ABSTRACT

This unit contains lesson plans designed to teach first aid skills to adults with limited language skills. The lesson plans were developed, using the Laubach literacy method, for a workplace literacy project in Anchorage, Alaska. The lesson plans, which are correlated with the book, "You Can Give First Aid," include conversational skills (dialogue, vocabulary, and structure) related to injuries, choking, poisoning, burns, broken bones, minor wounds, and other problems for which employees should know how to give first aid and call for help. An extensive directory of information on providers of emergency services and other resources is included in the unit. (KC)

Reproductions supplied by EDRS are the best that can be made from the original document.
