ABSTRACT

The directory lists grants funded under the Office of Special Education and Rehabilitative Services (OSERS) Secondary and Transition Initiative. Information was obtained from a January, 1988, questionnaire of projects, from original grant applications, and from the previous year's project profiles. The compendium includes five sections: (1) an introduction which describes the Federal Transition Initiative and the role of the Transition Institute at the University of Illinois; (2) an overview which contains a summary of the descriptive data collected from projects in each of the current competitions; (3) a Project Profile Section which provides a summary of each individual competition, a summary of the projects funded under the competition (both current and expired), and in ividual project profiles (including project demographic information, project purpose, current focus, primary grantee, cooperating agencies, project participants, project evaluation plan, and project products); (4) an index providing a guide to projects' specific evaluation components and program characteristics; (5) appendices such as a copy of the Project Characteristics Questionnaire. The following principles guide our research related to the education and employment of youth and adults with specialized education, training, employment, and adjustment needs.

- Individuals have a basic right to be educated and to work in the environment that least restricts their right to learn and interact with other students and persons who are not handicapped.
- Individuals with varied abilities, social backgrounds, aptitudes, and learning styles must have equal access and opportunity to engage in education and work, and life-long learning.
- Educational experiences must be planned, delivered, and evaluated based upon the unique abilities, social backgrounds, and learning styles of the individual.
- Agencies, organizations, and individuals from a broad array of disciplines and professional fields must effectively and systematically coordinate their efforts to meet individual education and employment needs.

- Individuals grow and mature throughout their lives requiring varying levels and types of educational and employment support.
- The capability of an individual to obtain and hold meaningful and productive employment is important to the individuai's quality of life.
- Parents, advocates, and friends form a vitally important social network that is an instrumental aspect of education, transition to employment, and continuing employment.

The Secondary Transition Intervention Effectiveness Institute is funded through the Office of Special Education Programs, Office of Special Education and Rehabilitative Services, U.S. Department of Education (contract number 300-85-0160).

Acknowledgements

The Technical Assistance Program staff wishes to thank the project directors who devoted time and effort toward the completion of the questionnaires. Their contributions have made it possible to present a comprehensive view of the nationwide transition effort being conducted through the OSERS funded transition projects. In addition, we would like to thank Beatrice Palermou and David Metzer for their assistance in the final preparation of this document.

Preface

This document, produced by the Technical Assistance Program at the Transition Institute at Illinois, is a directory of grants funded under the OSERS Secondary and Transition Initiative. The information and descriptive data contained in this document were collected in part from the responses of OSERS funded projects to project characteristics questionnaires distributed in January 1988, to current and expired projects (see Appendices A & B). Other project information was obtained from original grant applications and previous year's profiles. The information contained in the individual competition profiles was obtained directly from the grant announcement packets for each competition.

The 1988 Compendium of Project Profiles includes five sections:

- * The <u>Introduction</u> describes the Federal Transition Inititative and the role of the Transition Institute at Illinoi².
- * The <u>Overview</u> contains a summary of the descriptive data collected from the projects in each of the current competitions. An overview of the current competitions is presented in Figure 1, and an overview of expired project information is provided in Figure 3.

* The Project Profile Section provides a summary of each individual competition, a summary of the projects funded under the competition, both current and expired, and individual project profiles for current and expired projects. The Competition Profile provides a summary of the purpose, authority, eligible recipients, funds available, number of grants awarded and duration of awards for each competition. The Competition Profile precedes the individual project profiles for each of the ten competitions. The Summary of Project Profiles contains a summary of the data reported in the individual profiles of current projects for each competition. The Individual Project Profiles provide a description of each current project funded under the individual competitions. The profile includes project demographic information, project purpose, current focus, primary grantee, cooperating agencies, project participants, project evaluation plan, and project products.

The Summary of Expired Project Profiles follows the individual project profiles for the current projects and presents an overview of the purpose, focus of continuation activities, project components being continued and project products reported by the expired projects in each competition. Individual Expired Project Profiles follow each Summary and provide information on the original project purpose and, if reported, the focus of the expired project's continuation activities, the project components being continued and by whom, and the project products available from the project. A full description of a project's activities prior to expiration of federal funding may be found in previous editions of the Compendium.

- * The <u>Index</u> provides a guide to projects' specific evaluation components and program characteristics.
- * The <u>Appendices</u> provide a copy of the Project Characteristics

 Questionnaire (Appendix A) that was sent to all projects current
 as of January 1, 1988. Appendix B contains a copy of the Expired

 Project Characteristics Questionnaire.

The <u>Compendium</u> is an annual publication of the Transition Institute at Illinois and is intended for specific use by project directors, OSERS' project officers, and Transition Institute staff. Others involved in the transition effort may also find this document useful for obtaining an up-to-date view of the nationwide transition effort being supported by the U. S. Department of Education, Office of Special Education and Rehabilitative Services. Users of the <u>Compendium</u> are encouraged to communicate directly with project contact persons listed on the profiles. Users are also urged to submit comments and suggestions for improving the useability and effectiveness of the document for future issues.

Points of view or opinions expressed in this document do not necessarily represent the U. S. Department of Education's position or policy. The contents of this book are presented for information purposes only; no endorsement is made.

Introduction

The economic, educational and employment problems encountered by youth and adults with handicapping conditions have been addressed through a variety of federal and state programs in the past. Assurances of nondiscrimination, mandated services and equal access to services have earmarked federal legislation through the years, however, only recently has Congress elected to focus directly on the transition from school to work for these individuals. In the 1983 Amendment to the Education of the Handicapped Act of 1973, Section 626 of Public Law 98-199, entitled "Secondary Education and Transitional Services for Handicapped Youth," was enacted for the purpose of stimulating a nationwide Transition Initiative. Under the leadership of Assistant Secretary Madeline C. Will, the Transition Initiative became a national pri rity. The impetus for the Initiative was the authorization of \$6.6 million in grants and contracts to be spent annually by the Office of Special Education and Rehabilitative Services (OSERS).

With the major objectives or Section 626 being to improve and develop secondary special education programs and to strengthen and coordinate education, training and related services to assist in the transition process, OSSRS announced several grant programs

in fiscal year 1984. In addition to Section 626, grant programs were also authorized under Section 641 - 642 of Public Law 98-199 and Section 311 (A)(1) of Public Law 93-112, Rehabilitation Act of 1973, as amended. Fiscal year 1984 marked the beginning of a federal effort to focus on the problems of youth with handicapping conditions exiting the secondary school and to provide appropriate transition services at all levels for youth and adults with handicapping conditions.

In order to assist in evaluating and extending the impact of the federal initiative, the Secondary Transition Intervention Effectiveness Institute at the University of Illinois at Urbana-Champaign was formed in August of 1985. Through a five year contract with OSERS, the Transition Institute at Illinois is studying the issues and problems related to secondary education and transitional services. One of the major activities within the Institute's Evaluation Research Program is to collect, summarize, and disseminate information about the model programs funded under the Secondary Education and Transition Services Initiative. The dissemination of the descriptive data through the Compendium is intended to facilitate efforts to assure the long-range impact of the Initiative upon both school and community-based programs.

Overview

The 1988 Compendium describes the status of the 180 projects funded by the U. S. Department of Education, Office of Special Education and Rehabilitative Services as part of the Transition Initiative. Since 1984, 180 model demonstration projects have developed and implemented a wide range of service delivery models focused on facilitating the transition of youth/adults with handicapping conditions. Figure 1 provides a general comparison of the current grant competitions, and Figure 2 presents the geographical distribution of these 76 current projects. Figure 3 provides an overview of the 104 expired projects across eight competitions. To illustrate the impact of project activities on transition as a national priority, the geographical distribution of both expired and current projects (as of January 1, 1988), is presented in Figure 4.

Project services are provided in major metropolitan areas, suburbs, small towns and rural areas. In addition, some models are designed to provide countywide, statewide or nationwide services. Table 1 shows a breakdown of the type of political unit served by projects in the current competitions.

Approximately 40% of the projects are located in major metropolitan areas, and at least 20% of the projects are

providing statewide services. An analysis of the political units served by all projects funded since 1984, indicates an estimated 41% of all the projects have provided services to either regions within a state or on a statewide basis. Approximately 30% of all the projects have served major metropolitan areas.

