ABSTRACT

This 1993 fact book provides historical and current information concerning the University of Alaska at Fairbanks. The book provides academic and assessment data, student enrollment data, and information on faculty and staff, financial budgets, research and public services, and educational facilities. Historical data includes, beside the institution's mission statement, information on the school's accreditation, administration, alumni association, international agreements, organizational structure, Board of Regents membership, principal research units, and existing interdisciplinary research programs. Statistical data, charts, and graphs comprise over 70 percent of the publication and provide detailed breakdowns that include the types and numbers of degrees conferred; comparative analyses of student population and faculty demographical data; tuition, fees, donations, and details on other areas of financial support for both the students and the institution; and descriptive details of the school's buildings and space allocations. Message From The Chancellor

March 1993

The 1993 Fact Book continues to provide the facts that detail progress at the University of Alaska Fairbanks.

The past year was filled with a wide range of 75th anniversary events. Faculty, staff, students, and alumni took pride in showing off their accomplishments and expertise.

Enrollment growth is a good indication for the future. UAF is steadily expanding research activity, providing a stable industry that stimulates the economy of many communities in the state.

Strategic Planning Leadership completed its task and has asked the UAF community to help refine our vision for the year 2000. With that in place in 1993, UAF should be well positioned to meet increased challenges and grab a hold of opportunities that mesh with our plan for the future.

Chancellor Joan K. Wadlow

Preface and Acknowledgments

The 1993 edition of the *Fact Book* represents our continuing commitment to provide a reliable source of information about the University of Alaska Fairbanks. The *Fact Book* can be used as a convenient reference for answering some of the most frequently asked questions about our institution. By examining these historical and current data, we can better anticipate and plan for the future, promote enhancement of academic programs and facilities, and provide service to the citizens of our state.

Significant changes and additions have occurred in this third edition of the *Fact Book* due to the type of information needed this past year for the UAF budget planning effort, continuing TQM projects, implementing the strategic plan, and research initiatives from the Chancellor. Taken together, these additions will make the information in the *Fact Book* even more relevant in the upcoming year.

Our sincere appreciation is extended to the many individuals throughout the UAF community and the State who contributed to the production of this *Fact Book*.

We are confident that the administration, faculty, staff, students, alumni, and friends of the University will find this publication a convenient, authoritative, and valuable reference of general and statistical information about UAF. Putting this material together involved many judgments as to the inclusion, exclusion and form of presentation. We therefore welcome any suggestions you may have for improving future editions.

Thomas Gaylord
Associate Vice Chancellor

A Basis in Law

The University of Alaska is a constitutionally established state university. The pertinent sections of the Alaska Constitution are cited here.

ARTICLE VII

HEALTH, EDUCATION AND WELFARE

Section 2

The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Section 3

The University of Alaska shall be governed by the Board of Regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the Legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

Institutional Mission

The University of Alaska Fairbanks was established in 1917 as the Alaska Agricultural College and School of Mines. Today, as a comprehensive land-, sea-, and space-grant university, the multi-campus University of Alaska Fairbanks exists as a vital state resource to teach, to inquire and to serve.

The University of Alaska Fairbanks offers instructional programs covering a broad postsecondary spectrum and is the major research center for Alaska. The university is committed to providing a free and open forum where ideas and issues may be professionally pursued and frankly debated in an environment of mutual respect and intellectual integrity. It seeks to provide an intellectually stimulating learning process which is culturally sensitive and empowering to its students. The university is committed to assuring that its graduates receive a balanced education in the arts, humanities, natural and social sciences through which creativity is fostered and historical and philosophic perspectives are gained. As a result, the state benefits from an educated citizenry capable of the independent pursuit of further learning, of contributing to the economic well being of the state and nation and of participating in and contributing to global society. The university seeks a culturally diverse environment that values and promotes equal treatment of sexes, races, cultural and ethnic groups throughout its academic programs, student body, faculty and staff. The University of Alaska Fairbanks as a residential institution of higher education serves students from all of Alaska as well as from other states and nations. It is particularly committed to enhancing educational opportunities for Alaska's rural and native

Institutional Mission (continued)

populations. Through its branch campuses in Bethel, Kotzebue and Nome and its rural education centers, the University is responsive to local and regional needs, including open educational access to its programs. Special strengths exist in the use of educational technology which provide for the distance delivery of selected programs to many areas of the state. In seeking to serve a broad array of students, admission to several associate degree and certificate programs is open to all. Admission requirements to all baccalaureate and graduate programs as well as some Associate of Applied Science degree programs vary depending on the specific field of study.

The University of Alaska Fairbanks offers developmental programs and certificate, associate, baccalaureate and graduate/professional programs in the arts, sciences, career fields and professions. It is a center for graduate education and is Alaska's only doctoral granting institution. It possesses unique strengths in the physical and natural sciences and offers a broad array of engineering programs with a particular emphasis on the stresses of northern environments. UAF is a major center for the study of natural resources including minerals, forestry, wildlife, geology, agriculture, fisheries and ocean sciences and their associated economics. It has been recognized for its work in multi-cultural understanding, rural health problems, and cross-cultural interaction in the human service professions.

As a major center for research and scholarship, the University of Alaska Fairbanks is committed to the mutual enhancement of teaching, research and creative activity, and public service. Scholarship which produces new knowledge instills a vigor into teaching which in turn stimulates inquiry and the quest for further answers to the unknown. The university seeks to use its particular location in the north as a natural laboratory for the study of questions and issues, whose solutions are not only applicable to Alaskan problems but to a broader understanding of our global community. As part of a network of state research universities, this institution has an active program of basic and applied research resulting in a well earned national and international reputation. Specific recognition has been achieved in space physics, marine science, and high latitude biology, environmental sciences, engineering and geophysics. The university has recognized programs in definition, exploration, development and management of Alaska's renewable and nonrenewable resources. It is the state's center for study of Alaska Native cultures and languages.

Through its Cooperative Extension Service and Marine Advisory Program, research results are interpreted and transferred to people of the state. Its continuing education programs extend the expertise of the university to adult learners needing alternative learning opportunities. The university's library and museum provide the state's major information resources and cultural collections with a particular strength in Alaska and polar regions. Finally, through its programs in fine and performing arts, the university provides cultural enrichment to the state's interior and rural populations. In accomplishing this mission, the University seeks the advice and guidance of Alaska's residents and friends.

Board of Regents Policy 10.02.01, adopted 02-25-88

* Since the mission statement was adopted, the University of Alaska Fairbanks has added the Bristol Bay and Interior Campus sites. UAF was granted space grant status in 1991.

Historical Highlights

1915

The University was originally established by the United States Congress as a land-grant college, called the Alaska Agricultural College and School of Mines.

The location was selected by one of the early founders of Fairbanks, the Honorable James Wickersham, territorial delegate to the U.S. Congress from Alaska. At that time, Anchorage was only a young tent city, and Juneau, being a center of population and government, had little interest in an agricultural college. The cornerstone laying ceremony was held on the Fourth of July.

1917

Governor Strong signed the bill on May 3rd accepting the federal land grant of 2,250 acres to create the Alaska Agricultural College and School of Mines as a land-grant college committed to public service, teaching and research. A separate corporation was established which provides for a board of trustees.

1921 - Bunnell

Dr. Charles E. Bunnell became the founding president. He was a judge of the U.S. District Court in Fairbanks for the preceding seven years. Bunnell was appointed by the Board of Trustees (which became the Board of Regents in 1935). His long-time political rival, Wickersham, tried to have the appointment rescinded.

1922

The "Farthest North College," as it was commonly referred to in its early years, opened on September 18th with six faculty and six students, in addition to President Bunnell and his secretary. The total student body rose to 12 after late enrollments.

1923

The first annual Commencement Exercises were held with one graduate, Jack Sexton Shanley, who received his Bachelor of Science degree in Agriculture. President Warren Harding also visited the campus that year.

1924

The Bureau of Mines station was transferred to the College. Other developments included the graduation of the first woman, Margaret E. Thomas (later Mrs. Olaus Murie) in business administration.

1926

The establishment of the U.S. Bureau of Biology Survey Station.

1927

The organization of the Business Administration Club. The first Bunnell-Geist Expedition to St. Lawrence Island occurred.

1929

The formation of the Civil Engineering Society. The College received an appropriation from the Rockefeller Foundation in 1929 to study the aurora borealis.

1931

The Fairbanks Agricultural Experiment Station, which had been established in 1906, was transferred to the College by an act of Congress. The Matanuska Agricultural Experiment Station was transferred to the College the following year. Signers' Hall was built to be the campus gymnasium. Later it would serve as the library, then the museum. Currently, Signers' Hall is housing some of the UAF administrative offices.

Historical Highlights (continued)

1935

The Territorial Legislature approved a name change on July 1, and the Alaska Agricultural College and School of Mines became the University of Alaska. Enrollment was up to 150 with 18 faculty members.

1936

Dr. and Mrs. Froelich Rainey built the Rainey/Skarland cabin.

World War II

Wartime enrollment was 67 in 1943-44, but increased to 373 in 1946-47.

1946

The Geophysical Institute (GI) was created by an act of Congress.

1947

The College Magnetic and Seismological Observatory was built in 1947, and the first summer session was held.

1949 - President Moore

Dr. Terris Moore served as the second president of the University from July 1949 to October 30, 1953. Arthur Nagozruk Jr., of Barrow, was the first Alaskan Eskimo to graduate from the UAF. The Chapman Building (the original GI), Nerland Hall and the Brooks Building are completed. Eielson Building construction, started in 1934, was completed in 1950. Enrollment reached 409 in 1953, and courses were offered on several military bases in the State.

1953 - President Patty

Dr. Ernest N. Patty, a faculty member in 1922, and Dean of the College from 1925-35, returned as the University's third president in 1953. Construction continued with the expansion of the physical plant, and completion of three more dormitories and two married-student apartment buildings. The Bunnell Building was constructed, and Constitution Hall was completed in time to accommodate the Alaska Constitutional Convention in November 1955. Enrollment rose to 978, and community colleges were established in Anchorage, Ketchikan, and Juneau. The first Ph.D., in space physics, was conferred at the annual Commencement Exercises in 1957. In 1959, with governor Bill Egan presiding, Alaska's constitution was signed in Signers' Hall.

1960 - President Wood

Dr. William R. Wood became the fourth president in 1960, guiding the University through its first year of Alaska statehood. The next 13 years saw greater funding for university operations and physical plant development, along with a broadening of academic, research, and public service programs. In 1964, three regions were established—Northern, Southeastern and Southcentral—each with a provost to coordinate and direct activities. Community colleges were organized at Palmer, Sitka, Kodiak, Bethel and the Kenai Peninsula. Regional centers were established at Anchorage and Juneau, augmenting community college programs with upper-division and graduate studies. The Fairbanks campus grew to include a new residence hall complex, gymnasium, classroom buildings (Charles E. Bunnell Building in 1960, William E. Duckering Building, 1964, Ernest Gruening Building, 1972), a heating and power plant, a library/fine arts complex (1969), and campus activity center (Ernest N. Patty Center, 1963), and further expansion of research

Historical Highlights (continued)

1960 (continued)

facilities on the West Ridge. The Alaska Water Laboratory and the new Geophysical Institute were among new facilities on the West Ridge. The Institute of Marine Science was established by the Alaska Legislature in 1960, the Mineral Industry Research Laboratory in 1963, as well as the Institute of Arctic Biology.

1969

Poker Flat Research Range was established as the largest land-based and only high-latitude university-owned sounding rocket range in the world.

1970

The university was named a sea-grant institution.

1971

The Alaska Native Land Claims Settlement Act passed. With the development of village and regional Native corporations, the need for greater educational opportunities in rural areas of the state developed. In response to this, the university administration and Native leaders conferred to determine the best way to meet critical needs.

