ABSTRACT

Database documentation is provided for users of a data file consisting of a directory of all main public libraries in the United States. The directory development survey began with the mailing of a computer printout containing listings of each state's public libraries to the chief officer of the appropriate state library agency for updating. A computer tape was developed from the responses. Various other updating measures were taken, and the updated 1981 file was compared to the 1977 Public Library Universe to allow further adjustments. Significant variables include name, address, population served, and the name of the chief state library officer. Each record in the data file describes one library or the chief state library officer. The database documentation includes a survey summary, file description, record layout charts, data element descriptions, an outline of the survey methodology, a list of state codes, code identifications, and several frequency tables. Survey Methodology

1. A computer printout of each States public libraries was sent to the Chief Officers of the respective State Library Agencies for updating by personnel of the State Library Agencies.
2. The changes indicated on the printouts were keyed onto tapes/disks.
3. Deletions and additions were transcribed to a form suitable to be keyed from, and were keyed to tapes/disks.
4. The keyed data was printed and visually verified.
5. Corrections to detected keying errors were keyed, placed on tapes/disks, printed and reviewed for accuracy.
6. The additions, changes and deletions were applied to the Universe from the previous survey.
7. The SMSA's and the Central City Place Description recode (CYCD) were updated/developed using (a) the tape version of the fourth update of the FIPS Publication 55 - (Codes for Named Populated Places, Primary County Divisions and other Locational Entities of the U.S.) and (b) a list from the Statistical Reporter entitled "Titles and Definitions of the Standard Metropolitan Statistical Areas".
8. The updated 1981 file was compared to the 1977 Public Library Universe and the differences found in the SMSA's and CYCD were evaluated and adjusted as required.
