on the number of degrees held by the general population may be found in Chapter 1. Chapter 4 contains tabulations on Federal funding for postsecondary education. Information on employment outcomes for college graduates can be found in Chapter 5. Chapter 7 contains data on college libraries. Further information on survey methodologies can be found in the Guide to Sources in the Appendix.

Highlights

- College enrollment increased more than 40 percent between 1970 and 1980. Since 1980 enrollments have rise, more slowly. Between 1980 and 1987, enrollment increased about 4 percent from 12.1 million to a record 12.5 million. Most of this growth was in pat-time enrollment. Between 1980 and 1987, the number of men enrolled remained steady, while the number of women increased by 7 percent. Contrary to trends in the 1970s, enrollment in the 1980s has risen faster at private institutions than at public institutions. (Table 117)
- The number of olds, students has been growing more rapidly than the number of younger students. Between 1970 and 1985, the enrollment of scudents under age 25 increased by 15 percent. During the same time period, enrollment of persons 25 and over rose by 114 percent. In the latter part of this period from 1980 to 1985, enrollments of students under 25 decreased by 5 percent, while the enrollment of persons 25 and over increased by 12 percent (Table 119)

173

135

- Recent years have seen divergent enrollment trends at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment increased rapidly during the 1970s, but it fell between 1983 and 1985. Undergraduate enrollment rose about 2 percent in 1986. Graduate enrollment has been steady at about 1.3 million since the late 1970s, rising slightly to 1.4 million in 1986. Enrollment in first-professional programs has shown only small fluctuations from the current 0.3 million figure since the late 1970s. (Tables 125, 126, 127, and 128)
- "The proportion of college students who were minorities rose between 1976 and 1986. In 1976, 15.4 percent were minorities compared to 17.9 percent in 1986. Much of the change can be attributed to sharply rising numbers of Asian students. However, the proportion of students who were black fell from 9.4 percent in 1976 to 8.6 percent in 1986. The drop in the proportion of black students reflected the declining enrollments of black males. (Tables 146 and 147)
- College faculty members generally suffered losses in the purchasing power of their salaries from 1972- to 1980-81. While they have recouped some of their losses in the past 5 years, their salaries (in constant dollars) in 1985-86 were still below those in 1972-73. (Table 155)
- The proportion of faculty with tenure has remained relatively stable in recent years. In 1980-81, 65 pe ent of the full-time faculty had tenure compared to 66 percent in 1985-86. A large difference remained between the proportion of men and women with tenure. Seventy-one percent of men compared to 52 percent of women had tenure in 1985-86. (Table 158)
- During the 1986-87 academic year, 12,362 institutions offered postsecondary education. Postsecondary education providers included 2,070 4-year colleges, 1,336 2-year colleges, and 8,956 vocational and technical institutions. (Tables 163 and 255)
- Despite the sizable numbers of small colleges, most students attend the larger colleges. In fall 1985, 38 percent of higher education institutions had fewer than 1,000 students; however, these institutions enrolled less than 5 percent of total college enrollment. Even though only 10 percent of the colleges enrolled over 10,000 students, they accounted for 50 percent of total college enrollment. (Table 161)
- Although the total number of bachelor's degrees did not fluctuate widely in the 10-year period between 1975-76 and 1985-86, there were significant changes for men and women. Between 1975-76 and 1985-86, the number of bachelor's degrees awarded to men fell by 4 percent, while the number of degrees awarded to women rose by 19 percent. (Table 166)
- Of the 988,000 bachelor's degrees conferred in 1985-86, the largest numbers of degrees were conferred in the

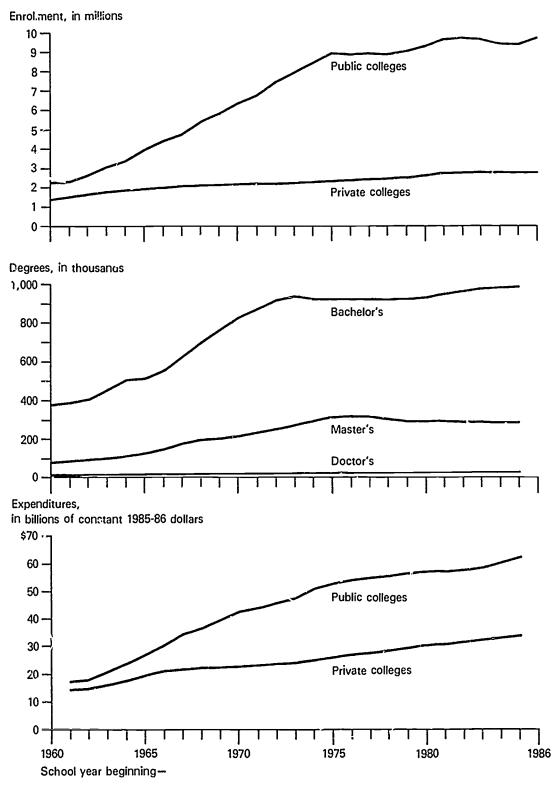

- fields of business and management (238,000), engineering and engineering technology (96,000), social sciences (94,000), education (87,000), and health professions (65,000). At the master's degree level, the largest fields were education (76,000) and business and management (67,000). The largest fields at the doctor's degree level were education (7,110), physical sciences (3,551), engineering (3,400), and life sciences (3,358). (Tables 174, 175, and 176)
- There have been rapid rises in the number of bachelor's degrees conferred in occupational areas and large decreases in the number of degrees conferred in the liberal arts. From 1975-76 to 1985-86, the number of bachelor's degrees conferred in business and management rose by 67 percent. The number of degrees in computer and information sciences jumped by 641 percent. Other large increases occurred in the fields of communications (108 percent), engineering and engineering technology (107 percent) and health professions (20 percent). Large drops have been noted in foreign languages (-35 percent), life sciences (-29 percent), social sciences (-26 percent), and psychology (-19 percent). One exception to the trend of increasing numbers of degrees in occupational areas has been the drop of 44 percent in education. (Table 174)
- Only about half of students who enrolled full-time in a 4-year college in 1980 graduated with a bachelor's degree by 1986, according to a recent "High School and Beyond" survey. About 55 percent of the students who enrolled in private 4-year colleges finished by 1986 compared to 46 percent for public 4-year colleges. (Table 215)
- For the 1987-88 academic year, annual undergraduate charges for tuition, room, and board are estimated at \$4,030 at public colleges and \$10,480 at private colleges. Between 1977-78 and 1987-88, charges at public co 'eges have risen by 113 percent and charges at private colleges by 152 percent. These increases surpassed the rise in the Consumer Price Index, which was about 85 percent during the same 10-year period. (Tables 218 and 29)
- Trend data show continuing increases in higher education expenditures. After adjustment for inflation, current-fund expenditures rose about 23 percent between 1975-76 and 1985-86. Expenditures increased more quickly at private institutions (32 percent) than at public institutions (18 percent). (Table 231)
- Administrative expenditures (institutional support and academic support, less libraries) have been rising more rapidly than most other types of college expenditures. Between 1980-81 and 1985-86, administration expenditures per full-time-equivalent student rose 17 percent at public universices compared to 6 percent for instruc-

tion expenditures per student. At private universities the per student administrative costs rose 24 percent and the instruction costs rose by 14 percent during the same time period. (Tables 236 and 239)

 Endowments of colleges and universities have risen rapidly in recent years. Between 1980-81 and 1985-86, the market value of endowments rose by 114 percent, from \$23.5 billion to \$50.3 billion. (Table 246)

*Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959-60, data are for the first term of the academic year. Beginning in 1969-70, data include only instructional faculty with the rank of instructor or above.

³Estimated.

*Estimated number of senior instruct onal staff Excludes graduate assistants.

*Data for 1869 70 to 1949-50 are for resident degree credit students who enrolled at any time Juring the academic year

*From 1869 70 *o 1959-60, first-professional degrees included und*r bachelor's a ees

Beginning in 1969-70, includes all master's degrees Excludes first professional degrees

*Includes unexpended plant funds.

10Endowment funds only.

^{&#}x27;These institutions have a significant level of activity in doctoral-level education, as measured by the number of doctoral recipients and the diversity in doctoral-level program offerings.

These institutions have diverse postbaccalaureate programs but do not engage in significant

^{*}These institutions have diverse postpaccalaureate programs but do not engage in significant doctoral-level education.

*These institutions primarily emphasize general undergraduate education.

*These baccalaureate or postbaccalaureate institutions are characterized by an emphasis in one field of study, such as business or engineering.

*These institutions confer at least 75 percent of their degrees and ewards policy the bachelor's degree least.

degree level.

^{*}These institutions are new additions to the Higher Education General Information Survey universe (not necessarily newly organized). When degree and award data become available, they will be reclassified.

Targe percentage increase is due primary to the addition of colleges accredited by the National Association of Trade and Technical Schools in 1990 and 1991.

⁻Data hot avadable,

^{&#}x27;New students are those students who are enrolled at the reporting institution for the first time at each of the following levels: undergraduate, graduate, first-professional, or unclassified.

2"Students enrolled in State" are all of the new students reported by the institution attended; i.e., all immigrants and "remaining" students lindudes foreign students).

2"Student residents of State" are all students from a State in which they were residing when

first admitted to the reporting institution at the current student level.

* Students remaining in State—are students who attend institutions in their home State.

*Response rates were below 70 percent.

^{*}Students are reported in State unknown when an institution is unable to determine the

NOTE. - Data for U.S. Service Schools are included in State totals. Excludes students from foreign. countries and the outlying areas

Some 214 institutions did not report the racial, ethnic status of their student body. Data for most of these nunreporting institutions, representing about 5 percent of rotal enrollment, were imputed. Data could not be imputed for a small number of new institutions, representing 8,934 students.

Includes computer sciences

Data not available

NOTE Data are based upon sample surveys of the civilian noninstitutional population. Recause of rounding, percents may not add to 100 0

²Preliminary data.

NOTE. - Because of underreporting and nonreporting of racial, ethnic data, totals in this table are slightly smaller than totals appearing in other tables. Data for 1984 differ slightly from previously published figures. Because of rounding, details may not add to totals.

'Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow

who assist senior faculty.

*Estimated on the basis of enrollment.

Projected.

NOTE. — Data exclude faculty employed by system offices. Some data have been revised from previously published figures. For methodological details on estimates and projections, see

Projections of Education Statistics to 1992-93. Because of rounding, details may not add

Ingia s even anoitutions insent		1		- 1			1	are new ad						

¹These institutions have a significant level of activity in doctoral level education as measured by the number of doctoral recipients and the diversity in doctoral level program offerings.

²These institutions have diverse postbaccalaureate programs, but do not engage in significant

⁶These institutions are new additions to the Higher Education General Information Survey universe (not necessarily newly organized). When degree and award data become available, they will be reclassified.

SOURCE. U.S. Department of Education, Center for Education Statistics, Institutional Characteristics of Colleges and Universities, 1985-86 survey. (This table was prepared March 1986.)

These institutions primarily emphasize general undergraduate education.

These institutions primarily emphasize general undergraduate education.

These baccalaureate or postbaccalaureate institutions are characterized by an emphasis in one field of study, such as business or engineering.

These institutions confer at least 75 percent of their degrees and awards below the bachelor's

degree level.

Table 166.-Earned degrees conferred by institutions of higher education, by level of degree and sex of student: 1869-70 to 1989-90

Year	Associate degrees			Bachelor's degrees			Master's degrees			First-professional degrees			Doctor's degrees

NOTE. — Data for 1982-83 and 1983-84 include imputations for nonrespondents. Data for 133 institutions in 1982-83 and 23 institutions in 1983-84 were imputed based on data for prior years. These imputations represented about 2 percent of the associate degrees in 1982-83 and 1 percent of associate degrees in 1983-84.

234

of all degrees in 1983-84. Aggregations of data according to the more recent classification of degrees appear on the following tables.

NOTE. – Data include only degrees requiring at least 2 years but less than 4 years of work beyond high school. Adjustments have been made to the 1982-83 and 1983-84 data because of survey nonresponse. Data for 103 institutions in 1982-83 and 23 institutions in 1983-84 have been imputed. These imputed values represent about 2 percent of all degrees in 1982-83 and 1 percent

NOTE. — Although a strenuous effort has been made to provide a consistent series of data, minor changes have occurred over time in the way degrees are classified and reported. Any degrees classified in early surveys as "first-protessional" are included above with bachelor's degrees; any degrees classified as "second-professional" or "second-level" are included with master's degrees. Data for all years are for 50 States and the District of Columbia.

NOTE. — Although a strenuous effort has been made to provide a consistent series of data, minor changes have occurred over time in the way degrees are classified and reported. Any degrees classified in early surveys as "first-professional" are included above with bachelor's degrees; any degrees classified as "second-professional" or "second-level" are included with master's degrees. Data for all years are for 50 States and the District of Columbia.

'Excludes degrees in public administration and international relations.

NOTE.—Although a strenuous effort has been made to provide a consistent series of data, minor changes have occurred over time in the way degrees are classified and reported. Any degrees classified in early surveys as first-professional are included above with bachelor's degrees; any degrees classified as "second-

professional" or "second level" are included with master's degrees Data for all years are for 50 States and the District of Columbia.

SOURCE, U.S. Department of Education, Center for Education Statistics, "Degrees and Other Formal Awards Conferred" surveys. (This table was prepared July 1987.)

¹Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and D.V.M.

NOTE.—The above classification of degrees by field differs somewhat from that in most publications of the Center for Education Statistics (CES). The major

differences are that history is included under humanities rather than social sciences and that psychology is included under social sciences. The number of degrees also differs slightly from that reported in the CES "Degrees and Other Formal Awards Conferred" survey. The above tabulation excludes some non-research doctorate degrees such as doctors degrees in theology Because of rounding, percents may not add to 100.0.

'Includes Ph.D. Ed D. and comparable degrees at		I			bl ations o					

'Includes Ph.D , Ed D , and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M D., D.D.S., and D.V.M.

²Includes 311 degrees in computer sciences and 36 degrees in other or unspecified fields not shown separately.

Less than 0.05 percent.

*Within the racial/ethnic category, mathematics and computer sciences are in cluded under physical sciences.

*Within the racial/ethnic category, business is included under other professional fields.

NOTE. - The above classification of degrees by field differs somewhat from that

in most publications of the Center for Education Statistics (CES). The major differences are that history is included under humanities rather than social sciences and that psychology is included under social sciences. The number or degrees also differs slightly from that reported in the CES "Degrees and Other Formal Awards Conferred" survey. The above tabulation excludes some non-research doctorate degrees such as doctors degrees in theology. Because of rounding, percents may not add to 100.0.

^{&#}x27;Seniors who dropped out of high school after spring 1980 survey.

*During their senior year of high school, *tudents were asked about the highest level of education they planned to attain. Students who planned to get less than a high school education or a high school education only were classified as having no postsecondary education plans.

NOTE. - Because of rounding, percents may not add to 100.0.

SOURCE: U.S. Department of Education, Center for Education Statistics, "High School and Beyond" survey. (This table was prepared September 1987.)

²Persons who earned a certificate for completing a program of study.

Less than .05 percent.

^{*}Socioeconomic status was measured by a composite score on parental education, family income, father's occupation, and household characteristics in 1980.

^{*}Students' self-reported high school program.

'Room and board data are estimated. Data have been revised from previou ly published figures.

Because of revisions in data collection procedures, figures are not entirely comparable with those for previous years. In particular, data on board rates are somewhat higher than earlie, years because they reflect a basis of 21 meals per week rather than meals served 7 days per week. Since many institutions serve fewer than 3 meals each day, the 1986-87 and 1987-88 data reflect a more complete accounting of total board costs. Because of their low response rate, data for private 2-year colleges must be interpreted with caution.

'Projected data based on information collected by the College 8oard. See foot

note 2.

NOTE, - Data are for the entire academic year and are average charges paid by students. Tuition and fees were calculated on the basis of full-time-equivalent students but are not adjusted to reflect student residency. Room and board were based on full time students. The data have not been adjuste tor changes in the purchasing power of the dollar. See fournote 2 for information on changes in data collection.

SOURCES. U.S. Department of Education, Center for Education Statistics, Institutional Characteristics of Colleges and Universities and Fall Enrollment in Colleges and Universities surveys, and College Board, news release, August 7, 1987. (This table was prepared April 1988.)

^{&#}x27;Includes students who reported they were awarded aid, but did not specify the source or type of the aid.

NOTE. - Because of rounding, details may not add to totals.

SOURCE. U.S. Department of Education, Center for Education Statistics, The 1987 National Postsecondary Student Aid Study" survey. (This table was prepared May 1988.)

²Percents added across the types and sources of aid total more than 100 because some students received multiple types and sources of aid.

Includes students who were single, separated, divorced, or widowed.

⁴Enrollent data include persons whose attendance status was not reported.

⁻Data not available.

^{*}Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

NOTE. - Because of rounding, details may not add to totals.

SOURCE, U.S. Department of Education, Center for Education Statistics, "Financial Statistics of Institutions of Higher Education surveys. (This table was prepared August 1987)

^{**}Generally includes only those revenues associated with major federally funded research and development centers (FFRDC). Large drop after 1975-76 was caused by a change in jurisdiction of one of the centers.

*Less than 0.05 percent.

³Federally supported student aid that is received through students is included under tuition and auxiliary enterprises Income from the Federal Government for research at agricultural experiment stations administered by land-grant institutions is included under Federal Government "other purposes," not under "research." Beginning in 1963-70, data include independent operations (Federally Funded Research and Development Centers.)

Includes Federal aid received through State channels and regional compacts, through 1959 60

*Income from State and local governments tabulated under "Stata governments."

*Beginning in 1969-70, the private grants represent nongovernmental revenue for sponsored research, student aid, and other sponsored programs.

'Specifically designated or earmarked funds,

*Prior to 1959-60, data for hospitals are included under sales and services of educational activities.

1ºDoes not include interfund transfers

"Includes funds functioning as endowment; increase calculated on book value

- Data not available.

NOTE - Data for years prior to 1969 70 are not entirely comparable to data for later years. Also, some details for 1969-70 through 1973-74 are not directly comparable to data for later years. Details for 1959-60 and 1969-70 have been revised from previously published figures. Because of rounding, details may not add to totals

'Includes Federal appropriations, unrestricted and restricted Federal contracts and grants, and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded research and development centers. Excludes Pell Grants. Federally supported student aid that is received through students is excluded.

Not applicable.

NOTE. - Because of rounding, details do not add to total.

SOURC⁻ U.S. Department of Education, Center for Education Statistics, *Participation in Adult Education*, May 1984. (This table was prepared June 1988.)

¹Persons 17 years of age and over on the date of the survey.
²Data are for the year ending in May 1934.
³On the date of the survey. Includes part-time Undergraduate and graduate students who indicated that they were also adult education participants.

NOTE. - Data are based upon a sample survey of the civilian noninstitutional population. Because of rounding, details may not add to totals.

¹The total number of adult education courses taken b `tween May 1983 and May 1984 was 43,192,000. However, only 40,752,000 course descriptions were obtained through the survey, which asked for information on up to 4 courses (the most recent courses if more than 4 courses were taken during the year). Five percent of participants took more than 4 courses during the year.

Includes part-time undergraduate and graduate students who indicated they were also adult education participants.

NOTE. - Because of rounding, details may not add to totals.

SOURCE, U.S. Department of Education, Center for Education Statistics, Current Population Survey, May 1984, Survey of Adult Education," conducted by the Bureau of the Census, unpublished tabulations (This table was prepared June 1986.)

CHAPTER 4

Federal Programs for Education and Related Activities

This chapter provides a summary of the Federal funds for education programs to help describe the magnitude of the Federal fiscal effort and give some indication of the scope and variety of the programs. Data in this chapter reflect outlays and obligations of Federal agencies. These tabulations differ from Federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal appropriations are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of Federal revenues because the revenues flow through State agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by Federal student loan programs. Some institutions that receive Federal education funds are not included in regular surveys conducted by the National Center for Education Statistics. Thus, the revenue data tabulated in this chapter are not comparable to figures reported in other chapters.

A capsule view of the history of Federal education activities is provided in the scilowing list of selected legislation.