1972

Student enrollment in Fairbanks reached 3,158 in the Fall '72. Overall enrollment statewide rose from 1,630 in 1960 to 10,325 in 1972, increasing at an average annual rate of close to 17 percent.

1973 - President Hiatt

Dr. Robert W. Hiatt succeeded President Wood. President Hiatt instituted a sweeping reorganization of the university, allowing considerable development of higher education programs in rural Alaska. The position of vice president for rural educational affairs was created. The regional system was abandoned to better emphasize development of the major urban centers in Fairbanks, Anchorage and Juneau. A Chancellor was appointed at each campus with responsibility for all research and academic programs. The positions of vice president for research and vice president for academic and faculty affairs were abolished, and the six existing colleges and seven research institutes at UAF were merged into two colleges - Environmental Sciences, and Arts and Sciences-and the Division of Professional Schools. Statewide administration and the Office of the President remained in Fairbanks.

1974

Tanana Valley Community College was established in Fairbanks. A learning center was opened in Barrow in 1974, followed by the Northwest Community College at Nome in 1975.

1975

The University of Alaska Foundation was established to encourage private giving to the University.

1976 - Chancellor Cutler

Dr. Howard Cutler became Chancellor of UAF in 1976.

1977

Charles O. Ferguson was appointed interim president by regents in February. At an August meeting, regents announce the selection of Neil D. Humphrey as president of the University of Alaska and appoint their executive secretary, Foster F. Diebold, as

Historical Highlights (continued)

1977 (continued)

chief administrator of the University, pending appointment of a new president, after Ferguson's resignation in December. Regents approve a reorganization plan proposed by UA President Humphrey under which education services are to be provided by four basic units -- the University of Alaska Fairbanks (UAF); University of Alaska Anchorage (UAA), University of Alaska Juneau (UAS), and the Division of Community Colleges, Rural Education and Extension. Program expansion included petroleum engineering, computer technology and resource management.

1979

In February, regents appoint Diebold as president for a term ending June 30.

1980

Regents announced the appointment of Dr. Jay Barton as the eighth president. The Museum is relocated to the Otto Geist Building on West Ridge.

1981 - Chancellor O'Rourke

Dr. Patrick J. O'Rourke, previously chancellor of the Community Colleges, Rural Education and Extension division, became the Chancellor of the UAF. Enrollment tops 5,000 for the first time. Program expansion included a Northern Studies program and doctoral degrees in mathematics, fisheries and biochemistry.

1982

The College of Human and Rural Development was created. Constitution Park was completed to honor the Alaska delegates that drafted and signed the Alaska State Constitution. The park is located between Constitution Hall, the Fine Arts Complex and the Gruening Building.

1983

The Honors Program began accepting students.

1984

The Student Apartment Complex was completed and the International Programs was established.

Restructuring

In 1987 President Donald O'Dowd and the Board of Regents restructured the University of Alaska System, streamlining administration and giving the state's four-year institutions in Anchorage, Juneau and Fairbanks responsibility for former community college missions. UAF's responsibilities included the campuses in Bethel, Nome, Kotzebue, Bristol Bay, downtown Fairbanks, and the Interior.

1988

The importance of Alaska as a site for receiving, processing and archiving data from earth-orbiting environmental satellites was demonstrated when the Synthetic Aperture Radar (SAR) Facility was installed on top of the GI. UAF's reputation grows internationally as the Polar Ice Coring Office (PICO) moves to Fairbanks.

1990

Known for its high-latitude social and scientific studies, on a per-researcher basis, UAF received more NSF funding (for Arctic studies) than any other university in the United States. In September Chancellor O'Rourke announced his decision to step down as chancellor at the end of June 1991.

Historical Highlights (continued)

1991

In February, UAF was designated a Space-Grant Institution by the National Aeronautics and Space Administration (NASA) because of its nationally competitive aerospace research and educational programs.

1991 - Chancellor Wadlow

Dr. Joan K. Wadlow became the third chancellor of UAF on July 1, and the first woman to be named Chancellor anywhere in the UA system. UAF was named the best of western regional institutions, based on costs and academic quality, by *U.S. News and World Report*.

1992

UAF celebrated the 75th Anniversary of its founding. The Usibelli Coal Mine gave UAF its first major endowment to support teaching, research and public service awards for faculty.

Institutional Accreditation

Commission on Colleges of the Northwest Association of Schools and Colleges

SPECIALIZED ACCREDITATIONS

Accreditation Board for Engineering and Technology
Accrediting Council on Education in Journalism and Mass Communication
Alaska State Board of Education through National Association
of State Directors of Teacher Education and Certification
American Assembly of Collegiate Schools of Business
American Association of Museums
American Chemical Society
Computing Sciences Accreditation Board
Council on Social Work Education
National Association of Schools of Music
National Council for Accreditation of Teacher Education

University of Alaska System Board of Regents

The University of Alaska Board of Regents was the governing body responsible for university policy and management through the president. Regents are appointed by the governor for eight-year terms, subject to legislative confirmation. A student regent was appointed for two years from candidates nominated on each campus. Regents' terms of office shown in parentheses.

Sharon D. Gagnon, President (1991-1999)
Tim Lamkin, Vice President (1991-1993)
Susan A. Stitham, Secretary (1987-1995)
Mark H. Helmericks, Treasurer (1987-1995)
Virginia W. Breeze (1989-1997)
Mary Jane Fate (1993-2001)
Eric Forrer (1989-1997)
Joseph R. Henri (1991-1999)
Michael P. Kelly (1991-1999)
R. Danforth Ogg (1993-2001)
Lew M. Williams Jr. (1991-1999)

UAF Standing Committees and Advisory Groups

Arctic Region Supercomputer Committee

Daniel Swift, Professor, Geophysical Institute, Chair
Richard Dowling, Senior Vice President, GC¹
Thomas Gaylord, Associate Vice Chancellor, PCIS
David Musgrave, Assistant Professor, Institute Marine Sciences
Randy Ownby, Vice President, ALASCOM
Tim Pettibone, Associate Vice Chancellor for Research & Grad. Studies, UAA
Channon Price, Assistant Professor, Physics Department
Paul Provencio, Supervisor of Engineering, ARCO, Alaska
Ken Richards, Student, Geophysical Institute
Mitchell Roth, Associate Professor, Mathematical Sciences
Tom Royer, Chancellors' Faculty Assoc Research
Scott Smiley, Assistant Professor, Institute of Marine Sciences
Gunter Weller, Director, Center for Global Change

Chancellor's Designee
Ted DeLacca, V.C.'s Project Coordinator

Ex-Officio
Tom Healy, Director & PI, ARSC
Michael Rice, Vice Chancellor Administrative Services
Joan K. Wadlow, Chancellor

Art in Public Places Committee

Karen L. Cedzo, URJA, Chair
Bill Brody, Art Department
Vin Haneman, Community representative
Eric Jozwiak, Student Affairs
Jean Mackin, Community representative
Janet Matheson, Statewide Facilities, Planning and Construction
Marionette Stock, student
William Tuttle, Physical Plant

Budget Council

Joan K. Wadlow, Chancellor, Chair
Thomas Gaylord, Facilitator, Planning, Computing, & Information Systems
Syun Akasofu, Director, Geophysical Institute
Tim Bauer, Staff Council
Walt Ensign, ex-officio
Betty Hoch, Budget and Cost Records
Clara Johnson, Interior Campus
Paul McCarthy, Rasmuson Library
John Phillips, Physical Plant
Paul Reichardt, College of Natural Sciences
Henrik Wessel, ASUAF
John Whitehead, Strategic Planning Leadership
Frank Williams, School of Engineering
John Zarling, Faculty Senate ex-officio
Janice Reynolds, Vice Chancellor for Academic Affairs
Michael Rice, Vice Chancellor for Administrative Services
Tom Royer, Chancellor's Faculty Associate for Research

UAF Standing Committees and Advisory Groups (continued)

Chancellor's Advisory Committee on Native Education

Joan K. Wadlow, Chancellor, Convenor
Poldine Carlo, Community Member
Jo Ann Ducharme, Rural Student Services
Carol Lee Gho, Interior Campus
Christina Hill, FNSB Alaska Native Education
Michael Jennings, Visiting Assistant Professor
Ringo Jimmy, Alaska Native Education Student Association
Clara Johnson, Interior Campus
Larry Kairaiiak, Student
Howard Luke, Community Member
Ron Manook, West Valley High School Teacher
Kathy Mayo, Doyon Foundation
Will Mayo, Tanana Chiefs Conference
Valerie Montoya, Behavioral Sciences & Human Services Dept.
Shirley Moses, Student
James Nageak, Alaska Native Language Center
Paul Ongtooguk, School of Education
Stephanie Place, American Indian in Engineering and Sciences
Gabriel Sam, Alaska Native Leadership Association
Morris Thompson, Doyon Limited
Blanche Vest, Alaska Native Social Workers Association
Hugh Walker, Alaska Native Social Workers Association

College of Rural Alaska Community Advisory Council

Rural Center Representatives
Dorothy Larsen, At-Large and Chair
A. Barbara Rankin, Aleutians Center
Rural Campus Representatives
Carol Lee Gho, Interior Campus
Jeanette Iya, Northwest Campus
Bing Santamour, Kuskokwim Campus
Martha Shield, Chukchi Campus
Debbie Tennyson, Bristol Bay Campus
Agency Representatives
Jerry Covey, Commissioner of Education
Tony Nakazawa, Department of Community and Regional Affairs

Committee to Nominate Honorary Degree Recipients and Commencement Speakers

Dave Musgrave, Institute of Marine Science, Chair
Karen Cedzo, URJA, Administrative Liaison
Jack Distad, Mathematical Sciences Dept.
David Hales, Alaska and Polar Regions, Library
Koji Kawasaki, Physics Dept.
Benjamin Kline, History Dept.
Rudy Krecji, Philosophy and Humanities Dept.
Claus-M. Naske, History Dept.
Phil Younker, Community Representative

Community Advisory Council for the Tanana Valley Campus

Sally Crawford (1993)	Norm Phillips (1995)
Rhonda Curwen (1995)	S.L. Stealey (1993)
Dick Farris (1995)	J.C. Thomas (1994)
Larry Kelly (1994)	Diane Worley (1993)
Mary Mathews (1994)	Jerry Walker (1993)
Norm Phillips (1995)

UAF Alma Mater and Fight Song

Lyrics by Mary J. Walker and Carl M. Franklin

Music by Carl M. Franklin

Chorus:

Though far we wander from thy door,
following paths of golden lore,
With lov. and pride we think of thee,
Rev'ling in treasured memories.
'Neath sparkling stars and northern lights,
Hills crest halls gleam stately white,
Inspiring love and faith to glowing flame;
Our Alma Mater we revere thy name.

All hail Alaska, sing her praise;
Our home of carefree college days.
A pioneer we see thee stand,
Champion of far north frontier land.
Thy sons and daughters e'er we'll be,
Forever loyal and true to thee,
Imbued with love we sing glad acclaim,
Our Alma Mater we praise thy name.

FIGHT SONG

Music by Carl M. Franklin

Fight for Alaska win the victory!
Fight for the Blue and Gold.
Hail to our banner, as it waves so free,
Over the victor's fold.
Cheer for the Polar Bears, mighty men are they,
Onward to honor and fame!
Fight on to win for our Alma Mater, Fight for Alaska's name.

Presidents/ Chancellors of the Institution

- 1921 The board of trustees selected Dr. Charles E. Bunnell, judge of the U.S. District Court at Fairbanks, as the college's first president. Bunnell assumes the position on December 7.
- 1949 Dr. Terris Moore, a former president and trustee of the Boston Museum of Science, assumes the presidency on July 1.
- 1953 Moore was succeeded by Dr. Ernest Patty, a member of the original faculty in 1922 and dean from 1925-35.
- 1960 Dr. William R. Wood, former academic vice president and acting president of the University of Nevada, succeeded Patty as president of the University, one year after Alaska became a state.
- 1973 Dr. Robert W. Hiatt succeeded Wood as the University's fifth president. Hiatt reorganizes the University in 1975, ending the regional system, and appoints chancellors to head the Fairbanks and Anchorage units.
- 1976 Dr. Howard A. Cutler assumed his duties as the first chancellor of the University of Alaska Fairbanks.
- 1981 Dr. Patrick J. O'Rourke succeeded Cutler as UAF's second chancellor.
- 1991 Dr. Joan K. Wadlow became the third chancellor of UAF and first woman chancellor in the UA System.

