 IDENTIFIERS *Connecticut

ABSTRACT

This is the 25th annual report of data on the distribution of minority group students in the public schools of Connecticut for the fall of 1990, and the 23rd to report data on minority staff members. The data, collected under a legislative mandate, are used to monitor any possible imbalance of white and minority students in the public schools. In October 1990, minority students totaled 25.1 percent (117,155) of Connecticut public school students statewide (466,664), continuing the trend toward increasing minority representation in spite of a decline in total enrollment. The number of Hispanic American students grew more rapidly than that of other ethnic groups. In Connecticut's five largest cities, 77.3 percent of all students were members of minority groups, and minority students were 92.1 percent of the total enrollment in Hartford. Thirteen public schools (1.3 percent) are technically out of compliance with state racial imbalance regulations. Of the total full-time professional staff, 6.3 percent (2,453) are minorities. Statistical data are provided in 5 tables and 10 figures. Ten appendixes present additional data tables about staff and enrollment. (SLD)

-------------	----

PREFACE

This is the 25th annual report of data on the distribution of minority group students in the public schools of Connecticut and the 23rd to report minority staff data. Data are collected in accordance with Sections 10-226a to 10-226e of the Connecticut General Statutes. These data are used primarily to monitor the possible imbalance of white and minority students in Connecticut's public schools.

Data collection began in 1966 in response to federal civil rights initiatives. The first report presented data for April 1966 on the number of white and nonwhite students in individual classrooms. Hispanic students were classified separately, but their numbers were also included in the count of either black or white students. A separate category was created for Hispanic students in the fall of 1968. In 1970, additional data collection began for the categories of American Indian and Asian American, but these were reported as "other minority" until the fall of 1977.

Until 1976, school districts with more than five percent minority enrollment reported detailed data at the classroom level. Since 1976, all districts have reported enrollment for each ethnic group by grade and school.

Starting in 1981, data were collected from the three endowed and incorporated academies: the Gilbert School, Norwich Free Academy and Woodstock Academy. In order to maintain consistency in the longitudinal presentation of data, state totals used in the narrative and the figures of this report do not include data from the three academies unless so stated.

Until 1986 E.O. Smith High School in Storrs was operated by the University of Connecticut and was carried as a separate entry in all tables. The school is now operated by Regional School District 19 and is included in all tables and figures with the other local school districts.

Racial/ethnic breakouts of students are not currently collected from the regional educational service centers or from the unified school districts operated by the State Department of Children and Youth Services, the State Department of Mental Retardation and the State Department of Correction.

Data for pupils in this report are drawn from Schedule 2 of the annual Racial Survey (Form ED-152 of the State Department of Education). Staff data are derived from the department's active staff file (Form TRB-3). Before 1982, grouped staff data were taken from a separate schedule of Form ED-152. In 1981, the racial/ethnic characteristics of certified staff members were collected both on Form ED-152 and on Form TRB-3, and in 1982, the staff section of the ED-152 was dropped in favor of the sole use of TRB-3 data--with some discontinuity in the numbers.

In conformity with federal accounting standards of the National Center for Education Statistics of the U.S. Department of Education, the five racial or ethnic groups differentiated are white, black, Hispanic, Asian American and American Indian. In cases where ambiguities may arise, students are counted according to either their parents' or their own indicated designation.

Bridgeport and Hartford participate in a program called "Project Concern," in which a limited number of disadvantaged urban students are educated in surrounding suburban school districts. Although Project Concern has the effect of reducing slightly the number of minority children reported in these cities, it does not affect the number reported in the participating suburbs because those towns report the number of Project Concern children separately.

