ABSTRACT

The School-Community Guidance Center (SCGC) program was established in November 1984 to serve high-risk Austin (Texas) Independent School District students removed from their home campuses for school disciplinary reasons, or by juvenile justice authorities for purposes of probation or judicial detention. Two project specialists are assigned to the alternative education program at Rice secondary school and one project specialist works at the Travis County Gardner House juvenile detention center. In school year 1988-89, total project enrollment was 1,027 students from grades 6 through 12. Project specialists assisted students to improve school attendance, improve academic performance, decrease disruptive behavior, decrease contact with the juvenile justice system, obtain vocational information, and develop good citizenship skills. An evaluation of the SCGC followed a holistic-inductive paradigm, based on naturalistic inquiry. Data gleaned from classroom observations, staff interviews, staff/student surveys, test results, and follow-up analyses were combined and sorted in order to describe and analyze various patterns. Twelve appendices making up the bulk of the document include: a program description; enrollment data; student characteristics; recidivism rate data; skills assessment results; descriptive information on Gardner House; annual project report to the Texas Education Agency; interview questions for project specialists; results of student and employee surveys; summer school information; and follow-up data on SCGC participants. SCHOOL-COMMUNITY GUIDANCE CENTER: AN ALTERNATIVE EDUCATION PROGRAM FOR HIGH-RISK STUDENTS EXECUTIVE SUMMARY

AUTHORS: Lesley Anne Swanson, Nancy R. Baenen

Program Description

Funded by a \$100,000 grant from the Texas Education Agency, the School-Community Guidance Center (SCGC) employed three Project Specialists to work with high-risk and delinquent students at two locations: AISD's F.R. Rice Secondary School and Travis County's Gardner House, the Juvenile Detention Center. SCGC was designed to help these high-risk students improve in the areas of school attendance, academic achievement, disruptive behavior, and contacts with the court system.

Major Findings

1. Three fourths of Rice students surveyed are more confident about staying in school through graduation now that they have been at Rice. (Page 18)
2. A follow-up study of 1,284 Rice students one year after exit showed the same percentage of students had dropped out (507, 40%) as were attending their home school (508, 40%). Recidivists accounted for 12%, and transfers 8%. (Page 26)
3. About 7 out of 10 Rice students are from low income families, compared with a District average of 3 out of 10. The higher referral rates for minorities seem related to their greater likelihood of low-income status. (Page 4)
4. Faculty turnover is high (47%) at Rice. This may be related to the fact that faculty assigned to Rice receive neither salary incentives nor special training on how to: 1) deal effectively with the disruptive, high-risk students assigned to their classes, or 2) cope with the high-stress environment. (Page 11)
5. Project Specialists report that gang membership has emerged this year as a problem to be reckoned with both at Gardner House and at Rice. Increases were observed in the percentage of students referred for weapons offenses and vandalism. Discipline referrals for insubordination also rose; 42% of Rice students were referred for this reason. (Pages 8 and 12)

OPEN LETTER TO AISD

SCGC deals with troubled youth. AISD is attempting to meet their needs at Rice and Gardner House with AISD- and SCGC-funded staff. A year of working with SCGC statistics and visiting staff and classes on campus leads to the following conclusions and suggestions for readers' consideration.

Teaching and counseling students deemed delinquent and high-risk are exceptionally stressful. At Rice, faculty turnover (47%) and burnout are pressing issues that need to be addressed, yet neither salary nor career incentives are offered to faculty there. At Gardner House, where enrollment fluctuates on a daily basis, the Project Specialist faces a new class virtually every day. The environment is much like that of a one-room schoolhouse, with students ages 10-17 enrolled in grades 4-12. Needs and abilities of these students vary enormously, making lesson planning difficult.

In addition to problems associated with the sheer diversity of the population served, the average daily student-teacher ratio at Gardner House (17:1) exceeded the state-recommended limits (10:1) for juvenile detention centers. Next year, enrollment will likely jump sharply as high-risk offenders who were sent elsewhere during 1988-89 (for security reasons) return to the program when the new detention center opens this summer. Assignment of a second teacher to Gardner House would enhance both lesson planning and supervision.

Students served by SCGC are a population at high risk of dropping out. A one-year follow-up study of 1,284 Rice students showed that the dropout rate at Rice is 4%, and a year later this figure has escalated to 40%. Results of the 1988-89 student survey indicate that 75% of the students surveyed are more inclined to remain in school and graduate now that they have been at Rice, but the follow-up statistics do not reflect a subsequent change in their behavior to match this attitude.

Returning to their home schools likely weakens the students' determination reflected in this survey response. Although 71% reported they did not want to remain at Rice, the supports available to them at Rice -- frequent, daily contact with counselors; a low student-teacher ratio; a small student body; an unrelenting focus on academics and behavior -- are less available elsewhere. Recidivism over a one-year period averages 12%. Together, recidivists and dropouts account for one in two (52%) of the students a year

later. TEAMS skills of these students are poor; 45% of Rice seventh and ninth graders taking TEAMS this year failed all three subtests. Ways of addressing these issues might include:

- Strengthening home-school supports for these returning students, utilizing either Rice or home-school counselors.
- Providing a continuing alternative educational environment beyond a one-semester assignment to Rice.
- Stronger focus on skills tested on Exit-level TEAMS (which must be passed to graduate).

For the 1989-90 school year, it had been proposed that the alternative school program now at Rice be moved back to the Read campus, which housed the alternative middle school in 1987-88. While the decision was not to use Read, several problems encountered at Read last year are worth consideration in selecting a new site.

Numerous student management problems arose that year because of the nature and location of the campus. Designed as an elementary school, Read has an unusual design. Instead of an interior hallway between classrooms, Read has interconnecting classrooms that each open to the outside. In many rooms, moveable accordion-style partitions--between classrooms--serve as classroom walls. Often, doors have no locks. Because many of the interior walls and doors are folding partitions, noise is always a concern. In order to change classes, students exit to the outside, where jutting walls provide many places to hide. In addition, many students found its location--near a large shopping mall--a temptation, so truancy was a constant concern (Frazer, 1988). Monitoring and managing student behavior under these circumstances proved extremely difficult a year ago, and could be even more so with a larger number of students from both the middle and high school levels. Last year, it proved necessary to hire a hall monitor to patrol the building. If a similar site were selected, two monitors might be desirable.

Another alternative worth consideration is to have a small alternative center at each secondary school or to find cluster schools which could take students from a wider area. This could decrease problems of gangs and lessen adjustment problems caused by changing schools (perhaps reducing the dropout rate).

AISD's alternative school needs a permanent name. In the past, it has assumed the name of the campus where it was based, but this location has changed from year to year. Project Intercept (an alternative program in New York) is one name worth considering.

**SCHOOL-COMMUNITY GUIDANCE CENTER:
AN ALTERNATIVE EDUCATION PROGRAM FOR HIGH-RISK STUDENTS**

The School-Community Guidance Center (SCGC) program was established in November, 1984, to serve high-risk AISD students removed from their home campuses:

- By the District subsequent to disciplinary action,
- By juvenile justice authorities as a condition of probation,
- By juvenile justice authorities for purposes of judicial detention.

The SCGC program funds three Project Specialists to work with students during the regular school year. Two of them are assigned to the alternative education program at Rice secondary school, and the third works on site at Gardner House, the Travis County juvenile detention center. Part-time Project Specialists are employed during the summer session. This report will focus on four aspects of the program: 1) Rice and Gardner House, 2) Project Specialists, 3) participants, and 4) program follow-up.

SCGC ENROLLMENT

Figures 1, 2, and 3 show total program enrollment (N=1,027) by location, grade, and gender.

**FIGURE 1
SCGC Enrollment by Location, 1988-89**

Students in grades 6-12 may be assigned to Rice at any time during the semester. Assignment is typically for the duration of the semester of referral. Students who enroll during the last six weeks of a semester, however, usually stay for the entire following semester. Gardner House enrolls juveniles regardless of grade level or district.

FIGURE 2
SCGC Enrollment by Grade (AISD only), 1988-89

NUMBER OF STUDENTS

FIGURE 3
SCGC Enrollment by Gender

NUMBER OF STUDENTS

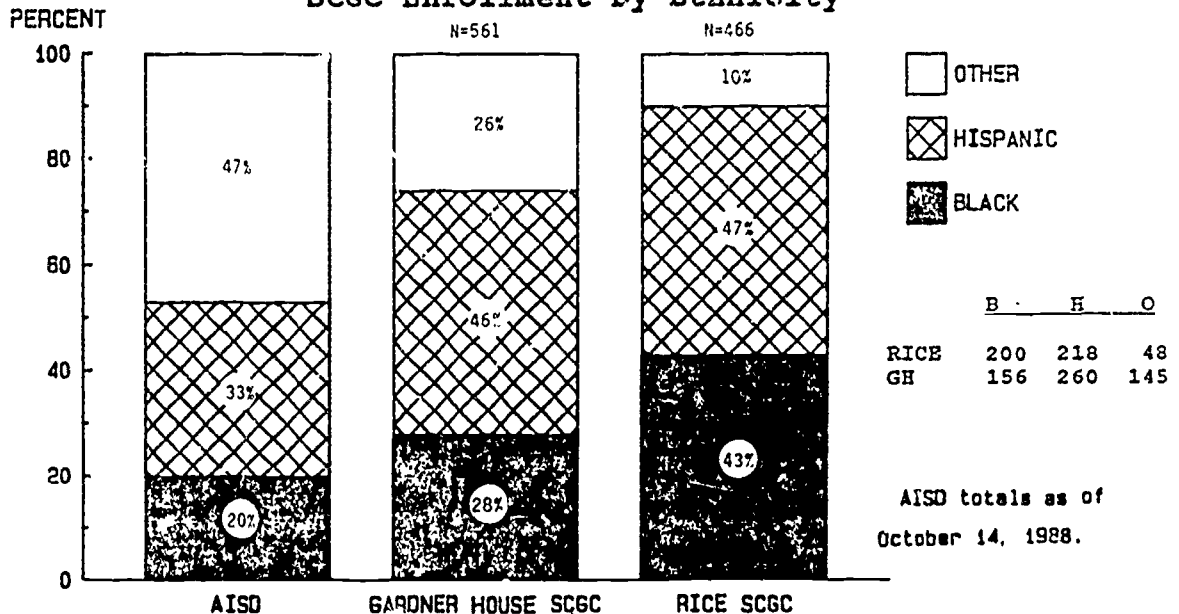

Figure 4 shows SCGC enrollment by age; clearly, students 14-16 years of age are most likely to be referred. After age 16, many high-risk students drop out. This trend is reflected in the low referral rates for older students.

FIGURE 4
SCGC Enrollment by Age

SCGC enrolls a disproportionate number of minority students compared with the District as a whole (see Figure 5). The percentage of Hispanic students is about the same at both Rice and Gardner House, but the percentage of Blacks is greater at Rice than at Gardner House. The percentage of Blacks referred to Rice is more than twice the percentage of Blacks districtwide.

FIGURE 5
SCGC Enrollment by Ethnicity

About 7 out of 10 SCGC students at Rice are low income, compared to about 3 out of 10 districtwide in the same grades. Students are considered low income if they or their siblings qualify for free or reduced-price lunches.

	AISD Low Income		SCGC (Rice) Low Income	
	Yes	No	Yes	No
Black	3,184	3,308	141	57
Hispanic	4,674	5,108	154	52
Other	1,782	14,168	25	34
TOTAL	9,640	22,584	*320	143
	30%	70%	69%	31%

* N=3 unknown

Within all ethnic groups, low-income students are more likely to be referred to SCGC at Rice than students who are not low income. Referral rates as a percentage of low income AISD students within each ethnicity ranged from 1% to 4%. Being from a low-income family has a disproportionately high correlation with referral to Rice. In other words, 3% of all AISD low-income students are referred to Rice, compared to 0.06% of all who are not low income (see Figure 6).

FIGURE 6
AISD vs. SCGC (Rice) Low-Income Students
By Ethnicity, Grades 6-12

PROJECT SPECIALISTS

JOB DESCRIPTION

Project Specialists are the heart of the SCGC program. They assist students to:

- Improve school attendance,
- Improve academic performance,
- Decrease disruptive behavior,
- Decrease contact with the juvenile justice system,
- Obtain vocational information,
- Develop good citizenship skills.

New Student Orientation. Parental approval of the referral is prerequisite to enrollment, and every effort is made to enlist parents' continuing support for the program. Two days each week are set aside for new student enrollment; parents must appear with their children at that time to learn about the school's procedures and philosophy. Project Specialists then meet with new students in orientation sessions to review the F.R. Rice Student Handbook in detail; students must both understand and agree to abide by the rules. Information from various questionnaires assists the Project Specialists in establishing individual behavior management plans and academic goals for each student's stay at Rice. The Project Specialists then work with classroom teachers to implement these plans and goals. Achievement tests are also administered at this time as needed for placement purposes. Project Specialists create class schedules for each of their assigned students.

