## ABSTRACT

At Hudson County Community College (HCCC), in New Jersey, research on student attrition has included cohort specific studies of enrollment and completion patterns, enrollment pattern studies of instructional programs, and periodic surveys of enrolled students, former students, and graduates. A comparative analysis conducted of previous attrition research at HCCC revealed the following: (1) for 1989 entrants, the 1-year retention rate of full-time first-time students was 42%, up from 36% in 1987 and 1988; (2) the comparable retention rate for African American and Hispanic students among fall 1989 entrants was 37%; (3) in both 1984 and 1990, the culinary arts program showed the highest 1-year retention rate; (4) students admitted from 1983 to 1985 through the Educational Opportunity Fund program had lower retention rates than regularly admitted students, though their retention rates had improved dramatically by 1989; (5) overall, full-time students had higher retention rates than part-time students; and (6) the numbers of students transferring to senior institutions in New Jersey increased between 1987 and 1989. In addition to instituting more systematic studies of enrolled students, former students and graduates, HCCC will be conducting an in-depth study of enrollment, leaving, and completion patterns for selected cohorts of students who entered each term beginning in 1986. These cohorts will include both part-time and full-time students in English as a Second Language, basic skills, and full-degree-credit programs. A list of previous retention studies, detailed data tables, and a copy of a revised graduate follow-up survey are included. (PAA)

## FOREWORD

I am pleased to transmit this Special Report to members of the Hudson County Community College community.

There is probably no issue more important to community colleges as institutions and to the careers of community college students as is the issue of attrition. Opp and Colby, for instance, have concluded, "If attrition is measured in terms of the number of students who leave an institution before completing a degree, community colleges have the highest attrition rate of any segment of post-secondary education." (Ron Opp and Anita Colby, Improving Student Retention in Community Colleges, ERIC DIGEST, p.4).

Meaningful approaches to the problem of high attrition rates are dependent upon a solid research base. In this Special Report, Dr. Eleanor Fujita has provided the College community with a solid research base from which we can begin to develop such meaningful approaches. Through her systematic presentation and analysis of attrition-related studies conducted at the College, she has enabled us to gain significant insight into what we know and what we do not know about attrition at HCCC. As a result of this work, we are now in a position to develop "comprehensive and systematic across-the-institution research" called for in this report.

Mark Oromaner  
Dean for Planning and Institutional Research

## *STATUS REPORT ON THE STUDY OF ATTRITION AT HUDSON COUNTY COMMUNITY COLLEGE*

The study of attrition at a college is an effort to understand why students, once enrolled, leave for reasons other than graduation. The definitional issues of attrition are complex: some students leave to enroll in another college (transfers); others leave temporarily and return (stopouts); and others leave with their individual goals met (positive attrition). However, still other students leave with their goals unmet, either for personal exigencies or for reasons of institutional inadequacies (dropouts), or because they are unable to meet the academic standards (required to withdraw). Therefore, in defining attrition, two sets of distinctions must be made: the distinction between those students who leave for positive or negative reasons, and the distinction between individual-based and college-based reasons for leaving.

Once the complexity of the conceptual and definitional issues cited above are understood, a thorough comprehension of attrition is further compounded by the nature of the various curricula and by the preparation, goals, and circumstances of students enrolled in those curricula. However, a systematic study of student attrition should enable those of us at HCCC (a) to identify those phenomena (institutional and individual) that account for attrition and (b) implement policies, procedures, and practices that have a positive impact. The basic questions which must be answered are *who?*, *when?*, *why?*, and *what does it mean?*: *who* enrolls at the College and then either completes or leaves; *when and why* do students enroll and *when and why* do some students complete a program of studies while other students do not; and *what implications* do these findings have for individuals and the institution.

HCCC serves a diverse county of 550,000, and its mission is to meet the educational needs of this population through courses of study which prepare students for further education and for careers. The heterogeneity of the county's adult population manifests itself through diversity in educational preparation, educational and career goals, English language proficiency, age, socio-economic level, culture, race, and ethnic and national heritage. The substantial Academic Foundations (Basic Skills) and English as a Second Language programs are but two examples of the College's attempts to meet the special needs of present and potential students.