Student Highlights

- o In October 1990, minority students totaled 25.1 percent, or 117,155, of the 466,664 public school students in the State of Connecticut. This percentage continued to climb; minority students were 24.4 percent of the total in 1989, 21.7 percent in 1985, 18.0 percent in 1980, and 14.7 percent in 1975.
- o From 1989 to 1990, the number of minority students increased by 4.4 percent or 4,910 students, while total public school enrollment increased by 1.6 percent or 7,449 students.
- o From 1980 to 1990, there was a decline of 13.7 percent in total enrollment and an increase of 20.2 percent in minority enrollment.
- o The number of Hispanic students continued to grow more rapidly than other groups, up 2,598 from 1989 to a total of 46,954. The number of black students increased by 1,443 to 59,104; this is the largest increase in over 20 years.
- o Minorities represented at least one of every four students in kindergarten through Grade 7, more than one of four in Grade 9, but less than one of five in Grade 12.
- o In 16 Connecticut school districts, minority students amounted to more than one-quarter of the total enrollment; this was the same number of districts as in 1989.
- o Although minority enrollment was 25.1 percent statewide, 97 out of 166 districts had a minority enrollment of less than five percent. Twenty-six districts had a minority enrollment of more than 10 percent and enrolled 86.0 percent of the minority students.
- o In Connecticut's five large cities, 77.3 percent of all students were members of a minority group, up from 76.7 percent in 1989. The Hartford public school district served the largest number and proportion of minority students, 23,414 students, or 92.1 percent of its total enrollment.
- o Almost 70 percent of white students attended schools with less than 10 percent minority enrollment, while almost 34 percent of minority students attended schools with more than 90 percent minority enrollment.
- o There were 13 local public schools (1.3% of the total number of schools) technically out of compliance with the state's racial imbalance regulations; 11 were schools with regular programs and two were alternative schools.

Staff Highlights

- o On September 1, 1990, there were 39,085 full-time professional staff members in Connecticut public schools, a decrease of .0.6 percent from the year before. This decrease in full-time staff followed a drop of 0.5 percent from 1988 to 1989.
- o Of the total full-time professional staff members in the state, 2,453, or 6.3 percent, were minorities, the same percentage as the two previous years.

MINORITY STUDENTS AND STAFF

On October 1, 1990, there were 466,664 children enrolled in Connecticut's public schools, i.e., in the 166 local public school districts and the 17 regional vocational-technical schools. Of these, 117,155, or 25.1 percent, were identified as members of a minority group. In addition, the three endowed and incorporated academies enrolled 2,841 students, of whom 231, or 8.1 percent, were identified as minority students.

Figure 1
Percentage of Minority Students and Staff Members
in Connecticut Public Schools, 1975-1990

On September 1, 1990, there were 39,085 full-time professional staff members in Connecticut's local public schools and vocational-technical schools, of whom 2,453, or 6.3 percent, were minority group members. There were also 245 professional staff members in the three academies, of whom two were minority group members.

The proportion of professional staff members who are members of minority groups was lower than the proportion of students. Minority groups made up 6.3 percent of staff compared to 25.1 percent of the students.

Over the past 15 years there has been a widening gap between the proportion of minority students and the proportion of minority staff members in Connecticut public schools.

Minority Student Enrollment Data

Statewide Enrollment and Trends. Since 1975 total public school enrollment has dropped from 645,555 to 466,664 in 1990, a drop of 27.7 percent (peak enrollment was in 1971). Over the same 15 years, the number of minority students has increased, from 94,969 to 117,155, an increase of 23.4 percent.

Figure 2
Minority and Nonminority Enrollment
in Connecticut Public Schools, 1975-1990

Overall, the proportion of minority students enrolled in Connecticut public schools has risen from 14.7 percent in 1975 to 18.0 percent in 1980, 21.7 percent in 1985, 24.4 percent in 1989 and 25.1 percent in 1990.

From 1975 to 1990 there was almost no change in total school enrollment. The decline in total enrollment ended in 1988, and the decline in white non-Hispanic enrollment appears to have ended in 1989.

Minority Enrollment and Trends. From 1985 to 1990 minority enrollment grew at an average rate of 2.9 percent a year, and the rate has been higher the last two years (3.4% and 4.4%).

Figure 3
Minority Group Enrollment in Connecticut
Public Schools, 1975-1990

From 1975 to 1990, black enrollment dropped 6.1 percent. During the same period, Hispanic enrollment increased 63.8 percent, and other minority enrollment increased 329.1 percent, although from a much smaller base.

The number of black students declined every year from 1975 through 1985. Since 1985 it has increased four out of five years, small increases from 1985 to 1987 and larger increases the past two years (2.4% and 2.5%).

From 1985 to 1990 the average annual growth rate for Hispanic enrollment was 4.5 percent. The growth rate from 1989 to 1990 was 5.9 percent.

The number of Asian American students increased by 769 (or 8.2%) from 1989 to 1990, and there were 944 American Indians reported, an 11.8 percent increase.

The overall proportion of black students to all public school students was 12.7 percent in 1990, compared to 10.9 percent in 1980 and 9.7 percent in 1975. Hispanic students were 10.1 percent of the total in 1990, compared to 5.7 percent in 1980 and 4.4 percent in 1975.

