ABSTRACT

Results from the 18th annual Recruiting Trends survey completed by the Collegiate Employment Research Institute for Career Development and Placement Services at Michigan State University are presented. For this 1988-89 survey, cross-sections of employers from business, industry, government, and education were contacted, and responses were received from 739 organizations. Information is provided on the following subjects: salaried employees; international employment opportunities; changes in salaried employees last year; organization type influences hiring quotas; women hires; minority hires: liberal arts hires; new college graduate hires; starting salary averages; technical versus non-technical acceptances; reneging on job offers by students/employers; campus visits by employer representatives; trends for interviewing schedules; closed interview schedules requested; prescreening on college campuses; job availability by geographical region; recruitrent methods used by employers; implementation of new recruitment methods; employer recommendations--improved education; assistance for dual-career couples; employer reimbursement of relocation expenses; remedies for minority dropout problems; overall job market ratings; turnover of new college graduates; drug, alcohol, and AIDS testing; and employers surveyed. Charts and tables are included. (SM)

ACKNOWLEDGMENTS

Jack Shingleton, co-author of this publication for seventeen years and originator of the idea for <u>Recruiting Trends</u>, is gratefully acknowledged for his foresight, ingenuity, and leadership. His many years of service to Career Development and Placement Services at Michigan State University and his foundations in this research survey will never be forgotten. To him, I wish the best of continuing health and success. Without him, the ideas for this survey would never have germinated and flourished. Thank you, Jack.

For the time, efforts, and energies expended by so many employers who graciously responded to this year's <u>Recruiting Trends</u> survey, I thank you. I recognize that compiling data for this research pose extra burdens on already heavy schedules. Thus, I extend special thanks to those employers who completed and returned questionnaires so promptly. Because of your efforts, we can continue to provide these important data.

A panel of employer experts offered very valuable assistance with development of this year's quastionnaire. For this help, special thanks is extended to: Mr. Irv C. Pfeiffer, Manager, College Relations & Recruiting-Midwest, IBM CORP.; Mr. Erle E. Johnson, University Program Manager, WESTINGHOUSE ELECTRIC CORP.; Ms. Sue Hansen, Director, Executive Recruiting and Placement, MARSHALL FIELD'S; Dr. James E. Townsend, Jr., Manager, Recruiting Programs, DOW CHEMICAL U.S.A.; Mr. Charles DiMercurio, Manager, Recruiting Services & College Relations, ANHEUSER BUSCH COMPANIES INC.; Mr. Jeffrey D. Deal, Director of Human Resources, DELOITTE HASKINS & SELLS; Mr. John W. Crooks, Manager of College Relations, ELI LILLY AND CO.; Mr. Harvey T. Procter, Jr., Supervisor of College Recruiting, FORD MOTOR COMPANY; Mr. Glenn Blake, Director of Personnel, GENERAL MILLS; Mr. Sam Willett, College Relations Manager, HALLMARK CARDS, INC.; and Mr. John Wilhite, Corporate Manager of College Relations, HUGHES AIRCRAFT CO.

On the staff of Career Development and Placement Services at Michigan State University and helping with questions for this year's survey were Mr. Ed Fitzpatrick, Dr. Phil Gardner, Mr. Tony Rogalski, Ms. Vernicka Tyson, Ms. Lisa Thomas, Mr. Billy Dexter, and Mr. Bob Watts. Dr. Sarah Fryer, also an assistant director of Career Development and Placement Services, helped with this task and, in addition, offered advice on editing of the final report. For their efforts, a wish of thanks is extended.

Moreover, this report could not have been completed without support from a graduate assistant and clerical staff. Statistical analysis of responses was accomplished with valuable assistance from Su-Wen Lean, my graduate assistant. Denise Frederick supervised the clerical staff who made important recommendations throughout the project, assisted with collection of data, and helped with preparation of the final report: Jay Lloyd, Shari Straffon, Scott Cairns, Michelle Emerick, Derek Frederickson, and Andrew Chiplock.

To all who participated in the compilation of this report, thank you.

L. Patrick Scheetz, Ph.D.

Summary of

RECRUITING TRENDS 1988-89

A Study of 739 Businesses, Industries, Governmental Agencies, and Educational Institutions Employing New College Graduates

This summary provides results from the eighteenth annual Recruiting Trends survey completed by the Collegiate Employment Research Institute for Career Development and Placement Services at Michigan State University. For this 1988-89 survey, cross-sections of employers from business, industry, government, and education were contacted; and responses were received from 739 organizations. Survey results include information regarding anticipated changes in hiring trends for new college graduates, expected starting salaries, campus recruiting activities, new recruitment techniques, and other topics of interest to personne? administrators, placement officers, career counselors, faculty, and students.

Of the respondents this year, 36.6% represented industries and manufacturing organizations, 26.9% service organizations, 14.4% businesses, 17.1% educational institutions, and 5.1% governmental agencies and military services. (Page 3)

Organizations with 10,000 or more employees comprised 10.2% of the respondents; those with 5,000 to 9,999 employees, 7.3%; organizations with 1,000 to 4,999 employees, 27.0%; organizations with 500 to 999 employees, 12.8%; those with 100 to 499 employees, 25.2%; and those with 1 to 99 employees, 17.6%. This distribution reflects the diversity of employers included in this survey. (Pages 1-2)

The Recruiting Trends survey was initially mailed to employers on August 23-25, 1988. A reminder notice followed on October 23-25, 1988, to those employers who had not returned their questionnaires.

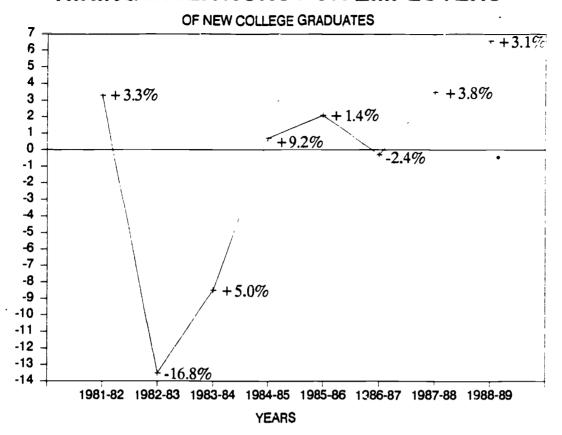

Job Outlook for the Class of 1988-89

Another good year is expected in 1989-89 for placement of new college graduates. Hiring quotas for this year among surveyed employers are expected to increase by 3.1% when compared to last year's hiring of new college graduates. Last year, hiring of new college graduates among surveyed employers totaled 66,151. This year, hiring quotas for surveyed employers are expected to total 67,496 for new college graduates. (Pages 7-9)

iv

HIRING INTENTIONS FOR EMPLOYERS

During the 1988-89 recruiting year, surveyed employers expect to hire more minority graduates (5.3%), MBA graduates (4.0%), bachelor's graduates (3.4%), and women graduates (3.3%). Hiring is expected to increase only slightly for master's graduates (1.6%), doctoral degree graduates (1.4%), and handicapper graduates (1.0%). (Page 13)

Hiring Quotas for This Year (1988-89)

According to survived employers, an overall increase of 3.1% is anticipated in numbers of new resisting this year compared to last year. Hiring of new graduates is expected to total 67,496. The employer categories expecting to hire the greatest numbers are electronics and electrical equipment (9,331); educational institutions (9,030); governmental administration (6,132); hospitals and health services (4,935); chemicals, drugs, and allied products (4,745); diversified conglomerates (4,319); food and beverage processing (4,138); aerospace and components (3,969); and banking, finance, and insurance (3,823). (Pages 7-8)

Other employer categories hiring this year are merchandising and retailing industries (2,900); the military (2,575); automotive and mechanical equipment (1,988); accounting (1,875); public utilities (including transportation) (1,728); petroleum and allied products (1,562); research and/or consulting services (1,298); service and volunteer organizations (816); hotels, motels, restaurants, and recreational facilities (651); printing, publishing, and informational services (502); construction and building materials manufacturing (463); tire and rubber products (246); metals and metal products (212); agribusiness (167); and glass, packaging, and allied products (88).

Employer categories with the greatest increases in numbers of anticipated hires for this year compared to new college graduates hired last year are hotels, motels, restaurants, and recreational facilities (65.6%); petroleum and allied products (50.4%); chemicals, drugs, and allied products (12.2%); construction and building materials manufacturing (11.5%); research and/or consulting services (11.2%); aerospace and components (11.1%); governmental administration (8.6%); electronics and electrical equipment (7.3%); printing, publishing, and informational services (6.0%); tire and rubber products (5.6%); accounting (5.2%); glass, packaging, and allied products (4.8%); food and beverage processing (3.9%); and service and volunteer organizations (2.1%). (Pages 7-8)

<u>Little change in hiring</u> over last year is anticipated by the military (0.6%). <u>Decreases in hiring quotas</u> are expected by hospitals and health services (-0.2%); diversified conglomerates (-2.4%); automotive and mechanical equipment (-3.3%); public utilities (including transportation) (-3.5%); merchandising and retailing industries (-3.9%); educational institutions (-5.4%); agribusiness (-5.6%); metals and metal products (-6.2%); and banking, finance, and insurance (-8.1%).

