ABSTRACT

The Livermore Education Center (LEC), an off-campus center of Chabot College, was established in 1975. In 1986, the South County Community College District designated the LEC a full-service community college campus eligible for state funding of facilities, and in 1988, the Board of Governors of the California Community Colleges approved Las Positas College (LPC) as the 107th college of the system. Although the college was built entirely with local funds, to receive state funds for capital expansion, the California Postsecondary Education Commiss. n (CPEC) must formally review plans for the college, just as it reviews proposals and plans for new college campuses. This report constitutes CPEC's review of plans for LPC and its approval of the college within the California Community College System, making it eligible for state capital outlay funding as of the 1991-92 fiscal year. After part 1 reviews CPEC's conclusions and recommendations, part 2 describes CPEC's involvement in the college planning process and the history of the proposal for Las Positas College. Part 3 reviews the following aspects of the Las Positas proposal: adequate funding projections; alternatives to new campuses or off-campus centers; serving the disadvantaged; geographic and physical accessibility; environmental and social impact; effects on other institutions; academic planning and program justification; and consideration of needed funding which includes projected capital outlay projects for LPC from 1990-91 through 1994-95. Appendixes include CPEC guidelines and procedures for the review of new campuses and off-campus centers; a history of LEC and LPC; and a copy of the LPC master plan educational program. (PAA)

APPROVAL OF LAS POSITAS COLLEGE IN LIVERMORE

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

COMMISSION REPORT 91-15 PUBLISHED SEPTEMBER 1991

Summary

The California Postsecondary Education Commission prepared this report pursuant to its responsibilities under Section 66904 of the Education Code to review proposals for new campuses and off-campus centers submitted by California's public segments of higher education.

Las Positas College began as an outreach operation of the South County Community College District in 1963 and grew into the Livermore Education Center in 1974. Subsequently, it was named by the Commission as one of a number of off-campus centers that should be "grandfathered" into approval status by virtue of having been started prior to April of 1974. It was approved by the Board of Governors as the 107th campus of the California Community College system in 1988 but had not been previously reviewed by the Commission due to several circumstances, including the Commission's desire not to review any proposals until after the statewide longrange planning process then underway by the Chancellor's Office of the California Community Colleges was complete.

As prepared by the South County district and the Chancellor's Office, the Las Positas College proposal is thorough and complete, and therefore the Commission recommends that the institution be approved as a full-service community college.

The Commission adopted this report on recommendation of its Policy Development Committee at its meeting on September 16, 1991. Additional copies of the report may be obtained from the Publications Office of the Commission at (916) 324-4991. Questions about the substance of the report may be directed to William L. Storey of the Commission staff at (916) 322-8018.

On the cover: Master-plan rendering of the college campus at full buildout.

APPROVAL OF LAS POSITAS COLLEGE IN LIVERMORE

A Report to the Governor and Legislature on the Development of Las Positas College -- Formerly the Livermore Education Center of Chabot College

1 Conclusions and Recommendation

THE SOUTH COUNTY Community College District has maintained a presence in the Livermore area of Alameda County for the past 28 years, beginning with a few course offerings at the Lawrence Livermore Laboratory in 1963. Since then, what was once a small outreach operation grew into the off-campus Livermore Education Center of Chabot College, then a comprehensive "educational center" as that term is defined by the Board of Governors, and by 1988 into a full-fledged college in its own right. At present, Las Positas ("Little Wells") College possesses full independent accreditation from the Western Association of Schools and Colleges, and boasts an enrollment of some 5,700 headcount students (3,000 ADA).

It may be asked why the California Postsecondary Education Commission should review plans for a college that is already so well developed, since the Commission's normal role is to review proposals for new campuses and off-campus centers, not those already in existence. The answer is threefold:

- 1. Las Positas College began as an off-campus center of Chabot College prior to the time the Commission assumed its role as the reviewer of new campus and center proposals, and consequently it was "grandfathered" into official off-campus center status.
- 2. The Commission has historically reviewed only those proposals for which State capital outlay funding was requested, and while Las Positas was built entirely with local funds prior to the Proposition 13 era, it will need State funds for capital expansion in the future.
- 3. When the Board of Governors, in October 1988, voted to recognize Las Positas as the 107th college in the California Community College system, the Commission decided to defer all reviews of new campuses and off-campus centers until such time as the Board completed its long-range planning for new colleges and centers -- a decision that also affected the University of California and the California State University.

The result is a review after the fact: a circumstance the Commission is anxious to avoid in the future, but that cannot be altered in the current case. Fortunately, the proposal for Las Positas submitted by the South County Community College District and transmitted by the Chancellor's Office is exceptionally sound. Were it not so, the Commission would feel free to criticize it or offer advice for the future of the college, but there is clearly no need to do so. From all the evidence available to the Commission, the college is more than adequate in size, is blessed with a dedicated faculty and staff, is arrayed with a wide variety of programs, has an effective and engoing planning process, and may be allowed more than a little pride for the quality of its operations.

Specifically, the Commission offers to the Governor and the Legislature the following conclusions that follow the eight criteria it uses to evaluate all new campus proposals:

- 1. The South County Community College District has provided comprehensive enrollment information for virtually the entire history of the center. Las Positas's current enrollment is more than adequate to justify its existence as a comprehensive community college.
- 2. The only viable alternative to approving Las Positas College as a comprehensive college of the system would be to classify it as an off-campus center. The effect of this alternative would be to deny it eligibility for State capital outlay funding for phygical education and other facilities ancillary to its core academic program, thus denying it the opportunity to become a comprehensive community college. Given the population growth in the area and the comprehensive nature of Las Positas's existing programs. the Commission believes it should be permitted to reach its full potential.
- 3. The South County district has demonstrated that the college has an extensive array of services that currently facilitate access for disad-

1

Q

- vi ged students as well as well-conceived plans to and those services in the future.
- 4. The district has fully described the physical, social, and demographic characteristics of the region, and has provided a transportation plan for continued access to the college. Commuting time from virtually everywhere in the Livermore Valley is reasonable -- a fact owing to an excellent site selection in 1965.
- 5. The Commission's fifth criterion -- submission of an environmental impact report -- is not applicable in this case, since the college is already built.
- 6. Regarding the Commission's sixth criterion of minimal effects on other institutions, any adverse effects of Las Positas are expected to be slight, given its isolation from neighboring community colleges. Both of the two closest community college districts -- Contra Costa and San Joaquin Delta -- support Las Positas as a full college. In addition, the college has had a strong cooperative relationship with California State Universi-

- ty, ty, Hayward, for many years. The State University is consequently also in support of full college status for Las Positas.
- 7. The South County district has developed comprehensive academic plans and justifications acceptable to the Board of Governors and to the Commission, as well as to the Western Association of Schools and Colleges, which granted full accreditation to Las Positas in 1990.
- 8. The college is expected to grow in the future and has plans for the construction of several additional buildings. At present, however, the instability of the State budget makes accurate cost forecasting extremely difficult.

Based on these conclusions, the Commission recommends that Las Positas College be approved as the 107th college within the California Community College system and that it become eligible for State capital outlay funding as of the 1991-92 fiscal year.

Background to the Proposal

Commission involvement in the college planning process

Section 66903(5) of the Education Code provides that the California Postsecondary Education Commission "shall advise the Legislature and the Governor regarding the need for and location of new institutions and campuses of public higher education." Section 66904 provides further that:

It is further the intent of the Legislature that California Community Colleges shall not receive state funds for acquisition of sites or construction of new institutions, branches, or off-campus centers unless recommended by the commission. Acquisition or construction of nonstate-funded community college institutions, branches, and off-campus centers, and proposals for acquisition or construction shall be reported to and may be reviewed and commented upon by the commission.