The youth/adults receiving services through the projects exhibit a range of handicapping conditions. Due to the priorities of certain competitions, i.e., 84.078C and 84.078B, some projects have targeted specific handicapping conditions. Of those youth currently being served by projects, over one-half have a learning disability and approximately 20% have either a diagnosis of mental retardation or a developmental disability. Other handicapping conditions were reported by projects, however,

^{(+ *} multiple units reported - percentages may exceed 100%)

overall incidences were often less than 10%. Projects were asked to estimate the impact of their project, directly and indirectly, on youth and adults with handicapping conditions. The number of youth/adults being impacted by the current model projects is estimated at 67,656 while the estimated number receiving direct services is 11,971. To date, it is estimated that 127,790 youth with handicapping conditions have been impacted by the model demonstration transition projects and approximately 22,567 youth have been receiving direct services.

Current projects were asked to report the total number of youth receiving direct services by specific handicapping conditions.

Table 2 presents the percentage of youth/adults with specific

handicapping conditions receiving direct services as indicated by those projects reporting on specific handicapping conditions.

The "total" column in Table 2 reflects the estimated percentage of youth by specific handicapping condition served since the funding of the first model demonstration projects.

While the target population varies among grant competitions, the majority of projects are offering related service components to parents, teachers, agency personnel, business/industry personnel and other service providers. Over 90% of the projects reported the provision of some type of related service or training.

Across the current competitions, related services/training are remortedly being provided to approximately 2300 parents, 1025 agency personnel and 4000 teachers. Table 3 presents an overview of the various groups receiving related services from the current competitions as well as a total comparison of related services provided to the groups to date.

Eligible recipients of current grant awards are specified for each competition. The most common grant recipients were institutions of higher education followed by state agencies, private non-profit agencies and local education agencies. A major intent of the transition initiative has been the development of collaborative relationships among agencies. Some grant competitions prioritized the development of cooperative models. Table 4 presents the percentage of current projects indicating cooperation with another agency. The majority of those reporting projects (65%) are cooperating with a state agency. Of those state agencies reported, over one-half were state vocational rehabilitation agencies.

In the Rules and Regulations published for each grant announcement, applicants are directed to "show methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable." In order to address this directive, the majority

of projects reported using a systems analysis approach to assess the effectiveness and efficiency of their model programs.

Several projects reported using systems analysis in combination with other approaches, primarily a goal based approach.

One-third of the projects also reported the use of decision making, professional review and case study as supplemental approaches. Table 5 presents a breakdown of the various evaluation approaches being utilized by the projects in current competitions as well as a summary total for projects funded to date that have reported on an evaluation approach.

A variety of commercially available and project developed instruments are being used by projects to collect evaluation information on student/client and to assess specific competency areas. Commercial instruments used to assess academic achievement were most frequently reported by the currently funded projects. Instruments used to assess general ability/intelligence and career interest are being used by approximately one-half of the current projects. At least one-half of the projects reported use of project/locally developed instruments to collect evaluation information on student/client and program. Table 7 presents the type of commercial and locally developed instrumentation used in each competition.

A variety of products are being developed and disseminated by a majority of projects. Brochures describing project activities and journal articles reporting project findings were cited most frequently as products. Training manuals and project developed instruments are being developed by approximately one-half of the current projects. Figure 6 indicates the percentage of projects in individual competitions developing specific products.

Project objectives also varied across projects, however, the objectives could be categorized into nine major areas: assessment/referral, placement/followup, education/training, counseling, program development, dissemination/replication/continuation, agency coordination, manpower training and research. Ninety-three percent (93%) of the current projects reported on objectives. Figure 7 identifies the percentage of

current projects practicing specific objectives in each of the above areas. Of those projects reporting on objectives, the majority (at least 70%), are specifically involved in student assessment, development and implementation of a service delivery model, development and dissemination of products, dissemination of information through conferences, presentations, articles, etc., conducting conferences, workshops, inservices, etc. for purposes of manpower training, and specific training of professionals, paraprofessionals, etc..

The Project Profile Section provides more specific information about the model demonstration projects.

Project Profile Section

The Project Profile Section contains profiles on both current and expired transition projects. The individual project profiles are grouped according to the competition under which they received their grant award. Within each group, current projects are listed alphabetically according to state and project director name. Each group of individual project profiles is preceded by a summary of the competition. The Competition Summary is based on information obtained from the actual grant application packet available for the competition. A summary of the current projects within the competition follows and is an overview of the major demographic, operating, and evaluation characteristics of the projects under the specific competition. Expired project profiles follow the Summary of Expired Projects. Except where noted, all individual project profiles are based on information gathered from questionnaires mailed to current and expired projects in January 1988.

COMPETITION PROFILE: CFDA 84.078C

POSTSECONDARY EDUCATION PROGRAMS FOR HANDICAPPED PERSONS: DEMONSTRATION PROJECTS

INITIAL COMPETITION: 3/07/85 SECOND COMPETITION: 12/16/85 THIRD COMPETITION: 12/08/86

PURPOSE OF COMPETITION

The purpose of this competition was to provide assistance for the development, operation, and dissemination of specially designed model programs of postsecondary, vocational, technical, continuing, or adult education for individuals with handicapping conditions. The absolute priority for this competition was for model projects of supportive services to individuals with handicapping conditions, other than deafness, that focus on specially adapted or designed educational programs that coordinate, facilitate, and encourage education of these individuals with their nonhandicapped peers. Applicants were encouraged to consider program and curricular adaptations or modifications, or the creation and enhancement of placement linkages that would improve the transition to work. In the initial competition applicants were encouraged to develop models of generic postsecondary services for students which improve the transition to work, including program adaptation, curricula design and modification, program organization, and placement linkages. Projects in vocational technical schools and institutions, and at community colleges and other two year institutions were especially invited. Projects were to produce information and practices which would facilitate their replication in other agencies and improve work opportunities for persons with handicaps who are served in postsecondary settings.

The second competition also focused on the absolute priority of the initial competition, however, the invitational priority for the second competition specified a focus on individuals with specific learning disabilities. Projects with learning disabled students were specifically targeted for the FY87 competition. The third competition also emphasized a focus on new or innovative models of improved support services, curricular modifications, and/or program adaptations for learning disabled students in community college, adult and vocational-technical educational settings. Increasing vocational possibilities or expanding placement linkages and networks that would facilitate the transition to work were encouraged as projected outcomes for project activities.

AUTHORITY

Authority for this program is contained in Section 625 of Part C of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

State educational agencies, institutions of higher education, junior and community colleges, vocational and technical institutions, and other nonprofit educational agencies were eligible for the initial, second and third competitions.

 $\hat{\mathbf{r}}$.

FUNDS AVAILABLE

Approximately \$1,000,000 was available for support of an estimated 12 - 14 new grants in fiscal year 1985. The approximate amount available for the second competition (fiscal year 1986) was \$800,000 for support of 12 new demonstration projects. The approximate funds available for FY1987 was \$1,600,000 for an estimated 10 awards.

NUMBER OF GRANTS AWARDED

In FY1985, 14 demonstration grants were awarded, and in FY1986, 13 new demonstration grants were awarded. Twenty new grants were awarded in FY1987.

DURATION

For FY1985 and FY1986, grant approval was for two and three-year periods subject to an annual review of progress and availability of funds. For FY1987, grant approval was for one, two, and three-year periods. Four projects funded under the initial competition expired in 1986. A total of 13 projects under this competition have expired to date.

SUMMARY OF 84.078C PROJECT PROFILES

PRIMARY GRANTEE

Twenty universities and eight community colleges received grant awards under this competition. Joint funding was reported for a local education agency and a private non-profit community education/rehabilitation agency and between a state education agency and area voc-tech center. Grant awards were also received by a vocational-technical center, a local education agency, a private nonprofit agency and a community rehabilitation facility.