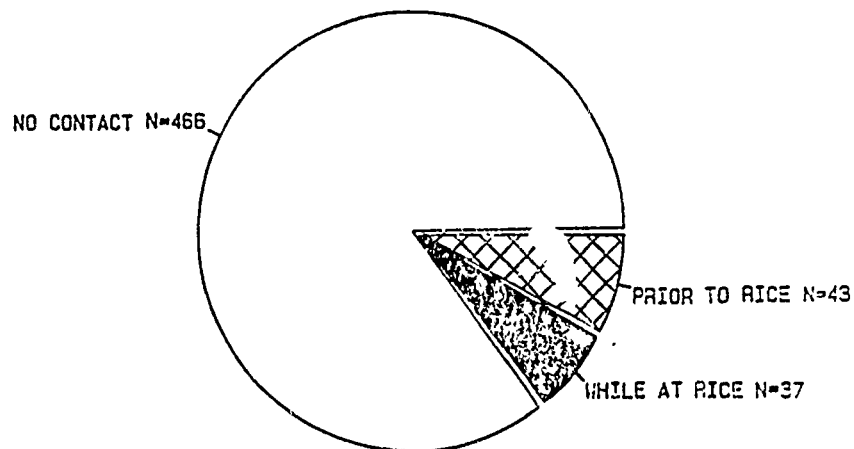

Attendance. Monitoring student attendance is a time-consuming but vital part of the SCGC program. Project Specialists are responsible for making daily telephone calls to the parents of students who are absent. Through regular checks with classroom teachers, the Project Specialists work to improve attendance, and they provide assistance to students and parents as appropriate. Coordinating re-entry into the home schools and making follow-up checks on student status 12 weeks after exiting Rice are also part of their duties.

Counseling. Project Specialists meet with students frequently on a one-to-one basis. Counselor call slips are available in each classroom. At the beginning of class, students who want to meet with their counselor fill out a call slip and give it to the teacher, who turns it in to the office along with attendance at the beginning of the period.

Counselors can then call students out of class that same period, schedules permitting. Students can also sign up any time on the appointment sheets taped to their Project Specialist's door. Home visits are made as needed. Discipline referrals are monitored on an on-going basis in an effort to improve student behavior. This year, selected students met occasionally in small-group counseling sessions to discuss problems and explore alternative, more effective, modes of communication with their peers and with teachers. Teaching new sets of coping skills is also stressed.

Contacts with the Juvenile Justice System. Project Specialists work with their students' parole officers and social workers as needed to reduce disruptive and criminal behavior. Breaking the cycle of recidivism is a central concern here. This year, 37 Rice students entered Gardner House during their semester at Rice, and another 43 reported contact with the juvenile justice system prior to their assignment to Rice (see Figures 7 and 19). (These self-reported numbers are likely underestimates.)

FIGURE 7
Contact With Juvenile Justice System

Inservice Training. For the second year in a row, the Project Specialists received no inservice training at the beginning of the school year because of late funding of the TEA grant. The inservice training they received during the year consisted of training available to all District counselors; it was not geared specifically to their work with high-risk students. Project Specialists would like to receive inservice training on the following topics:

- Conflict resolution,
- Addictive disorders,
- Conduct disorder,
- Emotional disturbance,
- Stress reduction,
- Awareness of cultural differences.

REFERRALS TO COMMUNITY AGENCIES

Project Specialists referred 349 students and their families to other community agencies for assistance. This year, they referred to 33 agencies, 2 more than last year. The agencies are listed in Figure 8.

PROBLEMS/SUGGESTIONS

The following information is based on interviews with Project Specialists and the School Psychologist at Rice.

Gangs. An increase in referrals for gang-related activities was noted. Referrals for vandalism and weapons accounted for a larger percentage of offenses this year than last. Although these same students may well have been referred to Rice for behavior problems in the absence of gangs, this emerging problem has impacted school climate in subtle as well as overt ways. Marking of property in gang styles, called "tagging," is a constant problem. Staff also notes an increase in low-level disruptive behavior, as gang members from neighborhoods all around the city are concentrated at Rice. The increased time spent on counseling and disciplining students about gang-related activities this year dilutes the amount of time spent educating them. Recommendations for dealing with this problem begin by emphasizing that the District must first recognize the problem; this is the first step toward informed discussion of possible solutions. Second, because gangs are a community problem, schools cannot solve the problem alone. Rice stresses an accountability model with students, and the staff recommends that the community do so with parents.

Orientation. New-student orientation, which usually takes place five mornings each week, consumes a substantial amount of time. Orientation was added to their duties this year. They suggest this duty could instead be filled by adding an AISD clerk position, freeing this time for individual counseling sessions.

Families. Project Specialists report they have observed enrollment patterns that tend to encompass members of nuclear and extended families. They report counseling sets of brothers, sisters, cousins, and half-siblings. Some of these students may be enrolled concurrently, while others may enroll a year or two later. In their view, this trend points to dysfunctional family patterns in the community.

Grant Funding. Staff would like to see the program funded as a multi-year grant rather than year-to-year. This would allow program and personnel planning on a longer term basis. In addition, Project Specialists would like to see their salaries increased to a level commensurate with that of AISD counselors because they believe their duties are similar. Finally, staff would encourage the District to do whatever possible to fund SCGC Project Specialists to attend August faculty training workshops.

 RICE SECONDARY SCHOOL

Most, but not all, students attending Rice are part of the SCGC program. Students in the Transitional Academic Program (TAP), for example, are behind academically and are referred to Rice to concentrate on academic work, whereas SCGC students--the majority of enrollees--are referred for disciplinary reasons. This year, 546 students attended Rice and 466 of them were SCGC participants (see Figure 9).

FIGURE 9
Rice Referral Reasons

* Special Assignment: school or parent request

According to TEA criteria, 68% (N=369) of Rice students are considered at risk of dropping out (Frazer, 1989). The most common sets of characteristics which put these students at risk are:

1. Two or more years below grade level on mathematics or reading achievement tests,
2. Age (two or more years older than expected for grade) and TEAMS scores,
3. Failing any two TEAMS tests, and
4. Age; low mathematics or reading achievement; and failing any TEAMS subtest.

This contrasts sharply with the 46% considered at risk in these grades districtwide. Project Specialists report that Rice students bring with them a variety of risk factors -- low income, lack of motivation, family problems, behavior problems, delinquency, low self-esteem, chronic truancy, low achievement, lack of coping skills -- that interfere with their participation in the regular school environment. The alternative education program at Rice provides one means of addressing the needs of these students through the schools. It does so on two levels: 1) academic, and 2) behavior.

ACADEMIC PROGRAM

The faculty at Rice provide "no-frills" instruction in core academic subjects. A lack of academic progress characterizes many of these students: many are overage for their grade and have a history of retention. There are no sports teams, no music programs, no extracurricular activities at Rice. Enrollment in a study skills class is required for students at low reading levels. A business course is the only elective available. TEAMS tests are administered according to the regular District schedule. Special education classes are provided for those with Individual Education Plans (IEP), but there are no formal classes for students with limited English proficiency. The school day at Rice begins at 10:20 and ends at 4:15. Most students enroll in six classes. Because they serve a select population, classes here are small; some may have had as few as three or four students at the beginning of a semester, but the average class size increased to 20 as more students were referred. Figure 10 presents Rice enrollment by grade. About three out of ten (N=161) Rice students were eighth graders.

FIGURE 10
Rice Enrollment by Grade

Assignments are often individualized; students work on materials from their own packets, kept in the classroom. Textbooks are handed out at the beginning of class and collected at the end. The intent is to teach courses matched in both content and pace to those at the students' home schools. This presents challenges to the teaching staff.

TEAMS Results. At both the seventh and ninth grade levels, the fewest Rice students mastered writing and the largest number mastered reading. Mastery in both areas was much lower than that for AISD overall. Almost half (45%) of the students failed all three tests (see Figure 11). A stronger TEAMS emphasis might help students' graduation prospects.

FIGURE 11
TEAMS Mastery

	Percentage Mastering Subtest		Percentage Mastering Subtest	
	Grade 7		Grade 9	
	Rice	District	Rice	District
Mathematics	33%	85%	23%	79%
Reading	38%	83%	50%	83%
Writing	19%	75%	17%	64%
Passed All	14%	67%	8%	56%

Rice 7th Grade: 22 students

- o 3 students (14%) passed all tests taken,
- o 3 students (14%) failed one test only,
- o 6 students (27%) failed two tests, and
- o 10 students (45%) failed all three tests.

Rice 9th Grade: 13 students

- o 1 student (8%) passed all tests taken,
- o 4 students (31%) failed one test only,
- o 2 students (15%) failed two tests, and
- o 6 students (46%) failed all three tests.

Faculty. Faculty are assigned to Rice in accordance with regular District procedures. The Office of Staff Personnel reports that few teachers request assignment to Rice; in May, there were two such requests on file. Campus teacher turnover is high. For example, 7 of the 15 faculty (47%) on the staff the first day of school this year were new to Rice, compared to a District median of 11.5% for other high schools. New teachers receive no special training to prepare them for working with the behavior problem population that predominates at Rice, nor do they receive a salary bonus. Research on teacher burnout (Dworkin, 1985) finds that schools reporting high teacher turnover rates produced lower levels of achievement than schools with low turnover.

BEHAVIOR

Because the predominant reason for assignment to Rice is behavior problems, both faculty and staff devote considerable attention to fostering school-appropriate behaviors both in and out of the classroom. A copy of the school's Code of Conduct, for example, is posted in each room. Program Specialists work with students on a one-to-one and small group basis, addressing personal, academic, and vocational concerns. Both in the classroom, as well as at lunch and before and after school, the staff emphasize student awareness of responsibility, citizenship, decision-making, communication, and coping skills to encourage appropriate behavior. In most classrooms, there is a chair at the side of the room where students can go voluntarily, or be directed, to "cool down" or refocus their attention when they find it difficult to stay on task. When the bell rings at the start of class, teachers lock their classroom doors; tardy students must knock to be admitted.

Referral Reasons. Students are referred to Rice for a wide variety of behavior problems, ranging from truancy to carrying a weapon to sexual acting out (see Figure 12). Most students are referred for more than one reason. Rates of referral in several behavior categories increased compared to last year; those showing the largest increases include possession of weapons, insubordination, vandalism, and truancy. These increases coincide with the rise of gangs noted by staff this year (see page 8). There were fewer referrals for tardiness and detention violations this year, in keeping with policy that schools should try to handle these more routine problems themselves.

FIGURE 12
Discipline Referral Reasons

REFERRAL REASON	FREQUENCY				CHANGE
	1987-8		1988-9		
Insubordination	216	32%	229	42%	+
Fighting	191	28%	136	25%	-
Truancy	120	18%	129	24%	+
Obscene language	103	15%	80	15%	0
Assault	74	11%	42	8%	-
Detention (missed/excessive)	93	14%	44	8%	-
Theft	39	6%	38	7%	+
Drugs/alcohol offenses	50	7%	36	7%	0
Possession/use of weapons	25	4%	34	6%	+
Vandalism	18	3%	28	5%	+
Excessive tardiness	101	15%	33	6%	-
Sexual misconduct	3	.4%	15	3%	+
Arson	7	1%	2	.4%	-
	(N=685)		(N=546)		

Note: Individual students may be counted more than once.

INNOVATIONS

Facility. Last year, students in the Middle School (grades 6-8) and High School (grades 9-12) were housed at separate facilities several miles apart. That situation impeded coordination and communication among staff members and forced allocation of scarce resources that could otherwise have been shared. In order to ameliorate the situation, the two schools were combined this year on one campus.

Assemblies. An awards assembly was held at the end of each six-week grading period to recognize students with perfect attendance and honor roll grades. A member of the AISD School Board handed out certificates in October to the first group of winners.

Adopt-A-Kid. Project Specialists encouraged faculty and staff informally to "adopt" several students each and get to know them on a more personal level. The focus of this particular innovation is to provide a hefty dose of positive student-teacher interactions outside the classroom for students who have, by and large, found such interactions to be negative in the past.

Code of Conduct. This year, the faculty adopted a school-wide Code of Conduct for all students. A copy was posted in each classroom.

Homework. This year, students in most classes were assigned homework three times a week. Last year, no homework was assigned; instead, work was completed during a study period in each class.

All Stars Game. At the end of the fall semester, boys from the high school athletics class formed a basketball team, the Rice All Stars, and challenged the Austin Police Department All Stars to a game. The student body and faculty turned out to cheer.

Art Program. Through the counseling program this year, a group of students was able to work with an Austin artist who volunteered his time to instruct them. The point of this program was to channel students' creativity along constructive paths. Instead of adding to the graffiti on neighborhood walls and walks, this group of students, many of them gang members, met on weekends to whitewash walls and paint murals. They also painted panels of school mascots for their home campuses.