- 1787 Northwest Ordinance authorized land grants for the establishment of educational institutions.
- 1802 An act fixing the military peace establishment of the United States established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- 1862 First Morrill Act authorized public land grants to the States for the establishment and maintenance of agricultural and mechanical colleges.
- 1867 Department of Education Act authorized the establishment of the Department of Education.*
- 1876 Appropriation Act, Department of the Treasury established the U.S. Coast Guard Academy.
- 1890 Second Morrill Act provided for money grants for support of instruction in the agricultural and mechanical colleges.
- 1911 State Marine School Act authorized Federal funds to be used for the benefit of any nautical school in any of 11 specified State seaport cities.
- 1917 Smith-Hughes Act provided for grants to States for support of vocational education.

- 1918 Vocational Rehabilitation Act provided for grants for rehabilitation through training of World War I veterans.
- 1919 An act to provide for further educational facilities authorized the sale by the Federal Government of surplus machine tools to educational institutions at 15 percent of acquisition cost.
- 1920 Smith-Bankhead Act authorized grants to States for vocational rehabilitation programs.
- 1935 Bankhead-Jones Act (Public Law 74-182) authorized grants to States for agricultural experiment stations.

Agricultural Adjustment Act (Public Law 74-320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National School Lunch Act of 1946 continued and expanded this assistance.

- 1936 An act to further the development and maintenance of an adequate and well balanced American Merchant Marine (Public Law 84-415) established the U.S. Merchant Marine Academy.
- 1937 National Cancer Institute Act established the Public Health Service fellowship program.
- 1941 Amendment to Lanham Act of 1940 authorized Federal aid for construction, maintenance, and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.
- 1943 Vocational Rehabilitation Act (Public Law 78-16) provided assistance to disabled veterans.

347 291

^{*}The Department of Education as established in 1867 was later to be known as the Office of Education until 1980, when, under Public Law 96-88, it was again designated as a "department." Therefore, for purposes of consistency, it is referred to as the "Department of Education" even in those tables covering years when it was officially the Office of Education.

School Lunch Indemnicy Plan (Public Law 78-129) provided funds for local lunch food purchases.

1944 Servicemen's Readjustment Act (Public Law 78-346) provided assistance for education of veterans.

Surplus Property Act (Public Law 78-457) authorized transfer of surplus property to educational institutions.

1946 National School Lunch Act (Public Law 79-396) authorized assistan a through grants-in-aid and other means to States to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and expansion of nonprofit school lunch programs.

George-Barden Act (Public Law 80-402) expanded Federal support of vocational education.

- 1948 United States Information and Educational Exchange Act (Public Law 80-402) provided for the interchange of persons, knowledge, and skills between the United States and other countries.
- 1949 Federal Property and Administrative Services Act (Public Law 81-152) provided for donation of surplus property to educational institutions and for other public purposes.
- 1950 Financial assistance for local educational agencies affected by Federal activities (Public Law 81-815 and Public Law 81-874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.

Housing Act (Public Law 81-475) authorized loans for construction of college housing facilities.

1954 An act for the establishment of the United States Air Force Academy and other purposes (Public Law 83-325) established the U.S. Air Force Academy.

Cooperative Research Act (Public Law 83-531) authorized cooperative arrangements with universities, colleges, and State educational agencies for educational research.

National Advisory Committee on Education Act (Public Law 83-532) established a National Advisory Committee on Education to recommend needed studies of national concern in the field of education and to propose appropriate action indicated by such studies.

School Milk Program Act (Public Lav/ 83-597) provided funds for purchase of milk for school lunch programs.

- 1956 Library Services Act (Public Law 84-911) provided grants to States for extension and improvement of rural public library services.
- 1957 Practical Nurse Training Act (Public Law 84-911) provided grants to States for practical nurse training.
- 1958 National Defense Education Act (Public Law 85-865) provided assistance to State and local school systems for strengthening instruction in science, mathematics, modern foreign languages, and other critical subjects; improvement of State statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships; foreign language study and training provided by colleges and universities; experimentation and dissemination of information on more effective utilization of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.

Education of Mentally Retarded Children Act (Public Law 85-926) authorized Federal assistance for training teachers of the handicapped.

Captioned Films for the Daaf Act (Public Law 85-905) authorized a loan service of captioned films for the deaf.

- 1961 Area Redevelopment Act (Public Law 87-27) included provisions for training or retraining of persons in redevelopment areas.
- 1962 Manpower Development and Training Act (Public Law 87-415) provided training in new and improved skills for the unemployed and underemployed.

Communications Act of 1934, Amendment (Public Law 87-447) provided grants for the construction of educational television broadcasting facilities.

Migration and Refugee Assistar :e Act of 1962 (Public Law 87-510) authorized ans, advances, and grants for education and training of refugees.

1963 Health Professions Educational Assistance Act (Public Law 88-129) provided funds to expand teaching facilities and for loans to students in the health professions.

Vocational Education Act of 1963 (Public Law 88-210) increased Federal support of vocational education schools, vocational work-study programs and research, training, and demonstration programs in vocational education.

Higher Education Facilities Act of 1963 (Public Law 88-204) authorized grants and loan's for classrooms, libraries, and laboratories in public community colleges and technical institutes as well as undergraduate and graduate facilities in other institutions of higher education.

1964 Civil Rights Act of 1964 (Public Law 88-352) authorized the Commissioner of Education to arrange for support for institutions of higher education and school districts to provide inservice programs for assisting instructional staff in dealing with problems caused by desegregation.

> Economic Opportunity Act of 1964 (Public Law 88-452) authorized grants for college work-study programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).

1965 Elementary and Secondary Education Act (Public Law 89-10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources. textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening State education agencies; and educational research and research training.

> Health Professions Educational Assistance Amendments (Public Law 89-290) authorized scholarships to aid needy students in the health professions.

Higher Education Act of 1965 (Public Law 89-329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions; teacher training programs; and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher training fellowships.

Medical Library Assistance Act (Public Law 89-291) provided assistance for construction and improvement of health sciences libraries.

National Foundation on the Arts and the Humanities Act (Public Law 89-209) authorized grants and loans for projects in the creative and performing arts, and for research, training, and scholarly publications in the humanities.

National Technical Institute for the Deaf Act (Public Law 89-36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.

National Vocational Student Loan Insurance Act (Public Law 89-287) encouraged State and nonprofit private institutions and organizations to establish adequate loan insurance programs to assist students to attend postsecondary business. trade, technical, and other vocational schools.

Disaster Relief Act (Public Law 89-313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.

1966 International Education Act (Public Law 89-698) provided grants to institutions of higher education for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.

> National Sea Grant College and Program Act (Public Law 89-688) authorized the establishment and operation of sea grant colleges and programs by initiating and supporting programs of education and research in the various fields relating to the development of marine resources.

> Adult Education Act (Public Law 89-750) authorized grants to States for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

> Model Secondary School for the Deaf Act (Public Law 89-694) authorized the establishment and operation, by Gallaudet College, of a model secondary school for the deaf.

> Elementary and Secondary Education Amendments of 1966 (Public Law 89-750) in addition to modifying existing programs, authorized grants to assist States in the initiation, expansion, and improvement of programs and projects for the education of handicapped children.

Education Professions Development Act (Public Law 90-35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90-129) established a Corporation for Public Broadcasting to: assume major responsibility in channeling Federal funds to noncommercial radio and television stations, program production groups, and

ETV networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

1968 Elementary and Secondary Education Amendments of 1967 (Public Law 90-247) modified existing programs, authorized support of regional centers for education of handicapped children, model centers and services for deaf-blind children, recruitment of personnel and dissemination of information on education of the handicapped; technical assistance in education to rural areas; support of dropout prevention projects; and support of pilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90-538) authorized preschool and early education programs for handicapped children.

Vocational Education Amendments of 1968 (Public Law 90-576) modified existing programs and provided for a National Advisory Council on Vocational Education, and for collection and dissemination of information for programs administered by the Commissioner of Education.

Higher Education Amendments of 1968 (Public Law 90-575) authorized new programs to assist disadvantaged college students through special counseling and summer tutorial programs, and programs to assist colleges to combine resources of cooperative programs and to expand programs which provide clinical experiences to law students.

1970 Elementary and Secondary Education Assistance Programs, Extension (Public Law 91-230) authorized comprehensive planning and evaluation grants to State and local education agencies; provided for the establishment of a National Commission on School Finance.

National Commission on Libraries and Information Science Act (Public Law 91-345) established a National Commission on Libraries and Information Science to effectively utilize the Nation's educational resources.

Office of Education Appropriation Act (Public Law 91-380) provided emergency school assistance to desegragating local education agencies.

Environmental Education Act (Public Law 91-516) established an Office of Environmental Education to: develop curriculum and initiate and maintain environmental education programs at the elementary-secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide com-

munity education programs; and distribute material dealing with environment and ecology.

Drug Abuse Education Act of 1970 (Public Law 91-527) provided for development, demonstration, and evaluation of curriculums on the problems of drug abuse.

1971 Comprehensive Health Manpower Training Act of 1971 (Public Law 92-257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.

Nurse Training Act of 1971 (Public Law 92-158) amended Title VIII, Nurse Training, of the Public Health Service Act, increasing and expanding provisions for nurse training facilities.

1972 Drug Abise Office and Treatment Act of 1972 (Public Law 92-255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all Federal drug-abuse prevention functions; a National Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health centers for treatment and rehabilitation of persons with drugabuse problems, and, in December 1974, a National Institute on Drug Abuse.

Education Amendments of 1972 (Public Law 92-318) established the Education Division and the National Institute of Education; ganeral aid for institutions of higher education; Federal matching grants for State student incentive grants; a National Commission on Financing Postsecondary Education; State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current Office of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational, professional, and graduate schools, and public institutions of undergraduate higher education.

1973 Older Americans Comprehensive Services Amendment of 1973 (Public Law 93-29) made available to older citizens comprehensive programs of health, education, and social services.

Comprehensive Employment and Training Act of 1973 (Public Law 93-203) provided for opportunities for employment and training to unemployed and underemployed persons. Extended and expanded provisions in the Manpower Development and Training Act of 1962, Title I of the Economic Opportunity Act of 1964, and the Emergency

Employment Act of 1971 as in effect prior to June 30, 1973.

1974 Educational Amendments of 1974 (Public Law 93-380) provided for the consolidation of certain programs; established a National Center for Education Statistics.

> Juvenile Justice and Delinguency Prevention Act of 1974 (Public Law 93-415) provided for technical assistance, staff training, centralized research. and resources to develop and implement programs to keep students in elementary and secondary schools; established, in the Department of Justice, a National Institute for Juvenile Justice and Delinquency Prevention.

1975 Indian Self-Determination and Education Assistance Act (Public Law 93-638) provided for increased participation of Indians in the establishmeric and conduct of their education programs and services.

> Harry S. Truman Memorial Scholarship Act (Public Law 93-642) established the Harry S. Truman Scholarship Foundation and created a perpetual education scholarship fund for young Americans to prepare and pursue careers in public service.

> Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94-23) authorized funds to be used for education and training of aliens who have fled from Cambodia or Vietnam.

> Education of the Handicapped Act (Public Law 94-142) provided that all handicapped children have available to them a free appropriate education designed to meet their unique needs.

1976 Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976 (Public Law 94-309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the transmission, distribution, and delivery of health, education, and public or social service information.

> Education Amendments of 1976 (Public Law 94-482) extended and revised Federal programs for education assistance for higher education, vocational education, and a variety of other programs.

1977 Youth Employment and Demonstration Projects Act of 1977 (Public Law 95-93) established a youth employment training program that includes, among other activities, promoting education-to-work transition, literacy training and bilingual training, and attainment of certificates of high school equivalency.

1978 Career Education Incentive Act (Public Law 95-207) authorized the establishment of a career education program for elementary and secondary schools.

> Tribally Controlled Community College Assistance Act (Public Law 95-471) provided Federal funds for the operation and improvement of tribally controlled community colleges for Indian students.

> Education Amendments of 1978 (Public Law 95-561) established a comprehensive basic skills program aimed at improving pupil achievement (replaced the existing National Reading Improvement program); established a commun. chools program to provide for the use of p and buildings.

> Middle Income Student Assistance Act (Public Law 95-566) modified the provisions for student financial assistance programs to allow middle income as well as low income students attending college or other postsecondary institutions to qualify for Federal education assistance.

Department of Education Organization Act (Public Law 96-88) established a Department of Education containing functions from the Education Division of the Department of Health, Education, and Welfare along with other selected education programs from H.E.W., the Department of Justice, Department of Labor, and the National Science Foundation.

1980 Asbestos School Hazard Protection and Control Act of 1980 (Public Law 96-270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.

> Amendments to the Higher Education Act (Public Law 96-374) provided for a new Commission on National Development in Postsecondary Education and a new Urban Grant University Program.

1981 Education Consolidation and Improvement Act of 1981 (Public Law 97-35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.

1983 Student Loan Consolidation and Technical Amendments Act of 1983 (Public Law 98-79) established 8 percent rate for Guaranteed Student Loans and extended Family Contribution Schedule.

> Challenge Grant Amendments of 1983 (Public Law 98-95) amended Title III, Higher Education Act and added authorization of Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as incentive to seek alternative sources of funding.

Education of Handicapped Act Amendments (Public Law 98-199) added Architectural Barrier amendment and clarified participation of handicapped children in private schools.

Education Consolidation and Improvement Act of 1981 Amendments (Public Law 98-211) added technical amendments for Chapter 1, and provided for parental involvement and minor changes in other programs.

1984 Rehabilitation Amendments of 1984 (Public Law 98-221) revised and extended the Rehabilitation Act of 1973. Provides for the Helen Keller National Center for Deaf-Blind.

Education for Economic Security Act (Public Law 98-377) added new science and mathematics programs for elementary, secondary, and post-secondary education. The new programs include: magnet schools, excellence in education, and equal access.

Higher Education Act of 1965 Amendments (Public Law 98-312) amended Title III of the Higher Education Act of 1965 by creating a new method of funding the Challenge Grant program. The act also increased the level of authorization for the Office of the Inspector General and extended the Allen J. Ellender Fellowship program through fiscal year 1989.

Carl D. Perkins Vocational Education Act (Public Law 98-524) continues Federal assistance for vocational education through fiscal year 1989. The act will replace the Vocational Education Act of 1963. It provides aid to the States to make vocational education programs accessible to all persons, including handicapped and disadvantaged, single parents and homemakers, and the incarcerated.

Human Services Reauthorization Act (Public Law 98-558) reauthorized the Head Start and Follow Through programs through fiscal yen 1986. It also created a Carl D. Perkins Schip Program, a National Talented Teachers Hellowship Program, a Federal Merit Scholarships Program, and a Leadership in Educational Administration Program.

1985 Montgomery GI Bill—Active Duty (Public Law 98-525) signed on October 19, 1984, brought about a new GI Bill for individuals who initially enter active military duty on or after July 1, 1985.

Montgomery GI Bill—Selected Reserve (Public Law 98-525) signed on October 19, 1984, is an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.

1986 Education of the Deaf Act (Public Law 99-371) places Gallaude. College and the National Technical Institute for the Deaf on a 5-year reauthorization cycle. Establishes an 18-month Commission to Study Deaf Education.

Handicapped Children's Protection Act (Public Law 99-372) allows parents of handicapped children to collect attorney's fees in cases brought under the Education of the Handicapped Act and provides that the Education of the Handicapped Act does not preempt other laws such as Section 504 of the Rehabilitation Act.

Reauthorization of the Education of the Handicapped Act Amendments (Public Law 99-457) reauthorizes for 3 years the discretionary programs under the Education of the Handicapped Act. Included are programs to provide demonstration projects for severely disabled individuals, research and technology, activities, early childhood education, and a new State grant program to provide early intervention services for handicapped children from birth through age 2.

Reauthorization of the Higher Education Act of 1965 (Public Law 99-498) reauthorizes for 5 years the Higher Education Act of 1965, as amended. Provides increases in maximum Pell Grant and student loan amounts, institutes a new agency to provide college construction funding, cuts incentives to lenders involved in the student aid programs and extends the authorization for the Office of Educational Research and Improvement.

Reauthorization of the Rehabilitation Act (Public Law 99-506) authorizes for 5 years programs to provide vocational rehabilitation for disabled persons. Includes increasing the State/Federal match requirements, establishes a new State grant program for supported employment, and sets higher authorization levels.

The Drug-Free Schools and Communities Act of 1986 (Public Law 99-570) part of the Anti-Drug Abuse Act of 1986. Authorizes funding for fiscal years 1987-89. Establishes programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of Federal financial assistance.

1987 Higher Education Act Amendments of 1987 (Public Law 100-50) makes technical corrections, clarifications, or conforming amendments related to the enactment of the Higher Education Amendments of 1986.

Highlights

 According to 1988 estimates, about 44 percent of the \$43.3 billion dollars spent by the Federal Government

on education came from the Department of Education. Large amounts of money also came from the Department of Health and Human Services (\$6.0 billion), the Department of Agriculture (\$5.6 billion), the Department of Defense (\$3.6 billion), and the Department of Energy (\$2.2 billion). (Table 256)

- In fiscal year 1988, Federal program funds for elementary/secondary education amounted to \$18.6 billion; for higher education, \$11.1 billion; for research at universities and related institutions, \$10.5 billion; and for other programs, \$3.1 billion. Between fiscal years 1980 and 1988, funds for elementary and secondary education grew by 16 percent; higher education grew by more than 1 percent; research grew by 81 percent; and funds for other programs grew by more than 101 percent. (Table 257)
- Between fiscal years 1980 and 1988, Department of Education obligations rose almost 54 percent. Funds for student financial assistance increased from \$5.1 billion to \$9.2 billion, a rice of 79 percent. Funds for elemen-

- tary and secondary education in 1988 stood at an estimated \$5.7 billion, an increase of almost 34 percent since 1980. Funds for the handicapped increased by about 132 percent, while funds for vocational education declined almost 10 percent. (Table 258)
- Of the \$18.9 billion spent by the Department of Education in 1988, about \$7.0 billion went to school districts, \$3.1 billion went to college students, \$2.9 billion went to institutions of higher education, and \$2.0 billion to State education agencies. A large portion of the remaining \$3.9 billion went to banks to subsidize student loans. (Table 259)
- Total Federal support for education was \$63.1 billion in fiscal year 1984, up 18 percent from fiscal year 1980.
 From fiscal year 1980 to fiscal year 1984, Federal program funds grew by 5 percent; federally supported student aid funds rose 60 percent; and estimated Federal tax expenditures for education increased by 34 percent. (Table 266)

¹Estimated.

²These commodities are purchased under Section 32 of the Act of August 24, 1935 for use in the child nutrition programs.

This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since fiscal year 1977, and were completely phased out in fiscal year 1984 after monitoring the closeouts of projects were completed.

⁴This program was funded by the Department of Education in fiscal year 1980 and 1981 in 'Impact Aid" program. This program provides an education for dependents of Federal employees residing on Federal property in cases where an appropriate free public education is unavailable in the nearby community.

Head Start is currently serving approximately one out of six of the eligible low income preschool

*After age 18, benufits terminate at the end of the school term or 3 months, whichever is less This program provides funding for supplemental programs for eligible Indian students in public

*This program finances the cost of academic, social, and occupational education courses for inmates in Federal prisons

*Programs were funded through fiscal year 1982 under the Comprehensive Employment end Training Act."

10This program closed in fiscal year 1986.

"The States' share of treasury money was not spent on education * fiscal years 1981 through

1986.

'This program provides educational assistance allowances in order to rest are just educational assistance allowances interrupted or impeded by reason of active military service after January 31, 1955, and before January 1, 1977, includes. Readjustment Benefits, 'Chapter 34, for education other than college and also includes the Veterans Job Training Program" for service persons and veterans.

13 This program is in Readjustment Benefits program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

*This program is in the Readjustment Benefits program, Chapter 35, and provides benefits to children and spouses of veterans.

*Negative amounts occur when program receipts exceed outlays.

19 The Sea Grant College Program Act of 1966 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the coastal and marine resources of the Nation. One of the objectives is to provide trained personnel to utilize and manage these resources.

17This program was transferred to the Department of Transportation in fiscal year 1981 by

Public Law 97-31.

"Included in total above.

Instructional costs only are included. These include academics, audio visual, academic computing center, faculty training, military training, physical education, and libraries.

⁵⁰Includes special education programs (military and civilian), legal education program, flight training, advanced degree program, college degree program (officers), and Armed Forces Health Professions Scholarship" program.

No funds have been appropriated for this program since fiscal year 1982.
 This program receives funds periodically.
 The first year for this program was fiscal year 1984.

