ABSTRACT

This document contains a developmental curriculum plan for an articulated curriculum in hospitality/food service for Connecticut's Mattatuck Community College and area high schools. The curriculum guide includes a course description, criteria for evaluation, attendance policy, objectives, a curriculum area outline, 17 content area objectives, a food preparation test based on the objectives, and a glossary of 213 culinary terms. Topics covered by the content area objectives are the following: kitchen organization; kitchen safety and sanitation; weights, measures, kitchen mathematics, and written recipes; tools and equipment; salads and dressings; sandwiches and appetizers; breakfast menu, dairy products, coffee, and tea; cooking methods; preparation, "mise en place," and fry preparation; vegetables and fruit; potatoes, rice, and pasta; stocks and sauces; soups; meats; poultry; seafood; and culinary terms. Test format includes multiple choice, fill-in, true/false, and short answer questions. (KC)

MATTATUCK COMMUNITY COLLEGE

ACCESS PROGRAM

HOSPITALITY FOOD SERVICE MANAGEMENT

PROFESSIONAL FOOD PREPARATION

COURSE DESCRIPTION:

A lecture/demonstration/laboratory course which provides the knowledge and opportunities for students to learn and practice the basic skills needed for the commercial preparation and service of food. Basic cooking methods and culinary techniques are discussed and practiced in the production of soups, salads, vegetables, and sauces. Meats, poultry and seafood are prepared with commercial tools and equipment, with special emphasis on weights, measures and mathematics commonly employed in the professional kitchen.

High School students successfully completing the curriculum requirements and scoring not less than 70%("C" average) correct on a comprehensive objective/practical examination are eligible to receive 3 college credits for HM 105-Food Preparation I at Mattatuck Community College.

CRITERIA FOR EVALUATION

Student's final grade for the course will be based upon the following:

1. Comprehensive written examination 60%
2. Practical examination 40%

ATTENDANCE POLICY

Students are allowed a maximum of 10 absences for a one-year course; 5 absences for a 1/2 year course. Excessive absence will result in withdrawal from the ACCESS Program course objectives.

OBJECTIVES Upon successful completion of the course, the student will be able to:

- 1. define, discuss and employ basic food preparation theories and techniques;
- recognize and use a variety of kitchen tools, equipment and raw food products;
- 3. plan, organize and prepare finished food items from the raw state;
- 4. memorize, interpret and evaluate selected written recipes; mathematically expand/reduce and precost these recipes;
- 5. define, discuss and employ kitchen management fundamentals;
- 6. demonstrate the ability to work cooparatively with others in obtaining group objectives as evaluated by the instructor.

CURRICULUM AREA OUTLINE

The following content areas will be addressed through lecture, demonstration and practice. Numbers indicate the minimum percentage of questions from each content area to be selected from the test bank for the comprehensive written examination.

CONTENT AREA OBJECTIVES

Upon successful completion of the following areas, the student will be able to:

KITCHEN ORGANIZATION

- 1. outline the types of foodservice operations
- 2. describe the positions, their functions and needed skills in the modern professional kitchen.
- demonstrate understanding of the importance of professional attitudes and standards.

KITCHEN SAFETY AND SANITATION

- 1. prevent food poisoning and food-borne diseases by exercising proper hygiene, food handling and storage techniques. cleaning and sanitizing procedures and pest control.
- 2. display safe work habits to prevent injuries and avoid common kitchen hazzards.

WEIGHTS, MEASURES, KITCHEN MATH AND WRITTEN RECIPES

- 1. discuss the structure and functions of standardized recipes.
- 2. accurately measure and weigh ingredients and portions.
- 3. memorize all common weights, measures and temperatures and their equivalents.
- 4. define and recognize the relationships among AP, EP, and AS weights.
- 5. convert recipes to higher and lower yields.
- 6. calculate raw food costs, portion costs, and perform yield cost analyses.

TOOLS AND EQUIPMENT

- 1. identify and demonstrate safe and efficient use of standard kitchen tools and equipment, including:
 - a. knives c. hand tools e. small equipment
 - b. scales d. pots and pans f. measuring devices
 - g. containers holding and storage equipment
 - h. processing cooking equipment
- 2. discuss the importance of practicing energy conservation.

