ABSTRACT

This digest provides summary information from a major data collection effort involving a nationally representative survey of public or nonprofit institutions offering postsecondary occupational or technical education. The survey focused on the processes of curriculum and instructional decision making and student decision-making behavior. The 105 tables in the document are organized into five major categories: institutional characteristics and administration; linkages to external agencies; occupational programs and instruction; career guidance/placement office; and student characteristics. Within each major category, the tables are grouped by subject matter. The table of contents lists the order of 27 subjects within the five categories. Finally, an index to the digest can be used to find individual items of interest. All the tables present the data by institutional type and for the entire sample. Most of the data entries are unweighted means or frequency percentages. In other cases, rank orders of unweighted data are presented. The survey instruments are appended to the digest. (KC)

THE NATIONAL CENTER MISSION STATEMENT

The National Center for Research in Vocational Education's mission is to increase the ability of diverse agencies, institutions, and organizations to solve educational problems relating to individual career planning, preparation, and progression. The National Center fulfills its mission by:

- Generating knowledge through research
- Developing educational programs and products
- Evaluating individual program needs and outcomes
- Providing information for national planning and policy
- Installing educational programs and products
- Operating information systems and services
- Conducting leadership development and training programs

INTRODUCTION

This digest provides summary information from a major data collection effort that was undertaken by the National Center for Research in Vocational Education (NCRVE) at The Ohio State University in February-June, 1987. Funded as part of the National Center's grant from the U.S. Department of Education Office of Vocational and Adult Education, the scope of work for this project, entitled "Postsecondary Occupational Education Delivery: An Examination," called for a nationally representative survey of public or nonprofit institutions offering postsecondary occupational (or technical) education. The foci of the survey were twofold: (i) the processes of curriculum and instructional decision making (e.g., who is involved--internally and externally, extent and effectiveness of private sector involvement, responsiveness/flexibility of the process) and (ii) student decision making behavior (e.g., why do students continue their education beyond high school, why are particular institutions chosen, why are programs chosen, sources and accuracy of information). This chapter of the digest provides technical information on the survey design and procedures, and describes the organization of the digest.

Data and Methods

Because of the wide variety of institutional configurations that offer programs that could be classified as postsecondary occupational education, a precise definition of the universe of interest had to be developed in order to conduct the survey. The rules that were applied are displayed in exhibit 1. These definitional rules were selected for many reasons. For instance--

- o Proprietary institutions were excluded because of the large number of them (more than 3 times as many as public institutions) and because the focus of the study was on institutions receiving federal vocational education funds;
- o The universe was limited to institutions offering sub-baccalaureate programs of at least 9 months and up to 2+ years in duration leading to a vocational certificate or associate's degree; and
- o "Specialized programs"--flight/aviation, travel agency, religious programs, nurses/medical, avocational or hobby programs--and "specialized institutions"--Job Corps Centers, apprenticeship programs, penal institutions were excluded.

EXHIBIT 1

RULES FOR INCLUDING AN INSTITUTION IN THE UNIVERSE TO BE ANALYZED

1. In United States
 2. Public or Nonprofit
 3. Offers Associate degree or Vocational Certificate in applied field representing 1 or more but less than 4 years of work beyond grade 12 or equivalent
 4. Exclude institutions that offer only specialized programs in the following areas:
 - Beauty/Barber/Cosmetology
 - Real estate/Banking/Finance
 - Flight/Aviation
 - Travel agent
 - Bible/Religion
 - Fine arts
 - Nursing/Medical technician
 - Miscellaneous (e.g., Boat building, Dog grooming, etc.)
 5. Exclude institutions whose missions are not primarily education, such as the following:
 - Community based organizations
 - Apprenticeship programs
 - Job Corps centers
 - Vocational rehabilitation programs
 - Penal institutions
-

In general, all campuses from institutions were included, although in constructing the universe, some reliance was placed on judgements of state officials about this issue, so the listing may not be consistent with respect to its treatment of multiple campus institutions.

Universe Listing

Compiling the list of institutions meeting these definitional rules turned out to be difficult. To develop the list, two federal sources of data--a 1986 tape of the IPEDS universe and a 1982 document, 1982 Postsecondary Schools with Occupational Programs were compared. Between these two sources of data, there were a significant number of discrepancies--i.e. institutions on the tape but not in the document and vice-versa. To reconcile the lists, project staff contacted, by telephone, state agency personnel in all 51 states or jurisdictions. This process resulted in a list of 2,299 institutions. (The entire listing of this universe comprises appendix B to the project final report, Hollenbeck, et al., 1987.)