Racial Distribution by Grade. The data in Table 1 show larger numbers of white, black and Hispanic children in all the elementary grades, the result of the increasing number of births since 1977. In 1990 there were more children in every grade through Grade 8 than there were in 1989.

Table 1
Minority Students in Connecticut by Grade,
October 1, 1990*

Grade	Total	White	American Indian	Asian- American	Black	Hispanic	Minority	
							Total	%

Adult**	1,134	816	20	34	179	85	318	28.0
Total	469,505	352,119	955	10177	59,233	47,021	117,386	25.0

*Including the three academies.

**Long-term adult programs in vocational-technical schools.

There were higher concentrations of minority children in the elementary grades than in high school; the proportion of minority students was lower in Grade 8 but at its highest (excluding prekindergarten) in Grade 9.

In 1989 for the first time the proportion of minority students surpassed 25 percent in a grade. In 1990, it was at least that high in eight of the 12 grades, partly as a result of including Project Concern students in the individual grade totals.

Figure 4 presents the proportion of minority students for Grades 1 through 12 for 1980, 1985 and 1990. The three years show similar patterns, but the proportions of minority students are higher in more recent years. Proportions in the lower grades are higher than in the upper grades, and the proportion in the 9th is higher than the general pattern would predict.

Figure 4
Percentage of Minority Students by Grade,
1980-1990

The slope of the lines from the lower to the upper grades appears to indicate a higher dropout rate for minority students than for others. Other data sources support this interpretation. Yet, except for the 12th grade, the proportion of minority students in any cohort of students is higher than it was five or ten years earlier.

Proportions in the 9th grade are consistently higher than expected from either the general curve of the line or the cohort proportion five years earlier. This appears to stem principally from higher-than-average retention rates in the 9th grades of the large cities. It may also be affected by differences between the number of students who return from nonpublic elementary schools and those who leave for secondary preparatory schools.

Five-year comparisons show that the minority proportion grew faster when grade enrollment was dropping. The differences are larger in the lower grades from 1980 to 1985 and larger in the upper grades from 1985 to 1990. There was almost no change from 1985 to 1990 in the first grade minority proportion, where enrollment has increased for eight years.

Racial Distribution by District. Connecticut's minority students were not evenly distributed across all public school districts. Exactly 88 percent of the minority schoolchildren were enrolled in just 26 districts, each of which had a minority enrollment greater than 10 percent and which together enrolled 42.4 percent of all public school children.

Figure 5
Percentage of Minority Students by School District,
October 1, 1990

In contrast, 57.6 percent of all schoolchildren in the public schools were enrolled in the other 140 districts, which enrolled just 14.0 percent of the minority schoolchildren.

Most of the minority students were enrolled in the five large cities and in a number of other urban centers (see Table 2 and Figure 5). Two districts, Franklin and Union, reported enrolling no minority students. Three other districts, Hartland, Sherman and Sterling, reported no students who were black or Hispanic, the two largest minority groups. In contrast, there were seven school districts--Bloomfield, Bridgeport, Hartford, New Britain, New Haven, New London and Waterbury--where students from minority groups constituted more than half of the total district enrollment.

Out of 166 districts, 97 had less than five percent minority enrollment. In 1989 there were 104 with less than five percent, and in 1985 there were 122 out of 165.

Minority enrollment continued to be concentrated in and around the five big cities and seven other urban centers, but the increase in the number of districts with over five percent minority enrollment is evidence of population shift or choice of residence by minority families.

Table 2
Ranking of Towns
by Percentage of Minority Students,
October 1, 1990

Rank	Town	Minority %	Total Enrollment	Cumulative % of State Total Enrl.	Minority Enrollment	Cumulative % of State Min. Enrl.
1	Hartford	92.1	25,418	5.4	23,414	19.9
2	Bridgeport	86.2	19,687	9.6	16,978	34.4

21	Norwich	16.8	4,267	37.5	716	83.2
22	Groton	15.3	6,346	38.8	968	84.0
23	*W Hartford	14.5	7,424	40.4	1,076	84.9
24	Derby	14.4	1,337	40.7	193	85.1
25	*Manchester	13.4	6,878	42.1	924	85.9
26	Mansfield	11.4	1,166	42.4	133	86.0
27	Vernon	9.5	4,270	43.3	407	86.3
28	East Windsor	9.5	1,317	43.6	125	86.5
29	Portland	9.2	1,091	43.8	100	86.5
30	Bristol	9.2	8,216	45.6	753	87.2

*Project Concern students excluded.

