ABSTRACT

This guide provides illustrated examples of classroom learning centers designed for use with migrant students. Designating learning centers in the classroom is an effective way to introduce, develop, and reinforce skills in an enjoyable way. The learning centers described in this guide can be made from: (1) fabric boards (large); (2) fabric boards (small); (3) heavy corrugated cardboard, wood, or form board; and (4) real life objects. Spaces can be divided into mini centers, and can be separated by room dividers and storage pieces. Learning activities address various reading and math skills which are correlated with the numerical coding of the Migrant Student Record Transfer System Skills Lists. Many of the learning center activities contain task cards or patterns suitable for reproduction for classroom use. The purpose of each learning center is described and materials needed to construct the center are listed. Directions are provided for constructing the center, as well as for students completing the learning center activities. Activities emphasize functional skills such as using a telephone directory, using a bus schedule, ordering from a catalog, reading the classified ads, addressing envelopes, and drawing a floor plan. The document contains numerous graphics and illustrations. (KS)

'Color Your Classroom' with learning centers!

Learning centers are an effective way to introduce, develop and reinforce skills in an enjoyable way.

A good learning center allows for a student to move through the activities successfully on his own. Therefore, he learns to become more independent and competent in making decisions.

The learning centers in this book are divided into six sections:

- (1) fabric boards (large),
- (2) fabric boards (small),
- (3) heavy corrugated cardboard,
- (4) real life objects,
- (5) mini centers,
- (6) room dividers.

If you want learning centers to strengthen your students' self-concepts, improve their study skills and create an exciting, decorative and stimulating environment—read on!

Learning Centers... ...made from fabric boards (small).

Concise centers that
are sized perfectly
for a tabletop—
approximately
20 inches x 20 inches.

The Easel

A learning center using felt shapes to reinforce math facts and visual memory.

An easel is a perfect tool to use in motivating students, and this one is easily made by using a portion of a fabric board (instructions given below). There are two activities provided. In one, the student makes caterpillars with circle shapes to demonstrate number sentences; in another, the student makes a picture by using the shapes provided. The tasks are on paint brushes stored in a paint can.

Cut three sections away from a fabric board and then using the folds already there, cover it with a bright piece of felt. It folds flat for convenient storage.

The Easel

Task Card #1

Math

Skills #119, 182, 206

Task Card #2

Reading

Skill #040

Alphabet Scoop

A learning center that contains activities on consonants, vowels, and structural analysis.

This is a learning center that you will want to "scoop up" for your teaching area. Using real Alphabits, it is a quick and easy learning center to make and your students will have fun while getting the real scoop on the alphabet. Have the student choose a contract card and write his name on it. The student then selects a task card and performs the task as directed. As the student completes each task, he colors the square beside the number on that task.

Alphabet Scoop Materials

- 20" x 40" fabric board covered with contact paper
- pocket folder containing blank paper
- scoop for Alphabits, crayons, pencil, glue, scissors, and a box of Alphabits
- pockets holding task cards and contracts

Rubber bands have been braded to fabric board to hold pencil, glue and scissors.

Contract

As the student finishes the task card he colors in the square.

Task cards are given on the following pages.

Name _____

I have completed:

1. <input type="checkbox"/>	2. <input type="checkbox"/>
3. <input type="checkbox"/>	4. <input type="checkbox"/>
5. <input type="checkbox"/>	6. <input type="checkbox"/>

**Reading
Skill #100
Alphabet**

1. Take a scoop of letters out of the box. Lay them out in front of you. Name each letter. Now put them in alphabetical order.

**Reading
Skills #240, 260, 140
Short Vowels
Long Vowels
Initial Consonants**

2. Take a scoop of letters out of the box. Put the vowel letters in a row. Put the consonant letters in a row. Write them on paper.

**Reading
Skill #340
Using Syllables**

3. Pour a scoop of letters in front of you. Make as many two syllable words as you can with the letters. Write the words on paper.

**Reading
Skills #020, 040
Visual Discrimination
Visual Memory**

4. Take a scoop of letters from the box. Find all the letters in your name. Paste your name on paper. Draw a picture of yourself to go under your name.

**Reading
Skill #140
Initial Consonants**

5. Take some letters from the box. Find a picture in a magazine. Cut out the whole page. Paste it on colored paper. Find the letters that begin some of the words that are pictured. Paste your letters on the proper parts of the picture.

**Just for fun...
Have the student...**

Set up a telephone and address book for the class.

Compare his alphabet to that of another language.

In alphabetical order, make a list of things in the classroom.

Make an animal dictionary by cutting and pasting pictures and words.

Quilt Making Done Here

A listening comprehensive learning center.

Assorted colored markers are provided at this center along with a tape player and a prepared tape with the instructions. Script and instructions are given on the following pages.

The student makes a paper quilt by following the oral instructions as to drawing and coloring in each quilt square. He checks his accuracy by comparing his work to the key.

Adapted from *Pathways to Imagination* by Angela Reebe and James Lafrey.

Directions to the Student:

DIRECTIONS:

1. Take a paper out of this folder.
2. Turn on the tape recorder.
3. Listen very well. Stop the recording when it says, "stop." Draw and color what it told you to in the box it told you to use. Turn the recorder back on when you are ready to draw and color another box.
4. When the recorder says, "This is the end," turn it off. Look at the key. Check to see if you listened well and did what the tape told you. Are your pictures in the right boxes? If they are, very good! If they are not, try again another day.
5. Put your paper in the "Finished Quilts" folder.

Quilt Making Done Here

Tape Script

Listen carefully.

Do you have your markers and your paper with numbered squares on them?

Be sure to shut off the tape when I say "stop" and do what was suggested. Ready? Go!

In block #13, draw a tree. Color the trunk brown and color the treetop green. Stop.

Find the purple marker. Use it to draw the number "6" many times in block #3. Stop.

Use the red marker to draw a heart in block #1. Color it red. Stop.

In block #10, draw many circles with the brown marker. Color some of them with the same marker. Stop.

