Credentialing

ABSTRACT

Increasing demands on educational administrators have made it essential to assess the programs that prepare them for their positions. The California Commission on Teacher Credentialing has identified essential school administrator skills. A study of California school administrators gauged how well preparation programs readied them for school administration. Fifteen hundred surveys were mailed at random to administrators; of this total 477 were returned, and of those, 300 were returned by elementary administrators, 82 by middle/junior high administrators, and 95 by administrators of high schools. The surveys covered several areas of educational administration: leadership, educational improvement, personnel, school-community relations, legal and financial matters, governance and politics, school management, organizational issues, instructional leadership, evaluation, professional and staff development, school law and political relations, fiscal management, human and material resources management, and cultural and socioeconomic diversity. Only the surveys returned from elementary school administrators were judged statistically valid. Administrators felt best prepared in the legal framework of American education and public schools, and financing public schools. Administrators felt least prepared in special program funding and laws, adult education, meeting limited-English-proficient student needs, building and materials planning, and computer technology. The majority of administrators also felt that university faculty who are also practicing administrators in public schools were best suited to teach administrator education programs. A sample survey is appended. (JPT)

Introduction

There are many challenges which face educators in the State of California. With increasing demands placed on education administrators, it is essential to determine both the quality and effectiveness of programs being offered to individuals in pursuit of becoming successful education administrators. The most noted agency which identifies skills needed for education administrators to successfully meet this challenge, the California Commission on Teacher Credentialing, has identified specific competencies which when met, are designed to assist these professionals in successfully doing their job.

Currently, there exists a program designed in two tiers. Institutions of higher education providing both the preliminary and professional tier are required to include within their curriculum the competencies specified by the Commission. The responsibility of maintaining a superior academic program requires research and intense investigation in order for this commitment to be realized.

National University is dedicated to pursuing research in an effort to determine whether or not our current academic program in education administration is not only fulfilling the requirements of the commission, but also is meeting the needs of the individuals in the state who are actually doing the job of education administrators. This project is devoted to this mission.

Statement of the Problem

The purpose of this study is to determine how well practicing administrators in the State of California feel their courses in institutions of higher education prepared them for their current position as education administrators.

Assumptions of the Study

- 1. It is assumed that the administrators will participate in the study and demonstrate a sincere attempt to respond to the survey.
- 2. It is assumed that the survey will be completed by the participants without consultation with other participants.

Design, Time Period, and Execution Plan

The objective of this research is to duplicate an original pilot study for the purpose of measuring the opinion of elementary, middle/junior high school, and high school administrators on how well their courses in higher education prepared them for their current administrative positions as site administrators.

The description of the instrument used in this study is a seventy-three item questionnaire designed to identify all of the competencies currently identified by the Commission on Teacher

-2-

Credentialing in both the Preliminary Administrative Services Credential Program and the Professional Administrative Services Credential Program. Respondents to the instrument were instructed to give their opinion on each of the items on a three point response scale of "Not Well", "Somewhat", and "Very Well". addition to the seventy-three item questionnaire, there are three additional items to the questionnaire and they include: (1) administrative credential do you posses? (2) What is your current position, and (3) If you had a preference, would you prefer that education administration courses be taught bу practicing administrators in public school or higher education faculty who are not currently practicing administrators in public schools?

Various areas of commonality are considered in the questionnaire and competencies are directly linked to categories identified by the Commission. Although not identified in the survey, as not to confuse the respondents, these areas include for the Preliminary Tier:

- l. Educational Leadership
- 2. Improvement in the Educational Program
- 3. Management of Educational Personnel
- 4. School-Community Relations
- 5. Legal and Financial Aspects of Public Education

- 6. Educational Governance and Politics
- 7. School Management

Areas for the Professional Tier include:

- 1. Organizational Theory, Planning, and Application
- 2. Instructional Leadership
- 3. Evaluation
- 4. Professional and Staff Development
- 5. School Law and Political Relations
- 6. Fiscal Management
- 7. Management of Human and Material Resources
- 8. Cultural and Socio-Economic Diversity

The plan to execute this survey process included the following (1) Duplicating the survey developed for the original research project, (2) Distributing at random, fifteen hundred surveys to practicing administrators throughout the State of California, (3) Collecting and evaluating the data, and (4) Finalizing the results.

