#### ABSTRACT

This manual introduces the novice searcher to ERIC on Disc and discusses how to prepare for a search by creating a search statement; how to locate ERIC terms using the Thesaurus of LRIC Descriptors; and how to modify and limit the search using boolean logic. A computer keyboard illustration accompanies descriptions of the functions of the keyboard, and a step-by-step search using ERIC descriptors—i.e., subject headings—is presented. Sample screens are provided to illustrate this process. The manual concludes with an overview of other search methods and additional search options (e.g., word/phrase index, author name, title, journal, publication year) and a sample document record is provided. (MAB)

## How do I prepare to search?

1. Before you begin a search, outline in a short, concise statement exactly what kind of information is needed. Note the following example:

"I want to find information on the effect of television violence on children."

2. Analyze the search statement and list the key concepts or terms you might use. In the previous example, the concepts would be:

violence or 'crorism or aggression or crime or war

children or hoys or stildents or adolescents.

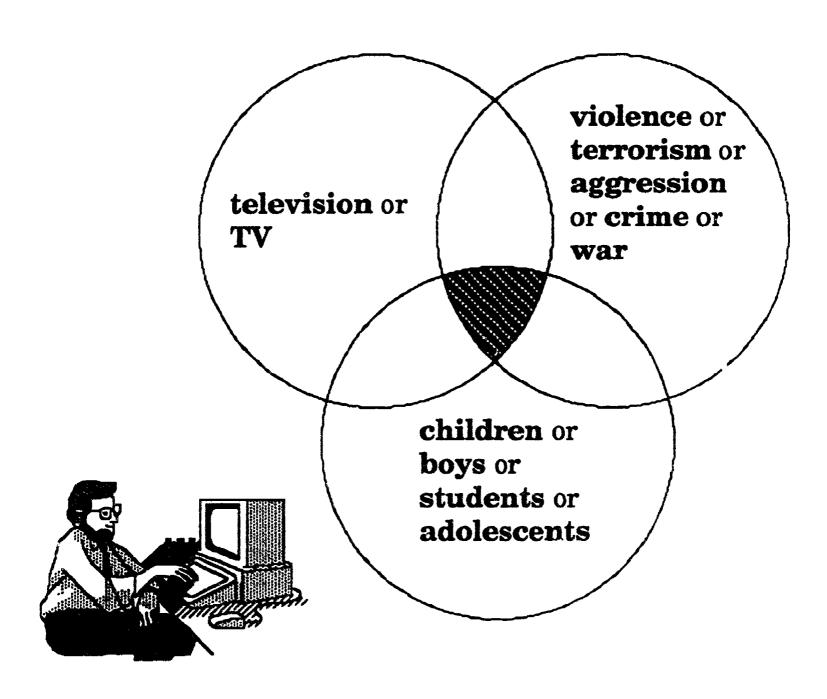

3. In order to find information using ERIC ON DISC, you need to use the same terms to look up information that ERIC uses to store information.

To match your terms to the ERIC terms, consult the <u>Thesaurus of ERIC Descriptors</u> (which is located near ERIC ON DISC) to determine the correct terms you should use.