PROJECT PARTICIPANTS

The initial competition was for projects of supportive services to individuals with handicapping conditions, other than deafness. The second and third competitions offered an invitational priority for projects focusing on individuals with specific learning disabilities. The 30 current projects reporting under this competition estimated an impact on approximately 11,090 individuals with handicapping conditions. Direct services are being provided to approximately 3831 youth/adults by the 30 projects. Approximately 85% of those individuals receiving direct services have a learning disability. Persons with cerebral palsy or a physical handicap comprise 5% of the number served under this competition. The age range in this competition is from 15 - 60 years. Minority and economically disadvantaged groups were not indicated, and less than 1% of those served were reported as substance abusers.

Thirty projects indicated the provision of related service components. Thirteen projects reported serving an estimated 2924 teachers. Postsecondary faculty were indicated as a group receiving related services by 18 projects, and university/college students were reported by 12 projects. Nine projects are providing related services to approximately 360 agency personnel, eight projects identified parents as project participants, and six projects reported providing related service components to business/industry personnel.

COOPERATING AGENCIES & ORGANIZATIONS

Eighteen projects indicated involvement with cooperating agencies or organizations. The most frequently reported agencies were public secondary schools, community colleges and state vocational rehabilitation agencies.

PRODUCTS

Twenty-eight projects reported on product development.
Twenty-one projects indicated development of a brochure. Project developed instruments were indicated as products by 17 projects, and 24 projects indicated development of journal articles. In

addition, over one-third of the projects indicated videotapes, curricula, replication manuals, newsletters, and/or training manuals as products. Individual projects also reported development of telecourse materials, computer assisted instructional materials and software evaluation instruments.

PROJECT EVALUATION PLAN

Systems analysis was reported as an evaluation approach by 24 projects under this competition. Eleven of these projects indicated use of a goal based approach in conjunction with systems analysis. A total of 20 projects reported utilizing a goal based approach, and 12 projects indicated the use of professional review as a supplemental evaluation approach. Eight projects reported case study as an evaluation approach in conjunction with another approach.

Thirty-one projects in this competition reported collecting evaluation information on student/client. At least 80% of these projects are compiling information on the number receiving services, student/client demographics, number referred to project services, student/client progress in education program and assessment results. Other evaluation information being collected frequently by projects includes student/client follow-up status and student/client educational background. Evaluation information on employers is being collected by ten projects with seven compiling data on employer satisfaction with student/client, project activities, etc.. Postsecondary education/training data is being collected by 27 projects. The majority of projects are collecting information on level of direct service provided by project and postsecondary education/training outcomes.

Thirty-two projects reported on the instrumentation utilized in project evaluation activities. Twenty-one projects indicated use of commercial instruments to assess general ability/intelligence and academic achievement. Instruments used to assess career interest and personality were reported by 13 and 10 projects respectively. Over one-half of the projects reported the use of locally/project developed rating scales, interviews and surveys.

PROJECT OBJECTIVES

Thirty-one projects in this competition reported on project objectives. Determining eligibility and student assessment are being addressed by over 75% of the projects. Fourteen projects indicated objectives related to placement into competitive employment. Placement of students into postsecondary education or training settings was indicated as an objective by 19 projects. Twenty-three projects reported on objectives in the area of training/education, of which nonvocational training/education was reported by 20 projects. Twenty-two projects indicated objectives in the general area of counseling, with career exploration or career counseling being reported by 18 projects. Development of peer support groups was indicated by 16 projects.

Twenty-eight projects are addressing objectives in the area of program development, of which 22 projects indicated development and implementation of a service delivery model. Twenty-one projects indicated curriculum development as an objective, and 20 projects indicated instrument development. Thirty-two projects reported objectives in the general area of dissemination/replication/continuation. Thirty projects reported dissemination of information as an objective, and 27 projects are involved in development and dissemination of products. Seven projects indicated model replication as an objective. Conducting conferences/seminars as a means of dissemination was reported as an objective by 26 projects.

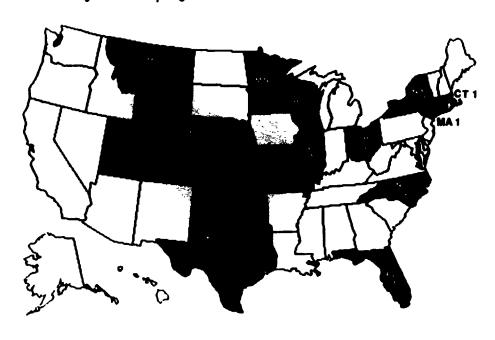

Twenty-one projects indicated objectives in the general area of agency coordination, the majority (19) being involved with network development among service providers. Development of interagency agreements is an objective being undertaken by 12 projects. Twenty-seven projects reported objectives in the area of manpower training with the majority conducting workshops to train professionals, paraprofessionals, parents, etc.. Twenty projects reported objectives related to research with 18 projects conducting empirical research.

GEOGRAPHIC AREA SERVED

Of the 34 current projects, 17 are providing services to metropolitan areas with public transportation systems. Two of these projects are also serving a region of the state which includes the metropolitan area. Ten projects are serving regions of states and five projects are providing statewide services.

LOCATION OF 84.078C PROJECTS

Forty-seven projects have been funded under this competition, with 34 currently funded. The map below depicts the location of the currently funded projects.

SUMMARY OF 84.078C EXPIRED PROJECT PROFILES

PROJECT PURPOSE

Federal funding for four postsecondary projects expired in Summer/Fall 1986. Nine additional projects epxired one year later. The overall purpose of these projects was to develop a service delivery model that would increase the opportunities for students with learning disabilities in postsecondary education and employment. The majority of these projects established a linkage model and either established or expanded support services. The majority also provided services directly to students with learning disabilities.

FOCUS OF CONTINUATION ACTIVITIES

Seven of the 13 expired projects reported on their continuation activities. Three projects are focusing on the provision of support service activities. One project indicated the continuation of major program components through an agency other than the primary grantee.

PROJECT COMPONENTS BEING CONTINUED

All seven projects reported training/education as a primary component being continued. Intake/eligibility determination, assessment, dissemination, and agency coordination were each reported by five projects as components being continued. Counseling was a program component being continued by four projects. Program components being continued by at least two projects included: referral, placement, followup, program refinement and summer programs.

PROJECT PRODUCTS

Seven projects reported on the type of products developed during the project's funding period. Five projects indicated the development of a project brochure and four projects have developed instruments. Replication manuals and handbooks for parents, students and faculty/staff have been developed by individual projects. Two projects have generated articles and two projects have developed videotapes.

COMPETITION PROFILE: CFDA 84.086M

INNOVATIVE PROGRAMS FOR SEVERELY HANDICAPPED CHILDREN: TRANSITION SKILLS DEVELOPMENT FOR SEVERELY HANDICAPPED (INCLUDING DEAF-BLIND) YOUTH

INITIAL COMPETITION: 3/21/86

PURPOSE OF COMPETITION

The purpose of this competition was to provide support to projects which design, implement, and disseminate information about innovative practices which facilitate the transition of a small number of youth with severe handicaps from education to employment and other service options, in preparation for their integration into regular community environments as adults. Emphasis was to be placed on the development of job-related skills, peer interactions, orientation and mobilty, personal grooming, independent living skills and the development of a positive self-concept. Procedures for initiating and maintaining on an on-going basis, coordination and cooperation with State educational and rehabilitative agencies were to be included. Project activities were to focus upon the development of skills identified as those most needed by project participants in order to facilitate their effective transition.

AUTHORITY

Authority for this program is contained in Section 624 of Part C of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Public or private, profit or non-profit organizations and institutions were eligible for this competition.

FUNDS AVAILABLE

Approximately \$1,965,000 was expected to be available for support of up to 25 projects.

NUMBER OF GRANTS AWARDED

Eleven grants were awarded under this competition.

DURATION

Project support was available for up to three years under this competition subject to an annual review of progress and availability of funds. One project expired in 1987. The remaining projects will expire in 1989.

. .

SUMMARY OF 84.086M PROJECT PROFILES

PRIMARY GRANTEE

Four grants were awarded to public secondary schools/local education agencies. Three universities and two private nonprofit agencies received grant awards. State agencies receiving funds under this competition include a state education agency and a state MR/DD agency.