Ewell notes that "institutions of higher education are made up of significantly different types of students that behave in quite different ways. An effective research program should be able to identify, first, how many distinct behavioral groups of students exist at the institution, second, how large they are, and third, how they respond differently to different external conditions and policy changes."<sup>1</sup> As we inventory attrition analysis efforts

<sup>1</sup> Ewell, Peter T. *Recruitment, Retention, and Student Flow: A Comprehensive Approach to Enrollment Management Research*. NCHEMS Monograph #7. Boulder, Colorado: National Center for Higher Education Management Systems, 1985, p. 6.

at the College and identify research needs in this area, it is evident that Hudson County Community College personnel have carried out a number of systematic studies which can now be drawn upon and which identify distinct groups of students, the size of these groups over time and their enrollment patterns, e.g., continuing through graduation, leaving HCCC and failing to return, leaving HCCC and later returning (stopouts), etc. What is lacking is comprehensive and systematic across-the-institution research and a meta-analysis of these cohort-specific studies.

This report will discuss (1) the research which has taken place, (2) what needs to be done, and (3) what steps are currently being taken to respond to these needs (initiation of a systematic study of student attrition).

### Previous Research

The attrition research which has been carried out at the College is found in three forms:

- Cohort specific studies of enrollment and completion patterns carried out for information and planning purposes and/or for external reporting requirements (Appendix A gives a partial list of recent studies);
- Enrollment pattern studies conducted as a component of internal and external reviews of instructional programs carried out on a cyclical basis;
- Surveys of enrolled students, former students and graduates.

In addition, data on students transferring to other institutions is found in the sources mentioned above and in reports of DHE's Transfer Advisory Board.

With the exception of the surveys of graduates, most of these studies have been specific to particular programs or distinct groups of students, and herein lies both their strength and their weakness. By being specific, the studies have been useful at the local or program level in understanding the behaviors and needs of particular groups of students and in responding to them. But at the same time, by being specific, the studies have not always permitted for comparable analysis across the entire collegewide spectrum (cross-sectional studies) nor for comparable analysis over time (longitudinal studies).

The program reviews have been carried out systematically and consistently. Studies of the Basic Skills students and Educational Opportunity Fund program students have also been carried out with regularity, that is, on an annual basis. However, the institution-wide surveys of enrolled students, former students, and graduates have not been carried out in the past few years.

### Preliminary Review of Research

We have begun an inventory and comparative analysis of this previous research. (A partial list of the studies we have reviewed to date can be found in Appendix A.) A sample of the findings from a preliminary review of these studies appears below:

- For 1989 entrants, the overall one-year retention rate of full-time first-time students at the College was 42 percent, and the comparable rate for students who are African American or Hispanic was 37 percent. The overall one-year rate is up from 36 percent for similar groups who entered in 1987 and in 1988 (sources: (1) preliminary College Outcomes Evaluation Program (COEP) report, January 1990, (2) final COEP report, May 1991, and (3) institutional data profile, May 1992, all from the New Jersey Department of Higher Education);

- Among the programs of instruction, in both 1984 and 1990, culinary arts showed the highest one-year retention rate; childcare and human services had substantially increased retention rates during the same period and now have retention rates among the highest at the College (*see Tables 1 and 2, Appendix B*);

- Students admitted through EOF from the Fall of 1983 through the Fall of 1985 had lower retention rates than regularly-admitted students, but the retention rates appeared to have improved during that period, and have improved dramatically recently (*see Tables 3, 4, 5, 6, 7 and 11*);

- Students enrolled in Basic Skills courses had a lower retention rate than those not enrolled in Basic Skills courses (*see Tables 8 and 10-A*); however, this was dependent upon whether or not the students requiring remediation actually completed it during the four-semester period of the study: retention rates were higher among those students requiring and completing remedial (Basic Skills) courses than among those requiring no remediation, and dramatically higher than those who needed remediation but did not complete it within that period of time (*see Table 9*);

- Students enrolled full-time had a higher rate of retention than those enrolled part-time (*see Table 10-A*); however, this was dependent upon the time of attendance (day or evening) and the age of the student: (1) for those attending in the day, the rate of retention was higher for full-time students, but for those attending in the evening, the rate did not differ between the full-time and part-time students (*see Table 10-A*); (2) for those who were younger (particularly if they were under 25 years of age), the retention rate was higher for full-time students, but for students over 34 years of age the rate was higher for part-time students (*see Table 10-C*);

- Retention rates were generally highest for white students and lowest for Hispanic students, but this was dependent upon whether or not the students were enrolled in Basic Skills or ESL courses (see *Table 10-B*) or were admitted through the EOF program (see *Tables 3 and 5*);
- the number of students transferring from HCCC to New Jersey senior public colleges and universities increased between 1987 and 1989<sup>2</sup> with the majority of these students transferring to Jersey City State College, New Jersey Institute of Technology, or Rutgers University at Newark.