ENROLLMENT TRENDS

Figure 13 shows Rice enrollment by semester from 1985-86 through 1988-89. Most students attend Rice only during the fall or spring. Students who enroll the last six weeks of a semester and stay on the following semester or who are referred again to Rice after returning to their home school are counted both semesters (because they are served both semesters). In 1988-89, for example, 476 individual students were enrolled in Rice--70 were enrolled during parts of both semesters.

FIGURE 13
Rice Enrollment Trends
1985-86 through 1988-89

The following enrollment trends are evident:

- o Enrollment at Rice increased each of the first three years of operation and declined somewhat this year (during both the fall and spring semesters). Enrollment increases may be attributable to greater AISD staff awareness over time of the alternative program. This year's decline may be because schools were encouraged by the administration to handle routine disciplinary actions themselves this year, rather than quickly referring students to Rice.
- o Spring enrollment is regularly higher than fall enrollment. This trend may be because: 1) students have accumulated enough disciplinary referrals by spring to qualify them for Rice, or 2) disruptive behavior generally tends to increase in the spring.

Figure 14 illustrates the number of times those served in 1988-89 at Rice had been referred.

About one in five students (19%) at Rice in 1988-89 had been there before--either in previous years or in fall and spring of 1988-89 (see Figure 14).

FIGURE 14
Repeat Referrals to Rice, 1988-89

Minority student populations show distinctive patterns of enrollment. Hispanic referrals are highest in grade 8, while Black enrollment peaks in grade 9 (see Figure 15).

FIGURE 15
Rice Enrollment by Grade and Ethnicity, 1988-89

HOME SCHOOLS

Students came to Rice from all of the District's 11 high schools and 13 junior high and middle schools. Figure 16 lists their home schools in order by number of referrals. Porter and Pearce, both middle schools, top the list this year; they were also the top two last year. As shown, the percentage of those enrolled who are referred also varies by school, with Pearce (5%) and O'Henry (4.1%) referring the highest percentage of their own enrollment and Bowie (0.3%) and Dobie (0.5%) the lowest percentage.

FIGURE 16
Home Schools of Rice Students, 1988-89

School (membership)	# to Rice	% of School	% of Rice
Pearce (876)	44	5.0%	8.0%
Porter (1,089)	41	3.8%	7.5%
Murchison (1,032)	40	3.9%	7.3%
LBJ (1,345)	35	2.6%	6.4%
Mendez (1,063)	33	3.0%	6.0%
Johnston (1,558)	33	2.1%	6.0%
Lanier (1,453)	31	2.0%	5.7%
O'Henry (755)	31	4.1%	5.7%
Martin (689)	24	3.5%	4.4%
McCallum (1,371)	24	1.8%	4.4%
Lamar (827)	22	2.7%	4.0%
Crockett (1,800)	22	1.2%	4.0%
Burnet (942)	21	2.2%	3.8%
Bedichek (1,030)	20	1.9%	3.7%
Reagan (1,435)	19	1.3%	3.5%
Austin (1,831)	19	1.0%	3.5%
Fulmore (859)	13	1.5%	2.4%
Travis (1,354)	13	1.0%	2.4%
Covington (1,242)	10	0.8%	1.8%
Anderson (1,416)	9	0.6%	1.6%
Robbins (215)	8	3.7%	1.5%
Kealing (698)	8	1.1%	1.5%
Bowie (1,867)	5	0.3%	0.9%
Dobie (850)	4	0.5%	0.7%

Based on TEA fall, 1988, membership count.

Continuing TAP students and those from TYC are not included on this list.

RICE STUDENT CHARACTERISTICS

As noted earlier, SCGC includes most (N=466), but not all, of the 546 Rice students. A brief profile of all Rice students reveals the following points:

- **Age.** The most common age of Rice students was 16, though the range extended from 11 to 20 years of age. See Figure 17.

FIGURE 17
Rice Enrollment by Age

- **Gender.** Males accounted for 79% (N=434) of Rice enrollment; only 21% (N=112) were female.
- **Ethnicity.** Ninety percent (N=493) of Rice students were minority, either Black or Hispanic. The percentage breakdown was as follows: Hispanic 50% (N=273); Black 40% (N=220); Other 10% (N=53).
- **Special Education Status.** Districtwide, 8.5% of AISD secondary students were enrolled in Special Education classes this year. At Rice, the percentage was 14.7% (N=80).
- **Previous Assignments.** This year, 74% (N=405) of the students were assigned to Rice for the first time, while 26% (N=141) were repeaters.
- **Low Income Status.** Over two thirds (71%, N=387) of Rice students are low income (either they or their siblings qualify for free or reduced-price lunches).

STUDENT OPINIONS ABOUT RICE

A random sample of Rice High School students (N=21) (about one third of the enrollment at that time) was surveyed in fall, 1988, as part of the districtwide student survey. Students were asked to what extent they agreed with these statements:

"I want to stay another semester at Rice."

Results: Most (71%) of the students disagreed with this statement. More than half (57%) disagreed strongly. Only 10% agreed.

"My behavior is better than last year now that I am at Rice."

Results: Over half (62%) of the students agreed that their behavior has improved at Rice, with 29% neutral and 10% disagreeing.

"I feel more confident about staying in school through graduation now that I am at Rice."

Results: Three fourths (75%) of the respondents agreed with the statement; only one student (5%) disagreed.

"Compared to my home school, counselors at Rice pay more attention to me as a person."

Results: Responses to this statement were more evenly divided than responses to other questions. An equal number of students (14%) agreed strongly and disagreed strongly. Overall, however, 43% agreed and 29% disagreed with the statement, with 29% neutral.

"Teachers at Rice have helped me to improve my grades."

Results: Three in four (76%) of the students agreed with the statement, while only 10% disagreed.

Results of the high school student survey indicate that, in general, the SCGC Program is having a beneficial impact on these high-risk students' attitudes. By a large margin, they report that both their behavior and their grades improved during their reassignment to Rice. Over half the respondents reported that they liked the personal attention of the SCGC Project Specialists. Overall, students prefer to return to their home schools rather than remain another semester at Rice, despite statistical trends showing that their grades tend to drop, and they tend to drop out in greater numbers, at their home schools compared to Rice. Assignment to Rice may well be "strong medicine" for these

students; they may also wish to avoid the stigma attached to enrollment there.

The most hopeful finding, perhaps, is that 75% of the students report that assignment to Rice has made them more confident about staying in school, a tribute to the dropout prevention efforts of the Rice Project Specialists and faculty.

STAFF OPINIONS ABOUT RICE

A random sample of District employees (secondary teachers, campus professionals and campus administrators) was surveyed in spring, 1989. Valid return rates varied from 92% to 67%. Recipients were asked to what extent they agreed with these statements about Rice:

"The program at Rice was beneficial in preparing students to return to our campus." N=255

Results: Responses were evenly split, with about one fourth each agreeing and disagreeing, while another fourth was neutral, and the remaining fourth did not know.

"Students who have returned to this campus from Rice are less disruptive now than they were before their reassignment." N=281

Results: Over half (55%) of the respondents were either neutral or did not know. More disagreed (29%) than agreed (16%) with this statement.

"Students who have returned to this campus from Rice have a more positive outlook about self and school now than before they went." N=268

Results: About twice as many respondents disagreed with this statement (31%) as agreed with it (15%). Over half (55%) were either neutral or did not know.

The survey also asked: "What special attention or services are you providing to Rice students entering your campus spring semester?" N of responses = 499

Thirteen percent reported providing students with a special orientation session, while 10% reported extra individual counseling. Seventeen percent reported no Rice students. The remaining 40% of responses were scattered among these options: tour of school, discussion at faculty meeting, lunch with the students, group counseling, unique course assignment, classes with other Rice students, adult mentor, coordinated vocational and academic education, community in schools program, PAL, and WINGS.

GARDNER HOUSE

The Travis County Juvenile Detention Center, Gardner House, was located this year and last in temporary quarters on the Austin State Hospital grounds. Juvenile offenders detained by the courts stay there while awaiting a court hearing. Afterward, depending on the outcome of their case, some may remain for varying lengths of time while others are released usually to the custody of their parents or on parole. During the 1988-89 school year, the shortest stay was 1 day, the longest 90 days, and the average 5.2 days. For security reasons, not all juveniles can be held at this temporary facility, so some are sent elsewhere, thus artificially deflating the number served for 1988-89. The new facility is scheduled to open during the fall of 1989.

ACADEMIC PROGRAM

The SCGC Program at Gardner House provides the opportunity for continuity of school enrollment for delinquent AISD students. See Figure 18 for enrollment by grade and ethnicity. In order to receive credit, District students can accumulate no more than five unexcused absences per semester.

FIGURE 18
AISD Students at Gardner House
Frequency by Grade and Ethnicity

By placing a certified AISD teacher at Gardner House to implement an educational program, SCGC makes it possible for students to receive attendance credit if they participate in the classes. When students are detained for two weeks or more, or if they express an interest in keeping up with assignments from their home schools, the Project Specialist can request a copy of the students' course work. Individual lesson plans are made for advanced students and those far behind the rest of the group. More than half the students (N=317, 57%) this year were enrolled in AISD. Another 106 (19%) of detainees reported enrollment in other school districts, and 138 (25%) were dropouts. This year for the first time, many AISD textbooks are available for use at Gardner House. Overall, however, detention is a stressful time for the students, and many are not capable of completing usual amounts of coursework.

Career Education. Easy-to-read materials are available to students interested in learning about vocational choices. Periodically, a series of guest speakers discuss their occupations and the prerequisite training.

Life Skills. A program of films, discussions, and guest speakers from the community supplement the instructional program. Topics include family and financial planning, mental and physical health, and adolescent growth and development.

Recreation. Recreational activities are organized for the students. Because of facility security restrictions at the temporary site, outdoor activities are limited.

Arts and Crafts. Materials are available for students to express themselves creatively. These times also provide the opportunity for discussion of feelings in a nontreating atmosphere. In December, for example, the students sewed and stuffed teddy bears as their contribution to the Austin Police Department's Blue Santa Program, which donates gifts to disadvantaged children.

PROBLEMS/SUGGESTIONS

Gardner House enrollment this year (N=561) increased 12% over last year (N=501), boosting the student-teacher ratio to 17:1. This ratio would be even higher if all juveniles detained had been held at the temporary facility; many were sent elsewhere for security reasons. According to the Standards for Juvenile Detention Facilities published by the Texas Juvenile Probation Commission, "When education services are provided in the detention facility, it is recommended that teacher student ratios not exceed one to ten...". The hiring of a second teacher to work at Gardner House would lower the ratio and increase the supervision available.

OFFENSES

Students were referred to SCCG at Gardner House for committing one or more of a wide variety of offenses. Some occurred while students were in school; most did not. SCCG is intended to help teenagers avoid contact with the court system, which means the delinquent behaviors leading to detention and prosecution must be addressed.

Rice Students at Gardner House. Some Rice students were referred to Gardner House because of contact with juvenile justice authorities (see Figure 19). During the school year, a total of 37 (8%, unduplicated count) Rice students entered Gardner House during their semester of enrollment at Rice. Most of the Rice students were held for burglary (N=16), violation of a court order or warrant (N=9), drugs (N=7) or assault with injury (N=6). Six students were referred to Rice by the Texas Youth Commission as a condition of probation. In addition to these, 37 Rice students reported contact with Gardner House prior to their semester of enrollment for a total of 80 (15%) of Rice students with a history of contact with the Travis County juvenile justice system. (The numbers of self-reported prior contact are likely underreported.)

FIGURE 19
Rice Students at Gardner House

Recidivism. For all of the 561 offenders held at Gardner House during the 1988-89 school year, the recidivism rate was as follows:

- 399 (71%) entered for the first time
- 119 (21%) entered for the second time
- 43 (8%) entered for the third through seventh time.

Figure 20 shows the frequencies of offenses, by category, for delinquents detained at Gardner House. Burglaries, runaways, and violation of court orders were the most common. Some delinquents were referred for multiple reasons.

FIGURE 20
Gardner House: Offenses by Frequency

OFFENSE	TOTAL FREQUENCY	RICE STUDENTS
Burglary	153	13
Burglary of vehicle	46	3
Robbery	9	4
Aggravated robbery	16	1
Theft	60	4
Unauthorized use of vehicle	59	
Criminal mischief	30	3
Criminal trespass	8	3
Possession of a controlled substance	28	5
Inhalant abuse	3	2
Murder/manslaughter	4	
Assault on school official	13	
Assault with injury	30	6
Aggravated assault	31	1
Sexual assault	4	
Weapons violations	21	5
Terroristic threat	10	
Runaway	73	1
Harboring a runaway	1	1
Escape/evading custody	9	
Parole violation	19	
Violation of a court appearance	79	7
Warrant failure to appear	10	2
Temporary detention/not yet charged	29	2

Note: Individual students may be counted more than once.

 PROGRAM FOLLOW-UP

END-OF-SEMESTER DISPOSITIONS

The status of Rice students at exit has been gathered now for seven semesters. Figure 21 shows the status of all Rice students at the end of their semester of enrollment. It is noteworthy that 75% of them (N=1,364) were exited to their home schools, and equal percentages (6% each) were expelled and dropped out while at Rice. Another 12% stayed at Rice for the following semester.