PROJECT PARTICIPANTS

The target population, youth with severe handicaps (including deaf-blind), was specified in this competition. With 10 projects reporting, direct services are being provided to an estimated 738 youth with severe handicapping conditions. Total impact on youth is estimated at 1181. The age range reported by the projects was from 13 to 25 years. Of those projects reporting direct services, mental retardation, developmental disabilities and autism comprised 58% of the handicapping conditions, chronic mental illness was the handicapping condition for 17% of the project participants, and 12% of the youth served have multiple handicaps.

Related service components were reported by all the current projects. All projects indicated services being provided to teachers. Parents receiving services were indicated by eight projects; agency personnel were reported by seven projects, and four projects are providing related services to business/industry personnel. The estimated totals being served are as follows: 446 parents, 238 agency personnel, 159 teachers, and 70 business/irdustry personnel.

COOPERATING AGENCIES & ORGANIZATIONS

Cooperation with outside agencies was reported by eight projects. Seventy-five percent (75%) of the reporting projects are collaborating with a state vocational rehabilitation agency. Three projects reported collaboration with a local JTPA service delivery area agent.

PRODUCTS

Nine projects reported on product development. Seven projects are developing articles, and five projects indicated development of brochures. Newsletters and training manuals were reported by five projects each. Four projects are developing replication manuals. Slide presentations, curricula and parent handbooks were reported by three projects each.

PROJECT EVALUATION PLAN

Eight projects reported the use of a systems analysis evaluation approach. Five projects indicated a goal based approach, four of which reported use of this approach in conjunction with systems analysis. Three projects are conducting case studies, and four projects reported the use of professional review as an evaluation approach.

Ten projects reported the collection of evaluation information on student/client with all projects compiling data on student/client progress in training programs. In addition to student/client demographics, the majority of these projects (80%) are collecting evaluation information on assessment results, student/client progress in education programs, student/client integration into the environment and student/client followup status. Employer information is being collected by seven projects, all of which are compiling data on employer demographics, level of direct service provided to employer, and employer satisfaction with student/client, project activities, etc.. Six projects reported data collection on employer collaboration level and employer outcome status. Three projects are collecting evaluation information on postsecondary education/training, primarily demographic information, level of satisfaction, and postsecondary education/training outcomes.

Nine projects indicated the type of instrumentation used in project evaluation. Information on students/clients is being collected primarily through the use of project developed instruments. Four projects reported on the use of commerically available instruments to assess specific competencies.

PROJECT OBJECTIVES

Project objectives were reported by nine projects under this competition. Eight projects each reported having the following specific objectives: student assessment, placement of students into supported work, nonvocational training of students, development and implementation of a service delivery model, development and dissemination of products, dissemination of information through conferences, presentations, articles, etc., and development of interagency agreements.

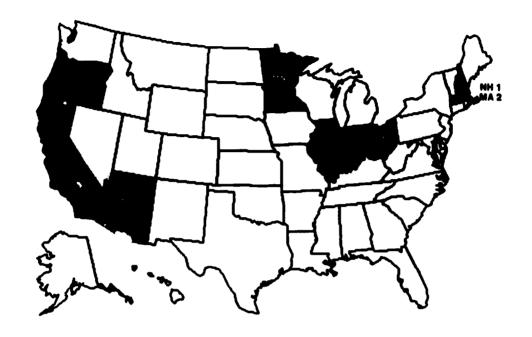

Seven projects reported the development of instruments as an objective, with four of the projects indicating this objective was added to their program. Other objectives reported by at least seven projects each included: vocational training of students, training of students after job placement, curriculum development, provision of technical assistance, conducting workshops, conferences, inservices, etc., and training employment related staff.

GEOGRAPHIC AREA SERVED

Of the 10 current projects three reported statewide services, and four projects reported serving major metropolitan areas. One project serves a portion of a county, and one project is countywide. The provision of service to more than one county within the state was reported by one project.

SECONDARY EDUCATION AND TRANSITIONAL SERVICES
FOR HANDICAPPED YOUTH: MODELS FOR PLANNING AND
IMPLEMENTATION OF TRANSITIONAL SERVICES

INITIAL COMPETITION: 12/07/84 SECOND COMPETITION: 1/21/86 TUIR) COMPETITION: 12/15/86

PURPOSE OF COMPETITION

The purpose of the initial competition was to support projects designed to plan and develop cooperative models for activities among State or local education agencies and adult service agencies, which would facilitate effective planning and program development to meet the service and employment needs of youth with handicapping conditions as they leave school. Model programs were to target those youth who need but have traditionally had problems linking with community-based training programs and services or obtaining and maintaining employment. Projects were expected to consist of a planning phase which would attend to the development of a cooperative planning model, and an implementation phase which would implement and evaluate the model.

The program focus was more explicit in the second competition. It was specified that the planning phase (Year 1) should result in cooperative systemic planning which goes beyond collaboration to formal working commitments and agreements. The planning process was also to be sufficiently documented in terms of procedures, resources required, and outcomes obtained so that others could replicate the cooperative planning process. The implementation phase was extended to two years in the FY1986 competition, and replicability of the model was stressed. The model demonstration was also to provide for rigorous evaluation in order to determine its effectiveness to extend current knowledge relating to the transitional needs of youth with handicapping conditions. The second competition also emphasized the collaborative nature of the model projects and stressed the need for applicants to show the commitment of participating education, rehabilitation, or other service providers within the application.

The focus for FY1987 was the identification of systemic barriers in agencies affecting the transition process, development and implementation of innovative approaches for transitional service delivery and the evaluation of the effectiveness of cooperative planning and implementation. The third competition reflected the requirements of the second competition (FY1986) for a planning phase and an implementation and evaluation phase. The target population remained the same as the initial competition.

AUTHORITY

Authority for this program is contained in Section 626 of Part C of the Education of the Handicapped Act as amended by P.L. 98-199.

ELIGIBLE RECIPIENTS

Institutions of higher education, state educational agencies, local educational agencies and other public and private nonprofit institutions or agencies (including the State job training coordinating councils and service delivery area administrative entities established under the Job Training Partnership Act) were eligible for all three competitions.

FUNDS AVAILABLE

Approximately \$900,000 was available for support of an estimated 13 new cooperative models in fiscal year 1985. The approximate amount available for fiscal year 1986 was \$880,000 for support of eight to ten new cooperative models. The approximate amount available for FY1987 was \$700,000 for an estimated seven awards.

NUMBER OF GRANTS AWARDED

In FY1985, 16 model demonstration grants were awarded. In FY1986, 10 new model demonstration grants were awarded. In FY1987, 12 new model demonstration grants were awarded.

DURATION

For FY1985, project support was available for two years subject to an annual review of progress and availability of funds. All FY1985 projects expired in 1987. Project support was extended to three years for both FY1986 and FY1987 projects, subject to an annual review and availability of funds. The FY1986 projects will expire in 1989, and the FY1987 projects will expire in 1990.

Approximately one-half of the projects are developing journal articles related to their projects, and nine projects reported developing parent handbooks. Eight projects are developing replication manuals, and eight are developing curricula. Slide and video presentations were reported by approximately 20% of the projects.

PROJECT EVALUATION PLAN

Of the 22 projects in this competition, 17 reported use of systems analysis as an evaluation approach. Twelve of these projects also reported using a goal based evaluation approach in conjunction with systems analysis. Ten projects reported using decision making as an approach and an additional four projects are using a goal based approach. Professional review was indicated by six projects as a supplemental evaluation approach, and three projects reported case study in conjunction with other evaluation approaches.

Eighteen projects indicated the collection of student/client evaluation information. Sixteen of these projects are collecting data on number receiving direct services and 14 projects reported a focus on evaluation information related to the student/client demographics and student/client employment status. Thirteen; ojects are compiling evaluation information on employers, the focus being on employer demographics, employer satisfaction and level of direct service provided to employer. Ten projects are collecting data on postsecondary education/training. Seventy percent (70%) of these projects are looking at postsecondary demographic information and level of direct service provided by project to postsecondary setting. Information on postsecondary education/training level of collaboration and postsecondary education/training outcomes is being collected by 60% of these projects.

Fifteen projects reported on instrumentation used in project evaluation, eight of which indicated the use of commercially available instruments to assess specific competency areas. The majority of these projects (75%) indicated the use of commercial instruments to assess the competency areas of general ability/intelligence, vocational skills, language, adaptive behavior, survival skills and academic achievement.