Demand for Various Academic Majors and Degree Levels

Overall, surveyed employers expect to hire about 3.4% more bachelor's degree graduates this year (1988-89). However, changes in demand for individual academic majors will vary considerably.

The greatest increases in demand will be experienced by majors in hotel, restaurant, and institutional management (6.2%); electrical engineering (4.8%); marketing/sales (4.6%); financial administration (3.9%); mechanical engineering (3.8%); computer science (3.4%); telecommunications (3.4%); general business administration (3.0%); agriculture (2.9%); accounting (2.7%); civil engineering (2.2%); and chemistry (2.1%).

Only slight increases in demand are expected for nursing (1.8%); industrial engineering (1.6%); liberal arts/ humanities (1.3%); physics (1.2%); and chemical engineering (1.1%).

Little or no change is anticipated for majors in personnel administration (0.6%); mathematics (0.5%); retailing (0.3%); geology (0.3%); social science (0.3%); journalism (0.2%); advertising (0.1%); human ecology/ home economics (0.0%); education (0.0%); natural resources (-0.2%); and communications (-0.8%). (Page 14)

Starting Salary Averages

The average annual starting salary expected for bachelor's degree graduates in 1988-89 is \$23,810, an increase of \$830 (3.5%) over last year's average starting salary of \$22,980. Expected starting salary offers for advanced degree graduates include: \$33,915 for MBA graduates; \$30,504 for masters degree graduates, and \$34,608 for doctoral degree graduates. (Pages 15-17 and 21)

vi

Highest among starting salaries expected this year for new college graduates are chemical engineering (\$32,082), electrical engineering (\$31,010), mechanical engineering (\$30,848), and computer science (\$29,778). These same four academic majors also ranked highest among last year's average starting salaries.

Estimated starting salary offers for other academic majors are: industrial engineering (\$29,094); physics (\$28,964); civil engineering (\$27,369); chemistry (\$26,704); geology (\$25,983); accounting (\$25,051); nursing (\$24,705); mathematics (\$23,968); marketing/sales (\$22,951); financial administration (\$22,829); telecommunications (\$22,498); general business administration (\$22,346); agriculture (\$20,701); communications (\$20,534); social science (\$20,496); advertising (\$20,431); hotel, restaurant, and institutional management (\$19,751); education (\$19,641); journalism (\$19,304); personnel administration (\$19,176); liberal arts/arts and letters (\$19,083); human ecology/home economics (\$18,466); retailing (\$18,247); and natural resources (\$18,019). (Page 21)

Job Opportunities by Geographical Region

According to surveyed employers, the greatest availability of employment opportunities for new college graduates during 1988-89 will be in the southwestern region of the United States, primarily California. Regions of the United States placed in order of best overall job availability are southwestern, northeastern, southeastern, northcentral, southcentral, and northwestern. (Page 34)

Overseas/International Employment

Of the 454 employers responding to this question, 214 organizations (47.1%) had some salaried employees in overseas locations. Of these employers, 106 (23.3%) had 1 to to 99 employees overseas, 40 (8.8%) had 100 to 499 employees overseas, 9 (2.0%) had 500 to 999 employees overseas, 22 (4.8%) had 1,000 to 4,999 employees overseas, 12 (2.6%) had 5,000 to 9,999 employees overseas, and 25 (5.5%) had more than 10,000 employees overseas. (Page 4)

Hiring Results from Last Year (1987-88)

When reviewing last year's hiring pattern, employers from this study reported large numbers of new college graduates hired. By employer category, the numbers of graduating students hired were: educational institutions (9,633); electronics and electrical equipment (8,873); governmental administration (5,645); hospitals and health services (4,944); diversified conglomerates (4,673); chemicals, drugs, and allied products (4,228); banking, finance, and insurance (4,161); food and beverage processing (3,934); aerospace and components (3,572); merchandising and retailing industries (3,119); and the military (2,560).

Other employer categories were automotive and mechanical equipment (2,056); public utilities (including transportation) (1,790); accounting (1,782); research and/or consulting services (1,167); petroleum and allied products (1,125); service and volunteer organizations (799); printing, publishing, and informational services (450); construction and building materials manufacturing (444); hotels, motels, restaurants, and recreational facilities (393); tire and rubber products (233); metals and metal products (226); agribusiness (177); glass, packaging, and allied products (84); and communication, including radio, TV, and newspapers (33). (Pages 7-8)

i iv

Percentage of Women Hired by Employers

Employer categories with the highest percentages of women among new hires last year were food and beverage processing (60.1%); educational institutions (50.6%); accounting (47.2%); hospitals and health services (46.2%); public utilities, including transportation (40.5%); hotels, motels, restaurants, and recreational facilities (36.1%); merchandising and retailing industries (33.7%); governmental administration (31.9%); petroleum and allied products (29.7%); tire and rubber products (28.8%); research and/or consulting services (28.1%); and banking, finance, and insurance (27.4%).

Percentages of women hired by other employer categories included agribusiness (22.6%); glass, packaging, and allied products (22.6%); printing, publishing, and informational services (21.8%); metals and metal products (19.9%); construction and building materials manufacturing (19.6%); aerospace and components (18.5%); automotive and mechanical equipment (16.2%); electronics and electrical equipment (14.5%); the military (13.7%); chemicals, drugs, and allied products (13.2%); service and volunteer organizations (12.4%); diversified corglomerates (10.8%); and communication, including radio, TV, and newspapers (9.1%). (Page 10)

Percentage of Minorities Hired by Employers

Employer categories with the highest percentages of minorities among new hires last year were food and beverage processing (29.3%); tire and rubber products (21.9%); educational institutions (20.7%); public utilities, including transportation (19.4%); petroleum and allied products (16.8%); hotels, motels, restaurants, and recreational facilities (16.3%); aerospace and components (15.4%); construction and building materials manufacturing (14.0%); hospitals and health services (14.0%); merchandising and retailing industries (13.8%); service and volunteer organizations (13.5%); and research and/or consulting services (9.9%). (Page 11)

Liberal Arts Hiring Trends

Among new college graduates hired last year (1987-88) by surveyed employers, approximately 9.5% were from traditional liberal arts majors (English, history, languages, etc.). Employer categories hiring significant numbers of liberal arts majors included communication, including radio, TV, and newspapers (42.5%); educational institutions (29.9%); banking, finance, and insurance (14.6%); the military (12.5%); service and volunteer organizations (11.4%); food and beverage processing (10.4%); and merchandising and retailing industries (10.1%). (Page 12)

Changes in Salaried Employees Last Year

With the expectation that hiring intentions of prospective employers might be influence by changes in numbers of salaried employees working for organizations last year, employers were asked to report any changes in their total numbers of salaried employees. Employers reported a net increase of 2.2% in the number of salaried employees working for their organizations last year. This compared to an increase of 2.3% found in 1986-87, 1.6% found in 1985-86, 1.7% found in 1984-85, and 1.5% found in 1983-84. During the last five years, most of the surveyed employers have only slightly increased the numbers of salaried employees working for their organizations. (Page 5)

Last year (1987-88), significant increases in numbers of salaried employees occurred in the following employment areas: printing, publishing, and informational services (10.5%); hotels, motels, restaurants, and recreational facilities (9.4%); research and/or consulting services (7.7%); food and beverage processing (5.6%); banking, finance, and insurance (3.4%); sarvice and volunteer organizations (3.3%); and aerospace and components (3.1%). (Page 5)

When measuring changes in salaried employees by geographical regions, the largest increases were reported in the southeastern region (3.6%), northwestern region (2.4%), and the southwestern region (2.4%). Size of organization also influenced changes in salaried employees. Last year, the greatest increases in the number of salaried employees occurred for employers with 1 to 99 employees (3.4%), 100 to 499 employees (2.7%), 500 to 999 employees (2.9%); and those employers with 5,000 to 9,999 employees (0.8%). A very slight decrease was reported by employers with 10,000 or more employees (-0.1%). (Page 6)

Anticipated Changes in Salaried Employees This Year (1988-89)

This year, employment areas expecting significant increases in numbers of salaried employees are hotels, motels, restaurants, and recreational facilities (7.4%); research and/or consulting services (6.0%); banking, finance, and insurance (5.2%); accounting (5.2%); printing, publishing, and informational services (5.2%); food and beverage processing (4.2%); glass, packaging, and allied products (3.7%); and electronics and electrical equipment (3.3%). (Page 5)

Starting Salary Averages Last Year

Employer categories with the highest average annual starting salaries last year were tire and rubber products (\$30,838); aerospace and components (\$29,403); automotive and mechanical equipment (\$27,800); chemicals, drugs, and allied products (\$27,756); public utilities, including transportation (\$27,705); petroleum & allied products (\$27,557); electronics and electrical equipment (\$27,412); and metals and metal products (\$27,183).