Looking at 1988-89 data only, the dropout rate at exit was 10% (more than four times higher than last year's 2.2%) and the expulsion rate was 9% (double last year's 4.4% rate).

FIGURE 21
End-of-Semester Dispositions
Rice Students 1984-89

TWELVE-WEEK FOLLOW-UP

For evaluation purposes, TEA requires grant recipients to provide information on student attendance and grades during and after enrollment in SCGC at Rice. Specifically, TEA requests data on students who meet these criteria:

- Attending Rice for the first time.
- Reassigned to their home school at the end of the semester.
- Still in school 12 weeks later.

During the current school year, 119 students from spring semester, 1988, met these criteria, and 74 students from the fall semester, 1988. (Follow-up data on students enrolled in SCGC in spring, 1989, will be available 12 weeks into the fall semester, 1989.) Figure 22 shows 12-week follow-up data. The average attendance rate for each student for the semester of assignment to Rice was computed and compared with the average attendance rate for the 12 weeks following return to the home campus. An improvement of five days or more was considered "better," a decline of more than five days was considered "worse," and changes less than that amount were considered "no change." For grades, the average number of credits earned was contrasted for the semester of assignment and the 12-week follow-up period. An increase in the average number of credits earned was "better," a decline was "worse," and the same number was "no change." Trends are inconclusive. Attendance was up in the spring and down in the fall, while grades showed movement in the opposite direction.

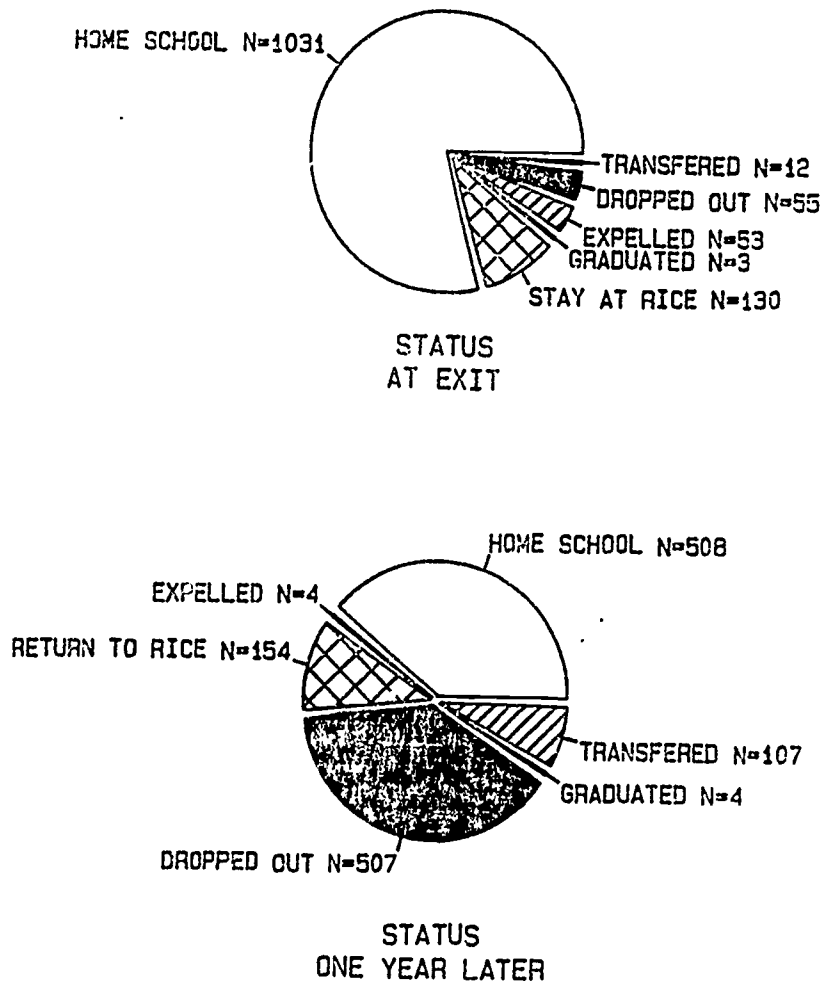

FIGURE 22
TEA 12-Week Follow-Up

ATTENDANCE			
	Spring, 1988 N=119		Fall, 1988 N=74
Better	51		11
No Change	41		13
Worse	26		34
Incomplete Records	1		16
GRADES			
	Spring, 1988 N=119		Fall, 1988 N=74
Better	31		36
No Change	26		14
Worse	60		13
Incomplete Records	2		11

ONE-YEAR FOLLOW-UP

Figure 23 shows both the exit status of 1,284 Rice students enrolled from spring, 1986, through spring, 1988, and the status of these same students one year later. By this point, the percentage of students attending their home schools (40%, N=508) was the same as the percentage that had dropped out (40%, N=507). Recidivists accounted for 12%, and transfers 8%.

FIGURE 23
One-Year Follow-Up
Rice Students Enrolled Spring, 1986 - Spring, 1988

Because there is no control population of students with behavior problems who are allowed to remain at their home schools in lieu of assignment to Rice, no firm conclusions can be drawn regarding whether students fare better in terms of improved behavior and staying in school by being sent to Rice.

COSTS

The School-Community Guidance Center (SCGC) program at Rice and Gardner House was funded by a \$100,000 grant from the Texas Education Agency under the authority of Article III, House Bill 20, Appropriations Bill of the 70th Texas Legislature. The budget for the 1988-89 school year was divided as follows: \$20,688 for Gardner House, \$54,704 for Rice, \$13,269 for evaluation, and \$8,409 for summer school.

Gardner House served a large number of students (561) for a short period of time (average detention of 5.2 days), while Rice's 466 SCGC students generally stayed until the end of the semester of enrollment. The cost per student was \$37 at Gardner House and \$117 at Rice. (The number of students served in summer school is not yet available.)

SCGC
EVALUATION PLAN

EVALUATION PLAN

Program: School-Community Guidance Center

Contact Person: Lesley Swanson

Evaluation/Program Description:

This evaluation will study short-and long-term effects of the program. In addition to looking at the characteristics of the students, the evaluation will examine the attendance rates, school performance, recidivism, further contacts with juvenile authorities, follow-up contacts, and dropout rates. Evaluation resources include one half-time evaluation associate funded by the grant, with supervision provided by the Systemwide Evaluation evaluator.

The School-Community Guidance Center (SCGC) provides support services for students attending F. R. Rice and Gardner House because of delinquent behavior or contact with the juvenile justice system. Three project specialists serve as liaisons between AISD, students, and community agencies. Two provide counseling and tutoring services at Rice; one provides educational services at Gardner House.

Evaluation Outline:

Decision Question D1: Should changes be made in the way students are identified or placed in the School-Community Guidance Center? (Students enrolled 1988-89.)

Date needed: June, 1989

Evaluation Questions

Information Sources

D1-1. How many students were assigned to the SCGC at Rice Secondary School? How many students enrolled at Rice Middle School? High School? How many were served at Gardner House? What are the enrollment procedures? What is the limit on total enrollment?

- Student Referral/ Information Forms
- Gardner House Logs
- Staff Interviews

<u>Evaluation Questions</u>	<u>Information Sources</u>
D1-2. What were the characteristics of SCGC students: -- By grade (age, for dropouts)? -- By ethnicity? -- By sex? -- By offense? -- By grade by ethnicity?	<ul style="list-style-type: none"> ● Student Referral/Information Forms ● Gardner House Logs
D1-3. How many students were returned to Rice or Gardner House? How many times each? How many Rice students had previously been assigned to Rice? How many previous assignments?	<ul style="list-style-type: none"> ● Student Referral/Information Forms ● Gardner House Logs
D1-4. Students were referred to Rice from which schools? How many students were referred from each of these schools?	<ul style="list-style-type: none"> ● Student Referral/Information Forms
D1-5. What offenses were students referred to SCGC for committing? What are the three-year trends?	<ul style="list-style-type: none"> ● Student Referral/Information Forms ● Gardner House Logs
D1-6. How many Rice students were referred, at least in part, because of contact with juvenile justice system authorities?	<ul style="list-style-type: none"> ● Student Referral/Information Forms
D1-7. What was the cost of the program?	<ul style="list-style-type: none"> ● Student Referral/Information Forms ● Gardner House Logs ● Grant Proposal

Decision Question D2: Should AISD's School-Community Guidance Center be continued as is or modified? (Students enrolled 1988-89.)

Date needed: June, 1989

<u>Evaluation Questions</u>	<u>Information Sources</u>
D2-1. What services did the SCGC program staff provide?	<ul style="list-style-type: none"> ● Staff Interviews ● Activity Logs
D2-2. How do classes at Rice differ from those at other schools? What is the average class size? How many classes do students take?	<ul style="list-style-type: none"> ● Classroom Observations ● Staff Interviews

Evaluation QuestionsInformation Sources

How long is each class? Do students request that they be allowed to remain at Rice instead of returning to their home schools?

- | | | |
|--------|--|---|
| D2-3. | What training did the program staff receive? What was the ratio of teachers on contract to permanent substitutes at the beginning of the year? At the end of the year? | <ul style="list-style-type: none"> ● Staff Interviews ● Activity Logs |
| D2-4. | How has the change in housing affected the program? | <ul style="list-style-type: none"> ● Staff Interviews |
| D2-5. | What recommendations did the staff offer for improvement of SCGC? What innovations were implemented? | <ul style="list-style-type: none"> ● Staff Interviews |
| D2-6. | What services were provided for summer school students during the summer of 1989? How many students were served? | <ul style="list-style-type: none"> ● Staff Interviews ● Supplemental Activity Logs |

INTRODUCTION

The SCGC evaluation requires a variety of data analyses. These were largely accomplished through the use of SAS programs and SAS data files created specifically for purposes of this evaluation. File layouts, program notes, and programs are attached.

Because there was no control group population of behavior disordered or delinquent students who were not referred to SCGC, a true randomized experimental design that looks at between-group differences was not part of this evaluation. Instead, the evaluation followed a holistic-inductive paradigm, based on naturalistic inquiry. Both qualitative and quantitative data were collected and analyzed. Data gleaned from classroom observations, staff interviews, staff/student surveys, test results, and follow-up analyses were combined and sorted in order to describe and analyze various patterns.

The role of the evaluation associate during 1988-89 was one of observation as an outsider, rather than that of staff person at the alternative center. The evaluation observations were overt; program staff knew both that observations were being made and who was making them. Multiple observations were made over the course of the school year. The focus was broad, and encompassed a holistic view of the entire program and its components: the physical setting, staff organization, student behaviors, staff-student interactions, and program documents.

SCGC
Appendix A
PROGRAM DESCRIPTION

Appendix A

PROGRAM DESCRIPTION

History

The School-Community Guidance Center alternative education program in Austin Independent School District began in fall, 1985, with a grant from the Texas Education Agency. 1988-89 marked the fourth consecutive year of SCGC funding (see Attachment A-1). To date, 2,301 students have been served at the District's alternative secondary school (excluding summer school), and 2,855 juvenile offenders have been served at the Gardner House, the Travis County Juvenile Detention Center.

	<u>Alternative School</u>	<u>Gardner House</u>
1984-85	240	581
1985-86	319	635
1986-87	496	592
1987-88	685	* 501
1988-89	546	* 561

* Located in temporary quarters.

High-risk offenders were sent to another location, hence these figures are artificially deflated.

Target Population

SCGC students are referred to the program for one of the following reasons:

- Behavior problems at the home school, as defined by Level III, principal intervention, of the District's Discipline Management Plan (Fall, 1987), (See Attachment A-2.)
- Detention by Travis County juvenile justice authorities, or
- Referral by the Texas Youth Commission as a condition of probation.

Staffing

Four employees constitute the core SCGC staff during the regular school year: three Project Specialists and one Evaluation Associate. Additional Project Specialists may be hired for summer school as the budget permits. For summer 1989, there were three: one each at Austin High, Martin Junior High, and Gardner House.

During the school year, the two Project Specialists assigned to the alternative school worked as counselors and also provided community liaison services (see Attachments A-3 and A-4). The third Project Specialist functioned as a teacher at Gardner House (see Attachment A-5). All three reported to the campus school psychologist (see Attachment A-6). The Evaluation Associate worked out of the District's Office of Research and Evaluation (see Attachment A-7).

Needs: During the past year 506 AISD students were assigned to the F.R. Rice Alternative Center for Education, 1,715 AISD students had some contact with the Juvenile Criminal Justice System and 289 students in detention were served by the SCGC Program at the Juvenile Detention Center for Travis County. Only 88.2% of the students enrolled in high school in 1986-87 were still enrolled in April of 1988. At the Junior High level only 66.7% were still enrolled during the same period. Additional support services are needed for AISD adjudicated youth, dropouts, school leavers, underachievers, and behavior problem students. Educational support is also needed for AISD students in juvenile detention.

