ABSTRACT

This report presents the Texas Assessment of Academic Skills (TAAS) performance results to state officials and the public as required by state law. Compiled in two volumes, TAAS results are aggregated and reported for the state as a whole, for education service centers and individual districts, and in district demographic groupings. Section 1 provides an executive summary that highlights performance results for the 1991-92 school year. Section 2 give a TAAS program overview and provides information necessary for understanding what these test results mean for Texas education. Sections 3 through 10 summarize TAAS performance results for each grade level tested in the 1991-92 school year (grades 3, 5, 7, 9, 11, and 12). Results of a Spanish version of the test for grade 3 are also reported. Texas Educational Assessment of Minimum Skills (TEAMS) exit level results are given for grades 11 and 12. The TAAS results help show where progress has been made and where improvement is needed to achieve the goal of excellence and equity for all students. In October 1991, performance declined slightly or remained unchanged across most grades and subject areas compared with October 1990. Disparities in performance among various ethnic and economic groups continued to exist. Thirty-four figures and numerous tables illustrate test results. Ten appendixes provide additional information about the testing program and the test results, including information on standards and scoring. (SLD)

January 1993

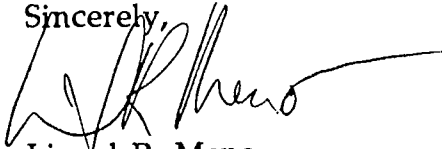

TO THE CITIZENS OF TEXAS:

This report presents Texas Assessment of Academic Skills (TAAS) performance results to the Governor, Lieutenant Governor, Legislature, State Board of Education, school officials, and other citizens interested in Texas public schools, as required by Section 21.556(b) of the Texas Education Code. Compiled in two volumes, the TAAS performance results are aggregated and reported for the state as a whole, for education service centers (ESCs) and individual districts, and for various student and district demographic groupings.

Section I of this volume provides an executive summary that highlights TAAS performance results for the 1991-1992 school year. Section II gives an overview of the TAAS program and provides detailed information essential to a thorough understanding of these performance results. Sections III through X present summaries of the TAAS performance results for each grade level tested during the 1991-1992 school year. Texas Educational Assessment of Minimum Skills (TEAMS) exit level results are provided for Grades 11 and 12. Volume II presents the October 1991 district-level TAAS performance results aggregated by grade level including scale score gain/loss comparisons with the October 1990 results.

The TAAS performance results help determine where progress has been made and where improvement is needed to achieve our goal of excellence and equity for all students. In October 1991 performance improved slightly or remained unchanged across most grades and subject areas compared with the October 1990 results. However, despite improvements in reducing the gap in performance among various ethnic and economic groups, disparities in performance continue to exist among our students. As educators and concerned citizens, we must continue to work together to ensure that each student is equipped with the academic skills necessary to meet the challenges of the twenty-first century.

Sincerely,

Lionel R. Meno  
Commissioner of Education

# Section I

## Executive Summary

I am confident that we, working together with a new system that holds the child and world class results as nonnegotiable, can achieve our goal; excellence and equity in Texas education. Our goal is student achievement.

Commissioner Lionel Meno speech to the Beaumont Chamber of Commerce, October 21, 1991

The commissioner has challenged Texas public schools to strive for excellence and equity in student performance. Excellence in student achievement ensures that all students are prepared to meet the challenges presented by a changing world. Excellence in education cannot be achieved separate from the attainment of equal performance among all population groups. The goal for the assessment program in Texas is to establish real world standards and measure student progress toward achieving them. This report outlines the first two years of Texas Assessment of Academic Skills (TAAS) performance results, highlighting where progress has been made and where improvement is still needed to reach these goals for all students.

### EXCELLENCE IN STUDENT PERFORMANCE

The challenge for education in Texas is to provide the instructional programs necessary so that at least ninety percent of students across all grade levels achieve minimum expectations on TAAS.

The statewide results displayed in the preceding chart compare the percent of students meeting minimum expectations on all tests taken between October 1990 and October 1991 at the seventy percent standard.

### Assessment Program Overview

The Texas Assessment of Basic Skills (TABS) testing program implemented in 1980 followed by the Texas Educational Assessment of Minimum Skills (TEAMS) program in 1985 both measured minimum basic skills in writing, reading, and mathematics. In October 1990, the Texas Assessment of Academic Skills (TAAS) testing program was administered for the first time at Grades 3, 5, 7, 9, and 11 (exit level). The TAAS focuses on the assessment of higher order thinking and problem-solving skills rather than minimum basic competencies that had been targeted in previous testing programs. Like its predecessors, the primary purpose of TAAS is to provide an accurate measure of student achievement in the areas of writing, reading, and mathematics. However, TAAS broadens the scope of content eligible for testing to provide a more comprehensive assessment of the instructional targets delineated in the essential elements.

State law mandates that high school students must pass the criterion-referenced exit level test in order to be eligible for a Texas high school diploma. Currently, TAAS is the state testing program used to satisfy the graduation requirement as outlined in state law. Passing standards were phased in during the first year of TAAS assessment to accommodate student preparation during program transition. During the 1990-1991 school year the State Board of Education set a phase-in standard for minimum expectations of sixty-five percent of the items correct at Grades 3 and 5 and sixty percent of the items correct at Grades 7, 9, and 11. Beginning in the 1991-1992 school year, the State Board increased the minimum expectations standard for each grade level to reflect the current standard of the equivalent of seventy percent of the items correct based on the October 1990 form of the test. All comparisons of TAAS results between the October 1990 and October 1991 administrations are based on the performance results scored at the seventy percent standard.

The percent of students mastering all objectives on all tests taken in October 1991 reflects either no change or a slight decline when compared with the October 1990 results.

The following graph illustrates the low percentages of students mastering all objectives on all tests taken in October 1990 and October 1991. The skills tested on each objective reflect instructional content drawn directly from the

essential elements, the state's mandated curriculum for all students. It is clear that state and local implementation of proven programs is required to accelerate student achievement in all subject areas on subsequent test administrations.

Further detail is provided in the chart below which illustrates the percent of students mastering all objectives by subject area in October 1991. Overall, the highest percentages of students achieved mastery on all objectives in the subject area of reading, while mathematics exhibited the lowest mastery rate of the three subject areas tested.

---

## Academic Recognition

Academic Recognition, the highest level of excellence acknowledged in the TAAS assessment program, was achieved by less than one percent of the students tested in Grades 5, 7, 9, and 11.

Academic Recognition acknowledges students who have attained a standard of excellence on TAAS indicative of a higher level of proficiency in reading, mathematics, and written expression. The criteria for achieving Academic Recognition require a student to score a 4 on the written composition, master all objectives in each subject area, and answer correctly at least 95% of the items in all three subject areas. The table below indicates the number and percent of students tested who received Academic Recognition at each grade level. In October 1991 Grade 3 had the highest percentage of students receiving Academic Recognition. However, the low number of students overall satisfying the requirements for this level of accomplishment emphasizes the need to encourage students in all grade levels to set high educational goals across all subject areas.

### Texas Assessment of Academic Skills Number and Percent of Students Achieving Academic Recognition October 1991

	Number of Students	Percent of Students
Grade 3	2,543	1.0%
Grade 3 Spanish	182	1.3%
Grade 5	1,085	0.4%
Grade 7	877	0.4%
Grade 9	849	0.4%
Grade 11	884	0.5%

## Scale Score Performance

Scale score performance improved slightly in most grade levels for each subject area assessed in October 1991.

The scale score provides information about performance in addition to the meeting minimum expectations standard. The TAAS scale score ranges from below 1000 to above 2000 with a scale score of 1500 equivalent to approximately 70% of the items correct at each grade and subject area based on the October 1990 form of the test. The information outlined in the table below compares scale score performance of students from the October 1990 and October 1991 administrations. Statewide results show the largest scale score gains occurred in writing at Grades 3 (Spanish version), 5, and 11 and in reading at Grade 7.

**Texas Assessment of Academic Skills  
Scale Score Performance Gains and Losses  
October 1990 - October 1991**

	Writing		Reading		Mathematics	
	October 1991	Gain/ (Loss)	October 1991	Gain/ (Loss)	October 1991	Gain/ (Loss)
Grade 3	1562	(11)	1664	14	1676	13
Grade 3 Spanish	1466	25	1523	(14)	1595	22
Grade 5	1619	22	1565	12	1542	13
Grade 7	1557	1	1487	31	1506	3
Grade 9	1552	12	1538	(7)	1474	0
Grade 11	1633	21	1600	(9)	1547	(7)

**EQUITY IN STUDENT PERFORMANCE**

*Ethnic Groups*

Comparative results indicate that significant disparities in student performance still exist among the three major ethnic groups in Texas.

The goal of equity in student performance constitutes a challenge to educate all students to the level of achievement required by the real world. The following graph clearly illustrates the performance gaps among the three major ethnic groups in Texas.

The following chart compares the differences between the percentage of Hispanic students meeting minimum expectations and the percent of white students attaining the passing standard in each subject area and on all tests taken. At Grade 3, for example, the percent of Hispanic students meeting minimum expectations in writing was twenty percentage points lower than the results for white students. The largest disparities in performance between Hispanic and white students occurred in reading and mathematics at Grades 7 and 9.

The October 1991 performance results reveal a greater level of disparity in student performance between African American students and white students than between Hispanic students and white students.

Comparisons of performance between African American and white students reveal similar disparities in performance across all grade levels as evidenced in the following graph. The largest gaps in student performance between African American students and white students exist in the area of mathematics with differences of thirty percentage points or more in four of the five grade levels tested.

Although significant disparities are evident when comparing student performance between ethnic groups overall, there has been progress to reduce certain gaps in performance among population groups. The graph below displays scale score gains and losses in mathematics for each ethnic group between October 1990 and October 1991 for Grades 3, 5, 7, and 9.

## Special Populations

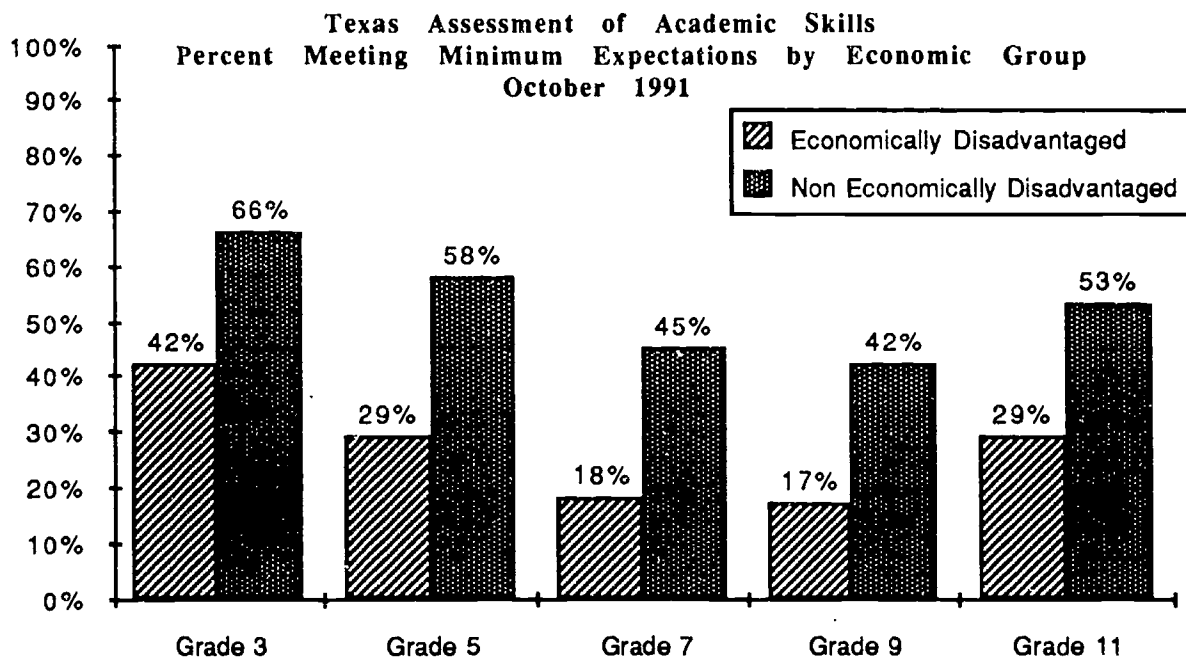

Differences in performance between special population students and students not in those categories suggest that a substantial shift must occur to encourage improvement in equity issues.

Categories of students considered as special populations include limited English proficient students (LEP) and students identified as at-risk of dropping out of school. Comparisons between special population students and students not in those categories reveal significant gaps that must be reduced to achieve educational equity for all students.

Limited English proficient students tested in October 1991 performed well below non-LEP students across all grades. Grade 3 reflected the least amount of disparity between LEP and non-LEP students with a student achievement gap of thirty percentage points. Grades 5, 7, 9, and 11 showed performance differences on all tests taken between thirty-three to forty-two percentage points.

Similar disparity was revealed between students identified as being at-risk of dropping out of school and those students not identified as at-risk. Differences of thirty-one to thirty-nine percentage points were noted between students identified as at-risk and those not identified at-risk across all grade levels in October 1991.

## Economic Groups

As shown in the preceding chart, students identified as economically disadvantaged through participation in a free or reduced price meal program

showed passing rates twenty-four to twenty-nine percentage points lower than non-program participants. Likewise, students enrolled in a Chapter 1 Regular program generally achieved passing rates twenty-nine to forty percentage points lower than students not enrolled in a Chapter 1 Regular program.

### SUBJECT AREA PERFORMANCE: WRITING

Statewide student performance in writing improved between October 1990 and 1991 in three of the five grade levels assessed.

The TAAS writing assessment required students to develop a written composition on a given topic and respond to a number of multiple-choice items related to appropriate use of language in the context of a written passage. Statewide performance in writing showed slight increases at Grades 5, 9, and 11, while student performance at Grades 3 and 7 showed declines from October 1990. Writing performance results from October 1991 indicate that Grades 5, 9, and 11 are making steady progress in student achievement while Grade 7 results reflect the lowest percentage of student success in the area of writing.

### Writing: Written Composition Performance Assessment

The writing assessment requires students to produce a written essay in response to a specific topic or task. Throughout all grade levels assessed, student performance was consistently high on the written composition section of the writing test. Grade 5 students achieved the highest passing rate

on the written composition (90%) of all grade levels tested compared to students at Grade 9 who experienced the lowest rate of success (76%).

Four of five grade levels assessed achieved a passing rate of eighty percent or higher on the written composition performance portion of the writing assessment.

Eighty-five percent of the Grade 11 students, eighty-six percent of the Grade 7 students, and eighty percent of Grade 3 students met minimum expectations on the written composition by achieving a score point of 2 or higher. Students participating in the Spanish version of the Grade 3 writing test do not have a written composition requirement.

An analysis of writing results by objective shows that the October 1991 performance results on the written composition were similar across ethnic groups.

While African American and Hispanic student success rates were generally lower than the success rates of white students in writing overall, the following table shows that performance results among all ethnic groups on the written composition were comparable. At Grade 7, for example, eighty-one percent of the African American students and eighty percent of the Hispanic students met minimum expectations on the written composition, compared with a ninety-one percent passing rate for white students.

**Writing Objective Performance by Ethnic Group  
October 1991**

	Written Composition	5	Objective 6	7
<b>Grade 3</b>				
African American	70%	70%	72%	52%
Hispanic	74%	75%	70%	52%
White	86%	85%	88%	65%
<b>Grade 5</b>				
African American	86%	57%	72%	33%
Hispanic	87%	59%	74%	32%
White	94%	78%	87%	48%
<b>Grade 7</b>				
African American	81%	60%	34%	23%
Hispanic	80%	61%	51%	24%
White	91%	80%	71%	43%
<b>Grade 9</b>				
African American	69%	31%	52%	19%
Hispanic	67%	34%	60%	16%
White	85%	60%	84%	29%
<b>Grade 11</b>				
African American	80%	41%	74%	38%
Hispanic	79%	42%	77%	37%
White	89%	62%	93%	56%

As rates of success for written compositions are compared across grade levels, it is evident that the largest percentage of students achieved success on the written composition section by only meeting minimum expectations as represented by a rating of 2. As indicated in the table below, very few students were able to achieve a rating of 4 which signifies the highest level of written expression on the TAAS.