Average annual starting salaries for other employer categories included glass, packaging, and allied products (\$25,944); diversified conglomerates (\$25,869); research and/or consulting services (\$25,373); construction and building materials manufacturing (\$25,250); food and beverage processing (\$24,411); the military (\$23,875); accounting (\$23,145); hospitals and health services (\$23,022); banking, finance, and insurance (\$21,981); service and volunteer organizations (\$21,917); printing, publishing, and informational services (\$21,858); governmental administration (\$21,064); merchandling and related services including retailing industries (\$21,054); agribusiness (\$20,350); educational institutions (\$20,002); hotels, motels, restaurants, and recreational facilities (\$19,009); and communication, including radio, TV, and newspapers (\$17,500).

The employer categories expecting the greatest percentage of increase in starting salaries from last year (1987-1988) to this year (1988-1989) are service and volunteer organizations (5.2%); merchandising and related services including retailing industries (4.9%); the military (4.9%); diversified conglomerates (4.7%); educational institutions (4.7%); research and/or consulting services (4.7%); banking, finance, and insurance (4.4%); hospitals and health services (4.2%); agribusiness (4.2%); food and beverage processing (4.2%); and tire and rubber products (4.1%). (Pages 15-16)

<u>Starting Salaries Influenced</u> by Size and Geographical Location of Organization

The average annual starting salary for a new bachelor's degree graduate is greatly influenced by the <u>size of an organization</u>. The lowest starting salaries this year are expected from organizations with 1-99 employees (\$21,885), and the highest starting salaries are expected from organizations employing 10,000 or more employees (\$25,665). The largest increase in starting salaries are expected from employers with 500 to 999 employees (4.2%), employers with 100 to 499 employees (4.1%), and employers with 1,000 to 4,999 employees (4.0%). (Page 17)

This year, starting salaries are also influenced by the <u>qeographical region</u> where the new graduate is employed. The highest starting salaries for 1988-89 are expected from the northeastern region (\$26,077), and the lowest salaries are expected from the southwestern region (\$22,918). (Page 17)

Expected Increases in Starting Salaries

Starting salary offers for new bachelor's degree graduates are expected to increase by an average of 3.0% for 1988-89, only slightly higher than last year's increase of 2.8%. Starting salary offers are expected to increase for minority graduates, 2.9%; women graduates 2.7%; and master's degree graduates, 2.6%. Increases are also expected for doctoral graduates (2.6%), handicappers (2.3%), and MBA graduates (5.0%). (Pages 18-19)

Starting salary offers for new bachelor's degree graduates are expected to vary quite substantially between academic majors. Highest among anticipated increases for new bachelor's degree graduates this year (1988-89) will be accounting (2.9%). (Page 20)

Substantial starting salary increases are also expected for education (2.8%); computer science (2.7%); mechanical engineering (2.6%); marketing/sales (2.5%); electrical engineering (2.4%); chemical engineering (2.3%); financial administration (2.3%); nursing (2.3%); civil engineering (2.2%); general business administration (2.2%); hotel, restaurant, and institutional management (2.2%); chemistry (2.0%); industrial engineering (2.0%); and liberal arts/humanities (2.0%).

Moderate increases are anticipated for personnel administration (1.8%); mathematics (1.8%); social science (1.7%); physics (1.5%); telecommunications (1.5%); communications (1.5%); journalism (1.4%); agriculture (1.3%); human ecology/ home economics (1.1%); advertising (1.1%); geology (1.1%); natural resources (1.1%); and retailing (1.0%). (Page 20)

Starting Salaries Increase Vary by Employer Category

Employer categories expecting the most substantial increases are accounting (5.1%); food and beverage processing (4.8%); tire and rubber products (4.5%); hotels, motels, restaurants, and recreational facilities (4.4%); the military

(4.0%): chemicals, drugs, and allied products (3.8%); banking, finance, and insurance (3.5%); research and/or consulting services (3.4%); governmental administration (3.4%); hospitals and health services (3.4%); diversified conglomerates (3.4%); construction and building materials manufacturing (3.3%); educational institutions (3.3%); and service and volunteer organizations (3.0%). (Page 18)

Expecting increase of 2.0% to 2.9% are agribusiness (2.8%); automotive and mechanical equipment (2.7%); glass, packaging, and allied products (2.4%); petroleum & allied products (2.3%); metals and metal products (2.2%); electronics and electrical equipment (2.3%); public utilities, including transportation (2.1%); aerospace and components (2.0%); and printing, publishing, and informational services (2.0%).

Increases of less than 2.0% are expected by merchandising and related services including retailing industries (1.7%); and communication, including radio, TV, and newspapers (0.0%). (Page 19)

Acceptance Rates for Job Offers

An excellent measure of past job market trends is the percentage of job offers accepted. Of offers made to <u>technical</u> college graduates during 1987-88, 70.9% were accepted according to surveyed employers. This is a significant increase over previous years. Acceptance rates for the last five years were: 55.5% in 1986-87, 61.2% in 1985-86, 59.7% in 1984-85, 59.0% in 1983-84, and 60.1% in 1982-83. This increase in the acceptance rate for 1987-88 graduates most likely suggests either improved recruitment techniques or a somewhat more limited job market for technical graduates.

Offers of employment to non-technical college graduates were also accepted at a higher rate of 76.6% during 1987-88, according to surveyed employers. This compares to an acceptance rate of 62.5% in 1986-87, 68.3% in 1985-86, 68.2% in 1984-85, 68.5% in 1983-84, and 65.3% in 1982-83. (Pages 22-23)

The highest acceptance rates for offers of employment to <u>technical</u> graduates were received by educational institutions (78.0%) and service organizations (73.5%). Those employer types receiving lower acceptance rates were industrial and manufacturing organizations (71.0%); business organizations (65.4%); and government agencies (60.9%). Acceptance rates for <u>non-technical</u> graduates were a follows: educational institutions (88.1%), service organizations (76.5%), industrial and manufacturing organizations (73.9%), business organizations (73.7%), and government agencies (70.5%).

For non-technical college graduates, the highest acceptance rates were received by organizations with 100 to 499 employees (81.8%), 500 to 999 employees (81.4%), and 1 to 09 employees (80.8%). The lowest acceptance rates for non-technical graduates were experienced by employers with 5,000 to 9,999 employees (64.0%) and 10,000 or more employees (67.9%). The highest acceptance rates for technical graduates were received by organizations with 100 to 499 (80.1%), 500 to 999 (69.5%), 1 to 99 (75.8%). Following this employer size were organizations with 5,000 to 9,999 employees (64.3%), 1,000 to 4,999 (67.5%), and 10,000 or more (63.0%).

Reasons for Graduating Students Reneging on Job Offers

From the experiences of employers responding to this survey, the principal reason for new college graduates reneging on job offers is a better salary offer elsewhere. Less often are the following reasons given: geographical location of the other job, better advancement and/or promotion opportunities elsewhere, job status and prestige of the other job, better utilization of skills elsewhere, more challenging work assignments elsewhere, relocations required by the job, and reputation of the other organization. (Page 26)

Campus Recruitment Visits by Employers

Employers responding to this survey report an expected increase in numbers of recruitment visits on college campuses (3.6%) this year. Last year, campus visits increased by 1.4%.

Changes in the numbers of campus visits will vary again this year according to the type of organization. Surveyed employers report the greatest increases in campus visits can be expected in the following categories: construction and building materials manufacturing (16.0%); petroleum and allied products (12.3%); printing, publishing, and informational services (11.4%); hospitals and health services (10.6%); governmental administration (9.4%); diversified conglomerates (8.5%); food and beverage processing (7.1%); automotive and mechanical equipment (7.0%); metals and metal products (6.8%); research and/or consulting revices (5.8%); service and volunteer organizations (5.8%); chemicals, drugs, and allied products (5.7%); electronics and electrical equipment (5.6%); and hotels, motels, restaurants, and recreational facilities (4.3%).

Moderate increases in the number of campus visits are expected from banking, finance, and insurance (1.2%); educational institutions (1.0%); agribusiness (0.8%); and accounting (0.6%).

Those organizations expecting declines in the number of visits on college campuses include glass, packaging, and allied products (-1.7%); merchandising and retailing industries (-2.0%); public utilities, including transportation (-2.1%); aerospace and components (-4.8%); communication, including radio, TV, and newspapers (-18.3%); and tire and rubber products (-23.8%). (Page 27)

Employer Interview Schedules on College Campuses

Employers responding to this survey anticipate a slight increase in interview schedules on college campuses (3.0%) this year. Last year, surveyed employers also reported a slight increase in campus interview schedules (2.4%). (Page 29)

Changes in numbers of interview schedules will vary again this year according to type of organization. Surveyed employers report that the greatest increases in interview schedules can be expected from the following: hospitals and health services (14.4%); food and beverage processing (10.2%); hotels, motels, restaurants, and recreational facilities (9.4%); diversified conglomerates (8.9%); governmental administration (7.7%); construction and building materials manufacturing (6.7%); chemicals, drugs, and allied products (6.0%); service and volunteer organizations (5.8%); and printing, publishing, and informational services (5.6%).