Description: Three Project Specialists will provide educational support services to "high-risk" students through the Alternative Center for Education and Travis County Juvenile Detention Center. Two of the specialists will serve as the home/school/community center liaison. The third specialist will provide educational support services to students in juvenile detention. Services to students may include counseling, tutoring, monitoring of grades, attendance and discipline, home visits, or referral to other agencies.

Major Objectives: School-Community Guidance Center staff will work with the Alternative Center for Education to assist "at-risk" students to improve school attendance and academic performance; decrease disruptive behavior and contacts with the Juvenile Justice System; to assist in developing a more positive outlook about self and school; increase parental involvement; and provide additional academic support, citizenship skills and vocational information.

Evaluation Strategy: Information will be collected concerning attendance rates, dropout rates, recidivism, disposition of cases, follow-up and contacts with the juvenile justice system. Evaluation will be included to determine implementation procedures for both activities and objectives. Academic performance before, during, and after enrollment in the program will be determined from district data.

Evaluation Findings: (N/A for new projects) During the 1987-88 school year, 340 students were served. An additional 168 students would have been served if funding had been provided earlier. The Juvenile Court Component served 501, restricted by a temporary location requiring many students to be referred elsewhere.

Date Submitted

Program Authority: T.E.C. §21.60: 208**Statement of Need:**

The Austin Independent School District (AISD) is located in the state capital. The population of 486,000 supports a school system of schools and ten additional buildings. The district employs approximately 4,500 professional personnel (teachers, administrators, counselors, nurses) in addition to 3,000 classified/technical/manual employees. A projected enrollment of 62,499 students for the 1988-1989 school year is projected to be represented by a tri-ethnic population of 20% Black, 33% Hispanic and 47% Anglo. Of the total enrollment, 30% of the students qualify for the free lunch program with an additional 6% being eligible for a reduced price lunch.

At this writing the annual summary of the Austin Independent School District's dropout situation for the 1987-88 school year is incomplete. As of the end of the fifth six weeks the High School dropout rate was 9% and the Junior High/Middle School rate was 4.2%. At the High School level 88.2% of the students who were in school in 1986-87, were still in school in 1987-88. Junior High/Middle School students indicated only 66.7% still in school during the same period.

In November of 1984, AISD added three alternative programs to its secondary education program. For the 1988-89 school year the F. R. Rice Alternative Center for Education is being consolidated on one campus and somewhat enlarged to handle the middle school students in the district. During the 1987-88 school year, 506 students were removed from classes in the district to alternative settings in grades six through twelve. Reports from the Intake Division at Gardner House-Juvenile Detention Center for Travis County indicate that 1,574 referrals are from the Austin Independent School District attendance area. An additional 141 students were referred who were in need of educational services from the SCGC Project Specialist housed at the facility. The total number of 1,715 reflects a substantial decrease from the previous 2,257. A new law prohibits Class C Misdemeanors from being referred to Juvenile Court. While this greatly reduces the number of referrals, it means that those referred are the true "hard core".

F. R. Rice School is a non-traditional alternative to the regular traditional school. It has been established to provide remedial educational experiences for those students who have had difficulties succeeding in the regular school environment. A program is available which provides educational services for students who are ineligible for the regular instructional program due to removal. Students receive numerical grades to reflect academic performance just as they do in the regular program. The District will continue to provide this service for students unable to function in the traditional classroom setting.

Level III: Principal Intervention
Removal to an Alternative Education Program

The principal, acting as the Superintendent's designee, may send the student to an alternative education program.

The district's primary alternative education programs have been set up at F.R. Rice Secondary School and Dill School for elementary students.

Before a student may be removed, however, the principal must determine:

- That the student presents a physical danger to himself or herself or to other individuals; or
- That there has been serious or persistent (four or more referrals from Level I or Level II) misbehavior by the student, violating the District's standards of student conduct.

Level III violations and discipline options are not limited to those described below. Repeated violations may result in more serious discipline.

Procedures

- Infractions are investigated by an administrator who confers, if necessary, with the teacher and/or others

- The administrator meets with the student and the parents, giving the student a chance to tell his or her version of the incident. The principal determines what discipline is needed after a hearing is held in accordance with AISD policy and regulations for sending students to an alternative education program.

- At the removal hearing, the principal should afford the requisite due process when considering a removal. Prior to the hearing, the principal will notify the parent in writing of the following:

(a) the time and location of the hearing; (b) the student will be advised of the conduct with which he/she is charged; (c) the student will be given the opportunity to explain his/her version of the incident and; (d) the student's parent, guardian and or student's representative will be given notice of and is encouraged to participate in the hearing.

Level III Behavior Violations

- Accruing four or more infractions for misbehavior described under Level I or II.
- Using profanity, vulgar language or obscene gestures.
- Truancy or cutting class.
- Unexcused absences.
- Possession or use of fireworks or explosives.
- Arson*.
- Assault*.
- Being under the influence of alcohol, marijuana, a controlled substance or other dangerous drug.
- Selling, giving or delivering to another person, or possessing or using:

(a) Alcohol, marijuana, a controlled substance and/or dangerous drugs*; (b) Firearms or other weapons*.

*Defined as a serious offense in the Discipline Policy.

Discipline Options/Responses (if the student is found guilty)

- Behavior contract.
- Withdrawal of privileges.
- Removal to alternative education program.

JOB DESCRIPTION

Campus Based Project Specialist

The campus based project specialist will be responsible for the following areas:

- Checking on student's attendance regularly by visiting the student's classes
- Providing follow-up assistance to ensure that students are attending school by talking to parents when students are absent or tardy
- Involving parents in such activities as award programs, field trips, parents' night, and fund-raising activities
- Establishing before or after school counseling/tutoring programs
- Providing recreation programs as incentives for completion of academic assignments
- Providing training in "citizenship skills" for the faculty of the project schools
- Encouraging positive student-teacher interaction by developing programs such as "adopt-a-kid"
- Monitoring discipline referrals by checking regularly with the school office
- Coordinating periodic meetings with a representative of the Travis County Juvenile Court to determine recidivism of targeted students
- Making a minimum of one home visit per month
- Providing support to campus administrators, teachers, counselors, parents, and agencies for the referral of problematic students to the program
- Discussing student progress and concerns with teachers and coordinating class schedules and homework assignments with tutors and remedial educators
- Working with students who are on probated suspensions
- Identifying presenters who are successful in their respective fields to serve as positive role models to students
- Counseling students individually and/or in small groups on a weekly basis in reference to vocational, personal, and academic concerns

93071008

- Conducting ongoing activities that stress personal responsibility, decision-making, problem solving, enhancing self-esteem, and communication skills designed to encourage appropriate behavior
- Arranging for, or providing students and their families with counseling where appropriate
- Participating in training to learn to facilitate parent groups and to develop a parent education program
- Hosting parent meetings to explain the School Community Guidance concept and the need for their support and involvement
- Providing special reinforcement activities such as field trips or camping trips for "good citizenship"
- Working with Local Support Teams, Campus Review Boards, and Attendance Review Boards in identifying goals, designing intervention strategies, implementing these interventions, and following up on these interventions on students involved in the SCGC program.

Project Specialists will have certification that is recognized by the Texas Education Agency. They will have training in such areas as counseling, social work, educational alternative programs, psychology, conflict resolution, group dynamics, behavior management, juvenile probation, values clarification, teaching, and/or community out reach activities.

93071008

EXHIBIT D

227-901

JOB DESCRIPTION

Juvenile Court Based Project Specialist

The court based project specialist will be responsible for the following areas as they pertain to (a) helping the school based project specialists and (b) students referred through the juvenile court directly:

- Checking on student's attendance regularly by visiting the student's classes
- Establishing before or after school counseling/tutoring programs
- Establishing tutoring and educational assistance for identified students during school
- Providing recreation programs as incentives for completion of academic assignments
- Providing training in "citizenship skills" for the faculty of the project schools
- Encouraging positive student-teacher interaction by developing programs such as "adopt-a-kid"
- Monitoring discipline referrals by checking regularly with the school office
- Coordinating periodic meetings with a representative of the Travis County Juvenile Court to determine recidivism of targeted students
- Providing support to campus administrators, teachers, counselors, parents, and agencies for the referral of problematic students to the program
- Discussing student progress and concerns with teachers and coordinating class schedules and homework assignments with tutors and remedial educators
- Identifying presenters who are successful in their respective fields to serve as positive role models to students
- Counseling students individually and/or in small groups on a weekly basis in reference to vocational, personal, and academic concerns
- Conducting ongoing activities that stress personal responsibility, decision-making, problem solving, enhancing self-esteem, and communication skills designed to encourage appropriate behavior

98671008

- Arranging for, or providing students and their families with counseling where appropriate
- Working with Local Support Teams, Campus Review Boards, and Attendance Review Boards in identifying goals, designing intervention strategies, implementing these interventions, and following up on these interventions on students involved in the SCG program
- Providing special educationally related services as will be defined by the Juvenile Court that fall within the parameters of the SCGC program

The Project Specialist will have certification that is recognized by the Texas Education Agency. They will have training in such areas as counseling, social work, educational alternative programs, psychology, conflict resolution, group dynamics, behavior management, juvenile probation, values clarification, teaching, and/or community out reach activities.

Narrative/Description of the Program

(Continued from previous page)

Gardner House-Travis County Juvenile Detention Facility Component

The Gardner House Project Specialist functions most frequently as a teacher and instructional coordinator. Juveniles at the detention facility have social workers, probation officers, dormitory workers and other adults who provide counseling and guidance. Service areas provided by the SCGC Project Specialist are as follows:

Basic academic skills - reading, writing and mathematics work geared to the individual's level of ability.

Career education - counseling and career awareness activities are provided. Employers and employees from various fields discuss their occupations and the necessary training. A unit is also used which provides easy-to-read booklets that describe the lives of successful people in a variety of fields.

Recreation - daily recreational activities are organized and scheduled.

Arts and crafts - material are available to give students a chance to express themselves visually and creatively. At the same time, they have an opportunity to discuss feelings, events and ideas in a non-threatening situation.