Pursuant to that legislation, in 1975 the Commission developed a series of guidelines and procedures for the review of new campus and center proposals, then revised them in 1978, 1982, and most recently in 1990 under the title of Guidelines for Review of Proposed Campuses and Off-Campus Centers (Appendix A). As presently constituted, they require each of the public higher education segments to develop a systemwide planning framework that delineates plans over a ten to fifteen year period. Once that framework or statewide plan is submitted to the Commission, the segments are then requested to submit short-term plans for specific campuses or centers through a "letter of intent" to expand. If the Commission staff reviews that letter favorably, the segment is then invited to submit a specific proposal that is judged according to eight criteria to determine its relative merits, after which the Commission recommends to the Governor and the Legislature that the new campus or center be approved or disapproved. In the case at hand, such a review has been conducted for Las Positas College in Livermore, the second college of the South County Community College District. Displays 1 through 5 on pagers 4-8 show the general and specific locations of the college, along with two views of the long-range development plan. Displays 2 and 3 most closely approximate the college as it exists today.

History of the proposal

Las Positas College has a long history, a complete chronology of which is listed in Appendix B. To summarize, classes were first offered at Livermore High School, Camp Parks, and the Lawrence Livermore Laboratory in 1963. Two years later, the district purchased a 147.55 acre site with its own funds, then appointed a full-time coordinator in 1967. Little was done for the next five years, due primarily to the defeat of various tax override measures, but in 1972 and 1973, the South County District Board of Trustees decided to initiate formal planning for an off-campus center to be known as the Livermore Education Center; this center was approved by the Board of Governors on February 21, 1974.

In September 1974, construction began on the Livermore site, with occupancy and the offering of the first on-site classes commencing in Mar.h 1975. The initial offerings included 70 classes in 22 subject areas with 606 day students and an evening enrollment of 1,524. By June of 1976, the center had completed its first full year of operation with a total average daily attendance of 1,515. In April of 1976, the South County district directed its staff to prepare a formal application to the Board of Governors and the Commission for full campus status. For various reasons, including the passage of Proposition 13 in 1978 and the ensuing crisis in the State budget, this application was not pursued by the district for several more years.

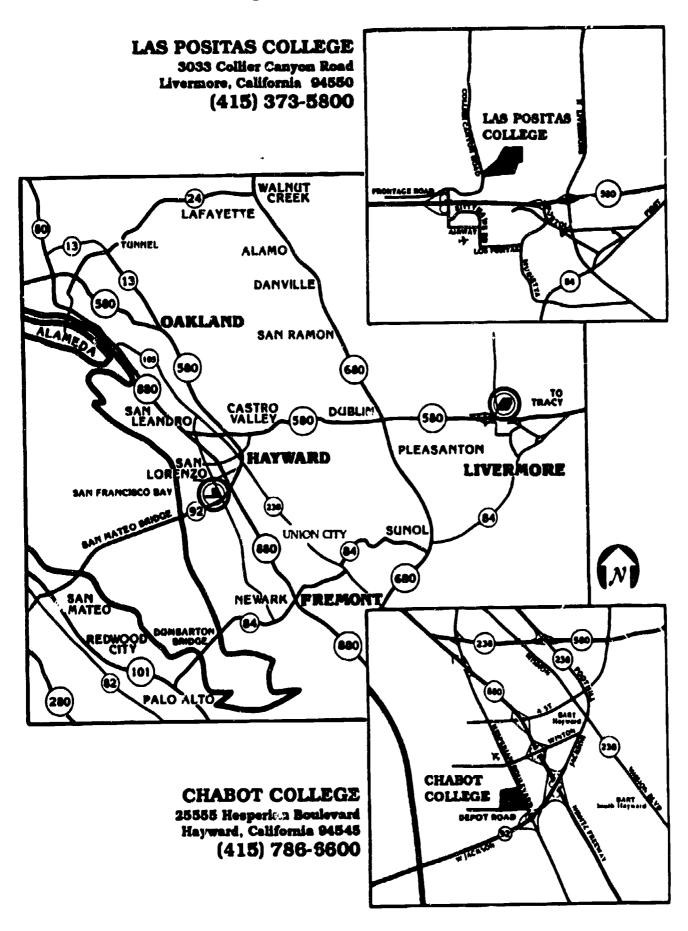

Through most of the 1980s, the center continued to grow, and it received its first formal recognition, albeit indirectly, from the Commission in 1984 when it was included in a list of community college off-

10

campus centers that had commenced operation prior to April 1974. All such centers were "grandfathered" into approval status, and the Livermore Center was accordingly made eligible for State capital outlay funding under the provisions of Education Code Section 66904. This did not result, however, in immediate application for State construc-

tion funding, since district funds continued to be available. With those funds, the district mut the center's needs as attendance grew to 2,161 average daily attendance by the 1985-86 fiscal year. By 1988-89, the center had expanded its original 15,000 assignable square feet of space to a total of 64,200.

DISPI-AY 3 Las Positas College Master Plan, Phase I (Nearly Completed)

Source: South County Community College District, Las Positas College Master Plan, 1989.

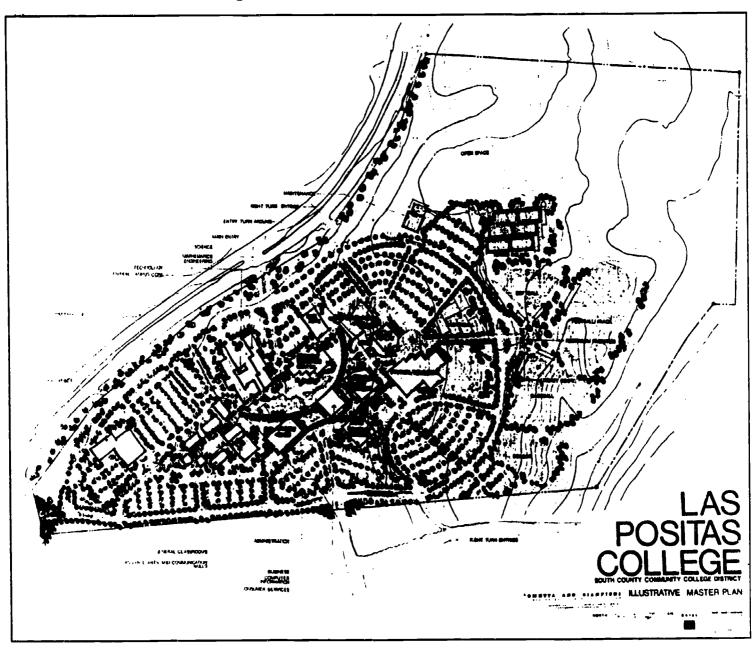

In 1986, the question of full college status emerged again, and on September 16 of that year, the South County District Board of Trustees passed a resolution designating the Livermore Education Center as a full-service community college campus, and petitioned the Board of Governors for eligibility for State funding of facilities. As a practical matter, this had no effect on the center's eligibility for funding for regular academic buildings, since the "grandfather" action of 1984 covered that contingency, but it did affect eligibility for certain kinds of auxiliary facilities such as gymnasia, theaters, and student and faculty activity areas.

Following a series of discussions between the Chancellor's Office and the district, the Board of Governors formally approved the conversion of the Livermore Education Center to full college status in October 1988. In the spring of 1989, the district subsequently determined that the campus should be named Las Positas College.

Under normal circumstances, the Board of Governors would have immediately submitted a formal request for Commission approval of the new college, but since the Commission was then engaged in the long-range planning process that resulted in *Higher Education at the Crossroads*, and since that report

DISPLAY 4 Las Positas College Master Plan at Full Buildout

Source: South County Community College District. Las Positas College Master Plan. 1989.

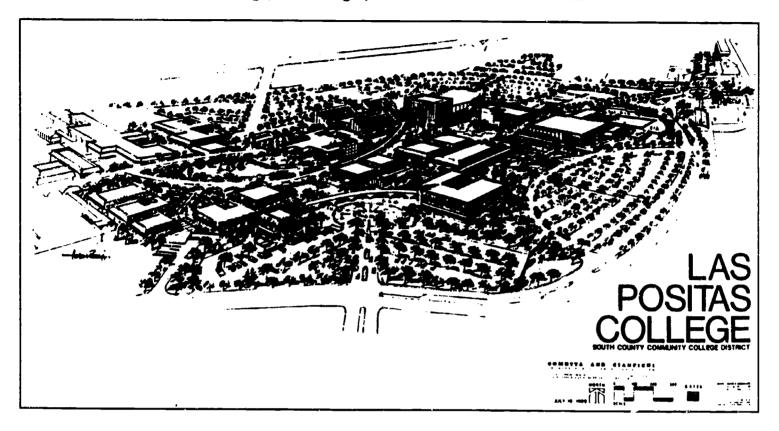

called for the development of a statewide plan for community college development, the request for college status was temporarily deferred until the planning processes were complete. The Crossroads report was completed in January 1990, and the community colleges' Long-Range Capital Outlay Growth Plan in January 1991. On February 24, 1991, the Chancellor's Office requested the Commission to re-

view the Las Positas College proposal (Appendix C), stating that "Such action would complete the steps required for full state recognition of Las Positas College as an approved public community college."

