ABSTRACT

The Hispanic Association of Colleges and Universities (HACU) is a national association representing two- and four-year colleges and universities in the United States and Puerto Rico where Hispanic students constitute at least 25% of the total student enrollment. Following a brief introduction and letters from the HACU chair and president, this eight-part report provides a status report on Hispanics in higher education and the institutions that serve them. Section I reviews specific HACU activities conducted over the last year in the areas of becoming a referral service for member colleges, promoting programs that target resources to member institutions, conducting seminars and workshops on Hispanic-specific topics, promoting public policy initiatives at the federal level, and engaging in special projects to improve the educational success rates of Hispanics in higher education. Section II provides an overview of Hispanics in higher education, examining high school completion rates, undergraduate and graduate enrollments, total bachelor's and doctoral degrees awarded, and degrees awarded in selected fields, and Hispanic employment in higher education. Section III profiles Hispanic-serving institutions of higher education, defined as those non-profit colleges and universities with a Hispanic enrollment of at least 25%. This section reviews geographic distribution and type of control of these institutions, enrollments, and majors offered. Sections IV through VIII provide a directory of Hispanic-serving organizations, the names and affiliations of HACU's 1989-90 Board of Director's Executive Committee, an outline of corporate and foundation support, and a financial statement for the fiscal years 1988 and 1989. Data tables are included. (PAA)

The Hispanic Association of Colleges and Universities (HACU) wishes to thank the American Council on Education for the use of its data on Hispanic participation in higher education.

Foreword

The Hispanic Association of Colleges and Universities (HACU) is a national association representing the colleges and universities in the United States where Hispanic students constitute at least 25 percent of the total student enrollment. HACU's goal is to bring together colleges and universities, schools, corporations, governmental agencies and individuals to establish partnerships for:

- promoting the development of Hispanic-serving colleges and universities;
- improving access to and the quality of postsecondary educational opportunities for Hispanic students; and
- meeting the needs of business, industry and government through the development and sharing of resources, information and expertise.

In 1990, HACU identified 112 regionally accredited, nonprofit Hispanic-serving institutions (HSIs) that met the minimum 25 percent Hispanic student enrollment criterion for membership. Those colleges and universities, located in nine states and Puerto Rico, enrolled approximately 45 percent of all the Hispanic college students in the United States.

Associate members meet all the institutional membership criteria, except for the 25 percent Hispanic student enrollment requirement. Organizations demonstrating a strong commitment to the improvement of educational opportunities for Hispanics also may join the Association.

From the Chairperson of the Board of Directors

Raul Cardenas
President, South Mountain
Community College
Phoenix, Arizona

When I was elected chairperson of the Hispanic Association of Colleges and Universities in Phoenix in September 1989 at the third annual meeting, I was well aware of both the accomplishments of HACU and the hard work that lay ahead. I had been a HACU officer-at-large since the Association was founded in 1986.

My reasons at that time for involving South Mountain Community College, where I am president, in HACU were simple: the overwhelming importance of the education of Hispanics to the future of our nation, and the lack of attention paid at the national level to the needs of our students and of Hispanic-serving institutions.

Today, more than ever, I am convinced that HACU has become the voice for Hispanic higher education in this country. In just a few years, this Association has gained access to the decision-making process regarding higher education issues.

As chairperson, I am building on the excellent foundation laid by my predecessor, Gilbert Sanchez, president of New Mexico Highlands University. The HACU agenda in 1990 has included a much greater involvement in those public policy issues that impact our students and

our institutions. The HACU executive committee is committed and dedicated to positioning the Association for the national education agendas of the 1990s.

In the years to come, the Association will continue to assess national education trends as they affect HACU institutions, to identify sources of support, to conduct seminars on Hispanic education-related topics, and to pilot and implement projects such as the Hispanic Student Success Program, now a national program. We will emphasize member participation in activities even more than before.

HACU will become an even stronger national higher education association as the colleges and universities eligible for membership continue to realize the importance of joining together to ensure that Hispanic educational needs are represented to government agencies, corporations and foundations. With your help and support and with the appropriate funding, I believe we can accomplish our goals.

BEST COPY AVAILABLE

From the HACU President

HACU's progress since the publication of the triennial report in September 1989 has been extremely impressive. The Association is now poised to expand even further its leadership role on behalf of postsecondary Hispanic students and of Hispanic-serving colleges and universities.

In the four years since its founding, HACU has become the recognized voice in Washington on matters related to Hispanic higher education. The Association this year has signed historic agreements that will target federal resources to our member institutions: with the Office of Personnel Management on May 15, 1990, and with the departments of Agriculture and the Interior on June 4, 1990. Additional Memorandums of Understanding with other federal agencies and departments are likely to follow in the next 12 months.

The HACU governing board periodically scrutinizes the Association's varied functions — designing and implementing projects that link precollegiate educational systems with Hispanic-serving colleges and universities, conducting seminars

and conferences on Hispanic-specific issues, advancing the member institutions' public policy agenda, and communicating effectively with the Association's various publics. The most recent strategic planning retreat of the Executive Committee of HACU's Board of Directors (June 1-3, 1990) resulted in a reaffirmation of the Association's mission and purpose and in the drafting of specific goals and objectives that will guide HACU's work over the next 36 to 48 months. The full Board of Directors will consider these statements in Chicago at the Association's fourth annual meeting, Sept. 23-25, 1990.

The involvement of HACU's membership in the Association's governance and the continuing support of HACU's many friends in the private and public sectors account, to a large extent, for HACU's success, for its sound financial position, and for its ability to look toward the future with confidence and great anticipation. We particularly wish to thank our 1990 corporate and foundation contributors (listed on page 39) for their faith in HACU and for their recognition of the importance of the Association's goals.

HACU's staff members look forward to working with the member institutions and with the Association's friends to continue to represent the interests of Hispanic students and the colleges and universities that educate them.

Antonio Rigual

Report of the Hispanic Association of Colleges and Universities September 1990

Introduction

This report concerns the activities of the Hispanic Association of Colleges and Universities (HACU) since the third annual meeting, held in September 1989 in Phoenix, Ariz.

HACU's strength as a national higher education association is largely dependent on its membership. In the past year HACU was able to advocate effectively on behalf of the colleges and universities that are eligible for membership because of the broad-based participation of these institutions in the Association.

In an effort to seek member input for charting future initiatives, HACU began conducting regional meetings for institutional and associate member colleges and universities in December 1989. The regional meetings, held in New York on Dec. 5, 1989; Chicago on Feb. 7; Miami on Feb. 16; Albuquerque, N.M., on March 6; and Los Angeles on April 9, also were designed as a way to acquaint the members with HACU's 1990 plan of work. Other HACU regional meetings are planned for San Antonio and Puerto Rico in 1991.

Membership in HACU has grown because the presidents of significantly Hispanic colleges and universities realize that their Hispanic students have special educational needs and that HACU has become the organization that can best assist in representing those needs to government agencies, corporations and foundations.

In the past year, HACU has focused on five major areas:

- Highlighting the member colleges and universities
- promoting the establishment of programs that target resources to member institutions
- conducting a series of seminars and workshops on Hispanic-specific topics
- implementing public policy initiatives at the federal level
- engaging in special projects aimed at improving the higher education participation and success rates of Hispanics

Highlighting Member Colleges and Universities

As HACU has increased its visibility at the national level, it has become a widely consulted resource on Hispanic postsecondary students and the institutions that serve them. The Association has been able to highlight the programs and services of the member institutions in a number of ways.