**Percent of Students Achieving Each Written Composition Rating  
October 1991**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
Grade 3	20%	57%	20%	3%
Grade 5	10%	52%	35%	3%
Grade 7	14%	45%	33%	8%
Grade 9	23%	37%	33%	6%
Grade 11	15%	45%	36%	4%

Rating of 1 – Response that attempts to address the task but is not successful

Rating of 2 – Response that is minimally successful at addressing the writing task; presents ideas with limited elaboration

Rating of 3 – Response that represents a good attempt at addressing the writing task; ideas are extended, organized and clearly stated; writer uses elaboration consistently

Rating of 4 – Response that is specific, and well elaborated with many ideas presented in a clear and logical manner; the composition reflects a high level of written expression

The Written Composition Analytic Information Summary Reports reveal that the vast majority of essays which did not meet minimum expectations were lacking sufficient support and/or elaboration.

Written compositions identified as not meeting minimum expectations were analyzed to identify their specific areas of weakness. Essays receiving analytic scoring may have received annotations in more than one analytic category to indicate multiple remediation needs. The resulting analytic report was provided to campuses and districts for their information and to use as a tool in targeting instruction. The graph below illustrates the percent of compositions receiving analytic scoring for each annotation category across all grade levels.

**Texas Assessment of Academic Skills  
Analytic Categories for Written Compositions Receiving a Score of One  
October 1991**

**Writing: Multiple-Choice Assessment**

Statewide student performance in October 1991 indicates that editing skills involving spelling, punctuation, and capitalization require further remediation at all grade levels.

When data from the written composition are compared with data from Objective 7 (spelling, punctuation, and capitalization), it appears that while students are succeeding at basic communication on a written composition, editing skills are not yet well-developed for students across grades. The written composition does not represent polished writing, and errors such as those tested in Objective 7 are not evaluated negatively unless they occur to such a degree that the composition's meaning is weakened.

**SUBJECT AREA PERFORMANCE: READING**

The largest gain noted in the statewide results in October 1991 was a five percentage point improvement at Grade 7 for students meeting minimum expectations in reading.

The reading assessment measures the ability of students to read for a specific purpose and requires students to read selected passages and respond to multiple-choice questions based on information gained from the text. Comparisons of reading results across grades indicate that objective-level success rates varied widely across grade levels. For example, Grade 11 students had the most difficulty with the objective requiring students to recognize point of view, propaganda, fact and nonfact in a variety of written texts (40% mastery), while eighty-four percent of the Grade 3 students demonstrated mastery for this objective.

**Texas Assessment of Academic Skills  
Percent Meeting Minimum Expectations in Reading  
October 1990 - October 1991**

### SUBJECT AREA PERFORMANCE: MATHEMATICS

The mathematics concepts assessed on the TAAS reflect skills students will need to compete in today's world. The development of student outcomes and expectations in mathematics mirror the high standards for student achievement set by the National Council of Teachers of Mathematics (NCTM).

Statewide results indicate the lowest level of overall student success in October 1991 occurred in the area of mathematics.

No substantial growth was realized in mathematics between October 1990 and October 1991. Student performance in mathematics in October 1991 improved at Grades 3, 5, and 7 since October 1990, though passing rates declined slightly at Grades 9 and 11. The graph below presents the percent of students meeting minimum expectations in mathematics for the October 1990 and October 1991 administrations scored at the seventy percent standard.

**Texas Assessment of Academic Skills**  
**Percent Meeting Minimum Expectations in Mathematics**  
**October 1990 - October 1991**

Student performance in mathematics is assessed in three domains: Concepts, Operations, and Problem Solving. The instructional targets assessed in the Concepts domain include understanding of algebraic concepts, geometric properties and relationships, measurement concepts, and probability and statistics. Students demonstrate knowledge of addition, subtraction, multiplication, and division to solve problems in the Operations domain while students must employ various strategies and methods to solve mathematic problems in the Problem Solving domain.

Across grade levels, students performed more successfully on objectives in the Concepts Domain than on objectives in the Operations Domain, while the lowest objective-level mastery rates occurred in the Problem Solving domain. The Problem Solving domain represents assessment of higher order thinking skills including analysis and interpretation that have not been emphasized or tested in this manner in previous statewide assessment programs. Students across all grade levels experienced difficulty with Objective 11 which required students to identify appropriate strategies in developing solutions to mathematic problems.

### REMEDIATION

Section 21.557 of the Texas Education Code mandates that remedial instruction must be offered for students that do not achieve the passing standard in a subject area.

More than fifty percent of the students tested in Grades 5, 7, 9, and 11 will require remediation in one or more subject areas.

At Grade 11, fifty-two percent of the students tested did not meet minimum expectations in one or more sections of the exit level test in October 1991. These students were provided retesting opportunities during the April 1992 and July 1992 exit level administrations. Grade 12 students requiring exit level retesting after the July 1992 administration will have two more testing opportunities to meet the TAAS graduation requirement before the end of their senior year.

Statewide, 166,172 Grade 9 students constituting sixty-six percent of the students tested, will need remediation in one or more subject areas. Planning for the instructional needs of the Grade 9 students requiring intensive remediation on the specific objectives and subject areas should begin to prepare them for the exit level TAAS test. The October 1991 TAAS administration identified the following numbers of students requiring remediation in one or more subject areas.

---

**Number and Percentage of Students Needing Remediation  
October 1991**

---

	Number Failing One or More Tests	Percentage of Students Tested
Grade 3	108,768	44%
Grade 3 Spanish	9,716	67%
Grade 5	136,352	54%
Grade 7	160,016	65%
Grade 9	166,172	66%
Grade 11	98,024	52%

## Section II

### Overview

#### BACKGROUND

The Texas Assessment of Academic Skills (TAAS) testing program, implemented in the 1990-1991 school year, measures academic skills in writing, reading, and mathematics emphasizing the assessment of the student's higher order thinking and problem-solving skills. Its predecessors, the Texas Assessment of Basic Skills (TABS) testing program implemented in 1980 followed by the Texas Educational Assessment of Minimum Skills (TEAMS) program in 1985 measured minimum basic competencies in writing, reading, and mathematics.

TAAS extends and expands the previous statewide tests to address the academic requirements of the 1990's and beyond.

TAAS, like its predecessors, is a criterion-referenced test that relates test items to specific learning objectives. The TAAS objectives/instructional targets are drawn from the essential elements delineated in the *State Board of Education Rules for Curriculum*. Each subject area contains a certain number of broad objectives that are consistent from grade to grade. The instructional targets - or essential elements - that comprise each objective, however, differ from grade to grade. A portion of these instructional targets is selected for assessment annually, but the specific targets tested vary from year to year and not every instructional target is tested every year. The objectives and instructional targets for the TAAS test are outlined in the appropriate *TAAS Objectives and Measurement Specifications* for each grade and subject area tested.

The TAAS tests measure the objectives/instructional targets that should have been mastered in previous grades. For example, the Grade 5 TAAS test measured objectives based on essential elements through Grade 4. For Grades 3 (English only), 5, 7, 9, and exit level, students must demonstrate performance in writing by producing a written composition on a given topic. (The Grade 3 Spanish version and the exit level TEAMS test do not have a written composition requirement.)

In October 1991, TAAS was administered to approximately 1.2 million students in Grades 3, 5, 7, 9, and exit level. In addition, the Texas Educational Assessment of Minimum Skills (TEAMS) testing program continued at exit level for eligible individuals. (Section 101.2(e) of the Texas Administrative Code states that no exit level student is required to take an examination measuring objectives different from those assessed at the time the student was first eligible to take the exit level test.)

---

Texas public high school students must pass all sections of the exit level test in order to be eligible to receive a Texas high school diploma. Section 21.551 of the Texas Education Code states that a student "may retake those sections of the assessment instrument on which [he/she] has not performed satisfactorily." It is intended that students have multiple opportunities to master the exit level test during their junior and senior years. Students eligible to take the exit level test were given an additional opportunity to test in July 1992. In addition, an individual who has fulfilled all graduation requirements except mastery of the exit level test may retake the section(s) not passed each time the test is administered.

### **FUTURE ASSESSMENT PROGRAM**

In April 1992 the State Board of Education adopted the recommendations of the Committee on Student Learning and the Legislative Education Board to redesign the statewide assessment program. The 1992-1993 school year will begin the transition to the new assessment program which will measure a broader range of the curriculum and the essential elements. The primary focus of the redesigned testing program will be to provide achievement data for accountability purposes. In addition to the present content of reading, writing, and mathematics, the future assessment program when fully implemented will include assessments of science, social studies, computer literacy (computer-based technology), oral proficiency in a second language, and physical fitness/health (wellness). End-of-course tests will be developed in selected high school subjects to ensure that high standards are maintained in the Texas high school curricula across districts and campuses.

The redesigned assessment program will be primarily performance based, using measurement strategies that can be integrated into effective instructional programs. The assessments will be criterion-referenced and developmentally appropriate. Both the administration of the assessment instruments and the collection of achievement data from performance tasks will take place at the end of Grades 4, 8, and 10 (exit level).

### **DEVELOPMENT OF THE ASSESSMENT INSTRUMENTS AND TEST QUALITY**

The TAAS testing program was developed through a comprehensive process with the goal of ensuring that assessment instruments of the highest quality were created, and that these instruments would accurately reflect what Texas students are being taught. Each test item was carefully examined for potential bias toward culture, ethnicity, or gender. For more detail regarding the development process of the TAAS program, please refer to Appendix B. Appendix C explains the measures used to ensure the validity and reliability of the test instruments.

### **PERFORMANCE STANDARDS**

Minimum expectations represents the TAAS minimum accepted passing standard. In July 1990 the State Board of Education adopted a minimum expectations level equivalent to approximately 70% of the items correct on

---

each subject area test. On the writing test the Board also required that student obtain at least a 2 on the written composition. An explanation of the measurement of TAAS writing skills is provided in Appendix D.

A scale score of 1500 for each subject area test was established to correspond to the minimum expectations level. The designation of a scale score of 1500 as the minimum expectations level remains constant across administrations. The 70% equivalent standard, however, was phased in and the 1991-1992 TAAS results were the first to reflect this standard. During the transition year of 1990-1991, the TAAS minimum expectations level was set at 65% for Grades 3 and 5 and 60% for Grades 7, 9, and exit level. In this volume, comparisons of TAAS results between the October 1990 and October 1991 administrations reflect results scored at the 70% equivalent standard.

Exit level students who were first eligible to test during the 1990-1991 school year and who did not meet the minimum expectations requirements or still need to take all sections of the test are evaluated with the 1990-1991 standard, in accordance with Section 101.2(e) of the Texas Administrative Code.

If a student masters all multiple-choice test objectives for a given subject area test, he or she has met the requirements for a higher level of achievement of mastering all objectives. For the writing test, a student must have also achieved a 3 or 4 on the written composition in order to attain this standard. In order to master a TAAS objective, a student must have answered correctly a specified number of multiple-choice test items. Appendix E outlines the TAAS performance standards for the 1991-1992 school year.

Academic Recognition, the highest level of excellence, is awarded to a student who mastered all objectives and answered correctly at least 95% of the items on each subject area test for all subject areas in addition to achieving a 4 on the written composition. This standard for academic recognition was implemented beginning in the 1991-1992 school year. Exit level students are eligible to receive Academic Recognition only if they are testing for the first time in all three subject areas.

In the 1990-1991 school year academic recognition was defined differently. Students who tested at this time received academic recognition if they mastered all objectives within a subject area and in writing if they also attained a 4 on the written composition.

For exit level TEAMS, students were required to answer correctly at least three of the four items measuring that objective in order to achieve objective mastery. For students who took the TEAMS exit level test for the first time in October 1988 or later, the minimum scale score required for mastery in English language arts and in mathematics is 700. A student who retakes one or both sections of the exit level test must meet the passing standard in effect when the student first attempted the exit level TEAMS test.

---

## STUDENT PERFORMANCE MEASURES

There are several statistics reported in this publication that are useful in evaluating student performance.

**Minimum Expectations:** For the individual student, meeting minimum expectations in a subject area is reported with a "YES" or a "NO." This information is aggregated on the summary reports as the percent of students that met minimum expectations on all tests taken. In addition, the summary report also provides the percent of students who mastered all objectives on all tests taken.

**Scale Score (TAAS):** The scale score is a statistical conversion of the number of multiple-choice items correct (raw score). The Rasch item response theory model first is used to transform the number of items correct into an ability estimate for each student. A linear transformation of the Rasch ability scale is then used to derive the TAAS scale scores. For the writing test, the scale score computation also includes the rating (0-4) achieved on the written composition. TAAS scale scores range from below 1000 to above 2000. In each grade and subject area, a scale score of 1500 is equivalent to approximately 70% of the items correct based on the October 1990 test form.

The individual's scale score provides more information about the examinee's performance than just ascertaining whether the minimum expectations level has been met. It can be compared to the average scale score in order to draw conclusions about individual student performance. Likewise, the average scale score allows for comparisons among groups of students *within a given grade and subject area*. For a given grade and subject, equal differences in scale scores among groups of students reflect approximately equal differences in student performance.

Scale scores are not comparable across subject areas or across grade levels. For example, the scale score for Grade 3 mathematics does not represent the same information as the scale score for Grade 3 reading or for Grade 5 mathematics. However, the scale score adjusts for variations in test difficulty from year to year within a grade level. Therefore, it is possible to compare October 1991 student results with scale score results from the October 1990 administration or with achievement in subsequent years. Appendix F presents the TAAS raw score to scale score conversion tables for writing, reading, and mathematics at each grade level for the October 1991 and Spring 1992 administrations.

**Scale Score (TEAMS):** The TEAMS scale score has the same characteristics as the TAAS scale score. The maximum TEAMS scale score is 999, with 700 representing the equivalent of approximately 70% of the multiple-choice items correct.

---

## TEST SECURITY

Both the Texas Assessment of Academic Skills (TAAS) and the Texas Educational Assessment of Minimum Skills (TEAMS) are secure testing programs as established by Section 21.556 of the Texas Education Code. Each person with access to test materials has the responsibility to maintain and preserve the security and confidential integrity of the TAAS and TEAMS tests in order to ensure a fair and standardized test administration.

Test security involves the ability to account for all secure materials before, during, and after test administration. Each test booklet has a unique security number printed on it. Test booklets are assigned to each campus by these unique security numbers. Confidential integrity involves protecting the contents of each test booklet and answer document to ensure that testing materials are not duplicated and that there is no unauthorized viewing of the contents of test booklets and answer documents.

Because of the importance of test security, the Texas Education Agency has identified possible penalties for violation of test administration procedures or test security regulations. Penalties to the professionals involved in test security violations are outlined below:

- a permanent reprimand affixed to the face of all Texas Teacher Certificates and other education credentials;
- a one-year suspension of all Texas Teacher Certificates and other education credentials;
- a permanent cancellation of all Texas Teacher Certificates and other education credentials.

Any irregularities in test security or confidential integrity may result in the invalidation of student results.

## REPORT FORMAT

This report is organized by grade, so that Grades 3, 3 Spanish, 5, 7, 9, 11, and 12 each have a separate section. Each grade-level section contains the following:

- a narrative summary of performance of all students tested;
- statewide Summary Reports;
- statewide Written Composition Analytic Information Summary Report;
- statewide Demographic Performance Summary Report;
- a summary of aggregated district performance by demographic and regional variables (the District Analysis Report).

---

The narrative summary of performance, provided for each grade level, analyzes performance results for all students tested. The narrative summary highlights information found in the grade-level specific statewide Summary Reports, the Demographic Performance Summary Report, and the District Analysis Report. For Grades 3, 3 Spanish, 5, 7, 9, and 11, the narrative summary compares the results of the October 1990 and October 1991 administrations scored at the 70% standard. The Grade 11 exit level section also include analyses of the Spring 1992 and Summer 1992 Grade 11 TAAS results.