The growth of minority enrollment around the state is also shown by the fact that 26 districts (out of 166) had more than 10 percent minority enrollment (see Table 2 and Appendix A). This number has grown from 15 districts in 1975 to 21 in 1980 and 22 in 1985, but is down from 27 in 1989. However, further concentration of minority schoolchildren is shown by the increase in the number of districts with minority enrollment greater than 50 percent: seven the last three years, up from three in 1975, four in 1980 and five in 1985.

Blacks were the predominant minority group in 15 of the 26 districts with over 10 percent minority enrollment. Hispanics were the largest minority group in eight (Bridgeport, Danbury, Derby, Hartford, Meriden, New Britain, Waterbury and Windham), and Asian Americans in three (Greenwich, Mansfield and West Hartford).

Racial Distribution by Type of Community. In the five large cities (see definitions on page 37), 77.3 percent of all students enrolled were members of a minority group; the smallest percentage was in Stamford (49.8%) and the largest in Hartford (92.1%). The state's fringe cities showed 14.9 percent minority enrollment, ranging from 2.9 percent in Watertown to 79.1 percent in Bloomfield. The medium cities were 21.3 percent minority and ranged from 3.6 percent in Southington to 62.1 percent in New London.

Figure 6
Racial Composition of Enrollment in Connecticut Public Schools, by Type of Community, 1990

Two categories of small town school districts (small town suburban and small town emerging suburban) had overall minority enrollment proportions of less than 5 percent. Suburban towns were 4.9 percent minority, ranging from Thomaston (1.3%) to East Windsor (9.5%); and emerging suburban towns were 4.8 percent minority, ranging from Franklin, with no minority students, to Ansonia (21.0%).

Small town rural school districts had an overall minority enrollment proportion of 6.4 percent and ranged from Union (0.0%) to Windham, which was 34.5 percent minority. Without Windham, small rural districts would have had only 3.3 percent minority enrollment. (See Appendix A and Appendix C.)

The large cities enrolled 62.9 percent of the state's black students and 64.7 percent of the Hispanic students. Asian American students were distributed across all community types, with 54.3 percent in fringe and medium cities.

Racial Distribution by Education Reference Group. In January 1990, the State Department of Education published a new classification of Connecticut communities based on a clustering analysis of 1980 census data. The analysis produced seven educational reference groups. Definitions of the groups can be found on page 38.

The groups range from the most affluent suburbs (Group I) to the least affluent large cities (Group VII). As expected, there are higher proportions of minority students in the districts which are less affluent. Groups VI and VII, the larger less affluent communities, have the highest proportions of minority students (32.1% and 87.7%, respectively).

Figure 7
Racial Composition of Enrollment in Connecticut Public Schools, by Education Reference Group, 1990

In Groups I, II and III, the predominant minority group is Asian American. In the other four groups, blacks predominate, although in Groups VI and VII the number of Hispanics amounts to over 80 percent of the number of black students.

The minority population is growing numerically in all reference groups. The five-year growth rates are higher in the more affluent groups (see Appendix D).

Racial Distribution by School. There were great differences between schools in Connecticut in the proportion of minority students. Statewide, including the three endowed and incorporated academies, children of minority groups made up 25.0 percent of public school enrollment. Table 3 shows that 159 out of 988 public schools (16.1%) had minority enrollment over 50 percent (i.e., more than twice the state average). While these schools enrolled 18.1 percent of all students, they enrolled 59.6 percent of the minority students. Over 68 percent of white schoolchildren attended schools with less than 10 percent minority enrollment.

Table 3
Enrollment by Minority Student Composition of School,
October 1, 1990*

*Includes the three endowed academies.

For the two major minority groups, black and Hispanic, the disparities were even greater. Even though black and Hispanic students formed less than 23 percent of enrollment statewide, 62.9 percent of these students attended schools where they were in the majority. Over 4,400 students, or 1.2 percent of the white, Asian American and American Indian total, attended 20 schools which reported no black or Hispanic students; and 74.2 percent of the white, Asian American and American Indian students attended schools with less than 10 percent enrollment of black and Hispanic students.