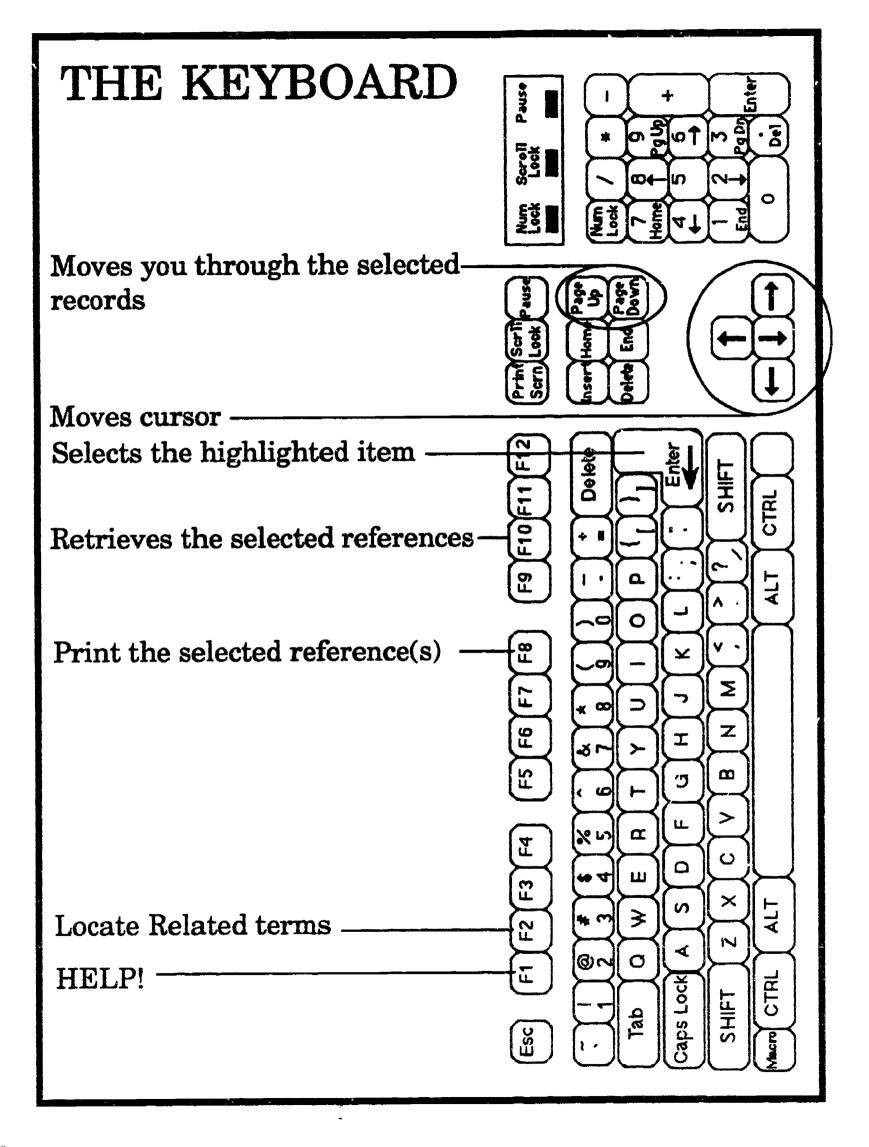

4. When ERIC ON DISC searches for these terms, they will be combined as you "modify" and "limit" your search (as seen on the screen directions). Look at the following diagram. It helps illustrate how the three concepts are combined, resulting in a search where only the records including all these terms are located. (Limiting a search this way is known as Boolean Logic.)

Taking time now to do this preparation will improve your search results. Remember, a great search result is <u>not</u> in finding 200 or 2000 citations, but in locating 20 to 30 citations which exactly fit your needs!

## Operating the Keyboard

Examine the illustration of the keyboard on the previous page. You should note that it is similar to other micro-computers. There are several keys which are important in searching...

ENTER at the side of the keyboard allows you to select the terms.

The function keys, located at the top of the keyboard, issue other commands:

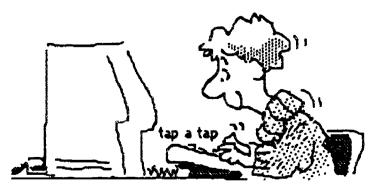

- F1 calls the Help Screens
- F2 used in locating related terms for your search
- F8 begins printing
- F10 used to complete your search.

Pressing F10 instructs the computer to gather the related records for the terms you selected, and produce a numerical report of the number of records available.

The ARROW KEYS at the side of the keyboard allow you to move the cursor about on the screen.

PAGE-UP and PAGE-DOWN allow you to move more quickly through the records.

The keys you'll use most often are ENTER to select, F10 to complete your search, and F8 t

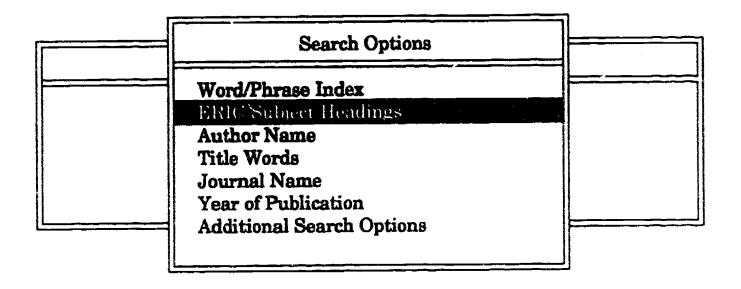

# Beginning Your Search on ERIC ON DISC

The first screen you will see is the Select Main Activity screen.