The Grade 12 narrative summary provides comparisons of Grade 12 student performance between the October 1991 and Spring 1992 administrations. An analysis of the exit level results for the first four exit level TAAS administrations is also included followed by a brief summary of the Grade 12 results from the Summer 1992 administration.

The statewide TAAS summary data are grouped into reports for all students, special education students, and nonspecial education students. The TAAS Summary Report is divided into two sections: test performance and group characteristics. The test performance section reports objective-level mastery, average scale score, as well as the number and percent of students meeting minimum expectations and mastering all objectives in each subject area. For the writing test, the Summary Report includes the number and percent of students attaining each written composition rating. The group characteristics section presents the number of answer documents submitted, the number of students tested, and the number of students exempt or absent from testing. In addition, under the group performance heading, the group characteristics section displays performance results by various demographic and program participation categories. A number of the demographic and program participation categories, denoted with an asterisk (\*) on the Summary Report, reflect the student's status as of March 15, 1991, rather than the testing date. For each category, the number of students tested, the percent of students meeting minimum expectations on all tests taken and the percent of students mastering all objectives on all tests taken are reported.

The statewide Written Composition Analytic Information Summary Report is provided for each grade level, except Grade 3 Spanish which does not have a written composition requirement. Written compositions receiving ratings of 0 or 1 were scored analytically to provide specific reasons the composition did not meet the minimum expectations standard. The analytic information summary specifies the number of papers characterized by each of the analytic notations.

The Summary Reports are followed by the statewide Demographic Performance Summary Report, which provides detailed results for each demographic and program participation category. The Demographic Performance Summary is presented in a two-page format divided into two sections: writing/reading and mathematics. The number of students tested, the percent mastering each objective, average scale score, the percent meeting minimum expectations, and the percent mastering all objectives are reported by subject area for each demographic and program participation category.

---

The District Analysis Report provides TAAS results aggregated by various demographic groupings of school districts. Districts are grouped into a number of demographic categories, such as size, district type, property wealth per pupil, tax effort, and enrollment groupings. The District Analysis Report also includes results aggregated by the twenty education service center (ESC) regions. The District Analysis Report provides the following performance results for all students tested: the number of students tested, the percent meeting minimum expectations on all tests taken, scale scores by subject area, the scale score gain/loss between October 1990 and October 1991, and the number of students needing remediation in one or more subject areas. Appendix H provides an explanation of the demographic categories found in the District Analysis Report.

Performance results for Grade 11 and 12 students who took the exit level TEAMS test in October 1991 and Spring 1992 are summarized in Section V, "TEAMS Exit Level Results." TEAMS out-of-school examinee results are also analyzed briefly. The Grade 12 TEAMS Summary Reports for the October 1991 and Spring 1992 administrations aggregated for all students tested are included in Appendix I.

Appendix J includes the Grades 11 and 12 TAAS Summary Reports for the all students grouping for the Spring 1992 and July 1992 administrations.

## Section III

### Grade 11 Exit Level TAAS Results

The results from the October 1991 exit level TAAS administration at Grade 11 identify subject areas where students are performing successfully and provide remediation information important in preparing students for retesting.

#### OCTOBER 1991 ADMINISTRATION

Beginning with the October 1991 administration Grade 11 students were required to answer the equivalent of seventy percent of the items correctly in order to meet minimum expectations. Forty-eight percent of the 187,015 students tested in October 1991 met the minimum expectations on all tests taken, a two percentage point decline from the October 1990 results rescored at the seventy percent standard. Six percent of the students mastered all objectives on all tests taken in October 1991, a two percentage point drop from the October 1990 results scored at the seventy percent standard.

Despite improvements in writing between October 1990 and 1991, declines occurred at Grade 11 in reading and mathematics during the same period.

The following chart compares Grade 11 student performance between the October 1990 and October 1991 administrations by subject area at the 70% standard.

The table below provides the number of Grade 11 students tested statewide, the percent meeting minimum expectations, the average scale score, and the scale score gain/loss in each subject area between the October 1990 and October 1991 administrations. As evidenced by the results, mathematics requires substantial remediation to lessen the performance gap among the three subject areas.

**Grade 11 Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	181,531	77%	1633	21
Reading	180,759	71%	1600	(9)
Mathematics	182,573	56%	1547	(7)

Academic Recognition

Grade 11 results from October 1991 illustrate the importance of encouraging students to set high educational goals in all subject areas.

Less than one percent of the students tested, or 884 students, achieved the highest level of performance on the exit level TAAS assessment in October 1991. Academic Recognition represents the highest level of proficiency for the TAAS assessment program achieved by scoring a 4 on the written composition, mastering all objectives, and answering at least 95% of the items correctly in all three subject areas.

**SUBJECT AREA PERFORMANCE: WRITING**

A slight improvement in writing performance was realized at Grade 11 indicating that student exposure to various writing activities continued to increase.

Seventy-seven percent of the Grade 11 students tested in October 1991 met the passing standard in writing, which reflects a three percentage point gain when compared with the October 1990 results. Almost a quarter of the Grade 11 students (21%) achieved mastery of all objectives by mastering each of the multiple-choice writing objectives and scoring a 3 or 4 on the written composition.

Writing: Written Composition Performance Assessment

In October 1991, a greater percentage of students at Grade 11 met minimum expectations on the writing composition section of the test but at a lower level of proficiency, compared with October 1990 results.

In October 1991, Grade 11 students were required to write a persuasive composition in which they formulated a position on a particular issue and then presented convincing reasons in support of that position. A writing prompt is provided below which is similar to the types of writing tasks encountered on the TAAS.

As a result of many serious motorcycle accidents, Texas lawmakers have passed a law which says that all motorcycle riders have to wear protective helmets. What is your position concerning this law? Write a letter to the editor of your local newspaper stating your position and supporting it with convincing reasons.

Eighty-five percent of the students met the minimum expectations on the written composition task, compared to eighty-four percent of the students tested in October 1990. However, the percent of students achieving a rating of 3 or 4 in October 1991 decreased six percentage points from October 1990.

The following table displays the percent of papers receiving each written composition rating for the October 1990 and October 1991 administrations. A description of the attributes of papers receiving each score point is provided in the writing subject area performance section of the Executive Summary.

**Percent of Grade 11 Students Achieving Each Written Composition Rating**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1990	16%	38%	41%	5%
October 1991	15%	45%	36%	4%

Results from the October 1991 Grade 11 test indicate a lack of student understanding in applying appropriate elaboration in their writing.

Compositions unsuccessful in meeting minimum expectations received a rating of 0 or 1 and were analyzed to determine why they did not achieve the passing standard. A rating of 0 indicated that the composition could not be scored as written. Written compositions which earned a rating of 1 attempted to respond to the writing prompt but did not address the task adequately. Less than one percent of the Grade 11 written compositions received a rating of 0.

The majority of students who received a rating of 0 made no attempt to write a composition. Of the Grade 11 essays receiving a rating of 1, ninety-seven percent lacked sufficient support and elaboration and twenty-seven percent were annotated for lack of organization/structure.

Writing: Multiple-Choice Assessment

Students at Grade 11 are improving editing skills but require additional instructional opportunities in recognizing proper sentence construction.

In the multiple-choice section of the writing test, Grade 11 students achieved the highest mastery rate (85%) on Objective 6, which requires students to recognize appropriate English usage within the context of a written passage. Objective 7 was the only Grade 11 writing objective that showed improvement between October 1990 and October 1991, gaining three percentage points since October 1990. Objective 7 requires students to recognize appropriate spelling, capitalization, and punctuation within the context of a written passage and constitutes the foundation skills necessary for editing. Performance on Objective 5, which requires students to recognize appropriate English usage within the context of a written passage, fell seven percentage points from October 1990.

Mastery of Writing Objectives

Objective	October	October
	1990	1991
5. Sentence Construction	60%	53%
6. English Usage	86%	85%
7. Use of Spelling, Capitalization, and Punctuation	45%	48%

**SUBJECT AREA PERFORMANCE: READING**

Students at Grade 11 encountered difficulty in recognizing point of view, propaganda, and fact or nonfact in selected readings.

Seventy-one percent of the students met minimum expectations in reading in October 1991, compared with a seventy-three percent passing rate in October 1990, rescored at the seventy percent standard. Twenty-six percent of the Grade 11 students mastered all of the objectives on the reading test in October 1991.

The mastery rates for Objectives 2 and 3 improved three and five percentage points, respectively, between October 1990 and October 1991, while Grade 11 performance dropped in the remaining four reading objectives. Objective 6, which required students to recognize point of view, propaganda, fact and nonfact in a variety of written texts had the lowest mastery rate (40%). Remediation is required in preparation for retesting to allow students many experiences in reading for a specific purpose.

---

## Mastery of Reading Objectives

<u>Objective</u>	October	October
	<u>1990</u>	<u>1991</u>
1. Word Meaning	74%	69%
2. Supporting Ideas	83%	86%
3. Summarization	65%	70%
4. Relationships and Outcomes	85%	83%
5. Inferences and Generalizations	57%	55%
6. Point of View, Propaganda, and Fact and Nonfact	54%	40%

### SUBJECT AREA PERFORMANCE: MATHEMATICS

Achievement levels in mathematics showed slight drops in most objectives indicating a need for further development of students' problem-solving skills.

In October 1991, fifty-six percent of the eleventh graders tested met minimum expectations in mathematics, a four percentage point drop from the October 1990 results scored at the 70% standard. Fifteen percent of the Grade 11 students achieved mastery of all objectives, compared with eighteen percent of the students tested in October 1990.

In the Concepts domain, the lowest mastery rates occurred in Objective 4, which required students to demonstrate an understanding of measurement concepts using metric and customary units. Grade 11 results improved four percentage points since October 1990 on the objective requiring an understanding of geometric properties and relationships (Objective 3).

In the Operations domain, Grade 11 results were lowest in the multiplication objective (62% mastery), while performance on the division objective improved four percentage points since October 1990.

Although student performance was relatively similar across the three mathematics domains, two objectives in the Problem Solving domain measuring higher order thinking skills remain areas of focus for remediation. Objective 11 required students to use solution strategies for solving problems and exhibited the lowest mastery rate of any mathematics objective tested (50% mastery). The following test item is representative of a problem requiring the student to identify a solution strategy.

Elida plans to cut a wire that is 7 feet 6 inches long into 5 equal pieces. She wants to know the length of each piece before the cuts are made. Which expression could Elida use to find the length of each piece in *inches*?

A  $(7 + 6 \times 12) \div 5$

B  $(7 + 6) \div 5$

C  $(7 \times 6 + 6) \div 12$

D  $(7 \times 36 + 6) \div 12$

E\*  $(7 \times 12 + 6) \div 5$

The mastery rates by objective in each mathematics domain are compared in the chart below for the October 1990 and 1991 administrations with the October 1990 results rescored to reflect the seventy percent passing standard.

### Mastery of Mathematics Objectives

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
Concepts Domain		
1. Number Concepts	67%	66%
2. Algebraic/Mathematical Relations and Functions	69%	65%
3. Geometric Properties and Relationships	65%	69%
4. Measurement Concepts	57%	55%
5. Probability and Statistics	72%	69%
Operations Domain		
6. Use of Addition to Solve Problems	81%	76%
7. Use of Subtraction to Solve Problems	75%	66%
8. Use of Multiplication to Solve Problems	68%	62%
9. Use of Division to Solve Problems	61%	65%
Problem Solving Domain		
10. Problem Solving using Estimation	67%	65%
11. Problem Solving using Solution Strategies	54%	50%
12. Problem Solving using Mathematical Representation	57%	52%
13. Evaluation of the Reasonableness of a Solution	64%	65%

### DEMOGRAPHIC PERFORMANCE SUMMARY

#### *Ethnic Groups*

Performance gaps between ethnic populations at Grade 11 are closing in writing but continue to require attention in the areas of reading and mathematics.

**Texas Assessment of Academic Skills**  
**Percent Meeting Minimum Expectations by Ethnic Group**  
**October 1991**

Comparisons of results by ethnic groups show that African American student performance improved five percentage points in writing between October 1990 and October 1991. Hispanic students gained two percentage points while white students improved three percentage points in writing. The percent of African American and Hispanic students meeting minimum expectations in writing was lower than white students but the differences in performance among the three major ethnic groups were not as wide on the exit level written composition as they were on the overall writing assessment.

To illustrate this point, African American students had a passing rate eighteen percentage points lower than white students on the overall writing test. However, eighty percent of the African American students achieved a rating of 2 or higher on the written composition and when compared with the figure of eighty-nine percent for white students, this results in only a nine percentage point difference. Similarly, Hispanic students scored ten percentage points lower than white students on the written composition, compared with an eighteen percentage point difference on the overall writing test.

The following table represents the October 1991 performance of ethnic groups in the three subject area tests. As displayed in the table, writing was the only area where scale score gains were reflected. Writing assessments have been conducted in Texas for over a decade and, over time, have encouraged the development of well-defined instructional materials to strengthen student writing. The scale score gains noted in writing at Grade 11 among the three major ethnic groups may be a direct result of the considerable time spent and experience gained in the area of written expression over the last ten years.

## Grade 11 Performance Results by Ethnic Group October 1991

Ethnicity	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
<b>African American</b>				
Writing	22,380	67%	1571	20
Reading	22,197	56%	1514	(14)
Mathematics	22,676	33%	1444	(4)
<b>Hispanic</b>				
Writing	53,360	67%	1569	10
Reading	52,895	57%	1520	(12)
Mathematics	53,767	41%	1478	(11)
<b>White</b>				
Writing	98,481	85%	1680	28
Reading	98,383	82%	1662	(3)
Mathematics	98,805	68%	1603	(4)

### *Economic Groups*

Equity gaps for special populations at Grade 11 are more pronounced than those noted among the three major ethnic groups.

Twenty-one percent of the Grade 11 students identified as at-risk of dropping out of school met minimum expectations on all tests taken, compared with a sixty percent passing rate for students not identified as at-risk. At-risk students

achieved the highest passing rate in writing (57%) and had the most difficulty in mathematics (30%).

Eight percent of the 7,563 students identified as limited English proficient met minimum expectations on all tests taken compared with fifty percent of the students not identified as limited English proficient, as shown in the preceding chart.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

<b>Economically Disadvantaged</b>	<b>Number Tested</b>	<b>% Meeting Minimum Expectations</b>	<b>Average Scale Score</b>	<b>Scale Score Gain (Loss) 1990-1991</b>

## SPRING 1992 ADMINISTRATION

The spring 1992 administration represented the second opportunity for Grade 11 students to retest at the seventy percent standard. Eighty-six percent of the Grade 11 students testing in spring 1992 were retaking one or more sections of the test based on results received from the October 1991 administration.

More than a third of the Grade 11 students tested met minimum expectations on all tests taken during the spring 1992 administration.

In spring 1992 the exit level TAAS test was administered to 95,568 Grade 11 students. Thirty-seven percent of the students achieved the passing standard on all tests attempted. The table below provides the number of Grade 11

students tested statewide, the number and percent meeting minimum expectations, and the average scale score in each subject area.

**Grade 11 Student Performance by Subject Area  
Spring 1992**

	Total Tested	Met Minimum Expectations	Average Scale Score
Writing	43,641	23,918 (55%)	1516
Reading	54,009	24,532 (45%)	1476
Mathematics	79,420	29,899 (38%)	1455

**SUBJECT AREA PERFORMANCE: WRITING**

Writing: Written Composition Performance Assessment

Over three-quarters of the students who took the writing test in spring 1992 met minimum expectations on the written composition.

Fifty-five percent of the Grade 11 students tested in spring 1992 achieved the passing standard on the writing test. As in October 1991, Grade 11 students were required to write a persuasive composition in which they declared a position on a particular issue and then presented convincing reasons in support of that position. Seventy-six percent of the students met the minimum expectations on the written composition with twenty-seven percent of the Grade 11 students achieving a rating of 3 or 4 on the written composition.

**Percent of Grade 11 Students Achieving Each Written Composition Rating**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
Spring 1992	24%	49%	25%	2%

Twenty-four percent of the unsuccessful Grade 11 compositions received a rating of 1 with over ninety-eight percent of these papers annotated as lacking sufficient support and elaboration.