Racial Imbalance. According to state law (C.G.S. Sec. 10-226a-e), racial imbalance exists when the proportion of pupils of racial minorities in any school "substantially" exceeds or falls below the proportion of such pupils in the school district. State regulations define the standard used to determine whether a school is "substantially" out of balance as the existence of a 25-point difference between the minority percentage of its enrollment and the percentage of minorities in the same grades in the whole district.

Table 4
Racial Imbalance
in Connecticut Local Public Schools,
1976 to 1990

Fall of School Year	Number and Percentage of Local Public Schools by Racial Imbalance Category		
	0.0-14.9% <u>Balanced</u>	15.0-24.9% <u>Impending Imbalance</u>	25% & Above <u>Imbalanced</u>
1990	907 (94.1%)	44 (4.6%)	13 (1.3%)
1989	910 (93.6%)	48 (4.9%)	14 (1.4%)
1988	898 (93.2%)	48 (5.0%)	17 (1.8%)
1987	889 (92.7%)	52 (5.4%)	18 (1.9%)
1986	888 (93.3%)	49 (5.1%)	15 (1.6%)
1985	881 (91.8%)	58 (6.0%)	21 (2.2%)
1984	897 (92.1%)	55 (5.6%)	22 (2.3%)
1983	900 (91.7%)	61 (6.2%)	20 (2.0%)
1982	910 (90.5%)	72 (7.2%)	23 (2.3%)
1981	940 (90.6%)	69 (6.6%)	29 (2.8%)
1980	934 (89.2%)	75 (7.2%)	38 (3.6%)
1979	941 (88.2%)	70 (6.6%)	56 (5.2%)
1978	945 (87.2%)	83 (7.7%)	56 (5.2%)
1977	962 (86.8%)	75 (6.8%)	71 (6.4%)
1976	979 (86.8%)	82 (7.3%)	67 (5.9%)

By this definition there were 13 local public schools in October 1990 which were racially imbalanced. Four districts accounted for the 11 racially imbalanced schools with regular programs, all of them elementary schools: three in Hartford; one in Meriden; six in New Haven; and one in Waterbury. There were also two schools with alternative programs: one in New Haven and one in Stamford.

Table 4 shows the movement toward racial balance within districts as directed by state law. There were 13 schools out of balance in 1990; in 1989 there were 14, in 1985 there were 21, and in 1980 there were 38 schools that were not racially balanced.

Project Concern. Project Concern is a voluntary program to reduce racial isolation. Through Project Concern, students from the state's large cities are transported to surrounding suburbs where they attend local public schools. The vast majority of these students are minority. When the program began in 1973, it involved 1,446 students from four of the five large cities. In 1990 there were 739 students in the program, 12 students from Bridgeport and 727 from Hartford attending schools in 13 cooperating suburbs (see Appendix E).

Table 5
Project Concern,
1973 to 1990

1976	20	116	988	262	-	1,366
1975	22	108	887	252	10	1,257
1974	25	108	936	290	19	1,353
1973	25	123	1,005	286	32	1,446

At the program's inception, 1,446 students from Hartford, Bridgeport, New Haven and Waterbury were enrolled in the schools of 25 cooperating suburban districts. Waterbury was in the program only three years, and there are no longer any Project Concern students from New Haven. There were 799 students in Project Concern in 1989, 777 in 1988, and 809 from three cities (Bridgeport, Hartford, and New Haven) five years ago.

Summary: Minority Students

From 1980 to 1990, the proportion of minority students in Connecticut public schools grew from 18.0 percent to 25.1 percent. During the same period the statewide enrollment of all students declined every year but the last two and 13.7 percent in all. The decline in enrollment of white non-Hispanic students was the most pronounced; it declined every year but the last and amounted to a 21.2 percent decline over 10 years. The number of black students also declined (but just 0.1% over the 10 years). The enrollment of Hispanic and Asian American students increased during this 10-year period. These increases were numerically greater than the decrease in enrollment of black students and caused both the number and proportion of minority students to increase.

Hispanic and Asian American enrollment showed dramatic change and growth. In 1990 Hispanic students were the predominant racial/ethnic group in three of the five large cities. The enrollment of Asian American students has been growing at an even higher rate, but in 1990 their numbers amounted to just over two percent of total enrollment.

In 10 years there have been great changes in the number and distribution of minority students, but disparities present in 1980 still existed in 1990.

