ABSTRACT

This guir is for an articulated two-year high school, two-year college :riculum for dairy products management developed by two postseco, lary and five secondary institutions and representatives of the private sector in Texas. The guide includes the following: (1) a brief description of the occupation of dairy products manager; (2) the basic objective of the curriculum; (3) extensive duty and task lists for dairy products management (including performance objective, standard, materials, enabling objective, and performance guide for each task); (4) a flowchart showing the recommended secondary and postsecondary course options; (5) recommended student prerequisites including academic courses; (6) basic course outlines for grades 9-14; (7) a list of secondary reference materials keyed to courses; (8) a line drawing of recommended secondary facilities; (9) a list of recommended tools/equipment and estimated costs; (10) a competency profile; (11) an example of the student monitoring and follow-up system; (12) career ladder information; (13) recommended teacher approval criteria; and (14) a sample articulation agreement. Higher Education Coordinating Board position or policy.

ACKNOWLEDGEMENTS

The project involved the participation of a number of individuals to whom the project staff is very grateful. The success of the first year of the project would not have been possible without the input provided by the advisory committee. Special credit and gratitude is extended to the members of the project Technical Advisory Committee.

TABLE OF CONTEN'S

- I. First Year Results and Benefits
- II. Job Description Dairy Products Manager
- III. Curriculum Objective
- IV. Duty and Task Listing for Dairy Products Management
- V. Recommended Secondary and Postsecondary Course Options Flowchart
- VI. Recommended Student Prerequisites
- VII. Basic Course Outlines
- VIII. Reference Materials List
- IX. Line Drawing of Recommended Secondary Facility
- X. List of Recommended Tools/Equipment
- XI. Competency Profile
- XII. Student Monitoring and Follow-up instrument
- XIII. Career Ladder Information
- XIV. Recommended Teacher Approval Criteria
- XV. Articulation Agreement

I. FIRST YEAR RESULTS AND BENEFITS

Even with the late start of the project the following activities and products have been produced:

- 1. A commitment of the two postsecondary and five secondary institutions and representatives of the private sector has been made to develop and implement a "2+2" articulated curriculum" for the agricultural occupations of poultry products management, dairy products management, retail florist management, and garden center management.
- 2. A 2+2 articulated curriculum for the occupation of dairy products management has been developed. The 2+2 articulated curriculum for the dairy products manager includes:
 - a. A brief description of the occupation of dairy products manager.
 - b. The basic objective of the curriculum
 - c. A flow chart showing the recommended secondary and postsecondary course options d. Recommended student prerequisites including academic courses

 - e. Basic course outlines for grades 9-14
 - f. A list of secondary reference materials
 - g. A line drawing of recommended secondary facilities
 - h. A list of recommended tools/equipment and estimated costs
 - i. A competency profile
 - An example of the student monitoring and follow-up system
 - k. Recommended teacher approval criteria
 - I. A sample articulation agreement

The 2+2 articulated curriculum for the dairy products manager is presented on the following pages.

It is anticipated that other school districts and two year postsecondary institutions will be able to use the curriculum as a model for linking instructional activities of secondary and postsecondary education for the preparation of technical workers in the agricultural industry.

II. JOB DESCRIPTION: DAIRY PRODUCTS MANAGER

The dairy products manager directs dairy production either independently or in conjunction with other managers pursuant to the objectives and policies of the employing company or individual.

Utilizes the management process to manage labor in a variety of dairy production settings.

Collects data about employees, identifies specific training needs/problems, implements a plan of action, and evaluates outcomes of the initiated plan. Assists with production and procedures according to company policy and customer preferences.

Er are quality of dairy products by serving as a positive role model for employees supervised. Accepts responsibility in managing, supervising, and teaching employees the importance of product quality to the customer and to the success of the company.

Performs duties on a tight schedule and must be capable of setting up and operating all equipment, operating on schedule, and maintaining sanitation and health practices to ensure a quality dairy product.

III. CURRICULUM OBJECTIVE

The curriculum is designed to produce an individual with skills, knowledge, and abilities sufficient to begin work as a dairy products manager in either the production or processing area of the dairy industry. The individual should perform safely and effectively in the position assigned to him by his employer. Graduates will be able to work independently or in a supervisory capacity.

IV. DUTY AND TASK LISTING FOR DAIRY PRODUCTS MANAGEMENT

The following is a chart showing the duty and task list for dairy products management. This list was compiled by a panel of dairy products employees. The panel consisted of employees/managers in the dairy production and dairy processing industries.

DUTIES	TASKS									
A. MILKING, SANITIZ- ING, AND MAINTAIN- ING THE EQUIPMENT	1. Sanitize the milking system	2. Assemble milking equipment	3. Prep the cow for milking	4. Milk the cow with the milking machine	5. Monitor feed and milk cooling equipment	6. Clean the milking system	7. Maintain milking system			
B. MAINTAINING DAIRY HERD HEALTH	1. Identify aliments in order to obtain timely treatment	2. Administer medication and vaccinations	3. Sterilize tools and equipment	medicines/	5. Control parasites	6. Take an animai's temperature	7. Perform in-barn maetitis test	8. Keep health records on dairy animals	9. Inventory medical and chemical supplies	10. Test milk for antibiotics
C. BREEDING	1. Examine & treat repro- ductive system for breeding	2. Detect heat	3. Artificially inseminate cows and helfers	4. Handmate cows and helfers	5. Manage Sires	6. Record breeding data	7. Store semen and main- fain breed- ing supplies	8. Pregnancy test bred cows and helfers		
C. HANDLING AND CAR- ING FOR MILKING HERDS ACCORDING TO PRODUCTION		2. Monitor eating and milk production	3. Sort cows into herds	4. Segregate incompat- ible animais	5. Dry off cows					
E. HANDLING AND CARING FOR THE DRY HERD	1. Manage dry cows	2. Assist with calving	3. Produce healthy newborn calves	4. Remove extra teats						
F. HANDLING AND CARING FOR THE REFLACEMENT HERD	1. Manage baby calves 0-8 weeks	caives 200-500 pounds	3. Identify animals	4. Dehorn animais						
G. FORMULATING AND FEEDING RATIONS	identify & regulate access to feedstuffs causing off-flavored milk	nutritive	Calculate nutritional require- ments	4. Mix & test feed ingred- lents to meet animal & ration re- quirements	animais	6. Feed animals	7. Clean feed and water troughs	8. Provide adequate water		
H. PRODUCING FORAGES	1. Design and follow a soil conservation plan	2. Prepare the seedbed	3. Plant forages	4. Control Discases	5. Control Pests	6. Control Unwanted Plants	7. Determine harvest time and harvest forages	8. Store forages		

DUTIES	TASKS									
I. OPERATING AND MAINTAINING NON- MILKING EQUIPMENT AND TOOLS	Remove or add ballast weights to tractors	2. Attach farm equipment to the drawbar	3. Operate equipment	4. Store equipment	5. Perform seasonal preventative maintenance	6. Perform daily pre- ventative maintenance on equipment	7. Replace universal joints	8. Maintain tires	9. Bleed diesel fuel systems	10. Chang fuel filters
I. OPERATING AND MAINTAINING NON- MILKING EQUIPMENT AND TOOLS	11. Change oll and oll filter	12. Flush and clean radiator	13. Replace thermostats	14. Replace radiator hoses	15. Install V-belts on pulleys	16. Install and adjust pulleys on motors	17. Install electric motor	18. Reverse electric motor	19. Service electric motors	20. install and adjus roller chains
I. OPERATING AND MAINTAINING NON- MILKING EQUIPMENT AND TOOLS	21. Install engine batteries	22. Service engine batteries	23. Service wheel or in-line bearings	24. Maintain tools	25. Adjust safety shields	26. Calibrate equipment				
J. MARKETING PRODUCTS AND ANIMALS	1. Market dairy animals/ products	2. Transport animals	3. Verify production records							
K. HANDLING AND DISPOSING OF ANIMAL WASTE	Manage and remove soild and liquid waste	2. Apply wastes to fields								
L. ASSIST IN SELECTING BREEDING ANIMALS	1. Cuil animais	2. Select foundation stock	3. Select purchased and self-raised replacement stock	4. Select sires						
M. MAINTAINING BUILDINGS AND STRUCTURES	1. Construct and install doors	Hang sliding doors	3. Hang hinged doors	4. Paint wood surfaces	5. Paint metal surfaces	6. Apply creosote or other wood preservatives	7. Patch roofs	8. install window panes	9. Weld metal using arc welder	10. Weld metal using oxy acetylen unit
M. MAINTAINING BUILDINGS AND STRUCTURES	11. Cut metal using oxy- acetylene unit	12. Construct and maintain wooden fence	13. Construct and maintain wire fence	14. Construct and maintain electric fence	15. Construct and maintain gates	16. Hang Gates	17. Wire simple electric circuits	18. Connect electric switch	19. Connect lighting fixture	20. Attac plug and rece tacle to electrica drop cor

DUTIES	TASKS									
M. MAINTAINING BUILDINGS AND STRUCTURES	21. Replace fuses	22. Reset circuit breakers	23. Maintain a water system	24. Pour concrete floor	25. Construct block walls	26, Extinguish fires	27. Maintain ventilation equipment in dairy barns	28. Paint buildings		,
N. MANAGING HAZARDOUS MATERIALS	1. Storing hazardous materials	2. Using hazardous materials	3. Disposing of hazardous materials	4. Managing dioxins	-					
O. MANAGING THE BUSINESS	Maintain health records on dairy animals	2. Inventory supplies	3. Maintain animai production records	4. Maintain pedigree records	5. Maintain equipment records	6. Maintain forage production records				
P. PREPARING FOR OWNERSHIP	Calculate Interest costs	2. Formulate feas!ble repayment schedule	3. Prepare a cash flow budget for the dairy enterprise	4. Develop and negotiate a credit plan for the farm business	5. Calculate and record assets	6. Calculate and record liabilities	7. Calculate and record expenses	8. Calculate net income	amount of	10. Calculate and record depreciation
P. PREPARING FOR OWNERSHIP	11. Calculate and record net worth of farm businesses	12. Fill out Income tax form: income or loss	Tedelai	14. Fill out federal income tax investment credit schedule	15. Fill out federal income tax FICA schedule	16. Complete federal income tax form 1040	17. Hire workers	18. Dismiss workers	19. Develop a plan for amount of labor needed	and assign work schedules
P. PREPARING FOR OWNERSHIP	21. Comply with employers iagal requirements	22. Train employees	23. Develop written work	1	25. Develop production goals	26. Comply with Industry production standards		28. Contract for professional management services	29. Develop plan for bestowing the estate	30. Calculate and record labor and managemen income
Q. STARTING UP HIGH- EMPERATURE, SHORT TIME PASTEURIZATION PROCESS		2. Adjust equipment for start-up	3. Prepare data recording equipment	4. Start temperature pasteurizat	up high- , short-time on process					
R. PROCESSING HIGH- EMPERATURE, SHORT TIME PASTEURIZATION	pasteurization process	high-tempe	quipment for rature, short- cessing	temperature	rd high- , short-time ing data	4. Put product Into storage tank				

TASKS							
Prepare lines and valves to bring new product to balance tank	2. Adjust 3. Complete equipment product changeover changeover process						
Operate lines following established sequence	2. Set recording data equipment for changeover/flush-out procedures	4. Inspect equipment for proper operation					
1. Prepare high- temperature, short-time for shut-down	2. Shut down high- temperature, short-time system 3. Inspect recording data equipment						
1. Inspect and adjust equipment and lines for cleaning	2. Perform cleaning procedures						
1. Comply with shop and equipment safety rules 2. Apply basic emergency first aid techniques	3. Complete 4. Inspect work area and equipment for safe working environment	5. Use fire 6. Correct safety hazards	7. Demonstrate cardiopulmonary resuscitudon (CPR) techniques				
8. Comply with safety requirements for working around automated systems	9. Participate in safety training program						
	valves to bring new product to balance tank 1. Operate lines following established sequence 1. Prepare high-temperature, short-time for shut-down 1. Inspect equipment and adjust equipment and lines for cleaning 1. Comply with shop and equipment safety rules 8. Comply with safety requirements for working around automated	1. Comply with safety requirements for working environment in safety training				

2!

TASK: 1. Sanitize the Milking System

Performance Objective: Given the materials listed below and a

milking system, sanitize the milking

system.

<u>Standard</u>: Each system must exhibit a bacterial count not in excess of prevailing market/milk plant standards.

<u>Materials Needed</u>: Acids, Brushes, Detergents, Drying Racks, Milking Equipment, Sanitizers, Washing Vats.

Enabling Objectives: Know the proper safety in handling acids. Know how to use liquid measure.

- 1. Prepare washing solution
- 2. Wash exterior surfaces of milking equipment
- 3. Clean manual systems
 - a. Draw hot water into washing receptacle
 - b. Measure detergent and water conditioner according to container label
 - c. Scrub equipment
 - d. Rinse equipment in hot water
 - e. Air dry equipment
- 4. Clean automated systems
 - a. Check detergent and conditioner dispenser for contents and operation
 - b. Maintain water temperature according to machine specifications
 - c. Turn on washer and allow to complete cycle
 - d. Activate sanitizing cycle prior to next milking

TASK: 2. Assemble Milking Equipment

Performance Objective: Given the materials listed below and a

milking system, assemble the milking

equipment.

Standard: The system must meet milk market sanitation standards

and operate according to proper procedure.

Materials Needed: Milking Equipment, Filters.

Enabling Objectives: Understand milking system operation.

- 1. Make sure the system has been sanitized
- 2. Install filters in the lines
- 3. Hook up lines from pump to bulk tank
- 4. Wash off milkers
- 5. Attach milkers to pulsator lines

TASK: 3. Prep the Cow for Milking

Performance Objective: Given the materials listed below and a

lactating dairy cow, prep the cow for

milking.

Standard: Teats must be clean, distended, and gorged with milk

indicating milk let-down.

Materials Needed: Bucket, California Mastitis Test Kit, Milk

Sample Container, Paper Towel, Strip Cup.

Enabling Objectives: Must be able to recognize abnormalities of

teats and udders.

Must be able to recognize abnormalities of

milk.

Know how to perform the California Mastitis

Test.

- 1. Examine the udder for:
 - a. chapping
 - b. leaking
 - c. heat
 - d. hardness
 - e. bruises or abrasions
- 2. Wash udder and teats
- 3. Dry udder and teats
- 4. Perform strip cup test
- 5. Conduct a mastitis test if required
- 6. Submit sample of milk to a laboratory if necessary
- 7. Observe teats for physical indications of milk let-down

TASK: 4. Milk the Cow with the Milking Machine

Performance Objective: Given the materials listed below and a

lactating dairy cow, milk the cow with the

milking machine.

Standard: Each cow must be completely milked out and exhibit an

empty udder.

Materials Needed: Milker.

Enabling Objectives: Know how to properly set up milking

equipment.

Know what medicine to apply to the teats.

- Shut-off vacuum while moving machine
- 2. Keep teat cup out of bedding
- 3. Attach vacuum hose
- 4. Turn on vacuum
- 5. Place teat cups on teats
- 6. Adjust machine for proper position
- 7. Observe machine for presence of milk flow
- 8. Remove the milker when milk ceases to flow
- 9. Turn off vacuum
- 10. Apply medical treatment to the teats using teat cup

TASK: 5. Monitor Feed and Milk Cooling Equipment

<u>Performance Objective</u>: Given materials below, monitor feed and cooling equipment for proper operation.

Standard: Feed handling equipment must be dispersing feed as set. Cooling equipment must be maintaining proper milk temperature as established by milk plant standards.

Materials Needed: Milk Cooling Equipment, Feed Handling Equipment.

Enabling Objectives: Know how to adjust temperature on cooling

equipment.

Know how to read thermometer.

Know how to adjust feed handling equipment.

Know how to use feed scales.

Performance Guide:

1. Be able to identify faulty operation

2. Collect the feed from on feed dispenser in a container

3. Weigh the feed

. Check feed weight against feed dispenser setting

5. Adjust dispenser for proper weight

- 6. Check temperature of milk cooling equipment for proper degree setting
- 7. Adjust as necessary

TASK: 6. Clean the Milking System

Performance Objective: Given the materials listed below and a

milking system, clean the milking system.

Standard: Each system must exhibit a bacterial count not in excess of prevailing market/milk plant standards.

<u>Materials Needed</u>: Acids, Brushes, Detergents, Drying Racks, Milking Equipment, Sanitizers, Washing Vats.

Enabling Objectives: Know the proper safety in handling acids. Know how to use liquid measure.

- 1. Prepare washing solutions
- Wash exterior surfaces of milking equipment
- 3. Clean manual systems
 - a. Draw hot water into washing receptacle
 - b. Measure detergent and water conditioner according to container label
 - c. Scrub equipment
 - d. Rinse equipment in hot water
 - e. Air dry equipment
- 4. Clean automated systems
 - a. Check detergent and conditioner dispenser for contents and operation
 - b. Maintain water temperature according to machine specifications
 - c. Turn on washer and allow to complete cycle
 - d. Activate sanitizing cycle prior to next milking

TASK: 7. Maintain Milking System

Performance Objective: Given the materials listed below and a

milking system, maintain the milking

system.

Standard: The system must operate according to equipment

specifications and handle milk according to local market

standards.

Materials Needed: Brush, Bucket, Filters, Gaskets, Milker, Milker

Hoses, Oil, Pipe Line, Vacuum Gauge.

Enabling Objectives: Know how to read a pressure gauge.

Know how to properly install inflations.

- 1. Check vacuum system for correct pressure (12-15 p.s.i.)
- 2. Clean and replace necessary parts
- 3. Inspect for milking process build up
- 4. Check pulsators and clean if necessary
- 5. Replace inflations when cracked, hard, or deteriorated
- 6. Check milk and vacuum hose for leaks
- 7. Install inflations

TASK: 1. Identify Ailments in Order to Obtain Timely

Treatment

Performance Objective: Given materials listed below and a dairy

herd, identify ailments of dairy animals.

Standard: All common ailments must be identified by the farmer or

he/she must request veterinarian assistance.

Materials Needed: Animal Rectal Thermometer, Animal Stethoscope.

Enabling Objectives: Know the symptoms of various diseases.

Know how to read a thermometer.

Know how to properly use a stethoscope.

- 1. Observe animals for abnormal behavior
- 2. Isolate the animal(s)
 - a. close observation
 - b. control spread of ailment
- 3. Determine ailment
 - a, observe vital signs
 - b. results of observations
 - c. compare results with cattle disease reference
- 4. Record findings on health chart
- 5. Contact veterinarian if necessary

TASK: 2. Administer Medication and Vaccinations

Performance Objective: Given materials listed below and a dairy

herd, administer medication.

Standard: All medication must be administered according to

specifications on the container or according to a

veterinarian's directions.

Materials Needed: Balling (Bolus) Gun, Gravity Flow Intravenous

Unit, Frick Speculum Tube, Hypodermic Syringe, Nasal Syringe, Oral Liquid Drench Syringe, Oral

Paste Gun, Stomach Tube.

Enabling Objectives: Know how to operate equipment to administer

medication.

Know symptoms of adverse reactions to

medications.

- 1. Read all instructions on medicine labels
- 2. Gather equipment/tools
- Sterilize equipment/tools
- 4. Clean the injection or medication site
- 5. Medicate animals
 - a. hypodermic injections
 - b. oral
 - c. topical
- 6. Check animal for adverse reactions to medications

TASK: 3. Sterilize Tools and Equipment

<u>Performance Objective</u>: Given materials listed below and dairy

health tools/equipment, sterilize health

tools and equipment.

Standard: All health tools and equipment must be free of any

foreign substance.

Materials Needed: Detergent, Hot Plate, Pot, Steam Sterilizer,

Towel.

Enabling Objectives: Know how to operate a hot plate safely.

Know how to use chemicals safely.

Performance Guide:

1. Dismantle health tools/equipment

- 2. Clean health tools/equipment
 - a. strong detergent
 - b. boil or steam
 - c. chemical disinfectant
- 3. Sterilize health tools/equipment
 - a. boil or steam
 - b. chemical disinfectant
- 4. Dry health tools/equipment
- 5. Coat rubber parts with sterile preservative
- 6. Reassemble with tensions off
- 7. Store in clean dry area

TASK: 4. Store Medicines/Chemicals

Given materials listed below and medicines Performance Objective:

and chemicals, store medicines and

chemicals.

All medicines and chemicals must be stored in a safe Standard:

manner according to label specifications.

Lock and Key, Refrigerator, Storage Cabinet, <u>Materials Needed:</u>

Storage Record.

Enabling Objectives:

Performance Guide:

Read all labels

- Locate or provide the required storage container or area
 - a. secure
 - b. clean
 - c. dry
 - refrigerated
- Post a warning sign on the area or container
- Secure the storage area or container with a lock
- Maintain an accurate and up-to-date record of all medicines and chemicals

 - a. date of purchaseb. use and date of uses

TASK: 5. Control Parasites

Performance Objective: Given materials listed below and a dairy

herd, control external and internal

parasites.

Standard: All animals must be free of parasites.

Materials Needed: Bailing (Bolus) Gun, Dipping Vat, Duster, Fogger

Hypodermic Syringe, Liquid Drench Syringe,

Mister, Oral Paste Gun, Sprayer.

Enabling Objectives: Know how to identify external parasites.

Know symptoms of animals with internal

parasites.

Know the life cycle of various parasites.

Know how to use treating equipment.

- 1. Collect external parasite sample for identification
- 2. Identify external parasites
 - a. lice
 - b. mites
 - c. flies
- 3. Treat external parasites with approved chemicals
 - a. spray
 - b. dip
 - c. fog
 - d. dust
- 4. Collect fecal samples for identification of internal parasites
- 5. Identify internal parasites
- 6. Administer medicines for internal parasite control
 - a. time with parasites life cycle
 - b. treat with injection
 - c. treat with oral medicine
- 7. Identify external fungus and virus infections

TASK: 5. Control Parasites (Continued)

- 8. Treat external fungus and virus infections
 - a. vaccination
 - b. topical medication
 - c. surgical removal by a veterinarian
 - d. isolate infected animal
- 9. Develop an annual plan for parasitic control

TASK: 6. Take an Animals Temperature

Performance Objective: Given materials listed below and a dairy

herd, take an animal's temperature.

Standard: The animal's rectal temperature must be determined

within one-tenth of a degree.

Materials Needed: Animal Rectal Thermometer with spring clip

attached, Paper towel

Enabling Objectives: Know proper restraint methods.

Know how to read a thermometer.

Performance Guide:

1. Restrain animal

- 2. Shake down thermometer
- 3. Lubricate thermometer
- 4. Insert thermometer into animal's anus
- 5. Remove after 2-3 minutes
- 6. Wipe clean
- 7. Record temperature
- 8. Disinfect thermometer
- 9. Store thermometer

TASK: 7. Perform In-barn Mastitis Test

Performance Objective: Given materials listed below and a dairy

cow, perform in-barn mastitis test.

Standard: All cows will be tested and evaluated for treatment if

necessary.

Materials Needed: California Mastitis Text Kit, Mastitis Medicine.

Enabling Objectives: Understand how to properly use California

Mastitis Test.

Performance Guide:

1. Strip milk from each teat into paddle

- 2. Add coagulant solution to milk
- 3. Stir milk and solution together
- 4. Observe milk for signs of coagulation
- 5. Treat cows that are infected

TASK: 8. Keep Health Records on Dairy Animals

Performance Objective: Given materials listed below and dairy herd

health information, record all health data.

Standard: All records must be accurate and up-to-date.

Materials Needed: Breeding Records, Health Records, Veterinarian

Bills.

Enabling Objectives: None.

- 1. Initiate animal's health record at birth or acquisition
- 2. Record animal's identity
- 3. Record management treatments
 - a. dehorning
 - b. extra teat removal
 - c. hoof trimming
 - d. identifying marks or tags
 - e. vaccinations
 - f. parasite treatments
 - g. calving and reproduction problems
 - h. mastitis treatment
 - i. magnet implanting
- 4. Record disease or injury treatments
 - a. diagnosis
 - b. medicine administered
 - c. prognosis
 - d. veterinarian consulted
- 5. Record death or sale information

TASK: 9. Inventory Medical and Chemical Supplies

<u>Performance Objective</u>: Given materials listed below, prepare an inventory of the supplies.

Standard: All materials must be on the inventory spelled according to the labels.

Materials Needed: Medical Supplies (or empty boxes and bottles), Chemical Supplies (or empty boxes and bottles), Inventory Form, Pencil.

Enabling Objectives: Must be familiar with medicines used.

Must be familiar with various chemicals used.

- 1. Identify all medical supplies by common name and list on inventory form
 - a. Give the number of boxes or bottles
 - b. List the total doses for dairy animals
- 2. Identify all chemicals supplies by common name and list on inventory form
 - a. Give the number of boxes or bottles
 - b. List the total quantity of chemicals of each type

TASK: 10. Test Milk for Antibiotics

<u>Performance Objective</u>: Given materials listed below and a milk sample, test the milk for antibiotics.

<u>Standard</u>: The milk samples must have antibiotic levels within milk plant standards.

Materials Needed: Antibiotic Test Kit, Milk Sample.

Enabling Objectives: Know how to take a milk sample.

Know how to use the antibiotic test kit. Know how to read the color chart properly.

- 1. Add spore suspension to melted agar medium
- 2. Put medium in petri dish to form a uniform layer
- 3. Dip 1/2 inch filter paper disc in the milk sample
- 4. Place the filter paper on the agar surface
- 5. Allow the mixture to incubate
- 6. Read the color against the color chart

DUTY: C. BREEDING

TASK: 4. Handmate Cows and Heifers

Performance Objective: Given materials listed below and a cow or

heifer in heat, inseminate the animal.

Standard: All animals in heat must be bred and settled.

Materials Needed: Breeding Records, Bull.

Enabling Objectives: Know how to handle bull safely.

Performance Guide:

1. Check record book for freshening (calving) date

2. Check cow's physical condition

3. Inseminate cow or heifer

- a. natural
 - (1) separate bull
 - (2) have veterinarian check bull's semen and general health prior to each breeding season
 - (3) turn bull in with cow or heifer
 - (4) remove bull after 24 hours

DUTY: C. BREEDING

TASK: 5. Manage Sires

Performance Objective: Given materials listed below and a bull;

feed, manage and safely handle sires.

Standard: Bulls must be handled and managed without injury to bull

or person handling.

Materials Needed: Pens, Facilities, Feed, Feed Trough, Water,

Water Trough.

Enabling Objectives: Knowledge of Animal Temperament.

- 1. Move bulls from one pen to another safely
- 2. Place feed in feed trough
- 3. Place water in water trough
- 4. Observe bull for signs of disease or injury

TASK: 1. Examine and Treat Reproductive System for Breeding

<u>Performance Objective</u>: Given materials listed below, check

reproductive system for breeding, and

infuse infected tracts.

Standard: Identify sound and/or infected-abnormal reproductive

systems.

Materials Needed: Plastic Sleeve, Lubricant, Restraining

Equipment, Cattle.

Enabling Objectives: Knowledge of reproductive anatomy.

Knowledge of treatment procedures.

Performance Guide:

1. Restrain cattle

- 2. Put on plastic sleeve
- 3. Lubricate sleeve with lubricant
- 4. Check reproductive tract for abnormalities
- 5. Treat/infuse any infected tracts

DUTY: TREEDING

TASK: 2. Detect Heat

Performance Objective: Given materials listed below and a herd of

dairy cows, detect heat.

Standard: All cows in heat must be detected.

Materials Needed: Breeding Chart, Breeding Records, Chin-ball

Marker, Patch Heat Detector, Pocket Record.

Enabling Objectives: Understand physical signs of heat.

Understand estrus cycles.

Have knowledge of reproductive anatomy.

- 1. Observe for heat activity
 - a. individual behavior
 - b. herd mates' behavior
 - c. mechanical heat indicator results
- 2. Pecord breeding observations

TASK: 3. Artificially Inseminate Cows and Heifers

Performance Objective: Given materials listed below and a cow or

heifer in heat, inseminate the animal.

Standard: All animals in heat must be bred and settled.

Materials Needed: Breeding Records, Cannisters, Clipper, Gloves,

Straw Insemination Gun, Paper Towels, Plastic

Sleeve, Semen, Semen Tank, Straws.

Enabling Objectives: Must know how to properly inseminate animals.

- 1. Check record book for freshening (calving) date
- 2. Check cow's physical condition
- 3. Inseminate cow or heifer
 - a. artificially
 - (1) select semen
 - (2) restrain animal
 - (3) thaw semen
 - (4) put plastic sleeve on
 - (5) clean vulva
 - (6) inseminate cow or heifer
 - (7) clean-up equipment
 - (8) discard waste materials
- 4. Record breeding data

TASK: 6. Record Breeding Data

Performance Objective: Given materials listed below and dairy herd

information, record breeding data.

Standard: Breeding data on all animals must be accurate and up-to-

date.

Materials Needed: Barn Chart, Breeding Slip, Breeding Wheel,

Gestation Table, Herd Book, Pocket Record,

Record Sheets, Semen Record Book, Veterinarian

Bills.

Enabling Objectives: Be able to understand record systems.

Know how to read gestation table.

- 1. Record data of heat cycle
- 2. Record insemination data
 - a. date, individual female and bull information and technician
 - b. calculate due date
- 3. Record pregnancy check data
- 4. Record freshening (calving) data
- 5. Record bull data
 - a. semen
 - b. bull (natural service)

TASK: 7. Store Semen and Maintain Breeding Supplies

<u>Performance Objective</u>: Given materials listed below and frozen

semen, store semen.

Standard: Semen must not thaw before insemination.

Materials Needed: Canes, Cannisters, Gloves, Measuring Stick,

Nitrogen Tank, Semen, Semen Record Book.

Enabling Objectives: Be familiar with safety involved in handling

liquid nitrogen.

Performance Guide:

1. Place nitrogen tank in safe area

- a. temperature and humidity
- b. safe from collision abuse
- c. safe from inadvertent tampering
- 2. Maintain liquid nitrogen level in tank above cannisters
- 3. Replace semen in cannister and store
- 4. Record the addition or removal of all semen

TASK: 8. Pregnancy Test Bred Cows and Heifers

<u>Performance Objective</u>: Given materials listed below and bred cows

or heifers, arrange pregnancy check for

bred cows and heifers.

Standard: Cows or heifers must be diagnosed as pregnart or barren.

Materials Needed: Barn Chart, Breeding Wheel, Pocket Record.

Enabling Objectives: Be able to palpate.

Be able to prepare cattle for inspection by

vet.

Performance Guide:

1. Check breeding date

2. Palpate the cows at 42 to 45 days after breeding

3. Record diagnosis

TASK: 1. Check Udder Health

Performance Objective: Given materials listed below and a dairy

herd cow check the udder for signs of

unhealthiness.

Standard: Each cow's udder is checked visually and with the

equipment listed and determined to be healthy or

unhealthy.

Materials Needed: Strip Cup, CMT Test Kit.

Enabling Objectives: Know symptoms of an unsound udder.

Know how to use a CMT Kit.

Performance Guide:

1. Visually appraise udder

2. Use strip cup to check for mastitis

3. Use CMT Test Kit to check for mastitis

FASK: 2. Monitor Eating and Milk Production

<u>Performance Objective</u>: Given materials listed below and a dairy nerd, monitor eating and milk production.

Standard: All animals off feed and production will by identified.

Materials Needed: Production Records, Feeding Records.

Enabling Objectives: None.

Performance Guide:

1 Observe cattle as they eat

2. Check feeding records against observation

3. Check production records

4. Observe and record current production

5. Compare production records against current production

TASK: 3. Sort Cows Into Herds

<u>Performance Objective</u>: Given materials listed below and a milking herd, sort cows into herds.

Standard: All cows with similar production will be grouped together.

<u>Materials Needed</u>: Milking Herd with Identification Tags, Holding Pens, Separating Equipment, Production Record.

Enabling Objectives: Ability to interpret production records and handle milk cows.

- 1. Move entire herd into holding pens
- 2. Move cattle into separating equipment as needed
- 3. Identify each cow by tag number
- 4. Check production records on each cow
- 5. Determine production levels for each herd
- 6. Place cows in appropriate herd

TASK: 4. Segregate Incompatible Animals

Performance Objective: Given materials listed below and dairy cows

identify and segregate incompatible

animals.

Standard: All incompatible animals must be segregated.

Materials Needed: Separating Equipment and/or holding pens.

Enabling Objectives: Be able to effectively work and separate

cattle.

Be able to identify incompatible animals.

Performance Guide:

1. Move entire herd into holding pens

2. Move cattle into separating equipment as needed

3. Identify each animal as compatible or incompatible

4. Separate and segregate incompatible animals

TASK: 5. Dry Off Cows

<u>Performance Objective</u>: Given materials listed below and a lactating dairy herd, dry-off cows.

Standard: All cows must be dried-off no later than two months prior to calving.

<u>Materials Needed</u>: Breeding Records, Health Records, Infusion Tubes, Mastitis Test.

Enabling Objectives: Know how to use the CMT Kit.

Know procedure for dry-treating the udder.

- 1. Check breeding records
- 2. Stop milking (dry-off) cows no later than the tenth month of lactation
- 3. Check each quarter with a mastitis test
- 4. Milk all quarters dry
- 5. Dry-treat the udder
- 6. Segregate dry cows
- 7. Observe dry-treated udders periodically

TASK: 1. Manage Dry Cows

Performance Objective: Given materials listed below and dry cows,

manage the dry cows for health and

nutrition.