### Current Attrition Research

The Office of Planning and Institutional Research at HCCC has been re-established as of January 1992 with a Dean, a Director of Institutional Research (employed as of April 1992), and an administrative assistant (employed as of May 1992). Attrition/retention studies are a high priority on the agenda of this office.

In addition to the current inventorying and researching of studies conducted at the College, a plan has been developed and is being carried out which will provide better access to student data, allow for the identification of designated groups of students, and contribute to an understanding of why students either complete or leave their programs and Hudson County Community College.

### Access to Student Data

An analysis of computer needs was made, and it was concluded that the Office of Institutional Research needed access to student record data on the College's mainframe computer. The College purchased a large-capacity personal computer with an internal modem which arrived in late June. Arrangements are currently being made to connect the computer to the mainframe through a dedicated computer line. And in order to enter, access, analyze, and present data, a laser printer and the following computer software was purchased: Paradox, SPSSPC with Statistics, Advanced Statistics and Tables options, and Graph-in-a-Box.

The College has purchased a new mainframe computer which will allow for wider institutional access to student enrollment data; this upgraded machinery is scheduled to be installed during this fall semester.

<sup>2</sup> "Report of Trends in Enrollment of Transfers: New Jersey Public Institutions, 1987-1989, Part I," Transfer Advisory Board, New Jersey Department of Higher Education, February 1991, Table 3.

## *Identification of Designated Groups*

The enrollment, leaving, and completion patterns of students entering each term beginning in September 1986 will be studied. Although many variables will ultimately be included in the analysis (the variables under current consideration have been planned using suggestions by Ewell, as cited, and Palmer<sup>3</sup>), initially two primary variables have been identified as distinguishing designated groups. This is in line with suggestions made by Ewell that "in most cases, the bulk of an institution's undergraduate enrollment is best organized when it is categorized into no more than 8 to 10 groups."<sup>4</sup>

The primary variables are attendance status (full-time and part-time) and academic preparation (ESL, Basic Skills, Fully-Degree-Credit<sup>5</sup>). The following six groups of entering freshman will be constructed:

- ESL students enrolled on a full-time basis
- ESL students enrolled on a part-time basis
- Basic Skills students enrolled on a full-time basis
- Basic Skills students enrolled on a part-time basis
- Fully-Degree-Credit students enrolled on a full-time basis
- Fully-Degree-Credit students enrolled on a part-time basis

These groupings appear simple, but in fact there is much complexity within each group and these complexities will be explored (e.g. ESL or Basic Skills students taking only ESL or Basic Skills courses as against those taking a mixed course load). Within each group the role of personal and educational characteristics will be explored, that is, multivariate analyses will be conducted.

For each of these groups we will identify *who* remains in each program to completion and who leaves, and *when* they either leave or complete the program. This means that we will be paying close attention to which students enter and complete the ESL component; which students move from ESL to either Basic Skills or degree courses and how long it takes them to move through the sequence; which students begin in Basic Skills courses and who remains and moves to degree courses; and which students begin degree courses upon

<sup>4</sup> Ewell, p.18.

<sup>5</sup> Fully-Degree-Credit students are those who are not required to enroll in English-as-a-Second-Language or Basic Skills courses.

entrance, whether they remain or leave, and how long it takes them to complete their programs or when they leave before completing.

### *Understanding Why Students Enter and then Complete or Leave*

In order to understand *why* students enter and then either complete or leave, we are re-establishing an annual schedule of institutional-wide surveys. These will include surveys of enrolled students, former students and graduates. In each case, we are reviewing our informational needs and examining former questionnaires used by the College together with samples from other community colleges in order to arrive at a final questionnaire.

Of the three surveys, that of graduates has been scheduled first. The College's questionnaire was revised during June and was sent July 30, 1992 to the 163 alumni who graduated in either June or August of 1991 (*see Appendix C*). A second wave was sent to those who did not respond by the September 7 deadline.

The graduate questionnaire has not been sent out in several years. To gather information from alumni who graduated from 1986 through 1990, the graduate questionnaire has been further revised to make it appropriate to send it to these earlier graduates, and it will be sent in late September or early October to the nearly 900 alumni who graduated during those years. Both questionnaires are being sent with a cover letter co-signed by the Office of Planning and Institutional Research and the Office of Student Affairs.