Response to Requests for Information

By the last few months of 1989, HACU was receiving several telephone calls per week soliciting information on programs offered by member institutions. In most cases these calls came from corporations or government agencies interested in recruiting Hispanic college graduates in certain academic majors. HACU provided them with computer-generated lists of member-eligible institutions offering degrees in those majors, as well as directory information and, where appropriate, names of placement officers at the institutions.

The September 1989 HACU triennial report included a first-time-ever-published matrix of degrees offered at HACU member-eligible institutions. This report has been distributed throughout the United States, to corporations, government agencies, foundations, non-HACU institutions, educational associations, high school students and the media.

Publicity

HACU also has promoted its member institutions during the past year through publicity efforts. A public information director was hired in 1989 to accomplish the vital linkage between HACU, its member institutions, and its other various constituents.

The quarterly HACU News contains information on special programs at HACU schools and accomplishments of faculty, staff and graduates; HACU member institutions were encouraged for the first time in 1989 to submit news items to the newsletter editor. "Member Profiles," feature stories in HACU News, gave the institutions a chance to "tell their stories." Copies of the newsletter were sent to reporters at the newspapers in the cities where the profiled schools are located.

National Hispanic publications such as Hispanic Magazine, Vista Magazine and the Hispanic Link Weekly Report called the HACU office in 1989 and 1990 for background information on HACU member institutions or for names of college and university officials to interview for stories on Hispanic higher education.

As a direct result of the presence of a writer from the Chronicle of Higher Education at the HACU 1989 annual meeting in

Phoenix in September, one of the HACU member institutions was featured in the paper.

A nationally televised Spanish-language program, "TV Mujer," based in Miami, also contacted HACU for the names of Spanish-speaking college financial aid officers who could be interviewed on the program; a representative from a HACU institution appeared on the show. In another case, HACU staff arranged for the Spanish-language network Galavisión to interview a HACU institution president, following his testimony to the U.S. Department of Education's public forum on Hispanic education in San Antonio.

HACU staff also provided the media with specific story ideas about member institutions. The national PBS television program "Heritage" featured a HACU community college because of that suggestion.

Presidents of HACU institutions also were quoted in news articles concerning the Memorandums of Understanding that HACU signed with the Department of the Interior and the Department of Agriculture on June 4 (see section on "Public Policy," p. 7.)

HSI Presentations and Testimony

In addition to inviting member institutions to attend Association seminars, HACU staff also included presentations from many of the schools on the agendas, giving them more exposure for their programs. Presidents of several member colleges and universities also made presentations about their institutions at the HACU third annual meeting in September 1989 in Phoenix.

At HACU's request, administrators of several member institutions testified at legislative hearings on behalf of Hispanic students and Hispanic-serving institutions in 1989 and 1990. (See section on "Legislation Efforts" or "Public Policy," p. 8).

Several presidents or other representatives of HACU institutions have testified about the needs of their schools and of Hispanic students at the U.S. Department of Education public forums on Hispanic education. The forums are a response to President Bush's December 1989 memo instructing Cavazos to form a Task Force on Hispanic Education.

Targeting Resources to HACU Institutions

HACU continued its efforts in 1989 and 1990 to form linkages between Hispanic-serving institutions and the public and private sectors.

Through a variety of activities, staff emphasized the academic and support programs, as well as the financial needs, of the colleges and universities that educate significant populations of Hispanic students.

In his visits to Washington, D.C., Cesar Trimble, HACU vice president, promoted partnerships for HACU institutions with government agencies such as the Department of the Interior, the Department of Agriculture, the Office of Personnel Management and the Environmental Protection Agency, similar to the agreements the historically Black colleges and universities have.

Federal departments became much more interested in late 1989 and the first part of 1990 in the work of the Association; they sent representatives to HACU seminars and the annual meeting, and frequently contacted the HACU office for information on the recruitment of Hispanic college graduates for the federal work force.

When Antonio Rigual, HACU president, visited corporations and foundations during the past year to discuss the Association, he pointed out possible matching interests between those funding sources and member schools. As a result, several corporations have expanded their recruitment efforts to include HACU institutions, and some direct financial support has been provided as an outgrowth of those relationships.

HACU joined several other Hispanic organizations in 1989 to obtain an Executive Order for Hispanic higher education that would direct federal agencies to target resources to Hispanic-serving colleges and universities. The HACU institutions enroll around 45 percent of all U.S. Hispanic college students. For the most part, these colleges and universities do not have abundant financial resources. They deserve an Executive Order such as that of the historically Black colleges and universities. Funds targeted to "low-wealth" Hispanic-serving institutions could be used to update science and computer laboratories, expand library collections, provide innovative tutoring and counseling services and develop new academic specializations. Although President George Bush has not chosen yet to issue the order, HACU will continue to work for such a directive.

In March 1990, HACU signed a two-year agreement of understanding with the Office of Personnel Management and National Image, Inc., to recruit more Hispanic students into careers with the federal government.

HACU also was able to secure two separate Memorandums of Understanding (MOUs), one with the Department of the Interior and one with the Department of Agriculture. Although the MOUs, which were signed on June 4 in Washington, D.C., do not specify a monetary amount to be distributed to member institutions, they do establish the framework for later targeting of resources for various kinds of recruitment and employment preparation programs. (See also "Public Policy" section of this report.)

Seminars and Workshops

In 1989 HACU began a series of seminars to provide member institutions and other interested groups with practical information on topics related to Hispanic students in higher education.

All the 1989 seminars were held in San Antonio. In 1990, seminars were scheduled in other cities throughout the country.

Increasing the Hispanic Transfer Rate

HACU sponsored a seminar on "Improving Transfer Opportunities for Hispanic Community/Junior College Students" on Dec. 8-9, 1989.

Community colleges provide an important start on a college education for Hispanics; around 55 percent of all Hispanic college students are enrolled at two-year schools. However, most Hispanic community college students do not continue their educations past the two-year level.

One of HACU's goals is to increase the Hispanic student transfer rate to four-year colleges and universities so that more Hispanics graduate from college. Otherwise, Hispanic students will continue to "short circuit" their educational, social and economic potential.

Some 70 educators from throughout the United States attended the seminar, which focused on the critical issues related to the success of Hispanic students at community colleges, as well as the establishment of academic linkages between two- and four-year colleges. Seminar topics included student demographics, effective developmental and retention programs, recruiting transfer students, summer honors programs and joint admissions projects.

Recruiting Hispanics into the Federal Government

HACU's March 14-15, 1990, conference on "Recruiting Hispanic College Graduates for the Federal Work Force" in Washington, D.C., drew some 140 participants to hear presentations from government and the private sector on Hispanic demographic data, strategies for overcoming Hispanic underrepresentation in the federal work force, and cultural factors that may influence the employment decisions of Hispanic college graduates. Participants also received an update on current Hispanic education initiatives and HACU's involvement in them.

Precollegiate Programs for Hispanic Students

HACU's May 4-5, 1990, seminar on "Model Precollegiate Programs for Hispanic Students," held in Los Angeles, attracted 45 administrators of institutions of

higher education and of school districts. The seminar highlighted some 13 precollegiate programs operated in conjunction with colleges and universities from throughout the nation. Participants learned about effective techniques to improve the high school graduation rates of Hispanic students, their academic preparation and their college attendance patterns.