UAF Alumni Association

The UAF Alumni Association provides alumni with opportunities for involvement and interaction with the institution and with each other in social, cultural and/or educational areas, as well as providing support to current students. The association is managed by a board of directors, who are elected by the active membership. Each position on the twelve member board represents a geographic area. The association promotes the general welfare of UAF, through the efforts of UAF graduates and former students.

Board of Directors

Althea St. Martin	'87 - Executive Director
Deborah Boardman	'87 - Seat 10, Southcentral
Martha Demientieff	'86 - Seat 9, Interior
Dale Fox	'77 - Seat 4, Southcentral, President
Jean K. Anderson Graves	'54 - Seat 1, At Large
Cynthia Klepaski	'80 - Seat 3, Interior
Patrick Osborne	'76 - Seat 2, Southcentral
Therese Sharp	'81 - Seat 5, Interior, Past President
Chip Wagoner	'74 - Seat 8, At Large
Mike Wellings	'73 - Seat 11, Outside, Vice President
Sally Wien	'62 - Seat 6, At Large, Past President
Brenda Wilcox	'73 - Seat 7, Southeast, Past President

UAF Honorary Degrees Conferred

1932	Steese, Gen. James Gordon (Deceased)	D. Science
1935	Wickersham, Hon. James (Deceased)	LL.D.

**Faculty National/
International
Appointments**

Dr. Vera Alexander: (SFOS) named a Fellow by the Council of the American Association for the Advancement of Science; serves on the National Academy of Sciences Polar Oceans Panel and the Arctic Marine Science Committee; serves as the U.S. delegate to the North Pacific Marine Science Organization (PICES).

Marcia Cressell Argall: (RAHEC assistant director) serves on the steering committee for the University of Washington Rural/Underserved Opportunities Program.

Dr. Carl S. Benson: (professor emeritus, GI) a Fellow of the American Association for the Advancement of Science.

Karen L. Cedzo: (Associate Vice Chancellor for URIA) Chair of the Council on University Relations and Development of National Association of State Universities & Land Grant Colleges (NASULGC).

Dr. Thomas Gaylord: (Associate Vice Chancellor for PCIS) elected to the board of directors for Pacific Northwest Association for Institutional Research and Planning (PNAIRP).

Dr. David Hopkins: (Alaska Quaternary Center) received the Fryxell Award from the Society of American Archaeology (SAA) recognizing his contributions. This is the most prestigious national award given by the SAA and only the most distinguished senior scholars are considered. In 1990 the Geo-archaeological Division of the Geological Society of America, awarded him the Career Award.

Daniel Johnson: (Rural Alaska Health Education Center (RAHEC) director) elected to the national AHEC Directors' Association Executive Committee.

Dr. John Kelly: (Director, PICO) named one of the administering directors of the first International Design for Extreme Environments Assembly (IDEEA One). The international assembly's goal is to form a permanent and expanding worldwide network to provide mechanisms for common problem solving in extreme environments, including space exploration.

Dr. Brina Kessel: (curator of ornithology, UA Museum) elected President of the American Ornithological Union.

Dr. Carla Kirts: (Resources Management) named Outstanding Teacher of the Year by the Western Region of the American Association of Agricultural Educators.

**Faculty
National/
International
Appointments
(continued)**

John Miller: (Alaska SAR Facility Project Manager) received NASA's Certificate of Appreciation for his role in establishing the Alaska SAR Facility at GI.

Dr. Rainer Newberry: (Geology/Geophysics) selected Alaska Professor of the Year by the Council for Advancement and Support of Education.

Hank Pennington: (Marine Advisory Program) received the Jerry Jurkovich Award from the National Marine Fisheries Service/Fishing Industry for promoting fishing vessel safety.

Randy Pitney: (Athletics) named National Rifle Association's Coach-of-the-Year.

Dr. Terrence Quinn: (Juneau Center for Fisheries and Ocean Sciences) appointed to the Committee on Fisheries of the National Research Council Ocean Studies Board.

Dr. Juan G. Roederer: (GI) appointed by President Reagan as chairman of the U.S. Arctic Research Commission in 1987.

Dr. Thomas C. Royer: (IMS) since 1981, serves on the National Academy of Sciences Associateship Review Panel; serves on the Publications Committee, American Geophysical Union (AGU); received Editors Award for service to *Journal of Geophysical Research Oceans*, AGU 1990; serves as co-chairman, WOCHÉ Hydrographic Implementation Panel.

Donald Scheaffer (Financial Aid) and James T. Mansfield (Admissions & Records): appointed as College Board Delegates by The College Board, a nonprofit educational association serving students, schools and colleges through programs designed to expand educational opportunity.

Dr. Knut Stamnes: (Professor of Physics) named one of five site scientists by the U.S. Department of Energy's Atmospheric Radiation Measurement (ARM) Program. He is responsible for the day-to-day scientific operations of the Program's measurement site to be located over 25,000 square miles on the North Slope of Alaska.

Peggy Shumaker: (English Department Head) elected President of the National Associated Writing Program.

Joe Tremarello: (Athletics) voted Women's Basketball Continental Divide Conference Coach-of-the-Year.

Dr. Wilford Weeks: (GI) recipient of the International Glaciological Society's highest honor, the Seligman Crystal.

Dr. Gunter E. Weller: (GI) member of the Committee on Global Change Research, National Research Council; serves on the Council of International Glaciological Society; serves as chairman of the Working Group on Global Change, International Arctic Science Committee; serves as chairman of the IGPP Steering Committee, Scientific Committee on Antarctic Research.

University of Alaska Foundation

The Foundation is legally separate and distinct from the University of Alaska and is governed by its own Board of Trustees. This twenty-three member board establishes the Foundation's investment policy for endowments, manages donated property, and oversees the distribution of the Foundation's assets to its sole beneficiary, the University of Alaska system. Total FY91 assets were \$19.3 million.

The membership of the Foundation consists of its College of Fellows which is organized into three branches and an unaffiliated group. Each branch operates to support the fund-raising efforts of its respective university. In addition, members of all branches of the College of Fellows assist the Trustees in fund-raising at the statewide level and act as advocates for the University in community and state issues.

UAF Organizational Structure

Principal Research Units At UAF

The UAF Special Mission states: "The University of Alaska Fairbanks is the State's center for organized activity in basic and applied research with particular emphasis on high latitude and Alaskan problems which have provided this University with a well-earned national and international reputation. Foci are directed toward marine science and high latitude studies in geophysics, biology, environmental sciences, and engineering disciplines". UAF also conducts "studies relative to the definition, exploration, and development of Alaska's natural resources, with a special emphasis on agriculture and minerals."

This mission statement, taken with UAF's actual research activities, define UAF as "The Arctic Institution for the United States" and "America's University of the North."

Within the areas of emphasis identified above, and in support of the overall academic program, UAF research institutes, centers and laboratories have been organized to facilitate "the institution's two main responsibilities in promoting research: to aid members of the faculty in developing and maintaining their research programs, and to provide a central point of contact for off-campus agencies turning to the institution for research assistance." (*NASC Accreditation Handbook*, p. 73).

Several programs and facilities are managed centrally to promote research at UAF. Funding initiatives include the Faculty Small Grants Program and the National Institutes of Health-funded Biomedical Research Grants Program. Other initiatives are funded on a limited and discretionary basis to assist in the development of critical areas.

Agricultural and Forestry Experiment Station (AFES)

Bonanza Creek Experimental Forest: The Taiga LTER (Long-Term Ecological Research Program) site, located at Bonanza Creek, is part of a 19-site, National Science Foundation funded national network. It was established in 1987, four years after a major fire at Rosie Creek burned one-third of the experimental forest. At the Bonanza Creek site, UAF researchers, in cooperation with the Institute of Northern Forestry (U.S. Forest Service) and scientists from other universities, focus their studies on the processes that control forest development on flood plains and uplands after fire.

Delta Research Site: One hundred miles southeast of Fairbanks, UAF researchers study carbon cycling in the Delta Agricultural Project, to gain insight into the effects of global warming. In basic agronomic research, UAF scientists emphasize production techniques, and crop selection appropriate to high latitude lands in order to boost yield while protecting the soil and minimizing production costs.

Fairbanks Research Center/Experiment Farm: For more than three-quarters of a century, interior Alaskan farmers have benefited from basic agricultural and conservation studies conducted at the Fairbanks Experiment Farm. Today's researchers are investigating ways to increase yield while meeting Alaska's special environmental needs. Horticulture, small fruits, grain and swine, are some of the Center's major areas of study.

Forest Soils Laboratory: Research conducted by the Laboratory emphasizes the soil fertility controls of forest development in interior Alaska forests. Facilities are available to students and collaborating investigators for conducting soil, plant tissue and water analysis for all major physical and chemical properties of these materials.

Principal Research Units At UAF (continued)

Agricultural and Forestry Experiment Station (continued)

Land Grant: The School of Agriculture and Land Resources Management (SALRM) and AFES continue the Land Grant tradition. Research and public service activities emphasize applications and solutions to problems facing Alaskans and others in the circumpolar north.

Palmer Research Center/Matanuska Farm: Located in the Matanuska Valley—Alaska's traditional agricultural center—the Palmer Research center concentrates its research efforts on developing new production techniques for the area's agricultural industry. Major research efforts in dairy, vegetable, and beef production result in lower costs to Alaskan consumers and higher return for the state's producers. Studies are conducted at the Matanuska Farm and on privately owned local farms.

Alaska Cooperative Fish and Wildlife Research Unit

This Unit is jointly sponsored by UAF, the Alaska Department of Fish and Game, the U.S. Fish and Wildlife Service, and the Wildlife Management Institute. Fisheries research emphasizes the ecology, alteration, and management of arctic and subarctic freshwater ecosystems as they relate to fisheries resources. Wildlife-related studies focus on ungulate habitat relationships, seabird and waterfowl ecology, wildlife population dynamics, and the impact of northern development on wild animals.

Alaska Native Language Center (ANLC)

The Center was established in 1972 to document, study and cultivate the 20 native Indian, Aleut and Eskimo languages of Alaska. It houses an archival collection of about 8,000 items, virtually everything written in or about Alaska Native Languages, including copies of most of the earliest linguistic documentation. The Center has published over 200 books and booklets for scientific, classroom and general use, including grammars, dictionaries, folklore texts, and audio tapes.

Center for Cross-Cultural Studies

The Center is the research and development unit of the School of Education. The Center addresses educational issues and problems inherent in Alaska's multicultural population. The Center administers instructional support contracts and grants for the school and issues publications and reports designed to improve cross-cultural understanding.

Center for Global Change and Arctic System Research (CGCASR)

This campus-wide Center was initiated by the faculty in 1990 as a means for developing, coordinating, implementing interdisciplinary research initiatives, linking many initiatives and resources at UAF, and addressing the role of the Arctic in the total Earth System. Its scientific focus is on understanding the chain of physical, geological, biological, and social processes of the arctic system that interact with the total earth system and global change, in order to contribute to the scientific basis for predicting effects of environmental changes, and formulating policy options in response to the anticipated effects on man and his support systems.