In 1980, 63.0 percent of all minority students were enrolled in schools in the five large cities. Enrollment in the five large cities was 66.4 percent minority. Twenty-five districts accounted for 87.9 percent of the minority enrollment. Approximately 85.7 percent of the minority students were enrolled in the 21 districts which had greater than 10 percent minority enrollment.

In 1990, 58.0 percent of the minority students were enrolled in the state's five large cities. Enrollment in the large cities was 77.3 percent minority. Twenty-five districts accounted for over 86.4 percent of the minority students enrolled in public school. In addition, 86.0 percent of the minority students were enrolled in the 26 districts which had greater than .0 percent minority enrollment.

Disparities also existed within districts in 1990. Four school districts had 11 schools with regular programs that were technically out of compliance with Connecticut's racial imbalance regulations. As a result of these disparities within and between districts, about one third of all minority students in Connecticut were concentrated in 69 school buildings where the minority enrollment was over 90 percent.

This report offers these statistical summaries to educators and policy makers to help them understand the condition and trends of minority student enrollment in Connecticut.

Minority Staff Data

Statewide Staffing and Trends. From September 1989 to September 1990, there was a net one-year decrease of 232 full-time professional staff positions, the second consecutive decrease in staff after five years of increases. The overall decrease included a net decrease of 18 minority staff members, or 7.8 percent of the total decrease.

Figure 8
Minority and Nonminority Staff Members
in Connecticut Public Schools, 1975-1990

Over the five years from 1985 to 1990, the number of full-time staff increased from 37,627 to 39,085, while the number of minority full-time staff increased from 2,260 (or 6.0% of the total) to 2,453 (or 6.3%). This amounted to a five-year 3.9 percent increase in total full-time professional staff and an 8.5 percent increase in employment of minority full-time professional staff.

In 1975 there were 40,919 professional staff members reported. That number decreased to 40,697 in 1980. After three years of gradual reduction in staff from 1980 to 1983, 1984 began a new period of staff increases. The number of full-time positions increased for the next five years before the declines in 1989 and 1990.

The number of minority staff members grew from 4.8 percent of the total staff in 1975 to 6.3 percent of the total in 1990.

Minority Staffing and Trends. Statewide, of the 2,453 minority staff members, 61.8 percent (or 1,516) were black, compared to 50.4 percent of the minority students. There were 830 Hispanics, or 33.8 percent of total minorities, compared to 40.1 percent of the number of minority students. In the combined categories of Asian American and American Indian, there were 107 staff members, or 4.4 percent of total minorities; these groups were 9.5 percent of the minority students.

Figure 9
 Minority Staff Groupings in Connecticut
 Public Schools, 1975-1990

Figure 9 portrays an even finer breakout of the minority staff members than Figure 8. During the most recent 15 years, the number of blacks has moved to a high of 1,664 in 1980, to a low of 1,515 in 1983, then increased to 1,591 in 1988 before dropping to 1,557 in 1989 and 1,516 in 1990 (just above the 1983 low).

Although smaller numerically, the number of Hispanic staff members has been growing faster. The 830 in 1990 were over twice the number (369) in 1975 and 44.6 percent higher than the number (574) in 1980.

Staff members in other minority categories numbered 107, an 8.1 percent increase from 1989, and 57.4 percent more than the 68 reported in 1975 (see Appendix J).

Racial Distribution by Type of Community. Minority teachers were more concentrated in the five large cities than minority students were; the large cities employed 70.1 percent of the minority group teachers, while they enrolled 58.0 percent of the minority students. In all, 23.4 percent of the professional staff members in the large cities were members of a minority group; the staff in medium cities was 3.8 percent minority; in fringe cities, 2.4 percent; and in small towns, just over one percent. Small towns employed 35.3 percent of all professional staff members but just 5.7 percent of professional staff members who were minorities.