Standard: All cows will remain healthy and in proper condition.

<u>Materials Needed</u>: Feeders, Facilities, Nutritional Analysis Table, Feed.

Enabling Objectives: Understand proper flesh condition (over and

under).

Understand signs of health problems.

- 1. Use nutritional analysis table to determine proper nutritional requirements
- 2. Analyze feed available to determine nutrient levels
- 3. Feed dry cows according to nutritional requirements
- 4. Evaluate dry cows for health problems

TASK: 2. Assist With Calving

Performance Objective: Given materials listed below and a calving

cow, assist the cow with calving.

Standard: All cows must be aided by the farmer and/or veterinarian

during calving.

Materials Needed: Breeding Records, Bucket, Calf Puller, Obstetric

Chains, Plastic Sleeve.

Enabling Objectives: Know the Parturition Process.

Know the Normal Presentation of a calf.

- 1. Check and confirm calving dates
- 2. Observe for signs of calving
 - a. physiological changes
 - b. individual behavior
- 3. Provide a clean, dry pen
- 4. Observe calving process
 - a. always with first-calf heifers
 - b. as needed with mature cows
- 5. Determine position of calf
- 6. Assist if calf presented in an incorrect position
- 7. Contact veterinarian if complications occur
- 8. Provide colostrum within 36 hours of birth
- 9. Make sure all calves are breathing properly

TASK: 3. Produce Healthy Newborn Calves

Performance Objective: Given materials listed below and cows with

newborn calves, formulate a baby calf

management program.

Standard: All baby calves will survive and grow at the proper

rate.

Materials Needed: Calf Facilities, Bottle, Milk Replacer, Calf

Scour Medicine.

Enabling Objectives: Causes and signs of calf scours.

Nutritional requirements for baby calves.

Performance Guide:

1. Check cow's milk supply for milk letdown and signs of problems

2. Evaluate colostrum consumption by new-born calf

3. Place calves in calf facilities

- 4. Mix milk replacer according to product specifications and put in milk bottle
- 5. Feed baby calf with bottle
- 6. Determine proper environment for baby calves.

TASK: 4. Remove Extra Teats

<u>Performance Objective</u>: Given materials listed below and dairy

heifer calves, remove extra teats.

Standard: All excess teats must be removed.

Materials Needed: Clamp Forceps, Rope, Rope Halter, Surgical

Scissors.

Enabling Objectives: Must be able to illustrate mammary anatomy.

- 1. Inspect heifer calves for extra teats
- 2. Restrain the animal
- 3. Sanitize surgical equipment
- 4. Crimp extra teat(s) at base with clamp forceps
- 5. Cut off extra teat(s) with surgical scissors
- 6. Apply topical medication
- 7. Check for proper healing

TASK: 1. Manage Baby Calves 0-8 Weeks

Performance Objective: Given materials listed below, manage baby

calves.

Standard: All baby calves will remain healthy.

Materials Needed: Milk supplement Equipment, Medication Tools,

Pens, Feed Equipment.

Enabling Objectives: Know how to properly feed baby calves.

Know about the health and treatment of baby

calves.

Performance Guide:

1. Select the equipment for feeding baby calves

- a. Mix the supplement
- b. Feed the supplement
- c. Clean the equipment
- 2. Identify sicknesses in calves
 - a. Diagnose diseases or parasites
 - b. Select medication program
 - c. Administer the medication

TASK: 2. Manage Calves 200-500 Pounds

<u>Performance Objective</u>: Given materials listed below and a

replacement herd, care for and manage the

weaned calves.

Standard: All animals will be cared for to insure proper growth

and development.

Materials Needed: Facilities, Feed Equipment, Veterinarian

Equipment, Records, Feed.

Enabling Objectives: Be able to explain proper livestock

management.

Performance Guide:

1. Select equipment for feeding calves

- a. prepare and measure feed
- b. feed the calf
- c. clean the feeder daily
- 2. Identify symptoms of diseases or parasites
 - a. diagnose disease or parasites in calves
 - b. select the medication program
 - c. Administer the medication

TASK: 3. Identify Animals

Performance Objective: Given materials listed below and a dairy

herd, identify animals.

Standard: All animals must receive a personal identification mark

within seven days of birth or acquisition.

Materials Needed: Breeding Records, Calf Registration Papers,

Camera, Freeze Brands, Metal tagger, Metal Tags, Neck chains and Numbers, Plastic tagger, Plastic

Tags, Tattoo Set.

Enabling Objectives: Know how to apply various identification

methods.

- 1. Select an identification system
 - a. ear tattoos
 - b. metal ear tags
 - c. plastic ear tags
 - d. neck chains
 - e. freeze branding
 - f. color markings and physical characteristics
- 2. Apply initial identification tag as soon as born or acquired
- 3. Record tag numbers and other data
- 4. Record color markings for registration purposes
- 5. Reapply personal identification

TASK: 4. Dehorn Animals

<u>Performance Objective</u>: Given materials listed below and horned

dairy animals, dehorn animals.

Standard: Dehorned animals must exhibit a smooth natural poll with

no evidence of infection.

Materials Needed: Electric Dehorner, Forceps, Guillotine Dehorner,

Gouge Dehorner, Restraining Chute, Scoop

Dehorner, Tube Dehorner.

Enabling Objectives: Apply various dehorning procedures.

Performance Guide:

1. Select method of dehorning based on horn size and season

- a. caustic paste
- b. electric dehorner
- c. scoop and gouge dehorner
- d. guillotine dehorner
- 2. Remove horn
- 3. Control bleeding
 - a. blood clotting substance
 - b. pressure points
- 4. Medicate wound
- 5. Check raimals periodically for proper healing
- 6. Consult veterinarian if necessary

TASK: 1. Identify and Regulate Access to Feedstuffs Causing

Off-flavored Milk

Performance Objective: Given materials listed below identify

feedstuffs which cause off-flavored milk.

Standard: All feeds which cause off-flavored milk must be

identified.

Materials Needed: Various Feedstuffs, Milk Samples,

Enabling Objectives: Know the characteristics of feedstuffs which

cause off-flavored milk.

Performance Guide:

1. Determine if each feedstuff can cause off-flavored milk

2. Record the feedstuffs determined to cause off-flavored milk

3. Taste samples of prepared milk

4. Identify the feedstuff which caused the off-flavor

TASK: 2. Classify Feedstuffs to Nutritive Value

Performance Objective: Given materials listed below, classify the

feeds as roughages or concentrates and

determine the nutritional value.

Standard: All feedstuffs will be classified as either roughages or

concentrates and their nutritional value recorded.

Materials Needed: Various Feedstuffs, Feeds and Feeding

Nutritional Chart.

Enabling Objectives: Know the characteristics of a roughage or

concentrate.

Performance Guide:

1. Observe each feedstuff sample

2. Identify the feedstuff

3. Classify each feedstuff as a roughage or concentrate

4. Use the nutritions chart to record the nutritional information about each feedstuff

TASK: 3. Calculate Nutritional Requirements for Animals

Performance Objective: Given materials listed below and a dry cow,

producing cow, and growing heifer,

calculate the nutritional requirements for these animals for optimum production and

cost efficiency.

Standard: A ration will be developed for all classes of dairy animals having maximum efficiency and minimum cost.

Materials Needed: Production Records, Feeding Standards, Commodity

Price List, Calculator, List of Feedstuffs

Available.

Enabling Objectives: Knowledge and understanding of how to feed

dairy cattle for maximum efficiency and least

cost.

Performance Guide:

1. Determine the cost/lb. for each feedstuff available

2. Determine the nutritional requirements for each type of animal

3. Compute a balanced ration for each type of animal using the feedstuffs available

4. Analyze the ration for nutritional requirements and cost efficiency

5. Record the results

TASK: 4. Mix and Test Feed Ingredients to Meet Animal and

Ration Requirements

Performance Objective: Given materials listed below and the

feedstuffs required by a given ration, mix

feed ingredients to meet ration

requirements.

Standard: All feed ingredients must be proportioned and

distributed evenly according to the requirements of the

balanced ration.

Materials Needed: Batch Mixture, Broom, Forage Metering or

Weighing Device, Drain Scoop, Grinder - Mixer,

Micro-element Meter, Roller Mill, Supplement

Meter.

Enabling Objectives: Know feedstuffs that effect milk quality.

Know how to weigh with scales.

Know how to operate machinery safely.

Performance Guide:

1. Check feedstuffs for abnormal conditions

2. Regulate access to feedstuffs that affect milk

3. Weigh ingredients according to a balanced least-cost ration

4. Blend the ingredients

TASK: 5. Weigh Animals

Performance Objective: Given the materials listed below and

animals, weigh the animals.

Standard: All animals will be weighed to within 5 lbs. of actual

weight.

Materials Needed: Scales, Facilities.

Enabling Objectives: Know how to operate the scales.

Performance Guide:

1. Balance the scales

- 2. Move the animal to be weighed onto the scales
- 3. Weigh the animal

4. Remove the animal from the scales

TASK: 6. Feed Animals

Performance Objective: Given materials listed below and a mixed

ration, feed animals.

<u>Standard</u>: Every animal must be fed according to its representative balanced ration, on schedule, and without contamination.

<u>Materials Needed</u>: Belt Feeder or Conveyers, Broom, Bucket, Forage Fork, Scales, Scoop.

Enabling Objectives: Know how to operate scales.

Know what feeds cause off-flavors.

Performance Guide:

1. Clean feeding system

2. Inspect prepared feeds for off-flavors

3. Measure feed according to individual animal's requirements

4. Feed animals according to a planned schedule

5. Check that the specified amount was delivered

6. Check for animal acceptance

TASK: 7. Clean Feed and Water Troughs

Performance Objective: Given materials listed below and a

livestock feed and water trough, clean the

troughs.

Standard: All foreign materials, soil and manure, must be removed

and the troughs washed and thoroughly cleaned.

Materials Needed: Wheel Barrow, Water, Bucket, Rubber Gloves,

Rubber Boots, Goggles, Disinfectant, Hose.

Enabling Objectives: None.

Performance Guide:

1. Remove leftover water or feed

2. Remove foreign materials (soil, manure, straw, etc.)

3. Wash and scrub all surfaces

4. Disinfect with strong disinfectant

CAUTION: Follow manufacturer's recommendation. Wear

protective clothing

TASK: 8. Provide Adequate Water

Performance Objective: Given materials listed below and a dairy

herd, water animals.

Standard: All animals must have access to clean, free choice water

that meets local and state water quality standards for

sediment, pathogenic contaminants, and chemical

pollutants.

Materials Needed: Brush, Calculator, Pliers, Screw Driver, Water

Equipment Capacity Charts, Water Quality

Standards, Water Requirements Charts for Dairy

Cattle.

Enabling Objectives: Know how to read various charts.

- 1. Determine amount of water needed for animal
- 2. Determine the capacity of water units
- 3. Determine if water meets quality standards
- 4. Clean watering equipment of foreign matter
- 5. Inspect watering equipment for proper functioning
- 6. Provide clean free choice water

TASK: 1. Design and Follow a Soil Conservation Plan

Performance Objective: Given materials listed below and access to

alternatives for crop production and crop selection, design and follow a land use

plan.

Standard: Land use plan must meet required conservation standards,

have suitable crop selection and crop rotation to

maximize production for the farm enterprise.

Materials Needed: Agricultural Stabilization Conservation Service,

Budget Information, Crop Plan, Crop Record Book,

Field and Soil Map, Livestock Plan, Soil

Conservation Information, Soil Conservation Map,

Soil Conservation Service.

Enabling Objectives: Know how to read maps.

Know the functions of ASCS and SCS.

- 1. Contact Soil Conservation Service
- 2. Register with Soil Conservation District
- 3, Obtain soil conservation map and determine:
 - a. soil capabilities
 - b. soil limitations
 - c. conservation requirements
 - d. cash crop production
 - e. livestock feed production
- 4. Assess soil capabilities and requirements
- 5. Select the crops to be grown
- 6. Establish field layout and crop rotation plan
- 7. Request Soil Conservation Plan
- 8. Follow recommended plan

TASK: 2. Prepare the Seedbed

<u>Performance Objective</u>: Given materials listed below and a proposed

forage field, prepare a seedbed.

Standard: The seedbed must be free of foreign objects, smooth, and

firm within the restrictions of available moisture.

Materials Needed: Chisel Plow, Cultipacker, Disc, Harrow,

Moldboard Plow, Tractor.

Enabling Objectives: Know how to operate a tractor safely.

Know how to adjust and operate tillage

equipment.

Performance Guide:

1. Adjust and grease implements

2. Turn under all organic matter

3. Remove stones or excess trash from the field

4. Pulverize soil into small (but not fine) particles

5. Smooth seedbed

TASK: 3. Plant forages

<u>Performance Objective</u>: Given materials listed below and a prepared

seedbed, plant a forage.

Standard: Crop must be planted at the specified depth, time, and

rate according to variety and species specifications.

Materials Needed: Broadcast Seeder, Cultipacker, Grain Drill,

Grass Seeder, Harrow, Knife, No-till Seeder,

Tractor, Tub.

Enabling Objectives: Know how to operate tractor safely.

Know how to adjust and operate planting

equipment.

Performance Guide:

1. Determine the species, variety and amount of seed needed

2. Adjust planting equipment

3. Prepare seed

a. apply lubricant

b. apply innoculant

c. mix with nurse or companion crop seed

4. Plant seed at specified depth

TASK: 4. Control Diseases

Performance Objective: Given materials listed below and forage

field, control diseases.

Standard: Disease problems must be controlled before or during an

outbreak to maximize profits.

Materials Needed: Calculator, Gloves, Respirator, Sprayer,

Tractor, Uniform.

Enabling Objectives: Know how to operate tractor safely.

Know how to calibrate sprayer and dusters.

Know symptoms of various diseases.

- 1. Determine local disease problems
- 2. Select method for disease control
 - a. resistant varieties
 - b. natural
 - c. chemical
 - (1) follow all instructions on the label
 - (2) wear protective clothing and breathing apparatus
 - (3) calibrate all sprayers and dusters
 - (4) treat seed
 - (5) treat plant
 - d. harvest early
- 3. Check for disease control

TASK: 5. Control Pests

<u>Performance Objective</u>: Given materials listed below and a forage

field, control pests.

Standard: Pest problems must be controlled before or during an

outbreak to maximize profits.

Materials Needed: Bucket, Butterfly net, Calculator, Gloves,

Respirator, Sprayer, Tractor, Uniform.

Enabling Objectives: Know how to operate tractor safely.

Know how to calibrate sprayers and dusters.

Know how to identify various pests.

- 1. Determine local pest problems
- 2. Select method for pest control
 - a. resistant variety
 - b. natural
 - c. chemical
 - (1) follow all instructions on the label
 - (2) wear protective breathing apparatus and clothing
 - (3) calibrate all sprayers and dusters
 - (4) treat seed
 - (5) treat insect habitat
 - d. harvest early
- 3. Take random collections to check results

TASK: 6. Control Unwanted Plants

Performance Objective: Given materials listed below and a forage

field, control unwanted plants.

Standard: Unwanted plants must be eliminated before going to seed.

Materials Needed: Bucket, Calculator, Coveralls, Gloves, Goggles,

Hoe, Measuring Device, Mower, Respirator, Rubber

Boots, Sprayer, Tractor.

Enabling Objectives: Know how to operate tractor safely.

Know how to calibrate sprayers.

Be able to identify unwanted plants.

Performance Guide:

1. Determine undesirable plants

2. Select method for control

a. natural

b. chemical

c. physical

3. Empoy control method

a. natural

b. chemical

c. physical

4. Check for presence of undesirable plants

TASK: 7. Determine Harvest Time and Harvest Forages

Performance Objective: Given materials listed below and a field of

forage, harvest the forage.

Standard: Forage must be cut at the recommended length and growth

stage to insure a quality and yield that meet National Resear ... Council Standards for that particular species.

Materials Needed: Baler, Forage Harvester, Moisture Tester, Mower

Conditioner, Rake, Silo Blower, Tractor, Wagon.

Enabling Objectives: Know how to operate tractor safely.

Know how to adjust and operate forage

harvesting equipment.

Performance Guide:

1. Determine growth stage

2. Adjust equipment

3. Lubricate equipment

4. Cut the forage

5. Collect the forage for storage

TASK: 8. Store Forages

Performance Objective: Given materials listed below and a

harvested forage, store the forage.

Standard: Forage must be preserved in a cost effective system that

preserves maximum nutritive value.

Materials Needed: Hay Barn, Horizontal, Limited-oxygen Silo,

Upright Silo.

Enabling Objectives: Have knowledge of various forage storage

systems.

Performance Guide:

1. Select storage system based on:

- a. consultations with specialists
- b. forages handled
- c. unit desired
- 2. Maintain storage container
- 3. Place forage in container
- 4. Check for leaks or contamination
- 5. Maintain storage records

DUTY: I. OPERATING AND MAINTAINING NON-MILKING EQUIPMENT AND TOOLS

TASK: 1. Remove or Add Ballast Weights to Tractor

Performance Objective: Provided a tractor, cast-iron or fluid

ballast weights and the necessary equipment and tools, add the ballast weights to the

tractor.

Standard: Added weight(s) must not exceed the amount of weight

tractor tires should carry.

Materials Needed: Operator's Manual, Water or Calcium-Chloride

Solution, Pump.

Enabling Objectives: None.

- 1. Determine maximum amount of added weight for tires CAUTION: Do not exceed maximum weight tractor tires should carry
- 2. Select method(s) of adding weights (fluid, cast-iron wheel or frame, or combination fluid-cast-iron)
- 3. To add fluid ballast weight:
 - a. Pump water or calcium chloride solution into tire cAUTION: Do not fill tire above upper-rim level (approximately 75%)
- 4. To add cast-iron ballast weights:
 - a. Bolt wheel weights to wheels
 - b. Bolt frame weights to frame
- 5. Addust tire pressure to accommodate weight change

2. Attach Farm Equipment to the Drawbar

Performance Objective: Provided a tractor and a piece of farm

equipment, attach the piece of equipment to

the tractor drawbar.

Attachment will be evaluated in accordance with one of Standard: the following:

PTO EQUIPMENT

Drawbar height adjusted between 13" and 17"

- HITCH position:
 - 14" @ 540 RPM a.
 - 16" @ 1000 RPM
- 3. Drawbar hitch centered directly under PTO shaft and secured
- 4. Universal joint positioned on PTO shaft and securely fastened

OTHER EQUIPMENT

- Drawbar height adjusted between 13" and 17"
- Drawbar length in EXTENDED 2. Drawbar length in CLOSE HITCH position
 - 3. Drawbar allowed to swing freely

<u>Materials Needed:</u> Open end Wrenches, Box end Wrenches, Safety Hitch Pin.

Enabling Objectives: Know how to operate a tractor safely. Know how to use hand tools properly.

- Adjust drawbar height
- Adjust drawbar length
 - EXTENDED HITCH for PTO equipment
 - 14" @ 540 RPM (1)
 - 16" @ 1000 RPM (2)
 - CLOSE HITCH for equipment not attached to PTO

TASK: 2. Attach Farm Equipment to the Drawbar (Continued)

- 3. Check lateral position of drawbar
 - a. PTO equipment:
 - (1) Center drawbar hitch point directly under PTO shaft and secure
 - b. Other equipment:
 - (1) Set drawbar swing freely
- 4. Back tractor into position so that hitch point in the drawbar is in line with the hole in the implement hitch
- 5. Set and lock tractor brakes
- 6. Disengage PTO
- 7. Turn tractor engine off
- 8. Attach implement to drawbar
- 9. Insert hitch pin

CAUTION: Do not try to put safety hitch pin in place from operator's seat while tractor is running and in gear.

TASK: 3. Operate Equipment

Performance Objective: Given materials listed below, operate each

piece of equipment.

Standard: All equipment will be operated according to instruction

manual procedures.

Materials Needed: Tractor, Tillage Equipment, Forage Harvesting

Equipment, Planting Equipment, Manure Spreading Blade Scraper, Post Hole Diggers, Rotary Mower

(Shredder), Sprayer, Operators Manual.

Enabling Objectives: Know how to operate a tractor safely.

<u>Performance Guide:</u>

- 1. Observe the equipment for proper hitching
- 2. Check the equipment for adjustment
- Ccrrect the adjustment (if necessary)
- 4. Proceed to operate the equipment following operators manual procedures

TASK: 4. Store Equipment

<u>Performance Objective</u>: Given materials listed below, prepare all

equipment for storage.

Standard: All equipment will be prepared for off-season storage.

Materials Needed: Operator's Manuals, Cleaning Material, A

Mechanic's Tool Set, Rust Preventative, Forage Equipment, Tillage Equipment, Other Equipment.

Enabling Objectives: Know how to operate tractor safely.

Performance Guide:

1. Clean equipment of foreign material

Select rust preventative

3. Apply rust preventative. Use solvent type (3 - 6 months) or soft grease type (10 - 12 months)

4. Place equipment in proper storage area

TASK: 5. Perform Seasonal Preventative Maintenance

Performance Objective: Given the materials listed below, perform

seasonal maintenance activities.

Standard: All items on the manufacturer's seasonal service list

must be performed.

Materials Needed: Grease Gun, Mechanic's Tool Set, Manufacturer's

Service Manual.

Enabling Objectives: Know how to read and interpret a service

manual.

Performance Guide:

1. Locate the seasonal preventative maintenance instructions in the service manual

- 2. Perform all 10-, 50-, 100-, and 250-hour maintenance activities
- 3. Lubricate additional points referred to in the seasonal service list
- 4. Check adjustments of all items referred to in the seasonal list. Adjust if necessary
- 5. Clean all parts referred to in the seasonal list
- 6. Replace items as recommended by the manufacturer's service manual

TASK: 6. Perform Daily Preventative Maintenance on Equipment

<u>Performance Objective</u>: Given the materials listed below, perform daily maintenance activities.

Standard: All items on the manufacturer's service list must be accomplished.

Materials Needed: Grease Gun, Mechani 's Tool Set, Manufacturer's Service Manual.

Enabling Objectives: Know how to read and use a service manual.

- 1. Locate the daily preventative maintenance instructions in the service manual
- 2. Lubricate all points listed
- 3. Check adjustments of all items listed. Make adjustments when necessary
- 4. Clean all items specifically identified for daily service
- 5. Check engine oil and hydraulic fluid levels, adjusting if necessary

TASK: 7. Replace Universal Joints

Performance Objective: Given the materials listed below and a

faulty universal joint, replace the

universal joint.

Standard: The power transfer system must operate freely according

to the operator's manual.

Materials Needed: New Universal Joint, Operator's Manual,

Mechanic's Tool Set, Grease Gun.

Enabling Objectives: Know how to use basic hand tools.

- 1. Loosen set screws on universal joint
- 2. Slide universal joint off each shaft
- 3. Check operator's manual for size of new universal joint
- 4. Slide universal joint ends back onto shafts
- 5. Tighten set screws
- 6. Grease joint at grease fitting
- 7. Operate equipment and check for correct operation and alignment

TASK: 8. Maintain Tires

<u>Performance Objective</u>: Given the materials listed below, maintain

the tires.

Standard: All tires will be inflated to proper pressure to provide

maximum service and traction.

Materials Needed: Tire/Wheel, Air Gauge, Air Compressor, Air

Hoses, Service Manual.

Enabling Objectives: Know how to operate air compressor.

Know how to read air gauge.

Performance Guide:

1. Check the wheel for cuts and abrasions, nails, or other foreign objects

2. Check the tire pressure with the air gauge

3. Inflate the tire to proper pressure recommended in the service manual

TASK: 9. Bleed Diesel Fuel System

Performance Objective: Given the materials listed below, bleed the

fuel system.

Standard: All air must be removed from the system and no engine parts should be damaged. The engine must crank and run

without excessive vibration upon completion of this

task.

Materials Needed: Diesel Engine, Diesel Fuel, Mechanic's Tool Set,

Manufacturer's Service Manual for the Engine.

Enabling Objectives: Know the parts of a diesel engine.

Know how to operate a diesel engine.

Performance Guide:

- 1. Determine the bleeding order recommended by the manufacturer from the service manual
- 2. Check fuel tank to be sure clean fuel is present
- 3. Be sure fuel shut-off valve, if applicable, is on
- 4. Locate filters, transfer pump, hand prime pump, bypass valve (if applicable), injection pump, and respective bleed plugs
- 5. Open the bleed plug on the filter nearest the tank (first stage filter)
- 6. Manually pump hand prime pump until clean fuel (without bubbles) flows out of bleed plug. Tighten bleed plugs
- 7. Open transfer pump bypass valve if applicable
- 8. Following the flow of fuel from tank to injectors, open the bleed plug of each filter, one at a time, and manually pump until you get fuel with no bubbles. Close each bleed plug before proceeding to additional filters
- 9. Bleed plugs at injector pump, if applicable, and close
- 10. Loosen the high pressure fuel line at each injector nozzle. Turn the engine over until clean fuel comes from each line. Retighten after bleeding.
- 11. Close transfer pump bypass valve, if applicable.
- 12. Crank engine.

400 85

TASK: 10. Change Fuel Filters

<u>Performance Objective</u>: Given a tractor and the materials listed

below, replace the fuel filter(s).

Standard: The fuel system will be free of air and water and there

will be no leaks.

Materials Needed: Operator's Manual, Replacement Filter(s),

Gasket(s), Open End Wrenches, Clean Rags, Catch

Pan.

Enabling Objectives: Know how to use operator's manual.

Know how to operate tractor.

- 1. Turn off fuel supply
- 2. Drain fuel from filter
- 3. Remove old filter
- 4. Clean inside of filter bowl, if applicable
- 5. Install new filter element
- 6. Reassemble filter assembly
- 7. Tighten drain valve
- 8. Turn on fuel supply
- 9. Bleed system
- 10. Start engine and check for leaks

TASK: 11. Change Oil and Oil Filter

Provided a tractor with a by-pass or full-flow oil filtering system and the materials

listed below, change the oil filter and

oil.

Standard: When completed, there will be no oil leaks and the oil level will be at, but not exceed, the "FULL" mark on the

oil dip stick.

Performance Objective:

Materials Needed: Replacement Filter, New Oil of Recommended Type

and Grade, Draw Pan, Open-end Wrenches, Box-end

Wrenches, Operator's Manual.

Enabling Objectives: Know how to operate tractor engine.

Know how to use operator's manual.

Know about the different types of oil

systems.

Performance Guide:

NOTE: Oil should be drained and replaced when new filters are installed.

- 1. Operate engine until normal operating temperature is reached.
- 2. Stop engine.
- 3. Place container for old oil in position to catch oil.
- 1. Remove oil drain plug and clean, if necessary.
- 5. Allow crankcase to drain completely.
- 6. While crankcase oil is draining:
 - a. Clean dirt from around oil filter area.
 - b. Remove drain plug from filter base (if applicable) and catch oil in container.
 - Loosen filter bowl or cover and remove.
 - d. Remove old filter cartridge and discard.
 - e. Clean inside of filter bowl and base with kerosene or diesel fuel, where applicable.
 - f. Install new gasket.
 - g. Install new oil filter unit.
 - h. Replace filter bowl, if applicable, and tighten. CAUTION: Over tightening may cause gasket damage and result in oil leakage.

TASK: 11. Change Oil and Oil Filter (Continued)

- 7. Replace crankcase drain plug and tighten.
- 8. Refill crankcase with new oil.
- 9. Start engine and let it run at low RPM for a few minutes.
- 10. Stop engine.
- 11. Check oil level on dip stick. Add oil to "FULL" line, if required.

 CAUTION: Do not exceed "FULL" line.
- 12. Dispose of used oil in a manner consistent with fire safety recommendations for stored fuel.

85

TASK: 12. Flush and Clean Radiator

<u>Performance Objective</u>: Provided a tractor and the materials listed

below, flush and cleam the radiator.

Standard: The cleaned cooling system must show no evidence of dirty coolant or foreign materials and have no leaks.

Materials Needed: Operator's Manual, Flushing Compound or Cooling

System Cleaner, Water Supply, Adjustable Pliers,

Screwdriver, Protective Goggles.

Enabling Objectives: Know how to operate engine.

Know the parts and functions of the cooling

system.

Performance Guide:

1. Run engine until thoroughly warm

- 2. Completely drain cooling system
- 3. Close drain
- 4. Refill cooling system with water
- 5. Add flushing compound or cleaner
- 6. Operate engine until normal operating temperature is reached
- 7. Check system for leaks
- 8. Drain cooling system
- 9. Refill system with water and coolant

SO 80

TASK: 13. Replace Thermostats

Performance Objective: Given a water cooled engine and the

materials below, change the thermostat.

Standard: The engine must operate with the thermostat opening and

closing properly.

Materials Needed: Mechanic's Tool Set, New Gasket, Replacement

Thermostat.

Enabling Objectives: Know how to operate engine.

Know the parts and functions of the cooling

system.

Performance Guide:

1. Drain coolant from engine and retain

- 2. Remove water hose clamp and work hose loose from thermostat cover
- 3. Remove thermostat cover bolts
- 4. Remove thermostat cover, gasket, and thermostat
- 5. Clean sealing surfaces of block and thermostat cover
- 6. Locate new thermostat in block
- 7. Apply gasket sealing compound to sealing surfaces
- 8. Locate new gasket
- 9. Replace cover, bolts and torque to recommended tightness
- 10. Reattach and clamp water hose
- 11. Replace coolant
- 12. Run engine and check for leaks

TASK: 14. Replace Radiator Hoses

Performance Objective: Given an engine on which a radiator hose

needs to be replaced, replace the hose.

Standard: The new hose must be routed so as not to kink and restrict water flow and must not leak when engine

operates at normal speed and temperature.

Materials Needed: New Hose, Mechanic's Tool Set.

Enabling Objectives: Know how to operate engine.

- 1. Drain coola t from cooling system into a clean container.
- 2. Loosen clamps on hose to be replaced.
- 3. Pull, pry, or cut old hose away from fittings.
- 4. Clean all hose and foreign material from fittings.
- 5. Inspect old clamps and determine if they need to be replaced.
- 6. Slip one end of the new hose on the engine block.
- 7. Slide both clamps temporarily over the hose.
- 8. Slip the other end of the hose on the radiator fitting.
- 9. Locate clamps and tighten.
- 10. Replace coolant.
- 11. Operate engine and check for leaks

TASK: 15. Install V-Belts on Pulleys

<u>Performance Objective</u>: Given the materials listed below, install a

V belt.

Standard: The belt must be aligned and at the tension recommended

by the manufacturer.

Materials Needed: Belt Driven Machine, Mechanic's Tool Set,

Replacement V-Belt.

Enabling Objectives: Know how to use measuring device.

- 1. Remove tension on pulleys and remove belt. Note the type of pulley as to width, depth, and design
- 2. Measure belt width and note part number on the belt
- 3. Match replacement belt to pulley type and length
- 4. Install belt
- 5. Tighten belt by adjusting to specified tension

TASK: 16. Install and Adjust Pulleys on Motors

Performance Objective: Given the materials listed below, replace

and adjust the pulley.

Standard: Equipment must operate without stress and wear on the

belt and related parts.

Materials Needed: Pulley Drive, New Pulley, Service Manual,

Mechanic's Tool Set, Pulley Puller.

Enabling Objectives: None.

Performance Guide:

1. Loosen set screw

2. Remove belt(s) as required

- 3. Place puller on pulley and remove it from shaft
- 4. Check service manual for correct size of pulley
- 5. Place new pulley on shaft
- 6. Align pulley
- 7. Tighten set screw
- 8. Replace belt(s) removed in Step 2 and adjust belt tension

TASK: 17. Install Electric Motor

<u>Performance Objective</u>: Given the materials listed below, install

an electric motor.

Standard: Install electric motor to obtain maximum efficiency in

operation.

Materials Needed: Electric Motor, Mechanic's Tool Set.

Enabling Objectives: Restate the principle of electricity.

Restate the principles of electrical control

systems.

Performance Guide:

1. Determine which motor needs replacing

2. Secure replacement according to specifications

3. Turn off power supply

4. Disconnect and remove old motor

5. Install replacement motor

6. Connect motor to power supply

7. Check wiring for OSHA and local code requirements

8. Test motor operation

TASK: 18. Reverse Electric Motor

Performance Objective: Given the materials listed below, reverse

the direction of shaft rotation on an

electric motor.

Standard: The electric motor will rotate in the opposite

direction.

Materials Needed: Electric Motor, Wiring Diagram, Screwdriver, Nut

Driver Set.

Enabling Objectives: Know how to read and interpret diagrams.

Know electrical safety.

Performance Guide:

1. Identify the type of electric motor

2. Locate the wiring diagram on che electric motor

3. Be sure the power is disconnected from the motor

4. Change the wire leads to correspond with the wiring diagram

5. On repulsion-type electric motors:

- a. Release the locking screw or spring clip that holds the ring
- b. Rotate the brush ring to the alternate position
- c. Relock the locking screw or spring clip
- 6. Reconnect the electric current to the motor

. c . S5

TASK: 19. Service Electric Motors

Performance Objective: Given the materials listed below, service

an electric motor.

Standard: Service an electric motor so that all dirt and dust is

removed, and lubricate the motor as recommended by the

manufacturer.

Materials Needed: Electric Motor, Cleaning Tools, Solvents.

Enabling Objectives: Understand the principles of electricity.