Third Annual Meeting

"Hispanic education issues rapidly are becoming the cornerstone of a sound social and economic future for this country," said Antonio Rigual, president of HACU. "The HACU third annual meeting heightened interest among our member institutions in participating at the highest level in decisions regarding Hispanic education."

Attendance at the meeting, held Sept. 24-26, 1989, in Phoenix, Ariz., was the highest in the Association's three-year history. The approximately 200 participants represented member colleges and universities, corporations, government agencies, and educational associations.

"Basically, the meeting evolved into a definition of HACU institutions — how these institutions see themselves — and how that identity is communicated at the federal level, to funding sources, to internal constituencies, or to their own communities," HACU President Rigual explained.

The third annual HACU meeting probably was the most successful so far in terms of participant involvement. "That's what sets HACU apart — that concern among our member institutions for changing the condition of Hispanic higher education so that we can impact the nation's future," added Rigual.

Public Policy

Public policy occupied an even higher priority in HACU activities in late 1989 and 1990, with the establishment of phase one of a public policy information and education agenda.

Because of a HACU membership directive to become more active in the development and implementation of public policy, in 1989 Cesar Trimble, HACU vice president, began to spend at least one week of each month in Washington, D.C., to increase the awareness of federal legislators and agency officials about the needs of Hispanic students and the institutions that serve them. His task was to build networks of support for HACU issues and to monitor legislation on education policies that could have an impact on HACU member institutions.

Partnerships form the basis of the public policy agenda. For example, several Hispanic organizations such as LULAC, the National Council of La Raza, and ASPIRA, joined with HACU to support the concept of a Hispanic education Executive Order that would be signed by President George Bush. Such an order would direct federal agencies to allocate grants and contracts to significantly Hispanic institutions.

HACU's relationships with federal agencies have been very fruitful in the last year. The Association formed a partnership with the Office of Personnel Management (OPM) and National Image, Inc. to recruit more Hispanic students into careers with the federal government. Representatives from the three groups signed a two-year agreement of mutual understanding on March 15, 1990, in Washington, D.C., at OPM.

Memorandums of Understanding

On June 4, 1990, at a ceremony at the Department of the Interior in Washington, D.C., HACU signed

Memorandums of Understanding (MOUs) with the Department of the Interior and the Department of Agriculture. The MOUs established a Hispanic-Serving Institutions Partners Program within the two agencies to improve recruitment and employment opportunities for students from HACU member institutions.

"We must take every step possible to ensure that the full potential of all Americans is developed, so that we can successfully meet the complex challenges of the 21st century," said Secretary of the Interior Manuel Lujan Jr.

Under the terms of the MOUs, the Department of the Interior and the Department of Agriculture will provide information concerning employment needs; assist HACU and its institutions in developing career-training programs and relevant curricula; participate in Interagency Personnel Agreements

(executives- and faculty-on-loan); and conduct career fairs and other recruitment activities.

"This Memorandum of Understanding demonstrates our commitment to the development of activities that will lead to a greater participation of Hispanic students in federal programs and activities," said Secretary of Agriculture Clayton Yeutter.

The MOUs provide for committees to advise the two federal agencies and HACU. The committees will make recommendations on policies, procedures, programs and services to improve the scope and quality of educational programs and career-related activities.

The Memorandums of Understanding represent a historic cooperative effort between the federal government and HACU institutions. HACU believes the Hispanic-Serving Institutions Partners Program will have a positive impact on the ability of member institutions to teach and train Hispanics so they can help the United States advance and prosper in the 21st century. As the number of Hispanics in the work force increases, the federal government should set an example for the rest of the nation in establishing programs to train, educate, recruit, and hire Hispanics. In the very near future, the credential for employment success in this country will be a college degree, at minimum, and some specialized training or education beyond that.

"The job safety net of a high school diploma is now so tattered, those who jump into it almost always hit bottom," said HACU President Rigual. "We commend the departments of the Interior and Agriculture for their leadership in preparing Hispanics for the future and we challenge other federal agencies to follow their actions."

"Because most Hispanics are products of low-wealth environments, resources are of key importance in meeting the work-force requirements of the nation in the 21st century and in improving the educational success rates of Hispanic youth," said Cesar Trimble, HACU vice president. "The departments of the Interior and Agriculture have set an example of what can be accomplished by people of vision."

Legislative Efforts

On the legislative side, HACU has continued to supply information to legislators considering bills that would affect Hispanics in higher education.

Presidents of two HACU institutions testified before separate House Education and Labor Committee hearings in March 1990, indicating their support of committee chair Augustus F. Hawkins' (D-Calif.) bill, H.R. 4130, the "Twenty-First Century Teachers Act."

Raul Cardenas, president of South Mountain Community College in Phoenix, Ariz., and chairperson of the HACU board of directors, testified on March 3 at a hearing in Los Angeles. Connie Valdez, president of Northern New Mexico Community College in Española, N.M., testified in Washington, D.C., on March 15.

H.R. 4130 provides financial aid for students who choose teaching careers, loan forgiveness to graduates who teach in designated schools, resources to institutions of higher education to recruit and retain students who pursue teaching careers, and funds for arrangements between institutions of higher education and local education agencies to develop school reform programs.

"Teacher shortages are particularly acute in areas with large numbers of Hispanic students," Cardenas said in his testimony.

"With increasing numbers of Hispanic students entering the nation's schools, it is critical that more Hispanic teachers be trained and recruited. The emphasis throughout the bill on serving minority students and on recruiting and retaining minority teachers is a significant step toward bringing Hispanic students into the mainstream of the American educational system," he said.

Rep. Hawkins, in his introduction to the March 15 hearing of the committee in Washington, D.C., mentioned having received comment on the bill from HACU at the March 3 Los Angeles session.

"The growing number of Hispanic students requires that more Hispanics be recruited and trained as teachers," Connie Valdez testified at the Washington hearing on the bill. "Since a large percentage of these students attend Hispanic-serving institutions, the targeting of HSIs, as H.R. 4130 does, is a positive step toward solving the teacher shortage and improving educational attainment levels of Hispanics."

As other bills that affect Hispanic students are introduced in Congress, HACU will call on more member institutions' presidents to provide testimony on behalf of Hispanic-serving colleges and universities.

Reauthorization of the Higher Education Act

The reauthorization of the Higher Education Act (HEA) also is one of HACU's priorities. During 1989 the Association established two ad hoc committees to provide advice on HACU's role in the reauthorization process — one on the HEA as a whole and one on Title IV student financial aid.

HACU had an opportunity to present some of the suggestions of the financial aid task force at the federal level on Nov. 21, 1989, when Cesar Trimble, HACU vice president, testified at a U.S. Department of Education hearing in Washington, D.C., on the

reauthorization. Several federal financial aid programs should be modified in the reauthorization of the Higher Education Act to improve higher educational opportunities for Hispanics, he said.

Speaking on behalf of HACU and its member institutions, Trimble recommended that: (1) the Pell Grant program be made an entitlement targeted to needy first- and second-year college students, (2) the Income Contingent Loans be eliminated, and (3) the needs analysis forms for financial aid be simplified.