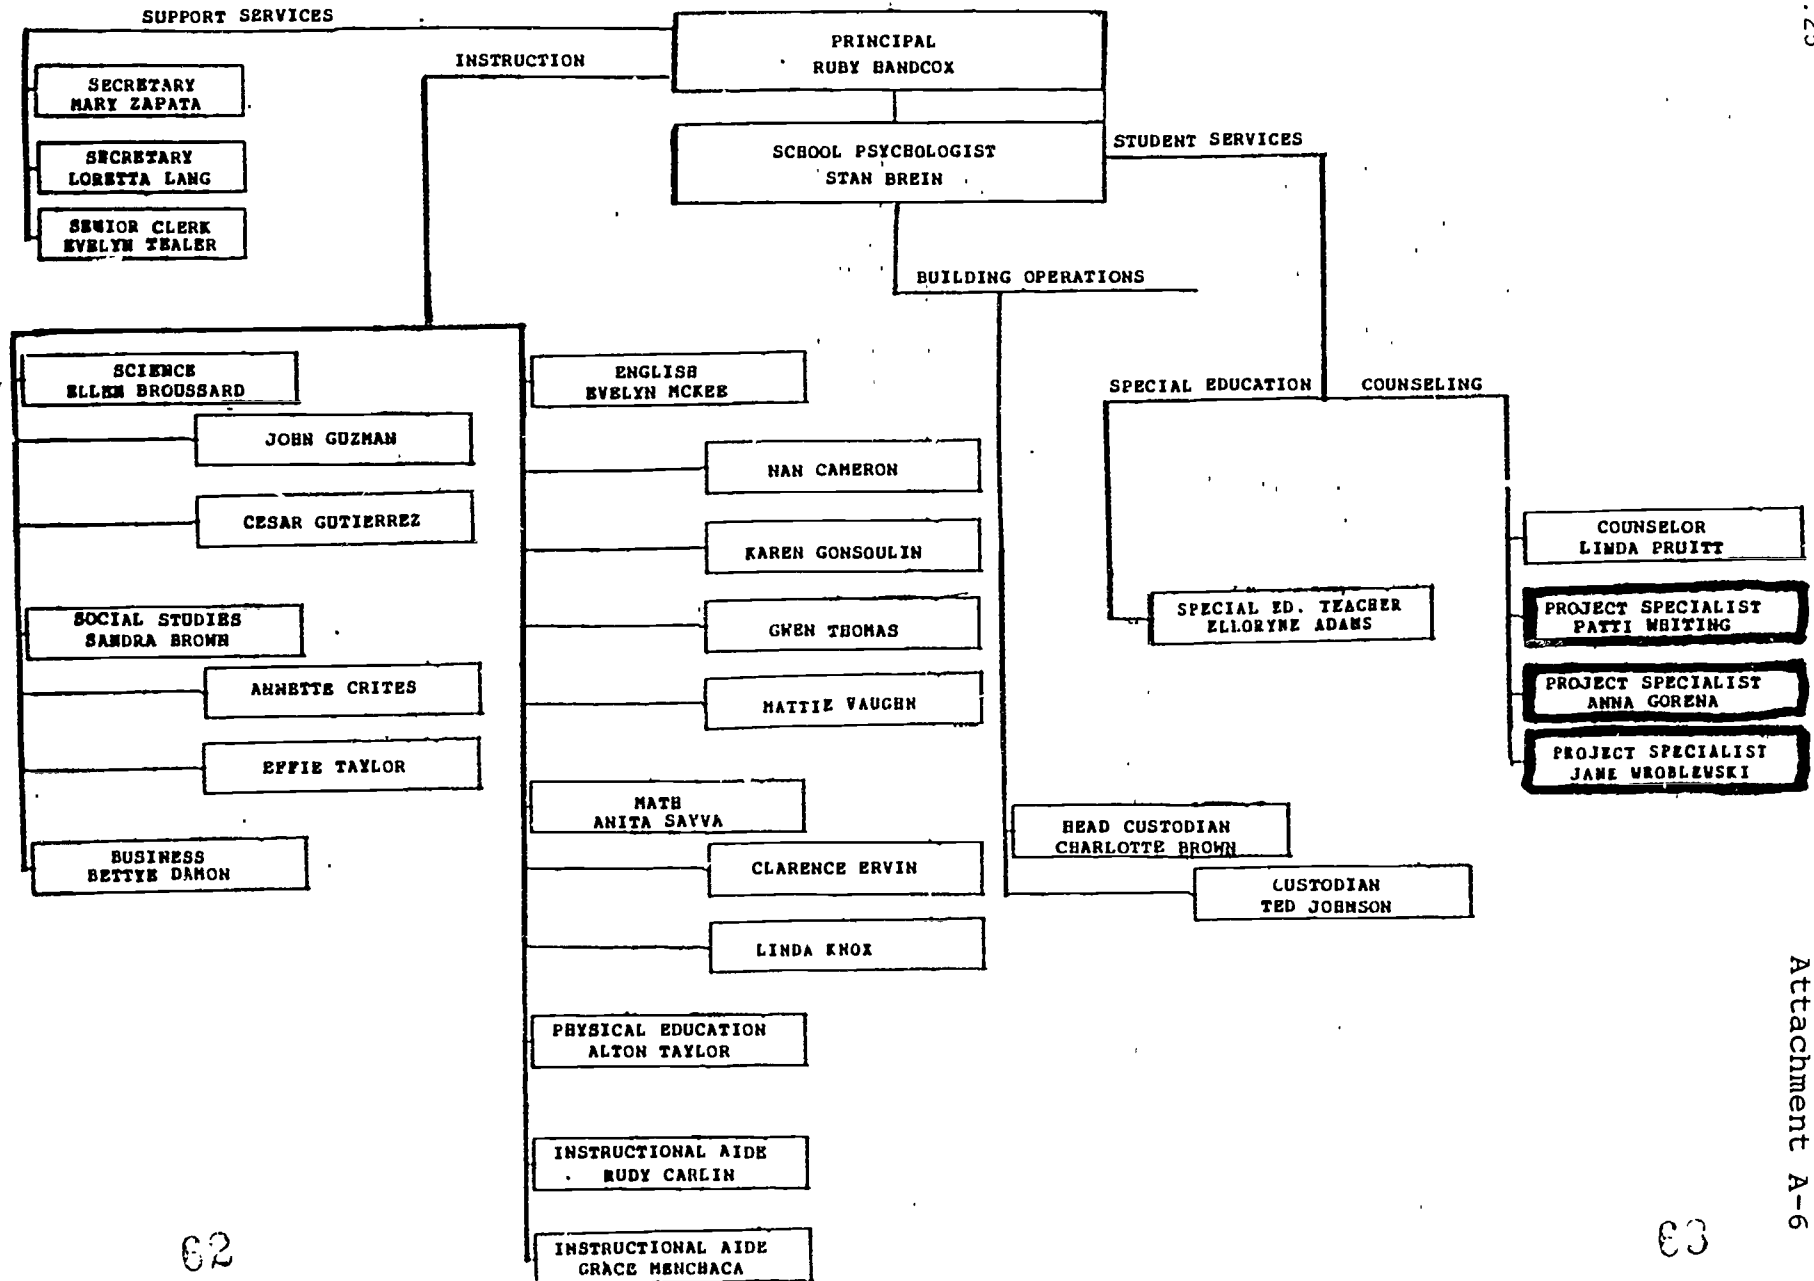

Life skills - guest speakers, books and films provide information on family and financial planning, child abuse prevention and mental and physical health.

The 289 AISD students served during the 1987-88 school year benefited by the program. Class attendance was reported to the district to enable students to receive school credit despite their detention. They were also able to work on school assignments and avoid falling so far behind that they could not catch up with their classes after being released from custody.

JOB DESCRIPTION

Evaluation Intern

The evaluation intern will be responsible for the following tasks:

- With input from District staff, design Referral Form and activity logs for use by project specialists
- Set up a system for collecting, coding, and analyzing data on attendance, discipline problems, recidivism, disposition of cases, and dropout status for each student in the program
- Monitor and provide feedback on the activities of the project specialists as part of the "process evaluation". (Use observations or interviews where appropriate)
- Write evaluation, technical, and summary reports for use by TEA and project staff in assessing and improving the project
- Look at the results of this program in the context of other pilot programs in the district aimed at high-risk students

Project No. (Assigned by TEA)
JUN 30 1988

Date Submitted

Program Authority: T.E.C. §21.601-606

Evaluation Design: Information Requested by Agency

To complete the report form (GS042487), information will be collected in several ways.

Attendance rates of students enrolled in the School-Community Guidance Center will be determined from data collected on the District's Attendance File. This data will be obtained for the entire school year on students enrolled during the year to assess trends in attendance before, during and after entry into the Center.

The dropout rate and students' reasons for withdrawal will be determined from the District's Student Master File records. The dropout rate for SCGC students will be compared with the District's overall dropout rate, when available. The 1987-88 rates for SCGC students will also be compared to the 1986-87 SCGC rates.

Recidivism will be assessed from the Student Referral/Information Form (maintained for each student enrolled in the Center) and from data files maintained by the evaluation associate. Also, students will be requested to report any further contacts with the juvenile justice system to the project specialists. The specialist assigned to the temporary juvenile detention center (Gardner House) will assist in verifying this information.

Information concerning the disposition of cases will be collected from the Student Referral/Information Form which will be maintained by project specialists.

Follow-up information on the status of students 12 weeks after exiting from the Center will be obtained by project specialists and recorded in the Student Referral/Information Form for all students exiting from the Center by the end of the fall, 1987 semester (January 21, 1988).

Academic performance of SCGC students will be determined from data in the District's Student Grade Report file. The number of courses passed or failed for each grading period will be calculated to compare students' academic performance before, during, and after enrollment in SCGC for students in grades 6-8. The number of credits earned for each grading period will be calculated to compare students' academic performance before, during, and after enrollment in SCGC for students in grades 9-12.

Assessment of Project Objectives

Overall, the evaluation of the project will focus on the extent to which the project is implemented as described in both activities and objectives sections. Specifically, the evaluation of the project will include the following assessments and documentation.

- Rates of attendance
- Dropout rate
- Recidivism
- Disposition of cases
- Twelve-week follow-up
- Academic Performance
- Population served (including grade level, sex, ethnicity)

Other activities (beyond those required by TEA) will be discussed with and reviewed by project staff in October, 1988.

SCGC
APPENDIX B
Enrollment

APPENDIX B**Enrollment****Procedure**

The Rice enrollment roster used in these analyses was based on the list compiled and updated daily by the campus staff psychologist. Because there is a considerable amount of paperwork involved in first disciplining, then transferring, and finally enrolling students at Rice, the District files do not always reflect the students' current status. Rice staff, however, are in close contact with students assigned to their campus and track their status on a daily basis.

Current Rice rosters (see Attachment B-1) were obtained from the school psychologist at least twice a month and input into a SAS data file on the District mainframe. See Attachment B-2 for file layout. The enrollment for each semester was considered a separate cohort or "group." This year, the group numbers were 6 for fall, 1988 (data file SW@FAL88), and 7 for spring, 1989 (data file SW@SP89). For 1989-90, the group numbers will be 8 and 9. SAS data files for previous semesters extend back to spring, 1986 (group 1 - SW@SP86); fall, 1986 (group 2 - SW@FL86); spring, 1987 (group 3 - SW@SP87); fall, 1987 (group 4 - SW@FL87); and spring, 1988 (group 5 - SW@SP88). There is no data file for the 85 students enrolled during the program's first semester (fall, 1985).

Background information on the school-to-school enrollment procedure is explained in Attachment B-3. Attachment B-4 shows the SCGC Enrollment Checklist; it is filled out at Rice by the student's parent or guardian as part of the enrollment procedure.

Other Considerations

Coding for Juvenile Contact is explained in Appendix G. For information on coding Previous Assignments, see Appendix E. Offenses (R1 through R4) are described in Appendix D. Special Education status is indicated on the Rice roster by an asterisk. To date, Ethnicity has been reported only in terms of three groups: Hispanic, Black or Other. Other has included American Indian, Asian, and Anglo. As the Asian population in the District increases, it may be advisable to show this group as a population separate from Other.

The Date of Exit fields are filled in whenever a student leaves the alternative school. Usually, this will be the last day of the semester. If the student is expelled (whether sent home or probated), the date on the Superintendent's letter is entered here, and the reason "D" coded for disposition. If the student withdraws at parent request, the date on the Withdrawal sheet is entered as the exit date, and disposition is coded "K" for dropout. Students who withdraw citing a move or transfer to another school are coded "E." Later, at the 12-week follow-up, if student records show that the District has received an official transcript request, F_1 is coded "T."

All students on the Rice roster are included in analyses of student characteristics for the entire school. For analyses of only those students enrolled in SCGC, those with referrals for reasons other than behavior are deleted from the school population. In other words, SCGC serves the subset of Rice students who are referred either by the District for behavior problems or by TYC subsequent to contact with the juvenile justice system. See Appendices C and D for more information. For 1988-89, a total of 546 students enrolled in Rice, and of these, 466 were considered SCGC students.

AUSTIN INDEPENDENT SCHOOL DISTRICT

F. R. RICE SECONDARY SCHOOL
 2406 Rosewood Avenue
 Austin, Texas 78702-2498
 (512) 472-4639

TO: Secondary School Principals

FROM: Ruby Handcox, Principal, F. R. Rice

THROUGH: Freda ^{HR}Holley, Assistant Superintendent, Secondary Education

SUBJECT: Referral Procedure

DATE: October 24, 1988

We have started a new school year and are looking forward to working with you to make the transfer of referred students as smooth as possible for you, the students and their families. To accomplish this, we are requesting that you follow these procedures in making a referral.

1. When you have a disciplinary hearing scheduled, please call Gloria Williams' or David Hill's office before the hearing to let them know the student may be referred.
2. Please call the Intake Person, Stan Brein, or me at 472-8187 or 472-4639.

At the time you call, we will request the information listed on the New Arrival Form (Attachment 1). This information is taken by phone, and allows us to do some preliminary planning in the event the student does come to Rice.

3. If the student is removed to Rice at the Disciplinary Hearing, please inform us of the decision by phone. In addition, ask the parent or guardian to call us to schedule a time to enroll. (If you call immediately after the hearing while the parent or guardian is still present, we can schedule an enrollment time then.)

Our enrollment times are Tuesday and Thursday at 8:30 AM. The parent or guardian must accompany the student to enroll, and the process takes about an hour to complete. The student will start as soon as we can develop a schedule and arrange for bus transportation (usually within two days).

4. Please give the parents a copy of the transcript and withdrawal form to take with them to Rice. We must have this in order to be able to enroll the student. If the student's withdrawal will be delayed, please ask the parents to pick up a copy of the withdrawal form before they come to Rice.

5. The Sending School Enrollment Checklist (Attachment 2) lists the additional information we will need. This can be sent after the student is enrolled at Rice.

6. If you need any information about the student while he/she is enrolled here, please feel free to contact me or Stan Brein.

7. At the end of the semester we will send you a copy of an LST review (if one was done) along with a copy of his/her report card.

Assignments for students with special handicapping conditions should be carefully reviewed during the ARD hearing before placement is recommended. Dr. Zoe Griffith has asked that the Special Education Instructional Coordinator for your school attend the hearing.

Our philosophy at F. R. Rice Secondary School supports the belief that students can make academic gains and alter their behavior. The Rice staff is prepared to provide an environment to support students who can no longer be enrolled in the traditional program.

We are eager to enroll students as quickly and smoothly as possible. Forwarding the items listed on the checklist will facilitate this.

Thank you for your cooperation.

SENDING SCHOOL ENROLLMENT CHECKLIST
FOR THE
F. R. RICE SECONDARY SCHOOL

We are eager to enroll students assigned to F. R. Rice as quickly and smoothly as possible. To facilitate this process, please ensure that all items listed below are completed and forwarded to us as soon as possible.