Of the 15 projects reporting, 13 indicated the use of project developed surveys, and ten projects reported development of rating scales.

PROJECT OBJECTIVES

Twenty projects reported on project objectives under this competition. Objectives in the general area of dissemination/replication/continuation were most frequently indicated by projects, with 20 projects involved with information dissemination, 18 projects developing and disseminating products and 17 projects conducting conferences/seminars for purposes of dissemination/replication. Sixteen projects reported the provision of technical assistance as an objective, and 16 projects indicated the identification of continuation strategies/resources as an objective. Fourteen projects reported project replication as an objective. Other objectives

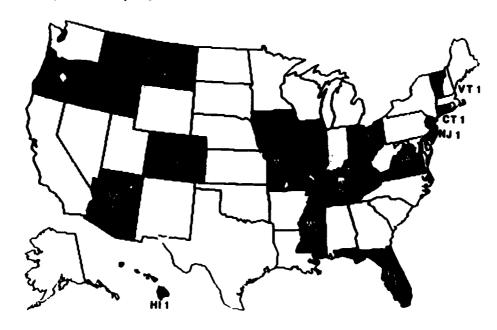

reported by more than 80% of the responding projects included: develop and implement a service delivery model, develop interagency agreements, develop network among service providers, train professionals, paraprofessionals, etc., and conduct workshops, conferences, inservices, etc. for purposes of training.

GEOGRAPHIC AREA SERVED

Of the 22 current projects, nine projects reported a statewide area being served. Three projects serve a county within their respective states, one of which includes a major metropolitan area. Four projects provide services to more than one county. Three projects serve small towns (5,000-100,000), and three projects indicated rural areas as the primary geographic area being served.

LOCATION OF 84.158C PROJECTS

Thirty-eight projects have been funded under this competition, with 22 currently funded. The map below depicts the location of the currently funded projects.

PROJECT PURPOSE. To facilitate the successful transition of mi(dly handicapped postsecondary youth from school to community. Using the college campus as a "sheltered community," the program involves members in paid, parttime campus based work experience focusing on work values/attitudes, and on the development of appropriate work-related social behaviors; campus-based social and recreational activities coordinated by mentors in collaboration with members; and instruction, based on members' needs, and provided by mentors. A major objective is to create opportunities for members to "lose their tabels" as they become increasingly independent of external controls and more self-reliant.

CURRENT FOCUS OF PROJECT ACTIVITIES (1987-88)

- 1. Implementation of interagency planning to include identification of collaborating agencies and the initiation of interagency communications network.
- 2. Plan, develop and implement college-based programs to include mentor training program, work-experience, social/recreational, and instructional aspects of campus-based program.
- 3. Establish concurrent work-experience skill training with PSSPs.
- 4. Design/implement evaluation procedures.
- 5. Identify research questions.
- 6. Identify/seloct LINK advisory board members and constitute leadership and liaison field boards.

PRIMARY GRANTEE. University/four year college.

TYPE OF COOPERATING AGENCIES/ORGANIZATIONS. Local education agency, JTPA service delivery area agent and state agencies.

SUMMARY OF 84.158C EXPIRED PROJECT PROFILES

PROJECT PURPOSE

Federal funding for 16 projects in this competition expired in August and September, 1987. The overall purpose stated by these projects was to improve employment outcome: for students served through the project model. Two projects focused on statewide system change. The projects served youth with various handicapping conditions.

FOCUS OF CONTINUATION ACTIVITIES

Twelve projects reported on the extent of continuation activities upon expiration of federal funding. Of the reporting projects, six are focusing on dissemination activities. Expansion of project services and manpower training were each reported as a continuation focus for five projects.

PROJECT COMPONENTS BEING CONTINUED

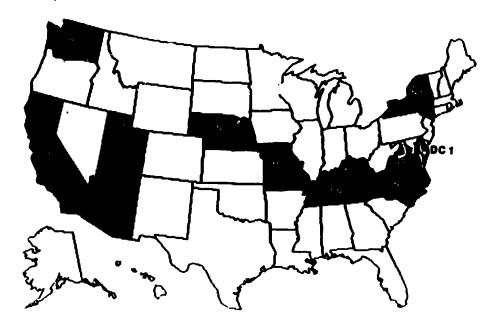

Of the 12 projects reporting on continuation activities, six projects indicated the continuation of major program components through agencies other than the primary grantee. Seven projects reported training as a program component being continued. Other program components being continued by at least one-third of the reporting projects include: assessment, placement, followup, education, dissemination, agency coordination, identification of employers/business sites and provision of transitional/employment and support services.

PROJECT PRODUCTS

Twelve projects reported on the availability of project products. Eight projects indicated the development of a project brochure, and six projects reported the availability of a parent handbook. Seven training manuals have been developed by four projects, and six articles have been written by three projects. Replication manuals and project developed instruments were each reported as products by three projects. Slide presentations/videotapes have been developed by three projects. Other singular products included newsletter, resource directory, curricula, student handbook and teacher handbook.

COMPETITION PROFILE: CFDA 84.153L

SECONDARY EDUCATION AND TRANSITIONAL SERVICES FOR HANDICAPPED YOUTH: MODELS FOR PROVIDING SECONDARY MAINSTREAMED LEARNING DISABLED AND OTHER MILDLY HANDICAPPED STUDENTS WITH JOB RELATED TRAINING

INITIAL COMPETITION: 12/15/86

PURPOSE OF COMPETITION

The purpose of this priority was to provide support to projects that: (1) identify the job related training and experience needed by mainstreamed secondary-aged learning disabled and other mildly handicapped students to successfully exit school to competitive employment and an independent adult life; (2) develop vocational/occupational intervention models providing job-related training and experience while maintaining the students pla ement predominantly with general education; and (3) evaluate the effectiveness of the model using quantitative and qualitative evaluation approaches and incorporating comparison groups or cohorts into the evaluation design.

The target population was specified for this competition as students at the secondary level with a learning disability or other mild handicap receiving special education services within the general education class or receiving up to two hours of special education per day within a resource room c'ass setting. Projects were to submit detailed information regarding the needs and problems encountered by the target population. Suggested components for inclusion in projects were: a 13th year component, job placement, counseling, on-the-job training, independent living skill training, and interpersonal skill training.

<u>AUTHORITY</u>

Authority for this program is contained in Section 626 of Part C of the Education of the Handicapped Act as amended by the Education of the Handicapped Amendments of 1983, P.L. 98-199.

ELIGIBLE RECIPIENTS

Institutions of higher education, State educational agencies, local educational agencies, and other public and private non-profit institutions or agencies (including the State job training coordinating councils and service delivery area administrative entities under the JTPA).

FUNDS AVAILABLE

Approximately \$700,000 was expected to be available for support of up to seven projects.

NUMBER OF GRANTS AWARDED

Ten grants were awarded under this competition.

DURATION

Project support was available for up to three years under this competition subject to an annual review of progress and availability of funds.

SUMMARY OF 84.158L PROJECT PROFILES

PRIMARY GRANTEE

Five grants were awarded to universities under this competition. Two awards were received by local education agencies and two nonprofit agencies received grant awards. A community college also received a grant award.

PROJECT PARTICIPANTS

Projects under this competition were to target mainstreamed secondary-aged youth with learning disabilities or other mild handicapping conditions. With ten projects reporting, an estimated 4221 youth are being impacted by the projects in this competition. Approximately 1201 youth are reported as receiving direct services. Eight projects reported on direct services. Of the youth receiving direct services, 83% have a learning disability. The age range of the youth is from 14 to 24 years.

Seven projects reported on the provision of related service components. Teachers are receiving service/training from five projects, with three projects reporting services to 161 teachers. Two projects are providing training to 340 parents, two projects each are also serving business/industry personnel, postsecondary faculty and undergraduate students. Agency personnel and project staff are receiving related service/training from three projects each.

COOPERATING AGENCIES & ORGANIZATIONS

Five projects reported cooperating agencies and organizations. Four projects are cooperating with public secondary schools or local education agencies. Two projects are collaborating with community colleges, and two projects are cooperating with JTPA service delivery area agents. State vocational rehabilitation agencies were also indicated as cooperating agencies by two projects.