Writing: Multiple-Choice Assessment

Remediation in the areas of spelling, punctuation, and capitalization is required to increase written communication skills.

In the multiple-choice section of the writing test, Grade 11 students achieved the highest mastery rates (75%) on Objective 6, which required students to recognize appropriate English usage within the context of a written passage.

Grade 11 students continued to have difficulty with Objective 7 which required students to recognize appropriate spelling, capitalization, and punctuation within the context of a written passage (29% mastery). Remediation for this objective could include practice in editing peer compositions while emphasizing locating, correcting, and categorizing errors.

### Mastery of Writing Objectives

<u>Objective</u>	<u>Spring 1992</u>
5. Sentence Construction	37%
6. English Usage	75%
7. Use of Spelling, Capitalization, and Punctuation	29%

### SUBJECT AREA PERFORMANCE: READING

Students participating in the reading test at Grade 11 achieved higher levels of success in recognizing word meanings, supporting ideas, identifying relationships, and predicting outcomes in spring 1992.

Forty-five percent of the students met the minimum expectations in reading, while only seven percent of the students mastered all of the reading objectives. Grade 11 students had the most difficulty in spring 1992 on Objective 5 which required students to analyze information in a variety of written texts to make inferences and generalizations.

### Mastery of Reading Objectives

<u>Objective</u>	<u>Spring 1992</u>
1. Word Meaning	60%
2. Supporting Ideas	73%
3. Summarization	33%
4. Relationships and Outcomes	72%
5. Inferences and Generalizations	26%
6. Point of View, Propaganda, and Fact and Nonfact	34%

### SUBJECT AREA PERFORMANCE: MATHEMATICS

Across the three mathematics domains, Grade 11 students achieved the lowest rates of success in the Problem Solving domain.

In spring 1992, thirty-eight percent of the eleventh graders tested met minimum expectations in mathematics with three percent mastering each of the thirteen mathematics objectives.

Grade 11 students had the least difficulty on Objective 5 in the Concepts domain which required an understanding of probability and statistics. The lowest mastery rates occurred in Objective 4, which required students to demonstrate an understanding of measurement concepts using metric and customary units.

An equal percentage of students at Grade 11 had difficulty with the use of subtraction or division for problem solving with Objectives 7 and 9 each achieving a forty-four percent mastery rate. As in the October 1991 administration, the lowest mastery rate occurred in the Problem Solving domain on Objective 11 which required students to determine solution strategies and analyze or solve problems (38% mastery).

### Mastery of Mathematics Objectives

<u>Objective</u>	<u>Concepts Domain</u>	<u>Spring 1992</u>
1. Number Concepts		52%
2. Algebraic/Mathematical Relations and Functions		52%
3. Geometric Properties and Relationships		47%
4. Measurement Concepts		43%
5. Probability and Statistics		59%
	<u>Operations Domain</u>	
6. Use of Addition to Solve Problems		69%
7. Use of Subtraction to Solve Problems		44%
8. Use of Multiplication to Solve Problems		59%
9. Use of Division to Solve Problems		44%
	<u>Problem Solving Domain</u>	
10. Problem Solving using Estimation		52%
11. Problem Solving using Solution Strategies		38%
12. Problem Solving using Mathematical Representation		45%
13. Evaluation of the Reasonableness of a Solution		58%

### DEMOGRAPHIC PERFORMANCE SUMMARY

Performance differences among ethnic groups persisted in the spring 1992 administration at Grade 11.

Comparisons of results by ethnic groups indicate that differences in performance still exist among African American, Hispanic, and white students. Twenty-five percent of the African American students and thirty percent of the Hispanic students met minimum expectations on all tests taken, compared with a forty-eight percent passing rate for white students. The largest differences in performance among the ethnic groups was seen on the reading assessment. The following table represents the spring 1992 performance of ethnic groups in the three subject area tests.

**Grade 11 Performance Results by Ethnic Group  
Spring 1992**

<b>Ethnicity</b>	<b>Number Tested</b>	<b>% Meeting Minimum Expectations</b>	<b>Average Scale Score</b>
<b>African American</b>			
Writing	7,057	50%	1498
Reading	9,506	38%	1453
Mathematics	14,133	26%	1415
<b>Hispanic</b>			
Writing	18,369	49%	1492
Reading	23,508	37%	1447
Mathematics	31,248	33%	1438
<b>White</b>			
Writing	15,673	65%	1556
Reading	18,089	61%	1529
Mathematics	30,894	47%	1491

**REMEDIATION**

Remediation information gained from TAAS results must be applied to instructional programs to assure the adequate preparation of students for retesting.

Section 21.553 of the Texas Education Code states that an individual must demonstrate mastery of the exit level examination in order to be eligible to receive a Texas high school diploma. Fifty-two percent of the Grade 11 students tested in October 1991 and sixty-three percent of the Grade 11 students tested in spring 1992 required remediation in one or more subject areas. Section 21.557 of the Texas Education Code requires districts to provide remedial instruction for students failing any section of the TAAS test.

**Grade 11 Students Requiring Remediation**

<b>October 1991</b>		
Failed One Test Only	44,407	24%
Failed Two Tests Only	30,337	16%
Failed All Three Tests	<u>23,280</u>	<u>12%</u>
<b>Total</b>	<b>98,024</b>	<b>52%</b>
<b>Spring 1992</b>		
Failed One Test Only	32,680	34%
Failed Two Tests Only	17,683	18%
Failed All Three Tests	<u>10,225</u>	<u>11%</u>
<b>Total</b>	<b>60,588</b>	<b>63%</b>

## JULY 1992 ADMINISTRATION

Beginning in July 1992, the summer administration of the TAAS exit level test was made available to any Grade 11 or 12 student eligible to test. Following the spring 1992 administration, 60,588 Grade 11 students still needed to pass one or more sections. 49,548 Grade 11 students registered for the July administration, and 35,273 students were actually tested. More than 14,000 Grade 11 students who had registered for the test did not report to the testing site on the day of the administration.

Of the 35,273 Grade 11 students tested, 9,388, or 27% met minimum expectations on all tests taken, thus fulfilling their TAAS exit level requirement for a Texas high school diploma. The table below provides the number of Grade 11 students tested statewide, the number and percent meeting minimum expectations, and the average scale score in each subject area in July 1992.

### Grade 11 Student Performance by Subject Area July 1992

	Total Tested	Met Minimum Expectations	Average Scale Score
Writing	9,620	2,792 (29%)	1432
Reading	16,643	5,152 (31%)	1424
Mathematics	28,662	7,849 (27%)	1424

In July 1992, seventy-three percent of the Grade 11 students tested failed to meet minimum expectations in one or more subject areas. The following table illustrates the number and percent of students failing to meet minimum expectations in one test only, two tests only, or all three subject area tests.

### Grade 11 Students Requiring Remediation July 1992

Failed One Test Only	15,874 (45%)
Failed Two Tests Only	6,775 (19%)
Failed All Three Tests	<u>3,236 (9%)</u>
Total	25,885 (73%)

Beginning with the 1992-1993 school year, approximately 51,000 Grade 12 students will still need to pass one or more sections of TAAS. These students will have two more opportunities to meet minimum expectations before the end of their senior year in May 1993.

## Section IV

### Grade 12 Exit Level TAAS Results

Results from the October 1991 and spring 1992 exit level TAAS administrations focus on areas where progress is being made in achieving educational goals and where challenges must be met to attain excellence and equity in education.

#### OCTOBER 1991 AND SPRING 1992 ADMINISTRATIONS

##### Performance Standards

Students who were first eligible to test during the 1990-1991 school year were required to answer correctly sixty percent of the items in each subject area test. Exit level students who were first tested during the 1990-1991 school year continue to be evaluated under the 1990-1991 performance standard, in accordance with Chapter 101.2(e) of the Texas Administrative Code.

##### Commitment to Student Achievement

In October 1990, the first TAAS exit level test was administered to 174,871 Grade 11 students. A second exit level administration was provided for 62,863 Grade 11 students in April 1991. After receiving results from the October 1991 exit level administration, which reported that 18,993 Grade 12 students still had not met the TAAS passing standard in one or more subject areas, the Commissioner of Education called for "immediate and dramatic" measures to ensure the success of remedial instruction for the spring 1992 administration. A letter outlining this commitment was sent from the commissioner to each superintendent, school board president, and principal of every high school campus with a senior requiring TAAS retesting. In order to encourage student participation in remediation, the commissioner stated that districts could provide students with up to 1½ elective course credits for TAAS remediation courses in mathematics and language arts. Additional funding was provided to education service centers to support remediation efforts at the service center region and district level. The statewide spring 1992 exit level results indicate an improved achievement rate as a result of the remediation effort.

The passing rate for Grade 12 students improved eleven percentage points between the October 1991 and spring 1992 administrations.

In October 1991 forty-seven percent of the Grade 12 students tested met minimum expectations on all tests taken with two percent of the students achieving mastery of all objectives. Although the percentage of students

mastering every test objective in all subject areas in spring 1992 marks only a slight increase from the October 1991 administration figure, the percent of students meeting minimum expectations jumped to fifty-eight percent, an eleven percentage point gain.

The following chart compares the percent of Grade 12 students meeting minimum expectations in each subject area on the October 1991 and spring 1992 administrations.

The table below displays the number of Grade 12 students tested statewide, the number and percent meeting minimum expectations, and the average scale score in each subject area for the October 1991 and spring 1992 administrations.

**Grade 12 Student Performance by Subject Area**

	Total Tested	Met Minimum Expectations	Average Scale Score
<b>October 1991</b>			
Writing	20,805	12,985 (62%)	1513
Reading	13,844	8,419 (61%)	1456
Mathematics	25,928	12,759 (49%)	1429
<b>Spring 1992</b>			
Writing	8,378	5,896 (70%)	1537
Reading	5,928	3,127 (53%)	1430
Mathematics	13,196	7,626 (58%)	1446

---

As noted in the table, results from the October 1991 and spring 1992 administrations show increases for students meeting minimum expectations of eight percentage points in writing and nine percentage points in mathematics while reading results declined eight percentage points. A detailed description of Grade 12 results from October 1991 and spring 1992 are presented in the following subject area analyses to review student achievement rates.

### **SUBJECT AREA PERFORMANCE: WRITING**

Seventy percent of the Grade 12 students met minimum expectations in writing in spring 1992.

The spring 1992 results indicated an eight percentage point gain when compared to those of October 1991. The improved performance in Grade 12 writing between the two administrations is reflected also in the twenty-four point scale score gain. In addition, eleven percent of students mastered all objectives in writing by scoring a 3 or 4 on the written composition and mastering each of the multiple-choice objectives. The percent of Grade 12 students mastering all objectives improved by six percentage points from October 1991 which represents the largest increase in any subject area for this category.

#### Writing: Written Composition Performance Assessment

The percent of students achieving a rating of 3 or 4 on the written composition jumped by seventeen percentage points between the October 1991 and spring 1992 administrations.

The exit level written composition task requires students to prepare a persuasive essay based on a specific topic. The following prompt is an example of the type of task a student would encounter on the exit level written composition assessment.

Water is becoming scarcer in Texas because of hot summers and a growing population. To keep Texas from having water shortages, some people believe that Texans should limit the use of water in their homes. What is your position concerning this issue? Write a letter to the editor of your local newspaper stating your position and supporting it with convincing reasons.

Sixty-seven percent of the Grade 12 students wrote a minimally successful persuasive essay in October 1991. In spring 1992 eighty-one percent of the Grade 12 students achieved a written composition rating of 2 or higher, a fourteen percentage point gain from the October 1991 results. Between the October 1991 and spring 1992 administrations, the percent of students achieving a rating of 3 or 4 increased seventeen percentage points indicating a

shift upward from compositions representing minimum expectations to the achievement of a higher standard of written expression.

The table below illustrates the gains in Grade 12 student performance on the exit level written composition for October 1991 and spring 1992. The scoring criteria for each score point are provided below the written composition results.

### Percent of Grade 12 Students Achieving Each Written Composition Rating

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1991	33%	51%	15%	0%
Spring 1992	19%	49%	30%	2%

Rating of 1 – Response that attempts to address the task but is not successful

Rating of 2 – Response that is minimally successful at addressing the writing task; presents ideas with limited elaboration

Rating of 3 – Response that represents a good attempt at addressing the writing task; ideas are extended, organized and clearly stated; writer uses elaboration consistently

Rating of 4 – Response that is specific, and well elaborated with many ideas presented in a clear and logical manner; the composition reflects a high level of written expression

Analytic scoring indicates that the majority of compositions unsuccessful in meeting minimum expectations failed due to a lack of supported ideas and elaboration.

The October 1991 and spring 1992 written compositions identified as not meeting minimum expectations were analyzed to determine why each composition failed to achieve success on the particular writing task. The resulting analytic report was provided to campuses and districts for their information and to use as a tool to target instruction. During both Grade 12 administrations the majority of papers receiving a rating of 1 were identified during analytic scoring as containing too few ideas and lacking support through elaboration.

### Writing: Multiple-Choice Assessment

Mastery rates in the three multiple-choice writing objectives improved between the October 1991 and spring 1992 administrations.

The table below compares the results from the October 1991 and spring 1992 administration in each of the multiple-choice writing objectives.

### Writing Objective Mastery

<u>Objective</u>	<u>October 1991</u>	<u>Spring 1992</u>
5. Sentence Construction	35%	40%
6. English Usage	69%	71%
7. Use of Spelling, Capitalization, and Punctuation	29%	33%

Grade 12 students in the spring 1992 administration gained five percentage points in Objective 5 which required students to recognize appropriate sentence structure in the context of a written passage. Although a gain of four percentage points for Grade 12 students is noted in Objective 7 which addresses the use of spelling, capitalization, and punctuation, it shows the lowest rate of success of the three multiple-choice objectives and may be seen as a target for remediation.

### SUBJECT AREA PERFORMANCE: READING

Fifty-three percent of the Grade 12 students met minimum expectations in spring 1992, an eight percentage point drop from the October 1991 figure of sixty-one percent.

Grade 12 student performance results in reading declined between the October 1991 and spring 1992 administrations. The percent of students mastering all objectives in reading also fell five percentage points since October 1991. The table below summarizes the student performance results on each reading objective for the October 1991 and spring 1992 administrations.

### Reading Objective Mastery

<u>Objective</u>	<u>October 1991</u>	<u>Spring 1992</u>
1. Word Meaning	40%	53%
2. Supporting Ideas	77%	66%
3. Summarization	49%	26%
4. Relationships and Outcomes	62%	59%
5. Inferences and Generalizations	29%	17%
6. Point of View, Propaganda, and Fact and Nonfact	18%	24%

Compared with the October 1991 results, performance on the two reading objectives related to summarization skills and making inferences from a variety of texts was substantially lower in spring 1992.

Results in three of the six objectives dropped more than ten percentage points with the largest drop of twenty-three percentage points occurring on Objective 3 requiring text summarization skills. Summarization tasks required a student to read a passage of text related to a particular topic and to choose the best summary statement for the passage. Grade 12 results also marked a twelve percentage point decline in Objective 5 which assesses a student's ability to draw conclusions from information contained in written texts by interpreting graphs, formulating judgements, and making generalizations.

### SUBJECT AREA PERFORMANCE: MATHEMATICS

The percent of Grade 12 students meeting minimum expectations on the mathematics test improved from forty-nine percent in October 1991 to fifty-eight percent in spring 1992.

Although Grade 12 students tested in spring 1992 improved in the area of mathematics overall, there was no change in the percent of students mastering all objectives in mathematics. Continued emphasis on higher order thinking skills and problem solving in classroom instruction would encourage student achievement in mathematics.

Grade 12 performance improved in each of the three mathematics domains: Concepts, Operations, and Problem Solving.

