ABSTRACT

This document reports the findings of the 1989-90 process evaluation of the Saginaw, Michigan school district's state-funded prekindergarten program for 4-year-olds at risk of academic failure. As of January 29, 1990, a total of 255 pupils were participating in the program at 11 sites. The Michigan Early Childhood Education Preschool (MECEP) program is based on the Piagetian concept that a child best develops intellectually in a stimulating environment that provides positive reinforcement for experimenting, seeking and attaining knowledge, acquiring language, and developing concepts. For evaluation purposes, half-day observations were made of the program's 10 prekindergarten teachers. The MECEP Program Activity Observation Checklist and Associated Language Observation Instrument were used. Observations were intended to determine whether program activities related directly to cognitive, psychomotor, parent participation and education product objectives. While the observations indicated that the program was operating as planned, they also revealed areas that could be improved. Recommendations for improvement are stated. Appendices provide a list of participants, a list of MECEP program components and objectives, the instruments used, and a count of teachers' use of language production and enhancement techniques. INTRODUCTION

This is the second year the School District of the City of Saginaw has operated a state funded prekindergarten program for "at risk" four year old children. The District has operated for the past nineteen years a federally funded (Chapter 1 of the Educational Consolidation and Improvement Act) pre-kindergarten program for children coming from the inner city. Thus Saginaw is no stranger to prekindergarten programming and the two programs are essentially the same except for funding source and the process to identify eligible four year olds.

The factors which place four year olds "at risk" of becoming educationally disadvantaged are essential to the identification of those to be included in the Michigan Early Childhood Education Preschool (MECEP) program. Four year olds selected for participation in MECEP must have shown one or more of the following "at risk" factors:

Screening Device (PRSD); low birth weight; physical and/or sexual abuse and neglect; nutritionally deficient; developmentally delayed; long-term or chronic illness; diagnosed handicapping condition (mainstreamed); lack of a stable support system or residence; destructive or violent temperament; substance abuse or addiction; language deficiency or immaturity; non-English or limited English speaking household; family history of low school achievement or dropout; family history of delinquency; family history of diagnosed family problems; low parental/sibling educational attainment or illiteracy; single parent; unemployed parent/parents; low family income; parental loss by divorce or death; teenage parent; chronically ill parent: physical, mental or emotional; incarcerated parent; housing in rural or segregated area; and rural or isolated setting.*

⁽From 1989-90 Application For State Allocation Grant, Early Childhood Education Program, page 11 with local criteria of PRSD added as suggested.)

An accounting of this year's MECEP participants shows that as of January 29, 1990 a total of 255 pupils were attending one of eleven sites (see Appendix A for details).

The MECEP operated at eleven elementary sites: Fuerbringer (p.m. only), Handley (p.m. only), Herig, Jerome, Kempton, Longstreet (a.m. only), Merrill Park, John Moore/First Presbyterian, Morley (p.m. only), Webber (p.m. only), and Zilwaukee (a.m. only). There were five MECEP sites last year. The opening of six new sites made this a difficult start up semester for the program supervisor. However, the program has a well established set of procedures that guides the MECEP program's operation in Saginaw.

The MECEP program is based upon the Piagetian concept that a child best develops intellectually in a stimulating environment. Preschoolers are provided with an environment in which they receive positive reinforcement for reaching out, experimenting, seeking, and attaining new knowledge. Free and structured experimentation with common objects provide learners with information and a repertoire of actions on objects that enable them to explore the properties of unfamiliar things. Manipulative materials provide children with many problem-colving developmental activities. The daily schedule includes experiences in the areas of affective, fine and gross motor skills, physical and social knowledge, and parent participation.

Language and concept development is constantly encouraged and reinforced. The school environment is characterized by: consistency, behavior modification, interest centers, decision-making on the part of the students, and pupil participation with freedom and responsibility.

The overall goal of the program is to provide four year olds with an environment that will enable them to develop school readiness skills. There are seven program component areas: cognitive, psychomotor, affective, parent participation/education, curriculum, staff development, and community collaboration/participation components (see Appendix B for the objectives in each component).

PROCEDURES FOR PROCESS EVALUATION

A process evaluation involves monitoring a program throughout the year to determine if the program is being implemented as planned. This makes it possible to identify strengths and weaknesses that might influence program outcomes. For this program the process evaluation was accomplished by means of an on-site observation of classrooms by the evaluators.