Part Three of this report contains the Commission's analysis of the Las Positas College proposal within the context of the guidelines listed in Appendix A.

DISPLAY 5 Las Positas College, Rendering of Master Plan at Full Buildout

Analysis of the Proposal

IN THE California Community Colleges, the terms "outreach operation," "center," and "off-campus center," are often used interchangeably, as are the terms "campus," and "college." Since such usage can be confusing, and because these words have relatively precise meanings, it may be useful to offer the definitions employed by the Chancellor's Office:

Outreach Operation: This includes districtfunded operations where courses are offered in such facilities as store fronts, off-campus community facilities, and other educational institutions. Facilities may be owned, leased, or provided free of charge, and used full or part time for educational programs.

Center (or Off-Campus Center): An officially recognized off-campus operation that meets the definition found in Education Code Section 81810, and that has been reviewed and approved by the Board of Governors and the California Postsecondary Education Commission. It may also qualify for this title by virtue of having been "grandfathered," meaning that it has been recognized by CPEC as having been established prior to April 1, 1974 (CPEC, 1984).

Campus: A full-service institution at a geographic location anticipated to have a full complement of programs, services, and facilities. A campus may or may not be administered by another college and may or may not be separately accredited. A campus may be an officially designated center or college.

College: A college is always a separately accredited, degree-granting institution, usually but not always on a campus, with a free-standing administration independent of any other college.

Las Positas College began as an "outreach operation" in 1963, became a "center" in 1974, expanded to a "campus" over the course of the next decade while remaining an off-campus center, and is now a "college" in the eyes of the Board of Governors. Compared to all proposals previously reviewed by the Commission, Las Positas College is atypical in that it is not a new proposal but an already existing institution with a permanent site, faculty, and administration; a substantial enrollment (currently about 5,700 headcount students and 3,000 average daily attendance); and a relatively broad-based curriculum. Also unusual are the facts that the institution has been approved as the 197th college of the community college system, is administered by its own president, and has received full accreditation by the Western Association of Schools and Colleges. Because of its history, it would be accurate to describe the Las Positas proposal as unfinished business, a college that would have been reviewed by the Commission many years ago as a center had a framework for that review existed. Since the center was established in 1974, however, even before the Commission's original Guidelines and Procedures were developed, and since State capital outlay funds were not requested after 1974, there was no way to do so. Further, now that the center has evolved into a full campus, the Commission is placed in the difficult position of conducting its review after the fact. It was for this reason that the Commission instituted the new planning framework.

In spite of this difficulty, it is still necessary to determine whether or not Las Positas College meets the Commission's criteria.

1. Adequate enrollment projections

1.1 For new facilities that are planned to accommodate expanded enrollments, enrollment projections should be sufficient to justify the establishment of the campus or off-campus center. For the proposed new campus or center, enrollment projections for each of the first ten years of operation, and for the fifteenth and twentieth years, must be provided. When an existing off-campus center is proposed to be converted to a new cam-

16

pus, all previous enrollment experience must also be provided.

As the designated demographic agency for the State, the Demographic Research Unit has lead responsibility for preparing systemwide and district enrollment projections, as well as projections for specific proposals. The Demographic Research Unit will prepare enrollment projections for all Community College proposals.

(Criteria 1.2 and 1.3 apply only to the University of California and the California State University)

- 1.4 Enrollment projected for a community college district should exceed the planned enrollment capacity of existing district campuses. If the district enrollment projection does not exceed the planned enrollment capacity of existing district campuses, compelling regional or local needs must be demonstrated. In order for compelling regional needs to be demonstrated, the segment must specify how these regional needs deserve priority attention over others in the State.
- 1.5 Enrollments projected for community college campuses must be within a reasonable commuting time of the campus, and should exceed the minimum size for a community college district established by legislation (1,000 units of average daily attendance [ADA] two years after opening).

The average daily attendance (ADA) of Las Positas College, since it began full operations in 1975-76, is shown in Display 6 at the right. The enrollment history prior to that time, when the district maintained an outreach operation, is very sketchy, but it is known that the first courses in the Livermore Valley area attracted some 810 students (head-count), and that a total of 2,130 students (head-count) were in attendance, both day and evening, by March of 1975.

Each year, the Demographic Research Unit of the Department of Finance develops new enrollment projections for every Community College district in California as part of the five-year capital outlay planning process. Often, the Demographic Research Unit also makes special projections at the request of a district or the Chancellor's Office when a new college or center is under active consideration. In the

case of Las Positas, the 1990 projection for the South County Community College District was analyzed in greater detail to produce a relative distribution of weekly student contact hours (WSCH) between Chabot and Los Positas. This delineation is shown in Display 7 on the opposite page.

Las Positas officials have an even more optimistic view of their college's potential growth. In their Las Positas College Master Plan, 1989-2005, they included their own enrollment projection, which is shown in Display 8 on page 12; it is markedly different from the projection developed "cooperatively" with the Demographic Research Unit.

Only time will tell which of these projections comes closer to reality. Whichever one is chosen, however, it is clear that the current enrollment of about 3,000 ADA is sufficient to justify the college's continued existence.

Source: Department of Finance, Demographic Research Unit, in cooperation with the South County Community College District.

Concerning excess capacity, Chabot College is the only other college in the South County Community College District, and while it currently enjoys some excess lecture and library capacity, there are space shortages in the areas of laboratories, offices, and audio/visual. Even if there were substantial excess capacity, however, Las Positas College could still be well justified on the basis of isolation, as indicated below in the discussion of alternatives. In addition, the nearest community colleges outside of the South County district (San Joaquin Delta and Diablo Valley Colleges) are located at even greater distances from the Livermore area.

Regarding commuting time, Las Positas College enjoys a location near the center of the Livermore Valley adjacent to Interstate 580. Access from the Dub-

lin area to the west, or from the residential communities to the east is extremely convenient, as is northern or southern access along Interstate 680.

2. Alternatives to new campuses or off-campus centers

2.1 Proposals for a new campus or off-campus center should address alternatives to establishment of new institutions, including (1) the possibility of establishing an off-campus center instead of a campus; (2) the expansion of existing campuses; (3) the increased utilization of existing campuses, such as year-round operation; (4) the increased use of existing facilities and

programs in other postsecondary education segments; and (5) the use of nontraditional modes of instructional delivery, such as telecommunications and distance learning.

2.2 A cost-benefit analysis of alternatives, including alternative sites for the campus or center, must be articulated and documented.

There is only one viable alternative to approving Las Positas College as the second college of the South County District, and that is to continue it as an off-campus center. There is no issue of moving the facility, scaling it down, or closing it, since it is already recognized by the Commission as a permanent off-campus center at its present site; the requirement for a cost-benefit analysis of alternatives

is therefore inapplicable. If it continues as solely a center, however, it will not be eligible to receive State capital outlay funding for physical education and other facilities ancillary to the core academic program, even though State funding for classrooms, laboratories, offices, and libraries could be provided.

Given this situation, the most important question is whether the residents of the South County district can continue to be adequately served by a single community college -- Chabot in Hayward -- plus a comprehensive campus/center, or need two full comprehensive campuses.

The answer to that question hinges on the issues of population growth and isolation. In the case of the Livermore Valley, which includes the cities of Dublin, Livermore, Pleasanton, and Sunol, while the

most recent census data are not yet available, the Association of Bay Area Governments (ABAG) has projected a 1990 population of 149,900 people, and a growth curve that should produce 218,200 residents by the year 2005. The existing population has already produced a moderate sized campus with a diversified curriculum; further growth should add to that diversification and make Las Positas College an even more valuable resource than it is at the present time. Both the existing population and the anticipated growth argue for a more comprehensive institution, even though the college will quite obviously have to continue to compete with other colleges and districts for scarce capital outlay funding.