Sample Size

Sample size was calculated by the rules for proportional sampling--say, the proportion of institutions receiving Perkins funds or the percentage offering career exploration materials in a second language. The statistical formulas suggested that approximately 360 responses were required to be statistically accurate. With an assumed .50 response rate, the target sample size was set at 720.

Procedures

The survey design called for data from up to 20 respondents at each institution--the chief executive officer (CEO), the placement director, the chairpersons and two faculty from each of two occupational programs, and up to 12 students (three from classes taught by each of the 4 faculty.)

To achieve a random selection of programs and to control the selection process, a catalog or course offering brochure was requested by telephone from all sampled institutions. Programs to be included in the study would then be selected from these documents by project staff. A primary sample was selected with probability = .31 (720/2299). A supplemental 8 percent sample was selected to use as replacements for institutions in the primary sample that did not supply documents or that did not, in fact, belong to the population as defined. The primary sample numbered 725 institutions; the supplemental sample was 186 in number.

Ultimately, 99 of the 186 supplemental sample institutions were used to complete the sample. The geographic distributions of the primary sample and universe listing are given in exhibit 2.

Exhibit 2 categorizes the sample by type of institution using the following categories:

- o Community or Junior Colleges
- o Technical Institutes
- o Colleges/universities and branch affiliates

Community or Junior Colleges are defined as 2-year institutions that offer associate degree programs and have a substantial transfer mission. Technical Institutes have technical/occupational education as their primary or organizing mission and offer applied associate degrees or (more often) vocational certificates. The typical institution here is the area vocational-technical school that offers occupational and adult education programming. Colleges or universities and affiliates offer baccalaureate and higher degrees as their main emphasis, but typically have a small number of occupational programs that award an associate degree or vocational certificate. This category includes branch campuses with only 2-year programs (as long as one of those is a technical program.)

The brochures or catalogs from as many of the 725 (+186) institutions as would respond were retrieved, the occupational programs were listed by staff, and three programs from each institution were randomly selected. The first two selected were intended to be included in the study; the third was an alternative in case the institution no longer offered either of the first two programs selected.

After the selection of institutions and programs, the CEO of each institution was contacted to request institutional cooperation in the study. Each CEO was asked to name a liaison for the study with whom we would interact to distribute and collect the survey questionnaires, and the CEO was asked to complete a form that requested a listing of all (full-time and part-time) instructors in the two programs that had been selected. After receiving approval from the CEO or his/her designee, project staff randomly selected two instructors from each of the two program areas. (While the expectation was to select a total of 4 instructors from each institution, anywhere from 1 to 4 instructors may have been selected because some institutions had only a single occupational program and some programs had only one instructor.) Sampling of the students was left to be implemented by the liaison and instructors. Instructions were provided to select randomly 3 students currently taking classes from each of the four instructors. Again, the potential number of student respondents ranged from 3 to 12.

Questionnaire Development

Considerable time and effort were put into the development and testing of the six different questionnaires used in the survey. That development included several rounds of internal and external reviews and subsequent revisions and pilot testing at a number of institutions. The final results of these validity tests--the survey forms that were actually used--comprise the appendix to this digest.

Response Analysis

The survey instruments were extensive and, in parts, quite complex. Nevertheless, a response rate of about 60 percent was achieved, which is quite high for a voluntary mail survey. Responses from 432 institutions--377 administrators, 367 placement directors, 605 chairpersons, 1239 faculty, and 3330 students were received. Response rates were analyzed extensively in Hollenbeck et al., 1987. The analysis looked at institutional response (for how many institutions were there at least one response), intra-institutional response (for responding institutions, how many of the 20 potential responses were actually received), and item response.

Some nonrandomness in the response was observed. Exhibit 3 shows institutional nonrespondents by region, state, and institution type. Relatively low response was received from institutions in the Northeast and among colleges/universities. Among respondents at institutions, the average response rate was about 5/6--the lowest rate was among students, about 70%. The programs that were sampled encompassed a wide variety of subject content and even a wide variety of names for the same subject content. The 1,993 programs that comprised the sample were classified into approximately 144 different subjects spanning 12 major categories. Exhibit 4 lists the programs from the total sample and from the respondents within these 12 categories.

In our judgment, item nonresponse was not a serious problem--the median response rate for all items was over 95%. Only a handful of items are suspect in terms of validity (items that had the poorest response were personal salary and job history information, and questions that required exact institutional or program data--e.g., budgets, enrollments, percentages).