Performance Guide:

1. Review the operator's manual

- 2. Clean the housing of the motor before disassembling to clean the inside
- 3. Loosen and remove dust and foreign material with a soft brush or vacuum cleaner
- 4. Remove grease and oil with a safe solvent and a paint brush
- 5. Wipe it clean with a cloth
- 6. Examine the starting switch points and replace if burned or pitted
- 7. Reassemble motor after cleaned parts are dry
- 8. Lubricate bearings
- 9. Test the motor for proper operation

TASK: 20. Install and Adjust Roller Chains

Performance Objective: Given the materials listed below, install

and adjust roller chains.

Standard: Drive chain must transmit power from on rotating shaft to another without slippage. The links of the drive chain must mesh with the teeth of the sprockets and maintain a positive speed ratio between the driving and driven components. Drive chain and sprockets must be aligned, chain tension adjusted and the chain must be lubricated. Slippage, vibration and excessive noise must not be observed.

Materials Needed: Brush, Hammer, Solvent, Oil Can, Wrenches, Straight Edge, Lubricating Oil, Replacement Chain, Chain Detaching Tool, Chain Wear Limit Chart, Maintenance Instructions, Equipment Maintenance Manual.

Enabling Objectives: Recall and tool safety.

Be able to read maintenance instructions.

Performance Guide:

1. Install drive chain on sprockets:

A. Loosen the chain tighteners to provide slack

B. Place chain in place and bring the ends of the chain together over one sprocket so teeth holds the chain in place

C. Insert pin or pin link to couple chain together

D. Place side plate on pins or put cotter key/retaining clip in place

E. Adjust drive train tension:

- 1. Identify type and location of chain tightener:
 - a. Screw
 - b. Gravity
 - c. Spring
 - d. Catenary
- 2. Remove chain "slack":
 - a. Horizontal and inclined drives should be about 1/4 inch per foot between shaft center (with one side of chain taut)

TASK: 20. Install and Adjust Roller Chains (Continued)

- b. Vertical drives and those subject to shock loading or reversal of rotation should be adjusted so that both spans of chain are almost taut
- c. For drives on fixed centers, chain tension is usually controlled by an adjustable chain tightener such as an idler sprocket or a shoe
- d. Estimate amount of chain sag by pulling one side of chain taut, allowing the excess chain to accumulate in the opposite span
- e. Place a straight edge on the slack span and pull the chain down at the center
- f. Measure sag from the top of chain to the underside of the straight edge
- g. Adjust tightener or shaft center to provide recommended amount of sag for proper chain slack CAUTION: Never attempt to adjust chains while the machine is running. Always shut off the machine prior to servicing
- 2. Install all chain guards and shields in place prior to operation
- 3. Lubricate the chain:
 - A. Determine the method of lubrication:
 - 1. Manual:
 - a. Brush or oil can
 - b. Pressure lubricating
 - 2. Semi-automatic:
 - a. Drip cup
 - 3. Automatic:
 - a. Oil bath
 - b. Oil dish
 - c. Oil stream
 - B. Apply lubricant
- 4. Run chain drive for a short period of time so oil warms and penetrates the gap between the inside and outside plates of roller chains

TASK: 21. Install Engine Batteries

Performance Objective: Given a tractor, new battery and the

materials listed below, replace the tractor

battery.

Standard: The electrolyte level must be approximately 3/8" above

the separators and the battery cable and hold down clamps tightened sufficiently to prevent battery

movement.

Materials Needed: Electrolyte, Service Manual, Box-end Wrench Set,

Battery Carrying Strap, Clamp Puller, Rags,

Grease, Screw-driver, Battery Syringe.

Enabling Objectives: Know how to operate battery charger.

- 1. Remove battery from Box
- 2. Remove caps from battery cells
- 3. Fill battery cells with electrolyte
- 4. Slow charge the battery for 4-6 hours in well ventilated area
- 5. Turn off and remove charger when battery reaches full charge
- 6. Replace cell caps
- 7. Remove old battery from tractor
- 8. Clean battery cables and battery box
- 9. Place new battery in battery box
- 10. Tighten hold-down clamp
- 11. Connect positive cable
- 12. Connect ground cable
- 13. Test all connections for tightness
- 14. Apply thin layer of grease to battery posts and cable connections

TASK: 22. Service Engine Batteries

Performance Objective: Given the materials listed below, perform

routine service and maintenance operation

on the battery.

Standard: All items on the Checklist must be rated acceptable.

Materials Needed: Battery, Mechanic's Tool Set, Battery Clamp

Puller, Terminal Cleaning Brush, Sandpaper,
Baking Soda, Light Grease, Distilled Water

Baking Soda, Light Grease, Distilled Water,

Rags, Battery Syringe.

Enabling Objectives: Know how to use basic tools.

<u>Performance Guide:</u>

- 1. Inspect battery terminals, clamps, and cable connections for corrosion, looseness, or stripped bolts
- 2. Remove, clean and replace clamps if necessary. Install new clamps if the old ones cannot be refitted snugly
- 3. Clean corrosion, dirt and other foreign material from exterior surface of battery with a baking soda solution
- 4. Check battery mounting bracket for looseness and corrosion. Clean and/or tighten if needed
- 5. Remove cell caps
- 6. Check electrolyte level and fill to proper amount
- 7. Replace cell caps
- 8. Apply light coating of grease to battery terminals and clamps
- 9. Tighten clamps and connections

TASK: 23. Service Wheel or In-Line Bearings

Performance Objective: Given the materials listed below, lubricate

the wheel or in-line bearings.

Standard: The wheels or bearing must turn without friction, heat,

and shock.

Materials Needed: Wheel and Wheel Bearing to be Lubricated, Jack,

Wheel Puller, Mechanic's Tool Set, Grease, Rags,

Cleaning Solvent.

Enabling Objectives: Know how to operate jack safely.

Know how to properly pack wheel bearing.

- 1. Chock vehicle
- 2. Jack-up wheel
- 3. Release brakes
- 4. Remove wheel, hub, and wheel bearings
- 5. Clean bearing in solvent
- 6. Pack wheel bearing with grease
- 7. Insert bearing on spindle or in hub
- 8. Install wheel and hub
- 9. Rotate wheel to check for excess drag or looseness

TASK: 24. Maintain Tools

Performance Objective: Given the materials listed below, maintain

the tools.

Standard: All hand tools will be cleaned and sharpened to maintain

their condition.

Materials Needed: Hand Tools, Cleaning and Sharpening Equipment.

Enabling Objectives: Know the proper techniques for reconditioning

of hand tools.

Performance Guide:

1. Remove debris from tools using scrapers or cleaning solvents

2. Secure hand tools in a vise when sharpening

3. Sharpen cutting edges until all gaps are removed and the original bevel is restored

4. Apply coating of lubricant for rust protection

TASK: 25. Adjust Safety Shields

Performance Objective: Given tools and equipment listed below

adjust safety shields.

Standard: All safety guards and shields will be in place and

adjusted according to operators manual specifications.

Materials Needed: Tools, Operating Procedures, Safety

Instructions, Guards-Shields, Equipment.

Enabling Objectives: Knowledge of safety procedures and function

of guards and shields.

Performance Guide:

1. Check safety shields for proper adjustments

2. Loosen bolts holding safety shield

3. Move safety shields to proper positions

4. Retighten holding bolts

5. Recheck safety shields for proper adjustment

TASK: 26. Calibrate Equipment

Performance Objective: Given the materials listed below, calibrate

the equipment.

Standard: Calibrate equipment to obtain the adjustment recommended

in the operators manual.

<u>Materials Needed</u>: Equipment to be Calibrated, Measuring Devices.

<u>Enabling Objectives</u>: Calculated mathematical relationships

associated with volume output, speed,

pressure, and width of pattern.

Use computational and problem-solving skills in real-life situations with or without a

calculator as appropriate.

Solve problems leading to proportions

involving volume or weight.

Apply rates and percents in real-life

situations.

Understand measurement systems, instruments,

and techniques.

Performance Guide:

1. Check equipment for current adjustment

- 2. Determine the ground speed during operation
- 3. Determine the width of the equipment
- 4. Calculate the area covered per minute
- 5. Calculate the minutes needed to cover a given area
- 6. Calculate the area covered by the equipment

DUTY: J. MARKETING PRODUCTS AND ANIMALS

TASK: 1. Market Dairy Animals/Products

<u>Performance Objective</u>: Given the tools/equipment listed below and

a dairy animal/product, market dairy

animal/product.

Standard: Dairy animal/product must be marketed to produce maximum

economic return to the farm enterprises.

Materials Needed: Calculator, Current Market Quotations and Market

History, Live tock Costs and Budgets, Marketing

Information.

Enabling Objectives: Know how to use calculator.

Know how to read and interpret marketing

information.

- 1. Determine market goals and objectives
- 2. Calculate production costs
- 3. Calculate break-even information
- 4. Assess various marketing alternatives
- 5. Gelect marketing method consistent with economic information and goals
- 6. Produce for market requirements
- 7. Merchandise dairy animals/products

DUTY: J. MARKETING PRODUCTS AND ANIMALS

TASK: 2. Transport Animals

Performance Objective: Given tools/equipment listed below and

dairy animals, transport animals.

Standard: All animals being transported must be loaded and moved

without injury to the animal and handler.

Materials Needed: Loading Chute, Loading Dock, Rope Halter, Stock

Cane, Stock Prod, Stock Trailer, Truck.

Enabling Objectives: Know how to safely operate truck and stock

trailer.

Performance Guide:

1. Prepare for hauling

- a. Use safe and comfortable vehicles for transport
- b. Carry insurance on animals being hauled
- c. Avoid watering and feeding animals just prior (four to six hours) to hauling
- 2 Load animals
 - a. Avoid excitement and stress
 - b. Avoid abuse of stubborn animals
 - c. Provide skid-free loading ramps, floors, or docks
- 3. Drive slowly while transporting
 - a. Avoid sharp turns
 - b. Avoid fast starts
 - c. Avoid bumpy roads
 - d. Avoid long delays
- 4. Stop and exercise animals every 18 hours on long hauls
- 5. Unload animals
 - a. At animals' pace
 - b. Allow time for animal to acclimate

DUTY: J. MARKETING PRODUCTS AND ANIMALS

TASK: 3. Verify Production Records

Performance Objective: Given tools/equipment listed below and

production records, verify the production

records.

Standard: All records must be verified by cross-checking between

records of receipts and disbursements with records for breeding, pedigree, health, production, and maintenance.

Materials Needed: Breeding Records, Dairy Herd Improvement

Association Records, Health Records, Maintenance Records, Pedigree Records, Production Records, Record of Monthly Expenses, Record of Monthly

Receipts.

Enabling Objectives: Know how to read and interpret all records.

Performance Guide:

1. Audit all records quarterly

- 2. Compare total farm production against total farm costs and receipts
- 3. Compare milk production records with Dairy Herd Improvement Association records
- 4. Audit individual records randomly
- 5. Audit in greater detail if discrepancies are found

DUTY: K. HANDLING AND DISPOSING OF ANIMAL WASTE

TASK: 1. Manage and Remove Solid and Liquid Waste

<u>Performance Objective</u>: Given tools/equipment listed below and a

waste disposal system for a dairy herd,

manage the waste disposal system.

Standard: System must be free of odors, flies, leaks, and hazards.

<u>Materials Needed</u>: Grease Gun, Hammer, Mower, Nails, Wastes Sample Kit, Wire Nippers, Wire Strippers.

Enabling Objectives: None.

- 1. Check for foreign objects in waste-handling machinery
- 2. Grease and lubricate all bearings and gear boxes
- 3. Check electric motors for overheating
- 4. Control plant growth on lagoon banks
- 5. Control ground burrowing pests in lagoon banks
- 6. Inspect for storage leaks
- 7. Maintain fences around lagoons
- 8. Post "Keep Out" signs for safety
- 9. Take sample of waste affluent for microbial analysis by laboratory

DUTY: K. HANDLING AND DISPOSING OF ANIMAL WASTE

TASK: 2. Apply Wastes to Fields

Performance Objective: Given the materials listed below and

collected dairy herd wastes, apply wastes

to fields.

Standard: All wastes must be transported and applied in an

efficient, cost-effective, and pollution-free manner.

<u>Materials Needed</u>: Agitation Device, Conventional Box-type

Spreader, Front-end Loader, Irrigation and Pumping Equipment, Liquid Manure Injectors, Liquid Manure Spreader,

Semi-solid Manure Spreaders, Tractor.

Enabling Objectives: Know how to operate tractor safely.

Performance Guide:

1. Apply liquid manure

a. Tank spreader

b. Irrigation system

2. Apply semi-solid manure

a. Tank spreader

b. Irrigation system

c. Semi-solid manure spreader

3. Apply solid manure

DUTY: L. ASSIST IN SELECTING BREEDING ANIMALS

TASK: 1. Cull Animals

Performance Objective: Given the materials listed below and a

dairy herd, cull animals.

Standard: All animals that are below farm production standards and

whose temperaments are harmful to themselves, other

animals and/or property must be culled.

Materials needed: Breeding Records, Classification/Type Scores,

Health Records, Pedigree Records, Production

Records/DHIA.

Enabling Objectives: Know how to interpret records.

Know how to use linear evaluation.

Performance Guide:

1. Select standards for culling

- a. Milk production
- b. Reproduction
- c. Pedigree
- d. Classification/type
- e. Poor disposition
- f. Sick or injured
- 2. Cull according to chosen criteria
- 3. Dispose of culled animals

DUTY: L. ASSIST IN SELECTING BREEDING ANIMALS

TASK: 2. Select Foundation Stock

Performance Objective: Given the materials listed below and a

dairy herd, select foundation stock.

Standard: All animals selected must meet or exceed the farm

standards for production, health, disposition and

pedigree.

Materials Needed: Breeding Records, Health Records, Pedigree

Records, Production Records/DHIA, Registration

Papers, Show Records.

Enabling Objectives: Know how to interpret records.

Know how to use linear evaluation.

Performance Guide:

1. Select standards for appraisal

- a. Production history
- b. Breeding history
- c. Soundness and type
- d. Health history
- e. Disposition
- f. Genetic background
- 2. Select breeder(s) or sale
 - a. Reputation
 - b. Facilities
 - c. History
- 3. Select animals
- 4. Acquire selected animals

DUTY: L. ASSIST IN SELECTING BREEDING ANIMALS

TASK: 3. Select Purchased and Self-Raised Replacement Stock

Performance Objective: Given the materials listed below and a

dairy herd, select replacement stock.

Standard: All animals selected must meet or exceed the farm

standards for production, health, disposition and

pedigree.

Materials Needed: Breeding Records, Health Records, Pedigree

Records, Production Records, Registration

Papers, Show Records.

Enabling Objectives: Interpretation of Records.

Knowledge of visual appraisal.

Performance Guide:

1. Establish replacement plan

- a. number of animals needed per year
- b. number of on-farm animals available
- c. need for foundation stock
- 2. Select standards for appraisal
 - a. production history
 - b. breeding history
 - c. soundness and type
 - d. health history
 - e. disposition
 - f. genetic background
 - g. growth
- 3. Select animals

DUTY: L. ASSIST IN SELECTING BREEDING ANIMALS

TASK: 4. Select Sires

Performance Objective: Given materials listed below and available

sires, select herd sire(s).

Standard: All sires selected must meet or exceed current farm

production, health, disposition and pedigree standards.

Materials Needed: Breeding Records, Classification/Type Score,

Health Records, Pedigree Records, Progeny Records, Production Records, Registration Papers, Semen Quality Results, Show Records,

Sibling Production Records.

Enabling Objectives: Knowledge of visual appraisal.

Understand Sire Summary Information.

- 1. Determine selection standards
 - a. herd traits to be corrected
 - b. proven tests on daughters
 - c. repeatability of production in daughters
 - d. type/classification of daughters equal to or better than herd average
 - e. health records
 - f. breeding records
 - g. longevity records on progeny
 - h. pedigree records
 - i. semen quality
- 2. Consider recommendations of available mating programs
- 3. Select breeder
 - a. reputation
 - b. facilities
 - c. history
- 4. Select bulls

TASK: 1. Construct and Install Doors

Performance Objective: Given materials listed below construct a

door for a farm building.

Standard: All doors must be square and neither bind nor allow

excessive drafts.

Materials Needed: Bolts, Calculator, Carpenter's Square, Hammer,

Hinges, Latch, Lumber, Nails, Rollers, Sandpaper, Saw, Tape Measure, Track.

Enabling Objectives: Know how to use basic carpentry tools.

Know how to determine a bill of materials.

Performance Guide:

Sketch a drawing for door(s)

- 2. Prepare a bill of materials with estimated cost
- 3. Assemble necessary raw materials
- 4. Measure and cut door parts
- 5. Frame door
- 6. Apply sheeting
- 7. Sand finished door
- 8. Paint the door
- 9. Install hardware
- 10. Hang door

TASK: 2. Hang Sliding Doors

Performance Objective: Given the materials listed below, hang a

sliding door.

Standard: The door will slide freely and evenly.

Materials Needed: Sliding door with frame assembly, Screwdriver,

Level, Tape Measure.

Enabling Objectives: Know how to use a level.

Know how to use a tape measure.

Performance Guide:

1. Measure the opening for size

- 2. Install the sliding door assembly
- 3. Level the assembly
- 4. Fasten the assembly to the wall frame
- 5. Recheck the levelness
- 6. Open and close the door to check movement

TASK: 3. Hang Hinged Doors

Performance Objective: Given the materials listed Delow, hang a

hinged door.

Standard: The hinged door will swing level and have no cracks or

gaps when closed.

Materials Needed: Door, Hinges, Wedges, Saw, Measuring Tape,

Square, Wood Chisel, Screws, Screwdriver.

Enabling Objectives: Know how to use carpentry tools.

Performance Guide:

1. Measure and mark the door for width and height

2. Cut the door to size

- 3. Place the door in the opening and put wedges under it to raise it for clearance. Allow 1/8" clearance at top and on sides and 1/4" on bottom. (7/8" for carpeting)
- 4. Locate hinges 6 to 7 inches from the top and 10 or 11 inches from the bottom
- 5. Mark their position on the door and jamb with a wood chisel
- 6. Cut mortises for hinges
- 7. Attach hinge to door
- 8. Hold in place and attach to door jamb

TASK: 4. Paint Wood Surfaces

Performance Objective: Given materials listed below and a wood

surface such as a fence post or runner and the necessary supplies equipment, apply

paint.

Standard: The application must be evenly applied and cover all

surfaces.

Materials Needed: Clean Brushes, Cleaning Materials, Paint,

Brushes or Sprayer for Application.

Enabling Objectives: Knowledge of proper painting procedures.

Knowledge of proper clean-up procedures.

Performance Guide:

1. Inspect surface to be painted

2. Clean the surface

3. Select and prepare the paint

4. Apply paint

5. Apply finish, if applicable

6. Clean brushes and other equipment

TASK: 5. Paint Metal Surfaces

<u>Performance Objective</u>: Given the materials listed below and

provided a metal surface (structure or machine) which requires painting and the necessary supplies and equipment, clean the

surface and apply the metal paint.

Standard: The surface must be free of grease, dirt and rust and

the application must completely cover the surface.

Materials Needed: Steam Cleaning Machine (optional), Sandpaper,

Scraper, Wire Brush, Cleaning Solvent (rust-removing), Primer, Paint, Paint Brushes, Paint

Sprayer.

Enabling Objectives: Knowledge of proper painting procedures.

Knowledge of proper clean-up procedures.

- 1. Inspect the metal surface to determine extent of treatment needed
- 2. Select required materials:
 - a. cleaning solvents
 - b. brushes, sandpaper, etc.
 - c. paint brush or spray
 - d. primer and paint
- 3. Clean the surface:
 - a. remove old finish
 - b. remove all dirt, grease and rust
- 4. Apply rust-inhibiting primer coat
- 5. Apply finish coat
- 6. Clean brushes and sprayer

TASK: 6. Apply Creosote or Other Wood Preservatives

Performance Objective: Given the materials listed below and a wood

surface such as a fence post or runner and the necessary supplies and equipment, apply

wood preservatives.

Standard: The application must be evenly applied and cover all

surfaces.

Materials Needed: Clean Brushes, Cleaning Materials, Preservative,

Brushes or Sprayer for Application.

Enabling Objectives: Know safety involved in handling

preservatives.

Knowledge of proper painting procedures. Knowledge of proper clean-up procedure.

- 1. Inspect surface to be treated
- 2. Clean the surface
- 3. Select and prepare preservative
- 4. Apply preservative
- 5. Apply finish, if applicable
- 6. Clean brushes and other equipment

TASK: 7. Patch Roofs

Performance Objective: Given materials listed below and a leaking

roof, patch a roof.

Standard: Patched roofs must not leak.

Materials Needed: Hammer, Hatchet, Ladder, Metal Roofing, Nails,

Sealant, Shingles, Tape Measure, Tin Snips, Wire

Brush.

Enabling Objectives: Know how to use basic carpentry tools.

Know how to prepare a bill of materials.

Performance Guide:

1. Determine area of damage

2. Determine repair

3. Prepare a bill of materials with estimated cost

4. Procure necessary raw materials

5. Trim out damaged area

6. Clean around damaged area

7. Install replacement material

8. Apply sealant

9. Check for leaks

TASK: 8. Install Window Panes

Performance Objective: Given materials listed below and a broken

window, irstall a window pane.

Standard: All panes must be secure, leak proof, and with trim

replaced.

Materials Needed: Glass Cutter, Hammer, Nails, Pane Retainers,

Putty Knife, Tape Measure, Window Glass, Window

Putty (Caulking Compound).

Enabling Objectives: Know how to use glass working tools.

- 1. Remove trim and pane retainers
- 2. Remove damaged pane
- 3. Clean pane frame
- 4. Cut replacement pane to fit
- 5. Position pane in frame
- 6. Install pane retainers
- 7. Apply putty to seal the pane
- 8. Replace trim
- 9. Paint frame and trim if necessary
- 10. Check for leak

TASK: 9. Weld Metal Using Arc Welder

Performance Objective: Given the materials listed below and

provided arc welding equipment and subplies and two pieces of steel, arc weld the steel

pieces together at right angles using

fillet and groove welds.

Standard: The completed weld will show:

a. smooth and continuous welds.

b. complete penetration.

c. fusion between the weld bead and base metal.

d. no cracks, undercutting or overlap.

Materials Needed: Welding Helmet and Goggles, Gloves.

Enabling Objectives: Know the basic principles of arc welding.

- 1. Select safety equipment
- 2. Arrange tools and materials
- 3. Set up equipment
- 4. Clean and position metal for welding
- 5. Turn on and adjust welding machine
- 6. Weld joints using fillet and groove welds

TASK: 10. Weld Metal Using Oxy-Acetylene Unit

Performance Objective: Given the materials listed below weld two

pieces of 16 gauge metal together.

Standard: The completed weld will show:

a. smooth and continuous welds.

b. complete penetration.

c. fusion between the weld bead and base metal.

Materials Needed: 2 16 Gauge Pieces of Metal, Oxygen Cylinder,

Acetylene Cylinder, Oxygen and Acetylene Hose

Connections, Torch Blowpipe, Welding Tips,

Approved Safety Glasses and Shield.

Enabling Objectives: Know the safety requirements of using oxy-

acetylene equipment.

Know how to turn on and adjust the torch.

Performance Guide:

1. Select safety equipment

2. Arrange tools and materials

3. Set up equipment

4. Clean and position metal for welding

5. Turn on and adjust oxy-acetylene torch

6. Tack two pieces of metal at each end

7. Weld the joints using fillet welds

11. Cut Metal Using Oxy-Acetylene Unit

Performance Objective: Given the materials listed below and a

provided piece of ferrous metal, cut the metal (straight-line) with an oxy-acetylene

torch.

The edge of the cut must be square and the draglines vertical and not too pronounced.

Oxygen Cylinder, Acetylene Cylinder, Oxygen and Materials Needed:

Acetylene Hose Connections, Cutting Torch,

Cutting Torch Tips, Approved Safety Glasses and

Shield.

Enabling Objectives: Know safety requirements of using oxy-

acetylene equipment.

Know how to turn on and adjust the torch.

Performance Guide:

Draw cutting line on metal

Light and adjust preheating flame 2.

Hold cutting tip over edge of metal (vertical centerline of top should be square and in line with edge of metal)

When edge of metal is bright red, turn on cutting oxygen 4.

With cutting tip square with work, cut along premarked line 5.

TASK: 12. Construct and Maintain Wooden Fence

Performance Objective: Given materials listed below and an area

needing fenced, construct a wooden fence.

Standard: All wooden fences must meet design specifications for

spacing, height, rigidity, post placement and restrict

the animals specified.

Materials Needed: Calculator, Carpenter's Level, Carpenter's

Square, Chain Saw, Cord, Crow Bar, Hammer, Lumber, Nails, Post Driver, Post Hole Digger,

Saw, Tamper, Tape Measure.

Enabling Objectives: Know how to use basic carpentry tools.

Know how to figure a bill of materials.

Performance Guide:

1. Sketch drawing of fence

- 2. Prepare a bill of materials with estimated cost
- 3. Procure necessary raw materials
- 4. Mark location of post holes
- 5. Drill/dig post holes if necessary
- 6. Set or drive posts
- 7. Cut fencing boards
- 8. Attach boards
- 9. Cut post tops level
- 10. Paint fence
- 11. Check finished product against design standards

TASK: 13. Construct and Maintain Wire Fence

<u>Performance Objective</u>: Given materials listed below and an area needing fenced, construct a wire fence.

Standard: All wire fence must meet design specifications for height, post placement, tension and restrict the animals specified.

Materials Needed: Barbed Wire, Calculator, Carpenters Level,
Corner Post Anchor, Hammer, Nails, Posts, Post
Driver, Post Hole Driver, Spade, Tamper, Tape
Measure, Wire Nipper, Wire Stretchers, Woven
Wire.

Enabling Objectives: Know how to use basic carpentry tools. Know how to figure a bill of materials.

- 1. Sketch drawing of fence
- 2. Prepare a bill of materials with estimated cost
- 3. Procure necessary raw materials
- 4. Mark location of post holes
- 5. Drill/dig post holes if necessary
- 6. Set or drive posts
- 7. Install corner or line brace
- 8. Stretch and attach wire
- 9. Check finished fence against design standards

TASK: 14. Construct and Maintain Electric Fence

Performance Objective: Given materials listed below and an area

needing fenced, construct a electric fence.

Standard: The electric fence must be at a specified height, have

current pass through it unobstructed and restrict the

animals specified.

Materials Needed: Calculator, Electric Fencing Posts, Electric

Fencing Wire, Hammer, Iridescent Tape,

Insulators, Insulator Wire Clips, Pliers, Tape

Measure.

Enabling Objectives: Know how to use basic carpentry tools.

Know how to determine a bill of materials.

Performance Guide:

1. Sketch drawing of fence

- 2. Prepare a bill of materials with estimated cost
- 3. Procure necessary raw materials
- 4. Set posts
- 5. Install insulators
- 6. Attach wire and reflector
- 7. Install gate insulator
- 8. Install electric charger
- 9. Energize fence
- 10. Test for current

TASK: 15. Construct and Maintain Gates

Performance Objective: Given materials listed below and an opening

in a fence, construct a gate.

Standard: All gates must be square and open/close without binding

of dragging.

Materials Needed: Bolts, Calculator, Carpenter's square, Hammer,

Hinges, Latch, Lumber, Nails, Saw, Screws, Tape

Measure, Wire Snipper.

Enabling Objectives: Know how to use basic carpentry tools.

Know how to prepare a bill of materials.

- 1. Wooden gate
 - a. measure the opening
 - b. sketch drawing of gate
 - c. prepare bill of materials with estimated cost
 - d. procure necessary materials
 - e. cut boards to fit
 - f. assemble gate
 - g. attach hardware
 - h. paint gate
 - i. hang gate
 - 2. Wire gate
 - a. measure the opening
 - b. cut stakes
 - c. cut wire (barbed or woven)
 - d. stretch and attach wire to stakes

TASK: 16. Hang Gates

Performance Objective: Given materials listed below, hang a gate.

Standard: When attached, the gate must swing freely and must not sag.

<u>Materials Needed</u>: Lumber, Saw, Drill, Hammer, Bolts, Wrench, Hinges, Latch, Cable.

Enabling Objectives: Know how to use basic carpentry tools.

- 1. Study plans to determine requirements
- 2. Install hinges
- 3. Install latch
- 4. Install cable for support
- 5. Attach gate to post

TASK: 17. Wire Simple Electric Circuits

Performance Objective: Given materials listed below, install a

wiring system.

Standard: The system must meet the standards of the National Code

and Plan specifications.

Materials Needed: Set of Electrician's Tools, Wire, Electrical

Supplies, and a Plan.

Enabling Objectives: Know basic safety associated with

electricity.

Know the basics of electric wiring.

Performance Guide:

1. Make a bill of materials

- 2. Purchase materials
- 3. Install wiring
 - a. Install circuit breaker
 - b. Install 110-circuit
 - 1. Install lights
 - 2. Install light switches
 - 3. Install base plugs

TASK: 18. Connect Electric Switch

Performance Objective: Given materials listed below, connect a

single pole electrical switch.

Standard: All electrical connections must be mechanically secure

and there must be no arcing when the switch is turned ON

and/or OFF.

Materials Needed: Screwdrivers, Electrician's Pliers, Single Pole

Switch.

Enabling Objectives: Know basic safety associated with

electricity.

Know the basics of electric wiring.

Performance Guide:

1. Turn off electrical power of circuit

2. Remove face plate

3. Remove switch from receptacle

4. Remove wires from switch

5. Connect hot wire to positive pole on new switch

6. Connect white wire to ground pole on new switch

TASK: 19. Connect Lighting rixture

Performance Objective: Given materials listed below, replace a

lighting fixture.

Standard: All electrical connections must be mechanically secure

and there must be no arcing when the switch is turned ON

and/or OFF.

Materials Needed: Screwdrivers, Electrician's Pliers, Lighting

Fixture.

Enabling Objectives: Know basic safety associated with

electricity.

Know the basics of electric wiring.

<u>Performance Guide</u>:

- 1. Turn off electrical power to circuit
- 2. Remove light bulbs
- 3. Remove fixture from box
- 4. Remove wires from fixture
- 5. Connect hot wire to black wire on new fixture
- 6. Connect white wire to white wire on new fixture
- 7. Connect green wire to ground wire on new fixture

TASK: 20. Attach Plug and Receptacle to Electrical Drop Cord

<u>Performance Objective</u>: Given materials listed below, attach a plug and receptacle to an electrical cord drop.

Standard: All electrical connections must be mechanically secure and there must be no arcing when the cord is plugged in.

Materials Needed: Screwdrivers, Electrician's Pliers, 50' of Electrical Cord, Plug, Electrical Receptacle, Receptacle Box with Clamp, Duplex Cover Plate.

Enabling Objectives: Know basic safety associated with electricity.

Know the basics of electric wiring.

Performance Guide:

1. Strip wires on both ends of cord for approximately 3/4"

2. Attach plug to one end of cord following proper procedures

3. Run cord through duplex receptacle box clamp approximately 3 to 4 inches and tighten clamp around cord

Attach duplex receptacle to electrical cord

5. Attach duplex receptacle to receptacle box

6. Place and attach cover plate to receptacle

7. Plug in extension cord and test

TASK: 21. Replace Fuses

<u>Performance Objective</u>: Given materials listed below, replace a

fuse.

Standard: All electrical connections must be mechanically secure

and the fuse must maintain current in the circuit.

Materials Needed: Screwdrivers, Electrician's Pliers, Various Size

Fuses, Fuse Box.

Enabling Objectives: Know basic safety associated with

electricity.

Know the basics of electric wiring.

Performance Guide:

1. Turn off electrical power to circuit

2. Remove old fuse

3. Select the proper size fuse

4. Place new fuse in fuse box

5. Restore power to circuit and test circuit for proper operation

TASK: 22. Reset Circuit Breakers

Performance Objective: Given materials listed below, reset a

circuit breaker.

Standard: All electrical connections must be mechanically secure

and the breaker must maintain current in the circuit.

Materials Needed: Screwdrivers, Electrician's Pliers, Breaker Box

with Circuit Breakers.

Enabling Objectives: Know basic safety associated with

electricity.

Know the basics of electric wiring.

Performance Guide:

1. Check breaker box to determine which breaker has been thrown

2. Reset circuit breaker

3. Check circuit for proper operation

TASK: 23. Maintain a Water System

Performance Objective: Given materials listed below and a water

system, maintain the water system.

Standard: All water systems must supply a constant water volume and pressure for a specified size of pipe, pump and

available water source.

Materials Needed: Blow Torch, Copper Tube Cutter, Copper Tube Flare, Cutting Oil Can, Galvanized Pipe Cutter, Joint Sealer, Open-End Adjustment Wrench, Pipe Vise, Pipe Wrench, Screwdriver, Thread Cutter

(Pipe Die).

Enabling Objectives: Know the procedure for using various plumbing

tools.

Performance Guide:

1. Inspect water source for sufficient quantity

- 2. Inspect pump, wiring and switches for serviceability
- 3. Correct electrical deficiencies as needed
- 4. Inspect the pressure tank, gauges, and values for correct operation
- 5. Inspect line
- 6. Inspect specialized equipment
 - a. chlorine dispenser
 - b. filter
 - c. water softener
- 7. Correct plumbing deficiencies
- 8. Schedule a plumber for complex deficiencies
- 9. Replace faucets
- 10. Replace faucet washers
- 11. Install water pipes as needed

TASK: 24. Pour Concrete Floor

Performance Objective: Given materials listed below and an area

needing a concrete floor, pour a concrete

floor.