Concerning the isolation criterion, Las Positas College is currently about 25 miles from Chabot College. Recently, the Chancellor's Office and MGT Consultants, Inc. developed a model that constituted a major input into the California Community

Colleges' statewide long-range plan (MGT, 1990). One aspect of that model dealt with isolation, with the issue of how lengthy or distant a commute was reasonable. That test of "reasonableness" was decided in favor of a one-way commute of 30 minutes or less, plus 5 minutes to locate parking, with the corollary assumption that average automobile commuting speeds are 15 miles per hour in urban areas, 30 miles per hour in suburban areas, and 45 miles per hour in rural areas.

In the case of a commute from the Livermore Valley area to Chabot College, if it is assumed that five miles are rural, fifteen miles suburban, and five miles urban, the commute time, including parking, would be just over one hour (61.7 minutes) or about two hours round trip. Such a time frame undoubtedly constitutes a considerable barrier to attendance at Chabot, as indicated in Display 9 below, which shows the attendance patterns at both

Inland city.

Chabot and Las Positas based on student residence. The data make it evident that proximity is destiny, and that it is probably unreasonable to expect Livermore area students to commute to Chabot College in Hayward.

3. Serving the disadvantaged

The campus or center must facilitate access for the economically, educationally, socially, and physically disadvantaged.

The Commission has long been concerned not only with the geographic accessibility of proposed new campuses and off-campus centers but also with their educational accessibility to historically underrepresented groups as well. As to the first, and as noted in Part Two of this report, the college's location is centrally and conveniently located for the vast majority of students in the region. Concerning the second, a full range of student services is offered at the college, including counseling, assessment, tutoring, Extended Opportunities Programs and Services (EOPS), Disabled Students Programs and Services (DSPS), financial aid, and an approved matriculation plan. In essence, Las Positas College maintains the same services to underrepresented and disadvantaged students as may be found at other community colleges in the system.

The college's Institutional Self-Study offered further detail on the programs currently in place. Among them is a re-entry program for women in transition who are beginning or returning to college (1990, p. 35). In 1989, the college also developed a substance abuse program, which consists of weekly support meetings, a course on substance abuse, and a continuing liaison with community leaders and groups. There are also courses that focus on the unique needs of senior citizens.

4. Geographic and physical accessibility

The physical, social, and demographic characteristics of the location and surrounding service areas for the new campus or center must be included. There must be a plan for student,

faculty, and staff transportation to the proposed location. Plans for student and faculty housing, including projections of needed oncampus residential facilities, should be included as appropriate. For locations that do not plan to maintain student on-campus residences, reasonable commuting time for students must be demonstrated.

The Las Positas College Master Plan contains a comprehensive analysis of all of the characteristics of its current location. Included are many of the elements normally found in an environmental impact report, including descriptions of flora and fauna, flood and erosion potential, geological hazards, soil composition, slope stability, and seismicity considerations. Demographically, the area is predominantly white, although the only ethnicity data are from the 1980 Census, which is now considerably out of date. More illustrative, perhaps, and certainly more recent, are the data provided by the district that are shown in Display 10 on pages 15 and 16. For comparison purposes, data for Chabot College and the total district are also presented.

In addition to these data, the Chancellor's Office also reported to the Board of Governors that the Livermore Valley service area contained a population of 104,406 people in 1980 -- a number that should double by the year 2000. Whites comprised 92.6 percent of the total -- a percentage that appears to be declining somewhat given the 1988 school age percentage of 84 percent. Also in 1980, the median age was 28.9 years and the median income, \$28,095.

Concerning commuting times, it is noteworthy that virtually all students (over 99 percent) commute to the campus by automobile. Because of that fact, which is more or less true of all community colleges, it is most important to site colleges near to major arterials. In Las Positas' case, of course, and as noted earlier, such siting is a reality. For those few students who do not drive, bus service is provided by the Livermore Transit District to and from surrounding areas on an 8 a.m. to 6 p.m. schedule, with buses running about every half hour. The College is continuing to work with the Transit District to expand service and to provide additional service to the Dublin and Pleasanton Bay Area Rapid Transit District stations when they are completed in 1995.

5. Environmental and social impact

The proposal must include a copy of the environmental impact report. To expedite the review process, the Commission should be provided all information related to the environmental impact report process as it becomes available to responsible agencies and the public.

Since Las Positas College is already built, and since no construction projects are included in the 1991-92 Governor's Budget, the issue of an environmental impact report is moot.

Effects on other institutions

- 6.1 Other segments, institutions, and the community in which the campus or center is to be located should be consulted during the planning process for the new facility, especially at the time that alternatives to expansion are explored. Strong local, regional, and/or statewide interest in the proposed facility must be demonstrated.
- 6.3 The establishment of a new community college campus must not reduce existing and projected enrollments in adjacent community colleges -- either within the district proposing the new campus or in adjacent districts -- to a lev-

el that will damage their economy of operation, or create excess enrollment capacity at these institutions, or lead to an unnecessary duplication of programs.

This criterion is applicable only in part. Since the campus already exists, the community cannot be consulted "during the planning process for the new facility." Nevertheless, there is little question concerning the strength of local/regional interest in Las Positas College. As early as 1970, and again in 1972, the South County district requested electoral approval for two bond issues. While both failed in the district as a whole, they were overwhelmingly approved in the Livermore area. In 1975, when the district used its own funds to open the Livermore Center, the center was warmly supported by the community and grew steadily. Between its inception and the present day, support and acceptance within the larger community has been constant.

Support for the concept of a full-service college has been evidenced by newspaper editorials, letters of support from community leaders, and resolutions by the Livermore and Pleasanton Chambers of Commerce. Superintendent Peter Blomerley of the Fremont-Newark Community College District and Chancellor John Carhart of the Contra Costa Community College District also support the proposal, as does California State University, Hayward. There is no known opposition.

Concerning unnecessary duplication of programs, there are no community colleges sufficiently close to Las Positas College to present any danger of reduced enrollments or functional duplication. This fact is further confirmed by the history of steady enrollment growth in both Las Positas and Chabot Colleges within the South County district, and by the consistent support of Las Positas College by neighboring districts.

7. Academic planning and program justification

The programs projected for the new campus must be described and justified. An academic master plan, including a general sequence of program plans and degree level plans, and a campus plan to implement such State goals as access, quality, intersegmental cooperation, diversification of students, faculty, administration and staff for the new campus, must be provided. The proposal must include plans to provide an equitable learning environment for the recruitment, retention, and success of historically underrepresented students.

Most institutions of higher education have little difficulty describing the programs they offer. Justifying those programs, however, is far more complex and involves incorporating several elements of a comprehensive planning process. That process requires the development of a comprehensive mission statement, coordination with the policies of the Board of Governors and legislatively mandated master planning legislation, and the sampling of community, employee, and student groups to determine curricular goals and objectives.

All of these steps have been taken by the South County Community College District and by the Las Positas College administration, and published as the Las Positas College Master Plan, a document that has recently been supplemented by an Institutional Self-Study conducted for the Western Association of Schools and Colleges for accreditation purposes. Both documents contain all of the ele-

ments required by this criterion, including a comprehensive description of academic plans and programs. The result is an academic master plan that is already effective in delivering education services to the Livermore Valley, and which promises, through a continuing consultation process with students, faculty, and the community, to meet the area's needs through a planning period that extends to 2005.

The academic master plan contains the seven clusters shown in Display 11 on page 18. The words following the cluster titles (e.g. "Cluster A: Arts") indicate that courses are offered in general education ("General"), transfer education ("Transfer"), vocational education ("Vocational"), and continuing education ("Continuing"). A full listing of courses and programs contained in the Academic Master Plan is shown in Appendix D.

As noted earlier in this report, Las Positas College has already been fully accredited by the Western Association of Schools and Colleges. At least in part, the Association's decision was based on the thoroughness with which the college both described and justified its academic plan.