³⁴The amount reported in fiscal year 1983 was ³⁴Tie because of a loan default.
³⁸Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Aut of 1981 (Public Law 97-35) and were completely phased out by August 1985.

24Includes adult education, tribally controlled community colleges, and other postcocondary schools.

²⁷This program was in the Department of Commerce in fiscal year 1980.

²⁸Also includes flight wining.
²⁸No funds were spent on "higher education" in fiscar years 1983 through 1986.

³⁰Called the "International Communication Agency" in fiscal years 1980 and 1981.

"This program was in the "Educational and Cultural Affairs" program in fiscal years 1980 through 1983, and became an independent program in fiscal year 1984.

³²Includes Vietnam-era veterans under Chapter 34 (Gl Bill), of the "Readjuxtment Benefits education and training program. This program provides educational assistance allowances, primari ty on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service after January 31, 1955 and before January 1, 1977.

33 includes service persons under Chapter 34 (GI Bill), of the Readjustment Benefits education and training program. Service persons with over 180 days of active duty, any part of which

was before January 1, 1977, are eligible to participate in this program.

"Includes post-Vietnam-era veterans, under Chapter 32, of the post-Vietnam-era "Veterans Education Account." Provides education and training assistance payments to veterans and service persons with no active duty time before January 1, 1977. Funding is provided through par-ticipants' contributions while on active duty and transfers from the Department of Oefense (DOD). Participants contributions, up to a maximum of \$2,700, are deposited to the fund prior to discharge. When the participant enters training, the monthly disbursement from his or her account is matched two for one from funds provided by DOD. Additional amounts in the form of incentive bonuses may also be provided by DOD funds. As Veterans Administration funds are not appropriated

for this program, these data represent obligations.

**Public Law S8-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs. An assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve.

*Chapter 30, also called the Montgomery Bill, and new GI Bill are for eligible veterans who have agreed to have their military pay reduced \$100 per month for their first 12 months of active duty in order to participate in this program. The "Readjustment Benefits" account under Veterans Administration pays only the basic allowance, up : a maximum of \$300 per month, for full-time training. Supplemental Benefits are paid by the Department of Defense (DOD), Legislation is being proposed to fund the "basic benefit" allowance through the DOD rather than through the readjustment benefits appropriation. The Veterans Administration would continue to administer the program

³⁷Chapter 106 is for members of the Selected Reserve. The reserve components include the Army, Navy, Air Fc.ce. Manne Corps Reserve, Army National Guard and Air National Guard under the Department of Defense (DOD), and the Coast Guard reserve, w. his under the Department of Transportation (DOT), when it is not operating as a service in the Navy. Eligible persons can receive up to \$140 per month for full-time training. The DOD and DDT pay for this program while the Vetarans Administration administers it.

Mincludes dupendents of veterans under Chapter 35, the Readjustment Benefits education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent

There have been no appropriations for this program since fiscal year 1984.

This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons.

"This program closed in fiscal year 1985.

42No funds have been appropriated for this program since fiscal year 1982.

43No funds were spent on "other education" in fiscal years 1986 and 1987. 4No funds have been appropriated for this program since fiscal year 1984.

44This program was transferred to the National Archives in April 1985.

"This program makes grants for the promotion of scholarly, cultural, and anistic exchanges butween Japan and the United States.

⁴⁷The National Archives became an independent agency in April 1985.

*This program was established by Congress to conduct and support research and scholar-ships in the fields of peace, arms control, and conflict resolution. This program began operation in February 1986.

*Includes FFRDCS administered by colleges and universities, Obligation amounts are reported. Fiscal years 1986 and 1987 are estimated.

*Total outlays by the National Institute of Education and the Control Education Statistics. - Data not available or not applicable.

NOTE. - To the extent possible, amounts reported represent outlays rather than obligations Negative numbers are indicated in parentheses.

¹Dollars reflect actual obligations during the fiscal year regardless of when the funds were actually spent by a recipient institution. Data include obligations to federally funded research and development centers administered by colleges and universities.

²Includes Department of Commerce, Department of Housing a: 1 'Irbai: Development, Department of the Interior, Agency for International Development, Department of Labor, Department of Transportation and Nuclear Regulatory Commission.

NOTE.—Totals exclude loans to individuals, such as the Federal Guaranteed Student Loan program sponsored by the Department of Education, and Federal training and development activities, as well as funds allocated to State agencies, even though the final recipient of such funds is known to be an academic inuition. Tuition support programs such as Pell Grants are included in these figures.

²On-budget support are Federal funds for education programs tied to appropriations.

3Off-budget support all goes to postsecondary education. A primary source of off-budget spending is the Federally-sponsored Student Loan Marketing Association whose outlays are excluded from on-budget totals by law oven though they add to the Federal government deficit that has to be financed by taxes, borrov: ing, or other means. Additional off-budget support comes from college-loan revolving funds and from capital supplied by financial institutions for college student loans covered by Feder I guarantees, which create a contingent liability.

New student loans guaranteed by the Federal Government.

Student loans created with revolving funds derived from repayments of outstanding loans.
*State matching

⁷Estimated employer contributions to student earnings (amount of aid for students less appropriations).

*Tax expenditures are the difference between current Federal tax receipts and what these receipts would be without existing education deductions to income allowed by Federal tax provisions.

Data not available.

NOTE.-To the extent possible, Federal education funds data represent outlays rather than obligations. Because of rounding, details may not add to totals.

SOURCE: U.S. Department of Education, Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, Budget of the U.S. Government, Appendix, fiscal years 1982 to 1989; National Science Foundation, Federal Funds for Research and Development, fiscal years 1980 to 1988; and unpublished data. (This table was prepared April 1988.)

CHAPTER 5

Outcomes of Education

This chapter consists primarily of tables comparing educational attainment and work force characteristics. The data show labor force participation and income levels of high school dropouts, high school graduates, and bachelor's degree recipients. Population characteristics are provided for many of the measures to help evaluate disparities among various demographic groups. Several new tables have been added to provide a broader view of education outcomes, including data on participation in voluntary organizations and voting and on life goals.

The first set of tables contains data from the Bureau of the Census and the Bureau of Labor Statistics on educational attainment of the labor force and income of the labor force. These tables provide information on the educational attainment of the labor force, by occupation, sex, and race; money income, by level of education attained; and unemployment rates, by years of education attained, sex, and race.

The second group of tables was compiled from data available from the Bureau of Labor Statistics on high school dropouts and graduates. These data show the labor force participation and college enrollment of high school students within the year they leave school. The tabulations also provide comparative labor force participation and unemployment rates for graduates and dropouts. Additional information on college enrollment rates by race and sex have been included to help form a more complete picture of high school outcomes.

The third set of tables has been prepared from the National Center for Education Statistics' survey, "Recent College Graduates," and from a Bureau of the Census survey on earnings and education. These tables provide data on employment outcomes for high school and college graduates. A new table for this edition of the "lest provides a salary comparison by field of college of the entire population. Trends in salaries record by college graduates are also featured in this section.

Statistics on educational attainment of the entire population may be found in chapter 1. More detailed data on the number of degree recipients are contained in chapters 2 and 3. Additional data on the income of persons by educational avainment may be obtained from the Bureau of the Census in the Current Population Reports, Series P-60. The Bureau of Labor Statistics has a selection of publications dealing with the educational characteristics of the labor force. Further information or survey methodologies can be found in the Guide to Sources in the Appendix to this publication and in the cited source documents.

Highlights

- Those with lower levels of educational attainment were more likely to be unemployed than those who had higher levels of educational attainment. The 1987 unemployment rate for those with 1 to 3 years of high school was 14.8 percent compared to 7.2 percent for those with 4 years of high school and 2.5 percent for those with 4 or more years of college.* Minorities and young people tended to have higher unemployment rates, even after allowing for level of educational attainment. (Table 263)
- Between 1976 and 1986, annual income generally rose more rapidly for men with higher levels of educational attainment than for those with lower levels. For example, the income of men who were year-round full-time workers with 4 years of college rose by 89 percent compared to 63 percent for those with 1 to 3 years of high school. Men who had completed 4 years of high school increased their income by 73 percent. In general, women's incomes rose faster than men's incomes (103-percent compared to 86 percent). (Table 269)
- The problems of dropouts are highlighted by comparing 1'e labor force and unemployment status of 1985-86 dropouts and graduates. Only 64 percent of the dropouts were in the labor force (employed or looking for work) and of those in the labor force, 28 percent were unemployed. Of the 1986 high school graduates who were not in college, 81 percent were in the labor force and 20 percent were unemployed. (Tables 271 and 272)
- About 58 percent of the college graduates of the class of 1983-84 had jobs in professional, managerial, and technical areas in 1965. Twenty-six percent were employed in nonprofessional and nontechnical areas and 3 percent were unemployed. Many of the 12 percent who were not in the labor force were enrolled in graduate school. (Table 275)
- A large number of young adults participate in voluntary organizations. The most common organizations

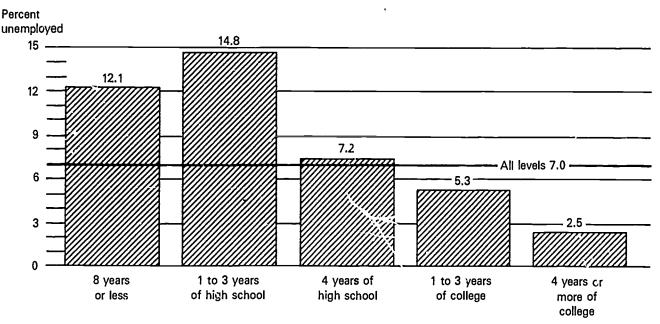

377 317

^{*}Unemployment rates for all persons with 8 years or less of school were lower than the rate for those who completed 1 to 3 years of high school. The people with 8 years or less were generally older workers who tend to have low unemployment rates because of their experience in the work force.

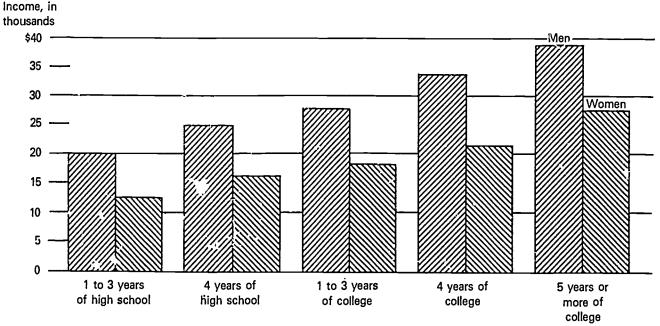

- are sports groups (36 percent), church groups (32 percent), and social or hobby clubs (22 percent). (Table 279)
- A 1985 survey of young adults found that the vast majority (more than 95 percent) had basic literacy skills.
 On the other hand, only about one-fifth had high pro-
- ficiency in several types of literacy skills. (Table 280)
- The life goal most consistently rated "very important" by young men and women was "having a happy family life." Two of the other most highly rated goals in the 1986 survey were "being successful in work" and "finding steady work." (Table 281)

^{*}Reported salaries of full-time wc. ters under \$2,600 in 1976, \$4,200 in 1981, and \$5,000 in 1985 were excluded from the tabulations.

*Most educators work 9- to 10-month contracts. Their salaties when adjusted for a 12-month period averaged \$19,000 in February 1978, \$17,600 in May 1981, and \$17,900 in June 1985 in constant (1985) dollars.

⁻Cell contains fewer than 75 respondents.

NOTE. - Data exclude bachelor's recipients from U.S. Service Schools and graduates living at foreign addresses at the time of the survey.

SOURCE, U.S. Department of Education, Center for Education Statistics, "Recent College Graduates" surveys. (This table was prepared November 1995.)

Sample survey in 1966 based on people who were high school seniors in spring 1980, Respondents to the survey were asked about their voluntary participation in selected organizations over the previous 24-month period.

²E.g., hospital volunteer.

In 1980, the seniors were asked to indicate the level of participation in each of 15 different extracurricular activity areas (e.g., varsity sports, debate, band, subject-matter clubs, church activities, etc.). Responses to these earlier inquiries were used to classify overall level of participation in extracurricular activities.

SOURCE: U.S. Department of Education, Center for Education Statistics, "High School and Beyond." (This table was prepared October 1987.)

Includes money wages or salary and net income from farm and nonfarm self-employment. *See Guide to Sources for Information on the use of standard errors.

²includes participation in community centers, neighborhood improvement, or social action associations or groups.

findudes participation in organizations such as Rotary, Junior Chamber of Commerce, Veto

Includes persons 21 to 25 years old. Excludes persons not living in households and those who were unable to speak English.

²Prose con,prehension test measures the knowledge and skills needed to gain understanding and use information from taxts such as editorials, news stories, and poems. A score of 200 indicates an aburty to write a simple description of the type of job one would like to have. A score of 300 indicates an ability to locate information in a news article or an almanac. A score of 350 indicates an ability to synthesize the main argument from a lengthy newspaper editorial.

**Document literacy test measures the knowledge and skills required to locate and use infor-

mation from documents such as indexes, tables, paycheck stubs, and order forms. A score of 200 indicates ability to match money-saving coupons to a shopping list of several items. A score of 300 indicates an ability to follow directions to travel from one location to another using a map. A score of 350 indicates an ability to use a bus schedule to select the appropriate bus for given departures and arrivals.

Quantitative Interacy test measures the knowledge and skills needed to apply the arithmetic operations of addition, subtraction, multiplication, and division, either alone or sequentially. A score or 200 indicates an ability to total two entires on a bank deposit slip. A score of 200 indicates an ability to enter deposits and checks and balance a checkbook. A score of 350 indicates an ability to determine the amount of a tip in a restaurant using a given percentage.

*The National Assessment of Educational Progress (NAEP) reading scale is based on a multiple-choice test which measures reading achievement, A score of 200 indicates an ability to understand specific or sequentially-related information. A score of 300 indicates an ability to find, understand, summarize, and explain relatively complicated information. A score of 350 indicates an ability to synthesize and learn from specialized reading materials.

Sample survey in 1979-80 based on people who were high school seniors during the 1971-72 school year. Survey participants were asked about their political activities over a 3-year period, 1976 to 1979.

²Includes attendance at political meetings, ralkes, barbecues, fish fries, or similar events in connection with an election.

*Survey participants were asked whether or not they voted in any local, State, or national

election between November 1976 and October 1979.

*Sample survey in 1986 based on people who were high school seniors in spring 1980. Survey participants were asked about their political activities over a 2-year period, 1984 to 1986.

Survey participants were asked whether or not they voted in any local. State, or national election between March 1974 and February 1986.

NOTE. - Because of the different time frames of the political participation inquiries, care should be used when interpreting the data.

SOURCE: U.S. Department of Education, Center for Education Statistics, "High School and Beyond, Third Follow-up, 1986" and "National Longitudinal Study, Fourth Follow-up, 1990" surveys. (This table was prepared in September 1987.)

Table 283.—Percent of 1980 high school seniors holding specific attitudes/beliefs about women, by highest educational degree attained and sex: 1986

Other things being equal, a woman's job should be considered as seriously as a man's in making decisions about whether to move, where to live, etc.	94.0	92.3	95.6	90.7	94.9	95 .9	96.2	94.7	97.0

¹Data are based on a 1996 sample survey of students who were high school seniors in spring 1980, Figures in the table represent the estimated percentage of these students who either strongly agreed or agreed with the statements to the left.

SOURCE, U.S. Department of Education, Center for Education Statistics, High School and Beyond, Third Follow-up, 1986" survey. (This table was prepared November 1987.)

CHAPTER 6

International Education

This chapter offers a broad perspective on education among the nations of the world. It also provides an international context for examining the condition of education in the United States. Although the Center has not been active in collecting international data, it has recently funded a number of research studies comparing mathematics performance among various nations. Also, a study entitled, "A Comparison of Teachers' Salaries in Japan and the United States" has been released. In addition, the Center has cooperated with international agencies in the compilation of statistics.

The data in this chapter were drawn from material prepared by the United Nations Educational, Scientific, and Cultural Organization (UNESCO), the Institute of International Education, and the International Association for Evaluation of Educational Achievement. The basic summary data on enrollments, teachers, enrollment ratios, illiteracy rates, and finances were synthesized from information appearing in the annual Statistical Yearbook published by UNESCO. Even though UNESCO tabulations are very carefully prepared, international data users should be cautioned about the many definitional and reporting problems involved in the collection of data about the wide variety of educational systems in the world.

This chapter also contains data from the latest international assessment of mathematics achievement. This assessment, coordinated by the Association for Evaluation of Educational Achievement, provides comparative data fc.: about 20 countries. A different perspective is provided by data on the enrollment of foreign students in U.S. institutions of higher education. These data from the Institute of International Education provide information on the number of foreign students in U.S. colleges, by country of origin.

Further information on survey methodologies can be found in the Guide to Sources and in the publications cited in the source notes.

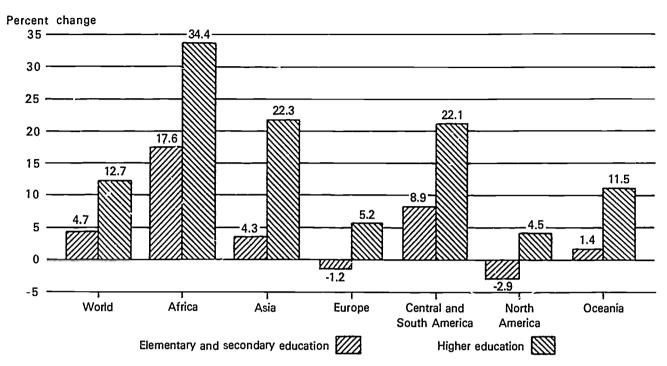

Highlights

- Enrollments have increased more rapidly in Africa than in other parts of the world. Enrollments at the primary and secondary levels fell in North America and in Europe because of the declining number of school-age children. The smallest higher education enrollment increases occurred in North America and in Europe. (Figure 21 and Table 284)
- In 1984-85, there were about 886 million students in schools around the world. Of these students, 574

- million were in elementary level programs, 259 million were in secondary programs, and 53 million were in postsecondary programs. (Table 284)
- Between 1980-81 and 1984-85, enrollments grew rapidly, particularly in the less developed areas of the world. Elementary school enrollment rose 4 percent during the time period. Elementary enrollment changes ranged from increases of 12 percent in Africa to declines of 2 percent in Europe and North America and 5 percent in Oceania. In general, enrollment changes at the secondary and postsecondary levels followed this same pattern, with large increases in Africa and smaller increases or decreases in Europe and North America. (Table 284)
- Pupil-teacher ratios in elementary and secondary schools vary widely from country to country. Countries with relatively low ratios were Italy (11.8 in 1982), Australia (13.7 in 1984), and Sweden (13.7 in 1982). Countries with relatively high ratios included Mexico (28.0 in 1983) and Japan (20.5 in 1984). (Table 286)
- A comparison of public expenditures on education as a percent of gross national product (GNP) reveals significant differences among nations. For example, the proportion of GNP for the United States in 1983 was 5.6 percent. Other countries ranged from 2.2 percent for Nigeria and 2.8 percent for Mexico to 7.7 percent for Canada and 8.4 percent for Sweden. (Table 288)
- U.S. students ranked well below average in a 1981-82 international test of mathematical skills of 8th grade students. Only 6 of 19 other nations and provinces scored below the United States. U.S. students scored above the international average on arithmetic and statistics, but they scored below the international average on algebra, geometry, and measurement tests. (Table 289)
- In an analysis of international mathematics testing for the most advanced 12th grade mathematics students, U.S. students ranked next to last among the 13 participating nations. The best scores were made by Japanese students, who had the highest average scores in each of the three parts of the test, algebra, geometry, and calculus. The Japanese schools were also among the most likely to cover the material that was tested on the exam. The American schools covered the smallest portion of the material, except for schools in British Columbia. (Table 290)

¹Enrollment and teacher data exclude the Dr aftice. Expenditure data exclude Democratic Kai. uchea, Democratic People's Republic of Korea, Lao People's Democratic Republic, Lebanon, Mongolia, Mozambique, South Africa, and Vietnam. ²Excludes South Africa,

³Excludes the U.S.S.R., but includes both the Asian and the European portions of Turkey.

²Excludes preprimary, special, and adult education.

*General, teacher training, and other second-level education of a vocational and technical nature. *Universities and other institutions of higher education.