Standard: All concrete floors must meet design specifications for

surface texture, strength (per sq. ft.) and composition.

Materials Needed: Bolt Cutter, Broom, Concrete Level Device,

Float, Forms, Hammer, Hatchet, Level, Nails,

Pliers, Saw, Shovel, Tape Measure, Wheel Barrow.

Enabling Objectives: Know how to determine volume of concrete

needed.

Know the proper procedure for setting forms,

placing reinforcement materials, finishing

concrete, and curing concrete. Know how to perform a slump test.

- 1. Determine strength of concrete needed
- 2. Determine volume needed
- 3. Construct forms or set grade stakes
- 4. Place and level base material
- 5. Place reinforcement material in place
- 6. Purchase readi-mix or mix concrete
- 7. Perform slump test
- 8. Pour and level wet concrete
- 9. Float and finish the surface
- 10. Allow to cure
- 11. Remove forms and cover

TASK: 25. Construct Block Walls

<u>Performance Objective</u>: Given materials listed below, construct a block wall.

Standard: The wall must be straight, level, and plumb and must meet plan specifications.

Materials Needed: Cement Mixer, Mortar Trowel, Blocks, Mortar Mix, Plumb Line, Level, Construction Plans, Water, Sand, Chalk Line.

Enabling Objectives: Know how to lay blocks following standard procedure.

Know how to use a level and plumb line.

- 1. Place mortar mix, sand, and water in cement mixer according to correct ratios.
- 2. Mix thoroughly with concrete mixer
- 3. Lay out wall with chalk line
- 4. Apply base layer of mortar
- 5. Build corners
- 6. Use plumb line on corners to lay stretcher blocks in wall
- 7. Check levelness and plumbness on each layer
- 8. Clean tools when finished

TASK: 26. Extinguish Fires

Performance Objective: Given materials listed below and a fire,

extinguish the fire.

Standard: All fires must be extinguished.

Materials Needed: Blanket, Fire Extinguisher, Gloves, Hard Hat,

Sand.

Enabling Objectives: Know how to use fire extinguisher.

Performance Guide:

1. Contact Fire Department with accurate information

2. Asses danger factors for people and property

3. Determine type/class of fire

4. Use extinguish device

a. Reduce critical combustion temperature

b. eliminate fuel source

(1) oxygen

(2) combustible material

5. Assess cause and damage

TASK: 27. Maintain Ventilation Equipment in Dairy Barns

×*****************************

Performance Objective: Given materials listed below and a dairy

barn ventilation system, maintain the

ventilation equipment in dairy buildings.

Standard: The ventilation system of a building must maintain a

temperature of not greater than 75 F + or -10 degrees

and a humidity of not greater than 55% + or - 10

percentage points.

Materials Needed: Clean Rags, Oil Can, Open-end Wrench, Pliers,

Screwdriver.

Enabling Objectives: Know how to use basic tools.

- Locate ventilation fan(s)
- 2. Check electric motor(s) for overheating
- 3. Check belts(s) for fraying or tension
- 4. Test thermostat for accuracy
- 5. Test humidistat for accuracy
- 6. Clean fan blades, grill or louvers
- 7. Test fan and louvers for freedom of operation

TASK: 28. Paint Buildings

Performance Objective: Given materials listed below and a building

to be painted, paint the building.

Standard: All surfaces must be completely covered and the paint

must not sag or run.

Materials Needed: Paint Mixer, Brush, Roller or Spray Gun, Paint,

Scraper/Sand Paper/Paint Remover, Air

Compressor, Ladder.

Enabling Objectives: Know how to estimate amount of paint needed.

Know how to operate spray equipment.

- 1. Determine kind of paint suited for use intended
- 2. Estimate amount of paint needed
- 3. Prepare surface
- 4. Mix paint
- 5. Apply paint with brush, roller or spray gun
- 6. Clean equipment

1. Storing Hazardous Materials

<u>Performance Objective</u>: Given materials listed below, store the

hazardous materials according to chemical

specifications.

Standard: All hazardous materials will be stored according to

manufacturers and USDA standards.

Materials Needed: Hazardous Material Container, Material Data,

Storage Instruction, Safety Equipment Relating

to Material.

Enabling Objectives: Know the dangers involved with improper

storage of hazardous materials.

Performance Guide:

- 1. Read the material data
- 2. Read the storage instructions on the container
- Use proper safety handling equipment
 Check all containers for leakage
- 5. Store hazardous materials according to instructions

. 143

TASK: 2. Using Hazardous Materials

<u>Performance Objective</u>: Given materials listed below and hazardous

materials, use the materials.

Standard: All hazardous materials, will be used according to

manufacturers specifications.

Materials Needed: Equipment for Hazardous Materials, Hazardous

Materials, Chemical Gloves, Goggles, Respirator.

Enabling Objectives: Know how to handle and use hazardous

materials according to label instructions.

- 1. Read the directions for use of the hazardous materials
- 2. Dress in hazardous material handling equipment
- 3. Prepare the hazardous materials for use
- 4. Apply the hazardous materials according to directions
- 5. Clean up the equipment
- 6. Store according to directions

TASK: 3. Disposing of Hazardous Materials

<u>Performance Objective</u>: Given the materials listed below. dispose

of hazardous materials.

Standard: Hazardous material will be disposed of in a safe manner

which meets State and Federal Regulations.

Materials Needed: Hazardous Materials, Disposal Site, Safety

Equipment.

Enabling Objectives: Know materials which are hazardous.

Know regulations dealing with hazardous

materials.

Performance Guide:

1. Determine which materials are hazardous

2. Dress with safety equipment

3. Check directions for disposal

4. Dispose of hazardous materials according to State and Federal Regulations

TASK: 4. Managing Dioxins

Performance Objective: Given materials listed below, handle, use

and store dioxins.

Standard: All dioxins will be handled and used and stored

according to manufacturers recommendations and State and

Federal Guidelines.

Materials Needed: Proper Equipment and Storage Facilities for

Handling Dioxin, Instruction Concerning

Products.

Enabling Objectives: Knowledge of proper handling and use of

materials containing dioxins.

Performance Guide:

1. Read the instructions for the dioxin materials

2. Dress in proper handling equipment

- 3. Prepare the dioxin materials according to manufacturers specifications.
- 4. Use the dioxin materials
- 5. Store the dioxin materials according to standards
- 6. Clean up equipment
- 7. Dispose of dioxin materials according to manufacturers and State and Federal Regulations
- 6. Clean up equipment
- 7. Dispose of dioxin materials according to manufacturers and State and Federal Regulations

DUTY: O. MANAGING THE BUSINESS

TASK: 1. Maintain Health Records on Dairy Animals

Performance Objective: Given materials listed below and dairy herd

health information, maintain all health

data.

Standard: All records must be accurate and up-to-date.

<u>Materials Needed</u>: Breed Records, Health Records, Veterinarian

Bills.

Enabling Objectives: Know how to keep records.

- 1. Initiate animal's health record at birth or acquisition
- 2. Record animal's identity
- 3. Record management treatments
 - a. dehorning
 - b. extra teat removal
 - c. hoof trimming
 - d. identifying marks or tags
 - e. vaccinations
 - f. parasite treatments
 - g. calving and reproduction problems
 - h. mastitis treatments
 - i. magnet implanting
- 4. Record disease or injury treatments
 - a. diagnosis
 - b. medicine administered
 - c. prognosis
 - d. veterinarian consulted
- 5. Record death or sale information

DUTY: O. MANAGING THE BUSINESS

TASK: 2. Inventory Supplies

Performance Objective: Given materials listed below and storage

units, prepare inventory of supplies.

Standard: The completed inventory must be in agreement with

marketing and harvesting records and the recorded

expenses for supplies.

Materials Needed: Calculator, Inventory and Crop Record Forms,

Measuring Tape, Monthly Farm Records, Price

Lists, Tables for Estimating Physical Amounts of

Crops in Storage.

Enabling Objectives: Know how to use calculator.

Know how to record and interpret farm

records.

- 1. List all supplies on hand for a given date
- 2. Determine dollar value of supplies
- 3. Calculate present content of storage units
- 4. Determine the dollar value of harvested crop
- 5. Record the inventory

DUTY: O, MANAGING THE BUSINESS

TASK: 3. Maintain Animal Production Records

Performance Objective: Given materials listed below and production

records, maintain the production records.

Standard: All records must be maintained by cross-checking between records of receipts and disbursements with records for

breeding, pedigree, health, production, maintenance.

Materials Needed: Breeding Records, Dairy Herd Improvement

Association Records, Health Records, Maintenance Records, Pedigree Records, Production Records, Record of Monthly Expenses, Record of Monthly

Receipts.

Enabling Objectives: Know how to read and interpret record keeping

system.

Performance Guide:

1. Record all information daily or weekly

2. Audit all records quarterly

3. Compare total farm production against total farm costs and receipts

4. Compare milk production records with Dairy Herd Improvement Association records

5. Audit individual records randomly

6. Audit in greater detail if discrepancies are found

DUTY: O. MANAGING THE BUSINESS

TASK: 4. Maintain Pedigree Records

<u>Performance Objective</u>: Given materials listed below, maintain

pedigree records.

Standard: All records will be accurate and up-to-date.

Materials Needed: Accounting Records, Breeding Records, Dairy Herd

Improvement Association Records, Health Records, Pedigree Registration Certificate, Pocket Record

Book, Production Records.

Enabling Objectives: Know how to read and interpret record keeping

systems.

Performance Guide:

1. Record all information monthly

2. Audit all records quarterly

3. Compare all records against DHIA records and pedigree registration certificates

4. Audit individual records randomly

5. Audit in greater detail if discrepancies are found

DUTY: O. MANAGING THE BUSINESS

rask: 5. Maintain Equipment Records

<u>Performance Objective</u>: Given materials below and equipment

maintenance data, maintain equipment

records.

Standard: All equipment must be identified with records on

maintenance and repairs accurate and up-to-date.

Materials Needed: Accounting Records, Equipment Record Book,

Operator's Manual, Warranty Certificate.

Enabling Objectives: ow how to read and interpret operators

manual.

Know how to read and interpret warranty

certificate.

- 1. Engrave all equipment with identification mark
- 2. Record periodic maintenance activities
- 3. Record and submit warranty papers
- 4. Record depreciation schedules
- 5. Record original and repair costs

DUTY: O. MANAGING THE BUSINESS

TASK: 6. Maintain Forage Production Records

<u>Performance Objective</u>: Given materials listed below and forage

production data, maintain forage production

records.

Standard: All soil and crop records must be accurate and up-to-

date.

Macerials Needed: Chemical Bill, Fertilizer Bill, Permanent Crop

Record, Pocket Record Book, Seed Bill, Seed Tag,

Soil Test Report.

Enabling Objectives: Know how to read and interpret soil test

reports.

Performance Guide:

1. Record soil test information

2. Record crop inputs

3. Record yield data

TASK: 1. Calculate Interest Costs

Performance Objective: Given materials listed below and access to

farm records, calculate and record interest

costs for a year.

Standard: Calculations and recordings must accurately reflect

interest costs for the farm business.

Materials Needed: Agriculture Finance Publications, Calculator,

Complete Farm Records, Farm Records Summary.

Enabling Objectives: Know how to use a calculator.

Know how to read and interpret farm records.

Know how to calculate interest.

- 1. Determine interest ratio for farm borrowing
- 2. Estimate borrowing needs for current year
- 3. Calculate interest costs for the year
- 4. Record data

TASK: 2. Formulate Feasible Repayment Schedule

Performance Objective: Given materials listed below and access to

farm records, formulate a feasible

repayment schedule for a year.

Standard: Calculations and recordings must accurately reflect a

repayment schedule for the farm business.

Materials Needed: Agriculture Finance Publications, Calculator,

Complete Farm Records, Farm Records Summary.

Enabling Objectives: Know how to read and interpret farm records.

Performance Guide:

1. Determine farm receipts and operating expenses for the year

2. Use the cash flow budget to determine needs

3. Formulate a repayment schedule for the farm business

TASK: 3. Prepare a Cash Flow Budget for the Dairy Enterprise

<u>Performance Objective</u>: Given materials listed below and a blank

cash flow statement form and current

financial data, prepare a cash flow budget

for the dairy enterprise.

<u>Standard</u>: The cash flow budget will show total income, total expenditures and the cash difference without error.

Materials Needed: Current Financial Data to 'nclude Source(s) and Amounts of: Operating Income, Capital Sales, Non-Farm Income, Operating Expense, Capital Expenditures, Other Expenditures, Calculator.

Enabling Objectives: Know how to read and interpret farm records.

Know how to use calculator.

Performance Guide:

NOTE: Include only cash transactions that have occurred

- 1. Enter source(s) and amounts of operating income
- 2. Total operating income
- 3. Enter source(s) and amounts of capital sales
- 4. Total capital sales
- 5. Enter source(s) and amounts of non-farm income
- 6. Total non-farm income
- 7. Enter source(s) and amounts of operating expenses
- 8. Total operating expenses
- 9. Enter source(s) and amounts of capital expanditures
- 10. Total capital expenditures
- 11. Enter source(s) and amounts of other expenditures
- 12. Yotal other expenditures
- 13. Total all income
- 14. Total all expenditures
- 15. Calculate each difference between total income and total expenditures

TASK: 4. Develop and Negotiate a Credit Plan for the Farm

Business

Performance Objective: Given materials listed below, develop and

negotiate a credit plan for the farm

business.

Standard: Instructor must be satisfied that amount of credit is

justified and loan repayment is within cash flow ability

of the farm enterprise.

Materials Needed: Agricultural Credit Publications, Calculato.,

Cash Flow Statement, Comparative Trend Analysis

Sheet, Net Worth Statement, Profit/Loss

Statement.

Enabling Objectives: Know how to complete various financial

statements.

- 1. Determine need for credit plan for farm business
- 2. Complete the following financial statements:
 - a. Net Worth Statement
 - b. Profit/Loss
 - c. Cash Flow Statements
 - d. Comparative Standard Analysis Sheet
- 3. Identia, items for which credit will be needed
- 4. Assess providers of lending services
- 5. Select provider of lending service
- 6. Develop credit plan for the farm business
- 7. Negotiate credit

TASK: 5. Calculate and Record Assets

Performance Objective: Given materials listed below, calculate and

record assets.

Standard: Instructor must confirm that calculations and recordings

measure farm assets at market value.

Materiais Needed: Calculator, Complete Farm Business Financial

Records, Inventories, Microco puter, Financial

Statement, Software Programs.

Enabling Objectives: Know the different kinds of assets.

Performance Guide:

1. Assess assets

a. List all property

b. Assign fair market value on all property

- c. Categorize all assets as either current, intermediate, or fixed
- d. Determine the total assets by adding values of current, intermediate, and fixed assets
- e Record data

TASK: 6. Calculate and Record Liabilities

Performance Objective: Given materials listed below, calculate and

record liabilities of the farm business.

Standard: Instructor must confirm that calculations and recordings

measure at market value farm liabilities.

Materials Needed: Calculator, Complete Farm Business Financial

Records, Inventories, Microcomputer, Financial

Statement, Software Programs.

Enabling Objectives: Know the characteristics of different

liabilities.

Performance Guide:

1. Determine liabilities

a. List all obligations

- b. Categorize all liabilities as either current, intermediate, or fixed
- c. Determine the total liabilities by adding values of the current, atermediate, and fixed liabilities
- d. Record data

TASK: 7. Calculate and Record Expenses

Performance Objective: Given materials listed below, calculate and

record monthly/yearly farm operating

expenses.

Standard: Calculations and recordings must be accurate and include

all the operating expenses for the farm enterprise.

Materials Needed: Agriculture Finance Publications, Calculator,

Cash Flow Chart, Farm Record Books.

Enabling Objectives: Know how to read and interpret firm records.

Know how to use calculator.

Performance Guide:

1. Identify information

- a. Cancelled checks
- b. receipts paid
- c. unpaid bills
- d. bank statements
- e. tax records

2. Determine farm operating expenses

- a. separate family/household expenses from farm
- b. sort farm expenses into enterprise
- 3. Record/transmit data to record books or accounting service

TASK: 8. Calculate Net Income

Performance Objective: Given materials listed below and access to

farm records, calculate and record net

income for a year.

Standard: Calculations and recordings must accurately reflect net

income for the farm business.

Materials Needed: Agriculture Finance Publications, Calculator,

Complete Farm Records, Farm Records Summary.

Enabling Objectives: Know how to read and interpret farm records.

Know how to use a calculator.

- 1. Determine farm receipts and operating expenses for the year
- 2. Subtract cash expense for the year from cash income for the year
- 3. Record net cash operating income for the year
- 4. Record any non-cash expense and income
- 5. Make adjustments to net cash income
- 6. Record net income for the year

TASK: 9. Calculate Amount of Life Insurance Needed

Performance Objective: Given materials listed below, size and

value of your farming enterprise and mortgage, calculate amount of life

insurance needed.

Standard: The insurance coverage must provide an amount sufficient

to maintain the enterprise for the family in case of

death.

Materials Needed: Calculator, Credit Records, Farm Records.

Enabling Objectives: Know about the different kinds of life

insurance.

- 1. Define life insurance terms
- 2. Determine amount of money owed
- 3. Determine amount needed for the continuance of the enterprise
- 4. Determine costs
- 5. Obtain interpretation of insurance coverage
- 6. Compare available insurance for amount, type, and long term cost and benefits
- 7. Contract for coverage

TASK: 10. Calculate and Record Depreciation

Performance Objective: Given materials listed below, calculate and

record depreciation.

Standard: Instructor must confirm that calculations and recordings

are accurate and reflect the depreciation method most advantageo's to the farm enterprise for the current

year.

Materials Needed: Agriculture Depreciation Publications,

Calculator, Farmer's IRS Income Tax Guide, IRS

Publications, Microcomputer, Depreciation

Software Programs.

Enabling Objectives: Know how to operate computer and software.

Know different methods of depreciation.

Performance Objective:

1. Define terms in calculating depreciation

- 2. Determine depreciation records needed for farm business
- 3. List available depreciation methods
- 4. Compare advantages and disadvantages of each method
- 5. Select most advantageous method
- 6. Using selected method, calculate and record depreciation
- 7. Using selected computer software program, calculate and record depreciation

TASK: 11. Calculate and Record Net Worth of Farm Businesses

Performance Objective: Given materials listed below, calculate and

record net worth of farm business.

Standard: Calculations and recordings must measure net worth gain

from productivity on a cost basis and net worth at

market value.

Materials Needed: Calculator, Complete Farm Business Financial

Records, Inventories.

Enabling Objectives: Know how to use calculator.

Know how to read and interpret farm financial

records.

Performance Objective:

1. Assess assets

- 2. Determine liabilities
- 3. Determine net worth
- 4. Record net worth

TASK: 12. Fill Out Income Tax Form: Income or Loss

Performance Objective: Given materials listed below and records of

farm income and farm expense, complete income tax form Income or Loss Schedule.

Standard: The completed schedule must include all income or loss of the farm enterprise.

Materials Needed: Agriculture Tax Publications, Calculator,

Farmer's Tax Guide, IRS Capital Gains Form, IRS

Farm Schedule, IRS Investment Credit Form,

Record Books.

Enabling Objectives: Know how to read and interpret farm records.

- 1. Record totals of farm income
- 2. Record totals of farm expense
- 3. Compute gain or loss
- 4. Enter in appropriate spaces on farm business income or loss schedule
- 5. Transfer information to other tax forms

TASK: 13. Fill Out Federal Income Tax Capital Gains or Loss

Performance Objective: Given materials listed below, records of

capital gains or losses, and short- and long-term capital gains or losses, complete federal income tax capital gains or loss

schedule.

Standard: The completed schedule must include all capital gain or

loss items of the farm enterprise.

Materials Needed: Agriculture Tax Publications, Calculator,

Farmer's Tax Guide, IRS Capital Gains Form,

Record Books.

Enabling Objectives: Know how to read and interpret farm records.

- 1. Record sales of all eligible items for capital gains or loss
- 2. Record purchase of eligible items
- 3. Record improvements made on eligible items since purchase
- 4. Record number of months eligible items are held
- 5. Assess short- or long-term capital gains or losses for eligible items
- 6. Record informations on proper tax schedule

TASK: 14. Fill out Federal Income Tax Investment Credit

Schedule

<u>Performance Objective</u>: Given materials listed below and items and

records subject to investment credit, complete federal income tax investment

credit schedule.

Standard: The completed schedule must include all investment

credit items of the farm enterprise.

Materials Needed: Agriculture Tax Publications, Calculator,

Farmer's Tax Guide, IRS Capital Gains Form,

Record Books.

Enabling Objectives: Know how to read and interpret farm records.

- Record qualified investment and realistic life of items subject to investment credit
- 2. Compute investment credit appropriate to item(s) on investment credit schedule
- 3. Complete records of sales of items subject to investment credit
- 4. Record information in appropriate spaces on income tax investment credit schedule

TASK: 15. Fill Out Federal Income Tax FICA Schedule

Performance Objective: Given materials listed below, farm income

eligible for FICA, and farm gain or minimum income, complete federal income tax FICA

schedule.

Standard: The completed schedule must include all FICA-related

items of the farm enterprise.

Materials Needed: Agriculture Tax Publications, Calculator,

Farmer's Tax Guide, IRS FICA Schedule, Record

Books.

Enabling Objectives: Know how to read and interpret farm records.

- 1. Assess farm income eligible for FICA taxes
- 2. List farm income eligible for FICA taxes
- 3. Calculate FICA taxes due
- 4. Record information in proper spaces on FICA schedule

TASK: 16. Complete Federal Income Tax Form 1040

<u>Performance Objective</u>: Given materials listed below, completed

federal tax schedules, and federal income tax form 1040, complete federal income tax

form 1040.

Standard: The completed form must include all income information

of the farm enterprise and the tax due/refund amount

must be correct.

Materials Needed: Agriculture Tax Publications, Calculator,

Completed Federal Income Tax Forms and

Schedules, Farmers' Tax Guide, Record Books.

Enabling Objectives: Know how to read and interpret farm records.

- 1. Obtain completed federal income tax schedules
- 2. Transfer bottom line figures from:
 - a. Farm income or loss schedule
 - b. capital gains or loss schedule
 - c. investment credit schedule
 - d. FICA schedule
- 3. Enter "other" income in appropriate boxes
- 4. Calculate total income and deductions
- 5. Calculate taxable income
- 6. Compute tax due (or refund)
- 7. Record information in correct spaces on tax forms
- 8. Attach W-2 forms to federal income tax form
- 9. Send completed tax form to appropriate tax office with supportive materials as required

TASK: 17. Hire Workers

Performance Objective: Given materials listed below, an assessment

of labor needed, competencies required, potential employee(s), training record and

record of employment, hire worker(s).

Standard: Workers must be hired according to state/federal

regulations and with qualifications that meet the needs

of the farm enterprise.

Materials Needed: Agriculture Bulletins, Complete Farm Management

Service Publications, Government Regulations

Publications (Federal Register), Job

Description.

Enabling Objectives: Know how to conduct an interview.

Know how to read and interpret bulletins and

publications.

- 1. Check state/federal employment regulations
- 2. Assess the amount of labor needed
- 3. Assess degree of competency required
- 4. Contact prospective employees
- 5. Interview prospective worker(s)
- 6. Inform potential employee as to responsibilities and requirements of the job
- 7. Select desired employees

TASK: 18. Dismiss Workers

Performance Objective: Given materials listed below, an assessment

of labor needed and record of employee(s)

performance, dismiss worker(s).

Standard: Workers must be dismissed according to state/federal

employment regulations and to meet the needs of the farm

enterprise.

Materials Needed: Agriculture Bulletins, Complete Farm Management

Service Publications, Government Regulations

Publications (Federal Register).

Enabling Objectives: Know how to read and interpret bulletins and

publications.

Performance Objective:

1. Check state/federal regulations on worker Gismissal

2. Assess manpower needs

3. Assess employee performance

4. Establish/document any cause for dismissal

5. Dismiss employees

TASK: 19. Develop a Plan for Amount of Labor Needed

<u>Performance Objective</u>: Given materials listed below, assess labor

needs, and develop plan for amount of labor

needed.

Standard: Tr plan for labor supply must meet the labor needs of

tha farm enterprise.

Materials Needed: Agriculture Bulletins, Budget Materials,

Complete Farm Management Informational

Resources, Farm Management Service Publications.

Enabling Objectives: Know how to read and interpret farm bulletins

and publications.

Performance Objective:

1. Assess amount of labor required

2. Assess available labor force

3. Study feasibility of additional mechanization to extend labor supply

4. Study feasibility of altering the enterprise to adjust to labor supply

5. Determine peak work loads

6. Determine labor requirements for the enterprise

TASK: 20. Develop and Assign Work Schedules

Performance Objective: Given materials listed below, ability of

available labor, labor timetable, tax

assignment, and supervision plan, develop

employee work schedules.

Standard: The work schedule must provide the labor and time

allotment for task performance.

Materials Needed: Calender, Work Record Book.

Enabling Objectives: None.

- 1. Assess amount and ability of available labor
- 2. Assess times and season for work assignment
 - a. Milking
 - b. Crop planting/harvesting
 - c. Holidays, vacations, etc.
 - d. unplanned absences (emergencies etc.)
- 3. Assess minimum and maximum labor needs
- 4. Assign responsibility for work tasks

TASK: 21. Comply With Employers Legal Requirements

<u>Performance Objective</u>: Given materials listed below, access to

employee wage, hour, and tax information, and potential benefits for workers, comply with legal requirements by establishing pay

scale and benefits for workers.

Standard: The developed pay scale and benefits must assure competitive compensation in the local job market for retention of qualified employees and be within the

ability of the enterprise to pay for it.

Materials Needed: Current Periodicals and Magazines that Provide

Help Wanted Position Desired Ads, Farmers' Tax

Guide, Farm Management Information Resource,

Farm Management Service Publications.

Enabling Objectives: Know how to read and interpret federal

quidelines.

- 1. Assess workers' backgrounds and experience
- 2. Establish wage incentives
- 3. Calculate and record base pay
- 4. Calculate fringe benefits
- 5. Record dollar value of fringe benefits
- 6. Prepare a payroll schedule for employees

TASK: 22. Train Employees

Performance Objective: Given materials listed below, description

of a worker's background and experience, and itemized training required, train the

worker.

Standard: Upon completion, the worker must be able to perform each

task assigned to the minimum competence specified.

Materials Needed: Agriculture Bulletins, Complete Farm Management

Information Resource, Current Agriculture

Periodicals and Magazines, Farmers' Tax Guide, Farm Informational Resource, Farm Management

Service Publications.

Enabling Objectives: Know how to work with people.

- 1. Assess worker's background and experience
- 2. Select task(s) for which skill(s) is lacking
- 3. Demonstrate the performance of each task
- 4. Have worker demonstrate same task(s)
- 5. Supervise worker's performance
- 6. Evaluate worker's performance

TASK: 23. Develop Written Work Agreements

Performance Objective: Given materials listed below, develop a

written work agreement.

Standard: The written work agreement must be acceptable to the

employer and employee, and meet federal and state

guidelines.

Materials Needed: Work Agreement, Employee Requirements, Employer

Requirements, Budget Materials, Complete Farm

Management Information Resources, Farm

Management Service Publications, Federal and

State Employer Bulletins

Enabling Objectives: Know how to read and interpret state and

federal publications.

- 1. Determine employer requirements
- 2. Determine employee requirements
- 3. Determine federal and state requirements
- 4. Develop a written work agreement

TASK: 24. Evaluate Work Performance

* ****************

<u>Performance Objective</u>: Given materials listed below, evaluate work

performance.

Standard: Evaluation form must be completed, signed by evaluator

and employee, and processed and filed according to

company's guidelines.

Materials Needed: Employee, Employee's File, Position Description,

Employee Evaluation Form.

Enabling Objectives: Know how to fill out an evaluation form.

Know how to recall employee's performance of

tasks.

Know how to recall company standards.

Performance Objective:

1. Review employee's file for memos, written warnings, and evidence of continuing education

2. Obtain a company evaluation form

- 3. Record the tasks that must be performed by the employee on the evaluation form
- 4. Rate employee's performance of specified tasks according to company's standards:
 - a. average
 - b. above average
 - c. below average
- 5. Record any comments and recommendations for employee improvement
- 6. Discuss evaluation with the employee
- 7. Sign evaluation
- 8. Request the employee's signature
- 9. Give the employee a copy of the completed evaluation
- 10. File a copy of the completed evaluation in the departmental files
- 11. Submit the completed evaluation to appropriate person/department

TASK: 25. Develop Production Goals

Performance Objective: Given materials listed below, dairy

animals, their yield ability, and inventory

of facilities, labor, and equipment,

develop herd production goals.

Standard: The herd production goals must be matched to the

available animals, facilities, feed resources, labor,

and management of the farm enterprise.

Materials Needed: Budget, Calculator, Dairy Enterprise

Publications.

Enabling Objectives: Know how to use a calculator.

Know how to read and interpret farm records.

- 1. Assess prevailing climate of production region
- 2. Assess amount of feed available
- 3. Assess available facilities
- 4. Assess available equipment
- 5. Assess available labor
- 6. Assess Evel of management
- 7. Assess availability of capital
- 8. Match farm enterprise goals with available resources

TASK: 26. Comply With Industry Production Standards

Performance Objective: Given materials listed below and a dairy

animal/product, market dairy animal/product

within industry production standards.

Standard: Dairy animal/product must be marketed with industry

production standards to produce maximum economic return

to the farm enterprise.

Materials Needed: Calculator, Current Market Quotations and Market

History, Livestock Costs and Budgets, Marketing

Information, AMPI Information.

Enabling Objectives: Know how to read and interpret market

information.

- 1. Determine market goals and objectives
- 2. Calculate production costs
- 3. Calculate break-even information
- 4. Assess various marketing alternatives
- 5. Select marketing method consistent with economic information and goals
- 6. Produce for market requirements
- 7. Merchandise dairy animals/products

TASK: 27. Analyze Trends in Dairy Product Demand

Performance Objective: Given materials listed below and a dairy

animal/product, analyze trends in dairy

product demand.

Standard: Trends in Dairy Product Demand should be analyzed to

produce maximum economic return to the farm enterprise.

Materials Needed: Calculator, Current Market Quotations and Market

History, Livestock Costs and Budgets, Marketing

Information.

Enabling Objectives: Know how to read and interpret market

information.

- 1. Determine market goals and objectives
- 2. Calculate production costs
- 3. Calculate break-even information
- 4. Assess various marketing alternatives
- 5. Select marketing method consistent with economic information goals, and trends in demand.
- 6. Produce for market requirements
- 7. Merchandise dairy animals/products to meet trends in demand

TASK: 28. Contract for Professional Management Services

Performance Objective: Given the materials listed below and a need

for the service, contract for a professional management service.

Standard: The professional management service must be economically

feasible for the farm enterprise and provide the

required services.

Materials Needed: Agricultural Management Publications, Complete

Farm Management Information Resource, Farm

Management Service Publications

Enabling Objectives: Know how to read and understand agricultural

publications.

Performance Objective:

1. Assess service needs

- a. level of personal competence
- b. available equipment/tools
- c. available funding
- d. criticalness of needed services
- 2. Compare available services
 - a reliability
 - b. accessibility
 - c. cost
- 3. Select required management services
- 4. Negotiate contract

TASK: 29. Develop Plan for Bestowing the Estate

Performance Objective: Given the materials listed below, develop a

plan for bestowing the estate.

Standard: All resources of the farm enterprise must be included in

the plan and must be compatible to family and farm

enterprise goals.

Materials Needed: Agricultural Estate Publications, Complete

Financial Records.

Enabling Objectives: Know how to prepare a net worth statement.

- 1. Determine assets, liabilities, and net worth
- 2. Identify heirs and alternate heirs
- 3. Identify estate goals
- 4. Obtain legal services
- 5. Review alternative methods
- 6. Select alternative most compatible to family and farm enterprise goals.
- 7. Contract for bestowal
- 8. File documents

TASK: 30. Calculate and Record Labor and Management Income

<u>Performance Objective</u>: Given the materials listed below, calculate and record labor and management income.

Standard: The instructor must agree that calculations and recordings reflect the exact amount of management and labor income generated in the farm enterprise.

Materials Needed: Agricultural Management Publications,
Calculator, Farm Business Management Records,
Microcomputers, Appropriate Software.

Enabling Objectives: Know the formulas for calculating labor and management income.

- 1. Review definitions of terms used in the calculation of labor and management income.
- 2. Assign a rate of return on farm investment.
- 3. Assign a labor income.
- 4. Assign a management payment.
- 5. Review records needed to calculate management income.
- 6. Review records needed to calculate labor income.
- 7. Calculate management income.
- 8. Calculate labor income.
- 9. Record management income.
- 10. Record labor income.
- 11. Use a selected computer program to calculate and record labor and management income.

DUTY: Q. STARTING UP HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION PROCESS

TASK: 1. Inspect Equipment Prior to Start-up

<u>Performance Objective</u>: Given the materials listed below, inspect equipment prior to sta t-up.

Standard: The equipment will be inspected to meet USDA, Texas Health Department, FDA, AMPI, and customer standards.

<u>Materials Needed:</u> HTST Previously Cleaned, Properly Trained Operator, General Management Practices to Follow.

Enabling Objectives: Know lock-out procedures.

Know how to determine worn gaskets and valves.