Moderate increases in interview schedules can be expected from electronics and electrical equipment (4.1%); research and/or consulting services (3.3%); petroleum and allied products (3.2%); banking, finance, and insurance (2.3%); educational institutions (2.0%); agribusiness (1.7%); metals and metal products (0.8%); and accounting (0.4%).

Employers expecting no change in numbers of on-campus interview schedules were the military.

Employers expecting a decline in interview schedules were glass, packaging, and allied products (-0.6%); automotive and mechanical equipment (-0.9%); public utilities, including transportation (-1.4%); merchandising and retailing industries (-1.7%); aerospace and components (-7.1%); communication, including radio, TV, and newspapers (-22.5%); and tire and rubber products (-25.8%). (Page 29)

Closed Interview Schedules Requested by Employers

Employers responding to this year's survey indicate that a very slight increase (2.0%) in closed interview schedules will be requested by their organizations when interviewing on college campuses this year (1988-89).

Those organizations expecting substantial increases in closed interview schedules include agribusiness (17.5%); glass, packaging, and allied products (10.0%); food and beverage processing (8.9%); diversified conglomerates (7.3%); printing, publishing, and informational services (6.6%); and electronics and electrical equipment (5.8%).

Moderate increases are expected by merchandising and retailing industries (3.0%); chemicals, drugs, and allied products (2.7%); accounting (2.3%); construction and building materials manufacturing (2.0%); tire and rubber products (2.0%); research and/or consulting services (1.7%); governmental administration (1.3%); petroleum and allied products (1.0%); educational institutions (0.7%); metals and metal products (0.2%); aerospace and components (0.1%); and hotels, motels, restaurants, and recreational facilities (0.1%).

No change in the numbers of closed interview schedules is expected in hospitals and health services, the military, and service and volunteer organizations.

Decreases in closed schedules are expected by banking, finance, and insurance (-0.1%); public utilities, including transportation (-0.9%); automotive and mechanical equipment (-4.2%); and communication, including radio, TV, and newspapers (-55.0%). (Page 31)

Prescreening on Collete and University Campuses

of 586 organizations responding to this question, 372 employers (63.0%) indicated that their organizations prescreened at colleges and universities where it was permitted last year. These there is reverse a decline in prescreening requests indicated last year and are comparable to a year earlier; as revealed in these data: 46.1% in 1987-88 and 65.5% in 1986-87. These statistics indicate that organizations are again exercising the pre-screening option on college campuses.

Employer catgories using prescreening most often were public utilities, including transportation (89.0%); chemicals, drugger and allied products (83.0%); metals and metal products (83.0%); banking, finance, and insurance (81.0%); petroleum and allied products (80.0%); aerospace and components (79.0%); merchandising and retailing industries (79.0%); electronics and electrical equipment (75.0%); food and beverage processing (74.0%); diversified conglomerates (72.0%); accounting (71.0%); and automotive and mechanical equipment (71.0%). Following these were agribusiness (64.0%); glas, packaging, and allied products (64.0%); construction and building materials manufacturing (54.0%); printing, publishing, and informational services (62.0%); tire and rubber products (60.0%); hotels, motels, restaurants, and recreational facilities (59.0%); research and for consulting services (59.0%); hospitals and health services (57.0%); the malitary (50.0%); educational institutions (38.0%); governmental administration (35.0%); and communication, including radio, TV, and newspapers (33.0%). (Page 33)

Recruitment Methods Used by Employers

The methods used most often by surveyed employers when recruiting new college graduates were on-campus interviewing (92.0%); referrals from current employees of their organizations (92.0%); job listings with placement offices (91.0%); write-ins (86.0%); referrals from college faculty and staff (81.0%); responses from want ads (79.0%); walk-ins (79.0%); summer employment (72.0%); internship programs (70.0%); referrals from campus organizations (67.0%); unsolicited referrals from placement offices (65.0%); minority career programs (59.0%); cooperative education programs (57.0%); resume books distributed by student clubs (54.0%); and recruitment at residentially Black colleges (50.0%).

Used less frequently were job listings with employment agencies (41.0%); women's career programs (40.0%); night demand major programs (31.0%); computer-generated resumes (24.0%); liberal arts career programs (21.0%); third-party in how swing (17.0%); contract recruiting (13.0%); contract college relations (9.0%); teleconferencing interviews (6.0%); employee leasing (6.0%); video interviews (4.0%); video resumes (3.0%); and interviewing via satellite (1.0%). (Pages 35-36)

Planned Implementation of New Recruitment Methods

Recruiting methods planned for implementation within organizations when recruiting new college graduates during the next five years include referrals from current employees of organizations (18.0%); on-campus interviewing

xiv

(18.0%); referrals from college faculty and staff (16.0%); job listings with placement offices (14.0%); minority career programs (9.0%); and internship programs (9.0%).

Not likely to be implemented within the next five years, if not already utilized by surveyed employers, are recruitment at predominately black colleges (-1.0%); cooperative education programs (-6.0%); referrals from campus organizations (-7.0%); women's career programs (-10.0%); FAX resumes (-17.0%); write-ins (-22.0%); computer-generated resumes (-28.0%); unsolicited referrals from placement offices (-29.0%); summer employment (-30.0%); video resumes (-33.0%); resume books distributed by student clubs (-33.0%); video interviews (-34.0%); high demand major programs (-35.0%); responses from want ads (-36.0%); teleconferencing interviews (-42.0%); liberal arts career programs (-47.0%); walk-ins (-49.0%); interviewing by satellite (-62.0%); employee leasing (-69.0%); contract college relations (-71.0%); job listings with employment agencies (-71.0%); third-party interviewing (-74.0%); or contract recruiting (-76.0%). (Pages 37-38)

Employer Recommendations for Improvement Of Education for College Students

Among most new college graduates interviewed by recruiters on college and university campuses, certain improvements are needed to make them more productive for work in business, industry, government, and education. Listed from areas needing the most improvement to those needing the least, the following recruiter recommendations were provided: written communication skills, decision-making skills, a positive attitude towards the work ethic, oral communication skills, judgement skills, maturity, well-developed work habits, interpersonal skills, adaptability, initiative, ability to get things done, well-defined career and work aspirations, problem-solving abilities, ability to accept responsibility, organizational abilities, flexibility, team player skills, tactical and strategic planning skills, diplomacy and tactfulness, and work experiences.

Continuing the list were ability to delegate, dependability, energy and ambition, motivaticual abilities, enthusiasm, innovative ideas, self-confidence and poise, ethics, perseverance, ability to be an example to others, technical expertise, assertiveness and aggressiveness, reliability, honesty and integrity, willingness to learn, courteousness, persuasion, marketing, sales abilities, budgeting abilities, general business skills, willingness to take extra assignments, entrepreneurial spirit, friendliness, suitable appearance, willingness to relocate, sociability, competitive abilities, campus leadership activities, interest in current events, sense of humor, willingness to continue education, willingness to travel, physical fitness, and foreign language competencies. (Pages 39-41)

Services and Assistance Provided to Gual-Career Couples

According to surveyed employers, selected services and assistance are provided to dual-career couples when one spouse is hired by an organization. A stalways offered are housing and apartment advice. Sometimes provided were contacts with local organizations, interviews within an organization for the spouse when appropriate, tours of local communities, and advice on resume distribution to other organizations. Seldom provided are market planning, scheduling of interviews with other organizations, consultation services, employment agency assistance, resume writing services, and day care facilities. (Page 42)

Relocation Expenses Reimbursed by Employers

Relocation expenses are <u>sometimes</u> reimbursed by surveyed organizations for new college hires. Listed according to those most often reimbursed, relocation expenses included transportation expenses, moving costs, cause or apartment hunting trip, temporary housing allowance, expenses for dependents, and an incidental moving expenses allowance. (Page 43)

Remedies for Dropout Problems Among Minority High School and College Students

Minority populations continue to grow and will likely comprise more than 33 percent of the United States population by the 21st century. However, minority populations also face the highest dropout rates among high school and college students. These high dropout rates may cause serious problems in the labor market over the next several decades.

In response to this situation, surveyed employers are distributing literature among high school and college graduates regarding employment opportunities within their organizations, providing summer employment within their organizations for minorities, developing present employees through internal training programs, providing internships and cooperative education programs for minorities, encouraging organization representatives to visit high school and college classes, providing speakers for high school career programs, promoting greater visibility for minority employees already on their staffs, attending minority career fairs, and offering part-time positions for minorities.

