ABSTRACT

This document presents the results of a survey of the characteristics of students enrolled in public schools throughout the nation during the 1985-86 academic year. The survey instrument was comprised of an ED 101 form for school districts and an ED 102 form for individual schools. Surveyed were 3,455 districts, containing 37,313 schools and 23,544,704 students. Student data, broken down by sex and race (American Indian, Asian, Hispanic, Black, total minority, and White) are provided in the following areas: (1) enrollment; (2) suspensions; (3) corporal punishment; (4) gifted/talented; (5) educable mentally retarded; (6) trainable mentally retarded; (7) speech impaired; (8) seriously emotionally disturbed; (9) specific learning disabled; (10) language assistance programs; (11) graduation rate; (12) special education; (13) school desegregation; (14) participation in various programs (disciplinary action, gifted/talented programs, special education programs) as a function of the minority component of the school; (15) classroom desegregation; (16) limited English proficiency, pupils' needs and services; (17) special education needs and services, by percent of enrollment identified as requiring special education; (18) amount of time spent in special education programs; (19) distribution of single sex classes; and (20) selected program participation, by sex. Data are presented on 12 tables. Appendices provide the survey instrument, and detail reported and projected enrollment data by state. (BJV)

USER'S GUIDE FOR NATIONAL SUMMARIES

I. Introduction

The Fall 1986 Elementary and Secondary School (E&S) Civil Rights Survey was conducted to obtain data on the characteristics of students enrolled in public schools throughout the nation. The information is required by the Office for Civil Rights (OCR) to fulfill its responsibilities under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973.

The survey instrument was comprised of two forms: an ED 101 form completed by school districts and an ED 102 form completed by individual schools. Copies of the forms are presented in Appendix A. The districts selected to participate in the survey were statistically sampled from a universe of approximately 16,000 districts. The sample selection process was designed to meet the objectives of the survey and to provide statistical accuracy and projectability of the data.

The purpose of this report is to present a national summary of the data collected. Tables are presented using projected and reported data. A similar report, presenting state summaries, is also available.

Every effort has been made to analyze and present survey data in a useful manner. The summary report formats are based upon the summary reports produced for the corresponding 1980, 1982, and 1984 Elementary and Secondary School Civil Rights Surveys. If there are questions regarding this report, or if there are comments which might be helpful for future reports, please contact the ED/OCR Surveys Branch.

II. Description of the Survey

The Office for Civil Rights (OCR) Elementary and Secondary School Civil Rights Survey has been conducted on a national basis from the 1967-68 school year through the 1986-87 school year. The survey instrument is comprised of two forms: a district level form (ED101) and a school level form (ED102). Each district selected to participate in the survey completes an ED101 form; and generally, every school within selected districts completes an ED102 form. The survey forms reflect the important issues and direct responsibilities of OCR.

For the 1986 Survey, the major design consideration of the survey was the sampling process used to select districts to be surveyed. A secondary design consideration

was the subsampling of schools within large districts, i.e. the schools required to complete an ED102 form in large districts could themselves be a sample of schools within the district. A detailed discussion of the 1986 survey design follows.

The universe, from which the districts were to be sampled, was defined to be all public schools in the nation (fifty states and the District of Columbia). A 1984 vniverse file of all school districts was constructed using the 1982 universe file from which the previous 1984 E&S survey was drawn, the data from the 1984 E&S survey, and the 1982 district universe file maintained by the National Center for Education Statistics (NCES). The 1982 universe file had been created by merging the data from the 1976, 1978, 1980 and 1982 OCR E&S surveys with the 1980 NCES district universe file. The 1982 NCES file is formally identified as the Common Core of Data Universe of Public School Districts, 1983-84, with data as of October 1, 1982.

In order to minimize costs and to reduce respondent burden, a sampling methodology was employed to select districts for inclusion in the survey. The universe of public school districts contained 15,830 districts with 81,647 schools and total enrollment of 40,275,146 students. In sampling from this universe, the basic objective was to select a minimum number of districts that met a set of selection factors that represented the criteria which are to be satisfied to meet the needs of OCR.