16Excludes data for Democratic Rampuchea, Democratic People's Republic of Korea, Lao People's Democratic Republic, Lebanon, Mongolia, Mozambique, South Africa and Vietnam. 11Data are estimated for 1935.

NDTE.-Because of rounding, details may not add to totals,

SDURCE: United Nations Educational, Scientific, and Cultural Drganization, Paris, Statistical Yearbook, 1986. (This table was prepared August 1987.)

^{*}Includes the U.S.S.R.

*Northern America includes Bermuda, Canada, Greenland, St. Pierre and Miquelon, and the United States of America. Hawaii is included in North America, not Doeania. Central and South America includes the rest of America.

Includes American Samoa, Australia, Guam, and Now Zealand.

Selection based on total population for	i				25,186	21,714	23,245	104	106

^{*}Selection based on total population for midyear 1981.

^{*}First-level enrollment generally consists of elementary grades.

^{*}Second-level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States.

^{*}Third-level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.

^{*}Data are the total enrollment of all ages in the school level divided by the population of the specific age groups which correspond to the school level. Adjustments have been made for the

varying lengths of first- and second-level programs. All third-level ratios are based on the 20-to 24-year-old population. Because some countries have many students from outside the normal age range, first-level ratios may exceed 100.

*Enrollment totels and enrollment ratios exclude North Korea. Enrollment ratios exclude China.

Estimated by the Center for Education Statistics.

Data or 1983.

^{*}Data for 198. **Data for 1976.

^{**}Includes students in general programs only.

NOTE. — Data are for "nonimmigrants," i.e., students who have not migrated to this country. The distribution by continent and region includes estimates for students whose country of origin is unknown. Because of rounding, details may not add to totals.

CHAPTER 7

Learning Resources and Technology

This chapter contains statistics on libraries and on the use of information technologies. These data provide an indication of the extent of America's access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources. Access to information has been widely cited as the key to success in a growing number of endeavors. Thus, how information is made available and to whom become matters of concern.

The tables in this chapter are based on periodic surveys conducted by the National Center for Education Statistics. One table on the availability of selected types of technology has been extracted from a Corporation for Public Broadcasting survey sponsored by the National Center for Education Statistics.

The first section of this chapter has tables dealing with public libraries, public school libraries, and college and university libraries. These tables contain data on collections, population served, staff, and expenditures. A new survey of public school libraries is featured in this edition of the *Digest*. Two tables provide institutional level information for the largest public libraries and the largest college libraries in the country.

The second half of this chapter provides information on the availability and use of technology. For example, the proportion of schools with microcomputers is tabulated for a period of years to permit trend comparisons. Experiences with computer software and programming are presented for recent high school graduates. Comparisons of the availability of information technologies are made for various demographic groups.

Related data may be found in various sections of this report. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences may be found in chapter 3. Further in-

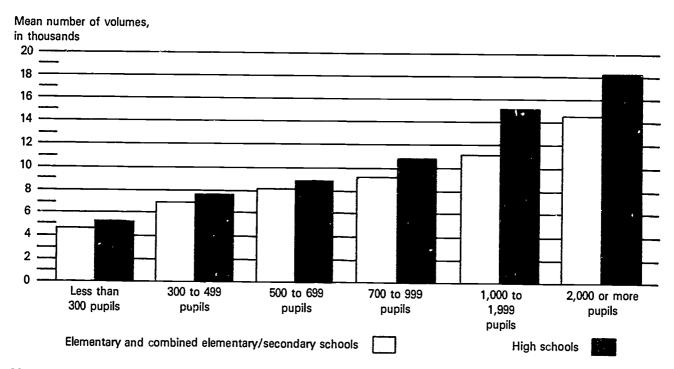

formation on survey methodologies can be found in the Guide to Sources and in the publications cited in the source notes.

Highlights

- In fall 1985, more than 93 percent of all public schools and 75 percent of all private schools had libraries or media centers. (Tables 295 and 297)
- During the 1984-85 school year, public school libraries held an average of 7,668 book titles, 34 periodical subscriptions, and 540 films and filmstrips. (Table 296)
- Total expenditures for college libraries rose by 78 percent between 1974-75 and 1981-82. However, the proportion of college budgets spent on libraries fell from 3.9 percent to 3.5 percent during the same time period. (Table 298)
- The number of public schools using microcomputers has risen rapidly in recent years. Between fall 1981 and fall 1986, the proportion of public schools with computers rose from 18 percent to 97 percent. (Table 300)
- In general, Americans have extensive access to information technologies in their homes. About 99 percent of all adults have television in their homes and 82 percent have audio tape players. More than one-fifth of all school-age children have computers in their homes. (Table 301)
- In 1984, more than half of young adults (who had been high school seniors in 1980) had used computers. More than a third had written a program in a computer language. For those who had written computer programs, the computer languages most often used were BASIC (87 percent) and FORTRAN (27 percent). (Tables 302 and 303)

Guide To Tabular Presentation

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 States and the District of Columbia.

Table Components

Title Describes the table content concisely.

Unit indicator Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

Spanner Describes a group of two or more columns.

Column head Describes specific column.

Stub Describes a row or a group of rows. Each stub is followed by a number of dots (leaders) or by a semicolon if no data appears in the data fields.

Field The area of the table which contains the data elements.

Rules in the field

Single horizontal rules indicate

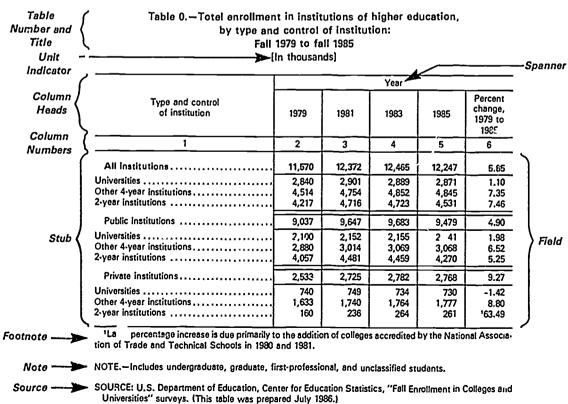

- that the data below the line add to the figure immediately above the line, or
- in the case of derived figures (e.g., percents, medians) that the datum above the line represents a cumulative figure.

Double horizontal rules demarcate groups of related rows.

Single vertical rules delineate columns.

Double vertical rules divide the table into sections with unique stubs.

Example of Table Structure

Footnote Describes a unique circumstance relating to a specific item within the table. Usually listed below the bottom rule of the table.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Average A number that is used to represent the "typical value" of a group of numbers. It is regarded as a measure of "location" or "central tendency" of a group of numbers.

Arithmetic mean is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the "mean" or "average."

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or penditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time but may also be used to express differences between related subjects at a single point in time. The Digest most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

Price of a set of one or more items for related year
Price of the same set of items for base year x 100

When 100 is subtracted from the index number, the result equals the percent change in price from the base

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base year price index (for example, the Consumer Price Index for 1986) by the price index for the year of data to be adjusted and multiplying by the item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year - in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

Guide to Sources

Sources and Comparability of Data

The information presented in this report was obtained from many sources, including Federal and State agencies, private research organizations, and professional associations. The data were collected using many research methods including surveys of a universe (such as all colleges) or of a sample, compilations of administrative records, and statistical projections. Digest users should take particular care when comparing data from different sources. Differences in procedures, timing, phrasing of questions, interviewer training, and so forth mean that the results from the different sources are not strictly comparable. Following the general discussion of data accuracy below, descriptions of the information sources and data collection methods are presented, grouped by sponsoring organization. More extensive documentation of one survey's procedures than of another's does not imply more problems with the data, only that more information is available.

Accuracy of Data

The accuracy of any statistic is determined by the joint effects of "sampling" and "nonsampling" errors. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to nonresponse. To the extent possible, these nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Error

The standard error is the primary measure of sampling variability. It provides a specific range—with a stated confidence—within which a given estimate would lie if a complete census had been conducted. The chances that a complete census would differ from the sample by less than the standard error are about 68 out of 100. The chances that the difference would be less than 1.65 times the standard error are about 90 out of 100; that the difference would be less than 1.96 times the standard error, about 95 out of 100; and that it would less than 2.5 times as large, about 99 out of 100.

To illustrate this concept, consider the table of standard errors and 95 percent confidence intervals for estimates from the "1985 Survey of Fublic and Private School Libraries and Media Centers" sample (table A1). For the estimate that 93.5 percent of all schools have library programs, the table shows that the standard error is 0.54 percent. This means that the chances are about 68 out of 100 that the 93.5 percent estimate differs by \pm 0.54 percent from the value that would result from a complete census. Therefore, the 68 percent confidence interval is 93.0 to 94.0. In order to increase our confidence to 95 percent, we would have to consider estimates within 1.06 percent of our estimate (1.96 times the standard error). Therefore the 95 percent confidence interval (rounded to tenths of a percent) would then be 93.5 ± 1.06 , or 92.4 to 94.6, which is the interval shown in the table.

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The standard error of a difference between two sample estimates is approximately equal to the square root of the sum of the squared standard errors of the estimates. The standard error (se) of the difference between sam ple estimate "a" and sample estimate "b" is:

$$se_{ab} = \sqrt{se_a^2 + se_b^2}$$

It should be noted that most of the standard errors presented in subsequent sections and in the original documents are approximations. That is, to derive estimates of standard errors that would be applicable to a wide variety of items and could be prepared at a moderate cost, a number of approximations were required. As a result, most of the standard errors presented provide a general order of magnitude rather than the exact standard error for any specific item.

The preceding discussion on sampling variability was directed toward a situation concerning one or two estimates. Determining the accuracy of statistical projections is more difficult. In general, the further away the projection date is from the date of the actual data being used for the projection, the greater the possible error in the projection. If, for instance, annual data from 1970 to 1985 are being used to project enrollment in institutions of higher education, the further beyond 1985 one projects, the more variability in the projection. One will be less sure of the 1990 enrollment projection than of the 1986 pro-

Items for public	.	Standard	95 percent confidence interval		
school libraries	Estimate ———	error	Lower	Upper

jection. A detailed discussion of the projections methodology is contained in *Projections of Education Statistics* to 1992-93 (Center for Education Statistics, 1985).

Nonsampling Error

Both universe and sample surveys are subject to nonsampling errors. Nonsampling errors are of two kinds random and nonrandom. Random nonsampling errors may arise when respondents or interviewers interpret questions differently, when respondents must estimate values, or when coders, keyers, and other processors handle answers differently. Nonrandom nonsampling errors result from total nonresponse (no usable data obtained for a sampled unit), partial or item nonresponse (only a portion of a response may be usable), inability or unwillingness on the part of respondents to provide correct information, difficulty interpreting questions, mistakes in recording or keying data, errors of collection or processing, and overcoverage or undercoverage of the target universe. Random nonresponse errors usually, but not always, result in an understatement of sampling errors and thus an overstatement of the precision of survey estimates. Since estimating the magnitude of nonsampling errors would require special experiments or access to independent data, these magnitudes are seldom available.

To compensate for suspected nonrandom errors, adjustments of the sample estimates are often made. For example, adjustments are frequently made for nonresponse, both total and partial. An adjustment made for either type of nonresponse is often referred to as an *imputation*—substitution of the "average" questionnaire response for the nonresponse. Imputations are usually made separately within various groups of sample members which have similar survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent.

Although the magnitude of nonsampling error in the data collected in this *Digest* is frequently unknown, idio-

syncrasies which have been identified are noted on the appropriate tables.

Federal Agency Sources Center for Education Statistics (CES)

Common Core of Data

CES uses the "Common Core of Data" (CCD) survey to acquire and maintain statistical data on the fifty States, the District of Columbia, and the outlying areas from the universe of State-level education agencies. Information about staff and students is collected annually at the school, LEA (local education agency or school district) and State levels. Information about revenues and expenditures is also collected at the State level.

Data are collected for a particular school year (July 1 through June 30) via survey instruments sent to the States by October 15 of the subsequent school year. States have 2 years in which to modify the data originally submitted.

Since the CCD is a universe survey, the CCD information presented in this edition of the *Digest* is not subject to sampling error. However, nonsampling error could come from two sources—nonreturn and inaccurate reporting. Almost all of the States submit the six CCD survey instruments each year, but submissions are sometimes incomplete or too late for publication.

Understandably, when 57 education agencies compile and submit data for over 35,000 public schools and approximately 15,800 local school districts, misreporting can occur. Typically, this results from varying interpretation of CES definitions and differing recordkeeping systems. CES attempts to minimize these errors by working closely with the Council of Chief State School Officers (CCSSO) and its Committee on Evaluation and Information Systems (CEIS).

The State education agencies report data to CES from data collected and edited in their regular reporting cycles for which CES reimburses them. CES encourages the

agencies to incorporate into their own survey systems the CES items they do not already collect so that those items will also be available for the subsequent CCD survey. Over time this has meant fewer missing data cells in each State's response, reducing the need to impute data.

CES subjects data from the education agencies to a comprehensive edit. Where data are determined to be inconsistent, missing, or out of range, CES contacts the education agencies for verification. CES-prepared State summary forms are returned to the State education agencies for verification. States are also given an opportunity to revise their State-level aggregates from the previous survey cycle.

1983-84 Private School Survey

The "1983 Private School Survey" was carried out in two parts, one based on a "list" frame and one based on an "area" frame. The area frame was used under the assumption that the lists available to CES were not comprehensive and that list-building techniques applied to a sample of census areas would reveal some additional private schools. CES started with the most complete list available, comprising some 21,000 schools, and updated it in 1983, based on review of new directories and other published sources. This effort resulter in a list of just under 27,000 schools. This frame was then stratified into 12 strata based on various combinations of religious affiliation and school level. A systematic sample of 1,320 schools was selected with probabilities equal to the square root of the enrollment of the school divided by the sum of the square roots of enrollment for all of the schools in the stratum. Inflating this sample provided an estimation universe, which was subsequently reduced by removing the estimated numbers of duplicates, nonrespondents, coding errors, and ineligibles. The final estimated list universe of schools was 21,710. The response rate for the list sample was 91 percent (1,074 of 1,176 schools), and the response rate for the area sample was 81 percent (733 or 901 schools).

For the area sample, the basic frame was a list of all counties reported from the 1980 census, adjusted so that independent cities were treated as counties and smaller counties were combined with other contiguous counties. This produced a list of 2,497 sampling units. These sampling units were stratified according to census region, in or out of a Standard Metropolitan Statistical Area

(SMSA), and above or below the median private school enrollment for that region and SMSA status, yielding 16 strata. The final sample was a systematic one comprising 75 sampling units, 8 of which were drawn with certainty based upon populations exceeding 1.7 million in the 1980 census. The remaining units were selected with probabilities proportionate to the square root of the population of the unit within the stratum.

For each of the sampling units in the area design, schools not overlapping with the list-frame schools were sought by reviewing directories of various types (e.g., private school organizations, telephone) and by telephoning officials, churches, chambers of commerce, and selected vendors, such as milk companies. This search produced 901 schools which met CES criteria for functioning private schools. When weighted, these data inflated to approximately 6,000 schools nationally. Since the area frame was designed not to overlap with the list frame, results for the area sample were combined with those for the list sample.

A follow-up survey was conducted in 1985. The schools within the sampling areas were drawn from the lists of schools created in the same sample areas frum the "1983 Private School Survey." Since the lists were not updated, schools established after 1983 were not generally eligible for sampling. The estimates for the 1985-86 study are valid for schools that were in existence in 1983. Some of the estimates contain extrapolations for newly established schools, based on assumptions made from the 1983 survey data.

During the fall of 1985 the principal of each sampled school was contacted to obtain the school's participation in the study and to sample up to 10 teachers at the school. During January 1986, questionnaires were mailed to schools and teachers. Followup for questionnaire and item nonresponse was conducted during the spring of 1986. Imputations were made for item nonresponse. Of the 1,387 eligible schools, 1,174 responded (85 percent). A total of 5,295 teacher questionnaires were completed, for a teacher response rate of 76 percent.

1985 Survey of Public and Private School Libraries and Media Centers

Statistics of public school libraries have been collected periodically since 1958. The last survey was conducted in 1978. The 1978 survey form was substantially revised for the 1985 data collection, based on consultations with various associations and individuals including the Amer-

ican Library Association and the American Association of School Librarians. This sample survey was conducted under contract to CES. The survey forms were mailed to a nationally representative sample of 500 public schools in the fall of 1985 and to a sample of 1,700 private schools in January of 1986. Data collection continued throughout the 1985-86 school year until a response rate of 92 percent for public schools and 85 percent for private schools was attained.

Estimates in the library survey tables are based on samples and are subject to sampling variability. Caution should be exercised in interpreting figures based on a relatively small number of cases. Although the standard errors are quite low for most of the national statistics, they can be substantial when comparing data from State to State (these data will be available in other CES reports). In a number of States, budgets restricted sample sizes to 75. Table A1 gives standard errors for several representative statistics. For example, the national estimate of per pupil expenditures for books is \$6.24, and the standard error is \$.15. The chances are thus 95 out of 100 that the result from a complete census would differ from the estimate by less than \$.30 (1.96 times the standard error). The 95 percent confidence interval is thus \$5.94 to \$6.54.

Survey of School Discipline Policies and Practices

This sample survey used the CES Fast Response Survey System (FRSS), which is designed to gather timely information for policy makers. In February 1985, questionnaires were mailed to a stratified national probability sample of 900 public junior and senior high schools, representing approximately 30,000 schools. About 60 schools were determined to be out of the scope for the survey since they did not have regular secondary school programs. The final sample represents an estimated 26,365 schools. The sample was allocated proportionately to the number of schools in each of four strata-junior high, senior high, combined, and other (including ungraded, vocational education, special education, and alternative schools). The survey form was completed by the school administrator (often the principal) most familiar with discipline policies of the school. The response rate for the survey was 93 percent. Responses were adjusted for nonresponse and weighted to national totals. Standard errors for selected items are shown in table A2 as a general guide to the precision of the numbers. Higher Education General Information Survey

The "Higher Education General Information Survey" (HEGIS) is a coordinated effort administered by CES to acquire and maintain statistical data on the characteristics and operations of institutions of higher education. Implemented in 1966, HEGIS is an annual universe survey of institutions listed in the latest CES Education Directory, Colleges and Universities.

The information presented in this report draws on HEGIS surveys which solicit information concerning institutional characteristics, faculty salaries, finances, enrollment, and degrees. Since these surveys are distributed to all higher education institutions, the data presented are not subject to sampling error. However, they are subject to nonsampling error, the sources of which vary with the survey instrument. Each survey will therefore be discussed separately. Information concerning the nonsampling error of the enrollment and degrees surveys draws extensively on the "HEGIS Post-Survey Validation Study" conducted in 1979.

Institutional Characteristics of Colleges and Universities. This survey provides the basis for the universe of institutions presented in the Education Directory, Colleges and Universities, and it is used in all other HEGIS data collection activities. The universe comprises institutions that offer at least a 1-year program of collegelevel studies leading toward a degree and that meet certain accreditation criteria. In the fall, institutions included in the Directory the previous year receive a computer printout of their information to update. Institutions not previously included and which have applied for Directory listing are sent a questionnaire. All institutions reported are certified as eligible to be listed by the Division of Eligibility and Agency Evaluation within the U.S. Department of Education.

Opening Fall Enrollment in Colleges and Universities. This survey has been part of the HEGIS series since its development. The enrollment survey response rate has been relatively high; the 1985 response rate was 92 percent. Major sources of nonsampling error for this survey are classification problems, the unavailability of needed data, interpretation of definitions, the survey due date, and operational errors. Of these, the classification of students appears to be the main source of error. Institutions have problems in correctly classifying first-time

¹Data are for the 1983-84 school year.

freshmen, other first-time students, and unclassified students for both full-time and part-time categories. These problems occur most often at 2-year institutions (both private and public) and private 4-year institutions. In 1977-78, the classification problem led to an estimated overcount of 11,000 full-time students and an undercount of 19,000 part-time students. Although the ratio of error to the grand total was quite small (less than 1 percent), the percentage of errors was as high as 5 percent for detailed student levels and even higher at certain aggregation levels.

Beginning with fall 1986, the survey system was redesigned with the introduction of the Integrated Postsecondary Education Data System (IPEDS). The new survey system comprises all postsecondary institutions, but also maintains comparability with earlier surveys by allowing HEGIS institutions to be tabulated separately. The new system also provides for preliminary and revised data releases. This allows the Center flexibility to release early data sets while still maintaining a more accurate final data base. For example, the fall 1986 IPEDS enrollment data in this report exclude 16,000 students whose level and enrollment status could not be determined in time for the preliminary release. In the final release, this undercount and other items will be revised.

Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty. This survey has been conducted every year since 1966, except for 1973-74. Although the survey form has changed a number of times during these years, only comparable data are presented in the report. The data are collected from the colleges and universities in a summary fashion.

This survey differs from other HEGIS surveys in that imputations are not made for nonrespondents. Thus,

²Includes only reported thefts of personal items valued at \$10.00 or more.

there is some possibility that the salary averages presented in this report may differ from the results of a complete enumeration of all colleges and universities. The response rate for the 1984-85 survey was 86.3 percent. The response rate for public colleges was substantially higher than the response rate for private colleges. It is probable that the public colleges' salary data are more accurate than the data for private colleges. Other sources of nonsampling error include computational errors and misclassification in reporting and processing. CES checks individual colleges' data for internal and longitudinal consistency and contacts the colleges to check inconsistent data.

Earned Degrees Conferred. This survey has been part of the HEGIS series since its development. However, the degree classification taxonomy was revised in 1970-71 and 1982-83. Though information from survey years 1970-71 through 1981-82 is directly comparable, care must be taken if information before or after that period is included in any comparison. Degrees-conferred trend tables arranged by the 1982-83 classification have been added to the Digest to provide consistent data from 1970-71 to 1985-86. Data in this edition on associate and other formal awards below the baccalaureate are not directly comparable with figures for earlier years. The nonresponse rate does not appear to be a significant source of nonsampling error for this survey. The return rate over the years has been extremely high, with the response rate for the 1983-84 survey at 95 percent. Because of the high return rate, nonsampling error caused by imputation would also be minimal.

The major sources of nonsampling error for this survey are differences between the HEGIS program taxonomy and taxonomies used by the colleges, classification of double majors and double degrees, operational problems, and survey timing. In the 1979 validation study, these sources of nonsampling error were found to contribute to an error rate of 0.3 percent overreporting of bachelor's degrees and 1.3 percent overreporting of master's degrees. The differences, however, varied greatly among fields. Over 50 percent of the fields selected for the validation study had no errors identified. Categories of fields that had large differences were business and management, education, engineering, letters, and psychology. It is also shown that differences in proportion to the published figures were less than 1 percent for most of the selected fields that had some errors. Exceptions to these were: master's and Ph.D. programs in labor and industrial relations (20 percent and 8 percent); bachelors's and master's programs in art education (3 percent and 4 percent); bachelor's and Ph.D. programs in business and commerce, and in distributive education (5 percent and 9 percent); master's programs in philosophy (8 percent); and Ph.D. programs in psychology (11 percent).

Financial Statistics of Institutions of Higher Education. This survey has been part of the HEGIS series since its development. A number of changes were made in the financial survey instruments in 1975. In 1982 another change was made to include Pell Grants in Federal restricted grants and contracts revenues and restricted scholarships and fellowships expenditures. While these changes were significant, only comparable information on trends is presented in this report, except where noted. Finance tables for this publication have been adjusted by subtracting the Pell Grant amounts from the later data to maintain comparability with pre-1982 data.

Other possible sources of nonsampling error in the financial statistics are nonresponse, imputation, and misclassification. The response rate has been over 90 percent for most of the years reported. The response rate for the latest (fiscal year 1985) survey was 87.6 percent.

Two general methods of imputation have been used. If the prior year's data were available for a nonresponding institution, these data were inflated using the Higher Education Price Index and adjusted according to changes in enrollments. If no previous year's data were available, current data were used from peer institutions selected for location (State or region), control, level, and enrollment size of institution. For the most recent years reported, the imputation method did not include the adjustment for changes in enrollments, and new institutions which never reported to HEGIS surveys were not imputed. For the fiscal year 1985 survey, survey forms were mailed to 3,379 institutions. Reports were received from 2,959 institutions, and data for 370 institutions were estimated based on their fiscal year 1984 reports inflated by the Higher Education Price Index. The remaining 50 institutions were not imputed because they had never responded to HEGIS surveys. It should be noted that the imputed current-fund expenditures of the nonrespondents have generally been less than 3 percent of the aggregate U.S. total.

To reduce reporting error, CES uses national standards for reporting finance statistics. These standards are contained in *Colleges and University Business Administration: Administrative Services (1974 Edition)*, published by the National Association of College and University Business Officers; *Audits of Colleges and Universities* (as amended August 31, 1974), by the American Institute of Certified Public Accountants; and *HEGIS Financial Reporting Guide (1980)*, by CES. Wherever possible, definitions and formats in the survey form are consistent with those in these three accounting texts.

Questions concerning the surveys used as data sources for this report or other questions concerning HEGIS can be directed to:

Integrated Postsecondary Education Data System

Beginning with surveys for the 1986-87 school year, the Center expanded its collection of postsecondary data. The Integrated Postsecondary Education Data System

(IPEDS) surveys all postsecondary institutions, including universities and colleges as well as institutions offering technical and vocational education beyond the high school level. This survey will enable, for the first time, a comprehensive coverage of education data for all postsecondary institutions. The higher education portion of this survey is a census of all education institutions similar to HEGIS; however, data from the other technical and vocational institutions will be collected through a sample survey. Thus, some portions of the data will be subject to sampling and nonsampling errors, while some portions will be subject only to nonsampling errors. The tabluations on institutional characteristics developed for this edition of the Digest are based on lists of all institutions and are not subject to sampling errors. Further information on IPEDS may be obtained from:

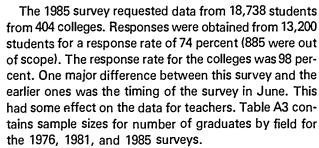

Postsecondary Education Statistics Division Center for Education Statistics 555 New Jersey Avenue, NW Washington, DC 20208

Survey of Recent College Graduates

CES has conducted periodic surveys to collect informaticn on college outcomes. The "Recent College Graduates" surveys have concentrated on those graduates entering the teaching profession. To obtain accurate results on this subgroup, graduates who are newly qualified to teach have been oversampled in each of the surveys. The survey involves a two-stage sampling procedure. First, a sample of institutions awarding bachelor's and master's degrees is selected and stratified by percent of education graduates, control, and geographic region. Then for each of the selected institutions a sample of degree recipients is chosen. The response rates on the "Recent College Graduates" survey have tended to be low because of the great difficulty in tracing the students after graduation. Much more of the nonresponse can be attributed to invalid mailing addresses than to refusals to participate. Despite their shortcomings, the data are presented in this report because they provide valuable information not available elsewhere about college outcomes. Users should be cautious about drawing conclusions based on data from small samples. It is also likely that the data are somewhat biased since the more mobile students, such as graduate students, are the most difficult to track for the survey.

The 1976 survey of 1974-75 college graduates was the first and smallest of the series. The sample consisted of 209 schools, of which 200 (96 percent) responded. Of the 5,506 graduates in the sample, 4,350 responded for a response rate of 79 percent.

The 1981 survey was somewhat larger with a coverage of 301 institutions and 15,852 students. Responses were obtained from 286 institutions, for an institutional response rate of 95 percent, and from 9,312 graduates (716 others were determined to be out of scope), for a response rate of 62 percent.

High School and Beyond

"High School and Beyond" (HSB) is a national longitudinal survey of 1980 high school sophomores and seniors. The base-year survey was a probability sample of 1,015 high schools with a target number of 36 sophomores and 36 seniors in each of the schools. A total of 58,270 students participated in the base-year survey. Substitutions were made for noncooperating schools—but not for students—in those strata where it was possible. Overall, 1,122 schools were selected in the original sample and 811 of these schools participated in the survey. An additional 204 schools were drawn in a replacement sample. Student refusals and student absences resulted in an 82 percent completion rate for the survey.

Several small groups in the population were oversampled to allow for special study of certain types of schools and students. Students completed questionnaires and took a battery of cognitive tests. In addition, a sample of parents of sophomores and seniors (about 3,600 for each cohort) was surveyed.

HSB first followup activities took place in the spring of 1982. The sample design of the first followup survey called for the selection of approximately 30,000 1980 sophomores. The completion rate for sophomores eligible for on-campus survey administration was about 96 percent. About 89 percent of the students who left school between the base year and first followup surveys (dropouts, transfer students, and early graduates) completed the first followup sophomore questionnaire.

As part of the first followup survey of "High School and Beyond," transcripts were requested in fall 1982 for an 18,152-member subsample of the sophomore cohort. Of the 15,941 transcripts actually obtained, 1,969 were excluded because the students had dropped out of school before graduation, 799 were excluded because they were incomplete, and 1,057 were excluded because the student graduated before 1982 or the transcript indicated neither a dropout status nor graduation. Thus 12,116

transcripts were utilized for the overall curriculum analysis presented in this publication. All courses in each transcript were assigned a six-digit code based on A Classification of Secondary School Courses (developed by Evaluation Technologies, Inc. under contract with CES). Credits earned in each course were expressed in Carnegie units. (The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. To receive credit for a course, the student must have received a passing grade—"pass," "D," or higher.) Students who transferred from public to private schools or from private to public schools between their sophomore and senior years were eliminated from public/private analyses.

In designing the senior cohort ' followup survey, one of the goals was to reduce the size of the retained sample, while still keeping sufficient numbers of minorities to allow important policy analyses. A total of 11,227 (94 percent) of the 11,995 persons subsampled completed the questionnaire. Information was obtained about the respondents' school and employment experiences, family status, and attitudes and plans.

The sample for the second followup, which took place in spring 1984, consisted of about 12,000 members of the senior cohort and about 15,000 members of the sophomore cohort. The completion rate for the senior cohort was 91 percent, and the completion rate for the sophomore cohort was 92 percent.

HSB third followup data collection activities were performed in spring of 1986. Both the sophomore and senior cohort samples for this round of data collection were the same as those used for the second followup survey. The completion rates for the sophomore and senior cohort samples were 91 percent and 88 percent, respectively.

Table A4 contains the maximum number of cases that are available for the . bulations of the specific classification variables used throughout this publication.

The standard error (se) of an individual percentage (p) based on HSB data can be approximated by the formula

$$se_{p} = DEFT \sqrt{p(100-p)/n}$$

where n is the sample size and DEFT is a factor used to adjust for the particular sample design used in HSB. Table A5 provides the DEFT factors for different HSB samples and subsamples.

In evaluating a difference between two percentages, the standard error of the difference may be conservatively approximated by taking the square root of the sum of the squared standard errors of the two percentages. For example, in the 1986 followup of 1980 sophomores, 84.0 percent of the men and 77.2 percent of the women felt that being successful in work was "very important," a difference of 6.8 percentage points. Using the formula and the sample sizes from table A4 and the DEFT factors from table A5, the standard errors of the two percentages being compared are calculated to be:

$$1.43 \sqrt{(84.0)(16.0)/5,391} = .714$$
$$1.43 \sqrt{(77.2)(22.8)/5,857} = .784$$

Table A4.-Respondent counts for selected "High School and Beyond" surveys

^{&#}x27;The SES index is a composite of five equally weighted measures, father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

semesters were classified as part time. Students who had neither enrolled on a full time or part time basis in each of the four semesiers were classified as never enrolled.

*Responses to questions concerning participation in each of 15 different extracurricular activity areas (i.e., varsity sports, debate, band, subject matter clubs, etc.) were used to classify students' on all level of participation in extracurricular activities. The difference between sum of the three category respondent counts and the total sample size is due to missing data.

430

²Includes attendance at 3 vocational, trade, or business school, or 2-year college, or attendance at a 4 year college resulting in less than a bachelor's degree.

³Includes those with a bachelor's or higher level degree.

^{*}Postseconda., education status was determined by students' enrollment in academic or vocational study during the four semesters—fall 1982, spring 1983, fall 1983, and spring 1984—following their scheduled high school graduation. Studentr who enrolled in full-time study in each of the four semesters were classified as full-time. Students who were enrolled in part-time study in any of the four semesters and those who were enrolled in full-time study in fewer than four

⁻Data not applicable.

NOTE. – Data from students who dropped out of school between the 10th and 12th grades were not used in analyses of sophomore samples.

Subsample characteristic	Followup survey of 1980 sophomores in 1984	Followup survey of 1980 seniors in 1984	Followup survey of 1980 sophomores in 1986	Followup survey of 1980 seniurs in 1986
Total sample	2.40 (1.54)	2.87 (1.69)	2.19 (1.47)	2.28 (1.50)
Sex Males	-	-	2.07 (1.43) 2.06 (1.43)	2.13 (1.45) 2.26 (1.50)
Race/ethnicity Whites and others	2.06 (1.42) 2.22 (1.47) 3.15 (1.73)	2.09 (1.44) 2.26 (1.50) 3.72 (1.92)	1.92 (1.38) 2.19 (1.47) 3.11 (1.76)	1.70 (1.30) 2.40 (1.54) 4.06 (2.01)
Socioeconomic status composite (SES) Low	1.91 (1.37) 1.95 (1.39) 2.05 (1.42)	2.28 (1.50) 1.81 (1.34) 1.93 (1.38)	1.83 (1.35) 2.06 (1.42) 1.92 (1.38)	2.31 (1.51) 2.02 (1.42) 1.71 (1.30)

-Not available.

NOTE.—The average design effect for the 1980 sophomore cohort first followup (1982) survey is 3.59(1.89) and the average design effect for the 1980 senior first followup (1982) survey is 2.64(1.62).

The standard error of the difference is therefore

$$\sqrt{.714^2 + .784^2} = \sqrt{.510 + .615} = 1.06$$

The sampling error (95 chances in 100) of the difference is approximately double the standard error, or approximately 2.1 percentage points, and the 95 percent confidence interval for the difference is 6.8 ± 2.1 , or 4.7 to 8.9 percentage points.

The standard error estimation procedure outlined above does not compensate for survey item nonresponse, which is a source of nonsampling error. (Table A4 reflects the maximum number or responses that could be tabulated by demographic characteristic.) For example, or the 10,925 respondents in the 1984 rollowup survey of 1980 high school in duates, 372 or 3.4 percent did not respond to the particular question on whethe, they had ever used a pocket calculator. Item nonresponse varied considerably. A very low nonresponse rate of 0.1 percent was obtained for a question asking whether the respondent had attended a postsecondary institution. A much higher item nonresponse rate of 12.2 percent was obtained for a question asking if the respondent had used a micro or minicomputer in high school. Typical item nonresponse rates ranged from 3 to 4 percent.

The Hispanic analyses presented in this report relied on students' self-identification as members of one of four Hispanic subgroups: Mexican, Mexican-American, Chicano; Cuban, Cubano; Puerto-Rican, Puertorriqueno, or Boricua; or other Latin American, Latino, Hispanic, or Spanish descent.

A CES series of technical reports and data file users manuals provides additional information on the survey

methodology. Further information on the "High School and Beyond" survey may be obtained from:

Projections of Education Statistics

Since 1964, CES has published *Projections* of *Education Statistics*, projecting for elementary and secondary schools and institutions of higher education key statistics including enrollments, instructional staff, graduates, and earned degrees. *Projections* includes several alternative projection series and a methodology section describing the techniqu. and assumptions used to prepare them. Data in this edition of the *Digest* reflect the intermediate *Projection* series only.

Differences between the reported and projected values are of course almost inevitable. An evaluation of past projections received that, at the elementary and secondary level, projections of enrollment have been quite accurate: Mean absolute percentage differences for enrollment were less than 1 percent for projections from 1 to 5 years into the future, while those for teachers were less than 4 percent. At the higher education level, projections of enrollment have been fairly accurate: Mean absolute percentage differences were 5 percent or less for projections from 1 to 5 years into the future.

Since projections of time series are subject to errors both by the nature of statistics and the properties of projection methodologies, users are cautioned not to place

too much confidence in the numerical values of the projections. Important but unforeseeable economic and social changes may lead to differences, particularly at the higher education level. Rather, projections are to be considered as indicators of broad trends.

For further information about projection methodology and accuracy, contact:

Debra E. Gerald Crosscutting Education Statistics and Analysis Division Center for Education Statistics 555 New Jersey Avenue, NW Washington, DC 20208

National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) is a cross-sectional study designed and initially implemented in 1969. Each year, NAEP has gathered information about selected levels of educational achievement across the country. NAEP has surveyed the educational attainments of 9-, 13-, and 17-year-olds and young adults (ages 25-35) in 10 learning areas. Different learning areas have been assessed periodically, and all areas have been reassessed in order to measure possible changes in educational achievement.

The reading assessment presented in this publication was designed by the Education Commission of the States and conducted by the Educational Testing Service. Multistage probability samples were used. The primary sampling units were stratified by region and, within region, by State, size of community, and, for the two smaller sizes of community strata, by socioeconomic level. Assessment exercises were administered either to individuals or to small groups of students by specially trained personnel.

Sample sizes for the reading proficiency portion of the 1983-84 NAEP study were 22,291 for the 9-year-olds, 22,693 for the 13-year-olds, and 25,193 for the 17-year-olds. Response rates were 92 percent, 90 percent, and 82 percent, respectively. Response rates for earlier years (1971, 1975, and 1980) were generally lower. For example, the lowest response rate for the 9-year-olds was 88 percent in 1975, and the lowest response rate over all was 70 percent for the 17-year-olds in 1975. Data on standard errors are provided in table A6.

The literacy assessment data used in this report are based on a nationally representative household sample of 21- to 25-year-olds. Blacks and Hispanics were oversampled to allow samples of sufficient size for reliable results. A total of 38,400 households were screened to locate 4,494 potential respondents. (No more than one person was surveyed from any one household.) Of the potential respondents, 3,618 youn; adults participated, resulting in a response rate of 80 percent. Table A7 contains standard errors for selected estimates.

The 1983-84 NAEP writing assessment used a stratified, three-stage sampling design. The first stage was

counties (or aggregates of counties). The second stage was schools and the third stage involved selecting students within the schools at random. The 1983-84 assessment included 24,437 students 9 years old, 26,228 students 13 years old, and 28,992 students 17 years old.

Beginning in 1923-84, NAEP began sampling students by grade level as well as by age. The sample from which national writing assessment data were gathered included 14,047 students at grade 4, 21,850 students at grade 8, and 22,865 students at grade 11. Student response rates for grades 4, 8, and 11 were 91.3 percent, 87.3 percent, and 82.8 percent, respectively.

Students at each grade level/age were asked to complete from one to four different writing tasks out of a total of 15 tasks. The tasks were designed to assess a range of writing skills, including informative, persuasive, and imaginative writing. Each task was administered to a national probability sample of about 2,000 students.

Information from NAEP is subject to both nonsampling and sampling error. Two possible sources of nonsampling error are nonparticipation and instrumentation. Certain populations have been oversampled to assure samples of sufficient size for analysis. Instrumentation nonsampling error could result from failure of the NAEP assessment instruments to measure what is being taught and what is being learned by the students. Standard errors for NAEP writing scale scores are presented in table A8.

National Longitudinal Study

The National Longitudinal Study (NLS) of the high school class of 1972 began with the collection of base year survey data from a sample of about 19,000 high school seniors in spring of 1972. Five more followup surveys were conducted in 1973, 1974, 1976, 1979, and 1986. The NLS was designed to provide the education community with information on the flow of young adults from high school through the postsecondary educational and occupational systems.

The sample design for the NLS is a stratified, two-stage probability sample of students from all schools, public and private, in the 50 States and the District of Columbia with a twelfth grade enrollment during the 1971-72 school year. During the first-stage of sampling about 1,070 schools were selected for participation in the base-year survey. As many as 18 students were selected at random from each of the sample schools. Both the size of the school and student samples were increased during the first followup survey. Beginning with the first followup and continuing through the fourth followup, about 1,300 schools participated in the survey and slightly under 23,500 students were sampled. The response rates

NOTE. - The writing scale score runges from 0 to 400 and is defined as the average of a respondent's estimated scores on 10 specific writing tasks. The average response method is used to estimate average writing achievement for each participant as if each had performed all 10 writing tasks. Standard errors are estimated using a jackknife replication procedure.

for each of the different rounds of data collection have been 80 percent or higher.

Sample retention rates across the survey years have been quite high. For example, of the individuals responding to the base-year questionnaire, the percentages who responded to the first, second, third, and fourth followup questionnaires were about 94, 93, 89, and 83 percent, respectively. Similar retention rates are found between the subsequent surveys.