The observation instrument (see Appendix C for copy) was designed jointly by the evaluator and program supervisor. The checklist portion of the instrument dealt with the cognitive, psychomotor, and parent participation/education components of the MECEP program. The two questions that follow the checklist centered upon language development related to objects labeled in the room and teacher behaviors to increase language production of pupils for each 30 minute block of time during the half-day observation.

PRESENTATION AND ANALYSIS OF PROCESS DATA

Half-day observations were conducted by four program evaluators. Every prekindergarten teacher (N = 10) was observed. The MECEP Program Activity

Observation Checklist and Associated Language Observation Instrument, (see Appendix B) was the instrument used for the observations. The primary focus of the observations was to determine if program activities related directly to cognitive, psychomotor, and parent participation/education product objectives were being provided. The other focus of the observations was the two language observational items related to labels on objects and language production/enhancement techniques employed by the preschool teachers.

Classrooms were observed between January 17-31, 1990.

Each evaluator spent an average of 167.5 minutes observing in each classroom. There were between 10 to 19 pupils in attendance per classroom observed
with the modal number of children being 15. Seven of the ten rooms (70.0%)
had at least one parent helping out in the classroom and two rooms had two
parents acting as helpers. The tabulated results are presented below.

Cognitive, Psychomotor, and Parent Participation/Education Component Results

Table I below presents the observational data related to cognitive, psychomotor, and parent participation/education activities by component and objective.

TABLE 1. NUMBER AND PERCENT OF CLASSROOMS DISPLAYING ACTIVITIES RELATED TO COGNITIVE, PSYCHOMOTOR, AND PARENT PARTICIPATION OBJECTIVES OF THE MECEP PROGRAM, JANUARY, 1990.

Component	Object ive Number	MECEP Objectives	Teacher Conducting	Percent Of s (N=10) Activities Each Objective Z
Cognitive	ì	Properties of Object; i.e., shape color, hardness (five senses)*	10	100.0
	2	Social Knowledge (i.e., work roles)	8	80.0
	3	Grouping and Regrouping (i.e., classification)*	6	60.0**
	3	One-to-One Comparison (i.e., mathing, pouring, getting coats, rearranging collections) [Subskill of 3]	10	100.0
	4	Transitive Relations (i.e., length height, weight, shades, hardness)	9	90.0
	5	Temporal Ordering of Events	9	90.0
	6	Expressive Language: Labeling (i.e., will name various objects room, in a picture, etc.)	9	90.0
	7	Expressive Language: Mean Length of Utterance (i.e., encourage, completeness of sentences, length, etc.)	9	90.0
	8	Expressive Language: Semantics (i.e., descriptors, modifiers, etc.)	4	40.0
	9	Expressive Language: Plot Extension (i.e., predictions, cause and effect, conclusions)	7	70.0
Ps ychomo tor	10	Eye-Hand Coordination (Gross and Fine Motor and Manipulative)*	10	100.0
	11	Linear Order (i.e., straight lines, counting)	8	80.0
	12	Copying Specific Shapes (i.e., cut- ting, pantomine, drawing)	10	100.0
	13	Gross Motor Coordination*	10	100.0
Parent Participation/ Education	14-16	Record of Parental Participation Being Maintained	10	100.0

^{*}These activities are to take place daily in all classrooms.

^{**}Activities for this objective were those that required classification on one criterion and then using the same objects and shifting to a second criterion. The number and percentage would have been higher if classification on a single criterion would have been the standard.

As can be seen in Table 1 above, the following points can be made:

- Grouping and regrouping activities were observed in 60.0% of the classrooms rather than in all of them as called for in the program description.
- All classrooms (100%) carried out activities during the observations related to objectives I subskill of 3, 10, 12, and 13. Of these only objectives I (properties of objects), 10 (eye-hand coordination), and 13 (gross motor coordination) were specified in the program description as occurring on a daily basis as the observations verified.
- Of the remaining cognitive & nd psychomotor activities, objectives 8 and 9 had 40% and 70% of occurrence respectively.
- An up-to-date record of parental participation in the form of wall charts were observed in all eleven (100%) classrooms.

Language Development

The MECEP program also has a strong emphasis on increasing language production of preschoolers as well as displaying words throughout the classrooms to generate interest in and recognition of words and concepts. The last two items of the observation instrument dealt specifically with these issues. The items and the observational findings related to each are presented below.

Following these findings a short discussion will highlight significant conclusions stemming from a review of each.

7

Results to Language Development Items.