The surveys of both enrolled and former students is planned for later in the academic year. First, we will decide who will be surveyed in each case; that is, for "enrolled students" we will decide whether we will survey all enrolled students, a sample in each of the designated groups, or all students who entered as freshmen in the Fall of 1992, and for "former students" we will decide what period of time out of the College defines the student as a former student. This decision will be reached in consultation with the offices of student and academic affairs and will also be based on an analysis of the results of the graduate student responses. Once we have decided who constitutes each of these groups we will revise the questionnaires accordingly.

The responses of each survey will be analyzed according to the designated groups identified earlier in this report, and the results will be shared widely on campus.

The analysis of the responses will contribute to a further understanding of *who* leaves and who completes, will provide a base for understanding *why* students either leave or complete their program, and will contribute to a review of institutional policies, procedures, and practices.

## Conclusion

Many studies have been carried out over the years at the College. These documents, systematically analyzed, provide a great deal of information regarding the attrition and/or retention of students at HCCC. This report is the first in what the Office of Planning and Institutional Research intends to be a series of reports to the college community on the analysis of retention and attrition at Hudson County Community College.

APPENDIX C

HCCC COLLEGE FOLLOW-UP QUESTIONNAIRE FOR GRADUATES

# HUDSON COUNTY COMMUNITY COLLEGE

## College Follow-up Questionnaire

IF LABEL NEEDS CORRECTION, PLEASE INDICATE BELOW:

Name \_\_\_\_\_

Address \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_

July 1992

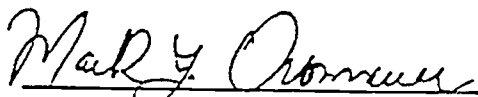

Dear Graduate:

*Congratulations on successfully completing your program of study at Hudson County Community College. We hope that in the year since graduation, you have found new and exciting challenges for yourself.*

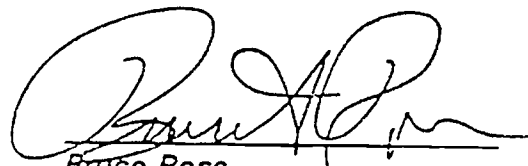

*In order to help improve the academic programs and services available to current and future students, each summer we conduct a follow-up survey of graduates from the previous academic year. Your comments and answers are strictly confidential and will not be identified with you personally in any way. All data will be used solely for the purpose of institutional improvement.*

*Please take the time to complete the enclosed questionnaire and return it in the envelope provided. Thank you for your assistance and your continued interest in your alma mater, Hudson County Community College.*

Sincerely,

Mark J. Oromaner,  
Dean of Planning &  
Institutional Research

Bruce Rose,  
Dean of Student Affairs

PLEASE CHECK APPROPRIATE BOX WITHIN EACH CATEGORY

SECTION A

Everyone Should Answer This Section

1. Which statement best describes your primary objective for first attending HCCC?  
(Check only one objective)

- To improve job skills :
- To prepare for first career
- To prepare for career change
- To complete courses for transfer credit
- To take courses for personal interest
- Other \_\_\_\_\_

2. Did you achieve your primary objective by the time you left HCCC?

- Yes     No

3. How would you rate the following services at HCCC in terms of how they met your individual needs as a student?

	<u>Excellent</u>	<u>Good</u>	<u>Average</u>	<u>Fair</u>	<u>Poor</u>	<u>Didn't Know Existed</u>	<u>Knew About But Didn't Use</u>
a. Academic Advisement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Admissions	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Counseling	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Classroom Instruction	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Financial Aid	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Job Placement Assistance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Transfer Advisement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Library/Learning Resources Center	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
i. Registration Procedures	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
j. Student Activities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
k. Quality of major course instruction	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
l. Tutoring Services	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
m. Other (please state)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
_____							
_____							

---

- SECTION B

1. Have you enrolled in another college since your graduation from HCCC?  
 Yes (Complete this section)       No (Skip to Section C)

2. Please indicate your current status.  
 Part-time student (less than 12 hours)  
 Full-time student (12 or more hours)  
 No longer attending

3. What is the name of your current (or most recently attended) college?

Name \_\_\_\_\_  
City and State \_\_\_\_\_  
Curriculum/Program \_\_\_\_\_  
Credits Achieved (number) \_\_\_\_\_

4. Did you have any of the following problems transferring to the college indicated above?  
(Please check all that apply).