Draw orange stripes in block #7. Stop.

Make many "x's" with the blue marker in block #5. Stop.

Use the yellow marker to color in block #12. Stop.

Use the green marker to make triangles in block #2. Stop.

In block #4, make many dots with the red marker. Stop.

In block #11, draw three flowers. Color them pink. Stop.

Use your favorite color to print your first name in block #6. Stop.

In block #16, draw 3 overlapping circles. Use the green marker. Stop.

Use the blue marker to draw the number 3 many times in block #14. Stop.

Draw red stripes in block #9. Stop.

In block #15, make many dots with the orange marker. Stop.

Find the purple marker. In block #18, make the letter "C" many times. Stop.

In block #17, draw a sun. Color it yellow. Stop.

Find the red marker. Make block #19 look like red checks. Stop.

In block #8, draw a smiling face with the purple marker. Stop.

Color block #20 solid orange. Stop.

This is the end.

Answer Key

Sam's General Store

A learning center that will reinforce reading skills in decoding and comprehension.

Sam's General Store reinforces a variety of reading skills including the forming of compound words using potatoes from the "tater" bin and identifying contractions using pickles from the pickle barrel. The directions are written on task cards accompanied by contracts to keep track of the student's work (shown on pages 19 and 20). Each student is provided with a grocery list for his written responses.

Sam's General Store

Construction/materials

- 20" x 36" fabric board section for basic construction of center
- 8" x 30" fabric board section for roof

This learning center was easily and inexpensively constructed from a portion of a fabric board, using its scraps and poster board for trim. Patterns are shown on the following pages.

Patterns for Sam's General Store

finished
size 2 1/2" x 10 1/2"

finished size
5 1/2" x 6"

Patterns for Sam's General Store

Dimensions given on
patterns are finished sizes.

Sam's General Store

Task cards for Sam's General Store. Provide students with grocery lists for their written responses.

1. Remove the potatoes from the "tater" bin. Arrange them in pairs to form as many compound words as possible. Write each word on your "grocery list"; then check your answers on the back of this card.

Reading Skill #380

storekeeper	panhandle
storeroom	shortcake
storehouse	pancake
shellfish	however
fishbowl	forever
fishhook	breakfast
housekeeper	
eggshell	1. answers

2. Read the contraction on each pickle in the barrel. On your "grocery list", write the words each contraction stands for. Be careful to spell them correctly. Check yourself on the back of this card.

Reading Skill #400

doesn't - does not	I'll - I will
he's - he is	I've - I have
don't - do not	I'm - I am
can't - cannot	
didn't - did not	
it's - it is	
won't - will not	2. answers

3. Read the words on the canned goods on the shelves. Find five that contain a long vowel sound and write them on your "grocery list" under LONG. Find five that contain a short vowel sound. Write them on your list under SHORT.

Reading Skill #240-260

LONG	SHORT
tomato paste	chicken
peas	salmon
bacon	ham
cheese	apples
beets	figs
	3. answers

Sam's General Store

task cards and contract

4. Read the words on the flour sack.
Write each one on your list with an antonym beside it. Read the words on the bag of sugar. Write each one on your list with a synonym beside it. Check the back of this card for possible answers.

Reading Skill #820

ANTONYMS

buy - sell
tardy - early
dry - wet
speak - listen
take - give
go - came
sour - sweet
arrive - leave

SYNONYMS

damp - wet
cold - chilly
let - permit
see - visualize
sick - ill
full - complete
tear - rip
pretty - attractive
correct - right

5. Remove the eggs from the cartons. Replace them in the proper slots to show which words answer the questions who, where, when and how. There are six in each category. Check your answers on the back of this card.

Reading Skill #800

WHO	WHERE	WHEN	HOW
you	beside	recently	slowly
them	there	then	fast
they	over	soon	happily
him	under	early	well
we	here	later	gently
she	near	now	softly

My name is _____

I have completed the following activities:

1 ☐ 2 ☐ 3 ☐
4 ☐ 5 ☐

Learning Centers... ...made from fabric boards (large).

Sizeable learning
centers that are
excellent in a
corner of your
classroom—approximately
40 inches x 40 inches.

Telephone Booth

A learning activity on reading comprehension and study skills

A telephone booth might be found on any street corner and this one would certainly make a unique learning center. Activities on the use of the phone are given on page 28, using the yellow pages and the white pages. The most unique part of this learning center is the use of the telephone dial in writing and deciphering secret codes shown on page 24. The contract has the format of a telephone bill made out to the child and as he completes each activity, he stamps his bill "Paid."

Telephone Booth

Construction/ Materials

1 fabric board
cut into 4 sections:

- 40" x 36" for basic construction
- 9" x 24" for telephone sign
- 2 shelf sections, each 9" x 24"
- 1 purchased toy wall telephone
- 1 local telephone directory
- related activities as desired

Telephone Booth

secret code activity...

Reading Skill #560 Following Directions

CODE

To decipher the secret message, use the numerals and letters as they appear on the telephone dial in the following code:

A = 2a	J = 5a	T = 8a
B = 2b	K = 5b	U = 8b
C = 2c	L = 5c	V = 8c
D = 3a	M = 6a	W = 9a
E = 3b	N = 6b	X = 9b
F = 3c	O = 6c	Y = 9c
G = 4a	P = 7a	Let 1 = q
H = 4b	R = 7b	Let 0 = z
I = 4c	S = 7c	

SECRET MESSAGE

5c 3b 8a 9c 6c 8b 7b 3c 4c 6b 4a 3b 7b 7c

3a 6c 8a 4b 3b 9a 2a 5c 5b 4c 6b 4a

Now, use the same code to write a secret message of your own. Let a friend decipher it.

The Bus Station

A learning center reinforcing following directions and utilizing maps and time lines.