"HACU recommends that a system be designed to allow a student whose family is already receiving some type of federal assistance to be eligible automatically for Title IV student financial assistance," he said. In addition, he recommended that the TRIO outreach programs (Talent Search, Upward Bound and Educational Opportunity Centers) of Title IV be expanded to include sixth-to-ninth grade students.

He also mentioned the importance of Title III (Institutional Aid) to Hispanic-serving institutions.

Special Projects

Transfer Collaboratives

Around 55 percent of all Hispanic college students are enrolled in two-year schools. However, most Hispanic community college students do not continue their educations past the two-year level.

To increase the Hispanic transfer rates to four-year institutions, HACU will begin exploring the possibility of "transfer collaboratives" between pairs of member institutions, both

those that meet the 25 percent Hispanic enrollment criterion for HACU membership and those that are associate members. The collaboratives could include such activities as:

- transfer fairs on the community college campuses with representatives from four-year institutions
- summer honors programs of course offerings at four-year institutions for outstanding community college students
- the publication of transfer information guides describing four-year institutions in specific geographical areas
- joint admissions programs that formally admit students to a bachelor's degree program at a four-year college or university at the same time they enroll in a community college.

HACU first became involved in transfer collaboratives through The Ford Foundation's Two-Year/Four-Year Program, part of the Association's San Antonio pilot project, the Hispanic Student Success Program.

Hispanic Student Success Program

The Association continues to operate its major special project to improve the educational attainment levels of Hispanics, the Hispanic Student Success Program (HSSP), which began in 1988. Funded by The Pew Charitable Trusts and The Ford Foundation, the HSSP is designed to increase the rates at which San Antonio Hispanic students graduate from high school, enroll in college and graduate from college. Each year the HSSP reaches some 15,000-20,000 Hispanic students from kindergarten through community college, as well as parents and teachers.

HACU institutions, perhaps more so than other colleges and universities, are very aware of the necessity of viewing education as a continuum: that is, the need of Hispanic students for early outreach programs, for projects that prepare students for college-level work, and for linkages between school systems and institutions of higher education. The HSSP contains all those elements.

National Hispanic Student Success Program

On March 16, 1990, HACU announced the expansion of the HSSP to four sites throughout the country. The start-up phase of the National Hispanic Student Success Program (NHSSP), funded by a \$471,024 grant from The Sears-Roebuck Foundation, will begin in Miami, Fla., and northern New Mexico this year, and in East Los Angeles, Calif., and the Bronx, N.Y., in 1991. The program, which will reach thousands of Hispanic students from elementary school to college, their parents and their teachers, is based on "partnerships" with education "stakeholders."

Community action teams representing HACU-member institutions, school districts, the business sector and community

organizations were formed in 1989 in each of the sites. HACU colleges and universities involved in the coordination of the NHSSP at the four sites are Miami-Dade Community College and Florida International University in Miami; Santa Fe Community College, Northern New Mexico Community College (Española, N.M.), and New Mexico Highlands University (Las Vegas, N.M.); East Los Angeles College and California State University-Los Angeles; and Hostos Community College and Herbert H. Lehman College in the Bronx, N.Y.

The action teams met individually with NHSSP Project Director Cesar Trimble in 1989 to determine how the HSSP could be adapted to meet their local needs and resources. In November 1989 the teams met together in San Antonio to gain in-depth knowledge about the pilot HSSP and to develop their action plans.

HACU believes that the HSSP is a "blueprint" for making significant gains in the educational success rates of Hispanics nationally.

According to the Dade County public school system in South Florida, for example, the dropout rate for Hispanic students there is nearly 25 percent.

"This coalition will serve as a catalyst in creating a meaningful force to decrease the number of Hispanic high school dropouts and increase the number of Hispanic college graduates," said Jose Vicente, dean of the InterAmerican Center at Miami-Dade Community College and coordinator of the Miami action team.

"We will try to plant the seed from the very beginning so that the Hispanic community will see that education has to be treated as a long-term investment," he said. "Ultimately we want to make a positive mark in the economic advancement of Hispanics."

Hispanics in Higher Education

Highlights

- Hispanic high school completion rate (1988) — 55.2 percent
- number of Hispanics enrolled in college in the continental United States (1988 data) — 680,000 (5.2 percent of total college enrollment)
- percent of Hispanic college students who are female (1988) — 54.4 percent
- college participation rate of Hispanic high school graduates, 18 to 24 years old (1988) — 30.9 percent
- number of Hispanics in graduate and professional schools (1988) — 48,000
- percent of Hispanic college students enrolled in two-year colleges (1988) — 56.5 percent
- undergraduate degrees awarded to Hispanics (1987) — 2.7 percent of total
- number of doctorates awarded to Hispanic U.S. citizens (1989) — 569
- Hispanic full-time faculty in higher education (1985) — 1.7 percent of total
- Hispanic full-time administrators in higher education (1985) — 2.0 percent of total
- number of Hispanic college and university presidents (1990) — approximately 90 (continental U.S. - 55; Puerto Rico - 35)

Hispanic High School Completion and Enrolled-in-College Participation Rates *

(Tables 1 and 2)

In 1976, some 55.6 percent of Hispanics, 18-to-24 years old, had completed high school. Of that group, 35.8 percent were enrolled in college at the time.

Twelve years later, in 1988, the population of 18-to-24-year-old Hispanics had grown by 70.3 percent, yet the percent of high school graduates had remained virtually the same, and, in fact, had dropped slightly, to 55.2 percent.

Despite a 77 percent increase from 1976 to 1988 in numbers of Hispanics enrolled in college (from 384,000 to 680,000**), the enrolled-in-college participation rate of Hispanic 18-to-24-year-old high school graduates had fallen to 30.9 percent in 1988, a decrease of some 13.7 percent since 1976.

The decline in Hispanic college participation rates can be attributed primarily to economic factors. In the same decade in which the numbers of Hispanics living in poverty increased, collegiate financial aid programs shifted in emphasis from grants to loans. Tuition rose faster than inflation and, in terms of constant dollars, financial assistance did not keep pace. Economically disadvantaged students had a more difficult time paying college expenses with financial aid.

When faced with urgent economic necessity, many Hispanic youth feel obligated to take any job after graduation from high school in order to help their families. Deferring earning power, albeit small, for at least four years ceases to be an option when the family is suffering.

* Source: Bureau of the Census

** Note: This figure includes all Hispanics enrolled in college, not just 18-to-24-year-olds.

Income Level and High School Completion Rates *

Income level has a very definite effect on the high school completion rates of Hispanics and of other groups. For example, in 1987, high school completion rates of dependent 18-to-24-year-olds whose families had incomes in the "upper quartile" (\$48,710 and above) varied little according to ethnicity. White non-Hispanics in that category finished high school at the rate of 94.4 percent. Of the Hispanics in that earnings group, 90.9 percent completed high school, a statistically insignificant difference of only 3.5 percentage points.

That same year, 29 percent of white non-Hispanics had annual incomes in the upper quartile, that is, of \$48,710 and above, while only 7 percent of Hispanics fell in that category. Twenty percent of white non-Hispanics were in the lowest income quartile — with earnings of under \$16,450 per year — while 45 percent of Hispanics occupied that rank.

Thus, it is not unusual to find that in 1988, 82.3 percent of the white non-Hispanic population of 18-to-24-year-olds completed high school, while only 55.2 percent of Hispanics in the same age group finished their high school studies, a difference of 27.1 percentage points.