The set of selection factors used to draw the sample basically were of two kinds: (1) minimum percent coverage of a specific population variable and (2) maximum percent standard deviation (PSD) of a projection of a population variable from the sample to the universe total.

The set of selection factors used in drawing the sample was as follows:

- 1. 75% coverage and 3% PSD of each of the following nationwide minority student components American Indian, Asian/Pacific, Black, and Hispanic.
- 2. 58% coverage and 3% PSD of the total student population.
- 3. 10% PSD of the student population for each individual state.

A computer program known as OPTSAM was used to develop the set of probabilities (one for each district) and to draw the sampled districts in such a way as to satisfy the above selection factors while attempting to minimize the costs of conducting the survey. As a result of running OPTSAM, 3,455 districts, containing 37,313 schools and 23,544,704 students, were selected from the universe.

The inverse of the probability associated with each district's selection in the sampling process was used as the district's weight in the survey, a value used for projection purposes. Since the set of districts which responded to the survey differed from the set of districts that were initially selected by the sampling process, it became

necessary at the end of the survey to reweight the sampled districts. The original weights were adjusted upwards by a small value to compensate for the nonresponding or otherwise missing districts.

The second design consideration associated with the 1986 E&S Survey was the continuation of the concept of subsampling schools within selected districts. Normally a district selected for the survey must complete and submit an ED102 form for each school within the district. For the 1986 E&S Survey, districts with more than 100 schools were given the option to subsample schools, as follows:

- Special schools (i.e. special education schools, vocational schools, disciplinary schools, etc.) were specifically included in the subsample and had to complete the ED102 forms.
- The remaining schools in the district were to be listed in alphabetical order and every other school was to be selected for the subsample.

Forty-seven of the districts selected to participate in the 1986 E&S Survey were eligible to subsample schools within their district; however, only ten elected to subsample.

Since complete district level data for the ten subsampling districts was unavailable by direct aggregation of the school records within the district, the following methodology was used to project district level values for the subsampling districts:

- 1. The special schools, which were required to be sampled, were identified and not included in the weighting calculations. Technically their weight was one (1.00).
- 2. The total number of regular schools in the district was determined as the number of schools in the district less the number of special schools. The number of schools in the district is provided on the district form (ED 101) in Item 3.
- 3. The weighting factor was calculated to be the total number of regular schools divided by the number of subsampled (selected) regular schools.
- 4. The district level data was then estimated by multiplying the regular schools' reported data by the weighting factor and adding the special school data to this weighted regular school data.

If the subsampling instructions had been followed exactly, the weighting factor for the regular schools from the subsampling districts would have equaled 2.00, since the districts were to select every other regular school from an alphabetic list of the schools within the district. In fact, the calculated weights varied from 1.88 to 2.22.

In the data tables described below, analysis based upon individual school data used the projected school level data (using the weighting factor for each school) from

NATIONAL SUMMARIES.

the subsampling districts. Analysis based upon district level data used the data reported by the subsample of schools, projected up to the district level.

III. Projection of the Reported Survey Data

The 1986 survey data is projectable to the state, regional or national level. Projections are to the universe of all public school districts. The survey data was projected by first multiplying the school or district level data elements by the corresponding district's sampling weight and then aggregating to the required state or national level. Reported data from districts whose schools were subsampled were first weighted by the technique described in Section II above.

The chart below compares the reported data to the projected data for the entire nation. The 1984 estimated universe data, from which the 1986 survey sample was drawn, is also presented as evidence of the validity of the projection of the survey data.

Data Element	Reported	Projected	Universe
Number of districts	3,378	15,777	15,830
Number of schools	37,298	82,999	81,647
Total Enrollment	23,386,577	41,156,036	40,275,146

A tabulation of the number of districts and schools and the total pupil enrollment by race/ethnicity and sex for each state and the nation is provided in Appendix B. Three lines of data are presented for each state and the nation:

- 1. Reported survey data, computed by aggregating the district level data from each state.
- 2. Projected survey data, computed from the reported data using the sampling weights for each district.
- Percent standard deviation (%STDDEV), computed by expressing one standard deviation of the estimate of the projection as a percent of the projected value.