SALADS AND DRESSINGS

- describe the different salad types and select appropriate 1. salad recipes for use as:
 - a. appetizer
- c. main course
- e. dessert

- b. accompaniment
- d. separate course
- identify, assess quality of, and prepare salad greens and 2. fresh fruits.
- identify parts of a salad and assemble salads with eye 3.
- set up an efficient system for producing salads in 4. quantity.
- 5. produce:
 - a. green salads
- c. vegetable salads
- e. cooked salads

- b. fruit salads
- d. combination salads f. gelatin salads
- identify salad dressing ingredients and produce: oil and 6. vinegar dressings; mayonaise-based dressings; cooked dressings; specialty dressings.

SANDWICHES AND APPETIZERS

- distinguish types of sandwich breads and proper storage. 1.
- list and use most popular sandwich fillings. 2.
- set up a sandwich station. 3.
- recall basic categories of hot and cold sandwiches. 4.
- prepare major types of sandwiches and describe quanitiy 5. preparation.
- review canape structure and assembly (base, spread, garnish) 6. and prepare canapes.
- 7. describe basic composition & service of appetizer cocktails, relishes, and dips.
- 8. identify and prepare selected popular hors d'oevres.

BREAKFAST MENU, DAIRY PRODUCTS, COFFEE & TEA

- 1. describe the composition of eggs and distinguish between the various grades.
- 2. demonstrate proper storage of eggs.
- prepare the following egg items: 3.
 - a. poached eggs
- d. shirred eggs
- g. fried eggs

- b. scrambled eggs
- e. custards
- h. omelets

- c. entree souffles f. hard & soft cooked eggs

- 4. prepare pancakes, waffles and French toast; cooked breakfast cereals; breakfast meats.
- 5. describe major milk, cream and butter products.
- 6. heat & cook with milk and prepare whipped cream.
- 7. identify the major domestic & imported cheeses; discuss proper storage and service.
- 8. prepare coffee and tea.

COOKING METHODS

1. name the basic components of foods and describe their reaction to cooking:

proteins (coagulation, connective tissues, effects of acid) carbohydrates (caramelization, gelatinization) fruit & vegetable fiber (effects of sugar, acids, & alkalis) fats (market forms, deterioration) vitamins, minerals, pigments, & flavor components

- describe the ways in which heat is transfered to food in order to cook it, such as conduction, convection and radiation.
- 3. list the factors which affect cooking times.
- 4. describe & distinguish between moist-heat, dry-heat and fat cooking methods.
- 5. explain and employ each basic cooking method used in the commercial kitchen, including:
 - a. poach f. simmer k. boil
 b. steam g. braise l. roast
 c. bake h. broil m. grill
 d. griddle i. pan-broil n. saute
 e. pan-fry j. deep-fry o. pressure-fry
 - p. microwave
- 6. identify common flavoring ingredients, herbs, spices and discuss guidelines for their use in building flavor.

PREPARATION, MISE EN PLACE AND FRY PREP

- 1. explain the importance of carefully planned preparation.
- 2. describe the steps in planning for preparation, and differentiate between set meal and extended meal services.
- 3. use a chef's knife to perform basic cutting techniques.
- 4. review procedures in precooking and marinating.
- 5. set up and use a standard breading station.

Parks

VEGETABLES AND FRUITS

- 1. identify quality indicators, pre-preparation and storage of fresh fruits and vegetables.
- 2. control texture, flavor, color and nutritional changes when cooking vegetables.
- 3. prepare and serve vegetables cooked to their proper doneness.
- 4. prepare vegetables for quantity service by the "batch cooking" method and the "blanch-and-chill" method.
- 5. judge quality in cooked vegetables based on color, appearance, texture, flavor, seasoning, and appropriateness of combination with sauces and other vegetables.