Transferring credit hours  
 Transcript problems  
 Admission problems  
 Other (describe) \_\_\_\_\_  
 None

5. How many credit hours earned at HCCC were accepted at the college indicated above?

\_\_\_\_\_ Credit Hours  
(Please fill in number)

How many credit hours were not accepted? \_\_\_\_\_

Please list specific courses not accepted: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

6. How would you rate the courses you completed at HCCC in terms of how well they prepared you for continuing your education?

Excellent	Good	Average	Fair	Poor
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

---

SECTION C

1. What is your current employment status?

Employed full-time (Complete this section)  
 Employed part-time (Complete this section)  
 Not employed at this time (Skip to Section D)

SECTION C

continued...

2. Is your present job related to the program of study you completed at HCCC?

- Yes, directly related
- Yes, somewhat related
- No

If no, why not? (Please check all that apply)

- Transferred to a four-year college
- Not sufficiently qualified for a job in my field of college preparation
- Preferred to work in another field
- Found better paying job in another field
- Could not find a job in field of preparation
- Worked previously in field of preparation, but changed jobs
- Other (describe) \_\_\_\_\_

3. Please provide the following information.

Job Title \_\_\_\_\_  
Name of Employer \_\_\_\_\_  
Street Address of Employer \_\_\_\_\_  
City \_\_\_\_\_ County \_\_\_\_\_  
State \_\_\_\_\_ Zip \_\_\_\_\_

4. When did you get your current job?

- Before entering HCCC
- While attending HCCC
- Within 3 months after graduation from HCCC
- More than 3 months after graduation from HCCC

5. How useful is the training you received at HCCC in performance of your current job?

- Extremely useful
- Very useful
- Useful
- Somewhat useful
- Not useful

6. Please check below if the program of study at HCCC helped you in any of the following ways:  
(Please check all that apply)

- Helped to obtain a job
- Helped performance on present job
- Helped get a promotion or raise
- Other (describe) \_\_\_\_\_

---

- SECTION C

continued...

7. Please indicate your approximate annual salary, excluding overtime and other part-time jobs, for your primary job listed in Question C-3.

- Below \$15,000
- \$15,000 - \$19,999
- \$20,000 - \$24,999
- \$25,000 - \$29,999
- \$30,000 - \$34,999
- \$35,000 - Up

8. Through what source did you first hear about this job?

- College Placement Office
- An employment agency
- A newspaper advertisement
- Through Co-op program
- A friend or relative
- College faculty or staff member
- Other (please specify) \_\_\_\_\_

9. May we have your permission to send your supervisor a questionnaire regarding how well graduates of your program perform on the job?

- Yes                       No

If yes, please supply the following information about your supervisor:

Name \_\_\_\_\_ Title \_\_\_\_\_  
Company and Address (if different from Question 3)

\_\_\_\_\_  
\_\_\_\_\_

---

SECTION D

To be answered by everyone

1. What was your highest level of education prior to entering HCCC?

- Less than high school graduation
- Received G.E.D.
- Received high school diploma
- Completed some college work
- Received associate degree
- Received bachelor's degree
- Other, please specify \_\_\_\_\_

2. What was your academic program at HCCC? \_\_\_\_\_

SECTION D

continued...

3. Which degree or certificate did you obtain from HCCC?  
 AAS     AS     AA     Certificate
4. How many years did you attend HCCC prior to graduating? \_\_\_\_\_
5. Did you take any English-as-a-Second-Language courses at HCCC?  
 Yes         No
6. Did you take any Basic Skills (Academic Foundations) courses at HCCC?  
 Yes         No
7. Would you recommend HCCC to prospective students?  
 Yes         No
8. What was your marital status while you attended HCCC?  
 Single     Married     Separated     Divorced     Widowed
9. How many children did you have at the time you were attending HCCC? \_\_\_\_\_
10. Did you have a permanent handicap or were you permanently disabled while you were a student at HCCC?  
 Yes         No
11. What is your ethnic/racial heritage?  
 African American, Non-Hispanic  
 American Indian or Alaskan Native  
 Asian or Pacific Islander  
 Hispanic  
 White, Non-Hispanic
12. What is your gender?  
 Female         Male
13. What is your age? \_\_\_\_\_
14. Are you a non-resident alien?  
 Yes         No

---

- SECTION D

continued...

15. We would appreciate any comments regarding how we could improve the courses and services available to students at HCCC or how the College could further assist you. (Please feel free to use an additional sheet if necessary)