Much of the difference in high school completion rates between ethnic groups disappears when income level is controlled. (See Table 3.)

Hispanic Enrollment in College

Hispanic enrollment in college in 1988 in the continental United States was 680,000, or 5.2 percent of the total college enrollment of 13,043,000, according to the National Center for Education Statistics of the U.S. Department of Education (*Chronicle of Higher Education*, April 11, 1990). (See Table 4.)

Hispanic males accounted for 45.6 percent (or 310,000) of the total Hispanic enrollment and Hispanic females composed 54.4 percent (or 370,000) of the total.

Since 1986, Hispanic college enrollment has risen 10 percent. From 1978-88, Hispanic college enrollment increased 63.1 percent. Over that 10-year period, enrollment of Hispanic males grew by 45.5 percent and Hispanic female enrollment rose by 80.5 percent.

In 1988, of the 680,000 Hispanics enrolled in college, 631,000 were in undergraduate school, 39,000 were in graduate school, and 9,000 were in professional school.

Hispanics continued their trend in 1988 of enrolling in greater numbers in public institutions (86.3 percent) and in two-year colleges (56.5 percent). (See Table 5.)

However, although Hispanic college enrollment has grown, the college participation rate in 1988 of Hispanic high school graduates who were 18 to 24 years old was 30.9 percent, a slight increase over the 29.4 percent participation figure of 1986. Thus, the increases in Hispanic college enrollment are a result of the substantial growth in the Hispanic population over the last few years, and not because of great improvement in the Hispanic college-going rate.

Hispanic students are still far less likely than white non-Hispanics to graduate from high school, and the Hispanics who do earn high-school diplomas are less likely than non-Hispanics to enroll in college.

Hispanic Enrollment in Undergraduate Programs

In 1988, Hispanic undergraduate college enrollment stood at 631,000, or 5.6 percent of all the undergraduate college students in the United States.

Hispanics are underrepresented in undergraduate enrollment. For example, in 1988 Hispanics accounted for 10 percent of the total U.S. 18-to-24-year-old population, yet they constituted only 5.8 percent of all 18-to-24-year-old students enrolled in college.

18-to-24-year-olds	
Enrolled in College (1988)	
All —	7,791,000
Hispanic —	451,000 (5.8%)

Not only do Hispanics form a very small percentage of undergraduate enrollment, they also do not earn bachelor's degrees in numbers comparable to their proportion of the student population. For example, Hispanic students represented 5.3 percent of undergraduate enrollment in 1986, but they earned only 2.7 percent of all undergraduate degrees in 1987. (See Table 6.)

However, Hispanics did make gains in the number of degrees earned between 1976 and 1987. During that time, the number of bachelor's degrees awarded to Hispanics grew by 50.3 percent.

Bachelor's Degrees Awarded to Hispanics in Selected Fields

Hispanic students' choices of major fields of study have undergone some changes since 1976 (see Table 7). In general, bachelor's degrees awarded to Hispanics reflect the same trends as those of other students; however, the

amount of change varies according to ethnicity. For example, the number of bachelor's degrees awarded in education from 1976 to 1987 declined by 43.7 percent among all students. Although Hispanics also chose education as a major less often during that time, the proportion of change was smaller — a 21.5 percent drop. In that same time period, the percentage of blacks receiving bachelor's degrees in education decreased by 70.1 percent.

Fewer bachelor's degrees in the social sciences were awarded to Hispanics in 1987 than in 1976, although the drop measured only 4.9 percent.

Bachelor's degrees awarded to Hispanics in the health professions and the biological/life sciences grew by 47.8 percent and 44.2 percent, respectively, over the same 11-year period.

By far, the areas that showed the greatest increases in bachelor's degrees awarded to Hispanics were engineering and business. From 1976-87, bachelor's degrees in engineering awarded to Hispanics rose 138.6 percent; business degrees increased 159.3 percent. However, the actual numbers of degrees remain small. In 1987, only 2,007 Hispanics received bachelor's degrees in engineering, as compared to 57,564 white non-Hispanics. That same year, 6,398 Hispanics earned bachelor's degrees in business, compared to 205,118 white non-Hispanics. Of the total number of bachelor's degrees in business awarded to Hispanics, slightly under one-half (49.2 percent) went to women.

Completion of Undergraduate Degrees

According to the 1990 report "Undergraduate Completion and Persistence at Four-Year Colleges and Universities" of the National Institute of Independent Colleges and Universities, only 20 percent of Hispanic students at four-year colleges had graduated with a bachelor's degree within six years. Fifty-four percent of Hispanic students who enrolled in four-year colleges had dropped out for good within six years. The study was based on U.S. Department of Education figures on 1980 high school graduates (reported in the Chronicle of Higher Education, Feb. 21, 1990).

Similar figures from the National Center for Education Statistics indicate that 51 percent of Hispanic students do not earn a degree within 12 years of entering college (State Higher Education Executive Officers newsletter, Network News, April 1990).

Hispanic Enrollment in Graduate Programs

In 1988, Hispanics enrolled in postgraduate programs numbered 48,000, with 39,000 in graduate school and another 9,000 in professional school. While Hispanic enrollment in professional studies showed no change since 1986, enrollment in other graduate programs suffered a 15.2 percent loss, or 7,000 students, from 46,000 to 39,000.*

Hispanics comprised only 2.8 percent of all graduate students in the U.S. in 1988, a drop from the 1986 figure of 3.2 percent.

(Note: These figures contradict a study conducted by the Council of Graduate Schools and the Graduate Record Examinations Board, as

reported in the May 2, 1990, issue of the Chronicle of Higher Education, which shows that the number of Hispanics enrolled in graduate programs rose by 8.4 percent from 1986 to 1988.)

* Source: National Center for Education Statistics, U.S. Department of Education.

Doctoral Degrees Awarded to Hispanics

An alarmingly small number of Hispanic U.S. citizens earn doctorates. In 1989, the total number of doctorates awarded in the United States was 34,319. Of that number, only 569 doctorates (or 1.7 percent) were awarded to Hispanics. Those 569 doctoral degrees represent 2.5 percent of the 23,172 doctorates awarded to U.S. citizens that year. (See Table 8.)

The number of Hispanics receiving doctorates has declined for two consecutive years, from 614 in 1987, to 594 in 1988, to 569 in

1989. In fact, the 1989 figure is below that of 1986, when 572 Hispanics received doctoral degrees.

From 1979-89 the number of doctorates awarded to U.S. Hispanics rose from 462 to 569, an increase of 23.2 percent. By far, most of the increase is due to the rise in number of degrees awarded to Hispanic women. From 1978-88 (the most recent year for which gender figures were available at the time of this report), total Hispanic doctorates rose by 25.6 percent. However, doctorates earned by Hispanic females increased by 75 percent. The number of doctorates received by Hispanic males grew only 1.3 percent in that time.

* Source: National Research Council

Doctoral Degrees Awarded to Hispanics in Selected Fields

Hispanics have increased the number of doctorates they earn in all specialties, according to the American Council on Education's analysis of National Research Council data. (See Table 9.) "From 1980 to 1988, Hispanic Americans more than doubled the number of Ph.D.s they earned in engineering, life sciences, and physical sciences ... However, the majority of doctorates granted to Hispanic Americans were in education, social sciences, and humanities, with 63.8 percent of all doctorates earned by Hispanic Americans concentrated in those three fields."*

The largest growth in number of doctorates awarded to Hispanics from 1980-88 occurred in physical science, with a 155.6 percent increase. However, the number of U.S. Hispanics who earned doctorates in physical science only increased from 27 in 1980 to 69 in 1988.

