DESCRIPTORS Attendance; *Charts; Comparative Analysis; Educational Finance; Elementary Secondary Education; Enrollment; Expenditures; Federal Aid; Income; Population Trends; Public Schools; *School Statistics; State Aid; *State Surveys; Tables (Data); Teacher Salaries

IDENTIFIERS *North Carolina; *Ranking

ABSTRACT

This collection of charts is primarily a compilation of statistics collected by various private and public organizations about North Carolina schools in relation to the rest of the country. Most of the information came from "Rankings of the States, 1991" by the National Education Association. Figures used in the rankings represent the latest available statistics. Data for 1991 are presented in the following areas: (1) population; (2) enrollment and attendance; (3) faculty; (4) general financial resources; (5) governmental revenue; (6) school revenue; (7) governmental expenditures and debt; (8) school expenditures; and (9) miscellaneous. Data for each area are followed by tables of educational trends for North Carolina. It is particularly interesting to note that in 1991, 30 states had a higher average annual teacher salary than North Carolina, while 34 states had a higher per capita income. Thirty-one states had a higher expenditure (from all sources) per pupil in average daily attendance than did North Carolina. Nine tables and 14 charts (graphs) display the comparative information. FOREWORD

The status of education in North Carolina changes from year to year. When compared to other states and the nation as a whole, North Carolina may be making great strides in some areas while falling behind in others. We believe that this kind of information is important to educational planners and decision makers. *How North Carolina Ranks Educationally Among the Fifty States*, an annual publication, is designed to show North Carolina's rank among the states on a wide variety of educational and related statistics. It is hoped that the information presented in this report may be useful in understanding, explaining, interpreting, and possibly evaluating various aspects of North Carolina's Public School System.

Bob Etheridge
State Superintendent of Public Instruction
April 1992

INTRODUCTION

This publication is presented as a service to its readers. It is primarily a compilation of statistics collected by various private and public organizations. Only rarely does it include special analyses made solely for publication in this report. The editors follow the policy of publishing those statistics believed to be of most interest.

When the original source of a statistic does not update it the year after it is first published, the original entry is repeated the following year. If the statistic is not updated the second year, it is dropped from this publication. If at some future time the statistic is updated, then it may be added again to this report. Occasionally, statistics are dropped because other statistics make them redundant.

The information presented in this publication was obtained chiefly from *Rankings of the States, 1991*. (Copyright 1991 by the National Education Association (NEA). Reprinted with permission.) When preparing *Rankings of the States, 1991*, the National Education Association consulted various publications of the Bureau of the Census, U.S. Department of Education, and their own publication, *Estimates of School Statistics*. In compiling their statistics, NEA substitutes their own estimates when a state fails to provide data requested by the NEA research staff. So some of the ranks may have an element of estimation.

The figures used in the rankings presented in this publication are the latest available. Some are preliminary estimates, and hence are subject to revision. Some are based on sampling studies for which measures of sampling variability are not recorded here. Where the variations among the states are not large, a very small change in a state's data from one year to the next could effect a great change in the state's rank. Consequently, readers are advised to use caution when making conclusions based on slight differences among rankings of a specific item.

The 1991 edition of *How North Carolina Ranks Educationally Among the Fifty States* contains data from the following related areas:

- **Population:** age tabulations, birth rate, and changes in population
- **Enrollment and Attendance:** number of administrative units, public school enrollment figures as well as changes in enrollment, average daily attendance and membership, and number of handicapped children served

- **Faculty:** number of instructional staff, number of teachers, number of pupils per teacher, and teacher salaries
- **General Financial Resources:** per capita personal income, per capita disposable personal income, and personal income from government enterprises as a percent of total personal income
- **Governmental Revenue:** income tax revenues, property tax revenues, etc.
- **School Revenue:** school revenue per pupil in average daily attendance; school revenue per \$1,000 of personal income; and school revenue from local, state, and federal support
- **Governmental Expenditures and Debt:** per capita state expenditures for all functions; per capita state and local expenditures for public welfare, health and hospitals, police protection, highways; and per capita debt
- **School Expenditures:** per capita educational expenditure of state and local governments, expenditures for education as a percent of expenditures for all functions, per capita expenditures for higher education, per capita expenditures for local public schools, expenditures per pupil in average daily attendance, expenditures for education per \$1,000 of personal income
- **Miscellaneous:** number of physicians, number of dentists, and number of major crimes as well as percent change in crime rate.

The data in each area are followed by tables of educational trends in North Carolina. Over 100 statistics related to public education in North Carolina are contained in this publication. These statistics indicate the scope of public education, the available and allocated resources, and the results of North Carolina's system of public education.

The following information is given for each statistic: North Carolina's rank and the figure upon which this rank is based, the figure for the entire United States, and the figures for the highest ranking state and the lowest ranking state so that one may determine where North Carolina falls in relation to the fifty states. When more

than one state ranks at the highest or lowest point in the national range, the states are listed in footnotes at the bottom of the page.