What better place for a learning center than at the local bus station. The student knows immediately if the center is available to him as an "open" sign will be in the ticket window. If the center is in use, a "closed" sign will be in the window with the reopening time noted on the clock face. Then at the appointed time, the student may take the responsibility of "opening" the ticket window and proceed by recording his arrival on the chalkboard indicating that the center is in use. When he has recorded his departure time, the center is ready to be used by another student.

Bus Station

Construction Materials

- 1 fabric board for basic construction of center
- 3 additional fabric board sections:
10" x 40" for bus station sign

14" x 28" for newspaper bin

13" x 20" for open/closed signs
(13" x 5" Open; 13" x 15" Closed)

- Three 16" lengths 1/4" diameter dowels for securing newspaper bin and for holding tickets and hole punch
- 1 sheet poster board for 4 pockets, clock and arrival/departure board
- Current local newspapers and related activities as desired

Skills, Hayes School
Publishing Co., Inc.**

“Big Map” Attack 1

- Study the map of your state.
What are the three largest cities nearest to where you live?
- How long would it take to get to each of the three cities by bus if the bus averaged 55 miles per hour?

“Big Map” Attack 2

- Pick a vacation spot somewhere in your state. Figure out how to get there by bus. About how long would the trip be?
- Find a news story in the state section of the paper. Draw or trace your state map and pinpoint the location of the story.

2. Big Map Attack

Here, the student studies a map of his state to plan trips, trace the routes and locate points of interest. He can begin with local assignments and proceed using regional and statewide locations.

Tours 1

Have you taken a trip lately? If so:

- On the blank United States map, locate the state from which you came. Write the name on the map.
- Locate and name the state to which you came.
- Locate and name the capital cities of both states.
- Locate and name any states you traveled through to reach your destination.
- Estimate the total number of miles of your trip.

Tours 2

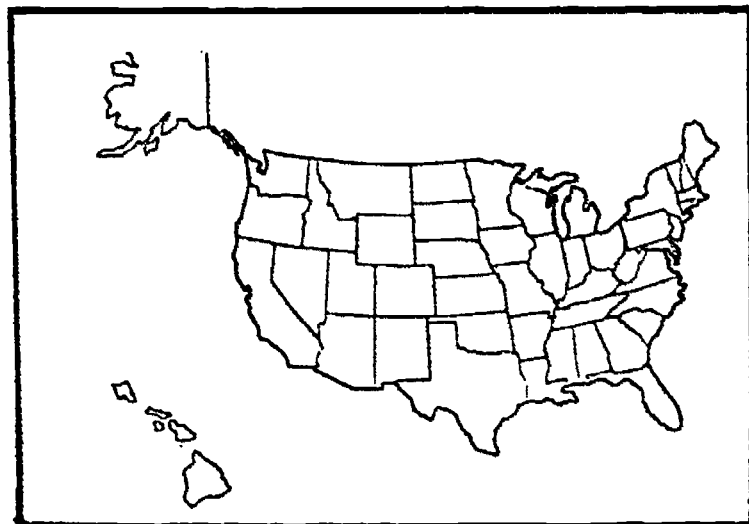

Are you taking a trip soon? If so:

- On the blank map of the United States, locate your destination. Write the name of the state and city on the map.
- Locate and name the state from which you came.
- Locate and name the capital cities of both states
- Plan and draw on the United States map a possible route to your destination.
- Estimate the total number of miles of your trip.

A blank
United States
map is given
on page 66.

3. Tours Section

The "Tours" Section is particularly appropriate for the transient child, as it provides him with meaningful activities that acquaint him with his new surroundings, and also allows him to share his previous experiences in his new situation. There are specific activities for the arriving student as well as for the departing one. These are designed to make his move meaningful and also offer continuity in the educational experience from one move to the next.

BUYING A PAPER FROM A NEWSPAPER BOX

1. It's a Tuesday morning and you wish to buy a morning newspaper from a newspaper box in which you have to deposit coins. You have two newspaper boxes from which to choose (see above). You read the directions on the boxes and then look over your change. You have 5 pennies, 1 dime, and a quarter. Which paper could you buy a copy of and why? _____

2. It's Sunday morning and you wish to buy a Sunday paper from one of the boxes. The change you have is 4 pennies, 3 nickels, 3 dimes, and 2 quarters. Which paper do you buy and why? _____

3. You wish a Thursday morning copy of each of the newspapers. The change you have is 3 pennies, 3 nickels, 3 dimes, and 1 quarter. What do you use to buy the papers? _____

4. You have 5 quarters and 1 dime. Which Sunday paper could you buy a copy of? _____

4. The coin operated newspaper box offers a variety of activities from the use of the machine itself to the use of all parts of the newspaper, such as: the classifieds, the editorial page, sports section and major news events.

LOOKING FOR A JOB IN A NEWSPAPER

MISCELLANEOUS HELP

Needed — person for warehouse work. Parson Drug Store, 3400 Canal. App. in person only please
TV helper, after school hours, uptown, 912 Milan
Weekend Snack Bar Help 9 A.M. to 5 P.M. Must be 18 years or older.
Apply 3717 Bourne Blvd.
General Help — Sunbeam Bakery 470 Howard, mng

EARN EXTRA MONEY

By delivering a Times route in the early morning.
Routes in all areas available. Call Mr. Kenilly at 242-7184
Person wanted for interesting work. No experience nec. Aft. school only weekdays. Write Times Box 222X
Stockier for supermkt. 341-2294 Hard worker only

BASSEY'S SPORTS

Part-time position for someone to press on lettering on T-shirts and uniforms. Apply in person at 2817 Eden Avenue
Grass cutters are needed weekends to operate electric grass trimmers & power motors. See Lee Hendricks City Park
5100 Pont Cir. Drive
Sat. between 9-12

5. These activities are kept current by changing the newspaper daily.

1. You are looking for a part-time job, but can work weekends only. Where could you apply for a job? _____
2. What do the following newspaper abbreviations mean?
app. _____; nec. _____; aft. _____;
weekdys. _____; supermkt. _____;
cir. _____
Why are such kinds of abbreviations used? _____
3. You aren't 18 yet. Which job isn't open to you? _____
4. Which ad requires that you send a letter? _____
5. You like sports and would like to work in a sports shop. Why might it be good to apply for the part-time position at Bassey's? _____

As you look through the "Help Wanted" section of the newspaper, fill in the following information:

- 1) How many different jobs are listed? _____
- 2) How many are for men? _____
- 3) How many are for women? _____
- 4) How many are for both men and women? _____
- 5) How many part-time jobs are listed? _____
- 6) List jobs that require previous experience or training.
1. _____ 5. _____
2. _____ 6. _____
3. _____ 7. _____
4. _____ 8. _____
- 7) List jobs that require no previous experience or jobs where training is provided.
1. _____ 5. _____
2. _____ 6. _____
3. _____ 7. _____
4. _____ 8. _____
- 8) List job requirements of special jobs that require something other than experience such as age, education and equipment.