Thus, although the percentage increase in doctorates awarded to Hispanics over an eight-year period is large, obviously the actual numbers remain tiny. Clearly, the dearth of Hispanic Ph.D. recipients has reached the critical level, in terms of Hispanic participation in research and development in science and industry, and in academia.

* Source: "Minorities in Higher Education," American Council on Education, 1988

Hispanic Employment in Higher Education

In 1985, only about 2.0 percent of full-time higher education administrators and 1.7 percent of college faculty members were Hispanic.*

Although the number of Hispanic higher education administrators increased dramatically by 107 percent from 1975 to 1985, this figure, rather than cause for celebration, merely signals the even more dismal situation for Hispanics 15 years ago. The actual numbers of Hispanic administrators in college and universities only increased from 1,202 in 1975 to 2,490 in 1985. (See Table 10.)

The percentage of Hispanic women who are higher education administrators grew by 200.3 percent in the 10-year period from 1975-85, but Hispanic women still constituted only 0.7 percent of all college and university administrators in 1985.

More Hispanics were employed as full-time faculty than administrators in institutions of higher education in 1985, although their numbers also were small. Their percentage of the total (1.7 percent) was even smaller than the percentage of Hispanic administrators, and their 10-year growth rate from 1975-85 was 27.9 percent. In 1985, some 8,087

Hispanics taught full time in the nation's colleges and universities, up from 6,323 in 1975. Hispanic women increased their representation on higher education faculties by 37.4 percent in the 10-year period. (See Table 11.)

Corporate America and resource-rich institutions compete intensely for the few Hispanics each year who graduate with doctorates, and who would be the most likely candidates to become college professors and administrators. Hispanic-serving institutions often cannot match those employment offers.

HACU is investigating ways to assist in increasing the number of Hispanic college administrators, particularly those in leadership positions — chancellors, presidents, vice presidents and deans. Hispanic students enrolled in all institutions of higher education, but particularly at HACU institutions, need to see Hispanics as academicians and researchers and leaders of the colleges they attend.

Hispanic-Serving Institutions of Higher Education (HSIs)

Summary

Some 112 nonprofit colleges and universities in the United States qualify for institutional membership in the Hispanic Association of Colleges and Universities by having a minimum of 25 percent Hispanic student enrollment. These institutions are located in nine states (Arizona, California, Colorado, Florida, Illinois, New Jersey, New Mexico, New York, and Texas) and Puerto Rico. For the purposes of this report, the HACU member-eligible colleges and universities are called Hispanic-serving institutions (HSIs).

The HSIs enroll around 45 percent of all postsecondary Hispanic students in the United States. Hispanic student enrollment at these institutions ranges from 25 to 99 percent of their student bodies. Furthermore, demographic changes will result in more institutions reaching the minimum Hispanic enrollment criterion each year, so that early in the 21st century, some 150 colleges and universities should be eligible for HACU institutional membership.

Membership in HACU has grown from 18 in 1987 — the Association's first full year of operation — to 56 in 1989. The goal for institutional membership for 1990 is 70.

Highlights

- Seventy-seven (77) of the 112 HSIs are located in the continental United States; 35 are located in Puerto Rico.
- Distribution of continental HSIs by state:
 - California (21)
 - Texas (21)
 - New Mexico (11)
 - New York (9)
 - Florida (6)
 - Illinois (3)
 - New Jersey (2)
 - Colorado (2)
 - Arizona (2)
- Total Hispanic higher education enrollment in the continental U.S. — 680,000 (fall 1988)
- Enrollment at Puerto Rico's institutions of higher education — approximately 150,000
- Total number of Hispanic students enrolled at the 77 mainland HSIs — 208,885
- 31% of all Hispanic postsecondary students in the continental United States are enrolled at the 77 mainland Hispanic-serving institutions
- Around 45% of all Hispanic postsecondary students in the continental United States and Puerto Rico are enrolled in the 112 HSIs.
- Number of mainland colleges and universities where Hispanic students are 50 percent + of the enrollment — 22
- Eleven of the 77 continental U.S. HSIs have more than 5,000 Hispanic students.
- The 112 HSIs are divided almost evenly between two-year and four-year institutions, with 55 two-year and 57 four-year schools.
- Of the 77 continental U.S. HSIs:
 - 78% are public
 - 62% are two-year colleges
 - number of two-year colleges — 48 (46 public, 3 private)
 - number of four-year institutions — 29 (15 public, 14 private)
- Texas HSIs are heavily public (18 of 21 total) and almost evenly divided between two-year schools (10) and four-year colleges and universities (11).
- California HSIs are heavily public (17 of 21 total) and mostly two-year schools (17 of 21).

- Hispanic students attending the 77 continental U.S. HSIs are distributed as follows —
two-year: 148,922 (71%)
four-year: 59,963 (29%)
- Most HSIs are relatively small. Fifteen of the 112 HSIs have total enrollments of fewer than 1,000 students. Seventy-one of the HSIs (63%) enroll fewer than 5,000 students; 91 have fewer than 10,000 students; 21 have more than 10,000 students; one has more than 40,000 students.
- Continental U.S. institution with the largest number of Hispanic students: Miami-Dade Community College (23,256 Hispanic students)
- Continental 4-year institution with the largest number of Hispanic students: University of Texas-Pan American at Edinburg (9,142 Hispanic students)
- Institution in the continental U.S. with the largest percentage of Hispanic students: St. Augustine College, Chicago (99.7% Hispanic)

General Characteristics of HSIs

Geographical Distribution

Of the 112 HSIs, 77 are located in the mainland United States and 35 are in Puerto Rico.

In the continental United States, Texas and California have the greatest number of HSIs, with 21 each, followed by New Mexico (11), New York (9), Florida (6), Illinois (3), and New Jersey, Colorado, and Arizona (2 each).

Level and Control

The 112 HSIs are divided almost evenly between two-year and four-year institutions, with 55 two-year and 57 four-year schools. (Three Texas universities — Corpus Christi State University, Laredo State University and the University of Texas-Pan American at Brownsville — are two-year, upper-division institutions. All three schools are considered four-year institutions for this report.)

Mainland HSIs (Table 12)

Of the 77 mainland institutions, 48 (62 percent) are two-year schools and 29 (38 percent) are four-year colleges or universities.

Public institutions greatly outnumber the private schools on the mainland. There are 60 public HACU institutions, representing 78 percent of the total, and 17 private institutions (22 percent).

Of the 60 mainland public institutions, 45 are two-year, lower-division schools. Of the 17 mainland private schools, three are two-year institutions. Of the 29 four-year colleges or universities on the mainland, 15 are public and 14 are private.

Texas and California have the greatest number of Hispanic-serving institutions, with 21 each. Of the Texas HSIs, 10 are two-year schools and 11 are four-year colleges or universities. Most (18) of Texas' HSIs are public, with only three four-year universities being private. All three are Catholic institutions located in San Antonio, Texas.

California's 21 HSIs are mostly public (17) and mostly two-year schools (17).

Puerto Rican Institutions

Of the 35 accredited Puerto Rican island institutions of higher education, 28 (80 percent) are considered four-year colleges or universities, and seven (20 percent) are two-year schools.