# Select Main Activity Begin a New Search sclears existing search: Select a Database (clears existing search) Database Description Help Review Search Helps Quit Easy Menu Search

From the Select Main Activity menu, choose Begin a New Search. Use the vertical arrow keys to highlight this option, and then press ENTER. The Search Options menu will then appear.

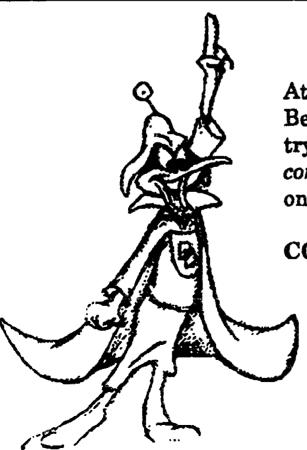

To search by subject, you would highlight either ERIC Subject Headings or Word/Phrase Index and press ENTER. For beginning searches, use the ERIC Subject Headings option. For a list of descriptors, or assigned subject headings, see the Thesaurus of ERIC Descriptors near the ERIC terminal (or at the reference desk).

After you press ENTER, you'll see the following screen...

Beginning a New Search				
MoveSelect	F9-Restart	ESC -Prev Menu		
ERIC Subject Headings:	Records	# Related Terms		
Type first few characters of Search Term				
F1-Help		ESC-Prev Menu		

At this point, type in your subject headings. Before, we used violence on television. Let's try a different example - information on content area reading. (We found this a tough one to find...) Type in the following:

CONTENT AREAREADING.

Beginning a New Search				
MoveSelect	F9-Restart	ESC -Prev Menu		
ERIC Subject Headings: Content Area Reading	Records	# Related Terms		
CONTENT ANALYSIS// JOB	0	1		
CONTENT AREA INSTRUCTION	1			
CONTENT AREA LEARNING	3	F2 for		
CONTENT AREA, READING	1,283	12 related		
CONTENT AREA READING PROGRAM	1	terms		
CONTENT AREA TEACHING	67			
CONTENT CODING	4			
CONTENT CRITERION// ITEM	1			
CONTENT CUES	3			
CONTENT DISTINCTION// FORM	1			
CONTENT EFFECT	1			
CONTENT EVALUATION	1			
CONTENT JOURNALS	1			
CONTENT KNOWLEDGE// SUBJECT				
CONTENT LEARNING	0 Entries Selected			
CONTENT QUESTIONS	0 Records found			
Move- Select/Remove F10 When Done	Esc - I	Prev Menu		

As you type, an alphabetical list of subject terms will appear. After you have typed your subject, the highlight bar should be over the subject term you typed (if it is in the list). The number of records for each term or subject heading is listed to the right of the respective term. Press ENTER to select the records on your highlighted subject.