Organization of the Digest

The tables in this digest are organized into five major categories as follows:

- o Student Characteristics

Within each major category, the tables are grouped by subject matter. For example, within the category of Occupational Programs and Instruction are example subjects such as Chairpersons and Developmental Education. The table of contents lists the order of all of 16 subjects within each category. Finally, an index to the digest can be used to find individual items of interest.

All of the tables present the data by institutional type and for the entire sample. Most of the data entries are unweighted means or frequency percentages. In other cases, rank orders of unweighted data are presented. For readers interested in the precise wording of the questions, the surveys are appended to the digest.

APPENDIX: QUESTIONNAIRES

ADMINISTRATIVE OFFICIAL

Postsecondary Occupational Education Delivery:
An Examination

Conducted by:

The National Center for Research
in Vocational Education
The Ohio State University

Sponsored by:

Office of Vocational and
Adult Education
U.S. Department of Education

Why we need your help...

Your institution has been selected in a national study of postsecondary occupational education. You have been selected as a representative of your institution to help with that study. Your answers to the questions that follow are very important. They will help provide a basis for describing accurately occupational education as it is offered in postsecondary institutions in this country and should also provide support for future program improvements.

How you can help...

On the pages that follow you will find a number of questions that relate specifically to your community and institution, the kinds of students that attend your institution, and internal and external influences on curriculum and instruction. These questions can be answered quickly by placing an "X" or a check mark "✓" in the "[]" next to your answer or by filling in the blank spaces provided. (See the examples shown in the box below.) Please answer all the questions as accurately as possible. Please use a pen to mark your responses.

EXAMPLE 1:

o Nationally, about what percentage of high school students drop out each year?

- [1] Between 4% and 8%
[2] Slightly less than 15%
 [3] About 28%
[4] Over 50%

EXAMPLE 2:

o About what percentage of the students in your institution are:

- | | | |
|--------------|-----------|---|
| (a) Females? | <u>53</u> | % |
| (b) Males? | <u>47</u> | % |

When you have completed your questionnaire, (a) fold it in half, (b) staple or tape it together and (c) return it to the institutional liaison whose name is listed below. Your participation in this study is voluntary. In addition, the information you provide will be treated in the strictest confidence; no data will be associated with the name of an individual or institution in any project-related reports or other form of information dissemination. All data will be aggregated across individuals and institutions and described only at the national level.

Thank you for your time and patience. In the supplement attached, we have asked for some general statistics about your institution that can probably be answered most easily by your institutional research office. We would appreciate it if you could make sure those questions get answered and the supplement is returned to your liaison. Below we have provided you with an opportunity to provide general comments. We would like to receive any comments, but we would particularly like to know about innovative administrative policies or practices, your opinions about the key problems facing postsecondary occupational education, and your ideas about solutions to those key problems.

ADMINISTRATIVE OFFICIAL SURVEY SUPPLEMENT

Postsecondary Occupational Education Delivery:
An Examination

Conducted by:

Sponsored by:

Office of Vocational and
Adult Education
U.S. Department of Education

Why we need your help....

Your institution has been selected in a national study of postsecondary occupational education. You have been selected as a representative of your institution to help with that study. Your answers to the questions that follow are very important. They will help provide a basis for describing accurately occupational education as it is offered in postsecondary institutions in this country and should also provide support for future program improvements.

How you can help....

On the pages that follow you will find a number of questions that relate specifically to your community and institution, the kinds of students that attend your institution, and internal and external influences on curriculum and instruction. These questions can be answered quickly by placing an "X" or a check mark "✓" in the "[]" next to your answer or by filling in the blank spaces provided. (See the examples shown in the box below.) Please answer all the questions as accurately as possible. Please use a pen to mark your responses.

EXAMPLE 1:

- o Nationally, about what percentage of high school students drop out each year?

- [1] Between 4% and 8%
[2] Slightly less than 15%
 [3] About 28%
[4] Over 50%

EXAMPLE 2:

- o About what percentage of the students in your institution are:

- | | | |
|--------------|-----------|---|
| (a) Females? | <u>53</u> | % |
| (b) Males? | <u>47</u> | % |

When you have completed your questionnaire, (a) fold it in half, (b) staple or tape it together, and (c) return it to the institutional liaison whose name is listed below. Your participation in this study is voluntary. In addition, the information you provide will be treated in the strictest confidence; no data will be associated with the name of an individual or institution in any project-related reports or other form of information dissemination. All data will be aggregated across individuals and institutions and described only at the national levels.

Why we need your help....

Your institution has been selected for a national study of postsecondary occupational education. You have been selected as a representative of your institution to help with that study. Your answers to the questions that follow are very important. They will help provide a basis for describing accurately occupational education as it is offered in postsecondary institutions and should also provide support for future program improvements.