Private institutions outnumber the public colleges and universities in Puerto Rico. There are 22 private institutions of higher education, representing 63 percent of the total, and 13 public schools (37 percent).

Of the 28 four-year colleges and universities, 19 (68 percent) are private and nine (32 percent) are public. Of the 22 private schools, 19 (86 percent) are four-year institutions and three (14 percent) are two-year colleges.

Enrollment at HSIs

For the most part, enrollment figures used in this report for the 77 Hispanic-serving institutions in the continental United States are from the National Center for Education Statistics of the U.S. Department of Education (as reported in the *Chronicle of Higher Education*, April 11, 1990). All enrollment statistics are from fall 1988, unless otherwise indicated. In a few cases, enrollments were verified through HACU staff contact.

Enrollment figures for the Puerto Rican island institutions were taken from the College Board Annual Survey of Colleges Data Base, 1988.

Enrollments at the 112 Hispanic-serving institutions range from 56 students to over 40,000. However, most of the HSIs are relatively small, with 91 (or 81 percent) having enrollments of fewer than 10,000 students. In fact, 71 of the institutions (63 percent) have enrollments of fewer than 5,000 students. Fifteen schools have enrollments of fewer than 1,000 students.

Twenty-one of the HSIs have more than 10,000 students.

Both the smallest and the largest HSIs are located in Miami, Fla. The smallest is St. John Vianney College Seminary, a four-year Catholic institution of 64 students. The largest is Miami-Dade Community College, a two-year public institution of 43,880 students.

After Miami-Dade Community College, the next four largest HSIs are the University of Puerto Rico at Rio Piedras, a four-year public institution (enrollment: 22,635); San Antonio College, a two-year public institution in San Antonio, Texas (enrollment: 21,593); Mount San Antonio College, a two-year public college in Walnut, Calif. (enrollment: 20,563); and Florida International University, a four-year public institution in Miami (enrollment: 18,128).

Hispanic Enrollment at HSIs

In general, information on percentage of Hispanic enrollment at the 77 mainland Hispanic-serving institutions was obtained from U.S. Department of Education, National Center for Education Statistics reports, as published in the April 11, 1990, issue of the Chronicle of Higher Education.

The center compiles data on ethnicity every two years; the most recent period for which figures are available is fall 1988. In some cases, some Hispanic-serving institutions were not included in the compilation, the figures were known to be incorrect, or the institution's Hispanic enrollment had increased sufficiently since 1988 such that the college or university now qualifies for HACU membership. In those cases, information on ethnicity was obtained through HACU staff contact with the institution.

Figures on ethnicity at the Puerto Rico island institutions are not available because of a Puerto Rican constitutional provision prohibiting the gathering of such information. For the purposes of this report, the 35 Puerto Rican institutions, which enroll approximately 150,000 students, are presumed to be 99 percent Hispanic.

(See the Directory of Hispanic-Serving Institutions at the end of this report.)

Numbers of Hispanic Students at Continental HSIs

Of the 77 mainland HSIs, 11 have more than 5,000 Hispanic students. Specifically, 12 have up to 500 Hispanic students; 15 have from 501-1,000; 28 have from 1,001-3,500; 11 have from 3,501-5,000; five have from 5,001-7,500; four have from 7,501-10,000; and two have more than 10,000 Hispanic students. (See Table 13.)

The largest number of Hispanic students at any college or university in the continental United States is found at Miami-Dade Community College, where 23,256 (or 53 percent) of the school's 43,880 students are Hispanic.

More Hispanic students attend the University of Texas-Pan American in Edinburg, Texas, than any other four-year institution on the mainland. UT-Pan Am-Edinburg has 9,142 Hispanic students (81.6 percent of a total enrollment of 11,204). The University of Texas at El Paso follows very closely behind, with 8,174 Hispanic students, although the percentage of Hispanic students there is lower (54.6 percent of 14,971 students).

Hispanic college students in New Mexico, Texas and Florida seem to prefer attending institutions whose enrollments are significantly Hispanic. In each of those states, more than 50 percent of all Hispanic college students attend Hispanic-serving institutions. (See Table 14.)

Percentage of Hispanic Students at Continental HSIs

Hispanic student enrollment at the 77 mainland HSIs ranges from 25 percent to 99.7 percent.

Thirty-one of the 77 mainland HSIs have Hispanic enrollments ranging from 25-35 percent. Hispanic students comprise from 36-49 percent of the total enrollment at 24 HSIs and from 50-74 percent of the total enrollment at 14 institutions. The student bodies at eight institutions are from 75-99 percent Hispanic. Thus, 22 institutions of higher education in the continental United States have enrollments that are 50 percent Hispanic or more. (See Table 15.)

The "most Hispanic" of the institutions in terms of percentages of Hispanic students are St. Augustine College, a two-year private institution in Chicago, with 99.7 percent Hispanic enrollment; Boricua College, a four-year private institution in New York City (91 percent Hispanic); Laredo Junior College, a two-year public college in Laredo, Texas (89.6 percent Hispanic); Texas Southmost College, a two-year public institution in Brownsville, Texas (85.6 percent Hispanic); Hostos Community College, a two-year public college in the Bronx, New York City (83.4 percent Hispanic); Texas State Technical Institute, a two-year public institution in Harlingen, Texas (82.2 percent Hispanic); the University of Texas-Pan American in Edinburg, a four-year public institution (81.6 percent Hispanic); and Laredo State University, a two-year upper-division university in Laredo, Texas, classified as a four-year institution for this report (80.8 percent Hispanic).

**Distribution of Hispanic Students
at HSIs by Level of Institution**

In fall 1988, of the 680,000 Hispanics enrolled in college in the continental United States, 56.5 percent (or 384,200) were attending two-year institutions.

Hispanic students in the continental United States tend to enroll more in community colleges than in four-year institutions probably because these schools are not expensive and are located close to home. In addition, their admissions policies generally are more open. Hispanic students who do not intend to continue their studies for a bachelor's degree or who need a more flexible class schedule to accommodate employment needs also may choose community colleges.

This Hispanic enrollment trend is reflected in the 77 mainland institutions with at least 25 percent Hispanic student enrollment: 48 (62 percent) are two-year schools. Of the 208,885 Hispanic students enrolled at

the 77 mainland Hispanic-serving institutions, 148,922 (71 percent) attend two-year colleges.

All of the HSIs in four states (Arizona, Colorado, Illinois and New Jersey) are two-year schools.

Majors Offered

The Hispanic-serving institutions offer degrees in fields ranging from agriculture to visual and performing arts. Information on majors at 90 of the 112 HSIs, obtained from the 1989 College Board Annual Survey of Colleges Data Base, is printed here.

Business administration fields are the most widely available at the HSIs. Business management is offered by 85 of the HSIs, with 78 having majors in general business, office, and marketing fields. Computer and information systems fields also are found frequently at the HSIs, with 70 schools reporting majors in those areas.

Teacher education, multi-/interdisciplinary studies, health science, parks and recreation/protective services/public affairs, social studies, engineering technology, allied health, life science, mathematics, physical science fields, and visual and performing arts all are offered at more than 50 HSIs.

Major Fields of Study Degree Codes

(For use with matrix on pp. 19-23.)