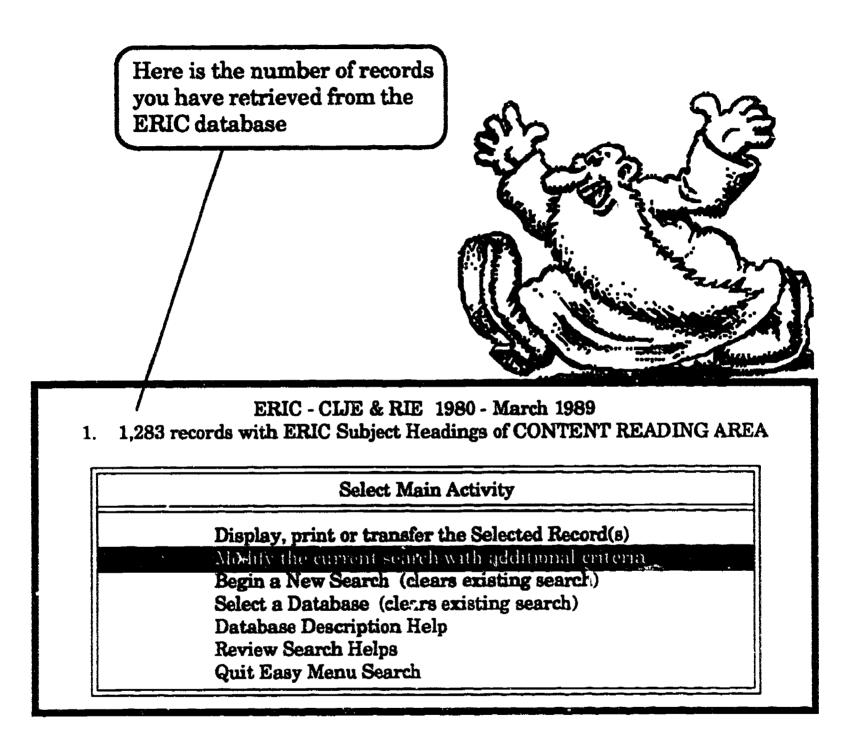

An asterick will then appear to the left of your term. (The vertical arrow keys will allow you to move to other terms which you may also select by pressing ENTER.) [Note that once you press ENTER to select a term, the highlight bar automatically moves down to the next search term.]

After selecting the term (or terms) desired, press F10 to isolate these records from the remainder of the database.

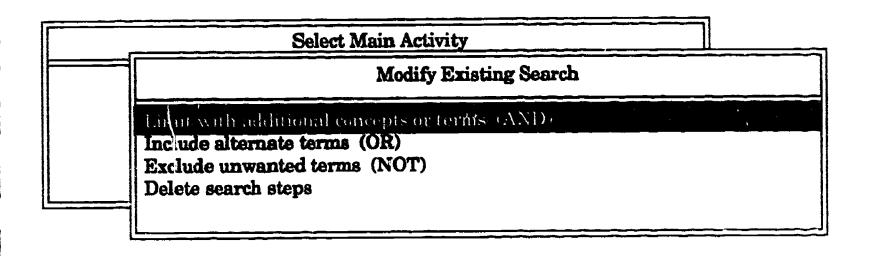

The next screen will tell you how many records you have retrieved. The SELECT MAIN ACTIVITY menu will be listed below these results.

1,283 records would be too many to locate and read!!! You will want to refine your search to a narrower focus. To do this, you need to examine your topic and perhaps limit your search by <u>discipline/subject area</u> or <u>years</u> or <u>grade level</u>. In this example, we will limit by subject area -- Social Sciences.

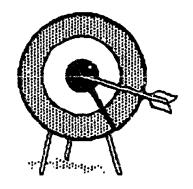

Choose Modify the current search with additional criteria on the Select Main Activity menu. The Modify Existing Search menu appears as shown below:

Select Limit with additional concepts or terms (AND). You will again see the SEARCH OPTIONS menu. Highlight either Word/Phrase or ERIC Subject Headings (ERIC Subject Headings preferred) and press ENTER.

Type in your term which will modify the search. In this case the term is **SOCIAL SCIENCES.** Press **ENTER** again to select these citations, then press **F10** to combine and isolate those records which contain both CONTENT AREA READING <u>and</u> SOCIAL SCIENCES.

Now you're targeting in on your topic...

The result is then limited to 5 records as shown below.

ERIC - CLJE & RIE 1980 - March 1989

- 1. 1,283 records with ERIC Subject Headings of CONTENT READING AREA
- 2. 5 Records remaining, limiting to those with ERIC Subject Headings of Social Sciences

#### Select Main Activity

#### Display, print or transfer the Selected Records.

Modify the current search with additional criteria

Begin a New Search (clears existing search)

Select a Database (clears existing search)

**Database Description Help** 

**Review Search Helps** 

Quit Easy Menu Search

To see the five remaining records, select Display, print or transfer the Sclected Record(s) on the Select Main Activity menu at the bottom of the screen.

The Display Format Options menu will then appear as shown below:

Sel	ect Main Activity	
Display, print or t	5 Y	
Modify the current Begin a New Sear Select a Database Database Descrip Review Search Ho Quit Easy Menu S	Complete Record Complete Record Tagged Bibliographic Reference Key Word in Context	