How you can help....

On the pages that follow you will find a number of questions that relate specifically to your department or program, the kinds of students that attend your institution, and characteristics about you and your job. These questions can be answered quickly by placing an "X" or a check mark "✓" in the "[3]" next to your answer or by filling in the blank spaces provided. (See the examples shown in the box below.) Please answer all the questions as accurately as possible. Please use a pen to mark your responses.

EXAMPLE 1:

o Nationally, about what percentage of high school students dropout each year?

- [1] Between 4% and 8%
- [2] Slightly less than 15%
- [3] About 28%
- [4] Over 50%

EXAMPLE 2:

o About what percentage of the students in your institution are:

(a) Females?	53	%
(b) Males?	47	%

When you have completed your questionnaire, (a) fold it in half, (b) staple or tape it together, and (c) return it to the institutional liaison whose name is listed below. Your participation in this study is voluntary. In addition, the information you provide will be treated in the strictest confidence; no data will be associated with the name of an individual or institution in any project-related reports or other form of information dissemination. All data will be aggregated across individuals and, institutions and described only at the national level.

FACULTY

Postsecondary Occupational Education Delivery:
An Examination

Conducted by:

The National Center for Research
in Vocational Education
The Ohio State University

Sponsored by:

Office of Vocational and Adult
Education
U.S. Department of Education

Why we need your help....

Your institution has been selected for a national study of postsecondary occupational education. You have been selected as a representative of your institution to help with that study. Your answers to the questions that follow are very important. They will help provide a basis for describing accurately the occupational education offered in postsecondary institutions and should also provide support for future program improvements.

How you can help....

On the pages that follow you will find a number of questions that relate specifically to the courses you teach, the kinds of students that attend your institution, and characteristics about you and your job. These questions can be answered quickly by placing an "X" or a check mark "✓" in the "[3]" next to your answer or by filling in the blank spaces provided. (See the examples shown in the box below.) Please answer all the questions as accurately as possible. Please use a pen to mark your responses.

EXAMPLE 1:

o Nationally, about what percentage of high school students drop out each year?

- [1] Between 4% and 8%
[2] Slightly less than 15%
 [3] About 28%
[4] Over 50%

EXAMPLE 2:

o About what percentage of the students in your institution are:

- | | | |
|--------------|-----------|---|
| (a) Females? | <u>53</u> | % |
| (b) Males? | <u>47</u> | % |

When you have completed your questionnaire, (a) fold it in half, (b) staple or tape it together, and (c) return it to the institutional liaison whose name is listed below. Your participation in this study is voluntary. In addition, the information you provide will be created in the strictest confidence; no data will be associated with the name of an individual or institution in any project-related reports or other form of information dissemination. All data will be aggregated across individuals and institutions and described only at the national level.

WOULD YOU LIKE A SUMMARY REPORT OF OUR STUDY?

[] YES [] NO

INSTITUTIONAL LIAISON:

Postsecondary Occupational Education Delivery: An Examination

Conducted by:

The National Center for Research
in Vocational Education
The Ohio State University

Sponsored by:

Office of Vocational
and Adult Education
U.S. Department of
Education

Why we need your help...

Your institution is helping in a national study of postsecondary occupational education. You have been selected as a representative student at your institution to help with that study. Your answers to the questions that follow are very important. They will help provide a basis for describing accurately the occupational education offered in postsecondary institutions and should also provide support for future program improvements.

How you can help...

On the pages that follow you will find a number of questions that relate specifically to yourself and your family, your work experience, and your educational goals and background. These questions can be answered quickly by placing an "X" or a check mark "✓" in the "[3]" next to your answer or by filling in the blank spaces provided. (See the examples shown in the box below.) Please answer all the questions as accurately as possible. Please use a pen to mark your responses.

EXAMPLE 1:

- o Nationally, about what percentage of high school students dropout out each year?

- [1] Between 4% and 8%
[2] Slightly less than 15%
 [3] About 28%
[4] Over 50%

EXAMPLE 2:

- o About what percentage of the students in your institution are:

- | | | |
|--------------|-----------|---|
| (a) Females? | <u>53</u> | % |
| (b) Males? | <u>47</u> | % |

When you have completed your questionnaire, (a) fold it in half, (b) staple or tape it together, and (c) return it to the institutional liaison whose name is listed below. Again, we want to note that your participation in this study is voluntary. In addition, the information you provide will be treated in the strictest confidence; no data will be associated with the name of an individual or institution in any project-related reports or other form of information dissemination. All data will be aggregated across individuals and institutions and described only at the national level.