Migrant Mercantile

A learning center that offers a variety of reading and math activities.

Let's stop in at the Migrant Mercantile for some refreshing activities. As the student approaches this learning center he signs in on the slate provided (1). Numbers 2 and 3 offer task cards for all directions to the learning center and the student keeps his own record of completed activities so that he may come and go as scheduling permits. Number 7 is a working pan balance for working with weights and measures. A catalog sales department (5) includes activities involving money. The apple barrel (6) holds apple shapes that are used to reinforce combinations of multiple addends. In the market basket (4) our student will find delicious assignments involving M & M's.

At the flower shop the daisies (9) offer reinforcement of vowel sounds. When all activities are completed the student is invited to write his name on a banana (3) showing that he is "one of the bunch."

Migrant Merchantile

Construction

The Migrant Merchantile learning center is constructed using sections of one fabric board, poster board, brads, permanent markers and acrylic paint.

Back Wall
of Migrant Merchantile

Using a sharp knife, cut fabric board along broken lines, paint and assemble.

Patterns:

bananas
finished size
6" x 8"

flower
finished
size
9" long

apple barrel
finished size 6 1/2 x 9 1/2

Apples may be cut from Ellison Letter Machine.

Migrant Mercantile

Activities

- (1) Student will sign in on "Featured" chalkboard.
Make your chalkboard by placing dark colored contact paper onto poster board.
- (2) A small brown bag holds task cards to be selected by the student for math and reading activities.
- (3) A contract may be signed by each student upon completion of activities.
Contracts and Task Cards may be cut from these pages and backed with poster board.

My name is _____

I have completed the following activities:

Apples <input type="checkbox"/>	Weights and Measures <input type="checkbox"/>
M & M's <input type="checkbox"/>	Pick a Flower <input type="checkbox"/>
Catalog Sales <input type="checkbox"/>	Plant a Flower <input type="checkbox"/>

When you have completed all activities,
write your name on one of the bananas.
You are "ONE OF THE BUNCH!"

My name is _____

I have completed the following activities:

Apples <input type="checkbox"/>	Weights and Measures <input type="checkbox"/>
M & M's <input type="checkbox"/>	Pick a Flower <input type="checkbox"/>
Catalog Sales <input type="checkbox"/>	Plant a Flower <input type="checkbox"/>

When you have completed all activities,
write your name on one of the bananas.
You are "ONE OF THE BUNCH!"

- (4) Purchased baskets contain 2 packages of M & M's.

Math Skill #073 Signs and Associated Word Names

Task Card:

M & M's

1. Open the bag of M & M's and separate them by color.
2. Which color has the most? Which color has the least?
3. Complete these sentences with $>$ or $<$
 green ____ yellow yellow ____ green
 brown ____ orange orange ____ green
4. Put the colors in separate rows. Make a graph showing the colors.
5. Put the M & M's away. Go to the clean bag and take out one M & M the color you had the most of and one M & M the color you had the least of and EAT THEM!

Skill #073 Math

Reading
Skills #100, 500

Math
Skill #536

(5) Poster board rack holds catalogs.

Task Card:

Catalog Sales

1. List the members in your family. Choose one present for each person. List the cost of each present and find the total cost.
2. Your Dad has just been given a two-week vacation. The whole family is going camping. Choose all the equipment you will need. Make a list showing the total cost.
3. Find five things from the catalog that will fit in each of these categories:
useful attractive fun necessary
4. It is your birthday! Choose any one gift from one of the catalogs. Tell why you chose that particular one.
5. How many different kinds of catalogs do we have at this center? List them in alphabetical order.

Skills #500 & #100 Reading and #536 Math

- (6) Fifteen small apple shapes are cut from poster board. Print the following numerals on the apple shapes:
- 20, 25, 39, 5, 27, 8, 6, 11,
1, 17, 22, 13, 3, 7, 2

Task Card:

Apples

1. The apples on the outside of the barrel are sums. Use the numerals on the apples in the barrel to show true addition sentences. How many different combinations can you find for each sum? Record your answers.
2. Arrange the apples in numerical order. Leave a space for each missing numeral. Record the missing numerals.

Skills #076, 119 Math

Addition

- (7) Two plastic containers
are attached with cord
to fabric board scales
hung with rings.

Task Card:

Math Skill #531 Measurement Weight

Weights and Measures

1. Which weight more - three buttons or two paper clips?
2. Find which is heavier - a button or a paper clip?
3. How many paper clips does it take to balance an eraser?
4. Balance an orange and a potato. Which is lighter?
Do you think this will always be true?
5. Which weighs more - a cup of whole potato chips or a cup of
crushed potato chips?

Record your answers on paper!

Skill #531 Math

- (8) Purchased basket
contains flower
seeds and scoop.
Fabric board rack
holds pots and
potting soil.

Task Card:

Reading Skill #560 Following Directions

Plant a Flower

Put some dirt in a pot.
Plant a seed and water it.
When your plant begins to grow, measure it every day.
Record your plant's growth for one week.