The time period for this second project was nine months.

Surveys were not mailed to those respondents who participated in the original research study.

Demographic Data

Fifteen hundred surveys were mailed to administrators, at random. Of the fifteen hundred surveys distributed, a total of four hundred and seventy-seven were returned. Of the four hundred and seventy-seven, three hundred were returned by elementary administrators, eighty-two by middle/junior high school administrators, and ninety-five by high school administrators.

Administrators who held clear credentials numbered four hundred twenty-five, preliminary credentials numbered forty-four, other numbered five, no response numbered three. Eighty-seven percent (87.4%) preferred practicing administrators teach courses in education administration, eighteen percent (18%) preferred non-practicing administrators, six percent (6.5%) preferred a combination, and (2.3%) did not respond.

Results

For the purpose of this study, the findings will be limited to elementary school administrators as the respondent number is adequate for statistical generalizability. The number returned by middle/junior high school and high school administrators does not comply with a population justifying generalizability.

-5-

The findings will be recorded as follows. In response to the question: How well did your education courses in higher education prepare you for....?, the categories of "Very Well Prepared", "Somewhat to Very Well", "Somewhat", "Somewhat to Not Well" and "Not Well", will be reported. The deciding factor to place responses in designated categories is contingent on the fact that a majority of the respondents were of the same opinion on how well they felt education courses in higher education prepared them for their current administrative positions.

Please note that although the graphs reflect data from all three grade levels, the only significant findings, that of the elementary school administrators, will be summarized in this portion of this research project.

Elementary School administrators felt "Very Well" prepared in the following:

- 1. The historical and current legal framework of American Education and Public Schools.
- 2. Financing Public Schools in America; ie. (A) Historical and current sources and types of funding; (B) District-level funding and budgeting; and (C) Financial implications of personnel contracts and obligations.

-6-

Elementary School Administrators felt "Somewhat to Very Well" prepared in the following:

- 1. Concepts of Leadership
- 2. The Administrators role in group processes; ie., self-evaluation procedures, fundamentals of human relations, and professional ethics
- 3. Major movements in American curriculum and instruction as a basis for contemporary instructional patterns
- 4. Principles of human growth, development, and learning
- 5. General concepts and principles of personnel management
- 6. Fundamental concepts of authority, power, and influence
- 7. The governing roles of federal, state, and local agencies
- 8. Functions of schools boards and district administration in governance and policy making
- 9. Learning and instructional research and theory
- 10. Educational trends and issues
- 11. Evaluation of teaching effectiveness
- 12. The legal framework of national, state, and local schools, to include statutory and constitutional provisions pertaining to equal access to public education
- 13. Political jurisdictions and bodies that make and/or affect state and local educational policy

-7-

- 14. The application of established legal principles to policies and practices at the local school and district level
- 15. School district-level funding and budgeting

Elementary School Administrators felt "Somewhat" prepared in the following:

- 1. Inter and intra organizational decision making processes and techniques
- 2. Concepts and procedures related to total development of a school climate which promotes pupil learning
- 3. Fundamentals of short-term and long-range planning
- 4. Procedures for curriculum development and implementation
- 5. The roles of the school, parents, and the general community in the educational process
- 6. Developing, implementing, and evaluating goals, priorities, policies, and practices
- 7. Communications: ie., modes, policies, effects.
- 8. The theory and functions of human organizations as independent social entities within American society
- 9. Management strategies designed to achieve goals and objectives.
- 10. Human relations and the dynamics of groups
- 11. Current and emerging needs of society for the improvement of