PRODUCTS

Nine projects reported on product development. Six projects indicated the development of curricula, and four projects indicated the development each of brochures, training manuals, articles and replication manuals. Newsletters, student handbooks, and instruments were reported as products by three projects each. Two projects are developing parent handbooks, and one project anticipates development of a videotape.

PROJECT EVALUATION PLAN

Nine of the ten projects indicated the use of systems analysis as an evaluation approach. Five projects reported using a goal based approach; three in conjunction with systems analysis. Three projects reported using decision making, three indicated case study, and two projects reported using professional review.

All ten projects are collecting information on students/clients, specifically student/client progress in training programs. Eight of the projects indicated data collection on the number receiving direct or related services, assessment results for student/client and

student/client followup status. Seven projects reported collecting information on the number referred to project services, intake/referral information, student/client progress in education programs, student/client employment status, and student/client outcome status.

Seven projects are collecting information on employers. Six projects reported collecting information on employer characteristics/demographics and employer satisfaction with student, project activities, etc.. Employer outcome status data is being collected by four projects. Postsecondary information is being collected by eight projects, six compiling postsecondary education/training demographics. Five projects indicated data collection on postsecondary education/training outcomes.

Nine projects reported on instrumentation in project evaluation, seven of which indicated the use of commercially available instruments to assess specific student competency areas. Four projects reported using commercial instruments to assess career interests. Three projects reported instruments in vocational competency areas. Two projects each indicated using instruments in the general competency areas of general ability/intelligence, social skills, personality and academic achievement. Eight projects indicated the use of project developed instrumentation. Seven projects reported using interviews and five projects indicated the use of surveys.

PROJECT OBJECTIVES

Ten projects reported on project objectives under this competition. All projects reported objectives in the general area of assessment and referral with nine projects indicating student assessment as an objective. Nine projects also indicated student placement in competitive employment as an objective while four projects reported supported work placement as an objective. Postsecondary education/training placement was reported as an objective by six projects in this competition. Followup services to project participants was indicated as an objective by six projects. In the general objective area of training/education, all projects indicated vocational training as an objective, and seven projects reported nonvocational training as an objective. Eight projects reported on counseling as an objective, the majority providing career/vocational counseling. Provision of peer support groups was reported by four projects.

Nine projects reported on objectives in the general area of program development with all nine involved in curriculum development. Seven projects are developing instruments. In the general objective area of dissemination/replication/continuation, eight projects indicated objectives in dissemination of information and product development/dissemination. Six projects are involved in the development of interagency agreements. Seven projects reported training of professional, paraprofessionals, etc. as an objective, and seven projects indicated they were conducting workshops, conferences, inservices, etc. as an objective under manpower training. Under the general area of research, six projects indicated conducting followup studies as an objective and four projects reported empirical research as an objective.

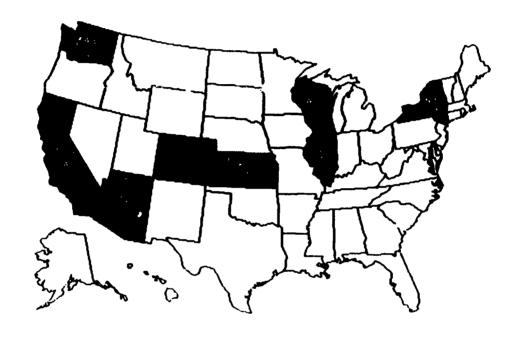

GEOGRAPHIL AREA SERVED

Of the ten reporting projects, six reported serving major metropolitan areas. In addition, one project serves a portion of a county which includes a major metropolitan area, and one project is rural. Services to more than one county within the state were reported by two projects.

COMPETITION PROFILE: CFDA 84.023D

RESEARCH IN EDUCATION OF THE HANDICAPPED: HANDICAPPED CHILDREN'S MODEL DEMONSTRATION PROJECTS/ YOUTH EMPLOYMENT PROJECTS

INITIAL COMPETITION: 3/05/84

PURPOSE OF COMPETITION

The purpose of this program was to support model projects that demonstrate innovative approaches to facilitating transition from school to work. Projects in this competition were expected to identify populations of individuals with handicapping conditions who have been isolated from the sequence of vocational education to employment capability. Projects were also to chose a particular school-community setting for developing a comprehensive model that incorporates a number of components for transition from school to work. Suggested components included attitude development, job placement, counseling, on-the-job training, training in areas of independent living, and development of interpersonal skills. The general aim of this competition was to use direct service to demonstrate the effectiveness of a newly conceived model, which may be replicated either in part or in its entirety, in other communities.

AUTHORITY

Authority for this program is contained in Sections 641 and 642 of Part E of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Institutions of higher education, States, State or local educational agencies, and other public or nonprofit private educational or research agencies and organizations were eligible for this competition.

FUNDS AVAILABLE

Approximately \$1,500,000 was expected to be available for support of 15 new demonstration projects in fiscal year 1984.

NUMBER OF GRANTS AWARDED

Twelve demonstration grants were awarded under this competition.

DURATION

Project support was for a three-year period subject to an annual review of progress and availability of funds. All Youth Employment Projects expired in 1987.

SUMMARY OF 84.023D EXPIRED PROJECT PROFILES

PROJECT PURPOSE

The 12 projects awarded in this competition addressed the overall purpose of developing and demonstrating innovative approaches to facilitating transition from school to work within the context of a model program. The majority of the project demonstrations included a focus on curriculum development or revision emphasizing employment and vocational outcomes. Community-based models were specifically referenced by four projects. Two projects established community-based linkage models, one being a network of employability readiness support groups and the other providing a computerized clearinghouse. The projects in this competition served students and clients with various handicapping conditions with five focusing on severe handicapping conditions.

FOCUS OF CONTINUATION ACTIVITIES

Eight projects reported on the focus of project continuation activities; four each reporting dissemination and inservice activities as a primary focus. Technical assistance activities were reported by two projects.

PROJECT COMPONENTS BEING CONTINUED

Nine projects reported on project components being continued. Replication and education/training were each indicated by four projects. Assessment, technical assistance and dissemination were components being continued by three projects each. Other components being continued by at least two projects included placement, counseling, inservice, referral and agency coordination. Of those projects reporting on the continuation of project components, five indicated the involvement of an agency or agencies other than the primary grantee in continuation activities.

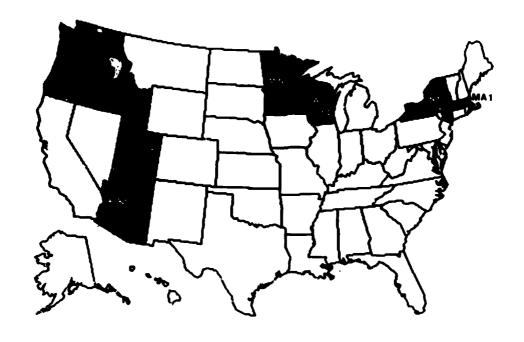

PROJECT PRODUCTS

Products were reported by nine projects. Five projects indicated the availablility of project curricula. Training manuals/modules were also reported by five projects. Four projects each indicated development of instruments and replication manuals. Three projects have written a total of four journal articles and two book chapters. Audiovisual materials have been developed by four projects.

COMPETITION PROFILE: CFDA 84.023G

RESEARCH IN EDUCATION OF THE HANDICAPPED: HANDICAPPED CHILDREN'S MODEL DEMONSTRATION PROJECTS/ POSTSECONDARY PROJECTS

INITIAL COMPETITION: 3/05/84

PURPOSE OF COMPETITION

The purpose of this program was to support new model demonstration projects which would complement secondary programming and link individuals with handicapping conditions who exit the secondary schools not yet ready for competitive employment to community-based training programs and services. Issues of particular interest included: development of an interface between education programs and community service providers, efforts to place and provide continued training and support to individuals for competitive employment, and the development of models to demonstrate that all individuals with handicapping conditions leaving public school programs have access to community-based training programs. The aim of the program was to use direct service to semonstrate the effectiveness of newly conceived educational models, which may be replicated, either in part or in their entirety, in other communities. Projects were expected to identify populations of individuals with handicaps who need but have traditionally had problems linking with community-based training programs and services or obtaining and maintaining employment. Suggested models included improvement of the effectiveness of postsecondary vocational education programs, demonstration of unique methods of ensuring postsecondary placement, and models demonstrating the intervention of various support systems.