Skill #560 Reading

Migrant Mercantile

Reading Skill #240 Short Vowels

- (9) Use flower shapes cut from poster board. On the center of each flower, write words with short vowel sounds, omitting the vowels (see illustration).

Task Card:

Pick a Flower

How many flowers can you pick?

Use vowels to make as many words as you can. Each flower can be made into more than one word.

Write your words on paper!

VOWELS: a e i o u

Skill #240 Reading

The Tree

A learning center reinforcing the skills of sequencing, classification, following directions and organizing.

A nice place to pause and rest is under a tree. But this is just not an ordinary tree. Besides being decorative, it is also a learning center. In the bird house, we find activities to reinforce the skills of sequencing, classification, following directions, organizing and more (shown on page 46). With the addition of seasonal fruit or blossoms you can add root words, prefixes, suffixes and math problems.

Tree Construction

Tree pattern is suitable for use with opaque projector. With a sharp knife cut the tree trunk from fabric board having the fold centered lengthwise as indicated. Leaves are cut from poster board and attached to the trunk with brads.

Small apples may be used for Reading Skills #360, #500, #520, #880, #920, and #940.

Tree Accessories

A bird and birdhouse may be added. Tasks from the following page may be cut, backed with poster board and stored in a library pocket placed on the back of the birdhouse.

Birdhouse

Task Cards

**Reading Skills #500, 520
560, 940**

**Classification
Sequence
Following Directions
Organizing**

Make a TREE showing
how our school works.

Make a TREE to show the
branches of our state
government.

Make a TREE that shows
how letters get to your
house from other states.

Make a TREE of an
orchestra. Put the
conductor on the
trunk of the tree.

Make a TREE that shows
how a city develops
from a single house.

The Town Hall/Newsstand

A learning center reinforcing a variety of skills in reading and math.

This learning center has its own working clock. The mechanism was taken off a discarded clock and placed on the learning center. When a student is scheduled to work at this learning center, he pulls his time card and records the time he "clocks in." Then he may visit the newsstand where an abundance of newspaper activities are housed. If he likes, he may wear the editor cap and even retreat through the archway to a special working area. There he may work on one of many skills—anything from sequencing using comic strips to calculating percentages using baseball statistics. The activities can be changed frequently and with no extra cost by using newspapers and discarded magazines. And it's always nice to give students special recognition. This learning center features a mayor of the week!

Town Hall/Newsstand

Construction

The Town Hall/Newsstand learning center is constructed using sections of one fabric board, poster board, brads, permanent markers and acrylic paint. Cutting layout and activities are number coded to the illustration below.

Cutting Layout

Using a sharp knife cut fabric board along broken lines. Attach roof sections (2 and 3) to wall section (1) with brads. Poster board strips may be added as roof shingles.

Three poster board racks (4, 5 and 7) attached with brads hold activity cards made by cutting the cards provided on pages 50, 51 and backing them with poster board. Poster board rack number 6 holds rolled sections of local newspapers.

Purchased self-sticking stars may be stored in the Task card rack (7).

The clock face is mounted on the Town Hall tower (8). A battery operated clock may be installed or clock hands may be cut from poster board using patterns provided.

Town Hall/Newsstand

Task Cards

Contract:

Star Reporter _____

Directions: Write your name in the blank provided and select one of the center's newspapers. Each time you complete an assignment, you may place a star in its square. When you have completed the first five activities, you may do the last one and become a star reporter!

(Reverse Side of Card No. 6)

The Post Office

This learning center offers a variety of skill building activities in reading comprehension, auditory discrimination and locational skills.

Sending a postcard to a favorite pen pal makes this learning center fun as well as educational. The tasks can be put in envelopes addressed to the students assigned to these activities. As each task is completed, the student may place a stamp in the appropriate space on his contract. Opportunities for creative writing are provided, as well as using accepted letter writing format. A zip code directory allows for students to utilize practical information, and of course, there is a working mailbox to send the letters. Students may begin a collection of postmarks for each state in the union and they may be placed on the U. S. map. The American flag, which every U. S. Post Office flies, opens the door for activities promoting patriotism. One of the activities includes the Pledge of Allegiance, reinforcing its meaning and offering practice for memorization. Postcards may be contributed by students and used for sorting and classifying.

Cutting Layout

Using a sharp knife, cut fabric board along broken lines; paint and assemble.

From poster board cut two envelope pockets for Contracts (3) and Tasks (4) and a pocket to hold Stationery and Envelopes (5).

The pattern on the following page may be used to cut the mail bag (6).

Using an opaque projector, enlarge the mailbox pattern and cut from blue poster board. Assemble and attach with brads (7).

Mailbox flap may be attached with brads as indicated.

Post Office Construction

The Post Office learning center is constructed using sections of one fabric board, poster board, brads, permanent markers and acrylic paint.

Cutting layout and activities are number coded to the illustration below.

Cut mail bag from brown poster board. Cut slit on broken lines. Attach a pocket on back so that purchased postcards are held in bag. The bag may be hung on a dowel peg (6).

Contracts may be cut,
backed with poster board
and stored with purchased
stickers in envelope
pocket (3).

Organizing**

5.

Did you enjoy your book? Why or why not?

Write a brief summary of your book. It should not be more than a paragraph or two.

Skill #940

The Ole Fishing Hole

Math Skill #182 Whole Numbers—Multiplication

A learning center reinforcing the multiplication facts.

Here students can fish for facts. When a fish is landed, the product must be given, and if correct, the student may keep the fish until the end of the activity. If not, he must throw it back to be caught on another try.

Place paper clips on the fish and a magnet on the end of the fishing line. The students can actually fish for multiplication facts.

Finished size of frogs 8" x 20".

**Fish Pattern
Actual Size**

When the multiplication facts have been mastered, new ones may be added easily. Since the facts were written on laminated poster board with a permanent marker the facts can be removed with hair spray and other facts written on the fish. As a matter of fact these fish will represent their "school", for they can reinforce a variety of math and reading skills like number word names, root words, antonyms and multiple meaning words.

Christmas Tree

A comprehensive learning center for either math or vocabulary development.