1. Are labels posted on objects throughout the classroom?

	Number	Percent
No	1	10.0%

- Limits of range of objects labeled = 0 to 49/
- -- Average number of objects labeled in the nine of ten classrooms = 25.6.
- -- Median number of objects labeled in all ten classrooms = 29.
- Tally the number of times the following language production techniques were employed by the teacher for each 30-minute period.

Tables 2 and 3 below present the data by average and lowest/highest number of times respectively for the first five 30-minute blocks of time during the observation period. The sixth block of time was excluded because of variations in length of this last time block. The actual number of times language production/enhancement techniques were employed by site can be found in Appendix D.

TABLE 2. AVERAGE NUMBER OF TIMES TEACHERS EMPLOYED EACH LANGUAGE PRODUCTION/ENHANCEMENT TECHNIQUE BY TIME PERIOD AND TOTAL CLASSROOM OBSERVATION.

Observational Summary of Language Items

A study of the language development data presented above identifies a number of possible major findings. These findings include the following:

- Nine of the ten (90.0%) have labels posted on objects throughout the room (approximately 25 per classroom) where present.
- There does not appear to be a common set of labeled objects in the ten classrooms using the labels. If we include any labels in seven or eight rooms, then the common set includes two items (i.e., window and door).
- Teachers employed a variety of language production/ enhancement techniques to encourage children to talk more. Some intereting points relative to these techniques included:
 - Closed-ended questions are used approximately 72% of the time while open-ended questions are used approximately 44% of the time.
 - Restatement with extension accounted for approximately 43% and restatement of the exact statement accounted for the remaining 57% of all restatements of student produced responses by preschool teachers.
 - There was a wide variation between teachers in the frequency with which they employed language production/enhancement techniques (i.e., low total of 48/34 and high total of 164/97 respectively).

General Observations

There appears to be wide variation in the operation of the daily classroom schedule related to how pupils move from center to center. At some sites
there appeared to be a defined pupil rotation system from center to center
which gave all preschoolers a chance to experience each center. While at
other sites there seems to be no obvious system of rotation which is more in
line with the MECEP guidelines.

11

SUMMARY

The Michigan Early Childhood Education Preschool (MECEP) program operated in eleven buildings. This is the second year the School District of the City of Saginaw has operated the state funded MECEP program for "at risk" four year old children. As of the end of January, 1990 the program was serving 255 pupils based on various "at risk" factors (see Appendix A for counts by building).

The process evaluation activities consisted of an on-site half-day classroom observation at each of the eleven sites. The observation instrument
focused on cognitive, psychomotor, parent participation/education, language
development, and scheduling activities in the classrooms.

The observations of the classroom revealed the following: 1) activities to meet the objectives which are proposed to occur daily were taking place in all classrooms except for grouping and regrouping (objective 3); 2) a record of parent participation was being maintained in all eleven of the classroom sites; 3) labels were posted on objects throughout the classrooms to assist in word recognition; 4) teachers were employing language production/enhancement techniques but the frequency by teachers varied greatly; and 5) a wide variation in methods used to schedule center to center free play was observed.

Overall, the program is operating as planned, however, there are some areas that can be improved. Therefore, the following section presents recommendations which will help refine the MECEP program in Saginaw.

RECOMMENDATIONS

Based upon the results of the on-site classroom observations and a review of the MECEP proposal, the following recommendations are suggested to improve the operation of the MECEP program in the future.

- Activities to meet objective 3 (grouping and regrouping)
 were observed in 60.0% of the classrooms. If this objective is to involve only grouping (classification by a
 single criterion) then the objective should be renamed
 and this adjustment made clear in the program proposal.
- Determine a common set of labels for teachers to use to name objects in their rooms so there will be more consistency between sites.
- Mased on the large differences between teachers in using language production/enhancement techniques with children, an expectation of the frequency of their use needs to be communicated to staff. Further supervision and inservice training may be called for if these expectations cannot be reached.
- The frequency of closed- to open-ended questions (approximately 60/40) seems reasonable. An inservice on how to better phrase open-ended questions may be warranted.
- Because of the frequent turnover of staff, possible expansion of the program in the future, and the increasing soph tication of the preschool program, a training manual a video needs to be developed that spells out common de eschool practices and procedures.