AUTHORITY

Authority for this program is contained in Sections 641 and 642 of Part E of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Institutions of higher education, States, State or local educational agencies, and other public or nonprofit private educational or research agencies and organizations were eligible for this competition.

FUNDS AVAILABLE

Approximately \$1,500,000 was expected to be available for support of 15 new demonstration projects under this program in fiscal year 1984.

NUMBER OF GRANTS AWARDED

Fifteen demonstration projects were awarded under this competition.

DURATION

Project support was for a three-year period subject to an annual review of progress and availability of funds. All projects in this competition expired in 1987.

SUMMARY OF 84.023G EXPIRED PROJECT PROFILES

PROJECT PURPOSE

The 15 model demonstration grants in this competition addressed the priorities of this competition through the development of community-based programs leading primarily to employment-based outcomes. Eight projects specifically targeted competitive employment as an outcome of their model program. The majority of the projects established linkage models and expanded training for exiting secondary special education students to include employment training. Two projects targeted postsecondary education placement with eventual employment as a final outcome. The target population consisted primarily of 18 - 22 year old youth with learning disabilities, mental retardation, emotional disorders and physical handicaps as the primary handicapping conditions.

FOCUS OF CONTINUATION ACTIVITIES

Nine projects reported on the focus of their continuation activities. Four of the projects are targeting dissemination activities. Agency coordination, assessment, supported employment placement, training, product development and program evaluation were each indicated by at least two projects as a current focus.

PROJECT COMPONENTS BEING CONTINUED

Nine projects also reported on program components being continued. Of the nine reporting projects, five projects each indicated continuing the following components: agency coordination, assessment, referral, followup, placement and dissemination. Four projects are continuing an education component and three projects each are continuing the following components: intake/eligibility determination, training, program refinement/revision and research. Three projects i 'icated continuation activities occuring in agencies outside the primary grantee.

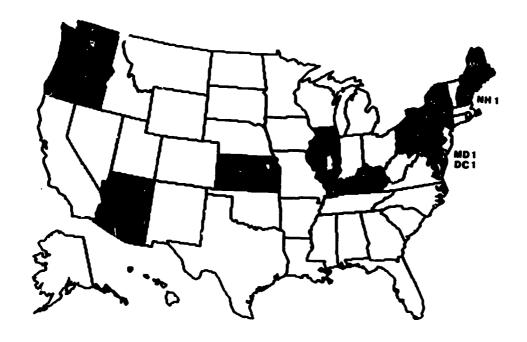

PROJECT_PRODUCTS

Eight projects reported on product development. Six projects indicated the availability of a training manual and four projects listed project developed instruments. Seven articles have been produced through four projects. Three projects developed curricula, and two projects each indicated development of parent handbooks, videotapes and newsletters.

POSTSECONDARY EDUCATION PROGRAMS
FOR HANDICAPPED PERSONS:
DEM_NSTRATION PROJECTS FOR MILDLY MENTALLY
RETARDED AND LEARNING DISABLED

INITIAL COMPETITION: 7/06/84

PURPOSE OF COMPETITION

The purpose of this competition was to stimulate the field of higher education to conduct projects that would enhance postsecondary possibilities for persons with mild mental retardation or persons with a learning disability especially to assure that demonstrated models for these populations are available to those concerned with their continuing educational needs. The primary focus was to provide individuals with a handicapping condition a means by which to pursue appropriate and effective educational opportunities in postsecondary, vocational and technical institutions. Projects were expected to develop, operate and disseminate specially designed model programs of postsecondary, vocational, technical, continuing, or adult education for persons with mild mental retardation or a learning disability.

<u>AUTHORITY</u>

Authority for this program contained in Section 625 of Part C of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Project support was available for periods of one, two, or three years. One project expired in 1985, four projects extred in 1986, and the remaining ten projects expired in 1987.

SUMMARY OF 84.078B EXPIRED PROJECT PROFILES

PROJECT PURPOSE

The 15 projects under this competition focused on enhancing postsecondary possibilities for persons with mild mental retardation or learning disabilities. Two of the projects were involved with systems change with more than one institution. One project involved a statewide community college system and the second project focused on five college campuses. The primary purpose of four projects included service delivery at the community college level. Vocational training at the postsecondary level was the purpose for four projects. Information dissemination for purposes of enhancing access was the purpose indicated by two projects. Three projects specifically reported development of support and/or learning assistance programs as their primary purpose.

FOCUS OF CONTINUATION ACTIVITIES

Six projects reported on the focus of their continuation activities. One-third of these projects each indicated a focus on product development, expansion of program services, dissemination, assessment and inservice training.

PROJECT COMPONENTS BEING CONTINUED

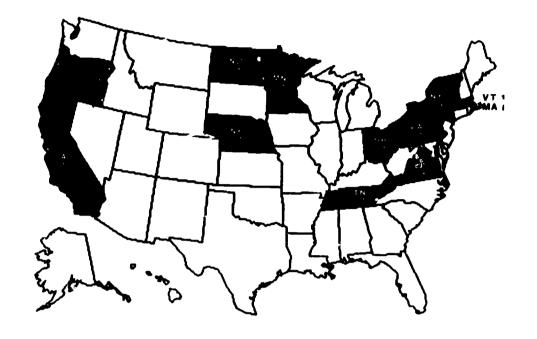

Of the six projects reporting on project components being continued, half indicated the continuation of assessment, training and intake/eligibility determination components. Two projects each reported continuing followup, referral, placement, education, manpower training, counseling and program refinement/revision components. Two projects indicated the continuation of project components by agencies other than the primary grantee.

PROJECT PRODUCTS

Products were reported by six projects in this competition. Seven training manuals have been developed by four of the projects and nine journal articles have been written by three projects. Brochures were indicated as a product by three projects, and two projects indicated instruments had been developed.

COMPETITION PROFILE: CFDA 84.128A

SPECIAL PROJECTS AND DEMONSTRATIONS FOR PROVIDING VOCATIONAL REHABILITATION SERVICES TO SEVERELY DISABLED INDIVIDUALS

INITIAL COMPETITION: 5/08/84

PURPOSE OF COMPETITION

The major purpose of this program was to establish demonstration projects for providing comprehensive programs in rehabilitation services which hold promise of expanding or otherwise improving the vocational rehabilitation of persons with severe disabilities who have special rehabilitation needs because of the nature of their disabilities. The primary goal was to assist individuals with severe disabilities to achieve the optimal vocational adjustment of which they are capable. Three prioritie were identified under this competition. Programs supported under priority three, transition from school or institution to work, were to develop effective strategies that involve use of integrated, generic community programs such a community colleges, non-profit vocational and technical schools, non-profit private schools, and other similar agencies or institutions. These programs were to provide transitional vocational services leading to full employment for individuals leaving a school or an institution.

AUTHORITY

Authority for this program is contained in Section 311(a)(1) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777a(a)(1)).

ELIGIBLE RECIPIENTS

States and public or nonprofit agencies and organizations were eligible to apply for grants under this program.

FUNDS AVAILABLE

Approximately \$2,935,000 was made available to support an estimated 25 new severely disabled projects in fiscal year 1984. The amount available for the transition priority was approximately one-fourth of the overall funding level or \$733,750.

NUMBER OF GRANTS AWARDED

Five special projects and demonstration grants were funded under the transition priority.

DURATION

Project support was available for up to three years subject to an annual review of progress and availability of funds. All projects supported by this grant award expired in 1987.

SUMMARY OF 84.128A EXPIRED PROJECT PROFILES

PROJECT PURPOSE

The primary purpose of the five projects funded under this competition was the provision of training for employment demonstration models. Projects were to target individuals with severe distilities in the development of effective transitional strategies.

PROJECT COMPONENTS BEING CONTINUED

Three projects reported on continuation activities. Followup was the focus of continuation activities for two projects. Training, assessment and placement components were also reported as being continued by two projects. One project indicated the continuation of project components by agencies other than the primary grantee.

PROJECT PRODUCTS

One project indicated the development and availability of a brochure, operational manual and slide presentation as project products.

The primary handicapping condition(s) of the students/clients served by this project included: severe handicap.