And what is Christmas without a tree? More than just a holiday decoration though, it can be designed into a comprehensive learning center. Each stocking and ornament can reinforce a different skill concept; for example, one stocking could reinforce getting the main idea, one could teach compound words and another could reinforce sequencing. The wrapped boxes under the tree could reinforce even more skills and one could hold the answer keys so that the learning center is completely self-checking.

Christmas Tree Construction

Using a jigsaw cut the pattern above and the pattern on the following page from plywood, foam board or cardboard.

After cutting out the trees and the slits, fit the slit on the bottom of one tree into the top slit of the other tree. Push the two trees together so that the top and the bottom align. The tree will now stand on its own.

Year-Round Tree

**A learning center for
vocabulary development.**

This year-round tree is one of the most versatile aids you could have, for it can be utilized as a permanent learning center whose activities can be changed with the seasons and the holidays.

For a seasonal flair, use fall leaves, shamrocks, spring flowers—anything! This learning center is completely adaptable to all levels and year-round use.

Year-Round Tree

Apple Pickin' Time
Oral Language
Skills #440, 480
Nouns, Verbs

The learning center above deals with determining parts of speech. The student picks an apple, uses the word on it in a sentence and determines whether it is used as a noun or a verb. He then places it in the correct basket.

Year-Round Tree Construction

Using a jigsaw, cut the pattern above and on the following page from plywood, foam board or heavy cardboard.

After cutting out the trees and the slits, fit the slit on the bottom of one tree into the top slit of the other tree. Push the two trees together so that the top and the bottom align. The tree will now stand on its own.

Imagine That...

**...learning centers
with a little imagination
made from objects related
to real-life activities.**

The Step Ladder

A learning center reinforcing the skill of following directions.

What child wouldn't love to "step up" to this colorful learning center built around a plain wooden ladder? He may don the painter's cap as he proceeds with the activities appropriate for him. The activities at this center progress from the lowest level (red) where the student is asked to draw a simple plan of the room he is in to more difficult ones with each color level as he "steps up." On the blue level he is asked to draw a plan of his dream house and also to select coordinating paint and wallpaper samples so that the activities progress from concrete to abstract. The tasks are found on color-coded paint brush shapes, and the "painter" works in his own "paint can" book.

The Step Ladder

A 23 inch wooden ladder has been painted red, yellow and blue. Three cup hooks have been added on the right and left side to hold the paint can books and the task paint brush shapes.

And remember the step ladder collapses and requires little storage space.

Step Ladder Patterns

The letters "Step Up" were painted on a real painter's cap.

Task cards may go in a Ziploc bag taped to the top of the tackle box.

Store worm shapes, fish scale, plastic worms, hooks in the plastic tray compartments.

Store fish shaped activities here.

Tackle This!

A complete comprehensive reading and math learning center.

Need a compact comprehensive learning center? Why not "Tackle This!" In this inexpensive tackle box make use of some simple fish and worm shapes to reinforce a variety of reading and math skills.

Activities to go in tackle box are given on the following pages.

worm shapes

fish shapes

Tackle This! Activities

**Reading
Skills #140, 200
Initial Consonants
Blends**

Task Card #1

Match the worms and fish in the bag marked 1. How many words can you make in each family?

The first task teaches word families by matching the worms to the fish.

More letters to put on worms:

c, n, b, sh, bl, f, s,
n, m, p, g, k, r, w,
b, l, th, tr, y

Make a slit in fish so worm can slide in.

Tackle This! Activities

Task Card #2

Spread out the fish in the bag marked 2. Each time you catch a fish with the magnetic pole, you must give the product.

Math
Skill #182
Multiplication

This is a
simple activity
using a real pole and a
magnet to reinforce
multiplication facts.

Skill #182

Multiplication

Task Card #3

Match the worms and fish in bag #3
to show multiplication facts.

Keep all
fish shapes
in a Ziploc bag.

Tackle This! Activities

Task Card #4

Give a synonym for each word on the yellow worm. Now give an antonym. Write them.

Reading Skill #820 Word Meanings

A list of synonyms to put on worm shapes:
tired, large, dark, wet,
long, cold, young, run,
walk, laugh, cry, sad,
happy, little, cold.

Task Card #5

Add a prefix to each word on the blue worms. Now add a suffix. Write them.

Reading Skills #420, 440 Prefixes, Suffixes

A list of words to add prefixes and suffixes:
write, do, heat, read,
teach, code, throw,
norm, king, free, joy,
shoe, life, rail, act,
eat, historic, way,
committee.

Tackle This! Activities

Task Card #6

Use the fish weigher to weigh the empty bait can. Fill it half full of water. Weigh it again. Record your findings.

Math Skill #531 Measurement- Weight

And a real fish scale allows our fisherman to weigh designated items and measure using the built-in tape.

Math Skill #449 Measurement- Linear

Task Card #7

Use the tape measure to measure the length of the red fish marked 7. How long is one blue plastic worm?

Tackle This! Activities

Reading Skill #880 Following Directions

Task Card

#8

Prepare a fishing line. Cut
18" of line. Thread a sinker onto it.
Add a float. Tie on a hook.

Tackle This! Activities

Task Card #9

Have you finished all activities?
Use the dip net to catch a blue
worm. It is yours to keep.

Contract:

After he has prepared a workable fishing line from simple directions, he may string his contract card and "catch," a plastic worm with the dip net provided. This signifies that he has completed all activities at this "gone fishing" learning center.

All in all, this center provides our student with unique and fun activities. It reinforces many skills adaptable to different levels by changing the facts as they are mastered.

Drying Decimals

A learning center reinforcing decimals.

Hang out your wash and reinforce decimals at the same time with this unique learning center. Provide the student with several articles of clothing, and as he completes each activity, he may "hang it out" to dry.

This learning center was made from a plastic drying rack. The clothing articles may be hung with clothespins. This is also good for displaying students' work. Patterns are given on the following pages.