The Center is guided by a Board of Directors constituted of appropriate Deans and Institute Directors, and a Science Steering Committee of faculty from relevant disciplines which provide leadership to five working groups: Physical/Biological interactions and Feedbacks; Arctic Paleoenvironments; Contribution of High

Principal
Research Units

(continued)

Center for Global Change and Arctic System Research (CGCASR) (continued)

Latitudes to the Global Carbon Budget; Terrestrial Ecosystem and Community Dynamics; and Social Aspects of Global Change in the Arctic. The Alaska Data Visualization and Analysis Laboratory (ADVAL) supports digital image processing and geographic information system analysis, especially as it relates to global change research. Its capabilities are relevant to such fields as remote sensing, environmental sciences, geology, geophysics, geography, glaciology, volcanology, land resources management, forestry, oceanography, and mineral exploration and engineering.

Geophysical Institute (GI)

The Institute is the only high-latitude research and academic center for geophysics in the United States focused on high-latitude geophysical phenomena. The scientific staff is organized under four research groups: Space Physics and Aeronomy; Atmospheric Sciences; Snow, Ice, and Permafrost; and Solid Earth Research. The Institute participates with other universities and agencies in many cooperative research programs. The following special facilities and projects are operated by the Institute.

The Alaska Climate Research Center concentrates on research of Alaskan climatology and climatic trends, on answering requests for digitized climatic data, and maintaining a relationship of mutual cooperation and support with the UAA Climate Center. Mesoscale climate modeling is being done on the NCAR supercomputer (in the future, the Arctic region supercomputer at UAF could be used).

The Alaska Synthetic Aperture Radar (SAR) Facility, funded by NASA, receives, processes, and archives data from a new generation of synthetic aperture radar satellites. Its major components are a receiving ground station, SAR processor system and archive operations system, and systems for scientific analysis of SAR data. Sea ice and glacier studies are a primary focus at the Institute, but the facility serves over 100 other projects worldwide as one of eight national data centers established by NASA as part of the Earth Observing System (EOS).

The Alaska Volcano Observatory (AVO), a cooperative program with the Alaska Division of Geological and Geophysical Surveys and the U.S. Geological Survey (USGS), links laboratories in Alaska, Washington, and California by computer to monitor hazardous Alaskan volcanoes and conduct cooperative research. AVO also provides public safety information to the Federal Aviation Administration, National Oceanic and Atmospheric Administration (NOAA), the Alaska Division of Emergency Services, municipal governments, and the public.

Atmospheric Sciences Laboratories: The Institute houses a physical chemistry and optics laboratory and operates an atmospheric chemistry laboratory in a nearby building. Atmospheric chemistry measurements are routinely made from the Ester Dome Observatory near the Institute and at Poker Flat Research Range. Radiation, energy balance, and other meteorological measurements are being made at field sites in both polar regions.

The Computer Resources Center manages facilities capable of handling large-scale data analysis, satellite image processing, modeling of geophysical processes, and nonlinear plasma simulations.

**Principal
Research Units
At UAF
(continued)**

Geophysical Institute (continued)

The Geo-Data Center archives institute material, maintains various geophysical data collections to support research, and is the public browse facility for the Alaska High-Altitude Aerial Photography Program. Collections consist of various media, from 16 mm educational movies to 8 mm digital satellite imagery, from earth's current chart data to positive CIR aerial transparencies. SAR, NOAA/AVHRR, and Landsat Quick Look satellite imagery are available and SPOT satellite images may be accessed through the Center.

Geological Research Support includes a geochronology lab equipped for argon-argon and potassium-argon dating of geologic samples. The paleomagnetism laboratory, used for research on Alaska's tectonic history and climate records of young sediments, is equipped with a 2-G superconducting magnetometer. A third laboratory is equipped for preparing samples for geochronologic, magnetic, and geochemical analysis.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

The High Frequency Active Auroral Research Program (HAARP) is a federal project for experiments to modulate intense electric currents called the auroral electrojet in the auroral ionosphere. A powerful, high-frequency transmitter system is planned for a site south of Fairbanks to conduct and monitor experiments. HAARP is managed by the U.S. Air Force Geophysics Laboratory and the U.S. Navy Office of Naval Research. The Institute leads the *Polar Radio-Science Consortium*, a scientific advisory group for HAARP.

Optical Observatories: The Institute's main optical observatory is at Poker Flat Research Range. Observations using satellite communications are made from unmanned all-sky cameras located at remote sites in Alaska and Canada. Down-range observation sites for Poker Flat are at Fort Yukon, with sites planned at Arctic Village and Kaktovik; an optics lab supports these activities. Data from many of these and other observatories are displayed by a data display system called the Geospace Environmental Data Display System (GEDDS). The Institute participates in auroral observations at Svalbard, Norway.

Poker Flat Research Range is the largest land-based research rocket range worldwide, and the only high-latitude range in the United States. Since it was established near Fairbanks in 1969 for auroral and middle-to-upper atmosphere research, approximately 234 large sounding rockets have been launched. A major federal project to upgrade launch and observatory facilities is now under way.

Remote Field Sites: Much seismology, magnetic, and auroral observing equipment is located at field sites throughout Alaska and northwestern Canada; most sites involve continuously operating, unmanned observing stations. The Alaska-Canada High Latitude Magnetic Chain of Stations is a series of magnetometers following a longitudinal line from Talkeetna, Alaska to Eureka, NWT, Canada. Information from the chain is transmitted via satellite to the World Data Center. A digital ionospheric sounding system at the Sheep Creek site is operated for the Air Force Air Weather Service.

Principal Research Units At UAF (continued)

Geophysical Institute (continued)

Research Support Services available include the machine shop which supports needs of the Institute and PICO at UAF; the electronics shop supports computing, electronics design and construction, and instrument calibration; Photo-Geophysics provides photographic, drafting, mapping, and computer graphics services.

Satellite Image Analysis Laboratories: In addition to the Alaska SAR Facility resources, the Institute houses the ADVAL (more fully described under Center for Global Change and Arctic System Research). ADVAL provides analysis of satellite images in conjunction with other data sets.

Seismic Information and Research: Monitoring earthquake activity and providing information to citizens and public officials, the Alaska Earthquake Information Center is a cooperative project with the USGS. The network of 120 seismic stations monitored by the Institute's seismology laboratory includes stations of the Institute, the USGS and NOAA's Alaska Tsunami Warning Center. The office of the Alaska state seismologist is located at the laboratory, which also supports basic research on earthquakes and volcanoes.

Snow, Ice, and Permafrost Laboratories: The Institute houses three ice laboratories and three cold rooms for permafrost studies, ice core analysis, glaciological research studies and other research requiring simulated cold environments. Field work is also carried out throughout Alaska, Greenland, the Arctic Ocean, and Antarctica.

Space Grant: NASA has designated UAF to participate in the National Space Grant program and will fund teaching and research in aeronautics, space, and related fields. The program will provide students with internships in private industry and promote cooperative industry-university research.

The Space Physics Analysis Center is equipped with hardware and software to acquire data and images of solar activity and related geophysical phenomena. The system displays the NOAA solar-geophysical data file on sunspots, solar flares, and the solar wind.

The Tectonics and Sedimentation Group of the Institute and the UAF Geology Department conduct the Brooks Range Geologic Research Program, a major, long-term research effort to understand the geologic history of the northeastern Brooks Range and provide basic information for resource evaluation.

Institute of Arctic Biology (IAB)

Established in 1963, the Institute is the principal research arm for life scientists in the CNS. The original mandate of the Institute—the study of adaptations of plants and animals, including humans to past and present climates of the Arctic—is maintained, but has been expanded to include programs in ecology, systematics and molecular biology/biochemistry. Ecology programs include research on aquatic, taiga and tundra sites, including community organization, ecosystem structure and function, functional interactions between plants and animals, and the way in which environmental and organismal processes modify nutrient cycling and decomposition within systems. This ecosystem-level research is closely tied to physiological responses such as herbivory. Physiological programs integrate the endocrine, neurobiological and behavioral adaptations of birds and mammals to highly seasonal and climatologically extreme environments, specifically emphasizing migration, hibernation, and

**Principal
Research Units
At UAF
(continued)**

Institute of Arctic Biology (IAB) (continued)

thermoregulation. A new program in molecular biology and biochemistry has recently been added as a research component. Systematics, biogeography and genetics of organisms within arctic and subarctic ecosystems are being studied to determine the history of migration and evolution of high-latitude organisms. The Alaska Cooperative Fish and Wildlife Research Unit within the institute provides direct interaction with state and federal agencies and supports faculty and graduate student research projects.

The Institute provides a vivarium, animal quarters, surgery and a variety of technical and instrument facilities and services for coordinated and individual research. Special field sites include a 40-acre experimental biological research area on campus and the Large Animal Research Station, housing breeding colonies of muskox, caribou and reindeer, adjacent to the campus. The Institute maintains the only major U.S. field station in the Arctic, at Toolik Lake on the northern foothills of the Brooks Range. Research field camps at Eagle Summit on the alpine tundra, at Cantwell near Denali National Park, and at Halibut Cove on the shores of Kachemak Bay provide a wide range of ecological diversity for specimen collection and research.

The Institute maintains a strong international tie with scientists and institutes through cooperative research in Europe, Scandinavia, Russia, Central America, and Africa.

The faculty have joint appointments with instructional colleges, and participate in offering courses and graduate programs leading to both master's and Ph.D. degrees in a variety of subjects related to arctic biology.

Institute of Northern Engineering (INE)

The Institute is the research arm of the School of Engineering. INE is comprised of three research centers and one laboratory: the Engineering Research Center (ERL), the Transportation Research Center (TRC), the Water Research Center (WRC), and the Environmental Technology Laboratory. INE's objective is to provide faculty and students with research opportunities in support of the engineering programs offered by SOE. Research through the Centers is conducted in the program areas of civil, electrical, environmental, management, mechanical, and transportation engineering. A special focus exists on cold regions water-related problems in Alaska and other northern areas. Many of the research programs conducted at INE investigate problems of particular concern to Alaska, while others are of interest to the national and international communities as well.

Alaska Space Grant Program is a cooperative effort with the Geophysical Institute. It supports a broad spectrum of activities to enhance the aerospace capabilities at UAF through grants for research, curriculum development, graduate student fellowships, and aerospace scholarships. The majority of the funding is dedicated to graduate stipends and scholarships for undergraduate students involved in ongoing aerospace research and design projects. INE provides faculty, staff, and student support, as well as space in the Duckering Building.

Engineering Research Center: Ongoing research at the Center encompasses a diversity of fields ranging from basic investigations of geomagnetically induced currents in power systems (conducted in cooperation with the GI) to the design and testing of a ground source heat pump systems. Some research is quite "high tech",

Principal Research Units At UAF (continued)

Institute of Northern Engineering (INE) (continued)

Engineering Research Center (continued)

while other projects might seem mundane—yet all work at INE is aimed at providing timely and practical solutions to problems that affect everyone.

Environmental Technology Laboratory: The goals of the Laboratory are to: conduct research relating to the management of the environment; facilitate technology transfer on environmental issues; act as a networking center for information and expertise within the University; provide a center of expertise in Alaska on environmental and resource management; facilitate access to and use of information and expertise by industry, business, and government; provide funding for research and graduate studies; and promote and enhance effective environmental education.

Transportation Research Center: The Center is the focal point of Alaskan transportation research for the Alaska Department of Transportation and Public Facilities (DOT&PF). TRC continues to have a major impact in Alaska, particularly where transportation infrastructure needs to be developed and researched as a necessity for the industrial development and economic growth of the state. TRC serves a major role in conducting research and administering transportation education in Alaska. Research projects address such areas as pavement materials, pavement design and rehabilitation, bridges and transportation planning, traffic operations and design of stable roadways over permafrost. Many projects are conducted jointly with DOT&PF. TRC is a member of the Transportation Northwest Regional Center, and serves as a liaison representing the UAF at the Transportation Research Board in Washington, DC. The Alaska Transportation Forum, an annual meeting hosted by TRC, addresses the unique problems of Alaskan transportation. TRC has also developed the Alaska Cooperative Transportation and Public Research Program, which provides a system by which DOT&PF research needs can be met.