- 1. Inspect outward appearance of HTST unit. Check for presence of product, caustic, soil
- 2. Inspect fittings and gaskets to determine if gaskets or fittings are bad
- 3. Inspect valves for proper working condition
- 4. Inspect pumps for worn impeller, seals, gaskets, bearings or face plates

DUTY: Q. STARTING UP HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION PROCESS

TASK: 2. Adjust Equipment for Start-up

<u>Performance Objective</u>: Given the materials listed below, adjust equipment for start-up.

Standard: The equipment will be adjusted to meet USDA, Texas Health Department, FDA, AMPI, and customer standards.

Materials Needed: HTST Previously Cleaned, Properly Trained Operator, General Management Practices to Follow.

Enabling Objectives: Know customer specifications.

- 1. Make hook-ups from CIP to process on HTST unit
- Make hook-ups on product tank and flow verters
- 3. Pull sample on product tank to be processed
- 4. Check sample to be sure customer specifications are being met (SNF, BF, flavor, acid)

DUTY: Q. STARTING UP HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION PROCESS

TASK: 3. Prepare Data Recording Equipment

<u>Performance Objective</u>: Given the materials listed below, prepare recording data equipment.

Standard: The equipment will be prepared to meet USDA, Texas Health Department, FDA, AMPI, and customer standards.

Materials Needed: Recording Equipment, Recording Chart #, Rubber Stamp.

Enabling Objectives: Know how to change recording chart.

- 1. Change recording chart at the beginning of each shift (8:00 am, 4:00 pm, 12 am)
- 2. Properly label chart with operator, date, product, and shift
- 3. Check recording pens for proper operation and ink

DUTY: Q. STARTING UP HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION PROCESS

TASK: 4. Start-up High-temperature, Short-time Pasteurization Process

<u>Performance Objective</u>: Given the materials listed below, start-up high temperature, short-time pasteurization process.

Standard: The process will be meet USDA, Texas Health Department, FDA, AMPI, and customer standards.

Materials Needed: HTST Properly Cleaned, Properly Trained Operator, General Management Practices to Follow.

Enabling Objectives: None.

- 1. Turn on the power to energize the control panel
- 2. Start water to the balance tank
- 3. Start the pumps
- 4. Place HTST on recycle
- 5. Start steam to bring temperature up
- 6. Set the speed and differential pressure
- 7. Check and record cut-in and cut-out temperatures
- 8. Check and record indicating temperature

TASK: 1. Monitor Pasteurization Process

Performance Objective: Given the materials listed below, monitor the

pasteurization process.

Standard: The pasteurization process will meet all USDA, FDA, Texas

Health Department, AMPI, and customer standards.

Materials Needed: WTST properly cleaned, HTST in process, Trained

Operator, General Management Practices to Follow.

Enabling Objectives: None.

Performance Guide:

1. Check product coming into balance tank

2. Adjust speed and differential pressure for product being processed

3. Adjust temperature to assure forward flow

4. Monitor steps 1-3 during the entire process

TASK: 2. Adjust Equipment for High-Temperature, Short-Time Processing

<u>Performance Objective</u>: Given the materials listed below, adjust the equipment for high-temperature, short-time processing.

Standard: The pasteurization process will meet all USDA, FDA, Texas Health Department, AMPI, and customer standards.

Materials Needed: HTST properly cleaned, HTST Recycling with Heat-up, Trained Operator, Ceneral Management Practices to Follow.

Enabling Object 'es: None.

- 1. Run water to balance tank until product flows freely in
- 2. Start product from tank and make sure product is flowing to balance tank
- 3. Shut off water to balance tank and place HTST system to drain
- 4. When product appears at drain, place system in forward flow
- 5. Adjust HTST to maximum speed for product being processed
- 6. Adjust differential pressure
- 7. Observe and set temperature to maintain forward flow

TASK: 3. Record High-Temperature, Short-Time Processing Data

Performance Objective: Given the materials listed below, record high-

temperature, short-time processing data.

Standard: The pasteurization process will meet all USDA, FDA, Texas

Health Department, AMPI, and customer standards.

Materials Needed: HTST in Progress, Trained Operator, General

Management Practices to Follow, Recording Chart,

Stamp.

Enabling Objectives: Know how to change chart.

Must be able to write legibly.

- 1. Change temperature chart at the beginning of each 8 hour shift
- 2. Stamp the chart with the stamp provided
- 3. Initial chart and designate HTST being used
- 4. Do cut-in and cut-out of HTST system and record temperature
- 5. Record indicating temperature and verify accuracy
- 6. Indicate on temperature chart product being processed

TASK: 4. Put Product Into Storage Tank

<u>Performance Objective</u>: Given the materials listed below, put product

into the storage tank.

Standard: The pasteurization process will meet all USDA, FDA, Texas

Health Department, AMPI, and customer standards.

Materials Needed: HTST Properly Cleaned, Trained Operator, General

Management Practices to Follow, All Data Properly

Recorded.

Enabling Objectives: None.

- Make sure storage tank has been cleaned prior to product being started
 - a. Recording chart indicates cleaning cycle
 - b. Agitator has been cleaned
 - c. Valves have been cleaned
- 2. Assemble storage tank to ready for product
 - a. Agitator is in place
 - b. Valves are in place
 - c. Air lines are connected
 - d. Door gasket is in place
 - e. Sample cock is in place
- 3. Turn on cooling to storage tank
- 4. Start product to tank and inspect for leaks

DUTY: S. PERFORMING PRODUCT-TO-PRODUCT CHANGEOVER

TASK: 1. Prepare Lines and Valves to Bring New Product to Balance

Tank

<u>Performance Objective</u>: Given the materials listed below, prepare lines

and valves to bring new product to balance tank.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST Properly Cleaned, Properly Trained Operator,

General Management Practices to Follow, HTST Up to

Temperature and in Process.

Enabling Objectives: None.

- 1. Inspect new product tank
 - a. Hook-ups in place
 - b. Air lines in place
 - c. Valves functioning properly
- 2. Shut water off to balance tank when product appears
- 3. Place HTST system to drain and observe for product
- 4. Put system on forward flow when product appears at drain
- 5. Adjust temperature and differential pressure

DUTY: S. PERFORMING PRODUCT-TO-PRODUCT CHANGEOVER

TASK: 2. Adjust Equipment for Product Changeover

Performance Objective: Given the materials listed below, adjust

equipment for product changeover.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST Properly Cleaned, Properly Trained Operator,

General Management Practices to Follow, Water Going

Into Balance Tank, Temperature Chart.

Enabling Objectives: None.

Performance Guide:

1. Record on temperature chart product that is to be processed

2. Make jumper hook-ups if necessary

3. Start product from storage tank and observe flow at the balance tank

4. Adjust temperature and differential pressure if required for new product

DUTY: S. PERFORMING PRODUCT-TO-PRODUCT CHANGEOVER

TASK: 3. Complete Product Changeover Process

Performance Objective: Given the materials listed below, complete the

product changeover process.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPT and customer standards.

Materials Needed: HTST Pror Cleaned, HTST in Process, Properly

Trained ... ator, General Management Practices to

Follow.

Enabling Objectives: Knowledge of proper product to product changeover.

Performance Guide:

1. Inspect balance tanks for stoppage of product flow

2. Observe lowering of balance tank level and start water

3. Start next product to be processed to balance tank and turn off water

1. Operate Lines Following Established Sequence

<u>Performance Objective</u>: Given the materials listed below, operate lines

following established sequence.

The procedure will meet all USDA, FDA, Texas Health Standard:

Department, AMPI, and customer standards.

Materials Needed: HTST in Forward Flow, Properly Trained Operator,

General Management Practices to Follow.

Enabling Objectives: Knowledge of proper operation of divert valve.

Performance Guide:

1. Put HTST in forward flow

Observe sight glass i load-out bay for diluted product
 Divert flow to reclaim tank when diluted product has been observed

4. Divert flow from recl. .m tank to tanker when undiluted

5. Observe product

TASK: 2. Set Recording Data Equipment for Changeover/Flushout

<u>Performance Objective</u>: Given the materials listed below, set recording

data equipment for changeover/flushout.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: Recording Charts, Ink Pad, Stamp, HTST in Process,

Properly Trained Operator, General Management

Practices to Follow.

Enabling Objectives: Knowledge of FDA recording chart requirements.

Performance Guide:

1. Check indicating temperature against recording temperature

2. Designate on the chart the product that is being processed

3. Change recording chart at the end of 8 hour shift and stamp with stamp provided

TASK: 3. Perform Flush-out Procedures

Performance Objective: Given the materials listed below, perform flush-

out procedures.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST in Process, Properly Trained Operator, General

Management Practices to Follow.

Enabling Objectives: None.

Performance Guide:

1. When product flow to balance tank has stopped, turn on water

2. Observe sight glass in load out bay for diluted product

3. When sight glass shows clear water, place HTST on recycle

TASK: 4. Inspect Equipment for Proper Operation

<u>Performance Objective</u>: Given the materials listed below, inspect

equipment for proper operation.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST in Process, Properly Trained Operator, General

Management Practices to Follow.

Enabling Objectives: Knowledge of flow and proper operation of HTST

system.

Performance Guide:

1. Maintain forward flow on flushout of product

2. Start water to balance tank

3. Observe sight glass for product dilution

4. Divert flow to reclaim tank

TASK: 5. Complete Product Changeover Process

Performance Objective: Given the materials listed below, complete the

product changeover process.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST in Process, Properly Trained Operator, General

Management Practices to Follow.

Enabling Objectives: Knowledge of the product changeover process.

- 1. Observe balance tank for stoppage of flow from product silo
- 2. Start water after product flow to balance tank has stopped
- 3. Place HTST system on recycle when clear water is observed in the sight glass

DUTY: U. SHUTTING DOWN HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION

1. Prepare High-temperature Short-time for Shutdown

Performance Objective: Given the materials listed below, prepare the

HTST for shutdown.

Standard: The procedure will meet all USDA, Fb. Texas Health

Department, AMPI, and customer standards.

HTST at the End of the Process, Properly Trained Materials Needed:

Operator, General Management Practices to Follow.

Enabling Objectives: Knowledge of the HTST shutdown procedure.

- Place HTST system to drain and flush the system with water until the discharge clears up
- Kill the power to the pumps Turn off steam
- Turn off cooling water

DUTY: U. SHUTTING DOWN HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION

TASK: 2. Shut Down High-temperature, Short-time System

Performance Objective: Given the materials listed below, shut down the

high-temperature, short-time system.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST at the End of the Process, Properly Trained Operator, General Management Practices to Follow.

Enabling Objectives: Knowledge of the HTST shutdown procedure.

- 1. Observe the balance tank until the product flow has stopped
- 2. Start the water flow
- 3. Place HTST system to drain
- 4. Flush system until water clears up
- 5. Turn off power to pump
- 6. Turn off steam
- 7. Turn off cooling water valve

DUTY: U. SHUTTING DOWN HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION

TASK: 3. Inspect Recording Data Equipment

<u>Performance Object ve</u>: Given the materials listed below, inspect recording data equipment.

Standard: The procedure will meet all USDA, FDA, Texas Health Department, AMPI, and customer standards.

<u>Materials Needed</u>: Properly 'Lained Operator, General Management Practices to Follow.

Enabling Objectives: Knowledge of FDA recording chart regulations.

- 1. Change the recording chart at the beginning of each shift
- 2. Check recording chart equipment for proper operation

DUTY: V. CLEANING THE HIGH-TEMPERATURE, SHORT-TIME PASTEURIZER

TASK: 1. Inspect and Adjust Equipment and Lines for Cleaning

<u>Performance Objective</u>: Given the materials listed below, inspect and adjust equipment and lines for cleaning.

Standard: The procedure will meet all USDA, FDA, Texas Health Department, AMPI, and customer standards.

<u>Materials Needed</u>: HTST Flushed Out, Properly Trained Operator, General Management Practices to Follow, Gaskets, Tri-clamps.

Enabling Objectives: Know how to properly label recording chart to meet FDA standards.

- 1. Inspect outside of equipment for soil(product or chemical)
- 2. Make hook-ups required for cleaning HTST
- 3. Place HTST system in CIP mode
- 4. Indicate on recording chart when CIP is started

DUTY: V. CLEANING THE HIGH-TEMPERATURE, SHORT-TIME PASTEURIZER

TASK: 2. Perform Cleaning Procedures

Performance Objective: Given the materials listed below, perform

cleaning procedures.

Standard: The procedure will meet all USDA, FDA, Texas Health

Department, AMPI, and customer standards.

Materials Needed: HTST Shutdown, Properly Trained Operator, General

Management Practices to Follow, 50% Caustic, Acid, PH

Paper, Protective Chemical Clothing, Caustic Test

Kit.

Enabling Objectives: Know the location of the eye wash station.

Know the data information for each chemical used.

Know general chemical safety.

- 1. Rinse HTST out thoroughly by circulating water
- 2. If rinse water is not clear, repeat step 1
- 3. Add approximately 4.5 gallons of 50% caustic and circulate system for 1 1/2 hours at 165 degrees F
- 4. Rinse HTST out with water until caustic has dissipated
- 5. Use caustic test kit to determine if caustic has dissipated
- 6. Add 2-3 gallons of acid and circulate for 1 hour at 145 degrees F
- 7. Rinse with water until PH is 7 (Use PH paper)

TASK: 1. Comply With Shop and Equipment Safety Rules

<u>Performance Objective</u>: Given the materials listed below, comply with

shop and equipment safety rules.

Standard: The procedure will meet all OSHA, AMPI, and equipment or tool

instruction manual standards.

Materials Needed: Equipment needing Repair, Tools.

Enabling Objectives: Knowledge of all power tools, welders, and other

maintenance equipment.

Performance Guide:

1. Lock out or disable broken equipment

2. Select the correct tool or equipment for the repair needed

Repair the broken equipment using tools and equipment correctly

TASK: 2. Apply Basic Emergency First-Aid Techniques

<u>Performance Objective</u>: Given the materials listed below, apply basic

emergency first aid techniques.

Standard: The procedure will meet all American Red Cross and AMPI

standards.

Materials Needed: Properly Stocked First-Aid Kit.

Enabling Objectives: Knowledge of first aid procedures.

Performance Guide:

1. Determine the type and extent of the injury

2. Keep injured calm and still

3. Apply first aid for minor injury

- 4. Apply first aid for major injury
- 5. Call ambulance, if necessary

6. Fill out accident report

TASK: 3. Complete Accident Report

Performance Objective: Given the materials listed below, complete an

accident report.

Standard: The procedure will meet all OSHA and AMPI standards.

Materials Needed: Accident Report Form, Pen or Pencil.

Enabling Objectives: Be familiar with the operation zero form.

Performance Guide:

1. Investigate the accident

2. Ask questions - Who? What? When? How? Why?

3. Vill out the operation zero form following all instructions

4. Turn completed form in to office

5. Follow up and correct the hazard if necessary

TASK: 4. Inspect Work Area and Equipment for Safe Working

Environment

Performance Objective: Given the materials listed below, inspect the

work area and equipment for a safe working

environment.

Standard: The procedure will meet all OSHA, AMPI, and General

Management Practices standards.

Materials Needed: Tool Kit.

Enabling Objectives: None.

Performance Guide:

1. Check the floor area and wash or pick up any debris found

2. Check all electric motors for proper guards and replace if necessary

3. Check steam or hot water valves for leaks and replace any leaky gaskets

4. Check press for leaks and replace gaskets if necessary

TASK: 5. Use Fire Extinguisher

Performance Objective: Given the materials listed below, use fire

extinguisher.

Standard: The procedure will meet all OSHA and AMPI standards.

Materials Needed: Fire, Fire Extinguisher.

Enabling Objectives: Knowledge of proper use of fire extinguisher.

- 1. Check the fire extinguisher to make sure that it is fully charged
- 2. Determine the type of fire
- 3. Use correct type of extinguisher for type of fire
- 4. If large fire:
 - a. Call fire department
 - b. Evacuate the building
 - c. Shut off utilities
 - d. Use proper breathing apparatus

TASK: 6. Correct Safety Hazards

Performance Objective: Given the materials listed below, correct safety

hazards.

Standard: The procedure will meet all OSAA and AMPI standards.

Materials Needed: Safety Hazard Needing Correcting.

Enabling Objectives: Knowledge of all equipment.

Performance Guide:

1. Identify the safety hazard

2. If minor, correct the hazard

3. If major:

a. Contact supervisor

b. Contact maintenance

c. Shut equipment down for hazard correction

TASK: 7. Demonstrate Cardiopulmonary Resuscitation (CPR) Techniques

<u>Performance Objective</u>: Given the materials listed below, demonstrate cardiopulmonary resuscitation (CPR) techniques.

<u>Standard</u>: The procedure will meet all OSHA, American Red Cross, and AMPI standards.

Materials Needed: Person Needing CPR or Dummy.

Enabling Objectives: CPR certification.

- 1. Check subject for consciousness
- 2. Check breathing
- 3. Do two air resuscitations
- 4. Check pulse
- 5. Send for ambulance
- 6. Continue CPR with two air resuscitations to 15 chest compressions for four cycles
- 7. Check for breathing and heart beat
- 8. If none, continue cycles until help arrives

TASK: 8. Comply With Safety Requirements for Working Around Automated Systems

Performance Objective: Given the materials listed below, comply with

safety requirements for working around automated

systems.

Standard: The procedure will meet all OSHA and AMPI standards.

Materials Needed: Automated Equipment, Padlocks, Chains.

Enabling Objectives: Knowledge of equipment being used.

Knowledge of lock-out procedure.

- 1. Shut machines down
- 2. Shut off and lock-out all energies
- 3. Check to be sure lock-out is safe
- 4. Complete repairs
- 5. Reconnect all energies
- 6. Test machines when all is clear

TASK: 9. Participate in Safety Training Program

Performance Objective: Given the materials listed below, participate in

a safety training program.

Standard: The procedure will meet all OSHA and AMPI standards.

Materials Needed: None.

Enabling Objectives: None.

Performance Guide:

1. Attend monthly loss control program meetings

2. Understand safety concepts:

a. Lockout

b. Confined space

c. MSDS

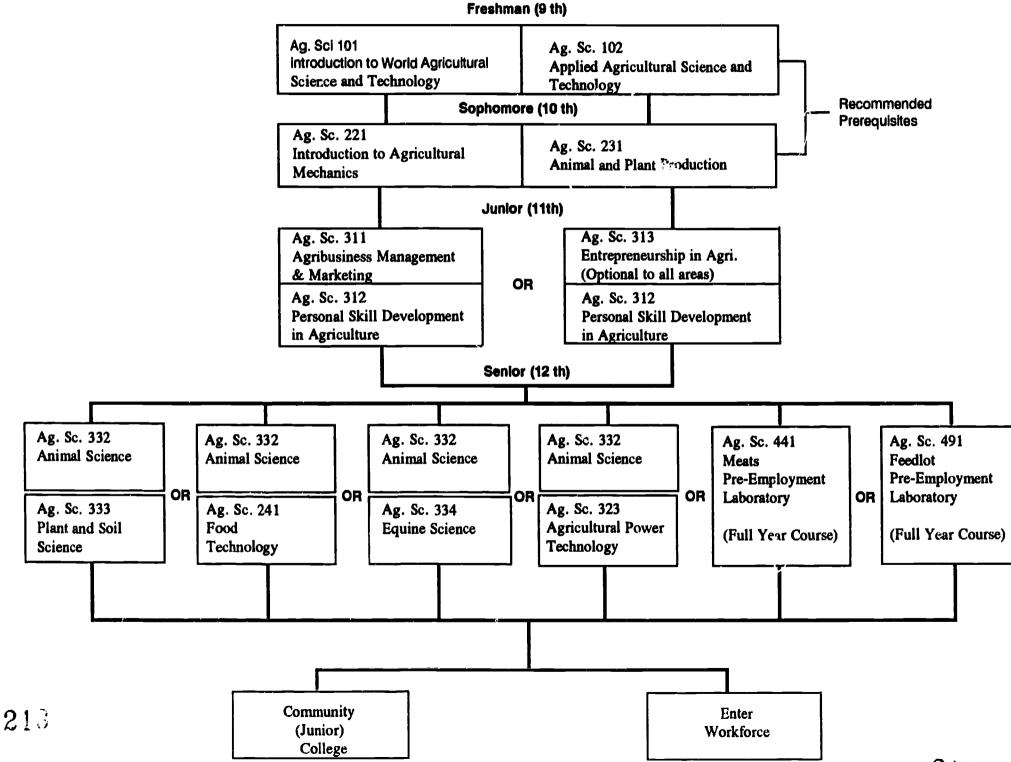

V. RECOMMENDED SECONDARY AND POSTSECONDARY COURSE OPTIONS FLOWCHART

The following flowcharts show the possible courses and routes that a student may take in pursuing a particular 2+2+2 articulated program.

These charts are examples to be used by other secondary and postsecondary institutions in establishing their own agricultural 2+2 +2 curriculum.

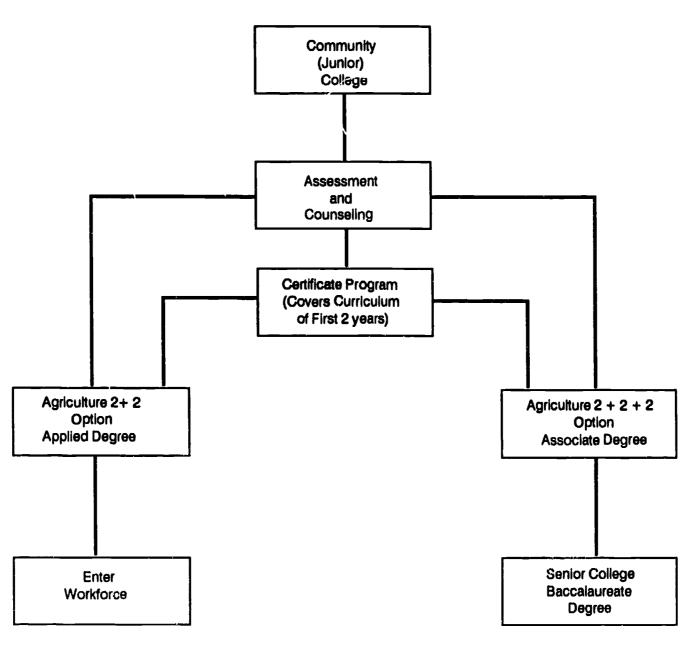

Agriculture 2 + 2 + 2 Animal Science Option

Agriculture 2 + 2 + 2 Animal Science Option Continued

VI. RECOMMENDED STUDENT PREREQUISITES

Secondary:

The following secondary plans include both the academic and agricultural recommendations for a student who is interested in pursuing an articulated 2+2+2 agricultural program.

Included are the recommended courses beginning with the freshman year and continuing through grade 12. Students on the regular, advanced, or honors tract may follow this plan; however, students on the regular tract must take some higher math and science courses than may be recommended otherwise.

These plans are based upon a seven period day and the only difference in the three is in the area of Physical Education since choosing one of these three options may affect the courses you would have time to take otherwise.

Postsecondary:

These postsecondary plans include both the academic and agricultural course recommendations for the associate degree or the applied degree for a student who is interested in continuing the 2+2+2 agricultural program.

VII. BASIC COURSE OUTLINES

This section includes the basic course outlines for the agriscience courses to be taught at the secondary level and the course outlines for the postsecondary level agriculture courses.

Although this is a 2+2+2 articulated curriculum, we have included in this section the basic course outlines for the recommended prerequisites also.

.01 207

SECONDARY COURSE OUTLINES

Agriscience 101- Introduction to World Agricultural Science and Technology

- A. Recognize the Importance of Agriculture in the World
 - 1. Understand Supply and Demand of Food and Fiber
 - 2. Identify the Availability of Renewable and Nonrenewable Agricultural Resources
 - 3. Understand the Impact of Agriculture on the World Economy
 - 4. Describe the Interdependency of Agriculture and Other Segments of Society
- B. Explain the Historical Significance of Agriculture
 - 1. Identify Key Developments Shaping Modern Agriculture in the World
 - 2. Identify Key Developments Shaping Modern Agriculture in the United States
- C. Recognize the Interdependency of Agriculture and World Politics
 - 1. Identify Factors Affecting World Trade
 - 2. Recognize the Impact of Agriculture as a Political Tool
- D. Recognize the Interdependency of Agriculture and the Environment
 - 1. Identify Environmental Concerns in Agriculture
 - 2. List Methods of Protecting the Environment
 - 3. Recognize the Impact of the Environment on Agriculture
- E. Explain the Food and Fiber System
 - 1. Explain the Food Chain from Production to Consumption
 - 2. Explain the Fiber Chain from Production to Usage
- F. Identify Research and Development in Agriculture
 - 1. Understand the Impact of Research and Development and Identify Current Developments in Agricultural Science and Technology
 - 2. Apply Research and Development in the Classroom and Laboratory
- G. Explore Career and Other Opportunities in Agriculture
 - 1. Conduct a Career Self-Analysis
 - 2. Recognize the Career Decision-Making Process
 - 3. Develop Job Seeking Skills
 - 4. Identify Full-Time Career Opportunities in Agriculture
 - 5. Identify Part-Time Career Opportunities in Agriculture
 - 6. Identify Avocational Opportunities in Agriculture

H. Develop Personal and Social Skills

- 1. Develop Professionalism and Ethics
- 2. Use Proper Etiquette and Behavior
- 3. Explore Personal Relations
- 4. Practice Good Grooming and Health Habits

I. Improve Communication Skills

- 1. Understand the Importance of Effective Communication: Speaking
- 2. Understand the Importance of Effective Communication: Writing
- 3. Improve Communication Skills Through Organized Activities
- 4. Utilize the Media for Effective Communication

J. Develop Leadership Skills in Agricultural Science and Technology Through the FFA

- 1. Develop Life Skills for Effective Leadership
- 2. Explore Opportunities for Leadership Development Through the FFA
- 3. Use Democratic Principles in Conducting Effective Meetings
- 4. Understand the FFA Organization

K. Examine Personal Financial Management

- 1. Discuss the Importance and Procedures of Keeping Accurate Records
- 2. Describe the Importance and Use of Budgeting
- 3. Describe the Importance and Procedures of Personal Finance

L. Analyze Agricultural Experience Programs

- 1. Identify Various Types of Supervised Agricultural Experience Programs
- 2. Describe the Characteristics of Successful Supervised Agricultural Experience Programs
- 3. Select and Plan Individual Supervised Agricultural Experience Programs

Agriscience 102 - Applied Agricultural Science and Technology

- A. Identify Soil Formations
 - 1. Recognize the Importance and Formation of Soils
 - 2. Identify Soil Formations
- B. Identify the Nature and Properties of Soils
 - 1. Identify Components and Properties of Soils
 - 2. Recognize Soil Classification Systems
- C. Explain Basic Plant Science and Technology
 - 1. Describe Plant Structure and Functions of Plant Parts
 - 2. Discuss Plant Growth and Development: Seed Germination
 - 3. Discuss Plant Growth and Development: Production, Storage, and Use of Food in Plants
 - 4. Outline Plant Genetics
 - 5. Outline Plant Reproduction
 - 6. Discuss Plant Breeding
 - 7. Recognize Plants
- D. Explain Basic Animal Science and Technology
 - 1. Explain Animal Growth and Development
 - 2. Describe the Anatomy and Physiology of Animals
 - 3. Identify Breeds and Classes of Livestock and Poultry of Economic Importance to the Community
 - 4. Discuss the Importance of Animal Selection
 - 5. Outline Animal Reproduction
 - 6. Outline Animal Genetics
 - 7. Discuss Animal Breeding
- E. Determine Basic Food Science Technology
 - Recognize the Importance of Food Science Technology in the World
 - 2. Determine Trends in World Food Production
- F. Explore Agricultural Mechanics
 - 1. Identify Major Areas of Agricultural Mechanics
 - 2. Identify Safety and Laboratory Procedures
 - 3. Perform Basic Skills in Agricultural Construction Tools
 - 4. Identify Lumber and Compute Bill of Materials
 - 5. Identify and Use Fasteners

- G. Recognize the Protection of the Environment
 - 1. Determine the Effect of Agricultural Chemicals on the Environment
 - 2. Identify the Requirements for the Proper Use of Agricultural Chemicals
 - 3. Identify Methods of Protecting the Environment
- H. Understand Energy and Water Conservation in Agriculture
 - 1. Determine Alternative Energy Sources for Agricultural Use
 - 2. Identify Methods of Conserving Electrical Energy and Combustible Fuels
 - 3. Explain Methods of Conserving Water
- I. Explore Career and Other Opportunities in Applied Agricultural Science and Technology
 - 1. Conduct a Career Self-Analysis
 - 2. Identify Career Clusters in Agricultural Science and Technology
- J. Understand Experience Programs in Agricultural Science and Technology
 - 1. Identify the Various Types of Supervised Agricultural Experience Programs
 - 2. Describe the Characteristics of Successful Supervised Agricultural Experience Programs
 - 3. Select and Plan Individual Supervised Agricultural Experience Programs
- K. Plan and Conduct Leadership Activities in Applied Agricultural Science and Technology
 - 1. Develop Life Skills for Effective Leadership
 - 2. Practice Leadership Skills for Agricultural Science and Technology

Agriscience 221 - Introduction to Agricultural Mechanics

- A. Understand and Apply Safe Work Practices That Apply to Agricultural Mechanics
 - 1. Determine the Importance of Agricultural Mechanics
 - 2. Understand and Apply Safety Practices
 - 3. Understand and Apply Laboratory Management Procedures
- B. Explore Career Opportunities in Agricultural Mechanics
 - 1. Perform a Career Self-Analysis
 - 2. Evaluate Careers in Agricultural Mechanics
 - 3. Assess Career-Decision Making Factors
 - 4. Conduct Supervised Agricultural Experience Programs Related to Agricultural Mechanics
- C. Phan and Conduct Leadership Activities Related to Agricultural Mechanics
 - 1. Participate in Leadership Organizations
 - 2. Develop Life Skills for Effective Citizenship
 - 3. Participate in FFA Degree and Award Activities
- D. Identify, Select, and Use Hand Tools, Power Tools, and Measuring and Marking Devices
 - 1. Identify and Use Hand Tools
 - 2. Identify and Use Power Tools
 - 3. Select and Use Measuring and Marking Devices
- E. Identify and Perform Basic Electric Wiring Skills
 - 1. Identify Basic Principles of Electricity and Understand Basic Electrical Terminology
 - 2. Perform Basic Electric Wiring Skills
- F. Perform Basic Plumbing Skills
 - 1. Install Pipe and Plumbing Fixtures
 - 2. Maintain Water System
- G. Apply Basic Concrete Principles
 - 1. Estimate Materials Needed
 - 2. Construct Forms
 - 3. Place, Reinforce, Finish, and Cure Concrete
- H. Practice Basic Carpentry Skills
 - 1. Identify Building Materials
 - 2. Plan Cost Effective Construction
 - 3. Apply Construction Techniques

- I. Select and Apply Paints and Preservatives
 - 1. Select Materials
 - 2. Apply Brush Painting Techniques
 - 3. Apply Spray Painting Techniques
- J. Identify Fencing Methods
 - 1. Select Fencing Materials
 - 2. Plan Fence Construction
- K. Perform and Apply Cold Metal Skills
 - 1. Identify Types of Metals
 - 2. Cut, File, Shape, and Drill Metal
- L. Perform and Apply Hot Metal Skills
 - 1. Select and Operate Oxy-Fuel Welding and Cutting Equipment
 - 2. Select and Operate Electric Arc Welding Equipment

Agriscience 231 - Animal and Plant Production

- A. Determine the Importance of Soil and Its Influence on Society
 - 1. Determine the Influence of Soil
 - 2. Explain the Formation of Soil
- B. Identify the Chemical and Physical Properties of Soil
 - 1. Identify Soil Components
 - 2. Identify Soil Properties
 - 3. Recognize Soil Classification Systems
 - 4. Recognize Methods of Soil Sampling
- C. Explain the Conservation of Soil for Future Generations
 - 1. Identify Kinds of Soil Erosion
 - 2. Explain the Factors Influencing Soil Erosion
 - 3. Discuss Soil Erosion Control Measures
 - 4. Examine the Fundamentals of Soil Use and Land Management
- D. Explain the Conservation of Soil Water for Future Generations
 - 1. Explain the Importance and Loss of Soil Water
 - 2. Discuss Soil Water Drainage
 - 3. Identify Water Requirements of Crops
 - 4. Explain Soil Water Conservation Measures
- E. Recognize Methods for Improving Soil Fertility for Agriculture and Home Use
 - 1. Identify Soil Nutrients
 - 2. Recognize Uses and Types of Fertilizer
 - 3. Explain the Importance of Organic Matter
 - 4. Recognize Soil Deficiencies
 - 5. Identify Secondary Nutrients, Micronutrients, and Soil pH
- F. Determine the Importance of Plants and Their Influence on Society
 - 1. Determine the Economic Importance of Major Crops
 - Locate Major Areas of Crop Production in the State, Nation, and World
 - Identify Major Crops and Their Uses
- G. Describe Flant Anatomy and Physiology
 - 1. Identify Basic Structures and Functions of Plant Parts
 - 2. Explain Seed Germination in Plants
 - 3. Describe Photosynthesis, Storage, and Use of Food in Plants