#### Mathematics Objective Mastery

<u>Objective</u>		<u>October</u> <u>1991</u>	<u>Spring</u> <u>1992</u>
	Concepts Domain		
1. Number Concepts		51%	55%
2. Algebraic/Mathematical Relations and Functions		44%	46%
3. Geometric Properties and Relationships		49%	37%
4. Measurement Concepts		34%	37%
5. Probability and Statistics		57%	55%
	Operations Domain		
6. Use of Addition to Solve Problems		63%	70%
7. Use of Subtraction to Solve Problems		43%	43%
8. Use of Multiplication to Solve Problems		48%	66%
9. Use of Division to Solve Problems		40%	42%
	Problem Solving Domain		
10. Problem Solving Using Estimation		51%	51%
11. Problem Solving Using Solution Strategies		26%	36%
12. Problem Solving Using Mathematical Representation		29%	39%
13. Evaluation of the Reasonableness of a Solution		53%	56%

In the Concepts domain, performance dropped twelve percentage points on Objective 3 which required students to demonstrate an understanding of

geometric properties and relationships. Students at Grade 11 experienced performance gains on Objective 3 between October 1990 and 1991 with a student mastery rate in October 1991 of almost 70 percent. At Grade 12 Objective 3 shared the lowest student success rate of thirty-seven percent in the Concepts domain with Objective 4 which assessed understanding of measurement concepts. A sample item representative of Objective 3 is provided below.

$\overleftrightarrow{WX}$  is parallel to  $\overleftrightarrow{YZ}$ . If the measure of  $\angle 3$  is  $150^\circ$ , what is the measure of  $\angle 1$ ?

A 150°  
 B 120°  
 C\* 30°  
 D 10°

The objective assessing the use of multiplication skills in problem solving showed a substantial increase of eighteen percentage points between October 1991 and spring 1992.

Performance results at Grade 12 improved in three of the four objectives in the Operations domain in spring 1992 with Objective 8 showing the greatest improvement of any mathematics objective tested.

Gains were realized in the Problem Solving domain with two of the four objectives improving ten percentage points.

Objective 11 and Objective 12 showed the lowest student success rates in mathematics in October 1991 but results from spring 1992 showed each achieving a ten percentage point improvement which may have resulted from targeting the areas of lowest performance for remediation. The increases in these objectives help narrow the gap in achievement levels between skill areas tested in mathematics.

## DEMOGRAPHIC PERFORMANCE SUMMARY

Significant improvement in writing and mathematics was noted for both African American and Hispanic students in the spring 1992 administration.

Comparisons of Grade 12 results by ethnic group between October 1991 and spring 1992 indicate that gains were made in reducing the differences in performance among the ethnic groups. The following chart illustrates the scale score gains/losses for the three major ethnic groups in each subject area between the October 1991 and spring 1992 administrations. In mathematics, for example, the average scale score rose thirty-three points for African American students, twenty-nine points for Hispanic students, while white students gained eight scale score points.

Reading scale scores improved nineteen points for African American students with a slight drop of five points reported for Hispanic students and a thirty-five point decline for white students.

The following table represents the spring 1992 Grade 12 performance of ethnic groups in the three subject area tests. The scale score gain/loss compares the results of the spring 1992 administration with the October 1991 administration. Although only a five point scale score loss was noted in reading for Hispanic students at Grade 12 compared to the thirty-five point

drop for white students, the scale score average between Hispanic and white students reflects a performance disparity of 121 points on the reading test.

### Grade 12 Performance Results by Ethnic Group Spring 1992

Ethnicity	Number <u>Tested</u>	% Meeting Minimum <u>Expectations</u>	Average Scale <u>Score</u>	Scale Score Gain (Loss) <u>1991-1992</u>
<b>African American</b>				
Writing	1,504	70%	1521	28
Reading	1,224	51%	1417	19
Mathematics	3,480	52%	1426	33
<b>Hispanic</b>				
Writing	3,578	65%	1509	21
Reading	2,989	46%	1400	(5)
Mathematics	5,675	56%	1436	29
<b>White</b>				
Writing	2,610	81%	1591	39
Reading	1,242	72%	1521	(35)
Mathematics	3,472	66%	1478	8

The following table provides the spring 1992 assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged).

Economically Disadvantaged	Number <u>Tested</u>	% Meeting Minimum <u>Expectations</u>	Average Scale <u>Score</u>	Scale Score Gain (Loss) <u>1991 - 1992</u>
<b>Participants</b>				
Writing	2,505	62%	1495	17
Reading	2,297	44%	1392	15
Mathematics	4,054	54%	1427	30
<b>Nonparticipants</b>				
Writing	5,485	74%	1556	29
Reading	3,402	58%	1454	(35)
Mathematics	8,652	60%	1454	14

Most of the Grade 12 students tested in spring 1992 were identified as at-risk of dropping out of school. Fifty-four percent of these students met minimum expectations on all tests taken, compared with a sixty-three percent rate for students not identified as at-risk. Forty-three percent of the 1,337 students identified as limited English proficient met minimum expectations on all tests taken, compared with sixty percent of the students not identified as limited English proficient.

---

## OCTOBER 1990 THROUGH SPRING 1992 ADMINISTRATIONS

This section examines the performance results from the first four exit level administrations of the TAAS program. The first exit level test was administered to Grade 11 students in October 1990. Grade 11 students needing to retake one or more subject areas or Grade 11 students who were not tested in October 1990 were provided another opportunity to test in spring 1991. Likewise, the exit level administrations in the second year of the TAAS program provided additional opportunities in October 1991 and spring 1992 for Grade 12 students who still needed to retake a section or for Grade 12 students who had not previously tested. Each group of students, the Grade 11 students tested in October 1990 and spring 1991, and the Grade 12 students tested in October 1991 and spring 1992, were evaluated with the 60% standard since they were first eligible to test during the 1990-1991 school year.

Following the initial TAAS exit level administration in October 1990, the percent of students meeting minimum expectations on all tests taken increased from thirty-nine percent in spring 1991 to forty-seven percent in October 1991 to fifty-eight percent in spring 1992.

The following analyses of the exit level results from the first four administrations results are based upon results for all students, and, therefore, will include the results for both first time and retesting students. In addition, the comparisons across the four exit level administrations will include results of those students who may have tested during one or more of the exit level administrations but did not test in each of the first four exit level administrations.

The following table summarizes the exit level results from the October 1990 through the spring 1992 administrations. As shown, sixty-five percent of the 174,871 Grade 11 students tested in the first TAAS exit level administration in October 1990 met minimum expectations on all tests taken. Following the October 1990 administration, 61,919 students had not met minimum expectations in one or more subject areas. In spring 1991, 62,863 Grade 11 students were tested with thirty-nine percent meeting minimum expectations on all tests taken. A summer administration was not provided in July 1991, so approximately 38,500 students began their senior year still needing to pass one or more subject areas of the TAAS. In October 1991 forty-seven percent of the 35,853 Grade 12 students tested met the minimum expectations. Following the statewide remediation effort described earlier, fifty-eight percent of the 18,925 Grade 12 students tested met minimum expectations on all tests taken in spring 1992.

Following the spring 1992 administration the total number of students passing the exit level test at the 60% standard across the four exit level administrations comprised ninety-four percent of the original number of Grade 11 students first tested in October 1990. This percent, however, includes the results of students who were first time testers in each exit level

administration and does not account for students who dropped out after any of the exit level administrations.

	Number of Students	Percent Meeting Minimum Expectations	Cumulative Percent Meeting Minimum Expectations
<b>Fall 1990</b>			
Total Tested	174,871		
Number Passing	112,952	65%	65%
Number Failing One or More Tests	61,919		
<b>Spring 1991</b>			
Total Tested	62,863		
Number Passing	24,281	39%	79%
Number Failing One or More Tests	38,582		
<b>Fall 1991</b>			
Total Tested	35,853		
Number Passing	16,860	47%	88%
Number Failing One or More Tests	18,993		
<b>Spring 1992</b>			
Total Tested	18,925		
Number Passing	10,929	58%	94%
Number Failing One or More Tests	7,996		

The increase in the percent of students meeting minimum expectations on all tests taken is a result of the strong gains in the percent of students meeting minimum expectations in writing and mathematics during the spring 1991, October 1991, and spring 1992 administrations.

The gain from forty-three percent of the students meeting minimum expectations in writing in spring 1991 to seventy percent of the Grade 12 students in spring 1992 reflects the strong emphasis placed on remediation for these students during their senior year.

In mathematics, the percent meeting minimum expectations rose from forty-one percent of the Grade 11 students in spring 1991 to fifty-eight percent of the Grade 12 students tested in spring 1992. The passing rates for the reading subject area test, however, have shown little change during the last three exit level administrations. The following chart illustrates the percent of students meeting minimum expectations in each subject area during the first four exit level TAAS administrations.

**Texas Assessment of Academic Skills**  
**Percent Meeting Minimum Expectations by Subject Area**  
**60% Standard**  
**Fall 1990 - Spring 1992**

The following table compares the composition of students in various demographic categories between the group of Grade 11 students who were first tested in October 1990 and the group of Grade 12 students who failed one or more tests following the spring 1992 administration. The comparisons of these groups of students highlight the continuing disparities in performance among ethnic and economic groups. For example, Hispanic students comprised twenty-eight percent of the Grade 11 students who were first tested in October 1990, but, following the spring 1992 administration, Hispanic students made up almost one-half of the 7,996 students still needing to pass one or more subjects areas.

	Composition of All Students (n=174,871) Fall 1990		Composition of Failing Group (n=7,996) Spring 1992	
<b>Sex</b>				
- Male	86,039	49%	3,686	46%
- Female	88,636	50%	4,287	54%
<b>Ethnicity</b>				
- Native American	340	0%	32	0%
- Asian	4,556	2%	288	4%
- African American	21,953	12%	2,055	26%
- Hispanic	49,580	28%	3,810	48%
- White	97,050	55%	1,617	20%

	Composition of All Students (n=174,871) Fall 1990		Composition of Failing Group (n=7,996) Spring 1992	
<b>Economically Disadvantaged</b>				
- Yes	32,737	19%	2,905	36%
- No	139,841	80%	4,793	60%

- No	123,995	71%	4,003	50%

## REMEDIATION

Enabling students to achieve the passing standard on the exit level examinations is of continuing importance in preparing students for real world expectations.

Section 21.553 of the Texas Education Code states that an individual must demonstrate mastery of the exit level examination in order to be eligible to receive a Texas high school diploma. The following table illustrates the number and percent of exit level students failing to meet minimum expectations in one test only, two tests, or all three tests for the first four exit level TAAS administrations.

	<u>Fall 1990</u>	<u>Spring 1991</u>	<u>Fall 1991</u>	<u>Spring 1992</u>
One Test Only	35,430 (20%)	23,801 (38%)	13,318 (37%)	5,746 (30%)
Two Tests Only	16,105 (9%)	9,570 (15%)	3,929 (11%)	1,643 (9%)
All Three Tests	<u>10,384 (6%)</u>	<u>5,211 (8%)</u>	<u>1,746 (5%)</u>	<u>607 (3%)</u>
<b>Total</b>	<b>61,919 (35%)</b>	<b>38,582 (61%)</b>	<b>18,993 (53%)</b>	<b>7,996 (42%)</b>

Although the number of students failing has declined after each exit level administration, 7,996 Grade 12 students still had not met the minimum expectations in at least one subject area after the spring 1992 administration.

## JULY 1992 ADMINISTRATION

Exit level students were provided the opportunity to participate in focused remediation during June and July in preparation for the July 1992 exit level examination. School districts and education service centers worked together

to encourage eligible exit level students to register for the July test administration and participate in intensive remediation courses.

Of the 7,996 Grade 12 students still needing to pass one or more tests following the spring 1992 administration, 6,778 Grade 12 students registered to take the July 1992 administration. More than 1,300 students who were registered to test, however, were absent at the time of testing, so a total of 5,376 Grade 12 students actually took advantage of the summer administration in July 1992.

Despite the summer remediation efforts, only thirty-five percent, or 1,876 students, met minimum expectations on all tests taken. The table below displays the number of Grade 12 students tested, the number and percent meeting minimum expectations, and the average scale score in each subject area for the July 1992 administration.

#### Grade 12 Student Performance by Subject Area July 1992

	Total Tested	Met Minimum Expectations	Average Scale Score
Writing	1,447	560 (39%)	1423
Reading	1,805	659 (37%)	1366
Mathematics	3,655	1,247 (34%)	1379

In July 1992, 3,500 Grade 12 students (65%) failed to meet minimum expectations in one or more subject areas. The following table illustrates the number and percent of students failing to meet minimum expectations in one test only, two tests, or all three subject area tests.

#### Grade 12 Students Requiring Remediation July 1992

Failed One Test Only	2,728 (51%)
Failed Two Tests Only	603 (11%)
Failed All Three Tests	<u>169 (3%)</u>
<b>Total</b>	<b>3,500 (65%)</b>

More than one-half of the Grade 12 students not meeting minimum expectations needed to pass only one subject area in order to fulfill their TAAS exit level requirement.

Following the July 1992 exit level administration, approximately 6,200 Grade 12 students still had not completed their TAAS exit level requirement in order to be eligible to receive a Texas high school diploma.

## WRITTEN COMPOSITION ANALYTIC INFORMATION

### SUMMARY REPORT

GRADE: 12-EXIT LEVEL  
 DISTRICT: STATEWIDE  
 CAMPUS:

REPORT DATE: DECEMBER 1991  
 DATE OF TESTING: OCTOBER 1991

PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 0 OR 1 WERE SCORED ANALYTICALLY. FOR EACH CATEGORY THE NUMBER OF PAPERS HAVING THAT DEFICIENCY IS INDICATED. A STUDENT'S PAPER MAY BE LISTED IN MORE THAN ONE CATEGORY. PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 2, 3 OR 4 WERE NOT SCORED ANALYTICALLY.

ANALYTIC CATEGORY	NUMBERS OF PAPERS	
	RATING OF 0	RATING OF 1
Used wrong purpose . . . . .	3	870
Lacked organization/structure . . . . .	3	1826
Lacked support/elaboration. . . . .	3	6619
Lacked language control . . . . .	4	710
Wrote off topic . . . . .	4	
No writing attempted . . . . .	65	
Wrote in a foreign language . . . . .	1	
Paper was illegible/incoherent . . . . .	0	
Did not write enough to score . . . . .	4	
Copied the prompt . . . . .	3	
Explicitly refused to write . . . . .	3

## Section V

### TEAMS Exit Level Results

The exit level Texas Educational Assessment of Minimum Skills (TEAMS) test was administered in October 1991 and spring 1992 for those students who were classified as juniors during the 1989-1990 academic year or before. Students were also eligible to take the exit level TEAMS test in October 1991 and spring 1992 if they had taken the exit level test previously and had not demonstrated mastery of both sections of the test. Section 101.2 (e) of the Texas Administration Code states that no student is required to take an examination measuring objectives different from those assessed at the time the student was first eligible to take the exit level test. Section 21.553 of the Texas Education Code states that students who have not mastered all sections of the exit level test may retake the test each time it is administered.

#### GRADE 11 AND 12 RESULTS

The exit level TEAMS test measures minimum basic skills in the subject areas of mathematics and English language arts. Twenty-five percent of the Grade 12 students taking the TEAMS exit level test in October 1991 passed all tests taken. In spring 1992 thirty-four percent of the Grade 12 students passed all tests taken thus fulfilling the exit level requirement for a Texas high school diploma. Approximately eighty-seven percent of the Grade 12 students tested in October 1991 and eighty-six percent of the students tested in spring 1992 were retaking one or both sections of the TEAMS test.

A small number of students taking the exit level TEAMS test were classified as Grade 11 students in the 1991-1992 school year. Twenty-eight percent of the 205 Grade 11 students tested in October 1991, and thirty percent of the 61 Grade 11 students tested in spring 1992 passed all tests taken.

The table below summarizes the Grade 11 and 12 TEAMS performance results for the October 1991 and spring 1992 administrations.