Thank you for your assistance.

Student Name _____ Student Number _____

Parent/Guardian _____ DOB _____

Home Address _____

Work Phone _____ Home Phone _____

Referring School _____ Grade _____

Contact Person _____ Title _____

Items/Activities

- _____ Telephone Notice of Hearing Being Held
- _____ Two (2) Copies of Withdrawal Form (One to be mailed to Rice - Student carries one to Rice)
- _____ Transcript-Measurement Data
- _____ Attendance Profile
- _____ Immunization Data
- _____ Copy of Discipline Summary and 003
- _____ Special Education Information (if applicable)
- Handicapping Condition _____
- _____ Copy of most recent Psychological Evaluation

F. R. RICE and GARDNER HOUSE

SCGC ENROLLMENT CHECKLIST

Please complete the following information to facilitate enrollment. Thank you.

Student Name _____ Student I. D. # _____

Grade 7 8 9 10 11 12 Sex M F Date of Birth ___/___/___

Ethnicity: American Indian Asian Black, Not of Hispanic Origin
 Hispanic White, Not of Hispanic Origin

Parent/Guardian _____ Address _____

Work Phone: Father _____ Mother _____
Home phone: Father _____ Mother _____

Referred to: F. R. Rice Gardner House

Referral Contact: Name _____ Title _____

Location: _____
This referral is is not partially a result of
contact with juvenile authorities.
Does student have a juvenile court case worker? Yes No

Reason(s) for which student was referred to SCGC:
(please circle appropriate letters)

Offense Category	
a) arson	m) possession, use or under the influence of an alcoholic beverage, drugs, marijuana, or a controlled substance-- <u>first offense</u>
b) assault	n) repeated possession, sale, delivery, or possession with intent to sell an alcoholic beverage, drugs, marijuana or a controlled substance
c) cheating	o) smoking
d) detention, missed or excessive	p) theft
e) excessive tardiness	q) truancy
f) fighting	r) vandalism
g) gambling	s) unexcused absences
h) hazing	t) other (specify) _____
i) insubordination (with teachers or students)	
j) obscene language	
k) possession of fireworks	
l) possession, use, give, or delivery of firearms or other weapons	

Items/Activities Checklist (for entry to Rice only):

- _____ Telephone Notice of Hearing
- _____ Attendance Profile
- _____ Total Days Suspended from Home School (circle): 1 2 3 4 5
- _____ Two (2) Copies of Withdrawal Form (One mailed to Rice - One carried by the student to Rice)
- _____ Special Education Information (if applicable)
Handicapping Condition _____
- _____ Copy of most recent Psychological Evaluation
- _____ Immunization Data
- _____ Transcript Measurement Data

Assignment:

1st ENTRY Date ___ / ___ / ___

EXIT Date ___ / ___ / ___

Disposition of Case ___*

Follow-up ___**

F,G,H: _____

J,N: _____

2nd ENTRY Date ___ / ___ / ___

EXIT Date ___ / ___ / ___

Disposition of Case ___*

Follow-up ___**

F,G,H: _____

J,N: _____

***Dispositions (if F,G, or H, specify location above):**

- A Graduated
- B Returned to home campus
- C Dropped out of school
- D Expelled

- E Moved from Austin ISD
- F Removed to Rice/Gardner/Robbins
- G Remained at Rice/Gardner
- H Committed to a non-AISD institution

****Twelve week Follow-up: (if J or N, specify location above):**

- A** I Graduated
- J In school
- K Dropped out

- D** Expelled
- M Returned to center (recidivist)
- N Other

COMMENTS:

SCGC
APPENDIX C
Student Characteristics

APPENDIX C

Student Characteristics

Procedure

Student characteristics such as ethnicity, age, sex, grade, home school, and special education status are frequently requested types of descriptive data. These data are entered on the SAS data file (see Appendix B) using information on the Rice enrollment roster.

Data analysis of student characteristics is accomplished using program SW\$ALL from library ORSSAS (see Attachment C-1). Portions of the 1988-89 printout, which may run more than 40 pages, are included as Attachment C-2.

For data analyses of SCGC students only, those with codes X, Y, or Z in R1 were deleted (X=Special assignment, Y=AIP, Z=TAP). In 1988-89, SCGC group membership was defined as any referral for a behavior problem. (See Appendix D for a list of offenses.)

Low income status of Rice and SCGC students, by ethnicity, was determined using program SW\$LOWIN, library ORSSAS. See Attachment C-3.

SCGC
APPENDIX D
Offenses

APPENDIX D

Offenses

Procedure

Student offenses--the reason(s) for disciplinary hearings that result in assignment to Rice--are listed on the New Arrival Sheet (see Attachment D-1). This sheet was usually filled out by the Rice school psychologist or principal during a telephone conversation with a counselor at the referring school. A copy of the sheet was then given to the new student's counselor or project specialist. The sections on "Behaviors that lead to removal" and "Other" are of interest here.

Using the counselor's copy of the New Arrival Sheet, a maximum of four offenses (in any sequence) were coded for each student. See Attachment D-2 for letter codes. These letter codes were then entered in the SAS data file as referral reasons R1 through R4. The list shown in Attachment D-2 also appears on the SCGC Enrollment Checklist (Attachment B-3); self-reported referral reasons, however, often differ from those on the New Arrival Sheet and were considered unreliable for purposes of this evaluation.

It must be emphasized that the referral reasons listed on the New Arrival Sheet do not necessarily conform to those in the letter code list. Instances of insubordination, for example, must be inferred from comments indicating that a student refuses to follow classroom rules, talks back, or wanders the halls.

The program SW\$OFF (library ORSSAS) was used to compile frequencies by type of offense (see Attachment D-3). Sample output is shown in Attachment D-4.

Figure 12

SCGC
APPENDIX E
Recidivism

APPENDIX E

Recidivism

Procedure

The recidivism rate of Rice students is of interest both to TEA and AISD. Repeat referrals to Rice are coded in the SAS data file in the field titled PREV (see Appendix B). The codes are as follows:

- 0 Students who have never been to Rice before
(this is their first assignment)
- 1 Second assignment
- 2 Third assignment
- 3 Fourth assignment
- 4 Fifth assignment
- 5 Sixth assignment
- S Span (a first-assignment student enrolled late
one semester and is retained - spans - for the
following semester.
- T Span from the second assignment
- U Span from the third assignment.

Additional codes, either numerical or letter, can be created to extend the sequence as needed. Span status is determined from the student entry date; if this date precedes the first day of the current semester, then the student is considered a span.

Program SC\$003M (library ORSDIS) is used to determine the number of prior assignments to Rice. Attachment E-1 shows sample output; the program is shown in Attachment E-2. Names on the current Rice roster are compared manually to this list. Numbers in the "COUNT" column are adjusted to conform with the code described above. For example, in computing PREV for the first observation, the count is 3, but the PREV is 2 (the student had two assignments prior to SP89).

OBS	STUID	LAST	FIRST	SAS							COUNT
				SP86	FL86	SP87	FL87	SP88	FAL88	SP89	
1				NO	NO	NO	YES	YES	NO	YES	3
2				NO	NO	NO	YES	YES	NO	YES	3
3				NO	NO	NO	YES	YES	NO	YES	3

SCGC
APPENDIX G
Gardner House

APPENDIX G

Gardner House

Procedure

During 1988-89, one Project Specialist was assigned to Gardner House, the Travis County Juvenile Detention Center, to implement an educational program. At the beginning of the school year, the Project Specialist sent a memo to all AISD principals explaining her role (see Attachment G-1).

According to recommendations in the Texas Standards for Juvenile Detention Facilities, the student-teacher ratio should not exceed 10:1 (see Attachment G-2). In fact, during this school year, the ratio was 17:1 (see Attachment G-3).

At the end of each semester, the Gardner House Project Specialist compiled descriptive statistics on only those students she had contact with. Those who may have entered and exited during weekends or holidays are not included. See Attachment G-4 for 1988-89 data.

MEMORANDUM

TO: AISD Principals
FROM: Jane Wroblewski, Project Specialist-Gardner House *JW*
SUBJECT: Gardner House
DATE: October 4, 1988

As project specialist for Gardner House, I would like to define Gardner House and its relationship to AISD. I hope that you will pass this information on to the faculty of your school. If you or any of your faculty have questions about Gardner House please call me at 467-6871.

Gardner House is the Travis County Juvenile Detention Center. Children from 10 to 16 years of age can be detained at Gardner House when they are picked up by the police. AISD provides a project specialist at Gardner House to implement an educational program. The goals of the program are to maintain school attendance and educational training for the children while they are detained. AISD students are given attendance credit if they participate in the Gardner House program. AISD students can be given credit for course work that is completed while they are detained. Ideally, the students should be given as much credit as the home school teachers feel comfortable allowing. Please remember that these students are in a very stressful situation. They may not be emotionally capable of completing normal amounts of course work while they are at Gardner House. Teachers and counselors are welcome to call the project specialist to obtain information about course work completed by students while they are at Gardner House. When a student is detained for extended periods of time (10 days or more) or expresses an interest in obtaining assignments from their home school, the project specialist may call the students' home school to request the students' course work. This year AISD textbooks have been purchased to assist in the process of keeping students current in their classes.

APPENDIX G - 4 100

§343.17 Programs.

The following standards are mandatory for all detention facilities except for hold over detention facilities.

(1) Education services. The superintendent of detention develops a program which provides for coordination with local school officials within the area served by the detention facility. When education services are provided in the detention facility it is recommended that teacher student ratios not exceed one to ten, and that instructors be certified by the Texas Education Agency. The program provides education to each child in detention appropriate to the child's needs, and may include any of the following:

(A) using the services of the school liaison officer to help ensure that the child remains current with his school work while in detention;

(B) providing short term education programs which can enhance the child's basic skills;

(C) providing remedial and special education to help improve the child's capacity to perform in school; and

(D) allotting space to an independent school district to provide instruction at the detention facility.

(2) Library services. Library services and materials are available to all detained children.

(A) The superintendent of detention designates a staff member or trained volunteer as library coordinator.

(B) Library materials consist of books, magazines, and recordings which meet the educational, informational, and recreational needs of detained children.

(3) Recreation and activities. Recreation and activities are available to all detained children.

(A) The superintendent of detention designates a staff member or trained volunteer as recreation coordinator.

(B) Each child participates in one hour of organized physical exercise each day.

(C) Each child is allowed one hour of unscheduled activities each day.

SCGC
APPENDIX H
TEA Report

APPENDIX H

TEA Report

Procedure

Submission of an annual report to TEA is stipulated in the SCGC grant. (See Attachment H-1.)

Descriptive Data. Although the various frequencies reported (by sex, ethnicity, grade, etc.) are similar to those in the Final Report (ORE Pub. No. 88.24), the population differs. TEA requests statistics on first-time referrals only. These students are defined in the program SW\$ALL (library ORSSAS) either with an S (span) or 0 (no prior assignment) in the field PREV of the SAS data file (see Appendix B), as well as with an X, Y, or Z deleted from field R1 (for standard SCGC counts). In the case of Spring, 1988, data only, SCGC was defined as PS NE 2.

Follow-Up Data: Grades. Program SG\$002/SG\$002F (library ORSSWT) reads the downloaded Student Grade Report file and matches it with a selected data file. See Attachment H-2. The program was run twice, once for SW@SP88, and again for SW@FAL88. For each student, it counts the number of courses passed during the semester of enrollment at Rice and compares this number with appropriate SGR files 12 weeks into the following semester (11/20/88 for the Spring, 1988 Rice file, and 4/20/89 for the Fall, 1988, Rice file). It then counts the total number of students whose school performance was Better, Worse, or No Change. See Attachment H-2.

Follow-Up Data: Attendance. Program SG\$001S/SC\$001F (library ORSDIS) checks the attendance record for each student for the semester of enrollment at Rice and compares this attendance rate with the rate for the first 12 weeks of the following semester back at the home school. See Attachment H-3. It then counts the total number of students whose school attendance was Improved, Worse, or No Change.

Attachment H-4 shows the final 1988-89 printouts for both grades and attendance.

Attachment H-1
1988-89 TEA Report

Austin Independent School District

Department of Intergovernmental Relations

June 12, 1989

Dr. Sylvia Garcia
Educational Program Director
Student Services
Department of Program Development
Texas Education Agency
1701 North Congress Avenue
Austin, Texas 78701

Dear Dr. Garcia:

Enclosed is our final evaluation report for the School-Community Guidance Center Program for 1988-89. We are submitting the report without the figures that reflect the students served in summer school.

In order to meet the report deadline, we are using only the figures on student service to date. We will submit a revised form after summer school figures are available. Gardner House is again appreciative of the continued educational program this summer.

Please call if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Ann Cunningham".