The table also provides the 95% confidence boundaries (upper and lower) for the estimates of the national enrollment values. For a normal distribution, 95% confidence boundaries are computed by applying 1.96 standard deviations against the estimated population value.

In examining the data in Appendix B, it is interesting to compare the reported versus the projected percentages of enrollment by racial/ethnic category. For example, referring to total for nation the percentage of Black students is 21% of the total reported enrollment data and 16% of the total projected enrollment data. The

discrepancy is explained by the selection factors originally used to draw the 1986 E&S Survey sample; specifically, the requirement that 75% of the Black school population be covered by the survey. The data reveals that the actual 1986 E&S coverage was approximately 74% on a national basis.

On the other hand, if the percentages of enrollment by sex are compared, no significant differences exist between the reported and projected enrollment percentages. The primary reasons for the significant of the two percentages are, as follows:

- Sex was not used as a selection factor in drawing the survey sample; coverages of the nation's primary minority components were the critical selection factors.
- Sex is not correlated with race, i.e. the probability of selecting a Black student over a Hispanic student in no way influences the probability of selecting a male or a female.

In comparing projected data to the reported data in the 1986 E&S Survey, changes in the interrelationship of the data elements within each group of data can often be explained by the emphasis placed upon racial minority coverage in the survey sample and the relationship of the data element to racial/ethnic factors.

IV. National Summary of Survey Data

The National Summary tables are presented in the section of this report which directly follows the user's guide text. Throughout the tables, survey data is summarized by OCR client populations, which include:

- AM IND: American Indian or Alaskan Native
- ASIAN: Asian or Pacific Islander
- HISP: Hispanic
- BLACK: Black, not of Hispanic origin
- MINORITY: Total of above four categories
- WHITE: White, not of Hispanic origin
- TOTAL: Total of racial/ethnic categories
- MALE
- FEMALE
- LEP: Limited English Proficiency (Pupils in need of language assistance programs)

Definitions of these client populations are given on the survey forms (Appendix A).

The file from which the tables were generated contains the most accurate data obtainable from the districts. However, districts sometimes initially submitted

incomplete, inaccurate, or inconsistent data. Despite a major effort to secure, from the districts, additional information and/or corrections, some errors remain. In particular, some districts reported totals which did not agree with computed totals by race/ethnicity and/or sex. Throughout the following tables, computed totals, rather than reported totals, are presented. This leads to an inconsistency in tables which present data by both race/ethnicity and sex. In these tables, the total is the computed sum of the data by race/ethnicity and may not reflect the total by sex.

Table 1

Table 1 presents a summary of the survey data statistically projected to the nation. A description of the sampling and projection methodologies was provided in Sections II and III of this report. The number of districts and schools is presented first followed by a matrix displaying participation in various programs/activities by the OCR client populations. 'The rows of the matrix display eleven major programs/activities:

- ENROLLMENT: Pupils in membership on or about October 1, 1986 (ED 102, Item 5a)
- SUSPENSIONS: Pupils suspended for at least one day during the 1985-86 school year (ED 102, item 5e)
- CORP PUNISHMENT: Pupils who received corporal punishment during the 1985-86 school year (ED 102, Item 5d)
- GIFTED/TALENTED: Pupils enrolled in programs for the gifted/ talented (ED 102, Item 5c)
- EMR: Pupils enrolled in programs for the educable mentally retarded (ED 102, Item 7a)
- TMR: Pupils enrolled in programs for the trainable mentally retarded (ED 102, Item 70)
- SPEECH IMPAIR: Pupils enrolled in programs for the speech impaired (ED 102, Item 7e)
- SER EMOT DIST: Pupils enrolled in programs for the seriously emotionally disturbed (ED 102, Item 7g)
- SPEC LEARN DIS: Pupils enrolled in programs for a specific learning disability (ED 102, Item 7j)
- BILINGUAL: Pupils enroiled in a program of language assistance, such as a bilingual education program, English-as-a-Second-Language, or High Intensity Language Training (ED 102, Item 5b2)
- GRADUATES: Pupils who received a regular high school diploma during the 1985-86 school year (ED 102, Item 9).