TEAMS Exit Level Student Performance  
October 1991 and Spring 1992

	Total Tested	Passed All Tests Taken	Failed One Test Only	Failed Both Tests
October 1991				
Grade 11	205	58 (28%)	119 (58%)	28 (14%)
Grade 12	1,719	433 (25%)	1,053 (61%)	233 (14%)
Spring 1992				
Grade 11	61	18 (30%)	37 (61%)	6 (10%)
Grade 12	1,092	366 (34%)	615 (56%)	111 (10%)

Approximately twice as many Grade 12 students were tested in mathematics than in English language arts in October 1991 and spring 1992. On the mathematics test, objective-level performance results indicate that Grade 12 students had the most difficulty with the objectives measuring fractions, multiple operations, measurement units, and formulas. Taken together, these mathematics objectives represent some of the more rigorous basic skills in mathematics.

Within the English language arts test, overall objective-level performance was better on the reading objectives than on the writing objectives. Grade 12 students had the most difficulty with the reading objectives measuring drawing conclusions and distinguishing between fact and opinion. Grade 12 students had the lowest mastery rates in both October 1991 and spring 1992 on the writing objectives measuring punctuation and proofreading skills.

**TEAMS Student Performance by Subject Area  
Grade 12**

	Total Tested	Passed the Test	Average Scale Score
October 1991			
Mathematics	1,375	360 (26%)	656
English Language Arts	752	248 (33%)	680
Spring 1992			
Mathematics	868	298 (34%)	671
English Language Arts	433	166 (38%)	685

**OUT-OF-SCHOOL EXAMINEE RESULTS**

Out-of-school examinees taking the exit level TEAMS test have fulfilled all requirements for graduation except mastery of the basic skills measured on the exit level test. Out-of-school examinees are given the opportunity to test at every exit level administration.

**Out-of-School Examinee TEAMS Performance  
1991 - 1992**

	Total Tested	Passed All Tests Taken	Failed One Test Only	Failed Both Tests
October 1991	1,005	258 (26%)	682 (68%)	65 (6%)
Spring 1992	683	182 (27%)	467 (68%)	34 (5%)
July 1992	842	211 (25%)	580 (69%)	51 (6%)

Sixty-eight percent of the out-of-school examinees taking the TEAMS exit level test in October 1991 and Spring 1992 failed only one test. Continued remediation in the specific areas of weakness can help these students master the basic skills and fulfill the exit level requirement for a Texas high school diploma. The following table displays the number of out-of-school examinees tested, the number and percent of students passing, and the

average scale score in each subject area for the October 1991, spring 1992, and July 1992 administrations.

**Out-of-School Examinee Performance by Subject Area  
1991 - 1992**

	<b>Total Tested</b>	<b>Passed the Test</b>	<b>Average Scale Score</b>
<b>October 1991</b>			
Mathematics	768	219 (29%)	663
English Language Arts	332	69 (21%)	672
<b>Spring 1992</b>			
Mathematics	488	124 (25%)	660
English Language Arts	258	87 (34%)	682
<b>July 1992</b>			
Mathematics	617	161 (26%)	665
English Language Arts	298	72 (24%)	671

## Section VI

### Grade 9 Results

The Grade 9 TAAS assessment provides the final statewide remediation information for students prior to the exit level testing.

#### OCTOBER 1991 ADMINISTRATION

Thirty-four percent of the 253,688 Grade 9 students tested in October 1991 achieved minimum expectations on all tests taken which showed no change from the October 1990 results.

Reevaluating the October 1990 results at the seventy percent standard, thirty-four percent of the Grade 9 students would have achieved minimum expectations on all tests taken. Results of the October 1991 administration, with the seventy percent standard in effect, were the same. Four percent of the Grade 9 students mastered all objectives on all tests taken in October 1991, and 849 students, or less than one percent of the students tested, satisfied the requirements necessary to receive Academic Recognition.

The following chart illustrates Grade 9 student performance by subject area at the 70% standard for the October 1990 and October 1991 administrations. Students at Grade 9 achieved a significantly lower rate of success in mathematics than on the writing and reading subject area tests.

The table below provides the number of Grade 9 students tested statewide, the percent meeting minimum expectations, the average scale score, and the average scale score gain/loss for each subject area between the October 1990 and October 1991 administrations.

**Grade 9 Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	245,186	60%	1552	12
Reading	246,305	58%	1538	(7)
Mathematics	245,949	42%	1474	0

**SUBJECT AREA PERFORMANCE: WRITING**

A slight increase was noted in writing performance for Grade 9 between the October 1990 and October 1991 administrations.

In October 1991 sixty percent of the students met minimum expectations on the writing test, compared with a fifty-seven percent passing rate in October 1990 at the 70% standard. Thirteen percent of the Grade 9 students achieved mastery of all objectives in October 1991 by achieving a rating of 3 or 4 on the written composition and mastering each multiple-choice writing objective.

Writing: Written Composition Performance Assessment

Students at Grade 9 achieved an equal level of success on the written composition assessment in the October 1990 and October 1991 administrations.

In October 1991 Grade 9 students were required to write a persuasive composition in which they formulated a position on a given issue and presented convincing reasons to support the position in a clear and logical way for a specified audience. An example of the type of persuasive writing prompt a student might encounter on the writing assessment is provided below.

In order to add space for more classrooms, your school principal is considering doing away with the school cafeteria. What is your position on this issue? Write a letter to your principal in which you state your position on this issue and provide convincing reasons for your position. Be sure to explain your reasons fully.

The October 1991 results show that seventy-six percent of the students wrote a successful persuasive composition. A large percentage of students (39%) achieved a composition score of 3 or 4 indicating a higher level of written expression. The distribution of written composition ratings was relatively unchanged between the October 1990 and 1991 administrations.

#### Percent of Grade 9 Students Achieving Each Written Composition Rating

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1990	22%	38%	33%	6%
October 1991	23%	37%	33%	6%

Persuasive compositions at Grade 9 which were unsuccessful in meeting minimum expectations had deficits in organization and elaboration.

Twenty-six hundred compositions, approximately one percent of the Grade 9 written compositions, received a rating of 0 indicating that the composition could not be scored as written. Sixty-four percent of the compositions receiving a rating of 0 did not attempt to respond to the writing task. Lack of support and elaboration was annotated for almost every Grade 9 written composition receiving a rating of 1, and thirty-two percent of the papers were annotated for lack of organization/support.

#### Writing: Multiple-Choice Assessment

Students at Grade 9 experienced the most difficulty with editing skills involving recognition of spelling, punctuation, and capitalization errors.

The following chart compares the mastery rates for multiple-choice writing objectives between 1990 and 1991. The percentage of students mastering Objective 6 stressing recognition of appropriate English usage within a written passage increased six percentage points from October 1990. However, students experienced difficulty with Objective 7, which assessed the ability of students to edit a passage for clarity and correctness. Test questions for this objective require students to determine whether there is a mistake in a specific passage and then to decide if the mistake is in spelling, capitalization, or punctuation.

#### Mastery of Writing Objectives

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
5. Sentence Construction	46%	47%
6. English Usage	65%	71%
7. Use of Spelling, Capitalization, and Punctuation	27%	23%

---

## SUBJECT AREA PERFORMANCE: READING

Student performance at Grade 9 indicates inconsistent success in skills associated with reading for a purpose.

In reading, minimum expectations for passing were met by sixty-one percent of the ninth graders tested in 1990 at the 70% standard, dropping to a fifty-eight percent passing rate in October 1991. The largest percentage point increase achieved by students in reading occurred on Objective 4 which required students to perceive cause and effect relationships and predict probable outcomes based on information stated or implied in a specific text selection. Student performance dropped twelve percentage points between October 1990 and 1991 on Objective 6 requiring students to distinguish point of view, propaganda, and fact from nonfact. The lowest performing reading objective, involving text analysis to make inferences and generalizations, dropped five percentage points in October 1991.

### Mastery of Reading Objectives

Objective	October 1990	October 1991
1. Word Meaning	54%	56%
2. Supporting Ideas	56%	58%
3. Summarization	58%	51%
4. Relationships and Outcomes	58%	67%
5. Inferences and Generalizations	53%	48%
6. Point of View, Propaganda, and Fact and Nonfact	71%	59%

## SUBJECT AREA PERFORMANCE: MATHEMATICS

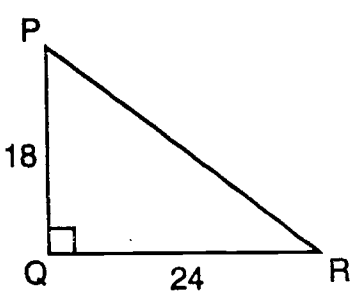

Students at Grade 9 experienced the highest level of success in mathematics in the Concept domain which emphasizes number concepts related to the foundations of problem solving.

In October 1991, forty-two percent of the ninth graders tested met minimum expectations in mathematics, compared with forty-three percent of the students in 1990 at the 70% standard with ten percent of the Grade 9 students achieving mastery of all mathematics objectives in October 1991.

The mathematics subject area test assessed three broad domains: Concepts, Operations, and Problem Solving. While performance improved six percentage points on Objectives 2 and 3, Objective 3, requiring students to demonstrate understanding of geometric properties and relationships, remained the lowest performing objective in the Concepts domain. Students also had difficulty with this objective in October 1990 suggesting that students are not recognizing and applying basic terminology and concepts in geometry.

The following sample problem is representative of an Objective 3 test item which would be encountered on the mathematics assessment.

Triangle PQR is a right triangle. What is the length of the hypotenuse PR?

A 36  
B\* 30  
C 21  
D 16

In October 1991 students at Grade 9 continue to experience difficulty with problem solving using mathematical representation and problem solving using solution strategies.

Grade 9 students continued to have difficulty with the objectives in the Operations and Problem Solving domains. Mastery rates were below sixty percent in each of the Operations objectives. Grade 9 students had the lowest success rates in the Operations domain on Objective 9, use of division to solve problems (39% mastery). An example of the type of division problem encountered on the mathematics section of the TAAS is provided below.

Jan bought some notebooks that cost \$0.97 each. The subtotal before adding the 8% sales tax was \$12.61. How many notebooks did Jan buy?

A 12  
B\* 13  
C 14  
D 17  
E Not Here

In the Problem Solving domain Grade 9 performance was relatively unchanged except in Objective 13 which improved seven percentage points since October 1990. The lowest performing mathematics objective was Objective 11 which required students to determine solution strategies and analyze or solve problems. Only thirty-four percent of the students were able to identify the process by which a solution could be obtained when not required to solve for a specific answer.

### Mastery of Mathematics Objectives

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
Concepts Domain		
1. Number Concepts	90%	88%
2. Algebraic/Mathematical Relations and Functions	62%	68%
3. Geometric Properties and Relationships	45%	51%
4. Measurement Concepts	74%	77%
5. Probability and Statistics	69%	66%
Operations Domain		
6. Use of Addition to Solve Problems	55%	59%
7. Use of Subtraction to Solve Problems	52%	50%
8. Use of Multiplication to Solve Problems	56%	49%
9. Use of Division to Solve Problems	41%	39%
Problem Solving Domain		
10. Problem Solving using Estimation	52%	52%
11. Problem Solving using Solution Strategies	36%	34%
12. Problem Solving using Mathematical Representation	38%	38%
13. Evaluation of the Reasonableness of a Solution	40%	47%

### DEMOGRAPHIC PERFORMANCE SUMMARY

#### *Ethnic Groups*

Performance results at Grade 9 reveal differences of twenty-seven percentage points or more among the three major ethnic groups.

Student performance at Grade 9 among the three major ethnic groups shows that African American and Hispanic students had substantially lower passing rates than white students.

In writing, the performance results for African American students improved seven percentage points between October 1990 and 1991 compared with a one percentage point decline for Hispanic students and a five percentage point gain for white students. In reading and mathematics, performance results decreased slightly between October 1990 and 1991 for the three major ethnic groups.

The disparity in performance among the ethnic groups was not as wide on the written composition as on the overall writing test. Fifteen percentage points separated African American students from white students in writing a minimally successful composition, while twenty-eight points separated them on the overall writing test. The disparity between white and Hispanic students was seventeen percentage points on the written composition and twenty-seven percentage points on the overall writing test.

**Grade 9 Performance Results by Ethnic Group**  
**October 1991**

<u>Ethnicity</u>	<u>Number Tested</u>	<u>% Meeting Minimum Expectations</u>	<u>Average Scale Score</u>	<u>Scale Score Gain (Loss) 1990-1991</u>
<b>African American</b>

Reading	121,523	73%	1613	(1)
Mathematics	121,425	57%	1542	(5)

*Economic Groups*

Substantial disparities in performance exist at Grade 9 between the students identified as LEP or at-risk and the students not in these special populations.

Slightly more than one-fourth of Grade 9 students tested in October 1991 were identified as at-risk of dropping out of school. Nine percent of these students met minimum expectations on all tests taken compared with forty-five percent of students not identified as at-risk.

In October 1991 only three percent of the 13,011 students identified as limited English proficient (LEP) met minimum expectations on all tests taken, while thirty-seven percent of the Grade 9 students not identified as limited English proficient met minimum expectations. LEP students had the most difficulty meeting minimum expectations in reading and mathematics with ten percent of the students passing reading and nine percent passing mathematics. In writing, fifteen percent met minimum expectations, compared with a sixty-three percent rate for students not identified as limited English proficient.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

Economically Disadvantaged	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991

Mathematics	227,582	44%	1483	0

## REMEDIATION

In October 1990 and October 1991, sixty-six percent of the Grade 9 students tested required remediation in one or more subject areas.

Section 21.557 of the Texas Education Code requires district to provide remedial instruction for students failing any section of the TAAS test. The following table indicates that Grade 9 performance results were unchanged between the October 1990 and October 1991 administrations. Intensive remediation must occur for students to prepare them to meet the passing standard on the exit level test.

### Grade 9 Students Requiring Remediation

	October 1990		October 1991

## WRITTEN COMPOSITION ANALYTIC INFORMATION

### SUMMARY REPORT

GRADE: 09  
 DISTRICT: STATEWIDE  
 CAMPUS:

REPORT DATE: DECEMBER 1991  
 DATE OF TESTING: OCTOBER 1991

PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 0 OR 1 WERE SCORED ANALYTICALLY. FOR EACH CATEGORY THE NUMBER OF PAPERS HAVING THAT DEFICIENCY IS INDICATED. A STUDENT'S PAPER MAY BE LISTED IN MORE THAN ONE CATEGORY. PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 2, 3 OR 4 WERE NOT SCORED ANALYTICALLY.

ANALYTIC CATEGORY	NUMBERS OF PAPERS	
	RATING OF 0	RATING OF 1
Used wrong purpose/mode . . . . .	304	8996
Lacked organization/structure . . . . .	360	17783
Lacked support/elaboration. . . . .	411	54651
Lacked language control . . . . .	332	3125
Wrote off topic . . . . .	464	
No writing attempted . . . . .	1668	
Wrote in a foreign language . . . . .	72	
Paper was illegible/incoherent . . . . .	13	
Did not write enough to score . . . . .	185	
Copied the prompt . . . . .	123	
Explicitly refused to write . . . . .	75

## Section VII

### Grade 7 Results

Student performance results from the Grade 7 TAAS administration present summative data based on selected essential elements identified for instruction through Grade 6.

#### OCTOBER 1991 ADMINISTRATION

Performance results at Grade 7 showed the largest increase overall of any grade level tested in October 1991.

In October 1991, thirty-five percent of the Grade 7 students met minimum expectations on all tests taken, a three percentage point improvement from the October 1990 results when rescored at the 70% standard. Three percent of the students tested at Grade 7 achieved mastery of all objectives in all tests taken, however, less than one percent of students tested achieved Academic Recognition by scoring a 4 on the written composition, mastering all objectives, and answering at least 95% of the items correct in all three subject areas.

The following chart illustrates Grade 7 student performance on the three subject area tests at the 70% standard for the October 1990 and October 1991 administrations.

The table below provides the number of Grade 7 students tested statewide, the percent meeting minimum expectations, the average scale score, and the average scale score gain/loss between October 1990 and October 1991 in each subject area.

**Grade 7 Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	238,280	58%	1557	1
Reading	239,534	48%	1487	31
Mathematics	240,100	49%	1506	3

**SUBJECT AREA PERFORMANCE: WRITING**

Grade 7 writing performance showed a decline of two percentage points between the October 1990 and October 1991 administrations.