COMPETITION PROFILE: CFDA 84.158A

SECONDARY EDUCATION AND TRANSITIONAL SERVICES FOR HANDICAPPED YOUTH SERVICE DEMONSTRATION NODELS

INITIAL COMPETITION: 7/06/84

PURPOSE OF COMPETITION

The purpose of this program was to support projects that would develop and establish exemplary models for services and programs which include specific vocational training and job placement. Projects were expected to identify populations of individuals with handicapping conditions who have been isolated from the sequence of vocational education to employment capability. Using a school-community setting for developing a comprehensive model, projects were to incorporate a number of components for transition from school to competitive or supportive employment. Suggested components included: curriculum development in special education and vocational education, transition from secondary schools to time-limited services to gain entry into the labor market, development of ongoing community-based services to provide necessary support, and development of school/employer linkages such as Projects With Industry.

AUTHORITY

Authority for this program is contained in Section 626 of Part C of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Institutions of higher education, State Educational agencies, local educational agencies, or other appropriate public and private nonprofit institutions or agencies (including the State job training coordinating councils and service delivery area administrative entities established under the Job Training Partnership Act) were eligible for this competition.

FUNDS AVAILABLE

Approximately \$1,000,000 was expected to be available for support of 10 new demonstration projects in fiscal year 1984.

N JMBER OF GRANTS AWARDED

Sixteen service demonstration models were funded under this competition.

DURATION

Project support was for a three-year period subject to an annual review of progress and the availability of funds. All projects funded under this competition expired in 1987.

SUMMARY OF 84.158A EXPIRED PROJECT PROFILES

PROJECT PURPOSE

The demonstration models funded under this competition were to focus on vocational training and job placement. The specific purposes stated by the 16 funded projects reflected this overall purpose. Six projects indicated as a specific purpose, the development of either a competitive employment or supported work model. The other projects all indicated a purpose which included vocational training, job placement or work training models.

FOCUS OF CONTINUATION ACTIVITIES

Four projects reported on the focus of their continuation activities. The current focus indicated by individual projects included agency coordination, placement, followup, program refinement/revision, dissemination, referral, training, assessment, evaluation, transition planning and continuation of funding.

PRUJECT COMPONENTS BEING CONTINUED

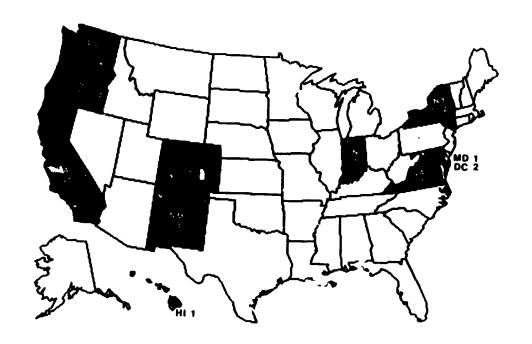

Of the five projects indicating which project components were being continued, all reported continuation of a placement component. Four projects are continuing an intake component and three projects each indicated continuation of agency coordination, followup and dissemination. Two projects each reported program refinement/revision, training, assessment, transition planning and support services as components being continued. Three projects indicated continuation of project components by agencies other than the primary grantee.

PROJECT PRODUCTS

Four projects reported on product development. Three projects indicated availability of a procnure. Four journal articles, a book and a chapter in a book have been produced by two projects. Replication manuals and various curriculum guides have been developed through two projects.

COMPETITION PROFILE: CFDA 84.158B

SECONDARY EDUCATION AND TRANSITIONAL SERVICES FOR HANDICAPPED YOUTH COOPERATIVE MODELS FOR PLANNING AND DEVELOPING TRANSITIONAL SERVICES

INITIAL COMPETITION: 7/06/84

PURPOSE OF COMPETITION

The purpose of this program was to support projects designed to plan and develop cooperative models for activities among State or local education agencies and adult service agencies, which would facilitate effective planning to meet the service and employment needs of handicapped youth as they leave school. Projects were expected to identify handicapped individuals who need but have traditionally had problems linking with community-based training programs and services or obtaining and maintaining employment. Suggested model program components included: development of formal working agreements and mechanisms, demonstration of unique methods of ensuring placement in continuing education and training programs, demonstration of the intervention of various support systems, incorporating successful programs, i.e., Projects With Industry, with educational agencies.

AUTHORITY

Authority for this program is contained in Section 626 of Part C of the Education of the Handicapped Act.

ELIGIBLE RECIPIENTS

Institutions of higher education, State educational agencies, local educational agencies, or other appropriate public and private nonprofit institutions or agencies (including the State job training coordinating councils and service delivery area administrative entities established under the Job Training Partnership Act) were eligible for this competition.

FUNDS AVAILABLE

Approximately \$1,000,000 was expected to be available for support of 13 new cooperative models in fiscal year 1984.

NUMBER OF GRANTS AWARDED

Eleven cooperative models were funded under this competition.

DURATION

Project support was for up to a two-year period subject to an annual review of progress and the availability of funds. All projects under this competition have expired.

SUMMARY OF 84.158B EXPIRED PROJECT PROFILES

PROJECT PURPOSE

Of the 11 projects funded under this competition, five projects were involved in the development of local cooperative models. One project indicated the development of a state level cooperative model, and one project reported development of a regional interagency model. The purpose of one project was the provision of technical assistance and collection and dissemination of transition status data among selected state aducation agencies.

PROJECT COMPONENTS BEING CONTINUED

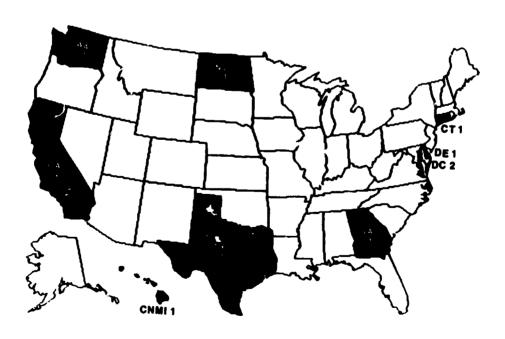

Three projects reported on continuation activities, all of which indicated dissemination as a component being continued. Two projects each are continuing the components of transition planning, manpower training and agency coordination.

PROJECT PRODUCTS

Brochures, parent handbooks, videotapes and instruments were each reported by two projects. One project has developed a bibliography on transition.

Please indicate type of evaluation approach(es) used.

[] \. SYSTEM ANALYSIS

(information gathered on planning, monitoring, impact and costs of a program) Examples of evaluation models under this approach include control group, cost effectiveness, quasi experimental, non-equivalent comparison group, pretest-posttest preexperimental, process checklist, program analysis of service systems, program evaluation and review technique (PERT), single subject design, true experimental design, time series, frequency counts.

[] 2. GOAL BASED

(incorporates the use of goals and a set of objectives that determine a specific outcome)

Examples of goal based models include discrepancy evaluation model (DEM), Goal Attainment Scaling, Management by Objectives.

[] 3. GOAL FREE

(approach which ascertains all program outcomes and not just the ones intended by the program personnel)
Examples of goal free models include Goal Free Evaluation, Impact Evaluation, Stakeholder Analyses.

[] 4. DECISION MAKING

(approach which utilizes the criterion of utility: Which information will be most useful? This approach underscores evaluation as a practical activity.) Examples of decision making models include CIPP (Context, Inputs, Process, Products), Concerns-Based Adoption Model (CBAM).

[] 5. CONNOISSEURSHIP

(approach which employs a single expert as a judge of the quality of a program) Examples of connoisseurship models include art criticism, file review.

[] 6. PROFESSIONAL REVIEW

(approach which involves the use of members of a profession to judge the activities of their peers; can include internal and external professional review systems)

Examples of professional review include advisory board review.

[] 7. QUASI LEGAL

(approach which incorporates the procedures and authority of the law)
Examples of quasi legal approach include blue ribbon panels, most types of public hearings, mock trials and judicial (adversarial) evaluation.

[] 8. CASE STUDY

(a narrative account of the actors and actions associated with the day to day running of a program; emphasis is on capturing the multiple perspectives of the participants in an effort to judge program success)

Examples of case study strategy include journalistic accounts, ethnographies.