- H. Explain Plant Reproduction
 - 1. Explain Sexual Reproduction of Plants
 - 2. Explain Asexual Reproduction of Plants
- I. Recognize Plant Nutrient Requirements
 - 1. Recognize Nutrient Requirements of Plants
 - Identify Organic and Inorganic Fertilizers Types, Sources, and Blends
 - Discuss Methods, Rates, and Timing of Fertilizer Applications and Fertilizer Regulations
- J. Select Fundamental Plant Management Techniques
 - 1. Select Mechanical Techniques of Plant Management
 - 2. Select Chemical Techniques of Plant Management
- K. Determine the Importance of Animals and Their Influence on Society
 - 1. Examine Classes, Grades, and Numbers of Livestock in the State, Nation, and World
 - Determine Trends in Production and Consumption of Animal Products
- L. Evaluate and Select Livestock, Poultry, and Rabbits Based on Performance, Visual Appraisal, and Pedigree
 - 1. Evaluate and Select Beef Cattle
 - 2. Evaluate and Select Dairy Cattle
 - 3. Evaluate and Select Swine
 - 4. Evaluate and Select Horses
 - 5. Evaluate and Select Sheep
 - 6. Evaluate and Select Goats
 - 7. Evaluate and Select Poultry
 - 3. Evaluate and Select Rabbits
- M. Evaluate Livestock and Poultry Carcasses and Identify Wholesale and Retail Cuts
 - Evaluate Livestock Carcasses and Identify Wholesale and Retail Cuts
 - 2. Evaluate Poultry Carcasses and Identify Wholesale and Retail Cuts

- N. Select Fundamental Animal Management Techniques
 - 1. Select Methods of Safe Handling and Restraining of Domestic Animals
 - 2. Select Methods of Performing Common Surgical and Immunization Skills Used with Domestic Animals
 - 3. Select Methods of Identifying Domestic Animals for Ownership
 - 4. Select Methods of Transporting Domestic Animals
- O. Describe the Anatomy and Physiology of Domestic Animals
 - 1. Describe Circulatory Systems of Domestic Animals
 - 2. Describe Respiratory Systems of Domestic Animals
 - 3. Describe Skeletal Systems of Domestic Animals
 - 4. Describe Muscular Systems of Domestic Animals
 - 5. Describe Digestive Systems of Domestic Animals
 - 6. Describe Reproductive Systems of Domestic Animals
- P. Recognize Animal Nutrient Requirements
 - 1. Identify Feed Nutrients for Animals
 - 2. Identify Classes of Animal Feeds
 - 3. Identify Feed Additives for Animal Feeds
- Q. Manage Records of Soil, Plant, and Animal Related Enterprises
 - Maintain Records of Soil, Plant, and Animal Related Enterprises
 - 2. Analyze Records of Soil, Plant, and Animal Related Enterprises
- R. Plan and Conduct Leadership Activities Related to Animal and Plant Production
 - Develop Leadership Skills Related to Animal and Plant Production
 - Participate in Leadership Skills Related to Animal and Plant Production
- S. Explore Career Opportunities in Animal and Plant Production
 - 1. Identify Careers in Plant and Soil Science
 - 2. Identify Careers in Animal Science

Agriscience 311- Agribusiness Management and Marketing

- A. Examine Agribusiness Management and its Importance
 - 1. Recognize the Importance of Agriculture
 - 2. Describe the Role and Functions of the Manager
 - 3. Investigate the Process of Management Decision Making
 - 4. Discuss the Val: 3 of Setting Goals and Objectives
- B. Identify Economic Principles Important to Agribusiness Management
 - 1. Discuss Free Enterprise and Economic Systems
 - 2. Examine Consumer Economics: Supply and Demand
 - 3. Examine Producer Economics: Maximizing Profits
- C. Illustrate the Use of Budgeting in Decision Making
 - 1. Categorize Income and Cost of Production
 - 2. Examine the Construction and Analysis of Enterprise Budgets
 - 3. Discuss the Use of Whole Farm Budgeting for Planning
 - 4. Investigate the Use of Partial Budgeting to Analyze Proposed Business Changes
- D. Analyze Recordkeeping Procedures
 - 1. List the Parts of a Management Information System
 - 2. Compare Accounting Methods
 - 3. Select an Accounting System
 - 4. Prepare Financial Statements: Balance Sheet, Income Statement, and Cash Flow Statement
 - 5. Analyze the Financial Strength of the Business
 - 6. Review Tax Records and Returns
 - 7. Identify Important Production Records
 - 8. Evaluate Production Records
- E. Discuss the Acquisition of Capital Resources
 - 1. Compare Methods of Obtaining Capital Resources
 - 2. Identify the Importance and Types of Credit
 - 3. Determine the Institutions that Provide Agricultural Loans
 - 4. Review Loan Application Forms
 - 5. Compare Methods of Computing Interest
 - 6. Compare Types of Loans
- F. Explain Business Related Laws
 - 1. Compare Business Types
 - 2. Interpret Common Agricultural Laws
 - 3. Examine Important Government Regulations
 - 4. Review Common Legal Documents

- G. Review Methods of Reducing Risk
 - 1. Identify Risk Management Techniques
 - 2. Identify Types of Insurance Available
 - 3. Discuss Sources of Insurance
- H. Examine Government Policy Toward Agriculture
 - 1. Review Past Agricultural Policies
 - 2. Discuss Recent and Future Government Policies Toward Agriculture
- I. Study the Marketing of Agricultural Products
 - 1. Discuss the Purpose and Importance of Marketing
 - 2. Discuss the Competitive Environment
 - 3. Discuss Factors that Influence Market Decisions: Foreign and Domestic
 - 4. Compare Types of Agricultural Markets
 - 5. Identify Marketing Alternatives for Production Agriculture
 - €. Discuss Forward Contracting: Cash and Futures
 - 7. Review the Effects of Government Frograms and Regulations
- J. Examine the Application of Computers to Agribusiness Management
 - 1. Discuss Appropriate Uses for Computers
 - 2. Utilize Decision Aid Software
 - 3. Utilize Computerized Recordkeeping Systems
 - 4. Identify Guidelines for Selecting a Suitable Computer System
- K. Describe the Management of Human Resources
 - 1. Analyze Employee Benefits
 - 2. Describe the Employer/Employee Relationship
- L. Explore Career Opportunities in Agribusiness Management

Agriscience 312 - Personal Skill Development in Agriculture

- A. Discuss Personal Development
 - 1. Develop a Positive Self Concept
 - 2. Develop Social Skills
 - 3. Project a Professional Image
- B. Describe an Effective Leader
 - 1. Determine the Traits of a Good Leader
 - 2. Contrast Leadership Styles
- C. Develop Leadership Ability
 - 1. Realize Personal Leadership Potential
 - 2. Understand Basic Human Needs
 - 3. Motivating and Influence People
 - 4. Prepare Resumes and Applications
- D. Describe Employee Responsibilities
 - 1. Prepare for Job Interviews
 - 2. Describe Employer Expectations
 - 3. Recognize the Importance of Work Related Ethics
 - 4. Get Along with Co-Workers
- E. Describe Employer Responsibilities
 - 1. Evaluate Job Applicants
 - 2. Evaluate Employee Performance
 - 3. Develop an Effective Complaint and Appeals Procedure
 - 4. Recognize Employer Responsibilities
 - 5. Recognize the Importance of Business Related Ethics
- F. Develop Communications with Groups and Individuals
 - 1. Improve Written Communications
 - 2. Improve Verbal Communications
 - 3. Improve Non-Verbal Communications
 - 4. Participate in Group Discussions
 - 5. Conduct a Successful Meeting
 - 6. Work with Diverse Groups
 - 7. Remove Barriers to Communication
 - 8. Listen Effectively
 - 9. Make Friends
- G. Demonstrate Group and Individual Efficiency
 - 1. Develop a Program of Work
 - 2. Organize Groups
 - 3. Establish Personal Goals
 - 4. Manage Time
 - 5. Make Decisions
 - 6. Solve Problems

Agriscience 321 - Agricultural Structures Technology

- A. Understand and Apply Safe Work Practices That Apply to Agricultural Structures Technology
 - 1. Determine the Importance of Agricultural Structures Technology
 - 2. Reinforce Basic Technical Skills
 - 3. Identify Safety Practices
 - 4. Identify Laboratory Management Procedures
- B. Explore Career Opportunities in Agricultural Structures Technology
 - 1. Perform a Career Self-Analysis
 - 2. Evaluate Careers in Agricultural Structures Technology
 - 3. Assess Career-Decision Making Skills
 - 4. Identify and Conduct Supervised Agricultural Experience Programs Related to Agricultural Structures Technology
- C. Plan and Conduct Leadership Activities Related to Agricultural Structures Technology
 - 1. Participate in Leadership Organizations
 - 2. Develop Life Skills for Effective Citizenship
 - 3. Participate in FFA Degree and Award Activities
- D. Plan and Construct Agricultural Buildings
 - Select Buildings by Type of Construction and Identify Structural Parts
 - 2. Locate Buildings for Efficiency and Safety
 - 3. Select Equipment for Ventilation, Environmental Control, Waste Handling, and Materials Handling
 - 4. Utilize Computer Assisted Design Techniques in Planning
 - Read Flans or Working Drawings and Plan for Cost Effectiveness
 - 6. Plan Footings, Foundations, and Floors
 - Select and Install Framing, Doors, Windows, Sheeting, Roofing, and Insulation Materials
 - 8. Select and Apply Paints and Preservatives
- E. Plan and Construct Agricultural Enclosures
 - 1. Plan Location and Arrangements of Fences and Corrals
 - 2. Select Types and Quality of Fencing Materials
 - 3. Select Electric and Solar Fence Controls and Components
 - 4. Select Types of End and Corner Construction
 - 5. Determine Number and Type of Line Posts
 - 6. Construct Fences and Corrais

- F. Install, Service, and Maintain Electrical Systems
 - 1. Reinforce Basic Principles and Terms of Electricity
 - 2. Reinforce Safe Use of Electricity
 - 3. Determine Electrical Needs and Loads
 - 4. Plan Electrical Installations
 - 5. Use the National Electric Code and Local Codes
 - 6. Select Wiring Materials and Supplies
 - 7. Perform Circuit Wiring Operations
 - 8. Make Minor Electrical Repairs and Changes in Electrical Systems
- G. Place, Finish, and Cure Concrete Slabs and Structures
 - 1. Plan for Site Preparation and Form Construction
 - 2. Proportion, Reinforce, Place and Finish Concrete
 - 3. Plan Tilt-up Construction
 - 4. Use Masonry Construction
- H. Recognize Non-Traditional Structural Building Techniques
 - 1. Evaluate Passive Energy Storage Structures
 - 2. Evaluate Non-Traditional Construction
- I. Select and Use Surveying Equipment
 - 1. Level for Grades, Building Layouts, Profiles, and Excavations
- J. Plan, Establish, and Maintain Water Management Systems
 - 1. Plan Agricultural Water Systems
 - 2. Install and Maintain Piping Systems
 - 3. Plan, Install, and Maintain Irrigation Systems

Agriscience 323 - Agricultural Power Technology

- A. Understand and Apply Safe Work Practices That Apply to Agricultural Power Technology
 - 1. Determine the Importance of Agricultural Power Technology
 - 2. Reinforce Basic Technical Skills
 - 3. Identify Safety Procedures
 - 4. Identify Laboratory Management Procedures
- B. Explore Career Opportunities in Agricultural Power Technology
 - 1. Perform a Career Self-Analysis
 - 2. Evaluate Careers in Agricultural Power Technology
 - 3. Assess Career-Decision Making Factors
 - 4. Conduct Supervised Agricultural Experience Programs Related to Agricultural Power Technology
- C. Plan and Conduct Leadership Activities Related to Agricultural Power Technology
 - 1. Participate in Leadership Organizations
 - 2. Develop Life Skills for Effective Citizenship
 - 3. Participate in FFA Degree and Award Activities
- D. Utilize Tools, Equipment and Facilities
 - 1. Identify and Select Tools an Equipment
 - 2. Maintain and Operate Tools and Equipment
 - 3. Plan, Utilize and Maintain Service Centers
- E. Select, Operate, and Maintain Agricultural Machines and Equipment
 - 1. Identify and Select Machines and Equipment
 - 2. Identify and Maintain Component Materials
 - 3. Identify, Select, and Use Fasteners
 - 4. Identify and Service Monitoring, Sensing, and Metering Devices
 - 5. Adjust, Calibrate, Maintain, and Operate Equipment
- F. Select, Operate, and Maintain Small Air Cooled Engines
 - 1. Select Small Air Cooled Engines
 - 2. Understand Principles of Two-Stroke and Four-Stroke Cycle Internal Combustion Engines
 - 3. Maintain and Trouble Shoot Small Air Cooled Engines
 - 4. Disassemble and Reassemble Small Air Cooled Engines

- G. Select, Operate, and Maintain Tractors
 - 1. Select and Operate Tractors
 - 2. Maintain Air Intake and Exhaust Systems
 - 3. Maintain Lubrication Systems and Select Lubricants
 - 4. Maintain Fuel Systems, Select, Store, and Handle Fuel
 - 5. Maintain DC Electrical Systems
 - 6. Maintain Power Trains
 - 7. Maintain Hydraulic Systems
 - 8. Maintain Steering and Braking Systems
 - 9. Maintain Air Conditioning Systems
 - 10. Select and Maintain Tires, Ballast, and Weight Transfer
- H. Select and Maintain Electric Motors
 - 1. Select and Operate Electric Motors
 - 2. Select and Install Controls and Protective Devices
 - 3. Maintain and Trouble Shoot Electric Motors
- I. Select and Maintain Hydraulic Motors
 - 1. Select and Operate Hydraulic Motors
 - 2. Maintain Hydraulic Motors and Pumps

Agriscience 332 - Animal Science

- A. Identify the Importance of Animal Health, Reproduction, Nutrition and Management to Animal Production
 - 1. Identify the Impact of Health, Reproduction, Nutrition, and Management on Animal Reproduction
 - Compare and Contrast the Impact of Health, Reproduction, Nutrition, and Management on Major Breeds and Classes of Livestock
- B. Analyze Animal Anatomy and Physiology Affected by Health, Reproduction, Nutrition and Management
 - 1. Analyze the External Anatomy of Domestic Animals
 - 2. Analyze the Digestive System of Domestic Animals
 - 3. Analyze the Circulatory System of Domestic Animals
 - 4. Analyze the Respiratory System of Domestic Animals
 - 5. Analyze the Nervous System of Domestic Animals
 - 6. Analyze the Reproductive System of Domestic Animals
 - 7. Identify Normal Animal Behavior and Vital Life Signs
- C. Explain Animal Genetics and Reproduction
 - 1. Explain the Use of Genetics in the Production and Improvement of Domestic Animals
 - Analyze the Role of Reproductive Physiology in the Production, Growth, and Development of Breeding Animals
 - 3. Explain Various Breeding Systems of Breeding Animals
 - 4. Discuss Methods of Breeding Various Classes of Domestic Animals
 - 5. Explain the Use of Artificial Insemination with Domestic Animals
 - 6. Discuss the Use of Embryo Transfer in Domestic Animals
 - 7. Discuss Pregnancy Diagnosis in Domestic Animals
 - 8. Explain the Care of Domestic Animals During Pregnancy and at Parturition
- D. Evaluate and Select Breeding Animals Based on Performance Testing, Production Records, Progeny Testing, and Visual Appraisal
 - 1. Evaluate and Select Beef Cattle
 - 2. Evaluate and Select Dairy Cattle
 - 3. Evaluate and Select Swine
 - 4. Evaluate and Select Sheep and Goats
 - 5. Evaluate and Select Poultry
- E. Analyze Breeding Merit of Domestic Animals Based on Carcass Evaluation
 - 1. Evaluate and Grade Beef, Swine, and Sheep Carcasses
 - 2. Relate Carcass Merit to Fabrication of Beef, Pork, and Lamb Wholesale and Retail Cuts
 - 3. Evaluate and Grade Poultry Carcasses

F. Determine Nutritional Requirements of Domestic Animals

- 1. Analyze the Physiology of Animal Digestion
- 2. Determine Nutritional Requirements of Ruminant and Non-Ruminant Domestic Animals
- 3. Identify Sources of Nutrients for Domestic Animals
- 4. Identify Uses of Vitamins, Minerals, and Other Feed Additives for Domestic Animals
- 5. Formulate Rations for Various Classes of Domestic Animals
- 6. Analyze the Quality of Commercially Prepared Feeds
- 7. Discuss Feeding Practices for Various Classes of Domestic Animals

G. Identify Domestic Animal Diseases, Causes, and Treatments

- 1. Examine the Role of Bacteria, Funguses, Viruses, Genetics, and Nutrition in Causing Diseases
- 2. Identify Methods of Controlling and/or Preventing Diseases
- Identify Common Domestic Animal Diseases and Recognize Methods of Treatment
- 4. Identify Infestations and Recognize Methods of Controlling Internal and External Parasites in Domestic Animals
- 5. Identify the Use of Pharmaceuticals for Immunization and Other Means of Preserving or Improving Animal Health
- 6. Recognize Methods of Maintaining Livestock Efficiency and Safety Using Common Surgical and Injection Procedures

H. Recognize Domestic Animal Management Techniques

- 1. Analyze Methods of Developing Productive Breeding Animals
- 2. Design Efficient Livestock Facilities
- 3. Select Efficient Equipment to Nurture, Handle, and Restrain Domestic Animals Safely
- 4. Analyze Efficient Methods of Transporting Domestic Animals
- 5. Explain Domestic Animal Identification, Classification, Certification, and Registration Systems
- 6. Identify Legal Aspects of Animal Protection and Production
- 7. Explore Research in Animal Technology

I. Use Record Keeping in Animal Science

- 1. Maintain Production, Performance, Progeny, and Health Records
- 2. Analyze Records for Improved Animal Production

J. Explore Career Opportunities in Animal Science

- 1. Identify Career Opportunities in Animal Production
- 2. Identify Career Opportunities in Animal Health

K. Plan and Conduct Leadership Activities Related to Animal Science

- 1. Develop Leadership Skills Related to Animal Science
- 2. Participate in Leadership Activities Related to Animal Science

Agriscience 333 - Plant and Soil Science

- A. Recognize the Importance and Interrelationship of Soil and Plants
 - 1. Recognize the Importance of Soil and Plants
 - 2. Recognize the Interrelationship of Soil and Plants
- B. Explain Soil Formation and Its Influence on the World Population
 - 1. Explain Influence of Soil
 - 2. Explain Formation of Soil
- C. Identify the Nature and Properties of Soil
 - 1. Identify Soil Components and Properties
 - 2. Recognize Soil Classification
- D. Evaluate Soils Using Available Technical Soil Information
 - 1. Read and Interpret Soil Maps
 - 2. Interpret Soil Surveys
 - 3. Recognize Capability Maps and Numbering Systems
 - 4. Recognize the Use of Soil Maps
 - 5. Determine the Engineering Capabilities of Soils
- E. Recognize Agencies Assisting in Soil and Water Conservation
 - 1. Identify the Soil Conservation Service
 - 2. Identify the Agricultural Stabilization and Conservation Service
 - 3. Explain Soil and Water Conservation Districts
 - 4. Explain Watershed Districts
 - 5. Identify Other Soil and Water Regulating Agencies
- F. Evaluate Soil Testing
 - 1. Collect Soil Samples
 - 2. Perform a Laboratory Analysis of Soil
 - 3. Identify Commercial Scil Testing Procedures
 - 4. Interpret and Use Soil Test Results
- G. Describe the Management of Soil Amendments
 - 1. Determine Types of Fertilizers
 - 2. Determine Methods, Rates, and Timing of Fertilizer Application
- H. Explain the Conser ng of Soils
 - 1. Explain Wind and Water Erosion Conservation
 - 2. Describe Urban and Rural Land Use Programs

I. Practice Land Evaluation

- 1. Assess Soil Characteristics
- 2. Apply Land Use Principles
- 3. Recognize Rural and Urban Land Appraisal Methods
- J. Identify and Recognize the Uses of Major Crops
 - Recogni∠e Plant Uses Food, Fiber, Shelter, Energy
 - 2. Identify the Importance of Major Plants in the Food Chain
- K. Explain Plant Physiology
 - 1. Identify Structures and Functions of Plants
 - 2. Describe Photosynthesis
 - 3. Explain Sexual and Asexual Plant Reproduction
 - 4. Discuss Hybridization
- L. Select Quality Seed
 - 1. Recognize Quality Seed
 - 2. Select Appropriate Cultivars of Seed
- M. Describe Plant and Soil Management Practices
 - 1. Describe Conventional Tillage Practices
 - 2. Describe No-Till Practices
 - 3. Describe Minimum Tillage Practices
 - 4. Explain Safe Application of Plant Chemicals
 - 5. Discuss Pest Control in Crops
- N. Examine Trends in Plant Production
 - 1. Consider Alternative Crops
 - 2. Discuss Urbanization of Food Plant Production
 - 3. Discuss Turf and Lawn Care
 - 4. Examine Research in Soil and Plant Science Technology
- O. Use Record Keeping Skills in Plant and Soil Science
 - 1. Maintain Soil and Plant Records
 - 2. Analyze Soil and Plant Records
- P. Plan and Conduct Leadership Activities Related to Soil and Plant Science
 - 1. Develop Leadership Skills Related to Soil and Plant Science
 - 2. Participate in Leadership Activities Related to Soil and Plant Science
- Q. Explore Career Opportunities in Soil and Plant Science
 - 1. Identify Careers in Soil Science
 - 2. Identify Careers in Plant Science

POSTSECONDARY COURSE OUTLINES

AGRICULTURE 2 + 2 + 2 **Dairy Products Management Option Northeast Texas Community College**

Agriculture 2 + 2 Option Applied Degree	Certificate Program (Covers Curriculum of First Two Years)	Agriculture 2 + 2 + 2 Option Associate Degree
AGRI 1303 Animal Nutrition & Feeding	*AGRI 1101 The Agricultural Industry	*AGRI 1350 Computers in Agriculture
AGRI 1304 Animal & Poultry Health Management	AGRI 1313 Agricultural Mechanics	AGRI 1443 Agricultural Economics
*AGRI 1350 Computers in Agriculture	AGRI 1414 General Agronomy	AGRI 2363 Forage & Pasture Crops
AGRI 1443 Agricultural Economics	AGRI 1464 Introduction to Animal Science	*AGRI 2371 Dairy Science
AGRI 2308 Cooperative Education	AGRI 2386 Farm Buildings	FOOD 2400 Introductory Food Science
ACSI 2363 Forage & Pasture Crops		
*AGRI 2371 Dairy Science	Students who do not enter the 2+2 program until after graduation from high school must complete the certificate program before they can continue with the postsecondary course work. They do have the option of testing out of any or all of these classes. Students who do not score 80% or above on an exit level test that covers the secondary materials must also take the classes in which they failed to master the curriculum.	
AGRI 2372 Dairy Management		
AGRI 2406 Genetics		
AGRI 2483 Reproductive Physiology		
FOOD 2313 Technology of Food	"	rse outlines have not yet been

FOOD 2400 Introductory Food Science

Agriculture 1303 Animal Nutrition and Feeding

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify an area, a national, and a global perspective of feed production and nutrition.
- 2. Quantify the nutritive requirements of livestock and poultry.
- 3. Identify feeds by color, feel, and texture.
- 4. Demonstrate knowledge of nutritional and mineral supplement programs for livestock and poultry.
- 5. Quantify and identify feedstuffs into forages, roughages, etc.
- 6. Quantify utility and use of feedstuffs into ration formulation.
- 7. Develop least cost ration formulation.
- 8. Identify nutritional deficiencies in livestock and poultry and develop methodology whereby the deficiencies can be eliminated.
- 9. Demonstrate the intricate marketing structure associated with feeds and feeding.

Course Outline

I. Nutrition

- A. Feeds vs Foods
- B. Principles of Nutrition
- C. Digestion and Absorption
- D. Nutrients Metabolism
- E. Nutrition of Diseases Toxins

II. Feeds

- A. Types and Roles of Feedstuffs
- B. Pasture and Range Forages
- C. Hay
- D. Silage, Haylage High Moisture Grain
- E. Grains, High Energy Feed
- F. Protein Supplements
- G. By Product Feeds and Crop Residues
- H. Feed Supplements Additives Implants
- I. Feed Processing
- J. Feed Analysis Feed Evaluation
- K. Buying Feeds Commercial Feeds Feed Laws

III. Feeding

- A.
- Animal Behavior Environmental Feeding Standards Ration Formulation
- C. Feeding Beef Cattle
- D. Feeding Dairy Cattle
- E. Feeding Sheep F. Feeding Goats
- G. Feeding Swine
- H. Feeding Poultry
- I. Feeding HorsesJ. Feeding Rabbits
- K. Feeding Mink
- L. Feeding Fish

Agriculture 1304 Animal and Poultry Health Management

Course Objectives

Upon completion of this course, the student will be able to:

- 1. Identify a global as well as an area perspective of animal diseases.
- 2. Quantify diseases of livestock.
- 3. Develop plans for livestock buildings and equipment.
- 4. Describe the role of animal behavior in livestock disease.
- 5. Provide knowledge of feeding programs for livestock having diseases.
- 6. Acquire a workman's knowledge of animal health, disease prevention, and parasite control.
- 7. Understand impact of disease on profit picture of ranch enterprise.
- 8. Understand causes of USA and foreign trevist of livestock.

Course Outline

- I. Diseases of the Blood, Ly. phatic, and Cardiovascular Systems.
- II. Diseases of the Digestive System.
- III. Diseases of the Endocrine System.
- IV. Diseases of the Eye and Ear.
- V. Generalized Conditions of Animals
- VI. Diseases of the Immune System.
- VII. Metabolic Disturbances.
- VIII. Diseases of the Musculoskeletal System.
 - IX. Diseases of the Nervous System.
 - X. Physical Influences.
 - XI. Diseases of the Reproductive System.
 - XII. Diseases of the Respiratory System.
- XIII. Diseases of the Skin.
 - XIV. Diseases of the Urinary System.
 - XV. Behavioral Diseases

Agriculture 1443 Agricultural Economics

Course Objectives

Successful completion of the course will allow the student to be able to:

- 1. Identify an area, state, national, and global perspective of agricultural economics.
- 2. Develop knowledge of supply and demand.
- 3. Describe the role of land use, capital use, and manpower use in today's farm business.
- 4. Glean knowledge of market inputs into hedging, futures, and supply pictures.
- 5. Develop knowledge of the structure as it affects agriculture.
- 6. Imprint borrowing into today's business decisions.
- 7. Provide knowledge into assets and liabilities of farm enterprises.
- 8. Discover cost accounting in machinery and labor.
- 9. Determine optimum type of agriculture enterprises for a given type of agricultural environment.
- 10. Develop a system approach to farming and ranching.
- 11. Discover methods, means, and avenues of the availability of agricultural information.

Course Outline

- I. Introduction to Agricultural Management
 - A. Management
 - 1. The scope of the manager
 - 2. Views of management
- II. Applying Economic Principles
 - A. Marginal Analysis in Short Run Planning
 - 1. Input-output relationships
 - 2. Input-input relationships
 - B. Cost Concepts in Decision Making
 - 1. Classifying costs
 - 2. Short-run and long-run costs
 - 3. Short-run cost curves
 - 4. Application of cost principles
 - 5. Economics of size

- C. Ownership Costs: The Dirty Five
 - 1. Depreciation
 - 2. Interest
 - 3. Repairs
 - 4.. Taxes and insurance
 - 5. Breakeven

III. Monitoring the Business

- A. Alternative Record Systems and What They Can Provide
 - 1. Levels of recordkeeping system
 - 2. Output and and of record system
- B. Business Analysis and Control
 - 1. One record system
 - 2. The inventory and depreciation schedule
 - 3. Financial statement
 - 4. Profit and loss statement
 - 5. Financial ratio analysis
 - 6. Cash flow
 - 7. Performance of activity analysis
 - 8. Measures of performance
- C. Diagnosing Farm Business Problems
 - 1. Methods of analysis
 - 2. Earnings problems
 - 3. Problem of size
 - 4. Operational problems
 - 5. Marketing problems
- D. A Simplified Management Audit With Limited Information
 - 1. Single income tax return: single proprietorship
 - 2. Adjustment to taxable income
 - 3. Simplified analysis

IV. Forward Planning

- A. Budgeting Documented Decision Making
 - 1. Some budget types
 - 2. Budget coefficients
 - 3. Pretesting a decision with patrol budgeting
 - 4. Budgeting a major investment decision

B. Farm Resource Inventory

- 1. Resource inventory
- 2. Land
- 3. Labor
- 4. Capital
- 5. Services
- 6. Management
- 7. From inventory to planning

C. Using Enterprise Budgeting

- 1. Sample enterprise budgets
- 2. More than one budget per enterprise
- 3. Purpose of budget influences control
- 4. Comments on enterprise budgets

D. Whole Ranch/Farm Planning

- 1. Block budgeting
- 2. Cropping systems
- 3. Livestock systems
- 4. Present-normal situation
- 5. Cash flow feasibility

E. Linear Programming

- 1. Linear programming defined
- 2. Budgeting
- 3. Logic of linear programming

V. Business Organization and Resource Management

A. Types of Farm Business Ownership

- 1. Sole proprietorship
- 2. Partnership
- 3. Corporate

B. Credit Sources and Credit Factors

- 1. Production credit associations
- 2. Banks
- 3. Merchants and dealers
- 4. Life insurance companies
- 5. Federal land banks
- 6. Farmers home administration
- 7. Individuals
- 8. Is borrower's credit worthy? Lender's viewpoint
- 9. What to expect from lender

C. Capital Use and Credit Planning

- 1. Alternative uses of capital
- 2. Use by farmers and ranchers
- 3. Credit
- 4. Principle of increasing risk
- 5. Time and interest rate
- 6. Types of loans
- 7. The true interest rate
- 8. A credit rating

D. Land Acquisition and Use Strategies

- 1. Incentives to control land
- 2. Land ownership
- 3. Approach to land evaluation
- 4. Farmland leasing
- 5. Lease or purchase

VI. Investment Analysis

A. Investment Analysis and Decision Making

- 1. Time value of money
- 2. Cost of capital and selecting a discount rate
- 3. Developing the cash flow budget

B. Choosing Between Alternative Investment Opportunities

- 1. Techniques
- 2. Present worth technique
- 3. Tax considerations
- 4. Feasibility of investment
- 5. Uncertainty and risk

VII. Taxes and Insurance

A. Insurance

- 1. Priority listing of insurance needs
- 2. Property insurance
- 3. Comprehensive liability insurance
- Liability insurance for employees and workmen's compensation
- 5. Crop insurance
- 6. Life insurance
- 7. Health and accident insurance
- 8. Policy comparison

B. Income Tax Management

- 1. Method of reporting
- 2. When to use tax management strategies
- 3. Income leveling strategies
- 4. Special tax situations

Agriculture 2308 Cooperative Education Dairy

Course Objective

Upon completion of yyhis course the student will be able to:

- 1. Identify an area, a national and a global perspective of dairy enterprises.
- 2. Quantify the nutritive requirements of dairy cattle.
- 3. Identify feeds for dairy cattle by color, feel, and texture.
- 4. Demonstrate knowledge of nutritional and mineral supplement programs for dairy cattle.
- 5. Quantify and identify feedstuffs into forages, roughages, etc.
- 6. Quantify utility and use of feedstuffs into ration formulation.
- 7. Develop least cost ration formulation.
- 8. Identify nutritional deficiencies in dairy catals and develop methodology whereby the deficiencies can be eliminated.
- 9. Demonstrate the intricate marketing structure associated with dairy and milk products.
- 10. Understand the use of and be able to repair equipment associated with the dairy industry.
- 11. Understand the processing of milk and milk products.

Course Outline

Activities such as feeding, milking, breeding, marketing, cleaning, disease prevention, handling equipment, and building facilities for a dairy operation will be conducted. Also setup, operation, and shut-down of processing equipment will be accomplished.

The course outline provides for 50% of the semester working in a production operation and the other 50% working in a processing facility. Each days activities will be maintained in a daily log book describing problems, questions, etc. and the resultant answers of how the student, cooperator and instructor handled the problem.

Agriculture 2363 Forage and Pasture Crops

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify an area, a national, and a global perspect've of plants and forages.
- 2. Quantify the nutritive requirements of plants.
- 3. Identify plants by color, feel, shape, and texture.
- 4. Demonstrate knowledge of nutritional and mineral programs for plants.
- 5. Quantify and identify plants into forages, roughages, etc.
- 6. Quantify utility and use of plants into feed formulation.
- 7. Develop least cost formulation using plants.
- 8. Identify nutritional deficiencies in plants and develop methodology whereby the deficiencies can be eliminated.
- 9. Demonstrate the intricate marketing structure associated with plant agriculture.
- 10. Identify diseases, pests, etc. and determine methods of eliminating them.