In the October 1990 administration, sixty percent of students tested at Grade 7 would have met minimum expectations at the 70% standard, while fifty-eight percent of the students met the passing standard in October 1991. Results on the written composition portion of the writing assessment were unchanged between October 1990 and 1991. Nineteen percent of the students tested mastered all objectives in writing in both October 1990 and October 1991 administrations.

Writing: Written Composition Performance Assessment

Students at Grade 7 are continuing to experience high levels of success on the TAAS written composition task.

Eighty-six percent of the Grade 7 students developed a successful process writing composition in October 1991. In October 1991 the written composition performance assessment required students at Grade 7 to describe how to do something for a specified audience. An example of a Grade 7 "how to" writing prompt is provided below.

How do you find and check out a book in your school library? Write a composition for your teacher. In this composition, explain how you find and check out a book in the library. Be sure to explain each step fully so that someone else would know how to do it.

Student performance at Grade 7 reveals that more than forty percent of the students who passed the composition requirement did so by achieving a rating of 3 or 4 on the written essay. The distribution of written composition ratings between the October 1990 and 1991 administrations are shown in the following table.

**Percent of Grade 7 Students Achieving Each Written Composition Rating**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1990	14%	46%	33%	7%
October 1991	14%	45%	33%	8%

An analysis of the compositions at Grade 7 which were unsuccessful shows that sixty-four percent of the essays receiving a rating of 0 did not attempt the writing task. Eighty-eight percent of the compositions that received a rating of 1 "lacked sufficient support and/or elaboration." These students were unable to develop their ideas in a clear and logical manner in order to be considered minimally successful at the writing task.

Writing: Multiple-Choice Assessment

Editing skills constitute the major challenge for writing instruction at Grade 7.

While the success rate on Objective 5 improved five percentage points between October 1990 and October 1991, student performance on Objective 7 which measured spelling, capitalization, and punctuation dropped six percentage points from the performance on the 1990 test. While the composition section of the writing assessment focuses on the development of a first draft, the skills tested on Objectives 5, 6, and 7 are crucial in taking the first draft composition to a polished form through editing.

**Mastery of Writing Objectives**

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
5. Sentence Construction	66%	71%
6. English Usage	59%	59%
7. Use of Spelling, Capitalization, and Punctuation	40%	34%

**SUBJECT AREA PERFORMANCE: READING**

Reading scores exhibited the most improvement of all subject areas tested at Grade 7 in October 1991.

In reading, forty-eight percent of the Grade 7 students met minimum expectations for passing in October 1991, a five percentage point improvement from October 1990 performance at the 70% standard. Nine percent of the

Grade 7 students mastered all objectives on all tests taken in October 1991, a figure which remained unchanged from the October 1990 administration.

Students at Grade 7 experienced success in identifying supporting ideas in texts; however, summarization skills showed a marked decline between October 1990 and October 1991.

Performance on Objective 2 which required students to identify supporting ideas in a variety of written contexts improved fifteen percentage points in 1991. A gain of twelve percentage points was realized on Objective 6 which required students to recognize point of view, propaganda, and statement of fact and nonfact in text selections. The lowest performing reading objective at Grade 7 required students to summarize information provided in a variety of written texts (20% mastery).

#### Mastery of Reading Objectives

<u>Objective</u>	<u>October</u> <u>1990</u>	<u>October</u> <u>1991</u>
1. Word Meaning	55%	59%
2. Supporting Ideas	52%	67%
3. Summarization	27%	20%
4. Relationships and Outcomes	43%	39%
5. Inferences and Generalizations	40%	49%
6. Point of View, Propaganda, and Fact and Nonfact	26%	38%

#### SUBJECT AREA PERFORMANCE: MATHEMATICS

Although improvement was noted in each of the objectives in the Concepts domain in mathematics, students encountered difficulty in the Operations and Problem Solving domains.

In October 1991, forty-nine percent of the seventh graders tested met minimum expectations in mathematics, a one percentage point improvement from October 1990 results scored at the 70% standard. Ten percent of Grade 7 students mastered each of the thirteen mathematics objectives in October 1991.

The Concepts domain displayed the highest percentages of students achieving objective-level mastery of any area of mathematics tested at Grade 7 in October 1991. The mastery rates ranged from sixty-five percent on Objective 5, related to student knowledge of probability and statistics, to eighty-one percent on Objective 3 which assessed student understanding of geometric properties and relationships.

Between October 1990 and October 1991 student performance dropped or remained unchanged on the mathematics objectives in the Operations domain. Grade 7 students had the most difficulty on Objective 9 which required students

to use division to solve problems (38% mastery). Students encountered items assessing division skills similar to the sample task provided below. The passing percentages on all four of the Operations objectives were less than sixty percent.

Kay sold \$160.20 worth of magazine subscriptions in her neighborhood. She earned a total of \$24.03 for her work. If the payment rate was \$0.89 per subscription, how many subscriptions did she sell?

- A 180
- B 160
- C 30
- D\* 27
- E Not Here

The lowest performing objective, Objective 11, which required students to develop and use a variety of problem solving strategies, dropped seven percentage points in October 1991 to an overall passing rate of twenty-two percent. Students were presented test items for Objective 11 similar to the following assessment task.

The figure shows a square in the interior of a circle.

Which procedure would you use to find the area of the shaded region?

- A Find the circumference of the circle and subtract the perimeter of the square.
- B\* Find the area of the circle and subtract the area of the square.
- C Find the area of the circle and add the area of the square.
- D Find the circumference of the circle and subtract the area of the square.
- E Find the circumference of the circle and add the perimeter of the square.

Although a need for substantial improvement exists for students in problem solving, a gain of seven percentage points was noted on Objective 12 that assessed the ability of students to analyze problems based on information obtained from graphs and charts or to formulate solution sentences to solve problems (49% mastery).

Mastery of Mathematics Objectives

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
Concepts Domain		
1. Number Concepts	76%	79%
2. Algebraic/Mathematical Relations and Functions	72%	73%
3. Geometric Properties and Relationships	77%	81%
4. Measurement Concepts	70%	72%
5. Probability and Statistics	60%	65%
Operations Domain		
6. Use of Addition to Solve Problems	61%	56%
7. Use of Subtraction to Solve Problems	53%	53%
8. Use of Multiplication to Solve Problems	59%	53%
9. Use of Division to Solve Problems	39%	38%
Problem Solving Domain		
10. Problem Solving using Estimation	59%	61%
11. Problem Solving using Solution Strategies	29%	22%
12. Problem Solving using Mathematical Representation	42%	49%
13. Evaluation of the Reasonableness of a Solution	45%	42%

**DEMOGRAPHIC PERFORMANCE SUMMARY**

*Ethnic Groups*

African American and Hispanic student performance rates in all subject areas differed by twenty-five percentage points or more from that of white students at Grade 7.

As reflected at other grade levels, performance gaps at Grade 7 among the three major ethnic groups were much smaller on the written composition section of the writing test as compared with differences in performance on the overall writing test. Both African American and Hispanic students achieved an eighty-one percent passing rate on the written composition, ten percentage points below the passing rate of white students. The difference in passing rates between ethnic groups is more pronounced when considering the results of the overall writing test. The disparity in performance between white and African American students was thirty percentage points while there was a twenty-five percentage point performance gap between white and Hispanic students.

**Texas Assessment of Academic Skills  
Percent Meeting Minimum Expectations by Ethnic Group  
October 1991**

Substantial gains of twenty-nine to thirty-four scale score points were attained by each of the three major ethnic groups in the area of reading. Little change was noted in the average scale score results in writing and mathematics between 1990 and 1991.

**Grade 7 Performance Results by Ethnic Group  
October 1991**

Ethnicity	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
<b>African American</b>

## Economic Groups

Substantial differences in performance between free lunch or Chapter 1 program participants and nonparticipants illustrate the lack of equity among student populations.

Of the 62,774 students identified as at-risk of dropping out of school, seven percent met minimum expectations on all tests taken, compared with a forty-five percent passing rate for students not identified as at-risk. At-risk students had the most difficulty in the reading and mathematics subject areas scoring forty-two percentage points lower than students not identified as at-risk in both reading and mathematics.

At Grade 7 three percent of students identified as limited English proficient (LEP) met minimum expectations on all tests taken compared to the passing rate of thirty-six percent for non-LEP students, as shown in following chart. Eight percent of the students identified as LEP met minimum expectations in reading, scoring forty-three percentage points below non-LEP students. Fifteen percent of the LEP students passed the writing test and thirteen percent passed mathematics, scoring thirty-eight percentage points or more below the passing rates for non-LEP students.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

Economically Disadvantaged	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Participants				
Writing	86,110	41%	1482	(6)
Reading	86,673	30%	1406	36
Mathematics	87,099	32%	1427	7

Reading	216,297	52%	1502	33
Mathematics	216,783	52%	1521	6

## REMEDIATION

More than a quarter of students tested at Grade 7 in October 1991 require remediation on all three TAAS tests.

Section 21.557 of the Texas Education Code requires districts to provide remedial instruction for students failing any section of the TAAS test. Sixty-five percent of the students required remediation in one or more subject areas tested. As shown in the table below, a rather high percentage of students (29%) failed all three tests in October 1991.

### Grade 7 Students Requiring Remediation

	October 1990		October 1991	
Failed One Test Only	41,830	18%	42,648	17%
Failed Two Tests Only	50,720	22%	47,077	19%
Failed All Three Tests	<u>66,361</u>	<u>28%</u>	<u>70,291</u>	<u>29%</u>
Total	158,911	68%	160,016	65%

## Section VIII

### Grade 5 Results

The TAAS assessment at Grade 5 provides remediation information to districts to assist them in preparing students for the educational requirements of the middle school program.

#### OCTOBER 1991 ADMINISTRATION

Almost half of the Grade 5 students who were tested in October 1991 were successful in meeting minimum expectations on all tests taken.

Of the 251,641 Grade 5 students tested in October 1991, forty-six percent of the students met minimum expectations on all tests taken, a one percentage point gain from the October 1990 results scored at the 70% standard. Five percent of the Grade 5 students mastered all objectives on all tests taken in October 1991 with less than one percent of the students achieving the highest level of performance, Academic Recognition.

The following chart illustrates the differences in performance between the October 1990 and October 1991 administrations on the three subject area tests scored at the 70% standard.

Grade 5 student performance achieved scale score gains in all three subject areas between October 1990 and October 1991.

The table below displays the number of Grade 5 students tested statewide, the percent meeting minimum expectations, the average scale score, and the average scale score gain in each subject area between October 1990 and October 1991.

**Grade 5 Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	245,771	76%	1619	22
Reading	246,876	61%	1565	12
Mathematics	248,419	56%	1542	13

**SUBJECT AREA PERFORMANCE: WRITING**

The area of writing showed the most improvement of any subject area tested at Grade 5 in October 1991.

Seventy-six percent of the Grade 5 students tested met the minimum expectations in writing in October 1991, a three percentage point gain compared with October 1990 results scored at the 70% standard. Mastery of all objectives was successfully attained by twenty-one percent of Grade 5 students by scoring a 3 or 4 on the written composition and mastering each of the multiple-choice objectives.

Writing: Written Composition Performance Assessment

Intensive writing instruction must occur at Grade 5 to address the decline in the student performance at the higher levels of written expression.

Students at Grade 5 in October 1991 were required to write a narrative composition on a specified topic. Narrative prompts may contain a written prompt only or may also include a pictorial stimulus to provide the student with further information. The following sample is representative of the type of narrative prompt a student might encounter on the Grade 5 TAAS assessment.

Pretend you are walking outside, and you see a sparkling pink stone. As you reach to touch it, the stone changes color. Write a story about what happens next.

A comparison of written composition ratings between the October 1990 and October 1991 administrations is shown in the table below and reveals an eleven percentage point drop in the percentage of students receiving ratings of 3 or 4 on the written essay.

**Percent of Grade 5 Students Achieving Each Written Composition Rating**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1990	9%	41%	41%	8%
October 1991	10%	52%	35%	3%

The use of elaboration is a key skill lacking in most unsuccessful Grade 5 compositions.

Sixty-five percent of the student compositions receiving a rating of 0 did not attempt a response to the narrative prompt. Forty-three percent of the Grade 5 compositions receiving a rating of 1 were annotated for wrong mode. Students who addressed the wrong mode in their response did not link a sequence of events through time or provided a response which was merely informative or descriptive. The majority of students, seventy-nine percent, received a rating of 1 on their compositions because they lacked the support and/or elaboration necessary to meet the criteria for minimum expectations.

Writing: Multiple-Choice Assessment

Students at Grade 5 are achieving better rates of success in recognizing appropriate sentence construction but require additional instruction in the use of spelling, punctuation, and capitalization.

In the multiple-choice portion of the writing test, Grade 5 student results improved seven percentage points since October 1990 on Objective 5, which required students to recognize appropriate sentence construction within the context of a written passage. However, as with other grades assessed, Grade 5 students continued to have difficulty with recognizing appropriate spelling, capitalization, and punctuation in written texts. The table below compares the percentage of students mastering each multiple-choice writing objective for October 1990 and October 1991.

**Mastery of Writing Objectives**

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
5. Sentence Construction	62%	69%
6. English Usage	83%	81%
7. Use of Spelling, Capitalization, and Punctuation	43%	41%

## SUBJECT AREA PERFORMANCE: READING

Student achievement in reading at Grade 5 remained virtually unchanged between 1990 and 1991.

Sixty-one percent of the Grade 5 students met minimum expectations in reading and nineteen percent of the students achieved mastery of all objectives in reading in October 1991.

Although a one percentage point drop was noted, Grade 5 students achieved the highest mastery rate in reading on Objective 2 which required students to identify supporting ideas in a variety of written texts. Summarization skills remain a key area for focus for Grade 5 students as Objective 3 still exhibited the lowest mastery rate in reading, despite a seven percentage point gain from October 1990. The summarization task requires a student to read a passage of text related to a particular topic and choose the best summary statement for the passage.

### Mastery of Reading Objectives

<u>Objective</u>	<u>October</u> <u>1990</u>	<u>October</u> <u>1991</u>
1. Word Meaning	56%	55%
2. Supporting Ideas	70%	69%
3. Summarization	34%	41%
4. Relationships and Outcomes	58%	54%
5. Inferences and Generalizations	49%	51%
6. Point of View, Propaganda, and Fact and Nonfact	57%	51%

## SUBJECT AREA PERFORMANCE: MATHEMATICS

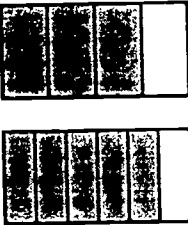

While gains in mastery rates were seen in the Concepts and Problem Solving domains, low achievement rates persist in the mathematics objectives assessing higher order thinking skills.

In October 1991, fifty-six percent of the fifth graders tested met minimum expectations for passing, a two percentage point gain from October 1990 results scored at the 70% standard. Fifteen percent of the students mastered all objectives on the mathematics test in October 1991.

Student performance on each of the objectives in the Concepts domain was higher than in any other mathematics domain. The objective with the highest mastery rate in mathematics in October 1990 and October 1991 was Objective 5, which required students to analyze data and/or interpret graphs to determine possible outcomes in a given situation.

Grade 5 performance improved significantly in four of the five objectives in the Concepts domain when compared with October 1990 results. The largest gain was ten percentage points on Objective 1 which required students to demonstrate an understanding of number concepts. The sample item below represents the type of item assessing number concept skills at Grade 5.

The models are shaded to show 2 fractions.

The models show that —

A  $\frac{1}{4} < \frac{1}{6}$

B  $\frac{1}{4} = \frac{1}{6}$

C  $\frac{3}{4} = \frac{5}{6}$

D\*  $\frac{3}{4} < \frac{5}{6}$

Two objectives in the Operations and Problem Solving domains realized considerable gains between October 1990 and 1991. Objective 9, which assessed division skills in problem solving, improved by six percentage points while Objective 11 jumped eleven percentage points from October 1990 to 1991. Objective 11 required students to recognize and apply appropriate problem solving strategies. The achievement gaps between the Operations and Problem-Solving domains points to the importance of implementing instruction to emphasize higher order thinking skills in all areas of mathematics.