Water Research Center: Solving water problems in Alaska is complicated by the sparse availability of data, poor quality of much of the existing data, the presence of unique phenomena (such as permafrost), low air and soil temperatures, a hydrologic cycle dominated by snow and ice, extensive wetlands, and the sheer vastness of this state. Water related problems abound in the realms of alternative energy, water quality and quantity, environmental quality related to normal development, as well as petroleum and resource extraction, wastewater treatment, fisheries, forestry, arctic engineering, and water law. WRC conducts studies in hydrology, hydrogeology, hydraulics, limnology, climate change, fisheries, water chemistry, microbiology, isotopic geochemistry, oil spill, and applied technology. Specific capabilities include state-of-the-art analyses of major and minor inorganic constituents in water, sediments, minerals, wastes and living biological materials.

Research tools include a variety of computer systems with a wide range of peripherals/software, and major equipment such as mass spectrometry, flame and graphite furnace atomic absorption, and gas and liquid (ion exchange) chromatography.

WRC takes a broader view, providing solutions to problems facing northern peoples outside as well as inside Alaska. Our development of time domain reflectometry for the in situ measurement of the unfrozen water content of soils and snowpacks, for example, has a profound potential for solving problems ranging from snowmelt flooding to designing roads and minimizing frost heave. Cooperative research with Canadian and European countries has provided partial solutions to a diverse array of

Principal Research Units At UAF (continued)

Institute of Northern Engineering (INE) (continued)

Water Research Center (continued)

problems. Some of this work, such as WRC's continuing program related to arsenic and heavy metal contamination, has immediate application to the northwestern United States, Canada, and Europe, as well as Alaska.

Mineral Industry Research Laboratory

This Laboratory was created by the Alaska State Legislature in 1963, with a mandate to conduct basic and applied research on problems of the mineral industries and to cooperate with the State and Federal government agencies. It conducts applied and basic research in areas such as coal preparation, coal science, mineral beneficiation, mine and mill design, new resource development, improved exploration and prospecting methods, and modern heap leaching technology.

Petroleum Development Laboratory

The primary function of this Laboratory is to explore various aspects of enhanced oil recovery research, including the production of heavy oil through thermal recovery and miscible oil displacement. The goal is to transfer the information from the laboratory and field experiments to engineers who can apply it to problems in the oil fields.

School of Fisheries and Ocean Sciences (SFOS)

SFOS was established in 1987. All existing marine and fisheries components were brought together to focus, strengthen and further develop the programs, while avoiding duplication of effort. The mission of SFOS is to provide academic research, education and public service in all marine and fisheries areas of Alaska.

Alaska Sea Grant College Program

The Program is a marine research, education, and public information and technology transfer program housed in SFOS. The program is administered and primarily funded by the NOAA, U.S. Department of Commerce, with matching funds allocated by the State of Alaska. The Program funds university research that broadens knowledge of the marine environment and supports sustainable use of Alaska's marine resources. Seafood science and economics, oceanography, and marine biology are primary areas of Sea Grant-sponsored studies. Sea Grant also plans and participates in formal and informal state and national forums on fisheries management and development, marine mammal issues, and environmental issues important to industries that depend on the long-term viability of marine resources. Program advisory agents, located in coastal communities, transfer information between coastal constituents and UAF.

Fishery Industrial Technology Center (FITC)

The FITC, an applied research arm of SFOS, was established in 1981. It is located in a new 20,000 sq.ft. seafood processing research and development facility in Kodiak. The FITC's responsibilities include: fisheries science and harvesting technology, seafood science and processing technology, technology transfer, and instruction. Present research areas at the Center include studies of the chemical and physical properties of fish proteins, microbiological stability of seafood, fish behavior during capture by trawl gear, methods for full utilization of fishery products and development of new seafood products.

Principal Research Units At UAF (continued)

School of Fisheries and Ocean Sciences (SFOS) (continued)

Institute of Marine Science (IMS)

The Institute was established in 1960 and is a major research arm of the SFOS. Its research foci include interdisciplinary studies of high latitude seas including the Bering, Beaufort, and Chukchi Seas and the seasonal sea-ice zone; the ecology, biology, and physiology of high-latitude organisms, ranging from plankton to marine mammals; and physical oceanographic studies of the Gulf of Alaska, Bering, Chukchi, and Beaufort Seas. Current research projects include: studies on water circulation in the Gulf of Alaska; carbon and nutrient cycles; environmental studies relating to the *Exxon Valdez* oil spill; marine mammals, shellfish and finfish biology; studies on sedimentation and origin of the continental shelf of Alaska; and satellite remote sensing of ice-covered seas. The Institute includes a variety of research facilities, which are described below.

Flow Cytometry Facility: The development of high resolution flow cytometry at UAF has enabled rapid counting, measurement, sorting, and biochemical analysis of small microorganisms, such as aquatic bacteria. Marine bacteria represent a large proportion of the ocean biota, and flow cytometry is helping to develop better understanding of their role in marine ecosystems. Analysis and sorting of other particles such as algae, spores, blood cells, and blood parasites is possible.

Research Vessel Alpha Helix: The Seward Marine Center is home port for the R/V *Alpha Helix*, a 133-ft ice-strengthened research vessel operated by IMS for NSF. The vessel provides living quarters for 15 scientists and a crew of nine and is used by researchers conducting a wide range of oceanographic studies at high latitudes.

Seward Marine Center: The Center supports IMS's coastal and marine biological research, oceanographic research, and education. The Center provides access to salt water laboratories and coastal environments at the head of Resurrection Bay.

Juneau Center, School of Fisheries and Ocean Sciences

The Center is located on Auke Bay and is the principal site for graduate studies in marine fisheries for SFOS. Research areas include genetic improvement of salmon broodstocks, aging and growth of larval fish, population dynamics and management of marine fish and invertebrates. The Center's sea water system, lab facilities and small skiffs provide excellent access for marine studies in southeastern Alaska.

Kasitsna Bay Laboratory:

This coastal field station supports teaching and research projects and is an excellent facility for studies of intertidal and near-shore organisms and environments. It is located eight miles from Seldovia on the south shore of Kachemak Bay. The facility includes several laboratories, skiffs, and housing for sixteen.

Marine Advisory Program

The Program was established in 1970 and earned Sea Grant College status for UAF in 1980; it is administered by the SFOS. Its staff regularly participates in state and national discussions on fisheries management and development, marine mammal issues, and environmental issues which are important to the long-term viability of marine resources based on marine industries.

**Principal
Research Units
At UAF
(continued)**

School of Fisheries and Ocean Sciences (SFOS) (continued)

Marine Advisory Program (continued)

SFOS transfers useful research results and other practical information to coastal businesses and others who can use the latest information on marine resources. The information is conveyed via the Program, which consists of SFOS faculty and support staff located in eight coastal Alaska communities. These marine advisory personnel work closely with coastal industries, governments, and the public to convey useful research results and other practical information that support the wise and safe use of Alaska's marine resources. Advisory faculty also identify and relay research needs back to university scientists.

West Coast National Undersea Research Center

This Center was established in 1990. The Center's mission is to promote, facilitate, and support quality undersea research along the west coast of the U.S. including the western Arctic and, because of UAF's commitment to polar research, Antarctica. Collaborative projects with other Pacific Rim nations are also encouraged. Cooperative agreements with the U.S. Navy and the Japan Marine Science and Technology Center have expanded the scope of research opportunities available.

Alaska's vast coastal area (over 50% of the entire U.S. coastline, 85% of the western coastline, and 74% of the U.S. continental shelf area) and major proportion of U.S. fisheries resources (over 50%), as well as the research facilities and expertise available at UAF, explains the placement of the Center in Alaska.

The Center receives and evaluates research proposals from scientists in the private sector, state and federal agencies, and universities. Project funding is awarded following a peer review process. The Center also coordinates cruise plans and the scheduling of undersea vehicles for scientists whose proposals have been accepted. Projects supported typically address questions that require the use of two- or three-person research submarines, remotely operated vehicles (ROVs), or side-scan sonar, plus support vessels. Vehicles and instruments provided by the Center are either leased or, in the case of shallow water ROVs, borrowed from other undersea centers. This arrangement allows gear to be matched to project needs.

The Center has sponsored research projects from the Chukchi Sea, north of Bering Strait, to Monterey Bay in California, and expects this geographical range to expand as increasing numbers of proposals are received. The Center has funded studies on the sediment-water interface, cold methane vents, marine geology, zoo-plankton abundance, benthic ecology and fisheries-related studies.

University of Alaska Museum

The main research objectives of the Museum are to acquire and develop systematic research collections resulting from or forming the basis of object- or organism-based research on Alaska, the Arctic and Subarctic, and to conduct collection-based research in the Cultural, Earth, and the Life Sciences.

The Alaska Quaternary Center: This Center, established in 1983, serves as the focus for interdisciplinary research in Quaternary Studies. This consortium of Quaternary scientists includes terrestrial and marine geology, paleolimnology, geography, climatology, tephrochronology, plant and animal ecology, palynology, vertebrate paleoecology, micropaleontology, ethnology, archaeology and human ecology.

University of Alaska Museum (continued)

Northern Center for Systematics and Biodiversity: This Center meets the need for the physical documentation of biodiversity and for specimen-based information on flora and fauna of Alaska and the circumpolar north. Among its priorities is the development of an electronic database on the flora and fauna derived from specimens. Curators and staff collaborate with scientists from other countries in the Panarctic Biota Project to produce an inventory of arctic plants and animals. The Alaska Frozen Tissue Collection is the sole source for tissue samples for molecular genetic studies of Alaskan and Beringian fauna.

Atmospheric Chemistry

Atmospheric Chemistry, administered by the Department of Chemistry, seeks to understand the complex changes resulting from natural and human influences. Research underway is focusing on the problems of the Greenhouse Effect, arctic ozone holes, acid rain, arctic pollution and natural sulfur emissions and climate.

Biochemistry and Molecular Biology

This program is administered by the Department of Chemistry. Its research deals with molecular approaches to biological phenomena, exemplified by studies of evolutionary relatedness of arctic animals by analysis of DNA, molecular mechanisms of gene control in bacteria and higher organisms, the structure and function of light harvesting proteins in marine algae, the possible roles of metals in human disease and biochemical adaptations to the North. The program interacts with other programs such as Environmental Science and Northern Studies.

Environmental Sciences

Graduate research in Environmental Sciences may be emphasized/pursued through several departments: Natural Resources Management, Environmental Quality Engineering or Science, Marine Biology, Wildlife Management and other areas.

Northern Studies

Studies of northern policy issues and the cultural, historical, economic and political contexts of the circumpolar north can be undertaken through departments of the College of Liberal Arts, including anthropology, economics, geography, history, political science and psychology.

Cooperative Extension Service (CES)

CES represents a unique entity within UAF. It is part of a nationwide educational system which functions in a cooperative relationship between the federal government through the USDA and the various states through land-grant colleges and universities. The legal status of CES is provided through the federal Smith-Lever Act, Alaska State statutes, and a Memorandum of Agreement between USDA and UAF.

The mission of CES is to interpret and extend relevant, research based knowledge in

Research Support (continued)

Cooperative Extension Service (CES) (continued)

an understandable and usable form, and to encourage the application of this knowledge to solve problems and challenges that face the people of Alaska. Extension education in Alaska is delivered by faculty located in communities in 11 off-campus sites. Major program areas includes: Home Economics, 4-H Youth Development, Agriculture & Nature Resources and Community Development and are as follows:

Agriculture and Nature Resources focuses on educational programs covering production agriculture, livestock, agronomy and commercial horticulture, forestry, natural resource management, and public policy.

Community Resource Development is an extension education program intended to assist communities in the facilitation of local organizational process and community decision making in areas of: community economic development, local government and leadership education.

4-H Youth Development is an educational program of the University of Alaska and Land Grant System in cooperation with USDA. Youth and adults learn vocational and life skills, develop leadership and self esteem, and engage in community service.