8. Consideration of needed funding

A cost analysis of both capital outlay estimates and projected support costs for the new campus or permanent off-campus center, and possible options of alternative funding sources, must be provided.

The capital outlay estimates for Las Positas College are shown in Display 12. As to support costs, these will be determined by a combination of average daily attendance generated by the college, and by the fate of community college financing and Proposition 98 generally. Since the 1991-92 budget has not been passed as of this writing, and since that budget contains many uncertainties, any support budget projections would be highly speculative at the present time.

Guidelines and Procedures for the Review of New Campuses and Off-Campus Centers

NOTE: The following material is reproduced from pages 1-5 of Report 90-9 of the California Postsecondary Education Commission, which the Commission adopted on January 22, 1990.

Introduction

Commission responsibilities and authority regarding new campuses and centers

California Education Code Section 66904 expresses the intent of the Legislature that the sites for new institutions or branches of public postsecondary education will not be authorized or acquired unless recommended by the Commission:

It is the intent of the Legislature that sites for new institutions or branches of the University of California and the California State University, and the classes of off-campus centers as the commission shall determine, shall not be authorized or acquired unless recommended by the commission.

It is further the of the Legislature that California community colleges shall not receive state funds for acquisition of sites or construction of new institutions, branches or off-campus centers unless recommended by the commission. Acquisition or construction of non-state-funded community colleges, branches and off-campus centers, and proposals for acquisition or construction shall be reported to and may be reviewed and commented upon by the Commission.

Evolution and purpose of the guidelines

In order to carry out its given responsibilities in this area, the Commission in April 1975 adopted policies relating to the review of new campules and centers and revised those policies in September 1978 and

September 1982. Both the 1975 document and the two revisions outlined the Commission's basic assumptions under which the guidelines and procedures were developed and then specified the proposals subject to Commission review, the criteria for reviewing proposals, the schedule to be followed by the segments when submitting proposals, and the contents of the required "needs studies."

Reasons for the current revisions

By 1988, experience with the existing procedures suggested that they needed revision in order to accommodate the changed planning environment in California, particularly related to California's Environmental Quality Act and the environmental impact report (EIR) process, as well as to accommodate various provisions of the recently renewed Master Plan for Higher Education. In addition, California's postsecondary enrollment demand continues to increase, and as the public segments move forward with their long-range facilities plans, the time is particularly ripe for revising the existing suide-'ines. This revision is intended to (1) ensure that the public segments grow in an orderly and efficient manner and that they meet the State's policy objectives for postsecondary education under the Master Plan, (2) ensure proper and timely review by the State of segmental plans based on clearly stated criteria, and (3) assist the segments in determining the procedures that need to be followed to prepare and implement their expansion plans.

Policy assumptions used in developing these guidelines

The following six policy assumptions are central to the development of the procedures and criteria that the Commission uses in reviewing proposals for new campuses and off-campus centers:

27

- 1. It will continue to be State policy that each resident of California who has the capacity and motivation to benefit from higher education will have the opportunity to enroll in an institution of higher education. The California Community Colleges shall continue to be accessible to all persons at least 18 years of age who can benefit from the instruction offered, regardless of district boundaries. The California State University and the University of California shall continue to be accessible to first-time freshmen among the pool of students eligible according to Master Plan eligibility guidelines. Master Plan guidelines on undergraduate admission priorities will continue to be (1) continuing undergraduates in good standing; (2) California residents who are successful transfers from California public community colleges; (3) California residents entering at the freshman or sophomore level; and (4) residents of other states or foreign counties.
- 2. The differentiation of function between the segments with regard to institutional mission shall continue to be as defined by the State's Master Plan for Higher Education.
- 3. The University of California plans and develops its campuses and off-campus centers on the basis of statewide need.
- 4. The California State University plans and develops its campuses and off-campus centers on the basis of statewide needs and special regional considerations.
- 5. The California Community Colleges plan and develop their campuses and off-campus centers on the basis of local needs.
- 6. Planned enrollment capacities are established for and observed by all campuses of public post-secondary education. These capacities are determined on the basis of statewide and institutional economies, community and campus environment, limitations on campus size, program requirements and student enrollment levels, and internal organization. Planned capacities are established by the governing boards of community college districts (and reviewed by the Board of Governors of the California Community Colleges), the Trustees of the California State University, and the Regents of the University of

California. These capacities, as well as the statewide procedures for setting these capacities, are subject to review and recommendation by the Commission provided in California Education Code Section 66903.

Projects subject to Commission review

The following types of projects are subject to review: new campuses and permanent off-campus centers, major off-campus centers in leased facilities, and conversion of off-campus centers to full-service campuses. The Commission may also review and comment on other projects consistent with its overall State planning and coordination role.

Schedule for the review of new projects

The following timelines are meant to allow a reasonable amount of time for Commission review of plans at appropriate stages in the process. The Commission can accelerate its review of the process if it so chooses.

Unless otherwise specified, all three public postsecondary segments should endeavor to observe theses timelines when proposing construction of a major new project subject to Commission review under these guidelines:

- 1. Plans for new campuses and permanent off-campus centers should be made by the segmental governing boards following their adoption of a systemwide planning framework designed to address total statewide segmental long-range growth needs, including the capacity of existing campuses and centers the accommodate those needs, and the development of new campuses and centers. This planning framework should be submitted to the Commission for review and comment before proceeding with plans for location and construction of new campuses.
- 2. Segments are requested to defer the selection of specific sites for new campuses or permanent off-campus centers until such time as they have informed the Commission of their general plans for expansion and received a recommendation

from the Commission to proceed with further expansion activity. No later than one year prior to the date the segment expects to forward a final proposal for a new campus or center to the Commission, or 18 months prior to the time when it hopes the Commission will forward its final recommendation about the facility to the Governor and Legislature, it is requested to transmit a letter of intent to expand to the Commission. The letter of intent should include, at minimum, the following information for the new campus: (1) preliminary projections of enrollment demand by age of student and level of instruction, (2) its general location, and (3) the basis on which the segment has determined that expansion in this area at this time is a systemwide priority in contrast to other potential segmental priorities. Other information that may be available that will be required at the time of the final needs study (see below, item 1-4) may also be submitted at this time.

- 3. Once the "letter of intent" is received, Commission staff will review the enrollment projections and other data and information that serve as the basis for the proposed new campus. This review will be done in consultation with staff from the Demographic Research Unit in the State Department of Finance, which is the agency statutorily responsible for demographic research and population projections. If the plans appear to be reasonable, the Commission will recommend that the segments move forward with their site acquisition or further development plans. The Commission may in this process raise concerns with the segments about defects in the plans that need to be addressed in the planning process. If the Commission is unable to recommend approval of moving forward with the expansion plans, it shall so state to the segmental governing board prior to notifying the Department of Finance and the Legislature of its analysis and the basis for its negative recommendation. The Commission shall consider the preliminary plan no later than 60 days following its submission to the Commission.
- 4. Following the Commission's preliminary recommendation to move forward, the segments are requested to proceed with the final process of identifying potential sites for the campus or permanent off-campus center. If property appropri-

- ate for the campus or center is already owned by the segment, alternative sites to that must be identified and considered in the manner required by the California Environmental Quality Act. So as to avoid redundancy in preparation of information, all materials that are germane to the environmental impact report process shall be made available to the Commission at the same time that it is made available to the designated responsible agencies.
- 5. Upon completion of the enviror mental review process and no more than six months prior to the time of expected final Commission approval of the proposed new campus, the segment shall forward the final environmental impact report for the site as well as the final needs study report for the campus or center to the Commission. The needs study report should address each of the criteria outlinea below on which the proposal for the campus or center will be evaluated.
- 6. Once the Commission has received from the segment all materials necessary for evaluating the proposal, it shall certify the completeness of the application to the segment. The Commission shall take final action on proposals during the next six months. In reviewing the proposal, the Commission will seek approval of the enrollment projections by the Demographic Research Unit, unless the justification for expansion is primarily unrelated to meeting access demands. Once the Commission has taken action on the proposal, it will so notify both the Department of Finance and the Office of the Legislative Analyst.