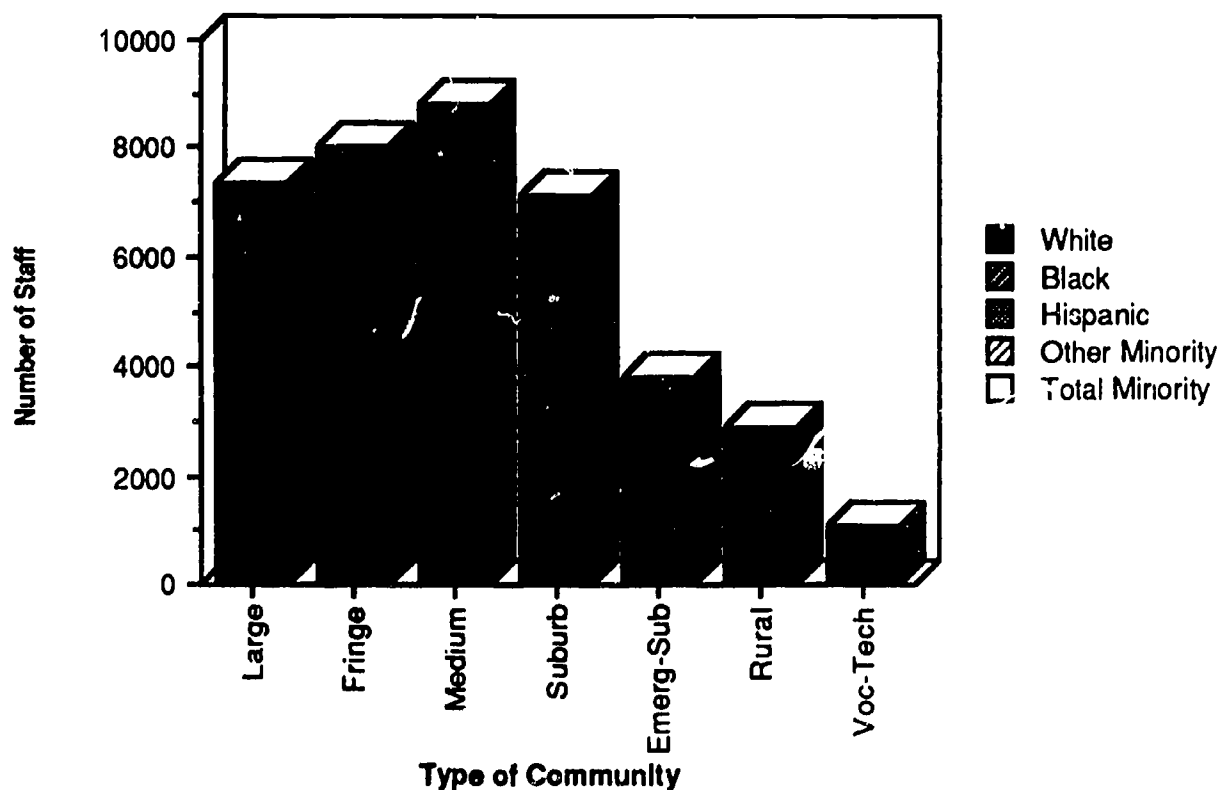

Figure 10
Racial Composition of Professional Staff in Connecticut Public Schools, by Type of Community, 1990

From 1989 to 1990, there was a net decrease of 24 minority staff members in the large cities, with decreases of 17 in Bridgeport, 4 in New Haven and 5 in Stamford. In the large cities there were two more American Indians (twice as many), one fewer Hispanic (a decrease of 0.2%), one fewer Asian American (3.0% decrease), and 24 fewer blacks (a decrease of 2.2%).

There were only minor changes in other communities (see Appendix G and Appendix H). The only significant change was in the medium cities, which reported an increase of 16 minority staff members, due mostly to New Britain, which reported 13 more full-time minority staff members. New Britain reported increases of 6 in 1989, 13 in 1988 and 15 in 1987.

Summary: Minority Staff

Minority group members represented 6.3 percent of the certified school staff, compared to 25.1 percent of the student enrollment. From 1985 to 1990, the number of minority staff members grew at about the same rate as the number of minority students (1.43% per year for minority staff members compared to 1.41% per year for minority students), even though the number of minority staff members declined in 1989 and 1990.

There is still an increasing gap between the percentages of professional staff members and students who are members of a minority group. Since 1985 minority staff members have grown from 6.0 percent of the total to 6.3 percent, while minority students have grown from 21.7 percent to 25.1 percent. During this time both the number of minority staff members and the number of minority students have shown substantial increases, but the overall number of staff members has increased while the overall number of students has decreased.

Even with the overall decline in the number of full-time professional staff members from 1989 to 1990, there was a 1.8 percent increase in the number of Hispanic staff. This continued growth was at least partly the result of districts' recruiting Spanish-speaking staff members for mandated bilingual programs for Spanish-language students.