(New for Classroom Activity Observation Checklist)

MECEP --- PRESCHOOL

Example of Preschool Activities According to Product and Process Objectives

Type of Activity	Activity	Examples
Objective 1 - Physical Knowledge: Properties of and Appropriate Behavior for Exploring Pro- perties of an Object (Shape, color, hard- ness-using the five senses. Changing shades, measuring weighing.)	-Making apple sauce, soups, cookies, etcSmelling and handling Fruits and vegetables -Sawing wood -Tinkertoys -Sand paper activities -Feeling activities -Feeling activities -Snacks(mixtures) -Snow experiments -Bubble blowing -Straw painting -Furry and other textured toys -Fast and slow inclined plane	-Paper mache -Growing plants from seeds -Cutting -Freezing -Heating -Rolling -Twisting -Frosting -Jello -Butter -Cakes -Paint mixing -Sinking and floating -Color macaroni -Play dough
Objective 2 - Social Knowledge: (World of work and roles of workers)	-Books -Field trips -Films -Visitors -Role-playing -Helpers in the room	-Community*workers -School workers -Visiting patrolmen -Postman
Objective 3 - One Criterion Classification: Shifting to a Second Criterion Among an Array of Objects (grouping shifting from one criterion to another).	-Colorblocks -Shape -Size -Texture -Tone -Utility -Smell -Taste -Calendar	-Sorting -Attendancenumber of girls -Attendancenumber of boys -Putting toys away -Doll house -Doll dishes
Sub Skill for Objective 3 - Conservation of Number by One-to- One Comparison (gross comparison between collections; comparisons by one- to-one correspondence)	-Collectionsrearrange- ment of -Lunch activities -Setting table -Matching -Colendar -Pausing anything -Weather	-Getting coats -Right boot -Pouring activities

(MECEP -- PRESCHOOL Cont.)

Type of Activity	Activity Examples	
Objective 4 - Seriation: Relations Among Transitive Relation- ships (seriation- comparing and arranging things according to a given dimension by transitive relations)	-Length -Reight -Weight -Shades of color -Hardness -Softness -Cuisenaire rods -Block tower building -Texture activities	
Objective 5 - Temporal Ordering: of Three or Four Events (Structuring Time)	-Show and tell -Storybook -Role-playing -Science experiments -Calendar -Preparation art, lunch, cleanup home bound	-Growth stages -Finger plays -Farmer in the Dell -Audio-visual materials
Objective 6 - Expressive Language: Labeling	-Naming pictures in storybook -Naming items in catalogues -Naming objects in house -Naming items in classroom	
Objective 7 - Expressive Language: MLU (Mean Length of Utterance)	-Retelling a story -Expounding child's sentence (i.e., apple-eat apple- I eat apple-I eat an apple	
Objective 8 - Expressive Language: Semantics	-Flannel board stories -Language stories -Emphasizing specific -Grammatical structures: such as ing, past tense, personal pronouns and copulas (verb "to be") and descriptors	
Objective 9 - Expressive Language: Plot Extension	-Completing unfinished sentence -Adding endings to stories -Drawing inferences	

(MECEP -- PRESCHOOL Cont.)

Type of Activity	Activity Examples						
Objective 10 - Fine Motor Activities: Eye-Hand Coordination (use of classroom tools and materials- cutting, pasting, tearing)	-Ark work -Writing on the board -Finger painting -Folding -Folding -Stirring pudding -Pegboards -Pouring -Geoboards -Fuzzles -Cuisenaire rods -Sorting beads and buttons -TRY -Building blocks	-Lacing -Weaving -Chalkboards -Flannel boards -Clay -Sand box -Water play -Spreading peanut butter -Coatsbutton and zippers -Clean up time -Finger plays -Using musical instruments					
Objective 11 - Topological Relation- ships Concerning Linear Order (Structure of Space)	-Gamesstraight line -Role-playing -Manipulation of Object (rods, blocks, toys) -Poetry -Prose	-Counting days till -Finger plays -Bear hunt -AAA -Ten Little Indians					
Objective 12 - Copying of Specific Shapes	-Line drawings -Sand drawing -Paper cutting -Cookie cutting with clay -"Simon Says" -Tracing -Rubbing	-Pegboards -Geoboards -TRY -Writing chalkboard -Directed copying activity -PantomineExercises					
Objective 13 - Gross Motor Coordination: (large body movements, climbing, walking, rolling)	-Rhythms -Dancing -Jungle gym -Free play activities -Balance beam -Matstumbling -Play all equipment -Jumping jiminy -Jump rolesforming circles with activities -Jumping Jacks -Duck Duck Goose -Squirrel in tree	-Johnny works with one hammer -Bear hunt -Acting out Mother Goose rhyme -Rhythm Estamae -Dodge ball -Balls and skateboard -Play house -Roller skates -Snowman activities -Up the steps