Drying Decimals Activities

Math
Skill #392
Decimals
Multiplication

DIRECTIONS

The sales tax in Gulfport is .05 of the price of an item. Mary's mother bought her this dress for \$13.95. How much tax did she pay?

Answer:

Multiply sales tax by cost of item.
(69.7¢)

Math
Skill #368
Decimals
Addition

DIRECTIONS

Compute the difference of these problems. Check your answers here:

$$\begin{aligned} .8 - .2 &= .6 \\ 6.3 - 2.2 &= 4.1 \\ .5 - .3 &= .2 \\ 7.5 - 6.4 &= 1.1 \\ .9 - .7 &= .2 \end{aligned}$$

Math
Skill #368
Decimals
Addition

DIRECTIONS

Compute the sum of these problems. Check your answers here:

$$\begin{aligned} .2 + .6 &= .8 \\ .3 + .2 &= .5 \\ 2.5 + 3.4 &= 5.9 \\ .8 + .1 &= .9 \\ 3.6 + 7.2 &= 10.8 \end{aligned}$$

Drying Decimals Activities

Math
Skill #351
Decimals
Place Value

DIRECTIONS

Name the place value of the specified digit. Check your answers here:

.3 = tenths
.37 = hundredths
.1263 = thousandths
.58 = hundredths
.7 = tenths

Math
Skill #363
Decimals
Decimals to
Fractions

DIRECTIONS

Convert these one and two place decimals to their correct fractions. Check your answers here:

.5 = 5/10 or 1/2
.25 = 25/100 or 1/4
.7 = 7/10
.46 = 46/100 or 23/50
.2 = 2/10 or 1/5
.85 = 85/100 or 17/20

Math
Skill
#354
Rounding

DIRECTIONS

Round these decimal fractions to the nearest hundredth, tenth, etc. Check your answers here:

.249 = .25, .2
.352 = .35, .3
.492 = .49, .5
.777 = .88, .8
.247 = .25, .2
.608 = .61, .6

Math
Skill #401
Decimals
Division

DIRECTIONS

Compute the quotient of these problems. Check your answers here:

.8 ÷ .2 = .4
64.8 ÷ .2 = 32.4
.9 ÷ .3 = .3
30.08 ÷ 9.4 = 3.2

Tools of the Trade

A tool box is a neat way to make use of "Tools of the Trade." The removable top is perfect for sorting, and it includes numerals and letters of different colors to get the student started in that direction. Other tools include a ruler, scissors, shapes, and folded colored paper for making attractive borders.

Mail Call

A learning center reinforcing the skills of whole numbers.

You know how much fun it is to receive a letter. With "mail call" the student receives a letter and reinforces a skill at the same time. Each piece of mail in the mailbox contains an activity on whole numbers. When he has completed all activities he may put the red flag up.

This learning center was made from a metal mailbox. The words "Whole Numbers" were painted on with acrylic paint. Directions were placed on the door and all activities are kept inside.

Mail Call Activities

Place these activities on letters to go in the mailbox.

Math Skill #082 Whole Numbers Place Value

Greetings!

Compute the difference of these problems.
Check your answers below.

$$\begin{array}{rcl} 9 - 3 & = & 6 \\ 18 - 3 & = & 15 \\ 47 - 34 & = & 13 \\ 5,743 - 321 & = & 5,422 \\ 86 - 69 & = & 17 \end{array}$$

ANSWERS

Math Skill #119 Whole Numbers Addition

Hello!

Write these numbers in expanded notation form, using word names.

$$\begin{array}{l} 327 = \\ 48 = \\ 6,037 = \end{array}$$

Check your answers here:

327 = three hundreds plus two tens plus seven
48 = forty tens plus eight
6,037 = six thousands plus three tens plus seven

Hi there!

Name the place value of a given digit in the number. Check your answers below.

$$\begin{array}{rcl} 3 & & 3798 \\ 29 & & 8 \\ 375 & & 154 \end{array}$$

$$\begin{array}{rcl} 375 & = & \text{three hundreds} \\ 29 & = & \text{two tens} \\ 3 & = & \text{three ones} \end{array}$$

ANSWERS

Math Skill #152 Whole Numbers Subtraction

Hi!

Identify the sum of these numbers. Check your answers below.

$$\begin{array}{rcl} 24 + 3 & = & 27 \\ 33 + 12 & = & 45 \\ 40 + 50 & = & 90 \end{array}$$

$$\begin{array}{rcl} 111 + 343 & = & 454 \\ 17 + 5 & = & 22 \\ 9 + 1 & = & 10 \end{array}$$

ANSWERS

Math Skill #085 Whole Numbers Expanded Notation

The Reading Tub

A reading center designed for the pleasure of reading.

Probably the most interesting and most enjoyed piece of furniture is the old four-footed bathtub. The outside of the tub can be painted any color you desire. Throw a few pillows into the tub to add to the comfort and you have an ideal reading center.

The Reading Boat

A reading center designed for the pleasure of reading.

An old rowboat makes a great reading center. It is surprising what a coat of paint will do. Throw in some pillows, paint water on the sides and you have a unique, nautical reading center.

Room Dividers

The Picket Fence

Wouldn't this come in handy to partition off a part of the classroom for a certain activity? Some of the advantages to using these fabric boards are: they are inexpensive; they are readily available; and they store in a small amount of space.

Using a sharp knife, cut fabric board along broken lines, paint and add flowers.

Room Dividers

Puppet Stages

A pattern cutting board makes an excellent puppet stage. Any design can be easily painted onto the surface.

When it is not being used as a puppet stage the fabric board makes a decorative room divider as well as a back for displaying children's work.

Room Dividers

Good Graffiti Cloth Divider

A piece of fabric stretched between two dowels makes an excellent room divider. Have students do crayon rubbings of their favorite hobbies. Make sure they sign their squares.

Graffiti Curtains

The same fabric could also be used to make curtains for your classroom.

Cloth Display

This decorative cloth divider can also serve as an additional bulletin board on which items can be displayed.