DEFINITIONS

Racial/Ethnic Categories

American Indian	A person having origins in any of the original peoples of North America and maintaining cultural identification
Asian American	A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands, or the Indian subcontinent
Black	A person having origins in any of the black racial groups of Africa
Hispanic	A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race
White	A person having origins in any of the original peoples of Europe, North Africa, or the Middle East

Growth Rate Calculations

Growth Rate (1-year) --- The percentage change from 1989 to 1990.

$$GR(1) = \left(\frac{\#1990}{\#1989} - 1 \right) \times 100 \text{ percent} = \frac{\text{Change over 89}}{\#1989} \times 100\%$$

Growth Rate (5-year) --- The average percentage change per year from 1985 to 1990. It is conceptually equivalent to a compound interest rate.

$$GR(5) = \left[\left(\frac{\#1990}{\#1985} \right)^{1/5} - 1 \right] \times 100\%$$

Type of Community

Large City	A town with a population of more than 100,000
Fringe City	A town contiguous to a large city, and with a population over 10,000
Medium City	A town with a population between 25,000 and 100,000, and not a fringe city
Small Town (Suburban)	A town within a 1980 SMSA* with a population less than 25,000, and not a fringe city
Small Town (Emerging Suburban)	A town with a population less than 25,000 included in a 1980 SMSA but not included in a 1970 SMSA
Small Town (Rural)	A town with a population fewer than 25,000 but not included in an SMSA

*SMSA -- "Standard Metropolitan Statistical Area" is the U.S. Census Bureau's definition of a metropolitan area. It includes a central city (or "twin cities") of at least 50,000 people and those contiguous towns that are socially and economically integrated with the central city. There are 11 SMSAs in Connecticut.

Education Reference Group

- Group I Wealthy, professional suburbs (13) -- Avon, Darien, Easton, New Canaan, Orange, Redding, Region #9, Ridgefield, Simsbury, Weston, Westport, Wilton, Woodbridge
- Group II Affluent, well-educated communities (29) -- Bethany, Bolton, Brookfield, Canton, Cheshire, East Granby, East Lyme, Fairfield, Farmington, Glastonbury, Granby, Greenwich, Guilford, Hebron, Ledyard, Madison, Marlborough, Monroe, New Fairfield, Newtown, Region #5, Region #8, Region #12, Region #14, Region #18, Sherman, South Windsor, Trumbull, West Hartford
- Group III Rural bedroom communities (34) -- Andover, Barkhamsted, Berlin, Bozrah, Canterbury, Chester, Colebrook, Columbia, Cornwall, Coventry, East Hampton, Eastford, Ellington, Franklin, Hartland, Litchfield, New Hartford, Newington, North Branford, North Haven, North Stonington, Oxford, Region #7, Region #10, Region #13, Region #15, Region #17, Shelton, Somers, Suffield, Tolland, Wethersfield, Woodstock, Woodstock Academy
- Group IV Diverse towns: coastal and resort communities and rural and suburban areas (37) -- Ashford, Bethel, Bloomfield, Branford, Canaan, Clinton, Cromwell, East Haddam, Essex, Groton, Hamden, Hampton, Kent, Lebanon, Manchester, Mansfield, Milford, New Milford, Norfolk, North Canaan, Old Saybrook, Pomfret, Portland, Region #1, Region #4, Region #6, Region #11, Region #19, Rocky Hill, Salem, Salisbury, Sharon, Vernon, Waterford, Westbrook, Willington, Windsor
- Group V Working-class, blue-collar communities (30) -- Brooklyn, Chaplin, Colchester, Deep River, East Haven, East Windsor, Enfield, Lisbon, Montville, Plainville, Plymouth, Preston, Region #16, Scotland, Seymour, Southington, Sprague, Stafford, Sterling, Stonington, Stratford, Thomaston, Union, Voluntown, Wallingford, Watertown, Winchester, Windsor Locks, Wolcott, Gilbert School
- Group VI Medium cities, larger cities, former mill towns and densely populated blue-collar suburbs (23) -- Ansonia, Bristol, Danbury, Derby, East Hartford, Griswold, Killingly, Meriden, Middletown, Naugatuck, New Britain, New London, Norwalk, Norwich, Norwich Free Academy, Plainfield, Putnam, Stamford, Thompson, Torrington, Waterbury, West Haven, Windham
- Group VII Bridgeport, Hartford, New Haven (3)