Ann Cunningham
Grants Administrator

APPENDIX H - 4 ¹³³

88.25

Austin Ind. School District Division of Program Planning

School District Name

227-901

County-District Number

Evaluation Report for School -Community Guidance Centers

Authority for Data Collection: 19 TAC 85.22

Planned Use of the Data: Prepare evaluation report.

Instructions: Type the requested information in the blanks or spaces provided. Add additional sheets if necessary. Only one completed report form is required.

For assistance in completing this form, please call the Division of Program Planning at (512) 463-9512.

I. Center's Total Staffing Pattern:

Position	Number (FTEs*)
Supervisor/Principal	
Teacher	
Counselor	
Aide	
Project Specialists Other (Specify)	3

*FTE: Full-Time Equivalents

II. Funds Expended:

A. Total Criminal Justice Division funds expended (not TEA): \$ 46,595 *

B. Total other funds expended: \$ 805,706 *

Typed Name of Project Director	Date	Telephone
Ann Cunningham	June 12, 1989	512-458-1291

* Budgeted - final expenditures not available at this date as program runs through August 30, 1989.

By June 15 of the current year return to:

Texas Education Agency
Division of Program Planning
1701 North Congress Avenue
Austin, Texas 78701

132

A. For students returned to campus, indicate status 12 weeks after return:

Status	Number of Cases
a. dropped out	55 #
b. expelled	3
c. returned to Center (recidivist)	12
d. in school	193
e. other (includes transfered/moved, graduated, institutionalized)	29

*** B. 1. Number of students whose "12 weeks later" attendance was:

Attendance	Number of Students
a. better	62
b. worse	60
c. no change	54
d. Incomplete records	17
TOTAL = 193	

Total of above should equal number of students in school [VIII(A)(d)].

2. Number of students whose "12 weeks later" school performance was:

School Performance	Number of Students
a. better	45
b. worse	96
c. no change	30 39
d. Incomplete records	13
TOTAL = 193	

Total of above should equal number of students in school [VIII(A)(d)].

* NOTE: These figures do not include the Court Component or the children served during summer school. See ADDENDUM.

** NOTE: Students exit from the School-Community Guidance Center program twice a year (at the end of each semester). Of the students "returned to campus" during the 1988-89 school year, 92 of them exited at the end of the fall semester. Therefore, Section VIII can only be applied to the 92 exited at that time and the 200 exited at the end of spring semester of 1987-88. Follow-up information will be available on the students exited at the end of spring, 1989, semester after twelve weeks have elapsed in the fall, 1989, semester and will be included with next year's report.

*** PROCEDURE: Student grade records were analyzed at two points in time to determine whether they were passing or failing -
1) for the semester of assignment to SCGC at Rice, and
2) for the first 12 weeks back at the home school.

Better - Comparisons showing movement from failing to passing.
Worse - Comparisons showing movement from passing to failing.
Same - Comparisons showing no change.

Includes summer and school year dropouts. Method of calculating differs from last year.

- * A. Number of students served in program by grade level, ethnicity (unduplicated count). See ATTACHMENT C for additional information.

Grade Level	(1) American Indian or Alaskan Native	(2) Asian or Pacific Islander	(3) Black, Not of Hispanic Origin	(4) Hispanic	(5) White, Not of Hispanic Origin	Total
4 and below	0	0	0	0	0	0
5	0	0	0	0	0	0
6	0	0	12	33	5	50
7	0	0	30	59	9	98
8	0	2	22	42	6	72
9	0	0	58	36	12	106
10	0	0	31	7	1	39
11	0	0	10	2	3	15
12	0	0	2	1	4	7
TOTAL	0	2	165	180	40	387

- * B. Number of students served by sex: Male 317 Female 70
- * C. Number of handicapped students served: 58 special education
- D. Is there a limit to the number of times a student can be placed in the Center? No _____ Yes X
- If yes, number of times: per semester 1 per year 2
- E. Number of students returned to Center due to recidivism: 79
- F. Number of student re-entries to the Center:
(Note: Students assigned only one time are not to be included in this table.)

Number of Times	Number of Students
1	52
2	22
3	4
4	1
5	0
6	0
over 7	0

- IV. For the period September 1 through May 31, how many students were referred to sources other than the school district for assistance in correcting factors adversely affecting the student's education?

A. Number of students: 349

See ATTACHMENT A

- V. Number of assignments by Offense Category, (sum of IIIA and E):
Most students are assigned for committing more than one offense.

Offense Category	Number of Assignments
a. arson	2
b. assault	43
c. cheating	0
d. detention, missed or excessive	44
e. excessive tardiness	33
f. fighting	136
g. gambling	4
h. hazing	0
i. insubordination	229
j. obscene language	80
k. possession of fireworks	0
l. possession, use, give, or delivery of firearms or other weapons	39
m. possession, use or under the influence of drugs, marijuana, or a controlled substance--first offense	38
n. repeated possession, sale, delivery, or possession with intent to sell an alcoholic beverage, drugs, marijuana or a controlled substance	1
o. smoking	0
p. theft	42
q. truancy	129
r. vandalism	35
s. unexcused absences	8
t. other (specify) See ATTACHMENT B	40

- * VI. Number of first assignments: non-adjudicated 357 adjudicated 30

- ** VII. Disposition of Cases (sum of IIIA and E):

Disposition of Cases	Number of Cases
a. returned to campus	262
b. removed to another alternative education program	1
c. graduated	1
d. moved from district	19
e. dropped out of school	37
f. committed to another institution	2
g. board action to expel	47
h. remained at center	97

ATTACHMENT A

IV. B. List the agencies that were used as referral sources:

Austin Area Urban League
 Austin Child Guidance and Evaluation Center
 Austin Community College
 Austin Dental Clinic
 Austin Police Department - Victim Services
 Austin Police Department - Hispanic Crimes Unit
 Austin State Hospital
 CARITAS
 Center for the Development of Education & Nutrition
 Center for Battered Women
 Charter Lane Hospital
 Child and Family Services
 Children's Protective Services, Dept. of Human Services

SAS NEWS 2/1/89 #

INFO FOR USERS REGARDING LARGE SAS DATA SETS #
SAS DATA SETS DO NOT HAVE TO BE STORED ON DISK IN ORDER TO #
BE ABLE TO RUN SAS PROCEDURES ON THEM -- THEY CAN BE STORED #
ON TAPE. IF YOU HAVE PROBLEMS MAKING SOMETHING FIT IN YOUR #
SAS DISK LIBRARY, LET ME KNOW AND I'LL SHOW YOU HOW TO PUT #
IT IN A SAS TAPE LIBRARY. #

IF YOU HAVE ANY PROBLEMS RELATED TO SAS PLEASE CONTACT #
LORA PERKINS AT 451-8411 EXT. 248. #

#####

SCGC
APPENDIX I
Interviews

APPENDIX I

Interviews

Procedure

The three Project Specialists were interviewed by the ORE Evaluation Associate at the end of May, 1989 (see Attachment I-1). Their comments, along with those of their supervisor, the Rice staff psychologist, were incorporated into the Final Report (ORE Pub. No. 88.24, p. 8). The Rice principal (see Attachment I-2) limited her comments to the following points:

- The grant is an essential part of the alternative school program, and
- She is satisfied with the structure of the program as it exists at this time.

SCGC INTERVIEWS 1988-89
PROJECT SPECIALIST

What were your main duties in the SCGC program this year?

How do you think, from your unique vantage point as Project Specialist, that participation in the SCGC program affected students?

Suppose I was present during one of your group/individual sessions. What would I see happening?
What new approaches/ideas did you try out in the counseling program this year? Of these, which ones will you try again next year?

What students are most likely to seek you out? Least likely? How do you reach these?

Now I'd like to ask you about your recommendations for the role of Project Specialists next year. How could SCGC be more effective? Any plans in that direction? What activities would you like to spend more time on? Less time?

How has neighborhood gang membership affected school climate this year compared to last year? What are your recommendations for improving the situation?

Looking back over the year, could you estimate for me about what percentage of your time you have spent working with these groups: Students? Teachers? Parents? Community agencies?

Have any problems or events occurred this year that may impact your effectiveness in meeting District goals?

SCGC INTERVIEWS 1988-89
PRINCIPAL, RICE SECONDARY SCHOOL

What was your role in the SCGC program this year?

How do you think, from your unique vantage point as principal, that participation in the SCGC program at Rice benefits students?

What guidelines were given to the schools this year in referring students to Rice? How do they differ from last year's guidelines?

How has the rise of neighborhood gangs affected school climate this year? Compared to last year? What are your recommendations for improving the situation?

Based on your experience this year, what would you say are the strengths of the program? The areas in need of improvement?

What do you think is the unique contribution of Project Specialists to the program? What facets of their work should be emphasized more? Should be deemphasized?

What changes have you made in the program this year? Now I'd like to ask you about your recommendations for the program next year. What would you recommend changing? What plans have been made in this direction thus far?

The last question is intentionally vague so that you can respond in any way that makes sense to you. What difference has this program made to AISD overall? In other words, if you were asked to report to the School Board regarding continuation of the alternative school concept, what would you tell them about Rice's contributions and value?

Surveys

Procedure

Student Survey. About one-third of Rice high school students (N=21) were surveyed in November, 1988, as part of the annual district-wide student survey. A response summary for each of the five questions appears in Attachment J-1.

Employee Survey. Four questions about Rice Secondary School (the School-Community Guidance Center) were included in the spring employee survey of AISD professionals, administrators, and teachers. Valid return rates varied from 67% to 92%. Results are presented in Attachment J-2.

SCGC
APPENDIX K
Summer School

APPENDIX K
Summer School

Procedure

The number of Project Specialists hired for summer school varies each year according to the level of funding available. Usually there are at least three; one person is assigned to Gardner House, and two to summer school campuses. For 1988-89, Project Specialists served at Martin Junior High, Austin High School, and Gardner House.

At the beginning of summer school, each Project Specialist received a set of activity logs (see Attachment K-1) with a cover memo explaining how to use them (see Attachment K-2). The log format was created by the SCGC programmer using SW\$SSLOG in library ORSDIS (see Attachment K-3). Program SW\$SSFIL created the data file (SW@SS89) by transferring student names, ID numbers, sex, and ethnicity from the District's summer school enrollment roster; it is included as Attachment K-4. At the end of the summer, the codes for each student were totalled, then manually entered into the data file.

THROUGH: Nancy Baenen *NB*

SUBJECT: Summer School Activity Logs

As a School Community Guidance Center Project Specialist, you are required to furnish the Office of Research and Evaluation with information about each student you have contact with this summer.

You are required to record grade, ethnicity, sex and home school for each student. It is suggested that the blocks for the first and second day be used to record grade and ethnicity. Each contact with a student and/or parent must be recorded. Please use the following codes:

- C = phone call to parents
- S = direct contact with student
- AV = home visit
- P = parent contact at school
- H = Hispanic
- B = Black
- O = Other

When you return the completed activity log at the end of the summer, please include a list of any additional codes used and an explanation for each.

We greatly appreciate your help and cooperation in keeping accurate records and meeting the objectives of this program. If you have any questions, please call me at 458-1227.

SCGC
APPENDIX L
Follow-Up

APPENDIX L

Follow-Up

Procedure

Disposition. When students exit Rice, either during or at the end of a semester, their status is coded in accordance with letter codes printed on page 2 of the SCGC Enrollment Checklist (APPENDIX B, Attachment B-4). This letter code is entered in column 66 of the SAS data file (see APPENDIX B, Attachment B-2).

12-Week Follow-Up. The SCGC grant from TEA requires that Project Specialists do a follow-up check on the status of all SCGC students 12 weeks after exiting Rice. Data is coded in accordance with disposition codes noted above, and entered as Follow-Up 1 (F_1), in column 67 of the SAS data file.

To expedite this process, which can be time consuming, the Evaluation Associate can do a preliminary sort of the student roster using program SB\$SCGC1 in library ORSLEP (see Attachment L-1). This program compares the Rice list with the Student Master File and determines which students are still active, have transferred, graduated, been expelled, or are status unknown. See Attachment L-2 for sample output. Project Specialists then check on those listed as "unknown" only.

Semester Follow-Ups. Program SB\$SCGC1 is used to determine student status at the end of each semester. Unless there is information to the contrary, all those listed as "unknown" are coded "K" for dropout. Codes for student status one semester after exiting Rice (F_2) are entered in column 68. The one-year follow-up code goes in column 69; the three-semester follow-up is entered in column 70, and so on.

It is important to note that in order to continue expanding the follow-up data base, the Evaluation Associate must code the follow-up status of each group (each one-semester data file) of Rice students each semester.

Program SB\$SCGC3 takes a closer look at those students classified as dropouts (see Attachment L-3). It checks the attendance roster against location and prints out the following lists:

- Summer Dropouts
- School-Year Dropouts
- Rice Dropouts
- Home School Dropouts.

217

Data Analysis. SAS program SW\$FROG2 (library ORSSAS) provides frequencies of dispositions and follow-up codes by other variables of interest. See Attachment L-4 and Figures 21 and 23 in the Final Report (ORE Pub. No. 88.24).