The determination of a ranking for a given statistic is made by assigning one to the largest number or percentage and fifty-one to the smallest number or percentage. The District of Columbia is also ranked with the fifty states, which accounts for the fifty-first position. On some measures, it may be favorable to be ranked number one, whereas in others it may not.

Many of the terms used in this publication are defined in the glossary. This glossary will be invaluable to the reader in interpreting the data presented.

Following is a list of selected items of interest from the 1991 edition of *How North Carolina Ranks Educationally Among the Fifty States*:

- North Carolina had a **total population** of over 6 million in 1989. Nine states had a larger population.
- North Carolina's **school-age population** (age 5-17) in 1989 was over 1.1 million. Ten states had more elementary and secondary school-age children.
- In 1989, the **school-age population (age 5-17) as percentage of total population was 17.9%**. Thirty-four states had a higher percentage of estimated school-age population.
- There were over 1.08 million **children enrolled in the public elementary and secondary schools** in North Carolina in 1990. Ten states had more children enrolled.
- North Carolina employed over 73,000 **instructional personnel** in public elementary and secondary schools in the 1990-91 school year. Eleven states employed more instructional staff in public schools.
- In 1990-91, 19.5% of the public elementary and secondary school teachers in North Carolina were men. Forty-five states had a higher percentage of male teachers.

- The average annual salary of a public school teacher in an elementary or secondary school in North Carolina in 1989-90 (revised) was estimated to be \$27,883. Thirty states were estimated to have a higher average annual salary.
- North Carolina's annual per capita personal income was \$15,198 in 1989. Thirty-four states had a higher annual per capita personal income.
- Per capita total tax revenues of state and local governments in North Carolina amounted to \$1,572 in 1988-89. Thirty-three states had higher total per capita tax collections.
- In 1989-90 (revised), 27.3% of the public elementary and secondary school revenue in North Carolina came from local sources. Forty-one states had a higher percentage of local funding.
- In 1989-90 (revised), 66.2% of the public elementary and secondary school revenue in North Carolina came from state sources. Seven states had a higher percentage of state funding.
- In 1989-90 (revised), 6.5% of the public elementary and secondary school revenue in North Carolina came from federal sources. Twenty-five states had a higher percentage of federal funding.
- In 1988-89, the per capita state and local government expenditures for all education (elementary, secondary, and post-secondary) in North Carolina were \$1,043. Twenty-nine states had a higher per capita expenditure for all education.
- In 1988-89, the per capita state and local government expenditures for local public schools were \$671. Thirty-five states had higher state and local government expenditures for local schools.
- In 1989-90 (revised), the estimated current expenditure for public elementary and secondary schools per pupil in average daily attendance in North Carolina was \$4,482. Thirty-one states had a higher expenditure per pupil in average daily attendance.

GLOSSARY

GLOSSARY

AVERAGE DAILY ATTENDANCE: Average number of pupils attending when schools are actually in session.

AVERAGE DAILY MEMBERSHIP: An average number of pupils enrolled, those present plus those absent, when schools are actually in session.

BASIC ADMINISTRATIVE UNIT: The local school district; the unit for the operation of elementary and secondary schools or for contracting for school services.

CAPITAL OUTLAY: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings; improvements of grounds; construction of buildings; additions to buildings; remodeling of buildings; or initial, additional, and replacement of equipment.

CRIMES, MAJOR: Murder, non-negligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny (\$50 or more), and auto theft.

CURRENT EXPENDITURES: All amounts spent at all levels of administration—state, intermediate, and local—for public elementary and secondary schools for administration, instructional services, plant operation and maintenance, fixed charges, and other school services (attendance, health services, transportation, food services, etc.). Includes the

cost of operating the state department of education and the intermediate (county) departments of education; employers' contributions to retirement systems and/or Social Security on behalf of public school employees; and federal, state, and local funds to cover deficits (gross expenditure less sales) of school lunch and milk programs.

DEBT: The major portion of all state and local government debt is long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt, i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes.

DISPOSABLE PERSONAL INCOME: The personal income of residents minus taxes and other required payments such as fines, penalties, and fees.

EDUCATION: The provision or support of schools and other education facilities and services.

EFFORT: A measure that relates the capacity to support public schools (defined as the personal income of the residents of the state) to the revenues obtained, or expenditures made, on behalf of public schools. The latest available personal income data determine the school year for which school revenues and expenditures are chosen for comparison. Personal income for the year shown would be available to pay school taxes or allay school expenditures in that school year.

ENROLLMENT: A cumulative count of the number of different pupils registered during the entire school year; new entrants are added, but those leaving are not subtracted.

EXPENDITURES: All amounts of money paid out by a government— net of recoveries and other correcting transactions— other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures include only external transactions of a government and exclude noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

FALL ENROLLMENT: The count of the pupils registered in the fall of the school year, usually October.