Seldom are these organizations offering programs or training schools for special needs of minorities, organizing minority support groups, or awarding scholarships and grants for minorities. (Page 44)

Overall Job Market Ratings for New Colleg. uraduates

The opinions of surveyed employers were solicited for their views of this year's (1988-89) job market for new college graduates. A selective list of academic majors was used, and only categories normally hired by an organization were rated.

As the basis for ratings, the following definitions were used: Excellent - Many more positions than college graduates, **Very Good** - A few more positions than college graduates, **Good** - Approximately as many college graduates as positions, Fair - A few more college graduates than positions, and **Limited-Many** more college graduates than positions.

According to surveyed employers, both minority and women college graduates will face a <u>very good</u> overall job market. For other categories of new college graduates, the job market was rated as <u>good</u>: master's degree graduates, bachelor's degree graduates, MBA graduates, handicapper graduates, MBA graduates, and doctoral degree graduates. (Page 45)

According to surveyed employers, this year's (1988-89) overall job market for new college graduates by academic major, in order of demand, will be: Good - Accounting; advertising; chemical engineering; chemistry; civil engineering; computer science; education; electrical engineering; financial administration; general business administration; hotel, restaurant, and institutional management; industrial engineering; marketing/sales; mathematics; mechanical engineering; nursing; physics; and retailing.

Receiving ratings of <u>fair</u> were agriculture, chemistry, communications, geology, human ecology/home economics, journalism, liberal arts/humanities, natural resources, and personnel administration. (Pages 46-47)

Turnover of New College Graduates

According to surveyed employers, 10% of new college graduates with <u>technical</u> degrees have left their organizations during the last three years. Those organizations experiencing the highest turnover rates for technical graduates were electronics and electrical equipment (18.7%); aerospace and components (18.1%); hospitals and health services (17.9%); research and/or consulting services (17.4%); accounting (15.6%); diversified conglomerates (15.4%); banking, finance, and insurance (14.3%); and chemicals, drugs, and allied products (13.3%).

Employer categories with turnover rates of less than 10% for technical graduates during the last three years included governmental administration (9.6%); agribusiness (8.0%); food and beverage processing (8.0%); construction and building materials manufacturing (7.6%); hotels, motels, restaurants, and recreational facilities (7.3%); public utilities, including transportation (6.4%); printing, publishing, and informational services (5.4%); educational

institutions (5.0%); tire and rubber products (4.6%); automotive and mechanical equipment (4.3%); the military (3.4%); petroleum and allied products (3.3%); glass, packaging, and allied products (3.2%); merchandising and retailing industries (3.2%); and metals and metal products (2.8%). (Pages 48-49)

New non-technical college hires left surveyed organizations at a rate of 13% during the last three years. Experiencing the highest turnover rates for non-technical graduates were service and volunteer organizations (45.0%); banking, finance, and insurance (23.9%); accounting (26.1%); merchandising and retailing industries (20.5%); hotels, motels, restaurants, and recreational facilities (18.6%); electronics and electrical equipment (17.1%); food and beverage processing (16.9%); research and/or consulting services (16.9%); hospitals and health services (16.4%); diversified conglomerates (14.7%); communication, including radio, TV, and newspapers (14.0%); aerospace and components (12.9%); governmental administration (12.5%); and glass, packaging, and allied products (10.5%).

Experiencing turnover rates of less than 10% for non-technical graduates were petroleum and allied products (9.1%); chemicals, drugs, and allied products (8.9%); educational institutions (8.0%); construction and building materials manufacturing (6.9%); printing, publishing, and informational services (6.8%); the military (6.6%); automotive and mechanical equipment (5.0%); metals and metal products (4.4%); public utilities, including transportation (4.0%); tire and rubber products (3.0%); and agribusiness (1.9%). (Pages 48-49)

Drug, Alcohol, and AIDS Testing

According to employers responding to this survey, <u>drug testing</u> of new college graduates was required by 32% of the organizations last year, an increase from 27% in 1987-88 and 20% using drug screening in 1986-87. However, presently 64% of the surveyed employers "never" require drug testing.

AIDS testing of new college graduates was required by 3% of the employers responding to this survey, an increase from 2% requiring AIDS testing last year.

Testing of new college graduates for alcohol levels was required by 14% of the survey respondents, an increase from 9% of the surveyed employers who were screening new college graduates for alcohol levels last year.

Of the organizations that do not currently screen job applicants for <u>drug use</u>, 6% intend to initiate a drug testing program within the next year, 12% within two years, and 23% within five years. Of the organizations not currently screening job applicants for <u>AIDS</u>, 1% intend to initiate an AIDS testing program within one year, 4% within two years, and 9% within five years. Of the organizations not currently screening job applicants for alcohol levels, 3% intend to initiate an alcohol testing program within one year, 6% within two years, and 12% within five years. (Page 50)

Observations: Responses to the 1988-89 Recruiting Trends survey were received from 745 employers representing businesses, industries, governmental agencies, and educational institutions. Organizations with 10,000 or more employees represented 10.20% of the respondents; those with 5,000 to 9,999 employees were 7.25% of the respondents; and organizations with 1,000 to 4,999 employees represented 26.98% of the respondents. Organizations with 500 to 999 employees were represented by 12.75% of the respondents, those with 100 to 499 employees by 25.23% of the respondents, and those with 1 to 99 employees by 17.58% of the respondents.

These numbers display the diversity of employers included in this survey.

Which category best describes your organization, and how many SALARIED employees (excluding clerical staff) are on the payroll of your organization? Observations: Employers were surveyed on this question since hiring intentions of prospective employers might be influenced by changes in numbers of salaried employees working for their organizations last year. Employers responding to this year's survey reported a net increase of 2.16% in numbers of salaried employees working for their organizations last year. This compared to an increase of 2.3% found in 1986-87, 1.6% found in 1985-86, 1.7% found in 1984-85, and 1.5% found in 1983-84. Over the last five years, many of the surveyed employers have slighty increased the numbers of salaried employees working for their organizations.

<u>Last year (1987-88)</u>, some significant increases in the number of salaried employees occured. Those organizations with high increases were found in the following employment areas: printing, publishing, and informational services (10.5%); hotels, motels, restaurants, and recreational facilities (9.4%); research and/or consulting services (7.7%); food and beverage processing (5.6%); banking, finance, and insurance (3.4%); service and volunteer organizations (3.3%); and aerospace and components (3.1%).

This year (1988-89), employment areas expecting significant increases in the number of salaried employees are hotels, motels, restaurants, and recreational facilities (7.4%); research and/or consulting services (6.0%); banking, finance, and insurance (5.2%); accounting (5.2%); printing, publishing, and informational services (5.2%); food and beverage processing (4.2%); glass, packaging, and allied products (3.7%); and electronics and electrical equipment (3.3%).

In the LAST YEAR (1987-88), what change occurred in the number of SALARIED employees working for your organization, and this year (1988-89), what change do you anticipate in the number of SALARIED employees working for your organization? Responses are listed by GEOGRAPHIC REGION.

		CHANGE LAST YEAR		THIS R

Continued . . .

Observations: <u>Last year</u>, hiring of new college graduates among surveyed employers totaled 66,151. The employer categories hiring the most new college graduates included educational institutions (9,633); electronics and electrical equipment (8,873); governmental administration (5,645); hospitals and health services (4,944); diversified conglomerates (4,673); chemicals, drugs, and allied products (4,228); banking, finance, and insurance (4,161); food and beverage processing (3,984); aerospace and components (3,572); merchandising and retailing industries (3,119); and the military (2,560).

Numbers of new college graduates hired by other employer categories this year were automotive and mechanical equipment (2,056); public utilities (including transportation) (1,790); accounting (1,782); research and/or consulting services (1,167); petroleum and allied products (1,125); service and volunteer organizations (799); printing, publishing, and informational services (450); construction and building materials manufacturing (444); hotels, motels, restaurants, and recreational facilities (393); tire and rubber products (233); metals and metal products (226); agribusiness (177); glass, packaging, and allied products (84); and communication including radio, TV, and newspapers (33).

This year, hiring among surveyed employers is expected to total 67,496 new college graduates, and the employer categories expecting to hire the greatest numbers were electronics and electrical equipment (9,331); educational institutions (9,030); governmental administration (6,132); hospitals and health services (4,935); chemicals, drugs, and allied products (4,745); diversified conglomerates (4,319); food and beverage processing (4,138); aerospace and components (3,969); and banking, finance, and insurance (3,823).

Numbers of new college graduates hired by other employer categories this year were merchandising and retailing industries (2,900); the military (2,575); automotive and mechanical equipment (1,988); accounting (1,875); public utilities (including transportation) (1,728); petroleum and allied products (1,562); research and/or consulting services (1,298); service and volunteer organizations (816); hotels, motels, restaurants, and recreational facilities (651); printing, publishing, and informational services (502); construction and building materials manufacturing (463); tire and rubber products (246); metals and metal products (212); agribusiness (167); glass, packaging, and allied products (88); and communication including radio, TV, and newspapers (3).