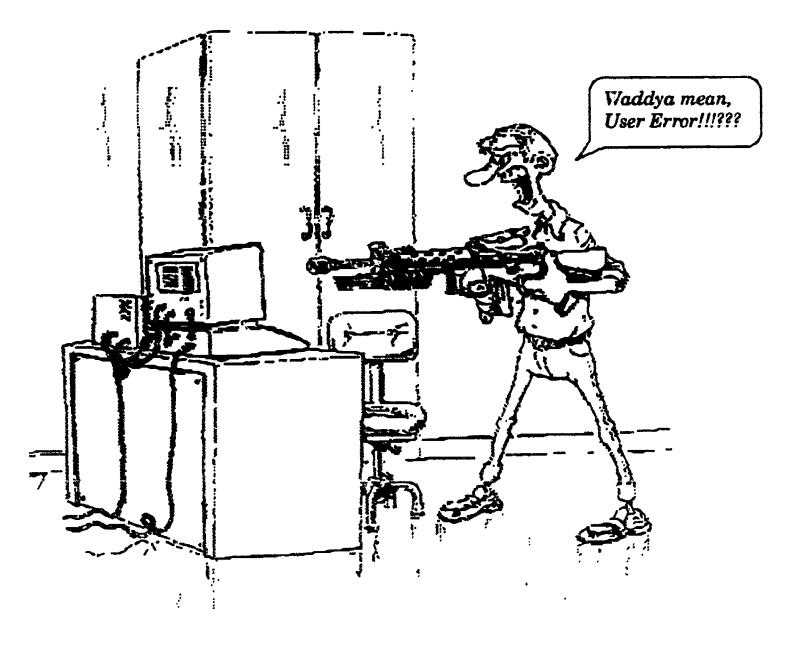

Select the option desired. Complete Record will display the bibliographic citation (author, title, source, date) and an abstract. Bibliographic Reference does not include an abstract. After you highlight an option and press ENTER, the first of the retrieved citations will be display (see next page for examples). You may page through the citations using the PAGE UP or PAGE DOWN keys. To print the citation, press F8. A menu will appear. Select the desired print option and press ENTER.

### Conclusion:

This has been an introduction to using ERIC ON DISC. Scan through the special help screens, for they will greatly aid your searching. These instructional screens will describe other types of searches you can perform, how to truncate words to include all the subject you need in your search, how to broaden your search if the results are few or narrow your search if the results are too many.

As you search, be sure to consult with the librarian on duty for additional suggestions. Some help notes follow...

# Help Notes: Other Search Methods

Note that there are other methods of searching ERIC on Disc. These include:

#### 1. Word/Phrase Index

searches by words and phrases listed in the ERIC database.

#### 2. Author Name

if the author's name is known, select this method, entering the author's last name first.

#### 3. Title

select this method and type in the main words of the title.

#### 4. Journal

this limits the search to only those articles in a particular journal.

#### 5. Year of Publication

this limits the search to a particular time period.

#### 6. Additional Search Options

please see the next page

#### Search Options

Word/Phrase Index
ERIC Subject Headings
Author Name
Title Words
Journal Name
Year of Publication
Additional Search Options

# Additional Search Options

Additional methods of searching can be used when other search methods have proven difficult.

#### 1. Words & Phrases

Searching Words & Phrases allows you to directly enter terms to be searched in titles, abstracts, subject headings, or notes. In order to learn more about using this option, highlight Words & Phrases,

Search Options Additional Search Options Wer ERI Words & Phrases Auti Major ERIC Subject Headings Title Corporate Source Jour Language Year Document Type Addi Clauringhouse Code ERIC Number Search Options Latest OnDisc Records Only

press ENTER, and then

press F1 (this will bring up the help screens that will explain how to use this option in more detail.) The main purpose of Words & Phrases is to locate information not readily accessible using ERIC Subject Headings.

#### 2. Major ERIC Subject Headings

#### 3. Corporate Source

limits your search to specific institutions.

#### 4. Language

English only

Being aware of these additional search methods is important. It is through hands-on experience that the searcher is best able to learn which search techniques will work for a particular need. A librarian will be happy to consult with you at any time when searching on ERIC on Disc

#### 5. Document Type

Limits search to either ED (Ed documents) or EJ (Ed Journals)

#### 6. ERIC Number

Retrieve by the ERIC number

#### 7. Latest OnDisc Records

This type of searching is often used as a means of updating previous searches.

Back to the Basics: Teaching Reading Skills to Social Science Students. Title

Beyer, Barry K. Author

Community College Social Science Journal, v3 n2 p14-19 Win 198 1980 Journal

Available from: Reprint: UMI

Language: English

Document Type: Journal article (080); Non-Classroom material (055)

Journal Announcement: CLJNOV81

Presents a rationale and suggests methods for teaching reading in college social science courses. Urges instructors to stress vocabulary and purpose when making reading assignments. Discusses ways of passage-marking; the skim, question, read, record, and review (SQ3R) method; and assignment mapping. (AYC) Abstract
