ABSTRACT

This courseware evaluation rates the Electrical Principles and wiring Review program developed by Hobar Publications. (The program--not contained in this document--includes 400 test questions on basic electricity, grounding, transmission, measuring, and practical wiring practices.) Part A describes the program in terms of subject area and hardware requirements (Apple II, color monitor, and printer), indicates its suitability for use as drill and practice in grades 11-12, and gives a time estimate (30 minutes per section for 7 sections). Accompanying materials include a manual, student information sheet, and teacher answer key. Availability information includes contact address. Part B contains the evaluation criteria in eight categories; reviewer ratings appear as yes, somewhat, no, and not applicable, with explanatory comments. Part C summarizes the evaluation. This program received yes ratings for technical presentation and student interaction; somewhat for subject matter, student evaluation, and documentation; and no for program interaction. Reviewers noted that the program gives teachers the ability to create a test from the file of questions, but that students may become bored and one computer per student is required. (SK)

COURSEWARE EVALUATION

FOR

VOCATIONAL AND TECHNICAL EDUCATION

The evaluation of this courseware program was conducted by a team participating in the Courseware Evaluation Network. The Network, established in 1985, is coordinated by the National Center for Research in Vocational Education under the sponsorship of the U.S. Department of Education, Office of Vocational and Adult Education. The purpose of the Network is to identify and evaluate microcomputer courseware, and to disseminate courseware reviews for vocational and technical education.

Each Network team includes three members, at least one of which is, or recently has been, a vocational or technical teacher in the subject matter area of the courseware being evaluated. The evaluation represents a synthesis of the opinions of the team members. It is suggested that the evaluation be used as a first screening device for courseware and that the teacher also evaluate the courseware program on the basis of specific student needs.

The Courseware Evaluation: Form and Guide used for all of the Network evaluations was developed by the National Center and is available through its cost-recovery system.

Part B: Courseware Evaluation Criteria

Indicate the applicability of each section to the courseware being evaluated by checking either " A" (applicable) or " N/A" (not applicable). If a section is not applicable, proceed to the next section. If a section is applicable, check the column that indicates how well the courseware meets each criterion. Include any comments.

VIII. APPLICATION PROGRAMS ___ A <u>X</u> N/A (to be completed for application programs only)					
1. Program is adaptable to the needs of the student.					
2. Commands are easily remembered.					
3. Information is easily manipulated.					
4. Corrections are easy to make.					
5. Program includes all necessary variables.					
6. Program performs reliably.					
7. Program efficiently achieves its intended purpose.					
8. Trial data are supplied for learning to run the program.					
9. Program provides for use of printer when hard copy of information is advantageous.					
10. Program moves from operation to operation efficiently.					
11. Program is compatible with other application programs.					
12. Program has a supplementary tutorial program available.					

Part C: Courseware Evaluation Summary

1. SUMMARY COMMENTS

Identify strengths of the courseware:

The ability for the teachers to create a test from a file of questions.

Identify weaknesses of the courseware:

Students may become bored answering questions.

Describe uses of the courseware in an instructional setting:

Review of previously taught material.

2. SUMMARY OF SECTION

Rate the quality of the courseware for each applicable section of this form by checking the appropriate column; if not applicable, check N/A.

	YES	SOME- WHAT	NO	N/A
I. SUBJECT MATTER: Content has educational value.		X		
II. TECHNICAL PRESENTATION: Program is free of malfunctions.	X			
III. STUDENT INTERACTION: Students are actively involved with the program.	X			
IV. PROGRAM INTERACTION: Feedback is effectively employed.			X	
V. STUDENT EVALUATION: Evaluation adequately measures student progress.		X		
VI. DOCUMENTATION: Documentation is sufficient to run the program.		X		
VII. WORK BEHAVIORS: Program assists students in developing positive work attitudes and skills.				X
VIII. APPLICATION PROGRAMS: Program performs the task for which it is intended.				X