Criteria for evaluating proposals

1. Enrollment projections

1.1 For new facilities that are planned to accommodate expanded enrollments, enrollment projections should be sufficient to justify the establishment of the campus or off-common scenter. For the proposed new campus or center, enrollment projections for each of the first ten years of operation, and for the fifteenth and twentieth years, must be provided. When an existing off-campus center is proposed to be converted to a new campus, all previous enrollment experience must also be provided.

29

As the designated demographic agency for the State, the Demographic Research Unit has lead responsibility for preparing systemwide and district enrollment projections, as well as projections for specific proposals. The Demographic Research Unit will prepare enrollment projections for all Community College proposals, and either the Demographic Research Unit population projections or K-12 enrollment estimates must be used as the basis for generating enrollment projections in any needs study prepared by the University of California or the California State University. For the two University segments, the Commission will request the Demographic Research Unit to review and approve demographically-driven enrollment projections prior to Commission consideration of the final proposal, unless the campus or permanent center is justified on academic, policy, or other criteria that do not relate strictly to enrollment demand.

For graduate/professional student enrollment estimates, the specific methodology and/or rationale generating the estimates, an analysis of supply of and demand for graduate education, and the need for new graduate and professional degrees, must be provided.

- 1.2 Statewide enrollment projected for the University of California should exceed the planned enrollment capacity of existing University campuses as defined in their long-range development plans. If the statewide enrollment projection does not exceed the planned enrollment capacity for the system, compelling statewide needs for the establishment of the new campus must be demonstrated.
- 1.3 Statewide enrollment projected for the California State University system should exceed the planned enrollment capacity of existing State University campuses as defined by their enrollment ceilings. If the statewide enrollment projection does not exceed the planned enrollment capacity for the system, compelling regional needs must be demonstrated. In order for compelling regional needs to be demonstrated, the segment must specify how these regional needs deserve priority attention over competing segmental priorities.
- 1.4 Enrollment projected for a community college district should exceed the planned enrollment capacity of existing district campuses. If the district enrollment projection does not exceed the planned

enrollment capacity of existing district campuses, compelling regional or local needs must be demonstrated. In order for compelling regional needs to be demonstrated, the segment must specify how these regional needs deserve priority attention over others in the State.

- 1.5 Enrollments projected for community college campuses must be within a reasonable commuting time of the campus, and should exceed the minimum size for a community college district established by legislation (1,000 units of average daily attendance [ADA] two years after opening).
- 2. Alternatives to new campuses or off-campus centers
- 2.1 Proposals for a new campus or off-campus center should address alternatives to establishment of new institutions, including (1) the possibility of establishing an off-campus center instead of a campus; (2) the expansion of existing campuses; (3) the increased utilization of existing campuses, such as year-round operation; (4) the increased use of existing facilities and programs in other postsecondary education segments; and (5) the use of nontraditional modes of instructional delivery, such as telecommunication and distance learning.
- 2.2 A cost-benefit analysis of alternatives, including alternative site. for the campus or center must be articulated and documented.
- 3. Serving the disadvantaged

The campus or center must facilitate access for the economically, educationally, socially, and physically disadvantaged.

4. Geographic and physical accessibility

The physical, social, and demographic characteristics of the location and surrounding service areas for the new campus or center must be included. There must be a plan for student, faculty, and staff transportation to the proposed location. Plans for student and faculty housing, including projections of needed on-campus residential facilities, should be included as appropriate. For locations which do not

plan to maintain student on-campus residences, reasonable commuting time for students must be demonstrated.

5. Environmental and social impact

The proposal must include a copy of the environmental impact report. To expedite the review process, the Commission should be provided all information related to the environmental impact report process as it becomes available to responsible agencies and the public.

6. Effects on other institutions

- 6.1 Other segments, institutions, and the community in which the campus or center is to be located should be consulted during the planning process for the new facility, especially at the time that alternatives to expansion are explored. Strong local, regional, and/or statewide interest in the proposed facility must be demonstrated.
- 6.2 The establishment of a new University of California or California State University campus or center must take into consideration the impact of a new facility on existing and projected enrollments in the neighboring institutions of its own and of other segments.

6.3 The establishment of a new community college campus must not reduce existing and projected enrollments in adjacent community colleges -- either within the district proposing the new campus or in adjacent districts -- to a level that will damage their economy of operation, or create excess enrollment capacity at these institutions, or lead to an unnecessary duplication of programs.

7. Academic planning and program justification

The programs projected for the new campus must be described and justified. An academic master plan, including general sequence of program plans and degree level plans, and a campus plan to implement such State goals as access, quality, intersegmental cooperation, diversification of students, faculty, administration and staff for the new campus, must be provided. The proposal must include plans to provide an equitable learning environment for the recruitment, retention and success of historically underrepresented students.

8. Consideration of needed funding

A cost analysis of both capital outlay estimates and projected support costs for the new campus or permanent off-campus center, and possible options of alternative funding sources, must be provided.

Appendix B

Annexation of the Livermore-Amador Valley and History of the Livermore Education Center

On October 2, 1962, the Livermore and Amador Joint Union High School Districts voted 1,662 to 498 to join the South County Community College Annexation, which became effective on July 1, 1963. The following represents a chronological log of the historical events related to the development of the Livermore Education Center.

April 7, 1963	Bond Issue Approved: A bond issue in the principle amount of \$17.2 million was approved by the voters. Included was an authorization to purchase the Valley site.
September 5, 1963	First Classes: Classes were offered first at Livermore High School, Camp Parks, and Lawrence Livermore Laboratory. The initial offering included 24 classes and enrolled 810 students.
September 6, 1965	Evening Classes: The late afternoon and evening program established operations at Granada High School (Livermore) with a total of 31 class offerings.
January, 1965	Site Purchase: In line with its commitment to the voters, the District purchased a Valley building site consisting of 147.55 acres at a cost of \$392,956.
November 8, 1966	Reorganization of Trustee Areas: An election was he. in order to provide for one representative from the Livermore-Amador Valley areas.
February 7, 1967	General Policy for Development of Colleges in the South County Community College District (2012a, b) was adopted by the Board of Trustees. This policy outlines the guidelines and practices for organizing a multi-college district.
April 18, 1967	Trustee Representative: Mrs. Dorothy S. Hudgins was elected as the first trustee representing Area 7 from the Livermore-Amador Valley.
September, 1967	First Administrative Services: A full-time coordinator was employed whose major respo. sibilities included the development of an educational program for the Livermore-Amador Valley.
July 1, 1968	Planning: The Office of Planning and Development was created in order to develop instructional facilities and program planning for the Livermore Education Center.
June 12, 1970	Preliminary Planning: The Office of Planning and Development at Chabot College

32

27

dressed the development of the Livermore Education Center. November 3, 1970 Proposition C: A five-year override measure was attempted. It failed within the District as a whole but passed overwhelmingly in the Valley precincts. June, 1972 Proposition M and N: The override measure, M and N, for a \$0.21 operating tax increase and a \$0.21 ten-year capital outlay program, failed within the District as a whole but was well supported in the Valley precincts. July 5, 1972 Alternatives Considered: The South County Community College Board of Trustees requested a staff report on alternatives to the building of an additional center in the Livermore-Amador Valley. Educational as well as economic indicators pointed to the development of the Livermore Education Center. September 4, 1973 Center Development: The South County Community College Board of Trustees initiated a program for planning construction at the Livermore site. February 21, 1974 Board of Governor's Approval: The Board of Governors, California Community Colleges, voted to approve the Livermore Education Center site by Action No. 740703. March 5, 1974 Working Drawings Approved: The South County Community College Board of Trustees approved construction plans and called for bids. March 21, 1974 Contract Awarded: Site development contract was awarded. June, 1974 Ground Breaking: Appropriate ceremonies were held commemorating the beginning of construction. Facilities Construction: South County Community College Board of Trustees ap-September 4, 1974 proved the working drawings and specifications for the second phase of the building program. The contract was let on November 19, 1974. January 15, 1975 Dean Appointed: Dr. Barbara Mertes was appointed as the Dean of the Livermore Education Center by the South County Community College Board of Trustees.

presented its organizational outline to the Board. This organizational outline ad-

March 31, 1975

Buildings Occupied: The first classes were scheduled at the Livermore Education

Center. The Center opened with 70 class offerings in 22 subject areas and enrolled a total of 606 active day students. The Evening Program commenced use of the new facilities and continued use of the Granada (Livermore), Dublin, and Amador (Pleasanton) High School facilities. Evening enrollment totaled 1,524 in 138 classes.