For each program/activity, two lines of data appear:

- NUMBER: Number of pupils
- PERCENT: Number of pupils expressed as a percentage of the total column.

Blanks appear where data was not collected (e.g., male and female bilingual pupils).

The next group of information displayed on Table 1 relates to special education and includes four data items:

- CHILDREN AWAITING EVALUATION: Children referred for initial evaluation to determine if they require special education but have not yet been evaluated (ED 101, Item 5a)
- CHILDREN IDENTIFIED AS REQUIRING: Children identified as requiring special education (ED 101, Item 5b)
- CHILDREN RECEIVING IN DISTRICT: Children requiring special education and placed in special education programs in the school district (ED 101, Item 5c)
- CHILDREN RECEIVING ELSEWHERE: Children requiring special education and placed in special education programs in a nondistrict facility (ED 101, Item 5d).

The next data matrix displays enrollment by sex in single-sex classes and mixed classes for the following subjects in grades 7 through 9:

- Home Economics (ED 102, Item 8.a)
- Industrial Arts (ED 102, Item 8.b)
- Physical Education (ED 102, Item 8.c).

The final matrix displays enrollment in special education programs by the amount of time (part-time versus full-time) spent in all special education programs. Percentages are based on the total enrollment in each program. Data was taken from the ED 102 form, Item 7.

Table 2

Table 2 is similar to Table 1. Unlike Table 1, however, Table 2 and all subsequent tables are based on actual data submitted rather than statistical projections, with the exception of the school data projected for the subsampling districts as discussed in Section II. In addition, Table 2 presents one additional category of data not included on Table 1.

NATIONAL SUMMARIES - 7 - DECEMBER 1987

The add lional data category, which appears last, displays classroom data by race/ethnicity. This data represents classrooms in the lowest grade and in the highest grade of classrooms in schools that offer any two elementary grades between and including one through six. Furthermore, only classrooms in the grade range of one through six were to be reported. For example, if a school offered grades one through five, the school was to report data for each of the first and fifth grade classrooms. A maximum of thirty classrooms per school were analyzed. Data was obtained from the ED 102 form, Item 6, pupil assignment.

Table 3

Table 3 examines the area of school desegregation. The distribution of schools and minority students is examined as a function of the minority composition of the school and as a function of the deviation of the school from the district composition. All percentages are vased on the total number of schools surveyed and the total number of minority pupils in these schools (as given at the bottom of the report). Data was obtained from the ED 102 form, Item 5a, pupils in membership.

Referring to Table 3, under the column labeled *60-70%* a total of 1,584 schools or 4.2% (1,584 divided by 37,299 X 100) of the schools surveyed were 60-70% minority. Of these 1,584 schools, 365 deviated from the district minority composition by only 0-5%, while 6 deviated from the district composition by 50% or more. The 365 schools in the 0-5% category enrolled 162,672 minority students or 1.8% (162,672 divided by 8,942,770 X 100) of all minority students surveyed.

By examining Table 3, one can determine the extent to which minorities are isolated in surveyed schools. Further examination reveals whether any such isolation is due to overall minority composition at the district or school assignments within the district. For example, schools with 99-100% minority composition and a 0-5% deviation are simply reflecting the high minority composition (94% or more) of the district. Schools with 99-100% minority composition and a 50-100% deviation, however, may reflect potential school assignment problems.

Tables 4, 5, and 6

Tables 4, 5, and 6 are all similar in that they examine minority/non-minority participation in various programs or activities as a function of the minority composition of the school. Referring to Table 4, Disciplinary Actions by Percent Minority Composition of School, there were 102,891 minority students and 154,142 non-minority students who were suspended from schools with a 20-40% minority composition. Table 5 presents the same analysis for gifted/talented programs, while Table 6 examines selected special education programs. In Table 6, the figures presented for Total Special Education represent totals for the five programs listed and do not

include such programs as deaf/blind for which data was not collected by race/ethnicity.