Course Outline

- I. Nature of Forage Plants
 - A. Grasses
 - B. Legumes
- II. Historic Perspective
 - A. Geology
 - B. Plant farming Geographics

III. Grasses

- A. Introduction
- B. Cool Season Perennials
- C. Warm Season Perennials
- IV. Perennial Legumes
 - A. Those Used in Temperate Areas
 - B. Warm Season Legumes
 - V. Annual Forages
 - A. Uses
 - B. Crop Species and Use

VI. Plant Establishment

- A. Introduction
- B. Crop Choice
- C. Seeds and Their Morphology
- D. Preparation
- E. Planting
- F. Growth
- G. Renovation

VII. Physiology of Forage Crop Production - Legumes

- A. Plant Foods
- B. Storage
- C. Management
- D. Growth
- E. Dormancy
- F. Stress

VIII. Physiology of Forage Crop Growth - Legumes

- A. Shoot Growth
- B. Root System
- C. Growth

IX. Forage Quality

- A. Chemistry
- B. Nitrogen and Nonprotein Nitrogen Compounds
- C. Carbohydrates
- D. Analysis
- E. Quality
- F. Fertilization

X. Antiquality Factors

- A. Cyanogenic Glycosides
- B. Sapoins
- C. Bloat
- D. Sweet Clover
- E. Tannins
- F. Flavonoids
- G. Alkaloids
- H. Fescue
- I. Nitrates
- J. Grass Tetany

XI. Forage Storage - Dry Systems

- A. Hay
- B. Dehydration

XII. Forage Storage - Silage

- Α. Process
- B. Problems
- C. Methods of Making
- D. Additives
- E. Equipment
- F. Silos

XIII. Fertilizers

- A. Use
- B. Nutrient Requirements

XIV. Pests of Forage Crops

- A. Economic Losses
- B. Weeds
- C. Insects
- D. Diseases

XV. Seed Production from Legumes and Crasses

- A. Pollination Mechanisms
- B. Seed Trade Organizations

XVI. Palatability and Grazing Behavior

- A. Animal's Use
- B. Evidence From Experiments and Experience
- C. Grazing behavior

XVII. Pasture Management

- A. Economic Importance
- B. Art of Management
- C. Stocking RateD. Grazing Systems
- E. Stockpiling

Agriculture 2372 Dairy Management

Course Objectives

Upon successful completion of the course the student will be able to:

- 1. Develop terminology useful for discussing dairy and dairy products.
- 2. Design dairy buildings appropriate for farm enterprises.
- 3. Design dairy premises that are environmentally sound.
- 4. Describe the role of animal behavior in dairy cattle.
- 5. Provide knowledge of feeding programs for livestock
- 6. Understand the role of milk in the market place.
- 7. Develop strategies for marketing dairy cattle and dairy products.
- 8. Acquire a dairyman's knowledge of animal health, disease prevention, and parasite control.
- 9. Develop a knowledge of the role of government subsidies in dairy production.
- 10. Develop knowledge of the role of forages, silage, and concentrates in dairy production.
- 11. Obtain basis for steps taken in dairy calf raising.
- 12. Comprehend breeds and breeding programs appropriate for dairy cattle.

Course Outline

- I. The Dairy Industry
 - A. History
 - B. Milk Foundation of Good Nutrition
 - C. Dairy Industry U.S.
 - D. Importance of Dairy Industry
- II. Breeds of Dairy Cattle
 - A. Characteristics of Dairy breeds
 - B. Milk and Butter Fat Production Records
 - C. Programs of Registry
- III. Establishing the Herd: Selecting and Judging
 - A. Purebred Eusiness
 - B. Judging Dairy Cattle
 - IV. Fitting and Showing Dairy Cattle
 - A. Advantages and Disadvantages of Showing
 - B. Feeding for Show and Sale
 - C. Equipment for Show and Sale
 - D. Trimming and Grooming

V. Breeding Dairy Cattle

- A. Genetics
- B. Selection
- C. Systems of Breeding
- D. Physiology of Reproduction
- E. Artificial Insemination

VI. Sterility and Delayed Breeding

- A. Sterility
- B. Poor Management and feeding
- C. Physiology and Endocrine Glands
- D. Inherited Abnormalities
- E. Anatomical Defects
- F. Bull Sterility

VII. Pasture and Green Chop

- A. Classes of Pasture
- B. Factors Affecting Pastures
- C. Establishing Pastures
- D. Management of Pastures

VIII. Hay

- A. Importance
- B. Hay Kind and Quality
- C. Making Hay
- D. Systems of Making Hay
- E. Storing, Buying, and Selling Hay
- F. Hay Feeding

IX. Silage

- A. Ensilage Process
- B. Advantages and Disadvantages
- C. The Silo
- D. Kinds of Silage
- E. Harvesting Methods
- F. How to Make Good Silage
- G. Feeding Value
- H. Haylage

X. Concentrates, Supplements, and Additives

- A. Grains
- B. Nitrogenous Feeds
- C. Non-Protein-Nitrogen
- D. By-Products
- E. Minerals
- F. Vitamins
- G. Additives

XI. Fundamentals of Dairy Cattle Nutrition

- A. Perspective of Nutrition
- B. Physiology of Digestion
- C. Nutritive Needs of Dairy Cattle

XII. Dairy Feeding Program

- A. Evaluating and Buying feeds
- B. Feeding Standards Ration Formulation
- C, Feeding Program

XIII. Dairy Cattle Behavior and Environment

- A. Animal Behavior
- B. Social Relations
- C. Animal Environment
- D. Pollution Control

XIV. Dairy Cattle Management

- A. Dairy Management
- B. Records
- C. Manure

XV. Dairy Cattle Health, Disease Prevention and Parasite Control

- A. Program for Health
- B. Diseases of Dairy cattle
- C. Parasites of Dairy Cattle
- D. Disinfectants
- E. Federal and State Regulatory Programs

XVI. Dairy Cattle Buildings and Equipment

- A. Environmental Control
- B. Plans and Specifications
- C. Space Requirements of Buildings and Equipment for Dairy Cattle
- D. Dairy Cattle equipment
- E. Facilities
- F. Fences

XVII. Dry Cows: Replacement Heifers: Dairy Beef

- A. Dry Cows
- B. Replacement Heifers
- C. Dairy Beef

XVIII. Milk Secretion and Handling

- A. Chemical Composition of Milk
- B. Cow Secretion Mechanism
- C. Milk Synthesis
- D. Physiological Factors Regulating Milk Secretion

XIX. Marketing Dairy Products

- A. Importance
- B. Milk Marketing
- C. Milk Manufacture
- D. Products for Milk

XX. Business Aspects of Dairying

- A. Types of Dairy business
- B. Managing
- C. Records
- D. Budgets
- E. Insurance

Agriculture 2406 Genetics

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify an area, a national, and a global perspective of the role of genetics.
- 2. Quantify the genetic requirements of livestock, plants, and poultry.
- 3. Identify genetic influences on reproduction, production, and sex.
- 4. Demonstrate knowledge of genetic interactions that influence livestock, plants, and poultry.
- 5. Quantify and identify genetic interactions in plants, livestock, poultry, etc.
- 6. Quantify utility and use of genetic materials in the environment.
- 7. Develop gene splicing interaction.
- 8. Identify genetic deficiencies in livestock, plants, and poultry and develop methodology whereby the deficiencies can be eliminated.
- 9. Demonstrate the intricate marketing structure associated with plant and animal genetic materials.

Course Outline

- I. Introduction
 - A. Life Origin
 - B. Domestication of Plants and Animals
 - C. Present Status and Problem
- II. Basic Processes of Inheritance
 - A. The Science of Genetics
- III. Reproductive Processes
 - A. Male
 - B. Female
 - C. Augmenting Reproductive Rates on Plants and Animals
 - IV. Qualitative Genetics
 - A. Lethals and Abnormalities
 - B. Colors
 - C. New Types
 - D. Disease and Resistance
 - E. Chromosomal Abnormalities

V. Variation

- A. Nature
- B. Measuring

VI. Population Genetics

- A. General
- B. Changes in Gene Frequency
- C. Heredity

VII. Inbreeding and Relationship

- A. Inbreeding
- B. Irregular Inbreeding
- C. Effects of Inbreeding
- D. Inbreeding Experiments

VIII. Outbreeding

- A. Outcrossing
- B. Crossing
- C. Grading
- D. Inbred Lines
- E. Hybridiza ion

IX. Principles of Selection

- A. Characteristics
- B. Effectiveness of Selection
- C. Individual
- D. Mass
- E. Pedigree
- F. Family
- G. Progeny
- H. Environmental Relations
- I. Selection Plateaus

X. Performancy and Progeny Testing

- A. Special vs Field
- B. Species

XI. Improvements

- A. Livestock
- B. Plant

Agriculture 2483 Reproductive Physiology

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify an area, a national, and a global perspective of livestock reproduction.
- Quantify the reproductive requirements of livestock, plants, and poultry.
- 3. Identify livestock by size, weight, and sex.
- 4. Demonstrate knowledge of courses of reproductive failure in livestock and poultry.
- 5. Quantify and identify forces which interact in reproductive capacities of animals.
- 6. Quantify utility and use of methodology available in reproductive performance.
- 7. Develop knowledge of pregnancy palpation.
- 8. Identify breeding methods of livestock and poultry.
- 9. Demonstrate the intricate marketing structure associated with embryo transplant and artificial insemination of livestock.

Course Outline

- I. Macroscopic Male Functional Anatomy
 - A. Testis
 - B. Epididymis
 - C. Deferent Duct
 - D. Scrotum
 - E. Descent of Testis
 - F. Castration
 - G. Cryptorchid
 - H. Spermatic Cord
 - I. Vesicular Glands
 - J. Colliculus Seminalis
 - K. Prostate
 - L. Pelvic Urethra
 - M. Bulbourethral Glands
 - N. Penis
 - O. Retractor Penis Muscles
 - P. Glans
 - Q. Prepuce
 - R. Prolapse

II. Microscopic Anatomy and Spermatogenesis

- A. Cell Types
- B. Scrotum
- C. Testis
- D. Efferent Ducticles
- E. Epididymis
- F. Deferent Duct
- G. Vesicular Glands
- H. Prostrate Glans
- I. Pelvic Urethra
- J. Bulbourethral Glands
- K. Penis
- L. Glans
- M. Prepuce
- N. Sheath

III. Hormones and Puberty in the Male

- A. Hormones
- B. Male Hormones
- C. Puberty

IV. Ejeculation and Semen Collection

- A. Ejaculation
- B. Impotentia Coeundi
- C. Semen Collection

V. Breeding Soundness Evaluation

- A. General Observations
- B. Reproductive Organs
- C. Internal Organs
- D. Semen Evaluation
- E. Criteria
- F. Laboratory Scoring System
- G. Field Evaluation
- H. Final Evaluation
- I. Breeding Capacity Tests
- J. When to Evaluate Sires
- K. Summary

VI. Semen Production, Processing and Storage

- A. Sperm Production
- B. Fate of Sperm
- C. Sire Selection
- D. Nonreturn Rate
- E. Processing Bull Semen
- F. General
- G. Processing Ram Semen
- H. Processing Boar Semen
- I. Processing Stallion Semen
- J. Processing Human Semen
- K. Conclusion

VII. Macroscsopic Female Functional Anatomy

- A. Ovaries
- B. Oviduct
- C. Uterus
- D. Cervix
- E. Vagina
- F. Vestibule
- G. Vulva and Clitoris

VIII. Microscopic Female Functional Anatomy

- A. Ovaries
- B. Oviduct
- C. Uterus
- D. Cervix
- E. Vagina
- F. Hymen
- G. Vestibule
- H. Vulva
- I. Clitoris

IX. Hormches and Puberty in the Female

- A. Hormones
- B. Puberty

X. Estrus and Estrus Cycle

A. Estrus

XI. Ovulation Control

- A. Cow
- B. Ewe
- C. Sow
- D. Mares
- E. Woman
- F. Superovulation

XII. Artificial Insemination

- A. Introduction
- B. Cattle
- C. Sheep
- D. Sow
- E. Mare
- F. Woman

XIII. Fertilization and Embryo Transfer

- A. Gamete Transport
- B. Fertilization
- C. Embryo Transfer

XIV. Gestation and Pregnancy Determination

- A. Gestation
- B. Pregnancy Determination

XV. Parturition and the Postpartum Period

A. Parturition

XVI. Visual Appraisal for Breeding Efficiency

- A. Fertile Male
- B. Infertile Male
- C. Fertile female
- D. Infertile Female
- E. General

XVII. Reproductive Diseases

A. General

Food Technology 2313 Technology of Food Processing

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify on an area, a national, and global basis, processes that are a part of food processing.
- 2. Identify by color, smell, and feel food processing conditions.
- 3. Demonstrate knowledge of processing problems that affect human population.
- 4. Identify control measures for processing methodology used in foodstuffs.
- 5. Identify food additives and processes used in food preparation.
- 6. Identify modes of food preparation.
- 7. Identify food packaging technology.

Course Outline

I. What is Food?

- A. In Modern Society
- B. Composition
- C. Micro and Macro Ingredients
- D. Nutritive Value
- E. Industrial Food Processing and Health Food

II. Microorganisms in Food

- A. Forms of Life
- B. Microbial Growth and Spoilage
- C. Water Activity
- D. Food Poisoning
- E. Detection of Microorganisms
- F. Food Fermentation
- G. Role of Microorganisms in Human Nutrition

III. Food Industry

- A. Manufacturing and Preservation
- B. Food Processing
- C. Plant Organization
- D. Quality Control
- E. Government Regulations
- F. Material and Energy Balances
- G. Solubility and Concentration

IV. Processing Fruits and Vegetables

- A. Characteristics
- Photosynthesis and Respiration
- Harvesting and Ripening C.
- D. Storage
- Preparation Processes E.
- F. Blanching
- G. Products
- Η. Jams and Jellies
- I. Sugar
- Nutritional Importance J.

V. Cereal Grains and Oil Seeds

- Α. Raw Materials
- Cereal Grains B.
- Baking Bread C.
- D. Pastry
- Milling Processes E.
- F. Malting
- Oil Seed Extraction G.
- Margarine and Vegetable Oils Η.
- I. Oil Emulsions
- J. Nutritional Aspects

VI. Milk and Dairy Products

- Milk Production A.
- B. Milk Composition
- Milk Processing C.
- Culturing D.
- E. Cheese
- F. Butter G. Ice Cre Ice Cream
- H. Concentrated and Dried Milk
- Nutritive Value of Milk I.

Processing of Meat, Poultry, and Fish VII.

- Sources Α.
- B. Composition
- C. Muscle Nomenclature
- D. Fresh Meat
- E. Curing
- F. Processing
- G. Poultry
- H. Fish and Seafood
- I. Nutritive Value

VIII. Alcoholic and Non-Alcoholic Beverages

- A. Products
- B. Fermentation
- C. Processing
- D. Wine Products
- E. Coffee and Tea
- F. Soft Drinks
- G. Nutritional

IX. Food Additives and Food Ingredients

- A. Food Additives What are they?
- B. Functional Properties
- C. Food Ingredients
- D. Food Additives
- E. Testing Food Additives
- F. Chemical Preservatives
- G. Food Contaminants
- H. Labeling Requirements
- I. Eifects in Human Nutrition

X. The Process of Food Preservation

- A. Causes and Prevention of Food Spoilage
- B. Food Dehydration
- C. Food Freezing
- D. Heat Sterilization and Canning
- E. Other Processes
- F. Irradiation
- G. Significance of Long-Term Preservation

XI. Food Packaging Technology

- A. Purpose
- B. Properties of Food Packaging Materials
- C. Lamination
- D. Effects on Food Stability
- E. Modified Atmosphere Packaging
- F. Role of Packaging in Distribution Chain

Food Technology 2400 Introductory Food Science

Course Objectives

Upon completion of this course the student will be able to:

- 1. Identify an area, a national, and a global perspective of food production and its nutritive contents.
- 2. Quantify the nutritive requirements of humans.
- 3. Identify food by color, feel, and texture.
- 4. Demonstrate knowledge of nutritio al and mineral supplement programs for the human population.
- 5. Quantify and identify foods into various food packages.
- 6. Quartify utility and use of foods for human use.
- 7. Develop typical rations for humans.
- 8. Identify nutritional deficiencies of humans and develop methodology whereby the deficiencies can be eliminated.
- 9. Demonstrate the intricate marketing structure associated with foodstuffs.

Course Outline

- I. Introduction Defining Food Science
 - A. Preparation for Food Science
 - B. Activities of Food Scientists
- II. Characteristics of the Food Industry
 - A. Sizes
 - B. Components
 - C. Industries
- III. Constituents of Foods: Properties and Significance
 - A. Carbohydrates
 - B. Proteins
 - C. Fats
 - D. Additional Food Components
 - IV. Nutritive Aspects of Food Constituents
 - A. Food and Energy
 - B. Role of Carbohydrates, Fats, and Protein
 - C. Quality of Protein
 - D. Bioavailability of Nutrients
 - E. Vitamins
 - F. Minerals
 - G. Fibers
 - H. Water
 - I. Stability

V. Unit Operations of Food Industry

- A. Common Unit Operations
- B. Energy Consolidations

VI. Quality Factors and How They Are Measured

- A. Appearance Factors
- B. Textural Factors
- C. Flavor Factors
- D. Standards

VII. Deteriorative Factors and Their Control

- A. Major Causes of Food Deterioration
- B. Principles of Food Preparation
- C. Control of Microorganisms
- D. Control of Enzymes

VIII. Heat Preservation and Processing

- A. Degrees of Preservation
- B. Heat Resistance of Microorganisms
- C. Heat Transfers
- D. Protective Effects
- E. Inoculated Pack Studies
- F. Different Temperature Time Compinations
- G. Heating Before or After Packaging
- H. Government Regulations

IX. Cold Preservation and Processing

- A. Distinction Between Freezing and Refrigeration
- B. Refrigeration and Cool Storage
- C. Freezing and Frozen Storage

X. Food Dehydration and Concentration

- A. Food Dehydration
- B. Food Concentration
- C. Intermediate Moisture Foods

XI. Food Irradiation and Microwave Heating

- A. Food Irradiation
- B. Microwave Heating

XII. Fermentations

- A. Fermentation
- B. Single-cell Protein
- C. Genetic Engineering

XIII. Milk and Milk Products

- A. Fluid Milk
- B. Ice Cream
- C. Cheese

XIV. Meat, Poultry, Eggs

- A. Meat and Meat Products
- B. Poultry
- C. Eggs

XV. Seafood

- A. Procurement
- B. Marine Fish
- C. Shell Fish
- D. Fish Meal and Protein Concentrates
- E. Mercury and Other Problems

XVI. Fats, Oils, and Their Products

- A. Effect of Composition
- B. Sources
- C. Properties
- D. Production and Processing
- E. Products Made
- F. Quality Control Tests

XVII. Cereal Grains, Legumes, and Oilseeds

- A. Cereal Grain
- B. Principles of Baking
- C. Legumes and Oilseeds

XVIII. Vegetable and Fruits

- A. Properties
- B. Composition
- C. Structural Features
- D. Activities
- E. Harvesting and Processing
- F. Juices

XIX. Beverages

- A. Carbonated Nonalcoholic
- B. Beer
- C. Wine
- D. Coffee
- E. Tea

XX. Confectionery and Chocolate Products

- A. Confectionery Types
- B. Ingredients
- C. Chocolate
- D. Manufacturing Practices

XXI. Food Packaging

- A. Requirements and Functions of Containers
- B. Types of Containers
- C. Packaging Materials
- D. Package testing
- E. Feature Packages

XXII. Water and Waste

- A. Properties and Requirements of Processing Waters
- B. Properties of Waste Water
- C. Waste Water Treatment
- D. Water Solids Upgrading and Treatment
- E. Lowering Discharge Volumes

XXIII. Food Additives

- A. Food additives
- B. Microbiological Considerations
- C. FDA Act
- D. Food Laws
- E. Nongovernment Agencies
- F. International Food Standards Codex Alimentarious
- G. Costs

XXIV. Improving Nutritional Quality

- A. Change in Food
- B. Communication
- C. Knowledge
- D. Labeling Regulations

XXV. World Food Needs

- A. The Problem
- B. U.N. Food and Agriculture Organization
- C. Aid programs

CERTIFICATE PROGRAM COURSE OUTLINES

Agriculture 1313 Agriculture Mechanics

Course Objectives

Upon successful completion of this course the student will be able to:

- 1. Develop terminology useful for discussing farm machinery.
- 2. Design machinery appropriate for farm enterprises.
- 3. Repair machinery that is environmentally sound.
- 4. Quantify specifications and read blueprints of machinery.
- 5. Demonstrate knowledge and technique in choosing materials for a particular farm implement.
- 6. Demonstrate a working knowledge of wiring in farm machinery.
- 7. Demonstrate and identify tools used in farm machinery.
- 8. Quantify, develop, and arrange for contract negotiation as well as financing for farm machinery.
- 9. Develop a sense of safety values associated with farm machinery.

Course Outline

I. Introduction

- A. Modern Farm Tractors
- B. Diesel Engines
- C. Tractor Fuels, Oils, and Greases

II. Preventive Maintenance

- A. The Meaning of Preventive Maintenance
- B. The Steps in General Maintenance
- C. Maintaining the Lubrication System
- D. Maintaining the Air Cleaner and Crankcase Breather
- E. Maintaining the Cooling System
- F. Maintaining the Fuel System
- G. Maintaining the Electrical System
- H. Maintaining the Hydraulic System
- I. Maintaining the Power Transmission System
- J. Maintaining the Chassis

III. Operation, Repair, and Storage

- A.
- Operating the Tractor
 Operating the Tractor in Cold Weather
 Operating the Tractor Safely
 Repairing the Engine В.

- Trouble-Shooting Guide
- Storing Equipment F.
- Preparing for Use after Storage

IV. Small Engines

A. Maintenance

Agriculture 1414 General Agronomy

Course Objectives

Successful completion of this course will allow the student to be able to:

- 1. Identify an area, a national and a global perspective of soil use.
- 2. Quantify soil types, phases, and classifications.
- 3. Develop plans using utilization of different soil types.
- 4. Describe the role of climate on soils.
- 5. Demonstrate knowledge of fertilization of soils.
- 6. Acquire working knowledge of plants that will grow on certain soils.
- 7. Develop plans for soil conservation.
- 8. Understand and acquire knowledge needed for judging soils.
- 9. Understand and be able to comprehend soil profile maps, topography maps, and water run off maps.
- 10. Be able to identify soil by feeling texture.
- 11. Understand methodology of soils for building materials.
- 12. Demonstrate knowledge of environmental impact of soils on man's economy.
- 13. Comprehend the impact of soils on a nation's economy.

Course Outline

- I. Soil Science and Use
 - A. Formation
 - B. Physical Characteristics
 - C. Chemical Characteristics
 - D. Soil Profile
 - E. Soil Maps
 - F. Land's Demand for Soil
- II. Soils, Nutrition, and Plant Growth
 - A. Soils and Plan Growth
 - B. How Plants Absorb Nutrients
 - C. Plant Nutrients
 - D. Mineral Deficiency and Toxiology
 - E. Fertilizer as a Pollutant

III. Liming

- A. Why Soils Become Acid
- B. Meaning of Soil pH
- C. What Lime Does to Soil
- D. Kinds of Lime
- E. Lime Requirement
- F. Applying Lime
- G. Lime Conversion Factors

IV. Fertilizing

- A. What is Fertilizer
- B. Types of Fertilizer
- C. Secondary Plant Nutrients
- D. Micronutrients
- E. Soil Testing
- F. Fundamentals of Fertilizer Application
- G. Calculation of Fertilizer Cost

V. Using Organic Residue:

- A. Using Crop Residues
- B. Using Animal Residues
- C. Using Sewage Residues
- D. Using Septage
- E. Using Compost
- F. Using Wood Wastes
- G. Using Food Processing Wastes
- H. Using Peat

VI. Tillage Practices

- A. Purposes of Tillage
- B. Soil Conditions
- C. Soil Compaction
- D. Conservation Tillage
- E. Summer Fallow
- F. Double Cropping
- G. Control of Tillage Pans
- H. Control of Surface Crusts

VII. Soil and Water Conservation

- A. Sources of Soil Lost
- B. Cropping Systems to Reduce Soil Lost
- C. Minimum Tillage
- D. Terracing
- E. Contour Tillage
- F. Soil Conservation Service
- G. Non-point Source Pollutants
- H. Conservation Irrigation
- I. Desertification

VIII. Drainage

- A. Water Tables
- B. Soil Surveys
- C. Water Movement in Soil
- D. Soil Aeration Drainage and Plant Growth
- E. Artificial Drainage
- F. Drainage System Selection
- G. Tile Drainage
- H. Tube Drainage
- I. Bed Drainage
- J. Ditch Drainage
- K. Sump Pump Drainage
- L. Vertical Drainage

IX. Irrigation

- A. Importance of Water
- B. When to Irrigate
- C. Selection of Irrigation System
- D. Irrigation Methods
- E. Fertilizer Application through Irrigation
- F. Irrigation Tail Water Management

X. Reclaiming Saline and Sodic Soils

- A. Classification of Saline and Sodic Soils
- B. Effect of Salt on Plant Growth
- C. Selecting Plants that are Saline and Salt Tolerant
- D. Water Quality and Saline Soils
- E. Reclaiming Prevention and Control Saline Soils
- F. Saline Seeps

XI. Judging Soils

- A. Why Judge Soils
- B. Conducting Land Judging
- C. Selecting Site
- D. Land Judging Scorecard
- E. Soil and Land Characteristics
- F. Recommended Land Treatments

XII. Pastures, Soil Water, and Fertility Management

- 2. Forage Grasses
- B. Forage Legumes
- C. Soil for Seeding
- D. Fertility Management
- E. Grazing Management
- F. Renovating Pastures
- G. Irrigating Pastures

XIII. Rangelands

- A. Range Management
- B. Range Improvement Practices
- C. Range Management Planning

XIV. Field Crops: Soil, Water, and Fertility Management

- A. Crop Production
- B. Agronomic Classification of Plants

XV. Vegetable Gardens: Soil, Water, and Fertility Management

- A. Tillage
- B. Soil Testing
- C. Agronomic Practices

XVI. Turf and Ornamental Plants: Soil, Water, and Fertility Management

- A. Turf Grasses
- B. Ornamental Plants

XVII. Greenhouses and Nurseries: Soil, Water, and Fertility Management

- A. Preparing Soils for Greenhouses
- B. Greenhouse Mechanics

XVIII. Orchards: Soil, Water, and Fertility Management

- A. Preparing Soils for Orchards
- B. Orchard Management

XIX. Forests: Soil, Water, and Fertility Management

- A. Preparing Soils for Forests
- B. Tree Management
- Vegetating Disturbed Areas: Soil, Water, and Fertility XX. Management
 - Sequence to Establishing Vegetation

 - B. Vegetating Areas Disturbed by Surface Mining
 C. Vegetating Areas Disturbed by Road Construction and Urbanization

Agriculture 1484 Introduction to Animal Science

Course Objectives

Successful completion of this course will allow the student to be able to:

- 1. Identify a global as well as an area perspective of animal production.
- 2. Quantify genetics and animal breeding.
- 3. Develop plans for livestock buildings and equipment
- 4. Describe the role of animal behavior in livestock production.
- 5. Provide knowledge of feeding programs for livestock
- 6. Develop strategies for marketing livestock
- 7. Acquire a wcrkman's knowledge of animal health, disease prevention, and parasite control.
- 8. Understand meat and animal by-products in the market place.
- 9. Develop a knowledge of business aspect (hedging, borrowing money) in animal production.
- 10. Obtain an overall perspective of the beef cattle, dairy, sheep and goat, swine, poultry, and horse industries.

Course Outline

I. General

- A. Food and Animais A Global Perspective
- B. Arimal Science USA
- C. Genetics and Animal Breeding
- D. Feeding Livestock
- E. Livestock Buildings and Equipment
- F. Animal Health, Disease Prevention, and Parasite Control
- G. Animal Behavior
- H. Marketing Livestock
- I. Meat and Animal By-Products
- J. Business Aspects of Agriculture

II. Beef Cattle

- A. Beef Cattle Industry
- B. Types and Breeds of Cattle
- C. Establishing a Beef herd: Selecting and Judging Beef Cattle
- D. Breeding Beef Cattle
- E. Feeding and Managing Beef Cattle
- F. Cow-Calf System
- G. Stocker Cattle
- H. Feed Lot Cattle
- I. Marketing and Slaughtering

III. Dairy Cattle

- A. Dairy Industry
- B. Breeds of Dairy Cattle
- C. Establishing the Dairy Herd: Selecting and Judging
- D. Breeding
- E. Feeding and Managing
- F. Milk Secretion and Handling
- G. Marketing Milk and Dairy Products

IV. Sheep and Goats

- A. Sheep and Goat Industry
- B. Types and Breeds of Sheep
- C. Establishing the Flock: Selecting and Judging
- D. Systems of Sheep production
- E. Breeding Sheep
- F. Feeding and Managing Sheep
- G. Marketing
- H. Wool and Mohair
- I. Goats

V. Swine

- A. Swine Industry
- B. Types and Breeds of Swine
- C. Establishing the Herd: Selecting and Judging
- D. Breeding Swine
- E. Feeding and managing Swine
- F. Marketing and Slaughtering

VI. Poultry

- A Poultry industry
- B. Poultry Breeds and Breeding: Selecting and Judging
- C. Feeding and Managing
- D. Poultry House and Equipment
- E. Poultry Health, Disease Prevention, and Parasite Control
- F. The Egg
- G. Marketing of Poultry and Eggs

VII. Horses

- A. Horse industry
- B. Classes, Types, Uses, and Breeds of Horses
- C. Selecting and Judging Horses
- D. Breeding Horses
- E. Feeding and Managing Horses

Agriculture 2386 Farm Buildings

Course Objectives

Upon successful completion of this course the student will be able to:

- 1. Define terms associated with farm building construction.
- 2. Determine the importance and economics of planning construction of farm buildings and other farm facilities.
- 3. Determine the feasibility of contracting vs self construction.
- 4. Identify various materials used in farm building construction.
- 5. Understand insulation and ventilation requirements for farm buildings.
- 6. Consider electrical requirements for farm buildings.
- 7. Consider plumbing requirements for farm buildings.
- 8. Figure a bill of materials for constructing a farm building
- 9. Locate and plan farm buildings for convenience and environmental impact.
- 10. Estimate total costs of constructing a farm structure.

Course Outline

I. Introduction

- A. Modern Farm Buildings
- B. Building Economics
- C. Determining Feasibility

II. Farmstead Arrangement

- A. Planning the Farmstead
- B. Safety Factors Involved
- C. Environmental Considerations
- D. Cost Efficiency Factors

III. Building Construction Planning

- A. Hiring a Contractor
- B. Subcontracting
- C. Legal Documentation

IV. Building Materials

- A. Concrete and Masonry
- B. Wood
- C. Roofing Materials
- D. Electrical Materials
- E. Plumbing Materials
- F. Wall Covering Materials
- G. Paints and Plastics
- H. Fasteners
- I. Environmental Control Materials
- J. Fencing Materials

V Estimating Costs of Materials

- A. Figuring Concrete and Masonry
- B. Determining Lumber Costs
- C. Estimating Roofing Costs
- D. Determining Electrical Materials Costs
- E. Figuring Plumbing Materials Costs
- F. Site Work Costs
- G. Painting Costs
- H. Ventilation, Heating, and Insulation Costs
- I. Fencing Costs
- J. Miscellaneous Costs

VI. Constructing Foundations and Floors

- A. Terms Used in Building Foundations and Floors
- B. Planning and Reinforcing
- C. Types and Uses

VII. Wall Construction

- A. Terms Associated with Wall Construction
- B. Stud Frame Construction
- C. Pole Frame Construction
- D. Rigid Frame Construction

VIII. Roof Construction

- A. Terms Associated with Roof Construction
- B. Conventional Framing
- C. Using Trusses
- D. Corrugated Roofing
- E. Shingles

IX. Planning Electrical Wiring

- A. Electrical Terms
- B. Determining Needs
- C. Sizing Wires
- D. Electrical Safety Devices

X. Planning the Plumbing System

- A. Plumbing Terms
- B. Determining Water Needs
- C. Planning the Water Storage Facilities
- D. Determining Sewage Disposal Needs

XI. Environmental Concerns

- A. Determining Insulation Requirements
- B. Ventilation, Heating, and Cooling Requirements
- C. Alternate Energy Sources

XII. Fencing Requirements

- A. Planning Fencing Needs
- B. Corral Planning
- C. Fencing for Livestock Control

XIII. Other Farm Building Requirements

- A. Storage Facilities
- B. Shop Facilities
- C. Miscellaneous Farm Buildings (greenhouses, etc.)

VIII. REFERENCE MATERIAL LISTS

The following lists of reference materials are identified by secondary course.

In addition, a general reference list is provided to be used as supplemental references to those listed for the courses.

IX. LINE DRAWING OF RECOMMENDED SECONDARY FACILITY

The following is a line drawing of the recommended classroom and shop facilities for the 2+2+2 program in dairy products management.

AGRISCIENCE CLASSROOM BUILDING AND SHOP FACILITIES

312

X. LIST OF RECOMMENDED TOOLS AND EQUIPMENT

The following is a list of recommended tools and equipment to be used at the secondary level in the teaching of the skills necessary for a student to succeed in the agricultural 2+2+2 program.

The estimated prices used to determine costs were obtained from tool and equipment supply catalogs and local hardware and lumber companies.

Tools and Equipment

The following hand tool and equipment list specifies the recommended quantities of each tool needed to teach a class of twenty students, and this is the number that a school should purchase when initiating a 2+2+2 Agricultural Technologies Program for Dairy Products Management.