Classes continue to be offered at 46 Valley locations.

The Livermore Education Center had developed an administration-faculty-student registration building (3,008 sq. ft.), a classroom building (3,008 sq. ft.), a science center (3,008 sq. ft.), and a learning resource classroom building (6,090 sq. ft.), for a total of 15,114 square feet. In addition, an outside double-sized soccer field, basketball courts, and valley ball courts were provided for outdoor activity programs.

Ribbon Cutting: Official ribbon-cutting ceremonies were held to commemorate the opening of the Center.

June, 1975

Planning: Staff are engaged in planning the fifth building to be constructed at the Livermore site. This building contains 8 classroom/laboratory facilities. The staff acquired a relocatable building to serve as a campus lounge (1,280 sq. ft.), and an old building, removed from the District's Castro Valley site and placed on the Livermore site, is used as a maintenance/storage building (1,029 sq. ft.).

October 15, 1975

Master Plan: The South County Community College District includes the development of the Livermore Education Center in its Master Plan as the plan related to capital construction funding.

October 19, 1975

Dedication Ceremony: Official dedication ceremonies were observed before a crowd of 500+.

April 20, 1976

Application for Campus Status: The South County Community College Board of Trustees approved a resolution directing the staff to prepare an application to the California Community College Board of Governors and the California Postsecondary Education Commission for campus status.

June 18, 1976

Conclusion of First Full Year: The Livermore Education Center passed a milestone on June 18, 1976, having completed its first full year of operation. The Center enrolled 966 active day students in 117 classes in its day program, and an additional 1,853 students in 108 classes in the late afternoon, evening, and Saturday programs. Evening classes continued to be offered at the Amador, Dublin, and Granada High School sites. The Livermore Education Center earned 1515.01 ADA during its first year of operation.

June, 1976

Initiation of the Livermore Education Center's First Summer Session: The fifth building is ready for occupancy and adds an additional 7,707 square feet to be used as classroom and laboratory space. Staff begin planning for the construction of a multipurpose activities center with showers, a counseling/classroom facility, and an addition

to the Science Center.

June, 1977

Community Needs Assessment: Data report that the Livermore Education Center earned 1,562.06 ADA during its second year of operation, and construction begins on the additional 15,708 square feet of classroom and aboratory space. Mr. Leo Meyer and Consultants are hired to conduct a community needs assessment related to the proposed construction of technical-occupational programs building.

June, 1978

Continued Planning: ADA for the third year of operation hits 1,659.87. In spite of the passage of Proposition 13, the staff, with the aid of faculty and staff at the Hayward campus, begin the planning of a Technical-Occupational Center, classrooms, laboratories, and a large lecture hall to be used for a Little Theater. Because of prospective funding difficulties, the original plans for this complex are reduced to 28,160 square feet rather than the 40,000 originally planned.

June, 1979

ADA Reduced: Because of program reductions, both Chabot campuses experience a drop in ADA. The Livermore Education Center drops to 1,596.18 or a loss of 43.69 ADA from the previous year.

June, 1980

ADA Recovers: The Livermore Education Center recovers from its previous year's drop in ADA and earns 1,696.68, roughly 18.1 percent of total ADA earned in the South County Community College District. The Technical-Occupational Center is ready for occupancy in the Autumn, 1980.

June, 1981

Expansion: With completion of the Technical-Occupational Center, the Livermore Education Center is able to expand its program offerings in several areas and to introduce new programs. ADA earned for the 1980-81 academic year grows to 1,903.90. With the expansion of on-campus classrooms, the Livermore Center discontinues its larger evening offerings at the neighboring high schools; however, it continues its several off-campus sites' single course offerings in the Valley's many business and industrial sites.

June, 1982

Further Growth: Now earning roughly 21.1 percent of the District's ADA at 2,295.67 ADA, the Livermore Center staff plan for the construction of a bookstore to be paid from bookstore profits. The Center, also, becomes one of the founding institutions involved with the development of the Learning, Assessment, and Retention Consortium (LARC) and initiates a campus study on the feasibility of creating a matriculation model for its students.

June, 1983

Bookstore: The bookstore facility nears completion and the Center's ADA climbs to 2,342.57.

June, 1984

ADA Reduced: Program reduction is occurring statewide and the drop in ADA from the previous year is registered at 2,092.70; however, even with this drop in the Center's ADA, its share of total ADA for the District reaches 21.6 percent.

December, 1984

CPEC Recognition: The Livermore Education Center is "grandfathered" as an approved operation by the California Postsecondary Education Commission (CPEC), and thereby becomes eligible to receive State support for appropriate capital outlay projects on the site of its operations.

June, 1985

Student Assessment Model: With the District's decision to eliminate the Alameda County Sheriffs' Department Training Program, and to reduce programs related to the training for Tri-Valley Fire Services (both programs were administered by the Livermore Education Center), AD \ drops to 1,992.17 for the 1984-85 academic year.

The Livermore Education Center's Student Assessment Model is selected by the Chancellor's Office as one of 16 sites for staff visitation. The Model has been in operation since the Autumn of 1983.

June, 1985

Additional Trustees Seat: The South County Community College District Board of Trustees is reconstituted with the awarding of two trustee seats to the Livermore-Amador Valley. Voting for trustees will be changed from at-large representation to that of wards. The additional valley seat will be recognized in the November, 1987 election. The Livermore Education Center prepares for expanding its evening program to Foothill High School.

June, 1986

Student Center Construction: Using a relocatable building format, the construction of a modest student center begins. The current campus lounge structure will be allocated to faculty/staff use (1,280 sq. ft.) and the students will use a 3,200 sq. ft. building for vending machine service, study, and conversation. No food services are available at the Livermore Education Center. For the 1985-86 academic year, ADA grows to 2,160.74.

July 16, 1986

Accreditation Request: As a result of the District's Accreditation report, received in January, 1986, and with the suggested reorganization of the District's administrative structure, the South County Community College Board of Trustees requests the Superintendent-President to prepare a report outlining the criteria needed for separate college accreditation of the Livermore Education Center. The Board's request is based, also, on the valley residents' request for the District to begin a separate college accreditation process for the Livermore Education Center.

August 5, 1986

Feasibility Study: Members of the South County Community College District direct

the Superintendent to investigate and develop a feasibility study to seek separate college accreditation of the Livermore Education Center, and to include all of the potential impacts of such an action.

September 16, 1986

Full College Designation: The South County Community College Board of Trustees passes a resolution (Resolution No. 15-876) to designate the Livermore Education Center as a full service community college campus eligible for State funding of facilities.

October, 1986

Student Center Occupancy: The student center is ready for occupancy; staff begin study on the feasibility of upgrading the Center's telephone system.

January, 1987

Learning Resource Center PPG: Staff submit the Preliminary Planning Guide (PPG) for the learning resource center building project to the Chancellor's Staff. Planning begins on the feasibility of acquiring relocatable buildings to house the faculty. In addition, renovation of Buildings 100 and 700 is discussed.

April, 1987

Phone System: A new telephone system is installed at the Center.

April 7, 1987

Full Campus Intentions: The South County Community College Board of Trustees adopts Resolution No. 28-867: Approval of Intent to Develop the Livermore Education Center as a Full-Service College. Discussions begin with Chancellor's Office staff in order to prepare the writing of a Justification Statement for the requested change in status. Two additional formal discussions with the Chancellor's staff are held in September and October, 1987.

June, 1987

ADA for 1986-87: ADA for the 1986-87 academic year is 2,254.61, 22.6 percent of the ADA earned by the South County Community College District.

Summer, 1987

Renovation of Buildings: The renovation of Buildings 100 and 700 begins. Faculty offices are provided with the addition of 6,174 sq. ft., now bringing total development of the Livermore Education Center to 80,474 square feet.