Data for Table 4 was obtained from the ED 102 form, Item 5d, for pupils who received corporal punishment and Item 5e, for pupils suspended. Data for Table 5 came from the ED 102 form, Item 5c, pupils in programs for the gifted or talented. Five lines of special education program data on the ED 102 form (7a, 7b, 7e, 7g, and 7j) are displayed on Table 6.

Table 7

Table 7 displays classroom data by the percent minority composition of the class. Referring to the table, 58,805 classes (or 36.3% of all sampled classes) were comprised of 0-15% minority students. These 58,805 classes enrolled 65,682 minority students or 4.5% of all minority students in the sampled classrooms. Again, it should be noted that these figures are based on the low grade and high grade of classes offered in the grade span of one through six (up to thirty classrooms) from each surveyed school. Data was obtained from the ED 102 form, Item 6, pupil assignment.

Table 8

Table 8 examines the provision of bilingual services by race/ethnicity. Referring to the table, 23,489 American Indian students were identified as having limited English proficiency. Of these students, 20,809 were enrolled in a bilingual program, leaving 2,680 or 11.4% who were not participating in such a program. Data was taken from the ED 102 form, Item 5b1, pupils in need of language assistance programs and Item 5b2, pupils enrolled in language assistance programs.

Table 9

Table 9 examines the distribution of special education needs and services. The columns of the matrix represent the percentage of the district enrollment which was evaluated as requiring special education. Referring to the column labeled 4-6%, there were 174 districts in which 4-6% of the student population was evaluated as requiring special education. These 174 districts were comprised of 1,378 schools and had a total enrollment of 876,263. Within these districts, there were 47,034 children identified as requiring special education of which 43,634 children were receiving special education services in district facilities and 4,093 children were receiving special education services in facilities not operated by the school systems. Finally, within the 174 districts, there were 2,280 children awaiting evaluation to determine special education needs. Data were taken from the ED 101 form, Item 5, for special education information.

DECEMBER 1987

13

Table 10

Table 10 addresses the issue of mainstreaming and the requirement to determine special education needs on an individual basis. Referring to the table, the totals' columns indicate that there were 19,121 schools operating EMR programs for a total EMR enrollment of 226,271. Of these, 8,227 schools operated their program such that all EMR students in the school were enrolled in special education programs full-time (100% full-time). At the same time, 7,944 schools operated their EMR programs such that only 0-25% of the EMR students were enrolled in full-time special education programs. The first group of 8,227 schools enrolled 107,480 full-time EMR students while the second group of 7,944 schools enrolled 1,511 full-time EMR students. Data were taken from columns 10 and 11 of Item 7, special education programs, on the ED 102 form.

Table 11

Table 11 examines the distribution of single-sex classes for selected program enrollment in grades seven through nine. A single-sex class is defined as a class in which the enrolled pupils are all male or all female. Referring to the table, there were 10,541 schools offering Home Economics for a total Home Economics enrollment of 125,276. Of these 10,541 schools, 8,074 had no single-sex Home Economics classes and 307 had single-sex classes which enrolled 1-10% of all Home Economics students in the school. Similarly, the column labeled 100% indicates that 856 of the schools had no mixed Home Economics classes (100% of these classes in the 856 schools were single-sex classes). The 307 schools in the 1-10% category had 2,996 students in single-sex classes while the 856 schools in the 100% category had 73,927 students in single-sex classes. Data were obtained from the ED 102 form, Item 8, selected course enrollment.

Table 12

Table 12 examines selected program enrollment by sex. The first three programs are for grade spans seven through nine. The special education programs are for all grade levels. For each of the programs, the number and percent of males and females enrolled is displayed. Data were taken from the ED 102 form, Item 7, special education and Item 8, selected course enrollment.