Metal Filing Cabinet

Don't throw away that dinosaur of a metal file cabinet. Even if you still utilize it, make it more versatile as a room divider and a mini-learning center.

Cut letters and numerals from the Ellison Letter Machine and apply stick-on magnets to the back. Students can follow sequence with the numerals and spell words with the letters.

Room Dividers

Wallpaper Divider

To create a room divider that is easy and colorful, use scraps of wallpaper for the children's rooms and attach to dowel sticks.

Styrofoam Panels

Large panels of styrofoam either spray painted or covered with contact paper make lightweight room dividers and display units.

Styrofoam panels are ideal for displaying children's work in areas other than the classroom.

Room Dividers

Window Shades

Enough cannot be said about window shades. They are versatile, inexpensive and easy to store. They can be used as decorative room dividers, time lines, flow charts, murals, bulletin boards, learning centers and they make excellent screens for viewing filmstrips.

Room Dividers Storage

Ice Cream Containers

Five gallon ice cream containers make excellent room dividers. Then each child may have a compartment to store his materials in.

They can also be stacked separately so that students can pick them up and take them to the area where they will work. Each student may keep a container on the project he is working on and decorate accordingly.

Room Dividers Storage

Closet Door

Open that closet door and make it into a versatile storage-learning center. The opened door can be used as a bulletin board or as a screen for viewing filmstrips. The closet space is used as an additional work or storage area, or a place for a fascinating learning center. To make it even more versatile place chairs and tables outside.

Room Dividers Storage

Produce Boxes

Produce boxes can be used as storage bins. Cut out one side and then paint them. They can be stacked and held securely with nails.

Bottle Box

A divided carton, with each section identified by labels, makes a handy storage cupboard.

Shoe Holder

Shoe holders can be used as storage centers for supplies or learning activity cards. Labeling the pockets helps students to locate and return materials.

Room Dividers Storage

Refrigerator Box

A large box provides a free-standing room divider and display area. It can be moved to different locations within the room to become part of any learning center or work area.

Display Cubes

Boxes of all shapes and sizes can be used to display students' work. Each student may decorate his box as he wishes. Several boxes can be grouped together to form a room divider, and don't forget they can all be used to store anything.

Carpenter's Apron

Reading Skill #100

Alphabet

A walking learning center that reinforces the alphabet.

The carpenter's apron was screen printed with a "puff" paint. After it is dry, heat is applied and it puffs, giving it a nice texture. Textured letters can be made from sandpaper and letter puzzles are good in helping in letter recognition. And what about brightly colored pipe cleaners to form letters. And everything fits nicely into the pockets. So we have, with this carpenter's apron, a walking learning center for the alphabet.

Dinosaur Apron

In this walking learning center the student will receive practice in visual discrimination, in the recognition of blends, and in the use of suffixes.

A versatile and mobile learning center, this screen painted apron houses innovative activities for reinforcing skills. Inside the pockets are dinosaur shapes that can be pressed from the letter machine or hand-cut. By laminating the shapes first and then writing on them with a permanent marker, the shapes can be re-used to reinforce additional skills by erasing them. This is easily done by spraying them with hair spray and wiping clean with a paper towel.

Tyrannosaurus Flash

Reading
Skill #020
Visual discrimination

The tyrannosaurus shapes are used here as flash cards in distinguishing different shapes.

Base words:

teach	neat
music	force
fool	real
aim	certain
adult	adore

Suffixes:

ly	able
ism	less
hood	est
er	ful
ish	ad

**Brontosaurus Concentration****Reading
Skill #440
Suffixes**

The brontosaurus shapes are used in a game of concentration to reinforce the use of suffixes. Base words are written on half of the cards and suffixes on the other half. When a student can match a suffix to a base word, he keeps that pair. The student with the most pairs wins the game.

Blends:

sl
pl
cl
cr
fr
br
sk
str
dr
fl

Words**to complete:**

ide
ease
own
owd
ee
oom
ate
eet
ive
ower

**Stegosaurus Blends****Reading****Skill #200****Blends**

The stegosaurus shapes are used to reinforce blends. A blend is written on one card and the letters to complete a certain word on another card, for example: "cl" on one card and "own" on another to make the word "clown." The cards are then shuffled and dealt to the players. Played like the traditional game "Go Fish," the object of the game is to collect as many pairs as possible. In this particular game, however, there is a wild card. It is the yellow pterodactyl and the player getting it receives an extra turn!

More Walking Learning Centers

Sight words, root words, synonyms, math facts and much more can be written on the laminated apple and train shapes. Then they can be erased with hair spray and changed to meet the students' needs. And don't forget everything fits in the front pockets.

American Tourist Suitcase

A suitcase learning center.

This is a special suitcase for the migrant student as he travels from school to school. You can personalize it by filling it with such materials as scissors, pens and glue to enable the student to complete activities chosen especially for him...based on his needs and interests.

American Tourist Suitcase

The American Tourist Suitcase is easily constructed by using a single sheet of poster board. The handle is made from poster board scraps.

Different sizes of Ziploc bags were taped on to hold ready-made activities, scissors, pens and glue.

Finished size:
17" x 27".

Pattern

Sponge Printing

A unique activity that can be incorporated into any learning center.

Sponge print
on your favorite
tote or t-shirt.

You will have fun soaking up on this activity—sponge printing! A new fun way to print is with a material called a "Pop Up Sponge." It starts out flat like a piece of paper so that you can either draw and cut out your design by hand or press from the Ellison Letter Machine. Then immerse your shape in water and it does just what it says...it pops up. Dip into plates of textile paint and it is ready to print! Sponge printing can be used for classroom projects or fund-raising activities.

Scavenger Hunts

A unique activity that can be incorporated into any learning center.

**Reading
Skill #020
Readiness**

A scavenger hunt is a fun approach to reinforce particular skills under study and for applying math and reading concepts to relative situations. Prepare lists that are applicable to your classroom environment such as the two examples given.