Home Economics is designed to address the quality of family life and the home environment. Program areas include: food safety and quality; family stability; nutrition, diet and health, including EFNEP; parenting and child development; housing and energy; resource management, clothing; and senior programs.

Electron Microscope Laboratory

Transmission and scanning electron microscopes, specimen preparation and photographic equipment are managed by a users committee and professional staff to support research in a variety of areas including arctic biology and human health.

Elmer E. Rasmuson Library/Media Center

The library has over 1.5 million bibliographic items in a variety of print and audiovisual media. It manages GNOSIS and participates in the WLN bibliographic network (and other services) to provide electronic access to over 12 million items nationwide.

The Alaska and Polar Regions Collections include the world-class Alaska Collection, the University Archives and Manuscripts collection, historical photographs, rare books and maps, and the oral history materials.

The Bio-Sciences Library, housed in the Arctic Health Building, specializes in periodicals for health and life sciences, as they relate to cold regions research.

Elmernet, the local area network, gives patrons access to 19 CD-ROM databases containing over 20 million citations. Elmernet is available through workstations in the library, personal computers in individual departments connected to the campus-wide network, and open dial-up access to UAF users throughout the state.

The Geophysical Institute Library specializes in geophysics and includes numerous compact disk products to access holdings in other polar collections around the world.

Uncover, the CARL document delivery system, allows patrons to search for articles in over 12,000 journals. Requests for the full article are sent electronically via Internet and the article is delivered within 24 hours by facsimile to the library. Patrons have the option of charging the document delivery to their credit card and having the fax sent directly to their office.

Research Support (continued)

Microbeam Elemental Analysis Facility

UAF, through the Department of Geology and Geophysics, maintains a Cameca SX-50 electron microprobe, a state-of-the-art instrument capable of determining elemental abundance (all elements heavier than Be) in areas as small as 1 micron in diameter. The system can map elemental distributions in small areas.

Office of Sponsored Programs

The Program performs a threefold mission. Primarily, it is responsible for researching funding opportunities to match interests at UAF, and to assist faculty and professionals in meeting their funding goals for research, scholarly activities, education, and service. Secondly, OSP assists with the preparation and submittal of funding proposals, and seeks to ensure that proposals meet University, State, Federal and funding agency requirements. Finally, OSP provides reports and analyses to UAF administration that are important for accountability and planning purposes.

Polar Ice Coring Office (PICO)

UAF hosts this international, NSF-funded program to extract ice cores from glaciers around the world, more than 3,000 meters deep, for a variety of research studies conducted by UAF and other NSF grantees. PICO draws upon, and enlarges, UAF's arctic experience, especially in engineering, and polar research. Ice sheets contain prehistoric records of annual precipitation, atmospheric temperature and composition, solar activity and volcanic eruptions; ice core samples therefore provide a detailed, historical database of climatological data which will be of inestimable value to analyze apparent global warming trends. PICO provides a variety of logistical and technical support to NSF-sponsored research in remote and/or glaciated regions of the world, such as Antarctica, China, Peru, Alaska and Wyoming. PICO designs and builds a hot water drill for use at South Pole Station to place neutrino detectors, one kilometer deep in the ice. Additionally, in close cooperation with UAF professors, graduate and native students, PICO conducts research and development on more efficient, environmentally safe drilling equipment and methods.

University of Alaska Press

The Press publishes scholarly nonfiction works in all disciplines concerning Alaska, the North Pacific Rim, and circumpolar regions. Submitted manuscripts receive the UA Press imprint after an Editorial Board, the final authority, gives its acceptance.

It has four continuing series which are briefly described below:

The *Classic Reprint Series* includes titles that are northern-specific, out-of-print, and of enduring excellence.

The *Monograph Series* is reserved for specialized scientific works, theoretical or applied, written by scholars in the field of study.

The *Oral Biographies Series* are about individuals whose life experiences and personal accomplishments provide an intimate view of the events, personalities, and influences that have shaped Alaska history. Each book tells the story of a person's life in his or her own words, based on oral history recordings that have been transcribed, compiled, and edited into a book-length account.

The *Rasmuson Library Historical Translations* is designed to publish historically important primary and secondary foreign language source material on Alaska in English. Many of the original documents are not readily accessible or, have become extremely rare.

Section 2

HIGHLIGHTS

Introduction

Section 2 contains academic and assessment information. Table 2.1 lists all degree and certificate programs offered at UAF by campus along with program attribute information, such as the minimum number of credits required for the degree. Tables 2.2 and 2.3 present two different measures of instructional workload; class size and sections taught data as well as student/faculty ratios. Tables 2.4 and 2.5 begin to provide assessment information concerning entrance test scores and grades earned at UAF. Lastly, Tables 2.7 through 2.9 summarize current domicile data on UAF alumni.

Changes from Fact Book '92

No new tables have been added to this year's Fact Book, however many of the tables have been redesigned for clearer readability. Table 2.2 on class size has been expanded to show detail on the department level. Table 2.3 on student faculty ratio and Table 2.5 on undergraduate grades now show statistics only on the department level. Graphs have been added to Tables 2.2 and 2.5 and additional graphs have been included in Tables 2.3, 2.4 and 2.6. Future year Fact Books will provide more assessment and outcomes information including results of the recently started survey on bachelor degree completers.

Highlights

- UAF added two new associate degrees in FY93, an A.A.S. in Native Language Education and an A.A.S. in Paralegal Studies.
- For the first time in five years, the overall UAF student faculty ratio increased. In FY93, the SFR was 14.9 (+9%). The greatest increases were for graduate/professional courses (+14%) and for lower division undergraduate courses (+11%). Developmental education courses had a moderate increase of 5% while upper division courses had no change from last year's ratio.
- The average Fall 1992 lower division lecture class size was 19 students, for upper division it was 15, and for graduate it was 10.
- In FY92, UAF graduated 712 students (-5%). The greatest increase was in associate degrees awarded at 103 (+17%). In addition, UAF graduated 52 AK Native bachelor's students; the most in its history.
- 50% of in-state UAF alumni live in the Fairbanks area while 28% live in the Anchorage-Palmer-Kenai area.

- NOTES: (1) Student FTE is a hypothetical student who enrolls in 15 undergraduate or 12 graduate credit hours per semester. The student FTEs in this table are course-based, not student-level based, indicators of productivity.
- (2) Faculty FTE is, for non-thesis/research/practicum/individual study/intern courses, equal to the number of fall semester undergraduate course credit hours taught divided by 12 and the number of graduate credit hours divided by 9. For thesis/research/practicum/individual study/intern undergraduate courses and courses with less than three students, equals student credit hours divided by (5 x 12); for similar type graduate courses, equals student credit hours divided by (3 x 9). No Faculty was equated to more than 1.00 faculty FTE.
- (3) Student Faculty Ratio is the student FTEs divided by the faculty FTEs.
- (4) Includes upper division and graduate/professional credit hours from Chukchi Campus, Interior Campus, and Northwest Campus.
- (5) Includes upper division and graduate/professional credit hours from Arctic Sivunmun Iisagvik College, Chukchi Campus, Interior Campus, Kuskokwim Campus, and Northwest Campus.
- (6) Includes Arctic Sivunmun Iisagvik College, Bristol Bay Campus, Chukchi Campus, Distance Delivery, Independent Learning, Interior Campus, Kuskokwim Campus, Northwest Campus, Tanana Valley Campus, and SFOS Juneau.
- Source: UAF Fall End of Semester SIS Extracts

NOTES: (1) Beginning Fall 1989, UAF began accepting either ACT or SAT scores.
 (2) Beginning Fall 1990, the Enhanced ACT replaced the ACT.
 (3) Both ACT and SAT scores are reported for students who took both tests.

NOTES: (1) A program with an 'X' indicates the program has been or is scheduled to be deleted; an 'S' indicates a temporary suspension of the program.
 (2) A dash in the AWARDS field indicates the program was not offered that year.
 (3) Currently offered programs are shaded if a) they are 10+ years old, b) since FY88, Masters and below have yielded less than 5 awards, doctoral less than 2 awards.
 (4) AVG SCH cells are shaded if SCH is: a) +50 for Certificate or Masters, b) +75 for Associates, or c) +155 for bachelors (UAF SCH only, excludes transfer SCH).

Section 3

HIGHLIGHTS

Introduction

Section 3 contains information on UAF students. The information concerning applications, admissions, and new/returning students is summarized in Tables 3.1 and 3.2. Table 3.3 through 3.5 show where UAF students came from by nation, state, or Alaskan community. Student attribute information is contained in Tables 3.6 through 3.9. Lastly, credit hour and FTE trend data are provided in Table 3.10 through 3.13.

Changes from Fact Book '92

Many of last year's tables have been redesigned this year for improved readability. In addition, new graphs were added and existing ones enhanced to highlight key comparisons or changes. Specifically, new graphs were added to Tables 3.1, 3.2, 3.7-3.9, and 3.11. Tables 3.6 and 3.10 now show 1989-92 indices (base year 1988) to show emerging trends.

Highlights

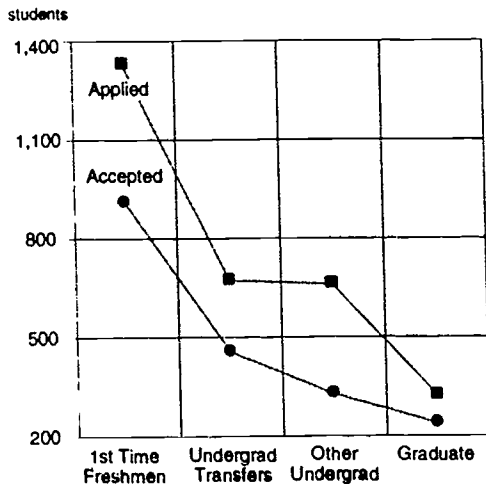

- Student headcount had a slight increase of 3% over the previous Fall, however there was a 11% increase in full-time students. In addition, there was a 29% increase in students from other states, a 18% increase in international students, and a < 1% increase in Alaskan students.
- Minority students increased by 11% in Fall 1992 with Hispanic students (+47%) and AK Native students (+12%) showing the greatest gains.
- Associate degree students increased by 23% in Fall 1992. There was a 7% increase in masters degree students, a 4% increase in bachelors students and a 3% decrease in non-degree seeking students.
- Associate of Arts students at the Tanana Valley Campus increased by 52%, jumping from 380 to 576 students. There was also a sizable increase in associate degree students in the College of Rural Alaska, going from 822 last Fall to 1,010 this Fall.
- Every college/school had an increase in masters degree students except the School of Mineral Engineering and the School of Management, whose greatest decrease was in MBA students.
- UAF continues to have modest growth with student credit hours (+8%). Credit hours increased in every course level with the largest gains in developmental SCH (+11%) and lower division SCH (+9%).

NOTES: (1) Yield is calculated by total applicants enrolled divided by applicants accepted.
 (2) The enrollment status of a student may vary from the original application status, creating variances between PCIS and A&F reports.

NOTES: (1) A program with an 'X' indicates the program has been or is scheduled to be deleted; an 'S' indicates a temporary suspension of the program.
 (2) A dash in the headcount field indicates the program was not offered that year.
 (3) An 'na' indicates data concerning this program were not applicable.

Section 4

HIGHLIGHTS

Introduction

Section 4 contains faculty and staff information as well as selected comparative salary statistics. Table 4.1 contains three years of trend data on full and part-time employees by job category. Table 4.2 contains data on full and part-time employees by gender, ethnicity, and job category for UAF colleges/schools and administrative divisions. Table 4.3 is a two year comparison of full-time employees by gender, ethnicity, and job category for UAF departments and administrative divisions. Tables 4.4 through 4.6 contain UAF-specific data on full-time faculty concerning tenure status, salary, demographics, highest degree earned, and years in rank by academic department.