U.S. Department of Education:
Washington, DC 20202-2516
Due December 15, 1936

GENERAL INSTRUCTIONS

- · Please use a typewriter or print legibly in ink
- Pur: membership should be reported as of October 1, 1986, or the nearest convenient date prior to December 15, 1985.
- If the answer for a given item is "none", enter "0" in the appropriate space.
- . If a particular item is not applicable in your case, enter "N/A"
- . Copies or this ED101 form and all ED102 forms for the district must be retained in the district office for two years from the due date Juntil December 15, 1981

DEFINITION

SCHOOL For the purpose of this report is a division of the school system consisting of elementary and/or secondary ion equivalent isoderic comprising or more grade groups or other identificate groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent

INSTRUCTIONS FOR COMPLETING FORM ED101

Guastichs 1, 2, 3 Self-explanatory

Cuertist 4 COURT ORDER STATUS if you are uncertain as to whether or not your school system is currently subject to a Federal or State court cross requiring your subject to determine the preparation of the appropriate Federal or State court to obtain this information.

Custrant SPECIAL EDUCATION For the purposes of this survey, a special education public value as sudent whose residence is within the age group served by the school system, and cay who has one or more of the following hand capping conditions educated metric retardation, transple mental retardation, hearing impairment, visual impairment, specon impairment, orticiped climbain en in other hearth impairment such as impairment, vitality or alemness due to a heart condition, tuberculosis, rheumatic fever letter, serious emotional disturbance and or a specific learning disable and or a specific learning disable children who are sociatly matadjusted or gifted/talented. Report on the basis of what is known to the school system at the time of reporting. On not include children who are residents of other school districts, even if they are being served by your district.

- a How many children are awaking initial evaluation? Number of pupils who have been referred for evaluation (to determine if they require special education if the first time and who have not yet been evaluated. This number is exclusive of those reported in builded on it does not include children being re-evaluated.
- b. How many children have been identified as needing special education services? Number of children who have been evaluated as needing any type of special education program, either full-time or part-time.
- c. How many children are placed in special education programs in this district? Include only those children who were identified in bill above. Combine the children being served on full-time and part-time bases. Include all children in the district who are presently enrolled in special education, whether they were evaluated in the past or for the first time this school year.
- d How many children are placed in special education programs in a nondistrict facility? Number of children evaluated as requiring special education services in a facility not operated by this school system. Combine children being served on a full-time and part-time bases

CERTIFICATION After you have reviewed the data submitted on the ED101 form and on the ED102 forms to be attached for each school, please sign the certification and enter the telephone number to be used in the event that questions arise regarding this report.

INDIVIDUAL SCHOOL REPORT: ED102

Office for Civil Rights
U.S. Department of Education
Washington, DC 20202-2516
Due December 15, 1986

GENERAL INSTRUCTIONS

- This form is to be completed for each individual school in the district.
- · Please use a typewriter or print legibly in ink.
- Pupil membership should be reported as of October 1, 1986, or the nearest convenient date prior to December 15, 1986.
- If the answer for a given item is "none" or if all elements of a matrix are "O", enter "O" in the appropriate space or in the total column only (in the case of a matrix). If an item is not applicable, enter "N/A" (not applicable) in the appropriate space or in the total column only (in the case of a matrix).
- A copy of this form must be retained at the district office for two years from due date (until December 15, 1988).

DEFINITIONS

SCHOOL. For the purpose of this report, a school is a division of the school system consisting of elementary and/or secondary (or equivalent) students, comprising one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same plant. Count only units administered by a principal or equivalent.

RACIAL/ETHNIC CATEGORIES Racial/ethnic designations, as used by the U.S. Department of Education, Office for Civil Rights, do NOT denote scientific definitions of anthropological origins. For the purposes of this report, a pupil may be included in the group to which he or she appears to belong, identifies with or is regarded in the community as belonging to. However, no person should be counted in more than one racial/ethnic category. The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data.