Approximate standard errors for the percentage estimates based on NLS data reported in this publication may be estimated by the formula

$$se_p = DEFT \sqrt{p(100-p)/n}$$

where p is the estimated percentage and n is the sample size. DEFT is the root design effect factor used to adjust for the sample design used in NLS. For the first, second, and third followup surveys, the root design effect adjustment factors are 1.18, 1.16, and 1.20. Standard errors for the fourth followup survey data are adjusted by a generalized design effect factor of 1.20. Table A9 lists the approximate respondent counts for the classification variables used in this year's *Digest*. Table A10 gives examples of the approximate standard errors of percentage estimates based on the fourth followup survey for different sample sizes.

Second International Mathematics Study

The "Second International Mathematics Study" was organized as a cooperative undertaking of research institutes in about 21 countries represented in the International Association for Evaluation of Educational Achievement (IEA). Sample surveys of two population groups were conducted during the 1981-82 school year in 20 countries. Data were collected from school administrators, teachers, and students.

"Population A" included all students in the grade in which the majority of students had attained the age of 13.0 to 13.1 years by the middle of the school year. In all countries, school enrollment is nearly universal at that age, which represents the final year of elementary school for most countries. For the United States, Population A was the eighth grade. For Japan, the seventh grade was

chosen for study because the cognitive mathematics tests were more appropriate for that grade level.

"Population B" was defined as all students who were in the terminal grade of secondary education and who were studying mathematics as a substantial part of their academic program, taking at least 5 hours of mathematics classes each week. In the United States, classes of precalculus and calculus were chosen. These classes represented about 12 percent of the total age group. In other countries, Population B represented between 6 and 50 percent of the age group.

About 20 countries' educational systems participated in the Population A survey and 15 systems participated in the Population B survey. The 35 samples ranged in size from 1,000 to 8,800 students.

Because of the variations in student curriculum, survey design, and other factors from country to country, the results of this survey should be used with care. Further information on the sampling methodology and response rates is available from:

Office for Civil Rights

Civil Rights Survey of Elementary and Secondary Schools

The Office for Civil Rights (OCR) of the U.S. Department of Education conducts biennial surveys of public school districts and of schools within those districts. Data are obtained on the characteristics of pupils enrolled in public schools throughout the Nation. Such information is required by OCR to fulfill its responsibilities under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973. The 1984 survey was a stratified random sample of approximately 3,500 districts representing approximately 34,000 schools. The sample was stratified by State, district size, and estimated number of minority students. Further information is available from:

Anne Yorke
Office for Civil Rights
U.S. Department of Education

Bureau of the Census

Current Population Survey

Current estimates of school enrollment as well as social and economic characteristics of students are based on data collected in the Census Bureau's monthly household survey of about 60,000 households. The monthly "Current Population Survey" (CPS) sample consists of 614

areas comprising 1,113 counties, independent cities, and minor civil divisions throughout the 50 States and the District of Columbia. The sample was initially selected from the 1970 census files and is periodically updated to reflect new housing construction when possible.

The monthly CPS deals primarily with labor force data for the civilian noninstitutional population (i.e., excluding military personnel and their families living on post and

³Includes attenuance at a vocational, trade, or business school, or 2-year college, or attendance at a 4-year college resulting in less than a bachelor's degree.

³Includes those with a bachelor's or higher level Cagree.

inmates of institutions). In addition, supplemental questions are asked about the education of all eligible members of the household. The October 1982 survey obtained information about highest grade completed, level of current enrollment, attendance status, number and type of courses, degree or certificate objective, and type of organization offering instruction. Information on enrollment status by grade is gathered each October.

The estimation procedure employed for the monthly CPS data involves inflating weighted sample results to independent estimates of characteristics of the civilian noninstitutional population in the United States by age, sex, and race. These independent estimates are based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the population in the armed services. Generalized standard error tables are provided in the *Current Population Reports*. The data are subject to both nonsampling and sampling errors.

Further information is available in the *Current Population Reports*, Series P-20, or by contacting:

Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233

School Enrollment. Each October, the "Current Population Survey" (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over. The main sources of nonsampling variability in the responses to the supplement are those inherent in the survey instrument. The question concerning educational attainment may be sensitive for some respondents, who may not want to acknowledge the lack of a high school diploma. The question of current enrollment may not be answered accurately for various reasons. Some respondents may not know current grade information for every student in the household, a problem especially prevalent for households with members in college or in nursery school. Confusion over college credits or hours taken by a student may make it difficult to determine the year in which the student is enrolled. Problems may occur with the definition of nursery school (a group or class organized to provide educational experiences for children) where respondents' interpretations of "educational experiences" vary.

Examples of sampling variability in the estimates of school enrollment rates are given in table A11. Questions concerning the CPS "School Enrollment" survey may be directed to:

Education and Social Stratification Branch Bureau of the Census U.S. Department of Commerce Washington, DC 20233

Educational Attainment. Data on years of school completed are derived from two questions on the "Curt Population Survey" (CPS) instrument. Formal re-

ports documenting educational attainment are produced by the Bureau of the Census using March CPS results. The latest report is *Educational Attainment in the United States, March 1982* to *1985*, Series P-20, No. 415, which is available from the Government Printing Office.

In addition to the general constraints of the CPS, some data indicate that the respondents have a tendency to overestimate the educational level of members of their household. Some inaccuracy is due to a lack of the respondent's knowledge of the exact educational attainment of each household member and the hesitancy to acknowledge anything less than a high school education. Another cause of nonsampling variability is the change in the numbers in the armed services over the years. In 1970, 25 percent of all males 20 and 21 years old were in the armed services. By 1974, this had decreased to less than 10 percent. The exclusion of members of the armed services appears to increase the proportion of the CPS population with some college and decrease the proportion of those who finished high school but went no further. After 1974, there was more stability in the proportion of young men in the military.

Beginning with the data for March 1980, tabulations have been controlled for the 1980 census. Examples of the sampling variability in the estimates of educational attainment are given in table A12. The figures shown in the table hold for total or white population estimates only. The variability in estimates for subgroups (region, household relationships, etc.) can be estimated using the tables presented in *Current Population Reports*. Questions concerning "Educational Attainment in the United States" may be directed to:

Education and Social Stratification Branch Bureau of the Census U.S. Department of Commerce Washington, DC 20233

Participation in Adult Education Survey. In May of 1969, 1972, 1975, 1978, 1981, and 1984, the "Current Population Survey" (CPS) included a supplemental inquiry on "Participation in Adult Education" (PAE). In addition to the questions on the CPS, interviewers asked if anyone in the household 17 years of age or older had participated in adult education in the 12-month period prior to the survey date. A survey form was filled out by the interviewer or left with a proxy member of the household for participants who were not at home at the time of the interview. In 1981, the supplement form was no longer left with the proxy but completed by the interviewer.

The PAE response rate of 94 percent in 1981 must be viewed in conjunction with the 96-percent response rate of the CPS. The overall response rate for the PAE survey in 1981 is then 90 percent. Examples of the sampling variability in the estimates from the PAE survey are given in tables A13 and A14.

The figures shown in the tables hold for total or white population estimates only. The variability in estimates for

subgroups (employment status, income, education, etc.) can be estimated using the tables *Current Population Reports*. Further information concerning the PAE survey may be obtained from:

Postsecondary Education Statistics Division Center for Education Statistics 555 New Jersey Avenue, NW Washington, DC 20208

National Institute on Drug Abuse

The National Institute on Drug Abuse of the U.S. Department of Health and Human Services is the primary supporter of the long-term study entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted at the University of Michigan, Institute for Social Research. One component of the study deals with student drug abuse. Results of a national sample survey have been published annually since 1975. Approximately 125 to 135 schools have participated each year. With the exception of 1975 when about 9,400 students participated in the survey, more than 15,000 students have participated in the survey annually. For the class of 1986, about 15,200 students responded to the survey. Over the years, the response rate has varied from 77 to 84 percent. Table A15 provides examples of the survey's sampling error.

The data in this survey represent only high school seniors. Understandably, there will be some reluctance to admit illegal activities. Also, students who were out of school on the day of the survey were nonrespondents. The survey dia not include high school dropouts. The inclusion of these two groups would tend to increase the proportion of individuals who had used drugs. A 1983 study found that the inclusion of the absentees could increase some of the drug usage estimates by as much as 2.7 percent. (Details on that study and its methodology were published in Drug Use Among American High School Students, College Students, and Other Young Adults, by Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, available from the National Clearinghouse on Drug Abuse Information, 5600 Fishers Lane, Rockville, MD 20857.) Further information on this survey may be obtained from:

National Institute on Drug Abuse
Division of Epidemiology and Statistical Analysis

Rockville, MD 20857

National Science Foundation

Federal Obligations to Colleges and Universities and Selected Nonprofit Institutions

Each year the National Science Foundation collects data on obligations to colleges and universities from Federal agencies. Obligations differ from expenditures in that funds obligated during one fiscal year may be spent by the recipient in later years. The fiscal year 1983 data

were submitted by 15 Federal agencies. Obligation amounts include direct Federal support, so that amounts subcontracted to other institutions are included. Those funds received through subcontracts are excluded. Also excluded from the data are certain types of financial assistance such as the Department of Education's Guaranteed Student Loan Program and obligations to the U.S. service academies. For purposes of tabulations in this publication, university administered federally funded research and development centers (FFRDC's) have been included in appropriate State totals.

The universe of academic institutions for this survey is based on the Higher Education General Information Survey conducted by the Center for Education Statistics (see above). Institutions without Federal support were excluded and some systems were combined into single reporting units.

Further information on this survey may be obtained from Federal Support to Universities, Colleges, and Selected Nonprofit Institutions, published by the National Science Foundation or by contacting:

Universities and Nonprofit institutions Study Group Division of Science Resources Studies National Science Foundation, Room L-602 Washington, DC 20550

Survey of Scientific and Engineering Expenditures at Universities and Colleges

The universe for this survey included 563 institutions in the United States and outlying areas that had a master's or doctor's degree program in the sciences or engineering. In addition, schools that had \$50,000 or more in separately budgeted research and development expenditures and 19 federally funded research and development centers were included. Altogether, these institutions represented approximately 99 percent of all college and university research and development.

The survey instrument has remained essentially unchanged in recent years to facilitate consistent responses. The field of study details match the standard field codes in the *Classification* of *Instructional Programs*, published by CES. The response rate for the 1982 survey was 81 percent. The remaining institutions were imputed. The imputation amounted to only 6 percent of the total expenditures reported, since the nonrespondents tended to be smaller institutions. The survey process included a verification procedure in which trend data for the past two reports and the current survey were sent to each institution. The institutions were given an opportunity to amend the current and past figures. These revisions have been incorporated in the National Science Foundation data base.

Further information on this survey may be obtained from Academic Science/Engineering, R&D Funds, published by the National Science Foundation, or by contacting:

Table A15.—Percent of seniors who had ever used selected drugs and 95 percent confidence limits: 19861

The Office of Special Education and Rehabilitative Services

Annual Report to Congress on the Implementation of the Education of the Handicapped Act

The Education of the Handicapped Act (EHA) requires the Secretary of Education to transmit to Congress annually a report describing the progress in serving the Nation's handicapped children. The annual report contain information on such children served by the public schools under the provisions of Part B of the EHA and for children served in State operated programs (SOP) for the handicapped under Chapter I of the Education Consolidation and Improvement Act (ECIA). Statistics on children receiving special education and related services in various settings and school personnel providing such services are reported in an annual submission of data to the Office of Special Education and Rehabilitative Services (OSERS) by the 50 States, the District of Columbia, and the outlying areas. The child count information ic based on the number of handicapped children receiving special education and related services on December 1st of each year for EHA and October 1st for Chapter I of ECIA/SOP.

Since each participant in programs for the handicapped is reported to OSERS, the data are not subject to sampling error. However, nonsampling error can occur from a variety of sources. Some States follow a noncategorical approach to the delivery of special education services but produce counts by handicapping condition only because EHA-B requires it. In those States that do categorize their handicapped students, definitions and labeling practices vary.

Further information on the Annual Report to Congress may be obtained from:

American College Testing Program

The American College Testing (ACT) Assessment is designed to measure educational development in the areas of English, mathematics, social studies, and natural sciences. The ACT Assessment is taken by college-bound high school students and the test results are used to predict how well students might perform in college.

Prior to the 1984-85 school year, national norms were based on a 10 percent sample of the students taking the test. Since then, national norms are based on the test scores of all students taking the test. Moreover, beginning with 1984-85 these norms have been based on the most recent ACT scores available from students scheduled to graduate in the spring of the year. Duplicate test records are no longer used to produce national figures.

Separate ACT standard scores are computed for English, mathematics, social studies, and natural science. ACT standard scores are reported for each subject area on a scale from 1 to 36. The four ACT standard scores have a mean (average) of about 19 and a standard deviation of about 6 for college-bound students nationally. A composite score is obtained by taking the simple average of the four standard scores and is an indication of student's overall academic development across these subject areas.

It should be noted that college-bound students who take the ACT Assessment are not representative in some respects of college-bound students nationally. First, students who live in the Midwest, Rocky Mountains and Plains, and the South are overrepresented among ACT-tested students as compared with college-bound students nationally. Second, ACT-tested students tend to enroll in public colleges and universities more frequently than do college-bound students nationally.

For further information, contact:

The American College Testing Program 2201 North Dodge Street P.O. Box 168 lowa City, IA 52243

College Entrance Examination Board

The Admissions Testing Program of the College Board comprises a number of college admissions tests, including

the Preliminary Scholastic Aptitude Test (PSAT) and the Scholastic Aptitude Test (SAT). High school students participate in the testing program as sophomores, juniors, or seniors—some more than once during these 3 years. If they have taken true tests more than once, only the most recent scores are tabulated. The PSAT and SAT report subscores in the areas of mathematics and verbal ability.

The SAT results are not representative of high school students or college-bound students nationally since the sample is self-selected. Generally tests are taken by students who need the results to attend a particular college or university. The State totals are greatly affected by the requirements of its State colleges. Public colleges in a number of States require ACT scores rather than SAT scores. Thus the proportion of students taking the SAT in these States is very low and is inappropriate for any comparison. In recent years about 1 million high school students have taken the examination annually.

Further information on the SAT can be obtained from:

College Entrance Examination Board Educational Testing Service Princeton, New Jersey 08541

Council for Aid to Education

The Council for Aid to Education, Inc. (CFAE) is a notfor-profit corporation funded by contributions from business. CFAE sponsors public service compaigns and provides consulting and research services on voluntary support for education institutions. Each year, CFAE conducts a survey of colleges and universities and private elementary and secondary schools to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received during the academic ...ar. In the 1985-86 study, survey forms were sent to approximately 2,800 colleges and universities and about 1,200 responded. The response rates were much higher for the 4-year colleges than for the 2-year colleges. For example, 86 percent of the doctoral level institutions and 63 percent of the comprehensive and general baccalaureate colleges participated in the survey. CFAE estimates that about 85 percent of all voluntary support is reported in the survey because of the high participation of institutions receiving large amounts of funding. Survey forms are reviewed by CFAE for internal consistency before preparing a computerized data base. Institutional reports of voluntary support data from the CFAE "Survey of Voluntary Support of Education" are more comprehensive and detailed than the related data in the "Financial Statistics of Institutions of Higher Education" survey conducted by CES. The results from the "Survey of Voluntary Support of Education" are published in the annual Voluntary Support of Education, which may be purchased from CFAE.

Council of State Directors of Programs for the Gifted

The Council of State Directors of Programs for the Gifted is comprised of the director or individual in the leadership position for gifted education in each of the fifty States, the District of Columbia, and the outlying areas. They have conducted many surveys in the past and most recently have conducted two comprehensive surveys of the States in order to gain an accurate portrait of gifted education throughout the nation. These data are reported in the 1985 and 1987 "State of the States Gifted and Talented Education" reports. This edition of the *Digest* uses data from the 1986-87 school year. Responses for the 1986-87 survey were received from all 50 States, Puerto Rico, and Guam. The Council is in the process of deciding whether future surveys will be conducted annually or biennially.

Further information is available from:

Nancy Lukenbill, President Council of State Directors of Programs for the Gifted Office of Public Instruction Room 10C, State Capitol Helena, Montana 59620

Education Commission of the States

The Education Commission of the States (ECS) Clearinghouse researches and collects data on laws and standards in the field of education and reports them periodically in "Clearinghouse Notes". They collect information about administrators, principals, and teachers. They also examine policy areas, such as assessment and testing, collective bargaining, early childhood issues, quality education, and school schedules. The information is collected by reading State newsletters, tracking State legislation, and surveying the State Education Agencies. Data are verified by the individual States when necessary. Even though ECS monitors State activity on a continuous basis, they update the data only when there is significant change in State activity.

Melody Bush or Chris Pipho Education Commission of the States 1860 Lincoln Street, Suite 300 Denver, Colorado 80295

Gallup Poll

Each year the Gallup Poll conducts the "Public Attitudes Toward the Public Schools" survey, funded by Phi Delta Kappa. The survey includes interviews with approximately 1,600 adults representing the civilian non-institutional population 18 years old and over.

The sample used in the 19th annual survey was made up of a total of 1,571 respondents and is described as a modified probability sample of the Nation. Personal, in-home interviewing was conducted in representative areas of the Nation and types of communities.

The survey is a sample survey and is subject to sampling error. The size of error depends largely on the number of respondents providing data. Table A16 shows the approximate sampling errors associated with different percentages and sample sizes for the survey. The table also provides approximate sampling errors for comparisons of two sample percentages.

For example, an estimated percentage of about 10 percent based on the responses of 1,000 sample members has an approximate sampling error of 2 percent at the 95 percent confidence level. The sampling error for the difference in two percentages (50 percent versus 41 percent) based on two samples of 750 members and 400 members, respectively, is about 8 percent. Further information on this survey can be obtained from:

Gallup Poll Phi Delta Kappa P.O. Box 789 Bloomington, Indiana 47402-0789

Institute of International Education

Each year the Institute of International Education (IIE) conducts a survey of the number of foreign students studying in American colleges and universities and reports these data in Open Doors, an annual publication. All of the regionally accredited institutions in the Education Directory, Colleges and Universities published by CES are surveyed by IIE. The data presented in the Digest are drawn from the IIE two-part survey. The first part of the survey requests the total enrollment of foreign students in an institution. For the 1984-85 survey, 2,766 out of 2,833 (98 percent) institutions surveyed reported data for the first part of the survey. The second part of the questionnaire asked for information on student characteristics, such as country of origin. The response rate for this portion of the study was 91 percent in 1984-85. For those institutions not reporting data for part two of the survey, distributions by country of origin were estimated by applying distributions from the reporting institu. is.

Additional information can be obtained from the publication *Open Doors* or by contacting:

Alfred Julian Institute of International Education 809 United Nations Plaza New York, NY 10017

Market Data Retrieval

Market Data Retrieval is a market research company that compiles mailing lists of schools and school districts. They also conduct special analyses of school characteristics. In the last few years they have conducted surveys of computer use in public and private schools.

During its annual summer survey of public school districts, Market Data Retrieval included questions on computer use in public schools. All the school districts were contacted about the number of their schools using computers. In the fall, an additional mail survey was conducted to gather more information on the number and type of computers being used. Data on computer utilization were reported for 86 percent of public schools. These data were used to generate State-by-State estimates which were aggregated to construct a national total.

Private school data were compiled through mail and telephone surveys during the middle of the 1982-83 and 1983-84 school years. The 1983-84 response rate for the Catholic schools was 96 percent, and the rate for the other private schools was 89 percent.

Further information on these surveys may be obtained from:

Market Data Retrieval 16 Progress Drive Shelton, Connecticut 06484

Metropolitan Life Insurance Company

The 1987 "Metropolitan Life Survey of the American Teacher" was conducted by Louis Harris and Associates for Metropolitan Life Insurance Company. A total of 1,002 telephone interviews were conducted during May and June, 1987. The teachers came from all types of public schools throughout the United States. For earlier surveys in 1984, 1985, and 1986 the sample sizes were 1,941, 1,846, and 1,602, respectively.

The survey saniple was drawn at random from a list of 1.2 million current teachers compiled by Market Data Retrieval. Sample sizes for completed interviews were set for each State, based on the proportion of elementary and secondary public school classroom teachers in the State. The State sample sizes were based on statistics published by the Center for Education Statistics.