Employer categories with the <u>greatest percentage change</u> in numbers of new college graduates hired last year compared to anticipated number hired this year were hotels, motels, restaurants, and recreational facilities (65.6%); petroleum and allied products (50.4%). Increases were also anticipated by chemicals, drugs, and allied products (12.2%); construction and building materials manufacturing (11.5%); research and/or consulting services (11.2%); aerospace and components (11.1%); governmental administration (8.6%); electronics and electrical equipment (7.3%); printing, publishing, and informational services (6.0%); tire and rubber products (5.6%); accounting (5.2%); glass, packaging, and allied products (4.8%); food and beverage processing (3.9%); service and volunteer organizations (2.1%); and the military (0.6%).

Decreases in niring quotas are expected by hospitals and health services (-0.2%); diversified conglomerates (-2.4%); automotive and mechanical equipment (-3.3%); public utilities (including transportation) (-3.5%); merchandising and retailing industries (-3.9%); educational institutions (-5.4%); agribusiness (-5.6%); metals and metal products (-6.2%); banking, finance, and insurance (-8.1%); and communication, including radio, TV, and newspapers (-81.8%).

How many new college graduates were hired by your organization last year (1987-88) for professional positions, and how many do you expect to hire this year (1988-89)? Responses are listed by EMPLOYER SIZE.

OVERALL TOTALS	663	66.151 99	.78 65	67,496	102.89	3.1

Observations: According to surveyed employers, an overall increase of 3.1% is anticipated in numbers of new hires this year compared to last year. Quotas for employers are expected to vary by size of organization. Sizes of organizations with increases include employers with 1 to 99 employees (5.0%), employers with 500 to 999 employees (5.9%), employers with 1,000 to 4,999 employees (4.5%), employers with 5,000 to 9,999 employees (2.9%), and employers with 10,000 or more employees (2.7%). Employer sizes expecting decreases are organizations with 100 to 499 employees (-1.4%).

SOCIAL SCIENCES	Ţ	115	0.3	

Observations: Overall, surveyed employers expect to hire about 3.4% more bachelor's degree graduates this year (1988-89). However, changes in demand for individual academic majors will vary considerably.

The greatest increases in demand will be experienced by majors in hotel, restaurant, and institutional management (6.2%); electrical engineering (4.8%); marketing/sales (4.6%); financial administration (3.9%); mechanical engineering (3.8%); computer science (3.4%); telecommunications (3.4%); general business administration (3.0%); agriculture (2.9%); accounting (2.7%); civil engineering (2.2%); and chemistry (2.1%).

Only slight increases in demand are expected for nursing (1.8%); industrial engineering (1.6%); liberal arts/ humanities (1.3%); physics (1.2%); chemical engineering (1.1%); personnel administration (0.6%); mathematics (0.5%); retailing (0.3%); geology (0.3%); social science (0.3%); journalism (0.2%); and advertising (0.1%).

Majors with no change anticipated or decreases in demand will be human ecology/home economics (0.0%); education (0.0%); natural resources (-0.2%); and communications (-0.8%).

What was the average annual starting salary paid your organization to new bachelor's degree graduates hired last year (19 1988), and what average annual starting salary do you expect to offer new bache or's degree graduates hired by your organization this year (1988-1989)? Responses are listed for each EMPLOYER CATEGORY.

Continued . . .

Observations: The average annual starting salary expected for bachelor's degree graduates in 1988-89 is \$23,810, an increase of \$830 (3.5%) over last year's average starting salary of \$22,980. Employer categories with the greatest average annual starting salaries are tire and rubber products (\$30,838); aerospace and components (\$29,403); automotive and mechanical equipment (\$27,800); chemicals, drugs, and allied products (\$27,756); public utilities, including transportation (\$27,705); petroleum & allied products (\$27,557); electronics and electrical equipment (\$27,412); and metals and metal products (\$27,183).

Average annual starting salaries for other employer categories included glass, packaging, and allied products (\$25,944); diversified conglomerates (\$25,869); research and/or consulting services (\$25,373); construction and building materials manufacturing (\$25,250); food and beverage processing (\$24,411); the military (\$23,875); accounting (\$23,145); hospitals and health services (\$23,022); banking, finance, and insurance (\$21,981); service and volunteer organizations (\$21,917); printing, publishing, and informational services (\$21,858); governmental administration (\$21,064); merchandising and related services including retailing industries (\$21,054); agribusiness (\$20,520); educational institutions (\$20,002); hotels, motels, restaurants, and recreational facilities (\$19,009); and communication-- radio, TV, and newspapers (\$17,500).

The employer categories expecting the greatest percentage of increase in starting salaries from last year (1987-1988) to this year (1988-1989) are service and volunteer organizations (5.2%); merchandising and related services including retailing industries (4.9%); the military (4.9%); diversified conglomerates (4.7%); educational institutions (4.7%); research and/or consulting services (4.7%); banking, finance, and insurance (4.4%); hospitals and health services (4.2%); food and beverage processing (4.2%); tire and rubber products (4.1%); and agribusiness (3.8%).

ANNUAL STARTING SALARY

What was the average annual starting salary paid by your organization to new bachelor's degree graduates hired last year (1987-1988), and what average annual starting salary do you expect to offer new bachelor's degree graduates hired by your organization this year (1988-1989)? Responses are listed by EMPLOYER SIZE.

	STARTING SALARY LAST YEAR		ANTICIPATED	STARTING	% CHANGE FROM LAST YEAR
	NUMBER OF EMPLOYER	AVERAGE	NUMBER OF EMPLOYER	AVERAGE	%
EMPLOYER SIZES					
1-99	75	\$21,532	9	\$21.885	1 6
100-499	144	\$21,584	14	\$22.464	4.1
500-999	75	\$22,591	7-1	\$23,535	4 2
1000- 4999	163	\$23.899	158	\$24.844	4.0
5000- 9999	43	\$24,699	43	\$25.448	3.0

OVERALL TOTALS	560	\$22.973	542	\$23.804	3.6

Observations: The average annual starting salary for a new bachelor's degree gradua'e is influenced by the <u>size of an organization</u>. The lowest starting salaries this year are expected from organizations with 1-99 employees (\$21,885), and the highest starting salaries are expected from organizations employing 10,000 or more employees (\$25,665). The largest increase in starting salaries are expected from employers with 500 to 999 employees (4.2%), employers with 100-499 employees (4.1%), and employers with 1,000 to 4,999 employees (4.0%).

Responses are listed by GEOGRAPHICAL REGIONS.

*Sourc for base starting salaries when preparing this chart: Edwin B. Fitzpatrick, Annual Salary Report - 1987-88. East Lansing, Michigan: Career Development and Placement Services, Michigan State University, 1988.

Observations: Highest among starting salaries this year for new college graduates are chemical engineering (\$32,082), electrical engineering (\$31,010), mechanical engineering (\$30,848), and computer science (\$29,778). These same four academic majors were highest among last year's average starting salaries. The greatest increases in starting salary offers this year were for accounting (2.9%), education (2.8%), computer science (2.7%), mechanical engineering (2.6%), marketing/sales (2.5%), and electrical engineering (2.4%). Estimated starting salary offers for other academic majors and degree levels are listed above.

For 1987-88, what percentage of your offers of employment to new college graduates were accepted? Responses are listed for both TECHNICAL and NON-TECHNICAL college graduates.

(Continued)

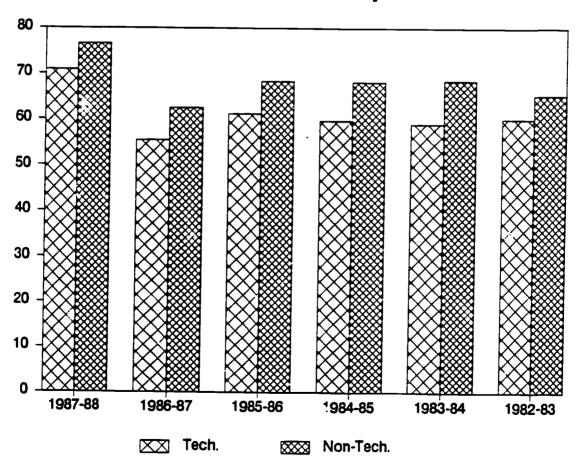

Continued . . .

Observations: An excellent measure of past job market trends is the percentage of job offers accepted. Of offers made to <u>technical</u> college graduates during 1987-88, 70.9% were accepted according to responding employers. This compares to an acceptance rate of 55.5% in 1986-87, 61.2% in 1985-86, 59.7% in 1984-85, 59.0% in 1983-84, and 60.1% in 1982-83. This increase in the acceptance rate for 1987-88 graduates most likely suggests either improved recruitment techniques or a somewhat more difficult job market for technical graduates.

Offers of employment to non-technical college graduates were also accepted at a higher rate,76.6%, during 1987-88, according to responding employers. This compares to an acceptance rate of 62.5% in 1986-87, 68.3% in 1985-86, 68.2% in 1984-85, 68.5% in 1983-84, and 65.3% in 1982-83.