-8-

school curriculum and practices

- 12. Evaluation of program and/or curriculum effectiveness
- 13. Evaluation of staff performance
- 14. Evaluation of pupil achievement
- 15. Current problems affecting school financing on state and local levels
- 16. Political forces that directly or indirectly have effect upon school practices
- 17. Sociological forces that directly or indirectly have effect upon school practices
- 18. Financial effects of personnel and other contractual obligations

Elementary school administrators felt "Somewhat to Not Well" prepared in the following:

- 1. The appropriate roles of staff, parents, pupils, and the community in curriculum development
- 2. Supervision and evaluation of curriculum and instruction, ie.
- (A) Curriculum, including racial, cultural, and sex factors, (B) Teaching and other instructional processes; and (C Pupil achievement
- 3. Appropriate use of resources-human, fiscal, and other

-9-

- 4. Concepts and techniques of staff development
- 5. Concepts and procedures related to direct services to pupils
- 6. Principles and processes for supervision and evaluation of certificated and classified staff
- 7. Identifying and working with community influence groups
- 8. The roles of professional organizations and unions
- 9. The roles of emerging groups and forces
- 10. The use of data collection procedures in school management
- 11. Principles of management of office, plant, and ancillary services
- 12. Procedures for pupil and staff conflict-resolution
- 13. Structuring and leading groups in a variety of organizational settings, to include school boards, parent and community groups, staff groups, and regional and state organizations
- 14. Strategies to meet diverse pupil needs
- 15. Conditions that result in low or high level pupil learning outcomes
- 16. Effective means to compare classroom, school, and school district instructional goals to outcomes
- 17. Theory and applications in achieving compromise, consensus, and coalitions to achieve educational goals
- 18. The organization and functioning of school district business

services departments

- 19. Effective staff utilization patterns which combine the needs and abilities of staff, organizational constraints, and available resources
- 20. Developing and implementing effective personnel policies
- 21. Short and long term planning procedures for filling staff needs
- 22. Concepts of cultural values and language diversity
- 23. Principles and procedures for involving all parents and other family members in school activities and in reaching educational objectives

Elementary School Administrators felt "Not Well" prepared in the following:

- 1. Implementation procedures for state and federal mandated special programs and procedures
- 2. Fundamentals of affirmative action, recruitment, selection, assignment, and dismissal of staff
- 3. Personnel relations; ie. (A) Fundamentals of collective bargaining, (B) Interpreting employment contracts, and (C) Working with a variety of formal and informal employee groups
- 4. Techniques and procedures for working with community agencies,

-11-

school site, councils, and other quasi-governing bodies

- 5. Application of computers and other technology
- 6. Procedures for stress management
- 7. Computer technology applied to instructional practices
- 8. Evaluating the role and effectiveness of specially funded programs
- 9. Collecting planning with other administrators and participants for instructional strategies for adult learners
- 10. The application of knowledge of the functioning of organizations to adult learning and performance
- 11. Means to integrate organizational goals specific programs of adult learning
- 12. Sources of funding to carry out staff development
- 13. Short and long range planning procedures for filling needs for building, equipment, and supplies
- 14. The general ethnic, racial, and religious composition of the state and specific composition of the local community
- 15. Programs and procedures for meeting the instructional needs of limited-english-proficient pupils

This completes the narrative results of the survey. Bar graph summaries follow in order to provide effective visual summaries.

Needs of L.E.P. Pupils

Summary of Results

The value of research is in knowing what to do with the information once it is determined that statistically the findings are both valid and useful. In summarizing the results, it will be most beneficial in this case if we concentrate on what we need to improve upon and how we might accomplish this task. Furthermore, it is important to note the delimitations of this research process in order to more fully appreciate the findings while keeping the data in perspective.

Specifically, some of the respondents added comments to the survey instruments and informed the author that in some cases, coursework had been taken as long ago as twenty years. Thus, the response to the survey suggesting that higher education courses had not prepared them for their current position, in these cases, could also be interpreted to mean that either the curriculum did not reflect today's competencies needed for today's practicing administrators, or the respondents might not have been able to recall the content of their coursework due to the fact that they had attended classes so long ago.