September, 1987

Offices Completed: Faculty offices are completed for occupancy, and renovation on Buildings 100 and 700 is 95 percent complete.

November, 1987

Buildings Completed: All building projects are completed for occupancy. The Board election produces two new representatives from the Livermore-Amador communities: one from Livermore (Area 7) and one from Pleasanton (Area 5). Five Board members continue their representation from the Union City, Hayward, San Lorenzo, San Leandro, and Castro Valley areas of the South County Community College District.

December, 1987

Preparation of the Justification Statement: Preparation of the Justification Statement for the Chancellor, the Board of Governors, and the Postsecondary Education Commission be ns.

October, 1988

College Status: The Board of Governors of the California Community Colleges

officially approves Las Positas College as the 107th college of the system.

SUBJECT:

Commission Action on the Status of Las Positas College

This memorandum is being sent to confirm my understanding of our recent telephone conversation in which we discussed the possible timing for taking the Las Positas College item to the Commission. As I understand it, your plan is to request the Commission to take appropriate action at a meeting in late spring or early summer of this calendar year. Such action would complete the steps required for full state recognition of Las Positas College as an approved public community college.

Bill, if I can provide any assistance to you as you prepare for the staff presentation to the Commission, please let me know.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

THE California Postsecondary Education Commission is a citizen board established in 1974 by the Legislature and Governor to coordinate the efforts of California's colleges and universities and to provide independent, non-partisan policy analysis and recommendations to the Governor and Legislature.

Members of the Commission

The Commission consists of 15 members. Nine represent the general public, with three each appointed for six-year terms by the Governor, the Senate Rules Committee, and the Speaker of the Assembly. The other six represent the major segments of post-secondary education in California.

As of September 1991, the Commissioners representing the general public are:

Lowell J. Paige, El Macero; Chair;
Henry Der, San Francisco; Vice Chair;
Mim Andelson, Los Angeles;
C. Thomas Dean, Long Beach;
Rosalind K. Goddard, Los Angeles;
Helen Z. Hansen, Long Beach;
Mari-Luci Jaramillo, Emeryville;
Mike Roos, Los Angeles
Stephen P. Teale, M.D., Modesto.

Representatives of the segments are:

Joseph D. Carrabino, Orange; appointed by the California State Board of Education;

William T. Bagley, San Rafael; appointed by the Regents of the University of California;

John F. Parkhurst, Folsom; appointed by the Board of Governors of the California Community Colleges;

Theodore J. Saenger, San Francisco; appointed by the Trustees of the California State University; and

Harry Wugalter, Thousand Oaks; appointed by the Council for Private Postsecondary and Vocational Education.

The position of representative of California's independent colleges and universities is currently vacant.

Functions of the Commission

The Commission is charged by the Legislature and Governor to "assure the effective utilization of public postsecondary education resources, thereby eliminating waste and unnecessary duplication, and to promote diversity, innovation, and responsiveness to student and societal needs."

To this end, the Commission conducts independent reviews of matters affecting the 2,600 institutions of postsecondary education in California, including community colleges, four-year colleges, universities, and professional and occupational schools.

As an advisory planning and coordinating body, the Commission does not administer or govern any institutions, nor does it approve, authorize, or accredit any of them. Instead, it cooperates with other State agencies and non-governmental groups that perform these functions, while operating as an independent board with its own staff and its own specific duties of evaluation, coordination, and planning,

Operation of the Commission

The Commission holds regular meetings throughout the year at which it debates and takes action on staff studies and takes positions on proposed legislation affecting education beyond the high school in California. By law, its meetings are open to the public. Requests to speak at a meeting may be made by writing the Commission in advance or by submitting a request before the start of the meeting.

The Commission's day-to-day work is carried out by its staff in Sacramento, under the guidance of its executive director, Warren H. Fox, who was appointed by the Commission in June 1991.

The Commission publishes and distributes without charge some 30 to 40 reports each year on major issues confronting California postsecondary education. Recent reports are listed on the back cover.

Further information about the Commission, its meetings, its staff, and its publications may be obtained from the Commission offices at 1020 Twelfth Street, Third Floor, Sacramento, CA 98514-3985; telephone (916) 445-7933.

APPROVAL OF LAS POSITAS COLLEGE IN LIVERMORE

California Postsecondary Education Commission Report 91-15

ONE of a series of reports published by the Commission as part of its planning and coordinating responsibilities. Additional copies may be obtained without charge from the Publications Office, California Postsecondary Education Commission, Third Floor, 1020 Twelfth Street, Sacramento, California 95814-3985.

Recent reports of the Commission include:

- 90-28 State Budget Priorities of the Commission, 1991: A Report of the California Postsecondary Education Commission (December 1990)
- 90-29 Shortening Time to the Doctoral Degree: A Report to the Legislature and the University of California in Response to Senate Concurrent Resolution 66 (Resolution Chapter 174, Statutes of 1989) (December 1990)
- 90-30 Transfer and Articulation in the 1990s: California in the Larger Picture (December 1990)
- 90-31 Preliminary Draft Regulations for Chapter 3 of Part 59 of the Education Code, Prepared by the California Postsecondary Education Commission for Consideration by the Council for Private Postsecondary and Vocational Education (December 1990)
- 90-32 Statement of Reasons for Preliminary Draft Regulations for Chapter 3 of Part 59 of the Education Code, Prepared by the California Postsecondary Education Commission for the Council for Private Postsecondary and Vocational Education (December 1990)
- 91-1 Library Space Standards at the California State University: A Report to the Legislature in Response to Supplemental Language to the 1990-91 State Budget (January 1991)
- 91-2 Progress on the Commission's Study of the California State University's Administration: A Report to the Governor and Legislature in Response to Supplemental Report Language of the 1990 Budget Act (January 1991)
- 91-3 Analysis of the 1991-92 Governor's Budget: A Staff Report to the California Postsecondary Education Commission (March 1991)
- 91-4 Composition of the Staff in California's Public Colleges and Universities from 1977 to 1989: The Sixth in the Commission's Series of Biennial Reports on Equal Employment Opportunity in California's Public Colleges and Universities (April 1991)
- 91-5 Status Report on Human Corps Activities,

- 1991: The Fourth in a Series of Five Annual Reports to the Legislature in Response to Assembly Bill 1829 (Chapter 1245, Statutes of 1987) (April 1991)
- 91-6 The State's Reliance on Non-Governmental Accreditation, Part Two: A Report to the Legislature in Response to Assembly Bill 1993 (Chapter 1324, Statutes of 1989) (April 1991)
- 91-7 State Policy on Technology for Distance Learning: Recommendations to the Legislature and the Governor in Response to Senate Bill 1202 (Chapter 1038, Statutes of 1989) (April 1991)
- 91-8 The Educational Equity Plan of the California Maritime Academy: A Report to the Legislature in Response to Language in the Supplemental Report of the 1990-91 Budget Act (April 1991)
- 91-9 The California Maritime Academy and the California State University: A Report to the Legislature and the Department of Finance in Response to Supplemental Report Language of the 1990 Budget Act (April 1991)
- 91-10 Faculty Salaries in California's Public Universities, 1991-92: A Report to the Legislature and Governor in Response to Senate Concurrent Resolution No. 51 (1965) (April 1991)
- 91-11 Updated Community College Transfer Student Statistics, Fall 1990 and Full-Year 1989-90: A Staff Report to the California Postsecondary Education Commission (April 1991)
- 91-12 Academic Program Evaluation in California, 1989-90: The Commission's Fifteenth Annual Report on Program Planning, Approval, and Review Activities (September 1991)
- 91-13 California's Capacity to Prepare Registered Nurses: A Preliminary Inquiry Prepared for the Legislature in Response to Assembly Bill 1055 (Chapter 924, Statutes of 1990) (September 1991)
- 91-14 Supplemental Report on Academic Salaries, 1990-91: A Report to the Governor and Legislature in Response to Senate Concurrent Resolution No. 51 (1965) and Supplemental Language to the 1979, 1981, and 1990 Budget Acts (September 1991)
- 91-15 Approval of Las Positas College in Livermore:
 A R port to the Governor and Legislature on the Development of Las Positas College -- Formerly the Livermore Education Center of Chabot College (September 1991)