Changes from Fact Book '92

Two new tables have been added to this year's Fact Book while one has been omitted. Table 4.1 adds three years of trend data on full and part-time employees by job category and Table 4.3 adds a two year comparison of full-time employees by gender, ethnicity, and job category for UAF departments. Last year's Table 4.6 on land-grant university faculty salary comparative data has been omitted this year. Last year's Tables 4.3 and 4.4 containing UAF-specific data on full-time faculty have been combined into a single table for 1993 (Table 4.5). In addition, new charts have been added and existing ones enhanced throughout the section.

Highlights

- Full-time employees slightly decreased to 1,639 (-1%). There were decreases in every job category except professional employees (+14%) and faculty (+1%).
- Part-time employees moderately increased to 1,757 (+4%). The two areas with the largest increases were professional employees which increased to 80 (+25%), and graduate assistants which increased to 228 (+15%). Part-time faculty decreased to 193 (-15%).
- In FY93, 235 (45%) of all UAF full-time faculty were tenured (58% of tenure track faculty) and 66% held doctorates.
- There were 45 minority faculty (9%) and of these 16 were tenured. 130 (26%) of all full-time faculty were female and of these females 36 (45% of female tenure track faculty) were tenured.
- Average FY93 salaries were lower for females in all full-time employee categories and the average full-time female salary was over \$14 thousand a year less than the average male.

NOTES: (1) The column labeled "% Minority", is the ratio of the number of resident non-white employees divided by the number of resident employees. An employee EEO category with 20 or more employees is shaded if its minority percentage lies outside the range 10% to 40%.
 (2) In the column labeled "% Female", a cell is shaded if the total number of employees is 20 or more and the percent that are female is less than 20%, or greater than 80%.
 (3) Some department designations / breakouts for employees (in SOE, CRA, SME, and some institutes) do not match the actual organizational structure. Academic information has been poorly maintained on the HRS system and also does not reflect current UAF policies regarding faculty. This situation necessitated extensive manual data manipulation prior to the creation of the tables in this section.
 (4) Includes one Professional Staff employee from Summer Sessions.
 Sources: UAF Fall '92 (October) HRS Extract; UAF Academic Affairs; College/School officers; Personnel Services; Faculty Development.

Section 5

HIGHLIGHTS

Introduction

Section 5 contains budget and financial information for the University as well as selected comparative statistics. Tables 5.1 through 5.4 include data on general UAF revenues and expenditures. Tables 5.5 through 5.7 contain UAF-specific data on state student financial aid, graduate support, and tuition rates. Tables 5.8 through 5.11 include comparisons between Alaska and other states.

Changes from Fact Book '92

Graphs have been incorporated into Tables 5.2 and 5.3 showing current funds revenue trends by funding source and current fund expenditures by function respectively. Additional graphs have been added and existing graphs improved upon in the remaining sections.

Highlights

- UAF unrestricted Education & General revenue increased by nearly \$5.0 million (+5%) in FY92. This can be attributed to an increase of \$1.8 million (+22%) in student fees, \$1.5 million (+2%) in state support, and \$0.9 million (+22%) in endowments/other. An increase of \$1.6 million (+3%) was realized in restricted fund revenues.
- Unrestricted expenditures increased by \$4.2 million (+4%). Instructional expenditures increased by the greatest dollar amount: \$1.6 million (+5%). Student Aid followed, with an increase of \$0.8 million (+60%).
- Unrestricted direct gift revenues increased by nearly \$0.4 million (+340%), however unrestricted gift revenues decreased by the same amount (-7%).
- Resident undergraduate tuition and fee charges at UAF are 3.4% greater (resident graduate 15.5% greater) than the average charges at comparable public universities in the Western U.S.
- 62% of the undergraduate students receiving State Student Loans were enrolled in-state while 29% of graduate students were enrolled in-state.
- Nationwide, there has been a downward trend in state support. Nineteen states reported two-year percentage decreases and 17 states reported one-year percentage decreases. Ten of these states had both negative one-year and two-year percentages or actual declines for 2 consecutive years.

FY85-93 State Appropriations Beginning vs Final

FY85-93 State Appropriations Final Authorization as a Percentage Above or Below Original Budget Request

NOTES Restructuring of rural campuses occurred in FY87.

(1) University Request includes adjusted base plus increments.

(2) FY88 increments included a reduction of \$15.0 million as a result of restructuring.

NOTES (1) Numbers are x \$1,000
 (2) In FY88, Endowment Income is recorded in Designated Funds which are reported under Statewide Programs and Services.
 (3) FY89-92 includes revenues from Research, SFOS Juneau and COOP Extension (CX).
 (4) FY88 is included in Fairbanks Campus

NOTES: Other tables vary from this one in the following ways:
 (1) Section 3 tables do not include full-time extended registration students as full-time.
 (2) Section 4 tables do not include research and teaching assistants working in other than the selected October pay period.
 (3) Instances where this column total exceeds 100% are due to departments paying for students outside their departments.
 (4) For FY92 total is part of Marine Science & Limnology Program.
 (5) For FY92 total is part of Business Administration Department.

NOTES: (1) The consolidated tuition rate was changed from 12 to 13 credit hours for FY90.
 (2) Students enrolled in only one credit hour are charged in-state rates regardless of residency status.
 (3) In FY92 students enrolled in lower division classes were charged \$43 & \$150/cr. hr. for resident and non-resident tuition respectively.

#1 RESIDENT STUDENT SOURCE. High school graduates per 1,000 population (B/A). This is the primary source of entering freshmen at public institutions in the state and is therefore the best single starting base for deriving total enrollments. The state's primary higher education responsibility is to provide post-secondary educational opportunities to its own resident high school graduates.

#2 PARTICIPATION RATIO. Annual full-time equivalent enrollment in public institutions of higher education per high school graduate (C/B). This ratio measures the degree to which a state provides attractive and accessible opportunities for higher education to both in-state and out-of-state students relative to the size of its resident student source. High ratios indicate states heavily in the "business" of higher education compared to their basic responsibility to high school graduates.

#3 TAX CAPACITY. The potential of state and local governments to raise revenues for public purposes through various kinds of taxes (D/A). Measured by a "representative tax system" that defines the tax capacity of a state and its local governments as the amount of revenue they could raise if all 50 state-local systems applied identical tax rates (national averages) to their respective tax bases. Adjustment by the COG index establishes equivalent state purchasing power by correcting for geographical price differences.

#4 TAX EFFORT. State and local tax revenues collected as a percentage of state and local tax capacity (E/D). Tax effort measures, as a percentage, how much of the state and local government tax capacity is actually used. The tax revenues collected for all states equals total tax capacity nationwide, so that the national effort, by definition, is 100 percent. Effort measures for the individual states indicate how they compare with the national average.

#5 ALLOCATION TO PUBLIC HIGHER EDUCATION. State and local tax revenue appropriated or levied for current operating educational expenses of public institutions. This ratio suggests the relative importance and requirements of financing public student education to the funding of other public services in the state and local government budgets. The ratio for total appropriations is shown in ().

#6 TUITION FACTOR. Student tuition revenue as a percent of total revenues from state and local government education appropriations plus student tuition revenue. This ratio suggests the relative importance of student tuition as a funding source compared to state-local appropriations. High ratios may reflect a large proportion of out-of-state students paying high non-resident tuition.

POTENTIAL TAX REVENUE PER STUDENT. These combined input factors establish a state's basic tax potential to finance public institutions relative to student enrollment load. Relatively stable tax potential to finance individual student's education without taking into account the types of institutions attended. Tax potential related to the state system's financial support requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power.

EDUCATION APPROPRIATIONS PER STUDENT. State and local tax revenues appropriated for current operating expenses of public institutions per annual FTE student. Indicates average state support to individual students without taking into account the types of institutions attended. Education approp's related to the state system's funding requirements are reported as an index (APP/SSI). Appropriations for research, agriculture, and medical are reported as a percent of total appropriations to suggest relative importance, and per capita as a new measure shown in ().

COLLECTIVE FINANCIAL ACTIONS. The combined actions are the factors that establish the degree to which the potential tax revenues per student are actually utilized to achieve the support level provided. States with high percentage are making a substantial combined tax effort, allocation to education, and tuition charge to finance public institutions.

NET TUITION REVENUES PER STUDENT. Tuition revenues of public institutions per annual FTE student. Indicates average tuition (less state appropriated student aid) paid by all resident and non-resident students without recognizing the types of institutions attended. Tuition related to the state system's funding requirements is reported as an index. Adjustment by the COG index establishes equivalent state purchasing power. Tuition revenues per student relative to disposable personal income per capita indicates tuition level relative to resident ability to pay.

Section 6

HIGHLIGHTS

Introduction

Section 6 focuses on UAF's research and public service functions. Tables 6.1 through 6.3 list research funding, proposal activity, and other measures of activity within each research institute. Tables 6.4 through 6.7 provide comparative information on UAF libraries and academic computing facilities. Lastly, Tables 6.8 to 6.10 highlight the following public service outreach functions at UAF: the Cooperative Extension Service, Museum, and KUAC broadcasting.

Changes from Fact Book '92

Throughout this section new graphs were added and existing ones enhanced to highlight key comparisons or changes. Table 6.4 on Library Statistics was redesigned for improved readability. Future year Fact Books will delimit improved measures of research and public service activity.

Highlights

- UAF was rated 90th out of the nation's top 100 research and development universities. Additionally, UAF led the nation in the number of National Science Foundation grants awarded in 1991.
- Faculty submitted 13% more research proposals in FY92 than in the previous year, for a total of \$111 million in outside funding.
- Utilization of the GNOSIS computerized library system leveled off in FY93. The number of patrons slightly decreased by 1% but the number of holdings included in the system moderately increased by nearly 3%.
- The number of personal contacts in the Cooperative Extension Program increased by 8% in FY92, however the contact hours decreased by nearly 14%.
- Museum visitations topped 143,000 in FY92, a 9% increase from FY91. July was the most frequented month with nearly 40,000 visitations.
- KUAC donor contributions decreased by 34% in FY92. The average donor contribution decreased to \$87, down by nearly 12% from the previous year.

NOTES: (1) Includes only Rasmuson Library and Research Libraries on the UAF Fairbanks Campus, 1990-91.
 (2) UAF is not an ARL research library.
 (3) ARL Institutes ranked six above and four below UAF in total spending on R&D from NSF Survey, FY91.
 (4) Not in the NSF top 100 for FY91.

NOTE: Utilization data from January 1, 1992-December 31, 1992; Holdings and patrons data as of January 18, 1993.

- (1) Some Rasmuson and Anchorage patrons were converted to Interlibrary Loan patrons.
- (2) BioMedical Library name changed to BioSciences Library.
- (3) Juneau's holdings programmatically linked were deleted in order to prepare for reloading from their system.
- (4) Decrease in patrons due to error in 1992 statistics.
- (5) FITC in Kodiak is a branch of BioSciences Library.
- (6) Interlibrary Loan patrons are shared and utilized by all sites.

Section 7

HIGHLIGHTS

Introduction

Section 7 contains descriptive statistics on UAF's buildings and includes several indicators of how well space is being utilized. Table 7.1 and 7.2 provide age, gross footage, investment values, and room use by building. Table 7.3 contains data on housing capacity and occupancy rates. Table 7.4 shows weekly classroom utilization by time of day. Lastly, Table 7.5 provides a three-year trend on the cost of leased space, how much is being leased, and where it is.

Changes from Fact Book '92

This year, Tables 7.1 and 7.2 have been redesigned for clearer readability and additional charts have been added showing various UAF building attributes. New charts have also been added to Table 7.3 which show statistics on UAF residential buildings. Future year Fact Books will include more information regarding instruction space utilization and attributes concerning UAF equipment, such as what equipment has been purchased, when, by what unit, for what purpose, and at what cost.