- American Indian or Alaskan Native. A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.
- Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands, or the Indian subcontinent. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
- Hispanic. A person of Mexican. Puerto Rican. Cuban. Central or South American, or other Spanish culture or origin-regardless of race
- Black (Not of Hispanic Origin): A person having origins in any of the Black racial groups of Africa.
- White (Not of Hispanic Origin): A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

PROGRAMS FOR THE GIFTED OR TALENTED Those programs designed for pupils who by virtue of outstanding abilities are capable of high performance and who require differentiated educational programs and/or services beyond those normally provided by the regular school program. Such pupils include those with demonstrated achievement and/or potential ability in any of the following areas singly or in combination: 1) general intellectual ability. 2) specific academic aptitude. 3) creative or productive thinking, 4) leadership ability, 5) visual or performing arts, 6) psychomotor abilities.

HANDICAPPED PUPILS (STUDENTS, CHILDREN) and SPECIAL EDUCATION PUPILS for purposes of this report the terms are synonymous. A special education pupil is one with one or more of the handicapping conditions defined below and who has been evaluated as requiring special educational services because of this (these) condition(s).

HANDICAPPING CONDITIONS The following definitions are to be used in preparing this report:

- Educable mentally retarded (or handicapped) a condition of mental retardation which includes pupils who are educable in the academic, social, and occupational areas even though moderate supervision may be necessary.
- Trainable mentally retarded (or handicapped)—a condition of mental retardation which includes pupils who are capable of only very limited meaningful achievement
 in the traditional basic academic skills but who are capable of profiting from programs of training in self-care and simple job or vocational skills.
- Hard of hearing a hearing impairment, whether permanent or fluctuating, which adversely affects a child's educational performance but which is not included under the definition of "deaf" in this section.
- Deaf—a hearing impairment which is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, which adversely affects educational performance.
- Speech impaired—a communication disorder, such as stuttering, impaired articulation, a language impairment, or a voice impairment, which adversely affects a child's educational performance.
- Visually handicapped—a visual impairment which, even with correction, adversely affects a child's educational performance. The term includes both partially seeing and blind children.
- Seriously emotionally disturbed—a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree, which
 adversely affects educational performance an inability to learn which cannot be explained by imellectual, sensory, or health factors; an inability to build or maintain
 satisfactory interpersonal relationships with peers and teachers, inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of
 unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. The term includes children who are
 schizophrenic.

rthopedically impaired—a severe orthopedic impairment which adversely affects a child's educational performance. The term includes impairments caused by properties anomaly (e.g., clubfoot, absence of some member, etc.), impairments caused by disease (e.g. poliomyelltis, bone tuberculosis, etc.), and impairments anomaly (e.g., clubfoot, absence of some member, etc.), impairments caused by disease (e.g. poliomyelltis, bone tuberculosis, etc.), and impairments and etc.

- Other health impaired—limited strength, vitality, or alertness, due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophelia, epilepsy, lead poisoning, leukemia, autism, or diabetes, which adversely affects a child's educational performance.
- Specific learning disability—a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, which may manifest riself in an imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dysfexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or motor handicaps, of mental retardation, or of environmental, cultural or economic disadvantage.
- Deaf-blind-concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational problems that they cannot be accommodated in special education programs solely for deaf or blind children.
- Multihandicapped—concomitant impairments (such as mentally retarded-blind, mentally retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that they cannot be accommodated in special education programs solely for one of the impairments. The term does not include deaf-blind children. For the purposes of this report, this category should include those pupils who are severely or profoundly mentally retarded.

SPECIAL EDUCATION PROGRAMS. Special education programs are those designed to meet the needs of children with size or more of the handicapping conditions above

INSTRUCTIONS FOR QUESTIONS ON ED102

Questions 1 through 3. Self-explanatory.

Question 4. GRADES OFFERED. In the boxes provided, check all grades offered in this school. Please note: The second box is to be checked by schools that offer only special education classes.

Question 5. PUPIL STATISTICS. Complete the chart for racial and ethnic categories and, where indicated, for males and females. Refer to the definitions above of racial and ethnic categories. Leave no blanks; where the answer is none, enter "0".