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Blacksmith anvil, steel face, 150 lbs.	2	\$472.55	\$945.10
Mowing machine anvil, guard & sickle	1	\$109.95	\$109.95
Scratch awl, 4"	8	\$3.95	\$31.60
Hand axe, single bit	2	\$12.94	\$25.88
Pry bar, 17", rolling head	1	\$7.95	\$7.95
Wrecking bar, gooseneck, 3/4" X 30"	2	\$4.75	\$9.50
Wrecking bar, gooseneck, 5/8" X 24"	2	\$3.95	\$7.90
Booster cable battery tool, h/duty	1	\$20 .99	\$20.52
Sliding-T bevel, w/adjusting screw, 8" to 10" blade	5	\$4.49	\$22.45
Auger bit, 1/4" to 1" by 16ths (sets)	2	\$93.20	\$186.40
Countersink, power, straight shank	4	\$5.99	\$23.96
Countersink bit, rosehead, 3/4" x 5"	4	\$9 .15	\$36.60
Electrician's bit, 1/2" bit	1	\$14.69	\$14.69
Expansion bit, 7/8" to 3"	2	\$18.95	\$37.90
Extension bit, 18"	1	\$8.99	\$8.99
Router bit, round shank, 1/4" to 3/4" (14 pieces/set)	1	\$102.99	\$102.99
Screwdriver bit, 1/4", 5/16", 3/8", 1/2" (6	ea.) 1	\$1.99	\$1.99
Spur bit, 1/4" to 3/4", round shank	1	\$20.96	\$20.96

RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST

ITEM	RECOMMENDED QUANTITY ·	COST PER UNIT	TOTAL COST
Twist drill, high speed, straight shank, 1/16" to 1/2" by 64ths (1 set)	1	\$24.99	\$24.99
Concrete edger	4	\$8.00	\$32.00
Dry chemical extinguisher, 20 lbs.	4	\$39.95	\$159.80
Screw extractor, 1/8" to 11/32", square shank, set	1	\$5.29	\$5.29
Assorted files, 4" to 12", mill, flat, round, square, auger, tapered, thread, and half-round (set of 20)	1	\$106.62	\$106.62
Concrete float (magnesium)	4	\$17.55	\$70.20
Bit guage, adjustable, 1/4" to 1"	1	\$6.65	\$6.65
Compression gauge, w/screw-in adapters	1	\$30.29	\$30.29
Drill guage, 1/16" to 1/2" by 64ths	1	\$7.95	\$7.95
Marking guage, 6" of graduation in 16ths	1	\$7.55	\$7.55
Sheet metal guage, U.S. standard, 0-36 guage	1	\$13.90	\$13.90
Spark plug guage, .015035, .035060	2	\$3.45	\$6.90
Tap and drill guage, 1/16" to 1/2"	1	\$28.88	\$28.88
Thickness guage, .0015 to .040, set	2	\$21.99	\$43.98
Thread guage for pitches from 4 to 84	1	\$31.99	\$31.99
Tool sharpening guage, 30, 59, 70 degrees	2	\$6.65	\$13.30
Tractor tire guage, combination, liquid and air	1	\$5.29	\$5.29
Vacuum guage, 0 to 30", pressure 0 to 10 lbs.	1	\$19.45	\$19.45

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Wire guage, American standard, 0 to 36 wire size	1	\$15.99	\$15.99
Welding gloves, leather	20	\$12.99	\$259.80
Oxy-acetylene goggles, 2 pairs for each bench	10	\$9.99	\$99.90
Safety glasses or goggles, 1 pair per student	20	\$6.89	\$13 7.8 0
Concrete groover, 1" depth groove	2	\$8.65	\$17.30
Caulking gun, cartridge type	1	\$7.95	\$7.95
Grease gun, lever operated, cartridge type	1	\$19.25	\$19.25
Paint gun, 1 qt. capacity w/50' hose and coupling	1	\$179.87	\$179.87
Soldering gun, 240/325 watts	1	\$40.30	\$40.30
Stapler gun, 1/4" to 3/8"	1	\$14.95	\$14.95
Ball pein hammer, 1/2 lb.	2	\$9.49	\$18.98
Ball pein hammer, 1 lb.	2	\$11.48	\$22.96
Ball pein hammer, 2 lb.	2	\$14.44	\$28.88
Brass hammer, 1 lb. or 1-1/2 lb.	1	\$24.25	\$24.25
Brick hammer, 1-1/2 lb.	1	\$16.83	\$16.83
Machinist or blacksmith hammer, 2-1/2 lb	. 4	\$9.13	\$36.52
Nail hammer, bell faced, curved claw, 13 oz.	5	\$19.12	\$95.60
Nail hammer, bell faced, curved claw, 16 oz.	5	\$19.12	\$95.60
Nail hammer, bell faced, semi-rip, 16 oz.	2	\$19.12	\$38.24

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Nail hammer, bell faced, rip, 16 oz.	2	\$26.02	\$52.04
Plastic-tip hammer, 1 lb.	1	\$7.44	\$7.44
Sledge hammer, 6 or 8 lb.	1	\$13.77	\$13.77
Tack hammer, magnetic	1	\$3.75	\$3.75
Tinners hammer, setting, 12 oz.	1	\$22.50	\$22.50
File handle, 5"	10	\$3.99	\$39.90
Blacksmith hardie to fit anvil	1	\$10.30	\$10.30
Broad or half hatchet, 4"	1	\$8.94	\$8.94
Shingle hatchet	1	\$16.95	\$16.95
Chain hoist, 1-1/2 ton, w/A-frame	1	\$396.00	\$396.00
Water hose, w/fittings, 3/4" X 50'	2	\$21.88	\$43.76
Mortar hoe	1	\$19.95	\$19.95
Battery hydrometer	•	\$4.59	\$4.59
Hydraulic jack, portable, 8 ton	1	\$25.99	\$25.99
Hydraulic jack, portable, 2 ton floor (service jack)	1	\$166.60	\$166.60
First aid kit	1	\$24.95	\$24.95
Linoleum knife	1	\$4.99	\$4.99
Pruning knife	4	\$4.99	\$19.96
Putty knife, 1" blade	4	\$3.70	\$14.80
Putty knife, 3" blade	2	\$5.61	\$11.22
Extension ladder, 24' (wood)	1	\$149.99	\$149.99

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Step ladder, folding w/paint shelf, 8' (wood)	1	\$70.50	\$70.50
Testing lamp, 120/240 volts, shopmade	2	\$10.00	\$20.00
Trouble checking lamp, 25' cord, fixture guard w/3 conductors, h/duty, oil resistant, reel type	2	\$39.95	\$79.80
Carpenter level, aluminum, 24"	2	\$18.32	\$36.64
Farm level, set (tripod, target, and rod)	1	\$533.00	\$533.00
Mason level, wood, 48"	2	\$39.95	\$79.80
Timing light, ignition, power, 6 and 12 vo	lts 1	\$60.65	\$60.65
Wood mallet, 1-1/2" X 5" head	10	\$8.85	\$88.50
Electric engraver marking took, 120 v, 60 cycle, AC w/cord	1	\$16.92	\$16.92
Ohm meter, volt, ampere-multimeter	1	\$33.96	\$33.96
Outside micrometer, 0" to 1"	1	\$27.88	\$27.88
Outside micrometer, 1" to 2"	1	\$34.99	\$34.99
Outside micrometer, 2" to 3"	1	\$39.99	\$39.99
Inside micrometer, 2" to 8"	1	\$74.88	\$74.88
End cutting nipper, 14"	1	\$16.95	\$16.95
Block plane, length, 6" to 7"	4	\$18.93	\$75.72
Jack plane, elngth, 12" to 16"	10	\$41.88	\$418.80
Jointer plane, length, 18" to 22"	1	\$46.88	\$46.88
Smoothing plane, length, 8" to 10"	6	\$35.12	\$210.72
Battery pliers, 8"	2	\$10.50	\$21.00

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Combination pliers, slip joint, 6"	10	\$4.49	\$44.90
Combination pliers, slip joint, 8" or 10"	4	\$8.49	\$33.96
Diagonal pliers, 6"	2	\$11.12	\$22.24
Ignition pliers	1	\$13.49	\$13.49
Lineman's pliers, 8"	8	\$15.27	\$122.16
Longnose pliers, 6"	8	\$11.57	\$92.56
Vise grip pliers	8	\$9.30	\$74.40
Vise grip pliers, welding	8	\$14.82	\$118.56
Wire pliers	4	\$11.91	\$47.64
Master puller set	1	\$734.55	\$734.55
Staple puller	1	\$3.56	\$3.56
Aligning punch, 10"	2	\$6.49	\$12.98
Aligning punch, 15"	2	\$7. 49	\$14.98
Blacksmith punch w/handle, 1/4", 5/16", 3/8", 1/2" (each)	1	\$63.59	\$63.59
Center punch, 3/8"	4	\$3.62	\$28.96
Center punch, 1/2"	4	\$3.62	\$2 8.96
Pin punch, 1/8", 5/32", 3/16", 5/16", 3/8"	(each) 2	\$25.14	\$50.28
Starting punch, 3/8", 1/2", 5/8", 3/4" each	2	\$15.36	\$30.72
Wood rasp, 10" to 12", flat and half-round	16	\$7.74	\$123.84
Burring reamer w/spiral flutes, pipe, 1/4" to	2" 1	\$21.95	\$21.95
Respirator, disposable type cartridge	2	\$21.95	\$43.90
Blacksmith rule, 36"	4	\$2.99	\$11.96

Torque wrench, 0 to 150 inch pounds, 3/8" drive	1	\$46.30	\$46.30
Torque wrench, 0 to 150 foot pounds, 1/2" drive	1	\$46.30	\$46.30
Power Tools (These tools must be high qu	ality and of an industr	ial or commerci	ial type.)
Battery charger, 6 adn 12 volts, slow charge	1	\$155.00	\$155.00
Metal and/or pipe bender, 1/2" to 2", hydraulic power, heavy duty (table optional)	1	\$635.10	\$635.10
High pressure cleaner, wash or steam	1	\$1,560.00	\$1,560.00
Vacuum cleaner, shop, heavy duty	1	\$375.20	\$375.20
Air compressor, electric, stationary, 5 hp. 80 gal. tank or smaller, 24 cfm. displacem or less	nent	\$1,099.99	\$1.099.99

IT'EM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Portable drill, electric, 1/4:", heavy duty, variable speed	3	\$106.39	\$319.17
Portable drill, electric, 3/8", heavy duty, variable speed	1	\$114.24	\$114.24
Portable drill, electric, 1/2" heavy duty, w/key locking chuck	1	\$142.80	\$142.80
Drill press, heavy duty, variable speed, 1/2" chuck	2	\$829.48	\$1,658.96
Grinder, bench type, 1/2 hp. electric moto w/7" wheels and accessories	or 2	\$120.80	\$241.60
Grinder, pedestal, 1 hp. electric motor w/10" wheels and accessories	1	\$741.70	\$741.70
Portable grinder, electric	2	\$94.95	\$189.90
Jointer, 6" or 8", complete with guard, fence, stand, and motor	1	\$1,162.72	\$1,162.72
Concrete mixer, 3-4 cu. ft. capacity w/1/2 hp. electric motor		\$1,492.50	\$1,492.50
Metal cutting nibbler	1	\$400.40	\$400.40
Wood planer, 10" to 16", complete w/mot and table (13")		\$1,199.95	\$1,199.95
Portable router, electric	1	\$174.93	\$174.93
Portable belt sander	1	\$221.34	\$221.34
Portable vibrator sander	1	\$139.23	\$139.23
Vertical wood cutting saw, 12" or larger w/motor and stand	1	\$790.34	\$790.34
Circular saw, 10" or 12", tilting arbor	1	\$899.00	\$899.00
Microscopes	10	\$377.00	\$3770.00

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Band saw, metal cutting, capacity, 6" x 10" rectangular stock, 9" round stock, 3" X 16" flat stock, heavy duty	1	\$875.00	\$875.00
Abrasive cut-off saw, 10" to 16" wheel, minimum cutting capacity 1" solid round 2" pipe, 2 to 7-1/2 hp. motor, either single or three phase	1	\$1,505.35	\$1,505.35
Portable electric hand saw, 7" blade	2	\$129.95	\$259.90
Portable sabre saw (Bayonet), industrial type	1	\$183.20	\$183.20
Radial arm saw, 10" to 14" blade	1	\$1,900.00	\$1,900.00
Electric arc welder, AC or AC/DC (225 amps, minimum w/accressory kit)	10	\$419.99	\$4,199.90
Electric arc welder, stationary or portable, electric or manual start, 200 to 300 amps. (DC or AC/DC w/ accessory kit)	1	\$2,599.99	\$2,.599.99
GMA gas metal are (MIG) welder, single three phase, 60 cycle, minimum 200 amps wire feeder, gun and power cable, CO2 flow meter, power cord, and chassis	•,	\$1,529.50	\$1,529.50
GTA, gas tungsten arg (TIG) welder, single or three phase, 60 cycle, minimum 250 am AC/DC high frequency, w/flowmeter, minimum 200-300 amps. water-cooled gur (if AC/DC welder is available in farm shot the add-on GTA (TIG) high frequency unit may be purchased in place of the above unit)	nps., n p, t	\$2,983.00	\$2,983.00
Plasma cutter, 20 amp., 0-100 psi air pressure regulator, 208/230 v, 35/31 primary amps.	1	\$1,140.00	\$1,140.00
Carbon-arc torch	1	\$31.99	\$31.99
Slag hammers (1 each station)	10	\$11.89	\$118.90

ERIC Fruited by EBIC

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Helmets, lift front, arc welding (2 each station)	20	\$17.99	\$359.80
Impact wrench, electric or air, 0 to 200 ft. pounds, 1/2" drive	1	\$59.95	\$59.95
Equipment			
Woodworking bench, wod top w/4 wood- working vises on each bench (approximate size 54" X 64" X 32-1/4"	5	\$1,160.80	\$5,804.00
Metalworking bench, metal top w/2 machi vises (approximate size 6' X 30" X 32")	ne 4	\$687.00	\$2,748.00
Tool cabinet, wall	2	\$355.00	\$710.00
Small Gasoline Engine Tools and Equip	ment		
Gasoline engine, small (two and four cycle (horizontal shaft for four cycle)	10	\$179.50	\$1,795.00
Small hole guage, 1/8" to 1/2" set	1	\$59.30	\$59.30
Telescoping guage, 1/2" to 4"	1	\$46.45	\$46.45
Gear puller, small, 2-3 jaw	1	\$18.00	\$18.00
Coil tester	1	\$69.95	\$69.95
Torque wrench, 1/4" or 3/8" drive w/adap 0 to 150 inch pounds	oters,	\$46.30	\$46.30
Small engine tool kit (2 reamers, 3 plug guages, 1 tester, 1 bushing driver and ream 1 oil plunger driver and reamer, 2 jet screwdrivers, 1 valve spring compressor, 1 piston ring compressor, 1 clutch wrench 3 assorted flywheel pullers, flywheel holde and pilot bushing)	,	\$2,219.50	\$2,219.50

ITEM	RECOMMENDED QUANTITY	COST PER UNIT	TOTAL COST
Engine Equipment			
Cold chisel, 1/2" cut	10	\$3.75	\$37.50
Nut driver, 1/4", 5/16", 7/16" (each)(set)	10	\$29.45	\$294.50
Piston ring expander	10	\$8.70	\$87.00
Feeler guage	10	\$6.10	\$61.00
Spark plug guage	10	\$3.30	\$33.00
Ball pein hammer, 1/2 lb.	10	\$9.49	\$94.90
Plastic tip hammer	10	\$7.44	\$74.40
Combination pliers, 7°	10	\$6.59	\$65.90
Needle nose pliers, 7"	10	\$12.95	\$129.50
Long nose pliers, 7"	10	\$10.95	\$109.50
Brass punch, 1/2" X 6"	10	\$8.95	\$89.50
Steel punch, 5/16"	10	\$5.00	\$50.00
Phillips screwdrivers, 4"	10	\$2.99	\$29.90
Phillips screwdrivers, 6"	10	\$3.50	\$35.00
Standard screwdrivers, 6"	10	\$4.79	\$47.90
Standard screwdrivers, 8"	10	\$5.59	\$55.90
Combination wrenches, 3/8", 7/16", 9/16" 1/2" set	10	\$34.15	\$341.50
Socket wrench set, 6-12 point, 3/8" drive, 1/4" to 13/16" by 16ths, extension 3", hinge handle	10	\$86.45	\$864.50
Socket wrench set, 3/8" drive, spark plug, 3/4", 13/16", 7/8", speed handle	10	\$54.20	\$542.00

SUPPLIES AND EQUIPMENT THAT MAY BE NEEDED FOR TEACHING THE 2+2+2 AGRISCIENCE TECHNOLOGY PROGRAM IN DAIRY PRODUCTS MANAGEMENT

In addition to the tools and equipment previously listed, the supplies and equipment listed below are necessary to develop skills and competencies needed by students.

- 1 Tattoo Set
- 4 Cattle-weighing Tapes
- 1 Balling Gun
- 2-3 Gallon pressure sprayers
- 4 Vaccinating Syringes and Assorted Needles (2) 50 cc Syringe Capacity and (2) 10 cc Capacity
- 2 Dose Syringes 5-10 oz. size
- 1 Veterinary Thermometer
- 1 Trocar with Cannula
- 4 Castrating Knives
- 100' Manila Rope-1/2"
- 4 Hoof Trimmers
- 2 Emasculators
- 1 Burdizzo, Medium Size
- 1 Electric Clipper with Shearing Head
- 1 Hand Clipper
- 6 Pair rubber gloves
- 1 Keystone Dehorner
- 1 Calf Dehorner
- 1 Electric Dehorner
- 1 Chemical Dehorner
- 1 Dehorning Saw
- 1 Bull Ringer
- 1 Set of insect and parasite mounts
- 2 Livestock Show Boxes
- 2 Curry Combs
- 2 Cattle Brushes
- 1 Dissecting set
- 1 Surgical scissors
- 1 Soil Auger, 2" Bit, 40" Shank
- Soil Testing Kit Including: Nitrogen Tester, Phosphate Tester, Potash Tester, pH Tester, Test Tubes, Reagents, and Filters
- 1 Plant Tissue Testing Kit
- 1-5 Bostrum No. 2 Farm Level with Tripods and Targets
- 1 Farm Level, Target, and Rod
- 1 Chain Tape, 100'
- 1 Set of Samples of Good Seed for Each Crop of Economic Importance in the Community
- 4 Insect Killing Jars
- 1 Soil Thermometer

ADDITIONAL DAIRY TOOLS AND EQUIPMENT - CONTINUED

- 1 Set of Grass and Legume Mounts
- 1 Soil Profile Homemade of Typical Soil
- 1 Set of Fertilizer Samples
- 1 Set of Topsoil Samples
- 1 Specimen of Each Crop Plant from Rich and Poor Soil
- Set of Samples of Soil-Building Crop Seed, Such as Legumes
- 1 Set of Legume Innoculants
- 1 Rain Gauge
- 1 Dust gun, eight pound capacity
- 2 Respirators
- Set of classes and grades of feed, seed, and fiber products of economic importance in the community
- 1 Antibiotic Test Kit
 - Teat Cups Various
 - Claws Various Models
 - Inflations Various Models
- 1 Portable Milking Machine
- 1 Subscription Hoard's Dairyman
- 1 Subscription Dairyman's Digest

Visual Aids Equipment:

16mm movie projector

35 mm film strip - slide projector

Nonreflective screen for overhead projector

Reflective screen for movie projector

35mm camera

Video tape equipment - recording and playing

Computers (8)

Overhead projector

Video camcorder

XI. COMPETENCY PROFILE

The following competency profile will be completed at the secondary level for those competencies achieved by the student during grades 11 - 12.

The profile will then be sent to the postsecondary institution where it will be updated as the student progresses.

Upon graduation from the postsecondary institution, a copy of the profile will have the college seal affixed, and will be provided to the student for presentation to a proposed employer.

334

Directions: Evaluate the student using the rating scale below. Check the appropriate number to indicate the

degree of competency. The rating for each of the tasks should reflect job readiness.

Rating Scale: 4 Skilled - can work independently with no supervision

3 Moderately Skilled - can perform job completely with limited supervision

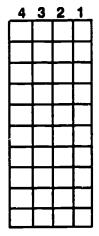

2 Limited Skill - requires instruction and close supervision

1 No Exposure - no experience or knowledge in this area

A. MILKING, SANITIZING, AND MAINTAINING THE EQUIPMENT

- 1. Sanitize the milking system
- 2. Assemble milking equipment
- 3. Prep the cow for milking
- 4. Milk the Cow with the Milking Machine
- 5. Monitor feed and milk cooling equipment
- 6. Clean the milking system
- 7. Maintain milking system

B. MAINTAINING DAIRY HERD HEALTH

- 1. Identify aliments in order to obtain timely treatment
- 2. Administer medication and vaccinations
- 3. Sterilize tools and equipment
- 4. Store medicines, chemicals
- 5. Control parasites
- 6. Take an animal's temperature
- 7. Perform in-barn mastitis test
- 8. Keep health records on dairy animals
- 9. Inventory medical and chemical supplies
- 10. Test milk for antibiotics

C. BREEDING

- 1. Examine & treat reproductive system for breeding
- 2. Detect heat
- 3. Artificially inseminate cows and helfers
- 4. Handmate cows and helfers
- 5. Manage Sires
- 6. Record breeding data
- 7. Store semen and maintain breeding supplies
- 8. Pregnancy test bred cows and helfers

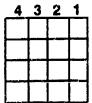

D. HANDLING AND CARING FOR MILKING HERDS ACCORDING TO PRODUCTION

<u> </u>	_=_	

4 3 2 1

- 1. Check udder health
- 2. Monitor eating and milk production
- 3. Sort cows into herds
- 4. Segregate incompatible animals
- 5. Dry off cows

E. HANDLING AND CARING FOR THE DRY HERD

- 1. Manage dry cows
- 2. Assist with calving
- 3. Produce healthy newborn calves
- 4. Remove extra teats

F. HANDLING AND CARING FOR THE REPLACEMENT HERD 1. Manage baby calves 0-8 weeks 2. Manage caives 200-500 pounds 3. Identify animals 4. Dehorn animals G. FORMULATING AND FEEDING RATIONS 1. Identify & regulate access to feedstuffs causing off-flavored milk 2. Classify feedstuffs to nutritive value 3. Calculate nutritional requirements for animals 4. Mix & test feed ingredients to meet animal & ration requirements 5. Weigh animals 6. Feed animals 7. Clean feed and water troughs 8. Provide adequate water H. PRODUCING FORAGES 1. Design and follow a soil conservation plan 2. Prepare the seedbed 3. Plant forages 4. Control Diseases 5. Control Pests 6. Control Unwanted Plants 7. Determine harvest time and harvest forages 8. Store forages I. OPERATING AND MAINTAINING NON-MILKING EQUIPMENT AND TOOLS 1. Remove or add ballast weights to tractors 2. Attach farm equipment to the drawbar 3. Operate equipment 4. Store equipment 5. Perform seasonal preventative maintenance 6. Perform daily preventative maintenance on equipment 7. Replace universal joints 8. Maintain tires 9. Bleed diesel fuel systems 10. Change fuel filters 11. Change oil and oil filter 12. Flush and clean radiator 13. Replace thermostats 14. Replace radiator hoses 15. Install V-belts on pulleys 16. Install and adjust pulleys on motors 17. Install electric motor 18. Reverse electric motor 19. Service electric motors 20. install and adjust roller chains 21. Install engine batteries 22. Service engine batteries 23. Service wheel or in-line bearings 24. Maintain tools 25. Adjust safety shields 26. Calibrate equipment

J. MARKETI	NG PRODUCTS AND ANIMALS
4 3 2 1	1. Market dairy animals/products
	2. Transport animals
	3. Verify production records
	•
K. HANDLIN	IG AND DISPOSING OF ANIMAL WASTE
4 3 2 1	
	1. Manage and remove solid and liquid waste
	2. Apply wastes to fields
L. ASSIST IN	N SELECTING BREEDING ANIMALS
4 3 2 1	
	1. Culi animais
	2. Select foundation stock
	3. Select purchased and self-raised replacement stock
	4. Select sires
M. MAINTAI	NING BUILDINGS AND STRUCTURES
4 3 2 1	
	1. Construct and install doors
	2. Hang silding doors
	3. Hang hinged doors
	4. Paint wood surfaces
	5. Paint metal surfaces
	6. Apply creosote or other wood preservatives
	7. Patch roofs
	8. Install window panes
	Weld metal using arc welder Weld metal using oxy-acetylene unit
	11. Cut metal using oxy-acetylene unit
	12. Construct and maintain wooden fence
	13. Construct and maintain wire fence
} 	14. Construct and maintain electric fence
	15. Construct and maintain gates
	16. Hang Gates
	17. Wire simple electric circuits
	18. Connect electric switch
	19. Connect lighting fixture
	20. Attach plug and receptacle to electrical drop cord
	21. Replace fuses
	22. Reset circuit breakers
	23. Maintain a water system
	24. Pour concrete floor
	25. Construct block walls
	26. Extinguish fires
<u> </u>	27. Maintain ventilation equipment in dairy barns

28. Paint buildings

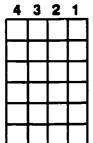

N. MANAGING HAZARDOUS MATERIALS

	4	3	2	<u>1</u>
į				

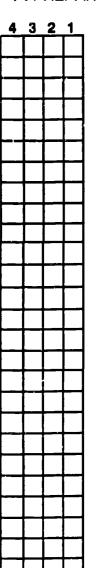

- 1. Storing hazardous materials
- 2. Using hazardous materials
- 3. Disposing of hazardous materials
- 4. Managing dioxins

O. MANAGING THE BUSINESS

- 1. Maintain health records on dairy animals
- 2. Inventory supplies
- 3. Maintain animal production records
- 4. Maintain pedigree records
- 5. Maintain equipment records
- 6. Maintain forage production records

P. PREPARING FOR OWNERSHIP

- 1. Calculate Interest Costs
- 2. Formulate Feasible Repayment Schedule
- 3. Prepare a Cash Flow Budget for the Dairy Enterprise
- 4. Develop and negotiate a credit plan for the farm business
- 5. Calculate and record assets
- 6. Calculate and record liabilities
- 7. Calculate and record expenses
- 8. Calculate net Income
- 9. Calculate amount of life insurance needed
- 10. Calculate and record depreciation
- 11. Calculate and record net worth of farm businesses
- 12. Fill out income tax form: income or loss
- 13. Fill out federal income tax capital gains or loss
- 14. Fill out federal income tax investment credit schedule
- 15. Fill out federal income tax FICA schedule
- 16. Complete federal income tax form 1040
- 17. Hire workers
- 18. Dismiss workers
- 19. Develop a plan for amount of labor needed
- 20. Develop and assign work schedules
- 21. Comply with employers legal requirements
- 22. Train employees
- 23. Develop written work agreements
- 24. Evaluate work performance
- 25. Develop production goals
- 26. Comply with industry production standards
- 27. Analyze trends in dairy procest demand
- 28. Contract for professional management services
- 29. Develop plan for bestowing the estate
- 30. Calculate and record labor management income

Q. STARTING UP HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION PROCESS

4	3	2	1

- 1. Inspect equipment prior to start-up
- 2. Adjust equipment for start-up
- 3. Prepare data recording equipment
- 4. Start up high-temperature, short-time pasteurization

R. PROCESSING HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION

	_+	<u> </u>	
İ			

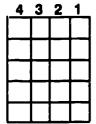

- 1. Monitor pasteurization process
- 2. Adjust equipment for high-temperature, short-time processing
- 3. Record high-temperature, short-time processing data
- 4. Put product into storage tank

S. PERFORMING PRODUCT-TO-PRODUCT CHANGEOVER

L
_

- 1. Prepare lines and valves to bring new product to balance tank
- 2. Adjust equipment for product changeover
- 3. Complete product changeover process

T. PERFORMING PRODUCT CHANGEOVER REQUIRING FLUSH-OUT

- 1. Operate lines following established sequence
- 2. Set recording data equipment for changeover/flush-out
- 3. Perform flush-out procedures
- 4. Inspect equipment for proper operation
- 5. Complete product changeover process

U. SHUTTING DOWN HIGH-TEMPERATURE, SHORT-TIME PASTEURIZATION

- 1. Prepare high-temperature, short-time for shut-down
- 2. Shut down high-temperature, short-time system
- 3. Inspect recording data equipment

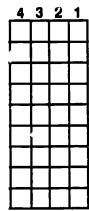

V. CLEANING THE HIGH-TEMPERATURE, SHORT-TIME PASTEURIZER

	4	3	2	<u>1</u>
			Н	
			_	_
1				

- 1. Inspect and adjust equipment and lines for cleaning
- 2. Perform cleaning procedures
- 3. Inspect equipment

W. APPLYING SAFETY PRACTICES

- 1. Comply with shop and equipment safety rules
- 2. Apply basic emergency first aid techniques
- 3. Complete accident report
- 4. Inspect work area and equipment for safe working
- 5. Use fire extinguisher
- 5. Correct safety hazards
- 7. Demonstrate cardiopulmonary resuscitation (CPR)
- 8. Comply with safety requirements for working around automated systems
- 9. Participate in safety training program

XII. STUDENT MON!TORING AND FOLLOW-UP

The following student monitoring and follow-up instrument is the one that will be used to monitor and follow the student one year after graduation from the postsecondary institution.

At the present lime, the 2+2 User's Group is considering adopting an instrument to be used for all 2+2 programs. At the time of this report that has not taken place.

Dairy Environmental Technician

Quality Control/Food Safety Technician Product Development Coordinator

Sales And Marketing

Sales Manager Marketing Representative

Advertising/Public Relations Computer Programmer

Database Management Specialist Information Systems Analyist

Distribution Manager

Processing/Management

Shipping Superintendent Maintenance Superintendent

Fresh Milk Processing Superintendent Processed Foods Processing Superintendent

Processing Plant Manager

XIV. RECOMMENDED TEACHER APPROVAL CRITERIA

The following is the recommended teacher approval criteria for a secondary agriscience teacher training students for the 2+2+2 Dairy Products Management Program.

TEACHER APPROVAL CRITERIA

Secondary teachers who plan to initiate a 2+2 +2 Agricultural Program in the area of Poultry

Products Management or Dairy Products Management should have the following qualifications:

- 1. The teacher should have a valid Texas Teacher Certificate with Agricultural Science and Technology certification.
- 2. The teacher should have attended animal science related workshops as approved by the Texas Education Agency.
- 3. It is not necessary but is recommended that the teacher have taught within the last three years at the time of implementation of the 2+2 program or be a recent graduate (within the past 12 months) of an approved agricultural education program from a Texas college or university.

XV. ARTICULATION AGREEMENT

The following is an example articulation agreement to be signed by the secondary and postsecondary institutions who are interested in providing the agriculture 2+2 curriculum for their students.

AGRICULTURAL OCCUPATIONS 2+2+2 PROGRAM

ARTICULATION AGREEMENT

PURPOSE

- 1. To eliminate duplication of effort between area secondary and postsecondary educational institutions in the delivery of agriscience courses.
- 2. To optimize student enrichment by providing coordinated curriculum to insure a continuous learning path, beginning at the secondary level and continuing to the postsecondary level.
- 3. To assure that students are adequately equipped with the necessary academic and vocational skills to gain and hold employment upon graduation from both secondary and postsecondary levels.

AGREEMENT

- 1. Secondary institutions which are a party to this agreement hereby agree to:
- a. Evaluate and recruit students who have, in their opinion, necessary qualifications to successfully complete the Agricultural Occupations 2+2 or 2+2+2 Articulated Program.
- b. Offer and maintain for the duration of this agreement the agriscience courses designated as a part of the Agriculture 2+2+2 Articulated Program or a series of courses containing the same competencies.
- c. Maintain necessary records to track and evaluate individual student's progress of required agriscience competencies as contained in the Agricultural Occupations 2+2+2 Articulated Program. Such records will be forwarded to the postsecondary institution upon request.
- 2. The postsecondary institutions which are a part of this agreement hereby agree to:
- a. Assist secondary institutions which are a party to this agreement in evaluating and recruiting students.
- b. Offer and maintain for the duration of this agreement Applied and Associate Degree curriculum and resources as specified in the Agricultural Occupations 2+2 and 2+2+2 Articulated Program. No student will be allowed to enter the associate degree program without having first successfully completed the competencies required in the secondary portion of the Agricultural Occupations 2+2+2 Articulated Program.

AGRICULTURAL OCCUPATIONS 2+2+2 PROGRAM

ARTICULATION AGREEMENT Continued

- c. Provide an adequately trained faculty to administer and teach the Agricultural Occupations Applied and Associate Degree curriculum.
- d. Provide assessment of students upon entry to the postsecondary institution (students must score 80% or greater on materials covered in secondary program) and counsel students regarding the Applied vs the Associate Degree Programs.
- e. Continue student records provided by secondary institutions; maintain adequate records during applied or associate degree program; and track student progress through at least one year of employment and provide to employers upon request.

REVIEW AND CHANGE PROCESS

At the end of one year from the date of this agreement, a review of the Articulation Agreement of the Agricultural Occupations 2+2+2 Articulated Program will be conducted. All superintendents, principals, counselors, vocational administrators, instructors from secondary schools, administrators and instructors from postsecondary schools, and industry representatives will be invited to provide input for review and revision.

PROVISION FOR IMPLEMENTATION/TERMINATION

This agreement will become effort	ective upon approval by the
President of	College and the
Superintendent of	
Independent School District. Upon	implementation, this agreement
will continue on an annual basis un	til one of the parties petitions
the other party to end the agreemen	
Such petition to end the agree	ment (1) must be submitted one
year in advance of the intent to te	• •
in writing signed by the college pro	
making the petition; and (3) must be	
of the agreement. Delivery of the	
constitute formal notification and	
termination one year following the	
termination one year rollowing the	aute of activity.