Tech. Vs. Non-Tech Acceptance Rate

For 1987-88, what percent of your offers of employment to new college graduates were accepted? Responses are listed for both TECHNICAL and NON-TECHNICAL college graduates by EMPLOYER TYPE.

	TECHNICAL GRADU		NON-TECHNICAL COLLEGE GRADUATI				
	NUMBER OF EMPLDYERS	MEAN	NUMBER OF	MEAN			
EMPLOYER TYPES		-					
INDUSTRY & MANUFACTURER	169	71 O	142	73 9			
BUSINESS	38	65 4	50	-3 7

GOVERNMENT	24	60.9	24	70 5			
EDUCATION	24	78.0	63	88.1			
OVERALL TOTALS	358	70.9	392	76.6			

Observations: The highest acceptance rates for offers of employment to technical graduates were received by educational institutions (78.0%) and service organizations (73.5%). Those employer types receiving lower acceptance rates were industrial and manufacturing organizations (71.0%); business organizations (65.4%); and government agencies (60.9%). Acceptance rates for non-technical graduates were as follows: educational institutions (88.1%), service organizations (76.5%), industrial and manufacturing organizations (73.9%), business organizations (73.7%), and government agencies (70.5%).

Responses are listed by EMPLOYER SIZE.

	_	TECHNICAL COLLEGE GRADUATES		
	NUMBER OF	MEAN	NUMBER OF	MEAN

10.000+	49	63.0	51	37 9
OVERALL TOTALS	358	70.9	392	76.6

Observations: For non-technical college graduates, the highest acceptance rates were received by organizations with 100 to 499 employees (81.8%), 500 to 999 employees (81.4%), and I to 99 employees (80.8%). The lowest acceptance rates for non-technical graduates were experienced by employers with 5,000 to 9,999 employees (64.0%) and 10,000 or more employees (67.9%). The highest acceptance rates for technical graduates were received by organizations with 100 to 499 (80.1%), 500 to 999 (69.5%), I to 99 (75.8%). Following this amployer size were organizations with 5,000 to 9,999 employees (64.3%), 1,000 to 4,999 (67.5%), and 10,000 or more (63.0%).

How many new college graduates reneged on offers of employment from your organization last year (1988-89), and if your organization reneged on any offers of employment, how many were involved? Responses are listed by EMPLOYER CATEGORY.

TOTAL NUMBER OF RENEGES	1	551	3267	503	43

Observations: According to employers who reported <u>students</u> reneging on job offers, a total of 3,267 cases were cited. The largest average of reneges per employer were reported by service and volunteer organizations (59.2) and the military ₂| (38.3). More conservative averages were reported by hospitals and health services (14.0); hotels, motels, restaurants, and recreational facilities (11.1); merchandising and related services including retailing industries (9.8); banking, finance, and insurance (8.6); educational institutions (8.4); metals and metal products (8.2); food and beverage processing (7.9); aerospace and components (6.2); tire and rubber products (6.0); and governmental administration (4.7).

The employer category reneging on the most job offers was governmental administration (20).

From your experiences, what are the principal reasons for new college graduates reneging on offers of employment from prospective employers?

Observations: From the experiences of employers responding to this survey, the principal reason for new college graduates reneging on job offers is a better salary offer elsewhere. Less often given are the following reasons: geographical location of the other job, better advancement and/or promotion opportunities elsewhere, job status and pressige of the other job, better utilization of skills elsewhere, more challenging work assignments elsewhere, relocations required by the job, and reputation of the other organization.

What change do you anticipate in the number of CAMPUS VISITS for recruiting by your organization this year (1988-89)? Responses are listed by EMPLOYER CATEGORY.

Observations: Employers responding to this survey reported an expected increase in numbers of recruitment visits on college campuses (3.6%) this year. Last year, campus visits increased by 1.4%.

Changes in the numbers of campus visits will vary again this year according to the type of organization. Surveyed employers reported the greatest increases in campus visits can be expected in the following categories: construction and building materials manufacturing (16.0%); petroleum and allied products (12.3%); printing, publishing, and informational services (11.4%); hospitals and health services (10.6%); governmental administration (9.4%); diversified conglomerates (8.5%); food and beverage processing (7.1%); automotive and mechanical equipment (7.0%); metals and metal products (6.8%); research and/or consulting services (5.8%); service and volunteer organizations (5.8%); chemical: drugs. and allied products (5.7%); electronics and electrical equipment (5.6%); and hotels, motels, restaurants, and recreational facilities (4.3%).

Moderate increases in the number of campus visits are expected from banking, finance, and insurance (1.2%); educational institutions (1.0%); agribusiness (0.8%); and a counting (0.6%).

No changes in the number of campus visits is expected for the military.

Those organizations expecting declines in the number of visits on college campuses include glass, packaging, and allied products (-1.7%); merchandising and retailing industries (-2.0%); public utilities, including transportation (-2.1%); aerospace and components (-4.8%); communication, including radio, TV, and rewspapers (-18.3%); and tire and rubber products (-23.8%).

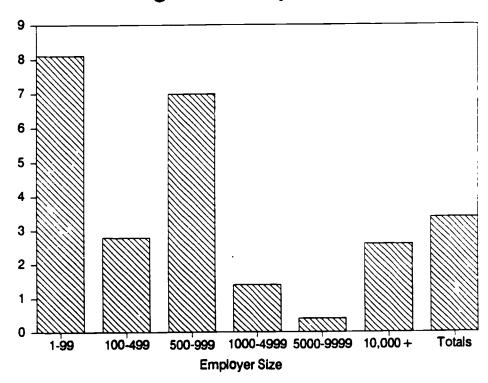

What change do you anticipate in the number of CAMPUS VISITS for recruiting by your organization this year (1988-89)? Responses are listed by EMPLOYER SIZE.

Observations: Employers responding to this survey anticipate a slight increase in interview schedules on college campuses (3.0%) this year. Last year, surveyed employers reported an increase in ampus interview schedules (2.4%).

Changes in numbers of interview schedules will vary again this year according to type of organization. Surve ed employers report that the greatest increases in interview schedules can be expected from the following: hospitals and health services (14.4%); food and beverage processing (10.2%); hotels, motels, restaurants, and recreational facilities (9.4%); diversified conglomerates (8.9%); governmental administration (7.7%); construction and building materials manufacturing (6.7%); chemicals, drugs, and allied products (6.0%); service and volunteer organizations (5.8%); and printing, publishing, and informational services (5.6%).

Moderate increases in interview schedules can be expected from electronics and electrical equipment (4.1%); research and/or consulting services (3.3%); petroleum and allied products (3.2%); banking, finance, and insurance (2.3%); educational institutions (2.0%); agribusiness (1.7%); metals and metal products (0.8%); and accounting (0.4%).

Employers expecting no change in numbers of on-campus interview schedules were the military.

Employers expecting a decline in interview schedules were glass, packaging, and allied products (-0.6%); automotive and mechanical equipment (-0.9%); public utilities, including transportation (-1.4%): merchandising and retailing industries (-1.7%); aerospace and components (-7.1%); communication, including radio, TV, and newspapers (-22.5%); and tire and rubber products (-25.8%).

Observations: Employers responding to this year's survey indicate that a very slight increase (2.0%) in closed interview schedules will be requested by their organizations when interviewing on college campuses this year (1988-89).

Those organizations expecting substantial increases in closed interview schedules include agribusiness (17.5%); glass, packaging, and allied products (10.0%); food and beverage processing (8.9%); diversified conglomerates (7.3%); printing, publishing, and informational services (6.6%); and electronics and electrical equipment (5.8%).

Other increases are expected by merchandising and retailing industries (3.0%); chemicals, drugs, and allied products (2.7%); accounting (2.3%); construction and building materials manufacturing (2.0%); tire and rubber products (2.0%); research and/or consulting services (1.7%); governmental administration (1.3%); petroleum and allied products (1.0%); educational institutions (0.7%); metals and metal products (0.2%); aerospace and components (0.1%); and hotels, motels, restaurants, and recreational facilities (0.1%).

No change in the numbers of closed interview schedules is expected in hospitals and health services, the military and service and volunteer organizations.

Decreases in closed schedules are expected by banking, finance, and insurance (-0.1%); public utilities, including transportation (-0.9%); automotive and mechanical equipment (-4.2%); and communication, including radio, TV, and newspapers (-55.0%).

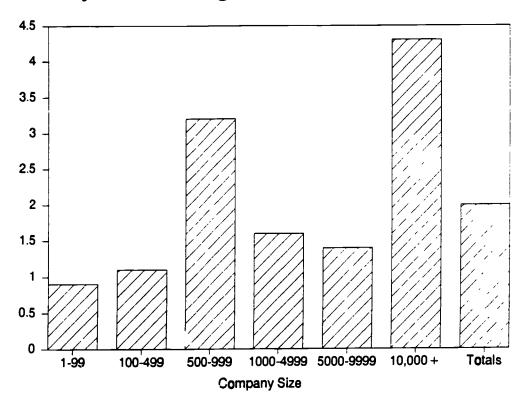

What change do you foresee in the number of CLOSED SCHEDULES arranged by your organization on college campuses this year (1988-89)? Responses are listed by EMPLOYER SIZE.