FULL-TIME EQUIVALENT EMPLOYMENT: A computed statistic representing the number of full-time employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

FUNCTIONS: Public purposes served by governmental activities (education, highways, public welfare, etc.). Expenditures for each function include amounts for all types of expenditures serving the purpose concerned.

GENERAL EXPENDITURES: All expenditures of a government other than utility expenditures, liquor store expenditures, and insurance trust expenditures.

GENERAL REVENUE: All revenue of government except the kinds of revenue classified as utility revenue, liquor store revenue, and insurance trust revenue. All tax collections, even if designated for insurance trust or local utility purposes, are classified under general revenue.

GENERAL SALES TAXES: Sales or gross receipts taxes which are applicable, with only specified exceptions, to all types of goods and services or all gross income, whether at a single or at classified rates.

HEALTH: Health services, other than hospital care, including health research, clinics, nursing, immunization, and other categorical, environmental, and general public health activities. School health services provided by health agencies (rather than school agency) are included.

HIGHWAYS: Streets, highways, and structures necessary for their use; street lighting; snow and ice removal; toll highway and bridge facilities; and ferries.

HIGHER EDUCATION: Includes facilities and activities of all education institutions beyond the high school level operated by state or local governments, except agricultural experiment stations and agricultural extension services that are classed under natural resources, and university-operated hospitals serving the public that are classed under hospitals.

other instructional staff. Excludes attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education, includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations and farms.

HIGH SCHOOL GRADUATE: A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

INTEREST ON DEBT: Annual expenditures to pay interest only on long-term debt.

HOSPITALS: Establishment and operation of hospital facilities, provision of hospital care, and support of other public or private hospitals.

LIVE BIRTHS: Number of live births in the United States.

INDIVIDUAL INCOME TAX: Taxes on individuals measured by net income and taxes imposed on special types of income (e.g., interest, dividends, and income from intangibles).

NONINSTRUCTIONAL STAFF: In local schools includes administrative and clerical personnel; plant operation and maintenance employees; bus drivers; and lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria workers, and clerical and custodial workers in colleges and universities, hospitals, agricultural experiment stations and farms.

INSTRUCTIONAL STAFF: Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and

PERSONAL INCOME: State personal income is the current income received by residents of the states from all sources, including transfers from government and business, but excluding transfers among persons. It is a before-tax measure. The total includes both monetary and nonmonetary income of individuals and income received in kind. It also includes the investment income of nonprofit institutions serving individuals as well as the

investment income of private trust funds and private noninsured welfare funds.

POLICE PROTECTION: Preservation of law and order and traffic safety. Includes highway police patrols, crime prevention activities, police communications, detention and custody of persons awaiting trial, traffic safety, vehicular inspection, and the like.

PROPERTY TAXES: Taxes conditioned on ownership of property and measured by its value. Includes both general property taxes (i.e., relating to property as a whole, real and personal, tangible or intangible, whether taxed at a single rate or at a classified rate) and special property taxes (i.e., on selected types of property, such as motor vehicles or certain or all tangibles, subject to rates that are not directly related to rates applying for general property taxation).

PUBLIC WELFARE: Support of and assistance to eligible persons contingent upon their need. Excludes pensions to former employees and other benefits not contingent on need. Expenditures under this heading include cash assistance payments directly to needy persons under categorical and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other services provided under welfare programs; welfare institutions; and any intergovernmental or other direct expenditures for welfare purposes. Any services provided directly by the government through its hospital and health agencies are classed under those headings.

RESIDENT POPULATION: In addition to those who are residents of an area, also includes armed forces personnel who are stationed in the area.

REVENUE: Revenue receipts for public school purposes from LOCAL, intermediate, and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or Social Security on behalf of public school employees, for the purchase of materials for distribution to local school districts, etc. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

Revenue receipts from STATE sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or Social Security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Revenue receipts from FEDERAL sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for National Defense Education Act programs, for school lunch and milk programs, for educating American Indians in local public schools, and money derived from federal forest reserves and federal oil royalties. (No special effort is made to include amount of grants in kind, such as operation of the school lunch program).

REVENUE FROM OWN SOURCES: All revenue of a government (taxes and other) except intergovernmental.

SCHOOL-AGE POPULATION: Population age 5 through 17 inclusive (excluding armed forces abroad).

STATE PERSONAL INCOME: Aggregate or total income from all sources received by persons residing in a state.

TAXES: Compulsory contributions exacted by a government for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classed as insurance trust revenue. All tax revenue is classified under general revenue and comprises amounts received (including interest and penalties but excluding refunds) from taxes imposed by the recipient government. Amounts received by a government

from a tax it imposes are counted as tax revenue of that government, even though initially collected by another government; however, any amounts retained are treated as tax revenue of the collecting government. Tax amounts subsequently distributed to other governments are classified as intergovernmental transactions.

TEACHER: In local schools, includes personnel who teach on a regular basis or in specially allotted positions, i.e. teachers of vocational education, exceptional children, or other special category teachers.

TOTAL REVENUE RECEIPTS: Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; etc. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.