- A = associate's degree offered
- B = bachelor's degree offered
- M = master's degree offered
- D = doctorate offered
- F = first professional degree offered
- 1 = associate's & bachelor's degrees offered
- 2 = associate's & master's degrees offered
- 3 = associate's & doctoral degrees offered
- 4 = bachelor's & master's degrees offered
- 5 = bachelor's & doctoral degrees offered
- 6 = master's & doctoral degrees offered
- 7 = associate's, bachelor's & master's degrees offered
- 8 = associate's, bachelor's & doctoral degrees offered
- 9 = associate's, master's & doctoral degrees offered
- E = bachelor's, master's & doctoral degrees offered
- G = associate's, bachelor's, master's & doctoral degrees offered

Table 1

High School Completion Rates and Enrolled-in-College Participation Rates of 18-to-24-Year-Olds by Race/Ethnicity, Selected Years, 1976 to 1988
(numbers in thousands)

	Total Population	High School Grads.	High School Completion Rates (percentages)	Enrolled in College	Enrolled-in-College Partic. Rates (percentages)
Hispanic					
1976	1,551	862	55.6	309	35.8
1983	2,025	1,110	54.8	349	31.4
1988	2,642	1,458	55.2	450	30.9
White Non-Hispanic					
1976	23,119	19,046	82.4	6,276	33.0
1983	23,899	19,644	82.2	6,464	32.9
1988	21,261	17,491	82.3	6,659	38.1

NOTE: College participation rates were calculated using high school graduates as the base. The high school completion rates were calculated using the total population as the base.

Table 2

Enrolled-in-College Participation Rates for 18-to-24-Year-Old Hispanic High School Graduates, by Gender 1976 to 1988 (a)
(numbers in thousands)

	Total Population	High School Graduates (b)	Enrolled in College	Enrolled in-College Participation Rate (percentages)
Men				
1976	701	378	150	39.7
1978	781	420	126	30.0
1980	971	497	154	31.0
1982	944	519	141	27.2
1984	956	549	154	28.1
1986	1,338	772	224	29.0
1988	1,375	724	228	31.5
Women				
1976	850	483	160	33.1
1978	891	516	128	24.8
1980	992	556	160	28.8
1982	1,056	634	196	30.9
1984	1,061	661	207	31.3
1986	1,175	737	220	29.9
1988	1,267	736	223	30.3

(a) Totals differ from those shown in other tables for 18-to-24-year-olds who are dependent primary family members. The Current Population Survey samples are derived from the decennial census of the U.S. population.

(b) The number of high school graduates was calculated by adding the numbers of individuals in this age group enrolled in college as of October of that year and the number of high school graduates not enrolled in college; these figures include individuals who enrolled in college without receiving a high school diploma or a GED. Several states do not require entering junior college students to have a diploma or GED. Therefore, these high school completion figures will be slightly higher than figures that do not include this relatively small population.

Source: U.S. Department of Commerce, Bureau of the Census, "Current Population Reports," Series P-20, various years.

Table 3

High School Completion Rates of Dependent 18-to-24-Year-Old Hispanics, Selected Years, 1976 to 1988, by Economic Status*

(percentages)

Income, Race, Ethnicity and Sex	1976	1982	1987	1988
Hispanic				
Total	66.9	64.8	65.9	64.6
Low	54.1	50.9	57.0	50.6
Middle	76.0	75.7	70.8	75.5
Upper	89.4	84.7	90.9	81.4
Men	64.3	58.5	62.5	59.6
Low	49.8	43.1	53.2	43.2
Middle	72.6	70.7	66.1	72.3
Upper	88.8	84.0	94.3	66.5
Women	70.2	71.9	70.4	71.5
Low	58.9	60.2	61.5	59.7
Middle	79.9	81.1	77.3	80.9
Upper	91.2	85.3	85.9	91.9

* Figures show the percentage of high school graduates for all 18-to-24-year-old dependent primary family members as of October of that year. High school completion rates are based on data that include some 18- and 19-year-olds who are enrolled in high school as of October and will later complete. It is likely that this applies to more low-income youth than middle- or upper-income students, since low-income students are more likely to complete high school more slowly than middle- or upper-income youth.

Income Definitions for Selected Years

	<u>Low</u>	<u>Middle</u>	<u>Upper</u>
1976	Under \$ 9,147	\$ 9,148 to \$22,578	\$22,579 and above
1982	Under 13,434	13,435 to 37,795	37,796 and above
1987	Under 16,450	16,451 to 48,709	48,710 and above
1988	Under 18,581	18,582 to 52,119	52,120 and above

CERTIFIED PUBLIC ACCOUNTANTS

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To the Board of Directors and Antonio Rigual, Ph.D.
Hispanic Association of Colleges and Universities
San Antonio, Texas

We have audited the accompanying balance sheets of the Hispanic Association of Colleges and Universities as of December 31, 1989 and 1988, and the related statements of support and revenue, expenses, and changes in fund balances for the years then ended. These financial statements are the responsibility of the Association's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Hispanic Association of Colleges and Universities at December 31, 1989 and 1988, and the results of its operations and its changes in financial position for the years then ended in conformity with generally accepted accounting principles.

Carneiro, Chumney & Co.

NOTES TO FINANCIAL STATEMENTS YEARS ENDED DECEMBER 31, 1989 AND 1988

Note 1: Summary of Significant Accounting Policies

The financial statements of the Hispanic Association of Colleges and Universities (HACU) have been prepared on the accrual basis of accounting. The significant accounting policies followed are described below to enhance the usefulness of the financial statements to the reader.

Fund Accounting

To ensure observance of limitations and restrictions placed on the use of resources available to HACU, the accounts of HACU are maintained in accordance with the principles of fund accounting. Resources for various purposes are therefore classified for accounting and reporting purposes into funds established according to their nature and purposes. Separate accounts are maintained for each fund; however, in the accompanying financial statements, funds that have similar characteristics have been combined into fund groups. Accordingly, all financial transactions have been recorded and reported by fund group.

The balance sheet and statement of support and revenue, expenses, and the changes in fund balances present individually all funding segments included in the Association. All significant interfund balances and transactions are eliminated.

Fixed assets are recorded at cost. Depreciation of property and equipment is provided over the estimated useful lives of the respective assets using the straight line method.

Note 2: Related Parties

Our Lady of the Lake University of San Antonio, Texas (OLLU) provides HACU with office space and management services. Beginning in 1988, OLLU and HACU entered into a yearly contractual arrangement whereby HACU pays OLLU for the space the Association occupies and for the time spent by OLLU employees in management of the Association's fiscal affairs. These payments are included in overhead expense.

In addition, HACU "leases" its staff from OLLU. HACU's employees' payroll is reimbursed to the University monthly. The president of OLLU served as the national treasurer of HACU through September 24, 1989 (a non-compensated position). At September 25, 1989 she became one of six officers-at-large who serve HACU.

Note 3: Carryover of Unspent Grant Funds

Of the \$550,151 "Excess of Support and Revenue over Expenses" shown for 1988, \$505,938 was in the Restricted Fund to be used in the Restricted Programs during 1989. The 1989 Restricted Fund expenditures and transfers exceeded revenues by \$295,835, leaving unspent funds to be carried forward to 1990 of \$210,103.

The Hispanic Association of Colleges and Universities (HACU) is an equal opportunity employer. HACU does not discriminate against any employee or job applicant because of race, color, religion, sex, age, national origin, veteran status, handicap, or for any other reason.