POTATOES, RICE AND PASTA

- 1. distinguish the major types of potatoes and the best uses for each.
- 2. select potatoes of high quality and store them properly.
- 3. cook potatoes by:
 - a. boiling c. steaming e. baking b. sauteing d. pan-frying f. deep-frying
- 4. distinguish the major types of rice.
- 5. prepare rice by:
 - a. boiling c. pilaf method b. steaming d. risotto method
- 6. identify major types, shapes and quality of commercial pasta.
- 7. prepare fresh and commercial pasta products.

STOCKS AND SAUCES

- 1. prepare basic mirepoix
- 2. use a sachet bag and bouquet garni for flavoring liquids
- 3. prepare, cool and store properly:
 - a. white stock (beef or veal) c. chicken stock
 - b. fish stock (fumet) d. brown stock
- 4. describe the preparation of meat, chicken and fish glazes and reductions:
 - a. glace de viande

c. glace de volaille

b. glace de poisson

d. demiglaze

and evaluate and use their commercial substitutes (convenience bases).

5. explain the function of sauces.

- 6. prepare white, blond, and brown roux and use them to thicken liquids.
- 7. prepare and use buerre manie, cornstarch and other starches to thicken liquids.

2. prepare and use egg yolk/cream liaison.

- 9. finish a sauce with raw butter (monter au beurre).
- 10. preapre the five leading or mother sauces:

a. bechamel

b. veloute

c. tomato

d. espangole

e. hollandaise

11. prepare and select small sauces from each leading sauce.

12. prepare simple and compound butters.

13. prepare selected cold sauces and pan gravies.

SOUPS

- 1. identify the major categories of soups:
 - a. clear (broth, bouillon, vegetable, consomme)
 - b. thick (cream soups, purees, bisques, chowders, potage)
 - c. specialty & national soups (including cold & jellied soups)
- 2. prepare clarified consomme and other clear soups.
- 3. outline three procedures for, and prepare, cream soups.
- 4. prepare selected puree soups, bisques, chowders, specialty and national soups.
- 5. discuss proper holding and service of soups.

MEATS

- 1. describe the composition and structure of meat and tell how it relates to meat selection and cooking methods.
- 2. utilize the federal meat inspection/grading system in the selection and purchasing of meats.

3. discuss the significance of aging meats.

- 4. identify the primal and fabricated cuts of beef, lamb, veal and pork.
- 5. select appropriate cooking methods for major cuts of meat based upon tenderness and other characteristics.
- 6. determine doneness in cooked meat by internal temperature, touch, and time-weight ratio.
- 7. discuss proper storage procedures for fresh and frozen meats
- 8. prepare selected meat recipes employing standard cooking methods as listed in the content area cooking methods above.

POULTRY

- 1. differentiate between "light" and "dark" meat and describe how these differences affect cooking.
- review techniques that help keep chicken/turkey breast moist in roasting.
- 3. identify and describe domestic poultry classes/kinds:
 - a. Chicken:

roaster, capon, hen/fowl rock cornish game hen, brciler/fryer

b. Turkey:

fryer-roaster, yearling, mature/old
 young turkey (hen or tom)

c. Duck:

broiler/frying duckling, roaster duckling/mature duckling

d. Goose:

young, mature

e. Guinea:

young, mature

f. Pigeon:

squab, pigeon

- 4. cut up (break down) chicken into parts.
- 5. handle and store poultry items properly.
- 6. determine doneness in cooked poultry.
- 7. illustrate trussing poultry for cooking
- 8. prepare basic bread stuffing and other selected dressings.
- 9. prepare selected poultry recipes employing standard cooking methods as outlined in content area cooking methods above.

SEAFOOD

- 1. describe how the cooking qualities of fish are affected by its lack of connective tissue.
- 2. determine doneness in cooked fish.
- 3. select appropriate cooking methods for fat and lean fish.
- 4. recognize the basic market forms of fish and shellfish.
- 5. dress and fillet round fish and flatfish.
- 6. recognize common varieties of fin fish and shellfish in American foodservice.
- 7. discuss proper inspection ofor freshness, handling and storage of fish and shelfish.
- 8. open oysters and clams, split lobster, and peel & devein shrimp.
- 9. prepare **lected recipes for fish and shellfish using standard cooking methods as listed in the content area cooking methods above.
- 10. peach fish and shellfish in court bouillon, fumet, & wine.