Observations: Of 586 organizations responding to this question, 372 employers (63.0%) indicated that their organizations prescreened at colleges and universities where it was permitted last year. In 1987-88, 46.1% prescreened, and in 1986-87, 65.5% of the surveyed employers prescreened. These statistics indicate a return of organizations pre-screening on college campuses.

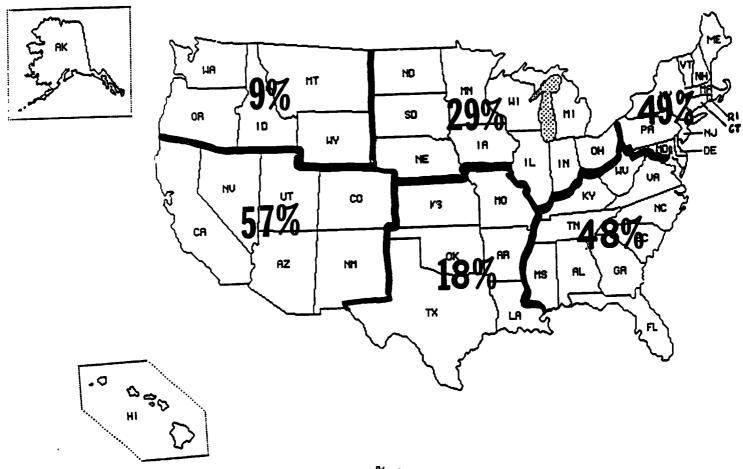

Employer catgories using prescreening most often were public utilities, including transportation (89.0%); chemicals, drugs, and allied products (93.0%); metals and metal products (83.0%); banking, finance, and insurance (81.0%); petroleum and allied products (80.0%); aerospace and components (79.0%); merchandising and retailing industries (79.0%); electronics and electrical equipment (75.0%); food and beverage processing (74.0%); diversified conglomerates (72.0%); accounting (71.0%); and automotive and mechanical equipment (71.0%). Following these were agribusiness (64.0%); glass, packaging, and allied products (64.0%); construction and building materials manufacturing (62.0%); printing, publishing, and informational services (62.0%); tire and rubber products (60.0%); hotels. motels, restaurants, and recreational facilities (59.0%); research and/or consulting services (59.0%); hospitals and health services (57.C%); the military (50.0%); educational institutions (38.0%); governmental administration (35.0%); and communication, including radio, TV, and newspapers (33.0%).

Based upon your experiences, what will be the availability of employment opportunities during 1988-89 for new college graduates in each geographical region of the United States? Responses are listed for each GEOGRAPHICAL REGION.

EXPENSES FOR DEPENDENTS	153	27	43	7	61	11;	70	12	247			100	

Observations: Relocation expenses are <u>something</u> reimbursed by surveyed organizations for new college hires. Listed according to those most often reimbursed relocation expenses included transportation expenses, moving costs, house or apartment hunting trip, temporary housing allowance, expenses for dependents, and an incidental moving expenses allowance.

Minority populations continue to grow and will likely comprise more than 33 percent of the United States population by the 21st century. However, minority populations also face the highest dropout rates among high school and college students. These high dropout rates may cause serious problems in the labor market over the next several decades. In response to this situation, which of the following are currently practiced by your organization?

				RESPO	INSE (CATEGO	RIES				i

Definitions: Excellent - Many more positions than college graduates, Very Good - A few more positions than college graduates, Good - Approximately as many college graduates as positions, Fair - A few more college graduates than positions, and Limited - Many more college graduates than positions.

Observations: According to surveyed employers, this year's (1988-89) overall job market for new college graduates by academic major, in order of demand, will rate as follows:

Good Accounting Advertising Chemical Engineering Chemistry Civil Engineering Computer Science Education Electrical Engineering Financial Administration General Business Administration Hotel, Restaurant, and Institutional Momt. Industrial Engineering Marketing/Sales Mathematics Mechanical Engineering Nursing Physics Retailing

Fair
Agriculture
Chemistry
Communications
Geology
Human ecology/Home Economics
Journalism
Liberal Arts/Humanities
Natural Resources
Personnel Administration

During the last three years, what percentage of new college hires have left your organization? Responses are listed for each EMPLOYER CATEGORY.

Continued . . .

Observations: According to surveyed employers, 9.7% of new college graduates with technical degrees have left their organizations during the last three years. Those organizations experiencing the highest turnover rates for technical graduates were electronics and electrical equipment (18.7%); aerospace and components (18.1%); hospitals and health services (17.9%); research and/or consulting services (17.4%); accounting (15.6%); diversified conglomerates (15.4%); banking, finance and insurance (14.3%); and chemicals, drugs, and allied products (13.3%).

Employer categories with turnover rates of less than 10% for technical graduates during the last three years included governmental administration (9.6%); agribusiness (8.4%); food and beverage processing (8.0%); construction and building materials manufacturing (7.6%); hotels, motels, restaurants, and recreational facilities (7.3%); public utilities, including transportation (6.4%); printing, publishing, and informational services (5.4%); educational institutions (5.0%); tire and rubber products (4.6%); automotive and mechanical equipment (4.3%); the military (3.4%); petroleum and allied products (3.3%); glass, packaging, and allied products (3.2%); merchandising and recalling industries (3.2%); and metals and metal products (2.8%).

New non-technical college hims left surveyed organizations at a rate of 12.7% during the last three years. Experiencing the highest turnover rates for non-technical graduates were service and volunteer organizations (45.0%); banking, finance and insurance (28.9%); accounting (26.1%); merchandising and retailing industives (20.5%); hotels, motels, restaurants, and recreational facilities (18.6%); electronics and electrical equipment (17.1%); food and beverage processing (16.9%); research and/or consulting services (16.9%); nospitals and health services (16.4%); diversified conglomerates (14.7%); communication including radio, TV, and newspapers (14.0%); aerospace and components (12.9%); governmental administration (12.5%); and glass, packaging, and allied products (10.5%).

Experiencing turnover rates of less than 10% for non-technical graduates were petroleum and allied products (9.1%); chemicals, drugs, and allied products (8.9%); educational institutions (8.0%); construction and building materials manufacturing (6.9%); printing, publishing, and informational services (6.8%); the military (6.6%); automotive and mechanical equipment (5.0%); metals and metal products (4.4%); public utilities, including transportation (4.0%); tire and rubber products (3.0%); and agribusiness (1.9%).

Does your organization require testing of new college graduates for the following:

						i -								
) 	ALWAYS		ALMOST ALWAYS		SOMETIMES		SELDOM		NEVER		TOTAL		TOT-	
 	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	MEAN	
EXISTENCE OF A TESTING PROGRAM						, <u> </u>				<u> </u>		T		
DRUG USE	176	27	9	1	25	4	27	4	426	64	663	100	3.8	
AIDS	11	2	1;	o¦	9	1	11	2	619	95	651	100	4.9	
ALCOHOL LEVEL	67	10	6 [1	22	3;	25	4	532	82	652	100	4.5	

Observations: According to employers responding to this survey, <u>drug testing</u> of new college graduates was required by 32% last year, an increase from 27% in 1987-88 and 20% using drug screening in 1986-87. However, presently 64% of the surveyed employers "never" require drug testing.

AIDS testing of new college graduates was required by 3% of the employers responding to this survey, an increase from 2% requiring AIDS testing last year.

Testing of new college graduates for alcohol levels was required by 14% of the survey respondents, an increase from 9% of the surveyed employers who were screening new college graduates for alcohol levels last year.

If your organization does <u>not</u> presently screen job applicants for the following, do you expect to initiate a testing program?

	<u> </u>		İ											
; 		WITHIN ONE YEAR		WITHIN TWO YEARS		WITHIN FIVE YEAR:		NOT LIKELY		NO T	OTAL RESPONSE		TOT-	
 	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	MEAN	
PLAN FOR A TESTING PROGRAM		İ	i I									 	1	
DRUG USE	- ₂₇	,¦ 6	27	6	51	11	202	44	152	33	459	100	3.9	
AIDS	1 8	1	16	3	30	5	313	52	233	39	600	100	4.2	
ALCOHOL LEVEL	18	3	15	3	33	6	273	50	208	38	547	100	4 2	

Observations: Of the organizations that do not currently screen job applicants for drug use, 6% intend to initiate a drug testing program within the next year, 12% within two years, and 23% within five years. Of the organizations not currently screening job applicants for AIDS, 1% intend to initiate an AIDS testing program within one year, 4% within two years, and 9% within five years. Of the organizations not currently screening job applicants for alcohol levels, 3% intend to initiate an alcohol testing program within one year, 6% within two years, and 12% ithin five years.