Each selected current teacher was contacted at his or her school and requested to participate in the survey. Thirty-one percent of the teachers contacted or with whom a message was left participated in the survey. Of

Table A16.—Sampling errors (95 percent confidence level) for percentages estimated from the Gallup Poll, 1987

	Size of sample							
Percent	1,500	1,000	750	500	400	200	100	
		Rec	ommended allow	ince for sampling	error of a percent	age		
ercentages near 10 or 90	2	2	3	3	4	5	8	
rcentages near 20 or 80	3	3	4	4	5	7	10	
ercentages near 30 or 70	3	#	4	5	6	8	12	
ercentages near 40 or 60	3	4	5	5	6	9	12	
ercentages near 50	3	4	5	5	6	9	13	

Table A17.—Sampling errors (95 percent confidence level) for the difference in two parcentages estimated from the Gallup Poll, 1987

Size of			Size of	sample		
sample	1,000	750	600	400	200	100
		Recom	nended allowance for s in percentages (perce		ference	
1,500 1,000 750 300 400	4 4 5 5 6 8	5 5 5 6 8	5 6 6 8	6 7 8	7 9	10
		Recomi	mended allowance for in percentages (pe		fference	
1,500 1,000 750 500 400	5 5 6 6 7	6 6 7 8 10	7 7 8 10	7 8 10	9 11	13

the teachers who were successfully contacted by Louis Harris and Associates and who were eligible to participate in the survey, 84 percent completed the interview. While the "interview completion rate" is just as high as or higher than in previous survey years, the "contact success rate" is lower than the typical 50 percent level experienced in past years.

For the first time, the 1987 survey sought the views of parents of public school children. Telephone interviews were conducted with 2,011 randomly selected parents across the nation during May and June, 1987. Approximately 9,000 households were screened in order to obtain the required sample size. The overall completion rate for the survey was 75 percent of the eligible households reached.

The parent survey was based on a sample of the civilian population of the continental United States. The sample was stratified by geographic region and metropolitan versus nonmetropolitan residence. Households were selected via random-digit-dialing procedures.

Tables A18 and A19 show the sampling errors that upply to the percentages presented in this publication.

The tables also display the sampling tolerances involved in the comparison of percentage results from different surveys or from different subsamples. For the *Digest* table which compares the beliefs of white, black, and Hispanic parents, the sample sizes for these racial/ethnic groups were 1,573, 211, and 150, respectively.

Further information on this survey may be obtained from:

Metropolitan Life Survey of the American Teacher Metropolitan Life Insurance Company One Madison Avenue New York, NY 10010

National Education Association

Estimates of School Statistics

The National Education Association (NEA) reports revenues and expenditure data in its annual publication, Estimates of School Statistics. Each year NEA prepares regression-based estimates of financial and other education statistics and submits them to the States for verification. Generally about 30 States adjust these estimates

Table A18.—Approximate sampling errors (95 percent confidence level)

	Recommended allowance for sampling error of a difference in percenteges							
Sample sizes of two groups being compared	Percentage result at 10 percent or 90 percent	Percentage result at 20 percent or 80 percent	Percentage result at 30 percent or 70 percent	Percentage result at 40 percent or 60 percent	Percentage result at 50 percent			
2,000 vs. 1,000 1,000 vs. 1,000 1,000 vs. 200. 1,000 vs. 100.	2 3 5 6 7	3 4 6 8 10	4 4 7 9 11	4 7 10 12	4 4 8 10 12			

based on their own data. These preliminary data are published by NEA along with revised data from previous years. States are asked to revise previously submitted data as final figures become available. The most recent publication contains all changes reported to the NEA.

Some *Digest* tables use revised estimates of financial data prepared by NEA because it was the most current source. Since expenditure data reported to CES must be certified for use in Department of Education formula grant programs (such as Chapter I of the Education Consolidation and Improvement Act), CES data are not available as soon as NEA estimates.

Further information on NEA surveys can be obtained from:

National Education Association—Research 1201 16th Street, NW Washington, DC 20036

Status of the American Public School Teacher

The "Status of the American Public School Teacher" survey is conducted every 5 years by the National Education Association (NEA). The survey was designed by the NEA Research Division and initially administered in 1956. The intent of the survey is to solicit information covering various aspects of public school teachers' professions, family, and civic lives.

Participants for the survey are selected using a two-stage sample design, with the first-stage stratum determined by the number of students enrolled in the districts. Selection probabilities are determined so that the resulting sample is self-weighting. In 1985-86, a sample of 1,998 was selected from the approximately 2,207,000 public school teachers. The sample was adjusted to 1,784 to reflect the 214 responses that were unusable because the respondent could not be located or the respondent was not a teacher. After followup procedures, 1,291 usable replies were obtained, yielding a response rate of 72 percent.

Possible sources of nonsampling errors are nonresponses, misinterpretation, and—when comparing data over years—changes in the sampling method and instrument. Misinterpretation of the survey Items should be minimal, as the sample responding is not from the general population but one knowledgeable about the area of concern. Since the sampling procedure changed after 1956, and some wording of items has changed over the different administrations, care is taken to present only comparable data.

Since sampling is used, sampling variability is inherent in the data. An approximation to the maximum standard error for estimating the population percentages is 1.4 percent. To estimate the 90 percent confidence interval for population percentage, the maximum standard error of

Table A20.—Maximum differences required for significance
(90 percent confidence level) between sample subgroups of the
"Status of the American Public School Teacher" survey

Size of one	Size of Other Subgroup						
subgroup	100	200	300	400	500	600	799
00	11.6	10.1	9.5	9.2	9.0	8.9	5.0
00	10.1	8.2	7.5	7.1	6.9	6.7	6.6
00	9.5	7.5	6.7	6.3	6.0	5.8	5.7
00	9.2	7.1	6.3	5.8	5.5	5.3	5.2
0	9.0	6.9	6.0	5.5	5.2	5.0	4.8
0	8.9	6.7	5.8	5.3	5.0	4.7	4.6
00	8.8	6.6	5.7	5.2	4.8	4.6	4.4

1.4 percent is multiplied by 1.65 (1.4 x 1.65). The resulting percentage (2.3) is added and substracted from the population estimate to establish upper and lower bounds for the confidence interval. For example, if a sample percentage is 60 percent, there is a 90 percent chance that the population percentage lies between 57.7 percent and 62.3 percent (60 percent \pm 2.3 percent). If comparisons of two percentages are to be made, table A20 gives maximum differences for significance at the 90 percent confidence level.

Questions concerning the "Status of the American Public School Teacher" survey may be directed to:

National Education Association—Research 1201 16th Street, NW Washington, DC 20036

United Nations Educational, Scientific, and Cultural Organization

Statistical Yearbook

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) conducts annual surveys of education statistics of its member countries. Besides official surveys, data are supplemented by information obtaination by UNESCO through other publications and sources. Each year about 200 countries reply to the UNESCO surveys. In some cases, estimates are made by UNESCO for particular items such as world and continent totals. While great efforts are made to make the

data as comparable as possible, the data will still reflect the vast differences among the countries of the world in the structure of education. While there is some agreement about the reporting of first and second level data, the third level (postsecondary education) presents numerous substantial problems. Some countries report only university enrollment while other countries report all postsecondary, including vocational and technical schools and correspondence programs. A very high proportion of some countries' third-level students attend institutions in other countries. While definitional problems are many in this sort of study, other survey problems should not be overlooked. The member countries that provide data to UNESCO are responsible for the validity of their data. Thus data for particular countries are subject to nonsampling error and perhaps sampling error as well. Some countries may furnish only rough estimates while data from other countries may be very accurate. Other difficulties are caused by the varying periodicity of data collection among the countries of the world. In spite of such problems, many researchers use UNESCO data because they are the best available. Users should examine footnotes carefully to recognize some of the data limitations.

More complete information may be obtained from the Statistical Yearbook published by UNESCO or from:

Office of Statistics UNESCO Place de Fontenoy 75700 Paris France

DEFINITIONS

Academic support This category of college expenditures includes expenditures for support services that are an integral part of the institution's primary missions of instruction, research, or public service. Includes expenditures for libraries, galleries, audio/visual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development.

Achievement test An examination that measures the extent to which a person has acquired certain information or mastered certain skills, usually as a result of specific instruction.

Agriculture Courses designed to improve competencies in agricultural occupations. Included is the study of agricultural production, supplies, mechanization and products, agricultural science, forestry, and related services.

American College Testing Program (ACT) The ACT assessment program measures educational development and readiness to pursue college-level coursework in English, mathematics, natural science, and social studies. Student performance on the tests does not reflect innate ability and is influenced by a student's educational preparedness.

Appropriations (Federal funds) Budget authority provided through the congressional appropriation process that permits Federal agencies to incur obligations and to make payments.

Appropriation (institutional revenues) An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Associate degree A degree granted for the successful completion of a subbaccalaureate program of studies, usually requiring at least 2 years (cr equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work/study program.

Auxiliary enterprises This category includes those essentially self-supporting operations which exist to furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not

necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics.

Average daily attendance (ADA) The aggregate attendance of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered days in session.

Average daily membership (ADM) The aggregate membership of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the average of the average daily memberships obtained for the individual schools.

Bachelor's degree A degree granted for the successful completion of a baccalaureate program of studies, usually requiring at least 4 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work/study program.

Budget authority (BA) Authority provided by law to enter into obligations that will result in immediate or future outlays. It may be classified by the period of availability (1-year, multiple-year, no-year), by the timing of congressional action (current or permanent), or by the manner of determining the amount available (definite or indefinite).

Business Program of instruction that prepares individuals for a variety of activities in planning, organizing, directing, and controlling business office systems and procedures.

Carnegie unit A standard of measurement that represents one credit for the completion of a 1-year course.

Catholic school A private school over which in most cases a parent Catholic church group exercises some control or to which it provides some form of subsidy. Catholic schools include those affiliated with the Roman Catholic Church, including the "independent" Catholic schools operated by religious orders.

Central cities The largest cities, with 50,000 or more inhabitants, in a Standard Metropolitan Statistical Area (SMSA). A smaller city within a SMSA may also qualify if it has at least 25,000 inhabitants or has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

Class size The membership of a class at a given date.

Classroom teacher A staff member assigned the professional activities of instructing pupils in self-contained classes or courses, or in classroom situations. Usually expressed in full-time equivalents.

Cohort A group of individuals that have a statistical factor in common, for example, year of birth.

College A postsecondary school which offers general or liberal arts education, usually leading to an associate, bachelor's, master's, doctor's, or first-professional degree. Junior colleges and community colleges are included under this terminology.

Combined elementary and secondary school A school which encompasses instruction at both the elementary and the secondary levels. Examples of combined elementary and secondary school grade spans would be 1 through 12 or 5 through 12.

Computer science A group of instructional programs that describes computer and information sciences, including computer programming, data processing, and information systems.

Constant dollars Dollar amounts that have been adjusted by means of price and cost indexes to eliminate inflationary factors and allow direct comparison across years.

Consumer, personal, and miscellaneous services A group of instructional programs that describes the fundamental skills a person is normally thought to need in order to function productively in society. Some examples are child development, consumer education, and family relations.

Consumer Price Index (CPI) This price index measures the average change in the cost of a fixed market basket of goods and services purchased by consumers.

Consumption That portion of income which is spent on the purchase of goods and services rather than being saved.

Credit The unit of value, awarded for the successful completion of certain courses, intended to indicate the quantity of course instruction in relation to the total requirements for a diploma, certificate, or degree. Credits are frequently expressed in terms such as "Carnegie units," "semester credit hours," and "quarter credit hours."

Current dollars Dollar amounts that have not been adjusted to compensate for inflation.

Current expenditures (elementary/secondary) The expenditures for operating local public schools excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs. Beginning in 1980-81, expenditures for State administration are excluded.

Current expenditures per pupil in average daily attendance Current expenditures for the regular school term divided by the average daily attendance of full-time pupils (or full-time equivalency of pupils) during the term. See also Current expenditures and Average daily attendance.

Current-fund expenditures (higher education)
Money sperit to meet current operating costs, including salaries, wages, utilities, student services, public services, research libraries, scholarships and fellowships, auxiliary enterprises, hospitals, and independent operations. Excludes loans, capital expenditures, and investments.

Current-fund revenues (higher education) Money received during the current fiscal year from revenue which can be used to pay obligations currently due, and surpluses reappropriated for the current fiscal year.

Current Population Survey See Guide to Sources

Disposable personal income Current income received by persons less their contributions for social insurance, personal tax, and nontax payments. It is the income available to persons for spending and saving. Nontax payments include passport fees, lines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by the government. See also Personal income.

Doctor's degree An earned degree carrying the title of Doctor. The Doctor of Philosophy degree (Ph.D.) is the highest academic degree and requires mastery within a field of knowledge and demonstrated ability to perform scholarly research. Other doctorates are awarded for fulfilling specialized requirements in professional fields, such as education (Ed.D.) musical arts (D.M.A.), business administration (D.B.A.), and engineering (D.Eng. or

D.E.S.!. Many doctor's degrees in both academic and professional fields require an earned master's degree as a prerequisite. First-professional degrees, such as M.D. and D.D.S., are not included under this heading.

Educational attainment The highest grade of regular school attended and completed.

Educational and general expenditures The sum of current funds expenditures on instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, and awards from restricted and unrestricted funds.

Elementary education/programs Learning experiences concerned with the knowledge, skills, appreciations, attitudes, and behavioral characteristics which are considered to be needed by all pupils in terms of their awareness of life within our culture and the world of work, and which normally may be achieved during the elementary school years (usually kindergarten through grade 8 or kindergarten through grade 6) as defined by applicable State laws and regulations.

Elementary school A school classified as elementary by State and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Elementary/secondary school As reported in this publication, includes only regular school, i.e., schools that are part of State and local school systems, and also most not-for-profit private elementary/secondary schools, both religiously affiliated and nonsectarian. Schools not reported include subcollegiate departments of institutions of higher education, residential schools for exceptional children, Federal schools for Indians, and Federal schools on military posts and other Federal installations.

Employment Includes civilian, noninstitutional persons who (1) worked during any part of the survey week as paid employees; worked in their own business, profession, or farm; or worked 15 hours or more as unpaid workers in a family-owned enterprise; or (2) were not working but had jobs or businesses from which they were temporarily absent due to illness, bad weather, vacation, labor-management dispute, or personal reasons—whether or not they were seeking another job.

Endowment A trust fund set aside to provide a perpetual source of revenue from the proceeds of the endowment investments. Endowment funds are often created by donations from benefactors of an institution, who may designate the use of the endowment revenue.

Normally, institutions or their representatives manage the investments, but they are not permitted to spend the endowment fund itself, only the proceeds from the investments. Typical uses of endowments would be an endowed chair for a particular department or for a scholarship fund. Endowment totals tabulated in this book also include funds functioning as endowments such as funds left over from the previous year and placea with the endowment investments by the institution. These funds may be withdrawn by the institution and spent as currentfunds at any time. Endowments are evaluated by two different measures, book value and market value. Book value is the purchase price of the adowment investment. Market value is the current worth of the endowmen vestment. Thus the book value of a stock held in an dowment fund would be the purchase price of the stock. The market value of the stock would be its selling price as of a given day.

English A group of instructional programs that describes the English language arts, including composition, creative writing, and the study of literature.

Enrollment The total number of students registered in a given school unit at a given time, generally in the fall of a year.

Expenditures Charges incurred, whether paid or unpaid, which are presumed to benefit the current fiscal year. For elementary/secondary schools, these include all charges for current outlays plus capital outlays and interest on school debt. For institutions of higher education, these include current outlays plus capital outlays. For government, these include charges net of recoveries and other correcting transactions other than for retirement of debt, investment in securities, extension of credit, or as agency transaction. Government expenditures include only external transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments.

Expenditures per pupil Charges incurred for a particular period of time divided by a student unit of measure, such as average daily attendance or average daily membership.

Extracurricular activities Activities that are not part of the required curriculum and that take place outside of the regular course of study. As used here, they include both school-sponsored (e.g., varsity athletics, drama and debate clubs) and community-sponsored (e.g., hobby clubs and youth organizations like the Junior Chamber of Commerce or Boy Scouts) activities.

Family A group of two persons or more (one of whom is the householder) related by birth, marriage, or adoption

and residing together. All such persons (including related subfamily members) are considered as members of one family.

Federal funds Amounts collected and used by the Federal Government for the general purposes of the Government. There are four types of Federal fund accounts: the general fund, special funds, public enterprise funds, and intragovernmental funds. The major Federal fund is the general fund, which is derived from general taxes and borrowing. Federal funds also include certain earmarked collections, such as those generated by and used to finance a continuing cycle of business-type operations.

First-professional degree A degree that signifies both completion of the academic requirements for beginning practice in a given profession and a level of professional skill beyond that normally required for a bachelor's degree. This degree usually is based on a program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. By CES definition, first-professional degrees are awarded in the fields of dentistry (D.D.S or D.M.D.), medicine (M.D.), optometry (O.D.), osteopathic medicine (D.O.), pharmacy (D.Phar.), podiatric medicine (D.P.M.), veterinary medicine (D.V.M.), chiropractic (D.C. or D.C.M.), law (J.D.), and theological professions (M.Div. or M.H.L.).

First-professional enrollment The number of students enrolled in a professional school or program which requires at least 2 years of academic college work for entrance and a total of at least 6 years for a degree. By CES definition, first-professional enrollment includes only students in certain programs. (See First-professional degree for a list of programs.)

Fiscal year The yearly accounting period for the Federal Government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; e.g., fiscal year 1988 begins on October 1, 1987, and ends on September 30, 1988. (From fiscal year 1844 to fiscal year 1976 the fiscal year began on July 1 and ended on the following June 30.)

Foreign languages A group of instructional programs that describes the structure and use of language that is common or indigenous to people of the same community or nation, the same geographical area, or the same cultural traditions. Programs cover such features as sound, literature, syntax, phonology, semantics, sentences, prose, and verse, as well as the development of skills and attitudes used ir communicating and evaluating thoughts and feelings through oral and written language.

Full-time-equivalent (FTE) expollment For institutions of higher education, enrollment of full-time students, plus the full-time equivalent of part-time students as reported by institutions. In the absence of an equivalent reported by an institution, the FTE enrollment is estimated by adding one-third of part-time enrollment to fulltime enrollment.

Full-time instructional faculty Those members of the instruction/research staff who are employed full-time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave. Full-time counts exclude faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month sersions; replacements for faculty on sabbatical leave or those on leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses.

Full-time enrollment The number of students enrolled in higher education courses with total credit load equal to at least 75 percent of the normal full-time course load.

Full-time worker In educational institutions, an employee whose position requires being on the job on school days throughout the school year at least the number of hours the schools are in session. For higher education, a member of an educational institution's staff who is employed full-time.

General educational development (GED) program Academic instruction to prepare persons to take the high school equivalency examination. See GED recipient.

GED recipient A person who has obtained certification of high school equivalency by meeting State requirements and passing an approved exam, which is intended to provide an appraisal of the person's achievement or performance in the broad subject matter areas usually required for high school graduation.

General program A program of studies designed to prepare students for the common activities of a citizen, family member, and worker. A general program of studies may include instruction in both academic and vocational areas.

Geographic region 1) One of four regions used by the Bureau of the Economic Analysis of the U.S. Department of Commerce, the National Assessment of Educational Progress, and the National Education Association, as

follows: (The National Education Association designated the Central region as Middle region in its classification)

Northeast	Southeast
Connecticut	Alabama
Delaware	Arkansas
District of Columbia	Florida
Maine	Georgia
Maryland	Kentucky
Massachusetts	Louisiana
New Hampshire	Mississippi
New Jersey	North Carolina
New York	South Carolina
Pennsylvania	Tennessee
Rhode Island	Virginia
Vermont	West Virginia
Central (Middle)	West
Illinois	Alaska
Indiana	Arizona
Iowa	California
Kansas	Colorado
Michigan	Hawaii
Minnesota	Idaho
Missouri	Montana
Nebraska	Nevada
North Dakota	New Mexico
Ohio	Oklahoma
South Dakota	Oregon
Wisconsin	Texas
	Utah
	Washi ngton
	Wyoming

2) One of the regions or divisions used by the U.S. Bureau of the Census in "Current Population Survey" tabulations, as follows:

Northeast	Midwest
(New England)	(East North Central)
Maine	Ohio
New Hampshire	Indiana
Vermont	Illinois
Massachusetts	Michigan
Rhode Island	Wisconsin
Connecticut	
(Middle Atlantic)	(West North Central)
New York	Minnesota
New Jersey	Iowa
Pennsylvania	Missouri
	North Dakota
	South Dakota
	Nebraska
	Kansas

South	West
(South Atlantic)	(Mountain)
Delaware	Montana
Maryland	Idaho
District of Columbia	Wyoming
Virginia	Colorado
West Virginia	New Mexico
North Carolina	Arizona
South Carolina	Utah
Georgia	Nevada
Florida	
(East South Central)	(Pacific)
Kentucky	Washington
Tennessee	Oregon
Alabama	California
Mississippi	Alaska
	Hawaii
(West South Central)	
Arkansas	
Louisiana	
Oklahoma	

Government appropriation An amount (other then a grant or contract) received from or made available to an institution through an act of a legislative body.