In either case, the following summary specifically identifies the areas that the respondents felt that they were "Not Well" prepared in addition to their preference to who should teach the education administration courses.

-91-

Currently practicing elementary school administrators felt least prepared in the following areas:

- 1. Funding and laws regarding special programs
- 2. Issues related to the adult learner
- 3. Meeting the needs of limited english proficient pupils
- 4. Planning procedures for building, equipment, and supplies
- 5. Issues related to computer technology

In regard to the respondents preference on who should teach the courses in education administration, an overwhelming majority of the respondents, 87.4% preferred that university faculty who currently practice education administration in public schools, teach the courses in education administration.

Implications for Further Investigation

It is beneficial to take a serious look at what can be done further in terms of extrapolating the efforts of this research project for the purpose of developing additional studies in order to improve the quality of our programs and services. Specific to the Commission on Teaching Credentialing, this information should be useful in demonstrating an overview of how elementary school

-92-

administrators in the State of California feel about how effective institutions of higher education are in providing academic programs to students of education administration. Furthermore, the preference on "who should teach" the courses should be noted. The 87.4% reflected in the outcome of this study of those respondents preferring practicing administrators as teachers, is 87.4% of the total return of four hundred and seventy-seven surveys. In other words, four hundred and seventeen respondents are represented by this percentage. This is a significant percentage of the returns.

The primary purpose of this research project however, is in determining the short and long term impact it will have on National University's program in Education Administration. It is the authors intent to examine the results more closely, consult with colleagues, and create a strategy which realistically and earnestly responds to the survey.

The goal is to improve the academic quality of the program in addition to sharing the information with colleagues at other institutions of higher education so that more students might benefit. Additional outcomes of this effort will be realized in the future and documented as a follow-up in order that the process continues to assist in improving our academic program.

Further investigation might also include pilot surveys in individual school districts for the purpose of determining staff

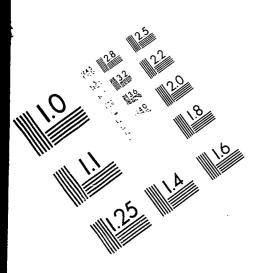

development and professional growth needs for specific school administrators. For example, this survey might be distributed with modification in the primary question to read: Do you feel you need staff development in the following areas?

Conclusion

Research has value if it is utilized to improve programs and promote the commitment that we make to students. Whether in formal or informal settings, it is the responsibility of institutions of higher education to continue to produce documents which assist in program development, short and long range planning, and in providing a network of information which benefits our clientele. This is an awesome responsibility and an important part of what we do.

Our contributions must be forthright and beneficial to not only our students in institutions of higher education, but for those individuals who by other means, seek to improve their skills and consequently enhance their personal and professional identity.

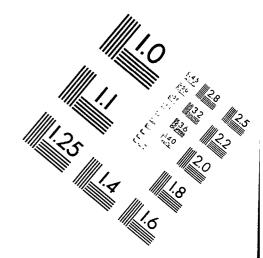

Hopefully, this project helped to accomplish this mission, and also assisted in recognizing the unlimited responsibilities that we in institutions of higher still must face.

APPENDIX A - SAMPLE SURVEY

Dear Site Administrator:

1.

I am currently involved with a program in educational administration that prepares teachers to become administrators and administrators to secure their clear administrative services credential.

I need your assistance in improving our program as well as sharing important feedback from this survey with other universities in the state. Please take a moment to fill out this form.

Your input is greatly appreciated.

| □ Preliminary Administrative Services Credential □ Clear Administrative Services Credential 2. What is your current position? | | | |
|---|--|--|--|
| | | | |
| 2. What is your current position? | | | |
| What is your current position? | | | |
| □ Elementary School Principal | | | |
| □ Middle School/Jr. High Principal | | | |
| □ High School Principal | | | |
| Other | | | |

What administrative credential do you possess?

- 3. If you had a preference, would you prefer that education administration courses be taught by:
 - Practicing Administrators in Public Schools
 - Higher education faculty who are not currently practicing administrators in public schools.
