ABSTRACT

This publication presents the data from a survey of salaries of student affairs administrators at colleges and universities nation-wide in 24 tables. Of the 1,090 questionnaires mailed, 544 (49.9 percent) were returned. The data are presented in descriptive form with negligible interpretive narrative. Section I contains demographic information by region, institutional classification, institutional support, institutional enrollment, and salary determination methods. Section II presents information about the Chief Student Affairs Officers regarding their areas of responsibility, benefits received, and age clustering. Section III provides composite data for all student service positions in this study with respect to gender, education level, length of time in position, length of time at institution, and ethnic background. Section III also provides salary figures for each of the positions included in the study. (JB)

NASPA SALARY SURVEY RESULTS 1991-92

PREFACE

The NASPA Research and Program Development Committee, as a part of its continuing commitment to serve the chief student affairs officer, completed the sixth NASPA Salary Survey of member institutions during the 1991-92 academic year. Of the 1,090 questionnaires mailed, 544 (49.9%) were returned with the use of a follow-up reminder. When compared to the 1989-90 NASPA Salary Survey, the 1991-92 NASPA Salary Survey has a few additional categories and variables. One major change was the use of full-time equivalent enrollment quantities in the presentation of the salary analysis as compared to the use of head-count enrollment aggregates in the 1989-90 NASPA Salary Study. It is the researchers opinion that full-time equivalent data is more functional and reliable in making comparisons across institutions.

The data presented in this report are in descriptive form with negligible interpretive writing. There are three sections to this report. Section I contains demographic information by NASPA region, institutional classification, institutional support, institutional enrollment, and salary determination methods. Section II presents information about the Chief Student Affairs Officers regarding their areas of responsibility, benefits received, and age clustering. Section III provides composite data for all student service positions in this study with respect to gender, education level, length of time in position, length of time at institution, and ethnic background. Section III also provides salary figures for each of the positions in this study.

The NASPA Division of Research and Program Development would like to extend its sincere appreciation to all who participated in the 1991-92 salary survey. We also wish to acknowledge the College of Education, Dr. Daniel Robinson, and Dr. Larry Ebbers at Iowa State University for their support and assistance in the preparation of this report. The Chief Student Affairs Officers were asked to check the statement which best described how the majority of the salaries at their institution were determined. Listed below are the methods used to determine the salaries for the student services positions:

One. The salary or salary range is determined according to an established university-wide position and salary classification schedule.

Two. The salary or salary range is determined according to a statewide or system-wide position and salary classification schedule.

Three. The salary or salary range is determined by the institution; it is not predetermined by an established salary classification schedule.

Four. Other.

In conclusion, this ongoing service to chief student affairs officers will continue with additional analytical reports. We would like to remind individuals using this report that the information presented here may vary from other sources. Our information may not concur with other sources because the individuals providing information differ, this cross sectional analysis is only of NASPA member institutions, and the time period and term for which the information is reported is different from source to source. We do hope that the information we provide is useful to you. We would appreciate your continued support.