- a. Pupils in Membership. The total number of pupils in membership on or about October 1, 1986, for each racial and ethnic category and for males and females in each box report total membership—not percentages, average daily attendance, average daily membership, or year-end enrollment. Count each pupil as one, including any who attend less than a full day, such as kindergarteners.
- b. Pupils in Need of Language Assistance Programs Enter in b(1) the number of national origin minority pupils who are so limited in their English proficiency that they cannot effectively or equally participate in the school's regular instruction program. Enter in b(2) the number of pupils reported in b(1) who are enrolled in a program of language assistance (i.e., English-as-a-Second-Language, High Intensity Language Training, or a bilingual education program). Do not count pupils enrolled in a class to learn a language other than English.
- c. Pupils in Programs for the Gifted or Talented. The number of pupils enrolled in programs for the gifted or talented. Count pupils once regardless of the number of programs in which they are enrolled.
- d. Pupils Who Received Corporal Punishment. The number of pupils who received corporal punishment during the 1985-86 school year. Corporal punishment is the infliction of physical punishment to the body of a student by a school employee for pupils once regardless of the number of times they were punished.
- Pupils Suspended. The number of pupils who were suspended from this school for at least one day during the 1985–86 school year. Suspension is the temporary exclusion of a student from school for disciplinary reasons for only full school day or longer. Count pupils once regardless of the number of times they were suspended.

Question 6. PUPIL ASSIGNMENT. This question is to be completed by all schools that offer any two elementary grades between and including one through six. Select the lowest of those graces that your school offers and the highest. Do not include kindergarten. For example, if your school offers K-12, select grades one and six for the chart. If your school offers t-5, select grades one and five.

Question 7. SPECIAL EDUCATION PROGRAMS. Please read the definitions of the handicapping conditions on the first page of this instruction sheet. Do not complete transferred areas.

- Count pupils participating in special education programs operated at this school only. Include those pupils who receive special education services in their regular classrooms as well as those who receive such services in special classrooms.
- If any child participates in two or more programs, include him or her in the one program in which he or she spends the most time. Example: John Doe spends 10 hours per week in a program for the educable mentally retarded and 6 hours per week in a program for the orthopedically impaired, he would be reported in line (a) for the educable mentally retarded, since he spends most of his time in that program.
- In column 1, enter in each row the total number of pupils participating in each program, for rows a through 1. In row m, enter the total of rows a through 1
- In column 2 through 6, enter the number of pupils in each racial/ethnic category in rows a, b, e, g, and j (racial/ethnic data is not needed for the other rows). For each row in which data must be entered, the entries in columns 2 through 6 must sum to the entry in column 1.
- In columns 7 and 8, enter the number of male and female pupils in the special education programs defined in rows a, b, e, g, and j. For each of these programs, the sum of columns 7 and 8 must equal the entry in column 4.
- In column 9, enter for the programs defined in rows a, b, e, g, and j, the number of pupils who have also been identified in item 5b(1) as limited in English proticiency. Any such pupils will already have been counted in columns 2 through 8.
- In columns 10 and 11, enter the number of students who spend only a portion of the day in special education in column 10 and those who spend a full school day
 in special education in column 11. The sum of columns 10 and 11, for each row, must equal the total in column 1.

Ouestion 8 SELECTED COURSE ENROLLMENT. Complete the chart for pupils enrolled in all-male classes, all-female classes, and for males and females in mixed classes in (a) home economics. (b) industrial arts, and (c) physical education

Enter the number enrolled in grades 7 through 9. For example, if this school serves grades 6-7-8, include only those pupils in grades 7 and 8. In (a), include occupational home economics.

Question 9. HiGH SCHOOL GRADUATES. Complete the chart for those who received a regular high school diploma during the 1985-86 school year. A high school deploma, for purposes of this question, is a diploma granted upon the successful completion of a prescribed secondary program of studies. This includes where required as a prerequisite, the successful completion of a minimum competency test.

*This question is not to be answered by elementary schools, middle schools, or junior high schools

*Do not include those who received other than a high school diploma, such as those who received a special diploma, a certificate of attendance or a certificate of letion.

check the completeness and accuracy of each item reported. Errors or omissions may require a reliting of this form