Highlights

- Seven out of every ten UA System buildings are part of the UAF physical plant. (57% of the total UA System gross square feet) Of all the UAF buildings, 54% are located on the Fairbanks campus, 37% are non-campus, and 9% are on branch campuses.
- UAF's current investment value of its buildings is \$5.29 billion. This is nearly a 1% increase over FY92's investment value.
- Half of UAF's buildings, which account for 64% of the total UAF gross square feet, are over 20 years old. 24% are over 30 years old. With an average building age of 24.3 years, UAF has the oldest plant of any of UA's institutions by a considerable degree.
- There was a net gain of over 16,000 gross square feet from FY92-93. This was primarily due to the addition of the Administrative Services building.
- Demand far exceeded supply for Fairbanks campus married student housing with 231 people wait listed for the 126 available units.
- Leased space and leased space rates remained constant from FY92-93.

TABLE 7.1 FY93 Building Inventory

Building Name/Title	Primary Use	INSITE Code	Year Acquired	Total GSF	Original Project Funding	Current Plant Investment Value	Current Plant Investment Value Per GSF
TOTAL UAF							
Fairbanks Campus	-	(138 Buildings)		2,252,984	\$164,109,549	\$471,388,286	\$209.23

% of UA System Total		(69% Buildings)		57 %	47 %	62 %	100 %

NOTES: (1) Year Acquired - the year the structure was first physically occupied.
 (2) GSF - Gross Square Feet.
 (3) AFES - Agricultural Farm and Experimental Station.
 (4) Current Plant Investment - the estimated funds required to recreate the entire facility in its current configuration in current dollars (based on changes in the RS Means Construction Index).
 (5) Excluded are leased facilities and certain remote research facilities, (e.g. Toolik Lake) which are sited on non-University owned land. They operate by virtue of annual renewals of use permits granted by the State.

- NOTES: (1) All units of measure in square feet.
 (2) AFES - Agricultural Farm and Experimental Station.
 (3) Study - Includes library processing rooms, stacks, and stack/reading rooms.
 (4) General Use - Includes assembly halls, coat rooms, dining halls, exhibit facilities, kitchen facilities, merchandising rooms, multi-purpose rooms, music listening rooms, and recreational facilities.
 (5) Residential - Includes dormitories, apartments, and single-family residences.
 (6) Non-assignable - Includes circulation areas, custodial areas, and public lavatories.
 (7) NUSF - Net Usable Square Feet.
 (8) Structural - Includes electrical closets, shaft space, and utility/mechanical rooms.

NOTES: (1) All leases were for 6 months and were not continued in FY91.

(2) UAF moved out of APU in 1988. Based on an agreement with UAA, UAF continued to subsidize rents.

(3) There was no change from FY91 to FY92.

Glossary

Academic Unit

Campus or center designation used by Admissions & Records for SIS processing.

Accepted

Person whose enrollment application credentials have been processed and approved by Director of Admissions.

Administrative Staff

Full-time employees whose assignments require primary and major responsibility for management of the institution, or a customarily recognized department or subdivision thereof. Included are the Chancellor, Vice Chancellors, Deans, Institute Directors, and other officers of academic departments whose principal activity is administrative in nature. Supervisory personnel of the technical, clerical, skilled craft, and maintenance forces are reported within those specific categories

Admitted

Student accepted for enrollment at the University.

Annualized Tuition, Fees

The total two-semester tuition charged for a student taking a courseload at the consolidated level or above. Annualized fees are the total two-semester fee charges a student taking a courseload at the consolidation level normally must pay.

Applied

Person who completed a UAF enrollment application form and is awaiting acceptance.

Associate Degree

Undergraduate degree. Minimum of 60 credits required.

Bachelor Degree

Undergraduate degree. Minimum of 120 credits required.

Base Year

The year used for the comparison of subsequent years' data.

Branch Campus

Bristol Bay (Dillingham), Chukchi (Kotzebue), Kuskokwim (Bethel), Northwest (Nome), Interior, Tanana Valley (Fairbanks), and Arctic Sivuunmun Ilisagvik College (Barrow). Also includes Distance Delivery and Independent Learning.

Certificate

Undergraduate program that can usually be completed in one year. Minimum of 30 credits is required (exception CHPs).

Class Standing

The division of students by the number of credits earned. (Freshman, Sophomore, Junior, Senior, Graduate).

Closing Enrollment

Headcount at the end of a semester after grades are posted.

Continuing

Students enrolled a previous semester as well as the current semester.

Credit Hours

Unit of measure toward attainment of degree. Approx: 1 credit = 1 hour lecture time/week for 1 semester.

Credits Carried

The number of credit hours for which a student is enrolled.

Daytime/Evening

Daytime classes begin after 6:00 a.m. and before 5:00 p.m. Evening classes begin at or after 5:00 p.m.

Degree

Award for completion of a program. Degrees available: Certificate, Associate, Bachelor, Ed.S., Master's, Ph.D.

Designated Funds

Current funds (funds expendable for day-to-day operations) not under state control and identified for a specific purpose.

Developmental

50-99 level courses. Preparatory courses that are not applied to major.

Direct Private Gift

Gifts made directly to the university by external entities.

Distribution

The spread in percent of degrees, enrollment, or credit hours through the university, or college.

Doctorate Degree

Ph.D, terminal graduate degree. Approximately 3 full years beyond bachelor degree.

Education Specialist Degree

Graduate degree. Minimum of 36 credits beyond a master's degree.

Glossary (continued)

Enrolled Credit Hours

Calculated. Number of credit hours multiplied by the number of enrolled students.

Enrollment

Number of students taking at least one course.

Ethnicity

Racial group with which person identifies (self-reported). International students are grouped together.

Extract Tape

A copy of selected data from SIS or HRS put on computer tape.

1st-time Freshman

Student not previously enrolled at any college.

Fiscal Year

A twelve-month period of time starting each July 1 including the summer, fall, and spring semesters.

Freshman

Class standing of a student with 0-29 credits.

Full Time Equivalent (FTE)

Calculated figure. Semester Student FTE: Undergraduate credit hours/15; Graduate credit hours/12.
Fiscal/Academic Student FTE: Undergraduate credit hours/30; Graduate credit hours/24.

Full-time Student

Undergraduate enrolled for 12 or more credit hours. Graduate enrolled for 9 or more credit hours.

Graduate

Student admitted to a master's or doctoral program. Credit Hours at the 600 level.

Headcount

An individual enrolled.

Hometown (Application City)

Community where student was receiving mail at the time of application.

Human Resource System

Database on which employee information is maintained (HRS).

Indices

Ratio of current year to base year measurement.

INSITE

Software package used to inventory and track UAF facilities.

Instruction/Research

Instruction and/or research laboratories.

Interdisciplinary

Individualized degree program significantly different from those already approved by the Board of Regents.

International

Non-U.S. citizens who are not permanent residents.

Junior

Class standing of student with 60-94 credits.

Leased Space

Space, not owned by UAF for which formal lease agreements have been arranged.

Level

Used to identify reports with undergraduate (lower, upper) and graduate credit hours or enrollment cohorts.

Lower Division

100-200 level courses.

Main Campus

Fairbanks Campus - Does not include TVC, Distance Delivery, or Independent Learning.

Maintenance Staff

Employees whose duties result in or contribute to the comfort, convenience, and hygiene of personnel and the student body, or which contribute to the upkeep and care of buildings, facilities, or grounds of the institution property.

Major

The degree program a student declares to be striving to complete.

Master's Degree

Graduate degree with minimum of 30 credits beyond the bachelor degree.

Glossary (continued)

Migration

Tracking of students from previous semester to show current class standing.

Minority

Person whose ethnicity is Alaska Native, American Indian, Asian, Black, or Hispanic. Not included are Whites, Unknown, Other, and International.

New Student

A student who has not previously been enrolled at UAF.

Non-degree seeking

A student not enrolled in a degree or certificate program.

Non-resident Tuition

Tuition charged students who do not claim Alaska residency.

Non-Tenure Track

Faculty not eligible for tenure; includes some instructors and visiting appointments.

Opening Enrollment

Headcount at the beginning of the semester. Usually taken at the end of the course add/drop period (3rd week).

Origin

State or community where the student was receiving mail at the time of application; citizenship is used as origin for international students.

Other

Students who cannot be categorized in another group.

Paraprofessional (CES)

Staff whose work is carried out under the supervision of a professional, either an agent or a specialist, and whose work is related to a specific program area. These include Pest Scouts, other Land Resources program efforts in connection with their specific area of expertise, and assistance agents in program delivery.

Part-time Faculty/Staff

All employees whose coding on the UACN HRS System indicates that they are part-time employees regardless of funding sources.

Part-time Students

Undergraduate students enrolled for less than 12 credit hours. Graduate students enrolled for less than 9 credit hours.

Professional Staff

Employees whose assignments require either college graduation or experience of such kind and amount as to provide a comparable background. These employees are not included in the Administrative, Faculty, Clerical, Technical, Skilled Crafts, or Maintenance categories.

Professional/Post Bach Courses

500 level courses.

Program

A field of study classified by CIP code, the major, and degree type.

Research Faculty

Employees whose primary assignments customarily are made for the purpose of conducting research as a principal activity; instruction and public service may be performed as additional activities.

Research Lab

Laboratory space not primarily used for classes.

Resident Tuition

Tuition charged Alaska residents, U.S. military & dependents, and residents of the Yukon and Northwest Territories.

Restricted Current Funds

Funds accepted by the university on the condition that they be used for donor-specified current operations. Upon accepting restricted funds, the university is legally bound to use the funds for the specified purpose or to refund them.

Returning Student

Previously enrolled student that returns after an absence.

Senior

Class standing of an undergraduate student with 90 or more credit hours

Glossary (continued)

Skilled Crafts Staff

Employees whose assignments typically require special manual skills and a thorough and comprehensive knowledge of the processes involved in the work, acquired through on-the-job training and experience or through apprenticeship or other formal training programs.

Sophomore

Class standing of an undergraduate student with 30-59 credit hours.

State Financial Aid

Grants and loans made to Alaskans attending approved schools, both inside and outside of Alaska.

Student Credit Hour

A unit of measure that represents one student engaged in an activity for which one hour of credit for a degree or other certificate is granted upon successful completion.

Student Information System

Database on which student information is maintained (SIS).

Technical Staff

Employees whose assignments require specialized knowledge or skill which may be acquired through experience or academic work that is offered in many two-year technical institutes, junior colleges, or through equivalent on-the-job training.

Tenure

Full-time faculty (regardless of funding source) whose coding on the HRS database indicates they have tenure.

Transfer Student

Student enrolling with credit from a previous college.

Trend

The change in a measurement with respect to time.

Undecided

Student who has been accepted as a degree-seeking student but has not decided on a major.

Undergraduate

Courses at the 100-499 level. Students who are not enrolled in a graduate program.

Unknown

Person did not provide information to determine category.

Upper Division

300-400 level courses.

Abbreviations

ACPE	Alaska Commission on Postsecondary Education
ACT	American College Test. Four sections (English, Math, Social Sciences, Natural Sciences).
CIP	Classification of Instructional Programs (U.S. DOE)
CLA	College of Liberal Arts
CNS	College of Natural Sciences
CPU	Central Processing Unit
CRA	College of Rural Alaska
EACT	Enhanced American College Test replaced ACT (English, Math, Reading, Science).
FT	Full-Time Students
FTE	Full-Time Equivalent (student or faculty)
HRS	Human Resource System
INE	Institute of Northern Engineering
INSITE	Institutional Space Inventory Techniques
SALRM	School of Agriculture & Land Resources Management
SAT	Student Achievement Test
SCH	Student Credit Hours
SFR	Student Faculty Ratio
SOE	School of Engineering
SFOS	School of Fisheries & Ocean Sciences
SIS	Student Information System
SOM	School of Management
SME	School of Mineral Engineering
TVC	Tanana Valley Campus
UAF	University of Alaska Fairbanks
WICHE	Western Interstate Commission for Higher Education