Government grant or contract Revenues from a government agency for a specific research project or other program.

Graduate An individual who has received formal recognition for the successful completion of a prescribed program of studies.

Graduate enrollment The number of students who hold the bachelor's or first-professional degree, or the equivalent, and who are working towards a month or or doctor's degree. First-professional students are counted separately. These enrollment data measure those students who are registered at a particular time during the fall. At some institutions, graduate enrollment also includes students who are in postbaccalaureate classes but not in degree programs. In specified tables, graduate enrollment includes all students in regular graduate programs and all students in postbaccalaureate classes but not in degree programs (unclassified postbaccalaureate students).

Graduate Racord Examination (GRE) Multiplechoice examinations administered by the Educational Testing Service and taken by college students who are intending 'a attend certain graduate schools. The tests are offered in a variety of subject areas. Ordinarily, a stu-

Texas

dent will take only the exam that applies to the intended field of study.

Graduation Formal recognition given an individual for the successful completion of a prescribed program of studies.

Gross national product (GNP) The total national output of goods and services valued at market prices. GNP can be viewed in terms of expenditure categories which include purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GNP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents.

Mandicapped Those children evaluated as having any of the following impairments, who because of these impairments need special education and related services. (These definitions apply specifically to data from the U.S. Cffice of Special Education and Rehabilitative Services presented in this publication.)

Deaf Having a hearing impairment which is so severe that the student is impaired in processing linguistic information through hearing (with or without amplification) and which adversely affects education performance.

Deaf-blind Having concomitant hearing and visual impairments which cause such severe communication and other developmental and educational problems that the student cannot be accommodated in special education programs solely for deaf or blind students.

Hard of hearing Having a hearing impairment, whether permanent or fluctuating, which adversely affects the student's educational performance but which is not included under the definition of "deaf" in this section.

Mentally retarded Having significantly subaverage general intellectual functioning, existing concurrently with defects in adaptive behavior and manifested during the developmental period, which adversely affects the child's educational performance.

Multihandicapped Having concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems

that the student cannot be accommodated in special education programs solely for one of the impairments. Term does not include deaf-blind students but does include those students who are severely or profoundly mentally retarded.

Orthopedically impaired Having a severe orthopedic impairment which adversely affects a student's educational performance. The term includes impairment resulting from congenital anomaly, disease, or other causes.

Other he impaired Having limited strength, vitality, o alertness—due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes—which adversely affects the student's educational performance.

Seriously emotionally disturbed Exhibiting one or more of the following characteristics over a long period of time, to a marked degree, and adversely affecting educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factor; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of Lehavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. This term does not include children who are socially maladjusted, unless they also display one or more of the listed characteristics.

Specific learning lisabled Having a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental asphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or environmental, cultural, or economic disadvantage.

Speech Impaired Having a communication disorder, such as stuttering, impaired articulation, language impairment, or voice impairment, which adversely affects the student's educational performance.

Visually handicapped Having a visual impairment which, even with correction, adversely affects the student's educational performance. The term includes partially seeing and blind children.

Higher education Study beyond secondary school at an institution that offers programs terminating in an associate, baccalaureate, or higher degree.

Higher education institutions (new classification)

Doctoral-granting Characterized by a significant level and breadth of activity in commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings.

Comprehensive Characterized by diverse postbaccalaureate programs (including first-professional) but not engaged in significant doctoral-level education.

General baccalaureate Characterized by primary emphasis on general undergraduate, baccalaureate-level education. Not significantly engaged in post-baccalaureate education.

Specialized Baccalaureate or postbaccalaureate institution emphasizing one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area.

2-year Conferring at least 75 percent of its degrees and awards for work below the bachelor's level.

New These institutions, though not necessarily newly organized, are new additions to the "Higher Education General Information Survey" universe. When degree and award data become available, they will be reclassified.

n-degree-granting Offering undergraduate or graduate study but not conferring degrees or awards. In this volume these institutions are included under Specialized.

Higher education Institutions (traditional classification)

4-year Institution An institution legally authorized to offer and offering at least a 4-year program of college-level studies wholly or principally creditable toward a baccalaureate degree. In some tables a further division between universities and other 4-year institutions is made. A "university" is a postsecondary institution which typically comprises one or more graduate professional schools (also see *University*). For purposes of trend comparisons in this volume, the selection of universities has been held constant for all tabulations after 1982. "Other 4-year institutions" would include the rest of the nonuniversity 4-year institutions.

2-year institution An institution legally authorized to offer and offering at least a 2-year program of college-level studies which terminates in an associate degree or is principally creditable toward a baccalaureate degree.

Higher Education Price Index A price index which measures average changes in the prices of goods and services purchased by colleges and universities through current-fund education and general expenditures (excluding expenditures for spansored research and auxiliary enterprises).

High school A secondary school offering the final years of high school work necessary for graduation, usually including grades 10, 11, 12 (in a 6-3-3 plan) or grades 9, 10, 11, and 12 (in a 6-2-4 plan).

High school program A program of studies designed to prepare students for their postsecondary education and occupation. Three types of programs are usually distinguished—academic, vocational, and general. An academic program is designed to prepare students for continued study at a college or university. A vocational program is designed to prepare students for employment in one or more semiskilied, skilled, or technical occupations. A general program is designed to provide students with the understanding and compatence to function effectively in a free society and usually represents a mixture of academic and vocational components.

Household All the persons who occupy a housing unit. A house, apartment, or other group of rooms, or a single room, is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and there is direct access from the outside or through a common hall.

Imaginative writing This type of writing can take a variety of forms, such as stories, poems, plays or lyrics. It represents a special approach to sharing experiences and understanding the world and ourselves. In this form of writing special attention is given to rhythm and tone; the use of anecdote; the presence of metaphor and simile; shifts in plots; and the unexpected use of words, phrases, or punctuation.

Income tax Taxes levied on net income, that is, by gross income less certain deductions permitted by law. These taxes can be levied on individuals or on corporations or unincorporated businesses where the income is taxed distinctly from individual income.

Independent operations A group of self-supporting activities under control of a college or university. For pur-

poses of financial surveys conducted by the Center for Education Statistics, this category is composed principally of Federally Funded Research and Development Centers (FFRDC).

Informative writing This type of writing is used to share information and to convey messages, directions, and ideas. It often involves reporting or retelling events or experiences that have already occurred.

Institutional support The category of higher education expenditures that includes day-to-day operational support for colleges, excluding expenditures for physical plant operations. Examples of institutional support include general administrative services, executive direction and planning, legal and fiscal operations, and community relations.

Instruction That category including expenditures of the colleges, schools, departments, and other instructional divisions of higher education institutions and expenditures for departmental research and public service which are not separately budgeted. Includes expenditures for both credit and noncredit ictivities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans).

Instructional staff Full-time-equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day-school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, clerical personnel, and junior college staff.

Junior high school A separately organized and administered secondary school intermediate between the elementary and senior high schools, usually including grades 7, 8, and 9 (in a 6-3-3 plan) or grades 7 and 8 (in a 6-2-4 plan).

Labor force Persons employed as civilians, unemployed, or in the armed services during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed.

Local education agency See School district.

Mandatory transfer A transfer of current funds that must be made in order to fulfill a binding legal obligation of the institution. Included under mandatory transfers are debt service provisions relating to academic and administrative buildings, including (1) amounts set aside for

debt retirement and interest and (2) required provisions for renewal and replacement of buildings to the extent these are not financed from other funds.

Master's degree A degree awarded for successful completion of a program generally requiring 1 or 2 years of full-time college-level study beyond the bachelor's degree. One type of master's degree including the Master of Arts degree, or M.A., and the Master of Science degree, or M.S., is awarded in the liberal arts and sciences for advanced scholarship in a subject field or discipline and demonstrated ability to perform scholarly research. A second type of master's degree is awarded for the completion of a professionally oriented program, for example, an M.Ed. in education, an M.B.A. in business administration, an M.F.A. in fine arts, an M.M. in music, an M.S.W. in social work, and an M.P.A. in public administration. A third type of master's degree is awarded in professional fields for study beyond the first-professional degree, for example, the Master of Laws (LL.M.) and Master of Science in various medical specializations.

Mathematics A group of instructional programs that describes the science of logical symbolic language and its application.

Mean test score The score obtained by dividing the sum of the scores of all individuals in a group by the number of individuals in that group.

Metropolitan population The population residing in Standard Metropolitan Statistical Areas (SMSA's). See Standard Metropolitan Statistical Area.

Migration Geographic mobility involving a change of usual residence between clearly defined geographic units, that is, between counties, States, or regions.

Minimum-competency testing Measuring the acquisition of competence or skills to or beyond a certain specified standard.

National Assessment of Educational Progress (NAEP) See Guide to Sources.

Newly qualified teacher Persons who (1) first became eligible for a teaching license during the period of the study referenced or who were teaching at the time of survey but were not certified or eligible for a teaching license and (2) had never held full-time, regular teaching positions (as opposed to substitute) prior to completing the requirements for the degree which brought them into the survey.

Nonmetropolitan residence group The population residing outside Standard Metropolitan Statistical Areas. See **Standard Metropolitan Statistical Area**.

Nonresident alien A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely.

Nonsupervisory instructional staff Persons such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing education certification but not responsible for day-to-day teaching of the same group of pupils.

Obligations Amounts of orders placed, contracts awarded, services received, or similar legally binding commitments made by Federal agencies during a given period that will require outlays during the same or some future period.

Occupational home economics Courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge and skills.

Off-Budget Federal entities Organizational entities, Federally owned in whole or in part, whose transactions belong in the budget under current budget accounting concepts but that have been excluded from the budget totals under provisions of law.

Outlays The value of checks issued, interest accrued on the public debt, or other payments made, net of refunds and reimbursements.

Part-time enrollment The number of students enrolled in higher education courses with a total credit load less the 75 percent of the normal full-time credit load.

Personal income Current income received by persons from all sources minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions serving individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, military pensions, etc., but excludes transfers among persons.

Persuasive writing This type of writing attempts to bring about some action or change. Its primary purpose is to influence others. It is concerned with the positions, beliefs, and attitudes of the readers.

Physical plant assets Includes the values of land, buildings, and equipment owned, rented, or utilized by colleges. Does not include those plant values which are a part of endowment or other capital fund investments in real estate. Excludes construction in progress.

Postbaccalaureate enrollment The number c' graduate and first-professional students working towards advanced degrees and of students enrolled in graduate-level classes but not enrolled in degree programs. See also Graduate enrollment and First-professional enrollment.

Postsecondary education The provision of formal instructional programs with a curriculum designed primarily for students who have completed the requirements for a high school diploma or equivalent. This includes programs of an academic, vocational, and continuing professional education purpose, and excludes vocational and adult basic education programs.

Private school or institution A school or institution which is controlled by an individual or agency other than a State, a subdivision of a State, or the Federal government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials.

Property tax The sum of money collected from a tax levied against the value of property.

Proprietary institution An educational institution that is under private control but whose profits derive from revenues subject to taxation.

Public school or institution A school or institution controlled and operated by publicly elected or appointed officials and deriving its primary support from public funds.

Pupil-teacher ratio The enrollment of pupils at a given period of time, divided by the full-time-equivalent number of classroom teachers serving these pupils during the same period.

Racial/ethnic group Classification indicating general racial or ethnic heritage based on self-identification, as in data collected by the Bureau of the Census or on observer identification, as in data collected by the Office for Civil Rights. These categories are in accordance with the Office of Management and Budget standard classification scheme presented below:

White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Biack A person having origins in any of the black racial groups in Africa. Normally excludes persons of Hispanic origin except for tabulations produced by the Bureau of the Census, which are noted accordingly in this volume.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, ragardless of race.

Asian or Pacific Islander A person having origins in any of the original peoples of the ar East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

American Indian or Alaskan Native A person having origins in any of the original peoples of North America and maintaining cultural identification through tribal affiliation or community recognition.

Remedial education Instruction for a student lacking those reading, writing, or math skills necessary to perform college-level work at the level required by the attended institution.

Revenues All funds received from external sources, net of refunds, and correcting transactions. Noncash transactions such as receipt of services, commodities, or other receipts "in kind" are excluded as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a business or organization.

Sales tax Tax imposed upon the sale and consumption of goods and services. It can be imposed either as a general tax on the retail price of all goods and services sold or as a tax on the sale of selected goods and services.

Scholarships and fellowships This category of college expenditures applies only to money given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Aid to students in the form of tuition or fee remissions is included. College Work Study funds are excluded and are reported under the program in which the student is working. In the tabulations in this volume, Pell Grants are not included in this expenditure category.

Scholastic Aptitude Test (SAT) An examination administered by the Educational Testing Service and used to predict the facility with which an individual will progress in learning college-level academic subjects.

School A division of the school system consisting of students in one or more grade or other identifiable groups and organized to give instruction of a defined type. One school may share a building with another school or one school may be housed in several buildings.

school, including the organizational structure of the school and values and expectations within it.

School district An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Science The body of related courses concerned with knowledge of the physical and biological world and with the processes of discovering and validating this knowledge.

Secondary instructional level The general level of instruction provided for pupils in secondary schools (generally covering grades 7 through 12 or 9 through 12) and any instruction of a comparable nature and difficulty provided for adults and youth beyond the age of compulsory school attendance.

Secondary school A school comprising any span of grades beginning with the next grade following an elementary or middle-school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools 25 included.

Senior high school A secondary school offering the final years of high school work necessary for graduation and invariably preceded by a junior high school.

Social studies A group of instructional programs that describes the substantive portions of behavior, past and present activities, interactions, and organizations of people associated together for religious, benevolent, cultural, scientific, political, patriotic, or other purposes.

Socioeconomic status (SES) For the "High School and Beyond" study and the "National Longitudinal Study of the High School Class of 1972," the $\bar{\text{SES}}$ index is a composite of five equally weighted, standardized components: father's education, mother's education, family income, father's occupation, and household items. The terms high, middle, and low SES refer to the upper, middle two, and lower quartiles of the weighted SES composite index distribution.

Special education Direct instructional activities or special learning experiences designed primarily for students identified as having exceptionalities in one or more aspects of the cognitive process or as being underachievers in relation to general level or model of their overall abilities. Such services usually are directed at students with the following conditions: (1) physically handicapped; (2) emotionally handicapped; (3) culturally different, including compensatory education; (4) mentally retarded; (5) students with learning disabilities. Pro-

grams for the mentally gifted and talented are also included in some special education programs. See also Handicapped.

Standardized test A test composed of a systematic sampling of behavior, administered and scored according to specific instructions, capable of being interpreted in terms of adequate norms, and for which there are data on reliability and validity.

Standaroized test performance The weighted distributions of composite scores from standardized tests used to group students according to performance.

Standard Metropolitan Statistical Area (SMSA) A large population nucleus and the nearby communities which have a high degree of economic and social integration with that nucleus. Each SMSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units. SMSA's are designated by the Office of Management and Budget. An SMSA includes a city and, generally, its entire urban area and the remainder of the county or counties in which the urban area is located. An SMSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specified criteria governing the definition of SMSA's recognized before 1980 are published in Standard Metropolitan Statistical Areas 1975, issued by the Office of Management and Budget. New SMSA's wore designated when 1980 counts showed that they met one or both of the following criteria:

- 1. Included a city with a population of at least 50,000 within their corporate limits, or
- Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total SMSA population of at least 100,000 (or, in New England, 75,000).

Student An individual for whom instruction is provided in an educational program under the jurisdiction of a school, school system, or other education institution. No distinction is made between the terms "student" and "pupil," though "student" may refer to one receiving instruction at any level while "pupil" refers only to one attending school at the elementary or secondary level. The term "student" is used and include inclinity duals at all instructional levels. A student may receive instruction in a school facility or in another location, such as at home or in a hospital. Instruction may be provided by direct student-teacher interaction or by some other approved medium such as television, radio, telephone, and correspondence.

Subject matter club Organizations that are formed around a shared interest in a particular area of study and whose primary activities promote that interest. Examples of such organizations are math, science, business, and history clubs.

Supervisory staff Principals, assistant principals, and supervisors of instruction. Does not include superintendents or assistant superintendents.

Tax base The collective value of objects, assets, and income components against which a tax is levied.

Tax expenditures Losses of tax revenue attributable to provisions of the Federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

Teacher shortage The number of teaching positions vacant, abolished, or withdrawn because a candidate was sought and not found, courses were eliminated because of budget cuts or administrative decisions not to offer courses in a given field, a teacher was laid off, or a position was filled by a temporary substitute.

Technical education A program of vocational instruction that ordinarily includes the study of the sciences and mathematics underlying a technology, as well as the methods, skills, and materials commonly used and the services performed in the technology. Technical education prepares individuals for positions—such as draftsman or lab technician—in the occupational area between the skilled craftsman and the professional person.

Total expenditure per pupil in average daily attendance Includes all expenditures allocable to per pupil costs divided by average daily attendance. These allocable expenditures include current expenditures for regular school programs, interest on school debt, and capital outlay. Beginning in 1980-81, expenditures for State administration are excluded and expenditures for other programs (summer schools, community colleges, and private schools) are included.

Trade and industrial occupations The branch of vocational education which is concerned with preparing persons for initial employment or with updating or retraining workers in a wide range of trade and industrial occupations. Such occupations are skilled or semistalled and are concerned with layout designing, producing, processing, assembling, testing, maintaining, servicing, or repairing any product or commodity.

Transcript An official list of all courses taken by a student at a school or college showing the final grade

received for each course, with definitions of the various grades given at the institution.

Trust funds Amounts collected and used by the Federal Government for carring out specific purposes and programs according to terms of a trust agreement or statute, such as the social security and unemployment trust funds. Trust fund receipts that are not anticipated to be used in the immediate future are generally invested in interest-bearing Government securities and earn interest for the trust fund.

Tuition and fees A payment or charge for instruction or compensation for services, privileges, or the use of equipment, books, or other goods.

Unclassified students Students who are not candidates for a degree or other formal award, although they are taking higher education courses for credit in regular classes with other students.

Undergraduate students Students registered at an institution of higher education who are working in a program leading to a baccalaureate degree or other formal award below the baccalaureate such as an associate degree.

Vocational education A program of studies designed to prepare students for employment in one or more semi-skilled, skilled, or technical occupations.

Vocational home economics Vocational courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for ad-

vancement in an occupational area using home economics knowledge or skills.

Unemployed Civilians who had no employment but were available for work and (1) had engaged in any specific jobseeking activity within the past 4 weeks, (2) were writing to be called back to a job from which they had been laid off, or (3) were waiting to report to a new wage or salary job within 30 days.

U.S. Service Schools These institutions of higher education are controlled by the U.S. Department of Defense and the U.S. Department of Transportation. The ten institutions counted in the CFS Higher Education General Information Survey include: the Air Force Institute of Technology, Community College of the Air Force, Naval Postgraduate School, Uniformed Services University of the Health Sciences, U.S. Air Force Academy, U.S. Army Command and General Staff College, U.S. Coast Guard Academy, U.S. Merchant Marine Academy, U.S. Military Academy, and the U.S. Naval Academy.

University An institution of higher education consisting of a liberal arts college, a diverse graduate program, and usually two or more professional schools or faculties and empowered to confer degrees in various fields of study. For purposes of maintaining trend data in this publication, the selection of university institutions has not been revised since 1982.

Visual and performing arts A group of instructional programs that generally describes the historic development, aesthetic qualities, and creative processes of two or more of the visual and performing arts.