The following sample problem is representative of the type of information assessed on Objective 10/13, the lowest performing objective in the area of mathematics. These objectives required students to estimate solutions or evaluate the reasonableness of a solution to a given problem.

Bob selected 4 items in a store. The lowest-priced item was \$3 and the highest-priced item was \$8. Before tax is added, what is a reasonable total for the cost of the items?

- A less than \$8
- B between \$8 and \$12
- C\* between \$12 and \$32
- D more than \$32

### Mastery of Mathematics Objectives

<u>Objective</u>	<u>October 1990</u>	<u>October 1991</u>
Concepts Domain		
1. Number Concepts	72%	82%
2. Algebraic/Mathematical Relations and Functions	73%	80%
3. Geometric Properties and Relationships	77%	85%
4. Measurement Concepts	67%	74%
5. Probability and Statistics	86%	86%
Operations Domain		
6. Use of Addition to Solve Problems	75%	73%
7. Use of Subtraction to Solve Problems	58%	56%
8. Use of Multiplication to Solve Problems	54%	51%
9. Use of Division to Solve Problems	61%	67%
Problem Solving Domain		
10/13. Problem Solving: Estimation/Reasonableness	32%	30%
11. Problem Solving using Solution Strategies	44%	55%
12. Problem Solving using Mathematical Representation	50%	53%

### DEMOGRAPHIC PERFORMANCE SUMMARY

#### *Ethnic Groups*

Statewide results at Grade 5 reveal that performance gaps among ethnic populations are closing in the area of writing but remain high in reading and mathematics.

A review of Grade 5 results aggregated by ethnic groups shows a thirty-three percentage point difference between African American and white students and a twenty-six percentage point gap between Hispanic and white students in the area of mathematics. In writing, however, the differences in performance

between African American and white students and Hispanic and white students was nineteen and seventeen percentage points, respectively.

Between October 1990 and 1991 African American and Hispanic student performance showed slightly larger scale score gains than white students in the areas of reading and mathematics. Although equity gaps persist among ethnic populations, no scale score losses were reported in any subject area tested for African American or Hispanic students as reflected in the chart below.

**Grade 5 Performance Results by Ethnic Group  
October 1991**

Ethnicity	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
African American				
Writing	34,369	65%	1558	8
Reading	34,539	44%	1486	13
Mathematics	34,789	36%	1453	17
Hispanic				
Writing	79,313	67%	1562	9
Reading	79,632	47%	1499	15
Mathematics	80,309	43%	1484	18

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
<b>White</b>				
Writing	125,340	84%	1668	33
Reading	125,935	74%	1626	10
Mathematics	126,518	69%	1599	9

*Economic Groups*

Results for LEP or at-risk students at Grade 5 show that considerable disparity exists in student performance when compared with students who are not identified as LEP or at-risk.

Slightly more than one-fourth of Grade 5 students tested were identified as at-risk of dropping out of school. Eighteen percent of these students met minimum expectations on all tests taken compared with fifty-seven percent of students not identified as at-risk, as shown in the following chart.

Eleven percent of the 16,215 Grade 5 students identified as limited English proficient (LEP) met minimum expectations on all tests taken, while forty-eight percent of the non-LEP students met minimum expectations. LEP students achieved higher passing rates in writing than the reading and mathematics subject areas.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

Economically Disadvantaged	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
<b>Participants</b>				
Writing	99,525	64%	1551	9

Reading	202,402	68%	1595	12
Mathematics	203,634	63%	1570	14

## REMEDIATION

Fifty-four percent of Grade 5 students tested in October 1991 require remediation in one or more subject areas.

Section 21.557 of the Texas Education Code requires districts to provide remedial instruction for students failing any section of the TAAS test. As shown in the table below, only a small percentage of students (17%) failed all three tests in October 1990 and October 1991.

### Grade 5 Students Requiring Remediation

	October 1990		October 1991	
Failed One Test Only	48,784	20%	49,734	20%
Failed Two Tests Only	45,258	18%	44,349	17%

## WRITTEN COMPOSITION ANALYTIC INFORMATION

### SUMMARY REPORT

GRADE: 05  
 DISTRICT: STATEWIDE  
 CAMPUS:

REPORT DATE: DECEMBER 1991  
 DATE OF TESTING: OCTOBER 1991

PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 0 OR 1 WERE SCORED ANALYTICALLY. FOR EACH CATEGORY THE NUMBER OF PAPERS HAVING THAT DEFICIENCY IS INDICATED. A STUDENT'S PAPER MAY BE LISTED IN MORE THAN ONE CATEGORY. PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 2, 3 OR 4 WERE NOT SCORED ANALYTICALLY.

ANALYTIC CATEGORY	NUMBERS OF PAPERS	
	RATING OF 0	RATING OF 1
Used wrong purpose/mode . . . . .	0	10097
Lacked organization/structure . . . . .	0	3798
Lacked support/elaboration. . . . .	0	18382
Lacked language control . . . . .	7	2314
Wrote off topic . . . . .	10	
No writing attempted . . . . .	190	
Wrote in a foreign language . . . . .	33	
Paper was illegible/incoherent . . . . .	34	
Did not write enough to score . . . . .	12	
Copied the prompt . . . . .	14	
Explicitly refused to write . . . . .	0

## Section IX

### Grade 3 Results

The TAAS assessment at Grade 3 measures student achievement based on skills acquired through Grade 2.

#### OCTOBER 1991 ADMINISTRATION

The highest levels of reading and mathematics performance in October 1991 were achieved by students at Grade 3.

In October 1991, fifty-six percent of these students met the minimum expectations on all tests taken, which reflects a two percentage point drop from October 1990 results scored at the 70% standard. Despite this slight decrease in overall achievement, the Grade 3 results represent the highest achievement rates of students passing all tests taken of any grade level tested. Grade 3 also has the highest percentage (10%) of students achieving mastery of all objectives on all tests taken. One percent of the students tested received Academic Recognition, the highest level of performance on the TAAS assessment.

The following chart illustrates student performance for the October 1990 and 1991 administrations on the three subject area tests at the 70% standard.

The table below provides the number of Grade 3 students tested statewide, the percent meeting minimum expectations, the average scale score, and the average scale score gain/loss between October 1990 and October 1991 in each subject area.

**Grade 3 Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	240,615	61%	1562	(11)
Reading	241,416	80%	1664	14
Mathematics	244,108	84%	1676	13

**SUBJECT AREA PERFORMANCE: WRITING**

While performance went up in reading and mathematics for Grade 3, writing showed a decline of five percentage points.

In October 1990, sixty-six percent of students met minimum expectations in writing at the 70% standard while sixty-one percent of the students passed in October 1991. Despite the drop in the percent of students meeting minimum expectations, eighteen percent of the Grade 3 students achieved mastery of all objectives in writing.

Writing: Written Composition Performance Assessment

Performance results indicate that eighty percent of students at Grade 3 responded successfully on the written composition portion of the writing assessment.

The Grade 3 written composition section assesses the student's ability to respond appropriately in writing on a given topic. Grade 3 students were required to write a descriptive composition which may contain a picture stimulus along with the written prompt describing the task to be completed by the student. Students are scored on their ability to respond appropriately to a specified purpose, employ a consistent organizational strategy, exhibit control of written language, and effectively develop the composition's central idea(s). The score point distributions are provided below and reveal a ten percentage point loss in the number of students who achieved a rating of 3 or 4 between the October 1990 and 1991 administrations.

**Percent of Grade 3 Students Achieving Each Written Composition Rating**

	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>
October 1990	16%	50%	28%	5%
October 1991	20%	57%	20%	3%

The majority of students at Grade 3 who attempted the writing task on TAAS were unsuccessful due to lack of sufficient elaboration.

Compositions receiving a rating of 0 or 1 received analytic scoring to indicate why the paper was unsuccessful in meeting minimum expectations. Only 485 Grade 3 compositions received a rating of 0 in October 1991. Of the Grade 3 papers receiving a rating of 1, ninety-five percent lacked support and elaboration, and more than twenty-one percent of the papers were annotated for poor organization or structure.

#### Writing: Multiple-Choice Assessment

Student written communication skills increased between 1990 and 1991 with improvement noted in each of the writing multiple-choice objectives.

Grade 3 student performance improved nine percentage points on Objective 5 which required students to recognize appropriate sentence construction in the context of a written passage. However, students are still encountering difficulty on Objective 7 which focuses on editing skills related to spelling, capitalization, and punctuation.

#### Mastery of Writing Objectives

<u>Objective</u>	<u>October</u> <u>1990</u>	<u>October</u> <u>1991</u>
5. Sentence Construction	71%	80%
6. English Usage	79%	80%
7. Use of Spelling, Capitalization, and Punctuation	55%	59%

#### SUBJECT AREA PERFORMANCE: READING

Students at Grade 3 demonstrated increased success in their ability to read for a particular purpose.

The results from October 1991 show that students tested at Grade 3 have continued to improve their reading skills between test administrations. On the reading test, minimum expectations were met by seventy-nine percent of the third graders tested in 1990 and by eighty percent of the students tested in 1991. In 1990, forty-seven percent of the Grade 3 students tested mastered all objectives on the reading test, while fifty-three percent of those tested in 1991 mastered all objectives. This increase of six percentage points means that approximately 14,000 more third graders mastered all reading objectives in October 1991 than in October 1990.

Substantial improvement can also be seen in mastery rates on Objectives 3, 4, and 6 between 1990 and 1991, as shown in the table below. Student results on

Objective 4 which required students to perceive relationships and recognize outcomes in a variety of written texts gained eleven percentage points since October 1990. Grade 3 students had the most difficulty in determining the meaning of words from written texts by using context clues (69% mastery).

### Mastery of Reading Objectives

Objective	October	October
	1990	1991
1. Word Meaning	76%	69%
2. Supporting Ideas	79%	79%
3. Summarization	65%	71%
4. Relationships and Outcomes	74%	85%
5. Inferences and Generalizations	87%	85%
6. Point of View, Propaganda, and Fact and Nonfact	77%	84%

### SUBJECT AREA PERFORMANCE: MATHEMATICS

Students tested at Grade 3 in 1991 demonstrated high levels of achievement in the Concepts and Operations domains.

In October 1990, eighty-one percent of the third graders tested met minimum expectations for passing the mathematics subject area test of the TAAS. In 1991 this figure rose to eighty-four percent. A mastery rate of thirty-four percent was achieved in mathematics by students tested in 1991 compared to a mastery rate of thirty-three percent in 1990.

Strong gains were seen in all three mathematics domains in October 1991. Student mastery rates of ninety percentage points or more were achieved on three of five objectives in the Concepts domain which implies students at Grade 3 have a solid understanding of the foundation skills needed in problem solving.

In the Operations domain, Grade 3 results improved by two percentage points on Objective 7, use of subtraction to solve problems, and Objective 8/9, use of multiplication/division to solve problems.

The lowest performing mathematics objective (Objective 12) in the Problem Solving domain required students to express or solve problems using mathematical representation. This objective assessed the Grade 3 student's ability to formulate and use solution sentences and to analyze and interpret mathematical representations in the form of charts and simple graphs.

Objective-level results in the Problem Solving domain improved four and six percentage points in the objectives measuring problem solving skills using estimation and problem solving skills using solution strategies. An example of the type of item a Grade 3 student might encounter on the assessment to test skills with solution strategies is provided below.

If you add Alex's age and Larry's age, you get 10. Alex's age is greater than 1, and Larry's age is greater than 7. How old are the boys? Mark your answer.

- 1 and 9
- 2 and 8 \*
- 3 and 7
- 4 and 6

### Mastery of Mathematics Objectives

<u>Objective</u>		<u>October 1990</u>	<u>October 1991</u>
	Concepts Domain		
1. Number Concepts		87%	89%
2. Algebraic/Mathematical Relations and Functions		85%	92%
3. Geometric Properties and Relationships		91%	90%
4. Measurement Concepts		82%	84%
5. Probability and Statistics		94%	96%
	Operations Domain		
6. Use of Addition to Solve Problems		79%	77%
7. Use of Subtraction to Solve Problems		81%	83%
8/9. Use of Multiplication/Division to Solve Problems		85%	87%
	Problem Solving Domain		
10/13. Problem Solving using Estimation/Reasonableness		65%	69%
11. Problem Solving using Solution Strategies		75%	81%
12. Problem Solving using Mathematical Representation		65%	64%

### DEMOGRAPHIC PERFORMANCE SUMMARY

#### *Ethnic Groups*

Comparisons of assessment results across grades indicate that lesser amounts of disparity in performance among ethnic groups occur at Grade 3.

In October 1991, mathematics results aggregated by major ethnic groups show that African American and Hispanic students made scale score gains of twenty points or more since October 1990, compared with a scale score gain for white students of four points. In the writing and reading subject areas, comparisons of results between October 1990 and 1991 reveal relatively similar performance among the ethnic groups.

**Texas Assessment of Academic Skills  
Percent Meeting Minimum Expectations by Ethnic Group  
October 1991**

As seen in the other grade levels, ethnic groups experienced less disparity in performance on the written composition portion of the writing assessment than on the overall writing test. The percent of African American students writing a minimally successful composition was sixteen percentage points lower than white students, while the difference in passing rates on the overall writing test was twenty-three percentage points. Hispanic students achieved passing rates twelve percentage points lower than white students on the written composition, compared with a twenty percentage point difference on the overall writing test.

**Percent of Students Meeting Minimum Expectations  
October 1991**

Ethnicity	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991

Reading	126,501	87%	1723	16
Mathematics	127,875	91%	1723	4

*Economic Groups*

Gaps in performance at Grade 3 between students identified as economically disadvantaged and students not identified as economically disadvantaged are of major concern in achieving educational equity for all students.

Grade 3 students identified as economically disadvantaged performed twenty-four percentage points below those students not identified as economically disadvantaged in meeting minimum expectations on all tests taken.

Results also indicate that limited English proficient students (LEP) lag behind non-LEP students by thirty percentage points. Similar disparities exist between at-risk students and those not identified as being at-risk of dropping out of school, as illustrated in the following chart.

Students participating in a free or reduced price meal program (economically disadvantaged) and students in a Chapter 1 Regular program achieved strong scale score gains in mathematics between October 1990 and October 1991.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

Economically Disadvantaged	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991

## REMEDICATION

More than half of students tested at Grade 3 in October 1991 were successful on one or more sections of the TAAS and will not require remediation.

Section 21.557 of the Texas Education Code requires districts to provide remedial instruction for students failing any section of the TAAS test. In October 1991, forty-four percent of the students tested required remediation in one or more subject area tests with the majority failing one test only.

# TEXAS ASSESSMENT OF ACADEMIC SKILLS

## WRITTEN COMPOSITION ANALYTIC INFORMATION

### SUMMARY REPORT

GRADE: 03  
 DISTRICT: STATEWIDE  
 CAMPUS:

REPORT DATE: DECEMBER 1991  
 DATE OF TESTING: OCTOBER 1991

PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 0 OR 1 WERE SCORED ANALYTICALLY. FOR EACH CATEGORY THE NUMBER OF PAPERS HAVING THAT DEFICIENCY IS INDICATED. A STUDENT'S PAPER MAY BE LISTED IN MORE THAN ONE CATEGORY. PAPERS RECEIVING WRITTEN COMPOSITION RATINGS OF 2, 3 OR 4 WERE NOT SCORED ANALYTICALLY.

ANALYTIC CATEGORY	NUMBERS OF PAPERS	
	RATING OF 0	RATING OF 1
Used wrong purpose/mode . . . . .	53	5146
Lacked organization/structure . . . . .	26	10214
Lacked support/elaboration. . . . .	49	45533
Lacked language control . . . . .	24	3196
Wrote off topic . . . . .	78	
No writing attempted . . . . .	207	
Wrote in a foreign language . . . . .	6	
Paper was illegible/incoherent . . . . .	141	
Did not write enough to score . . . . .	33	
Copied the prompt . . . . .	20	
Explicitly refused to write . . . . .	0	

WRITTEN COMPOSITION RATING SUMMARY

## Section X

### Grade 3 Spanish Results

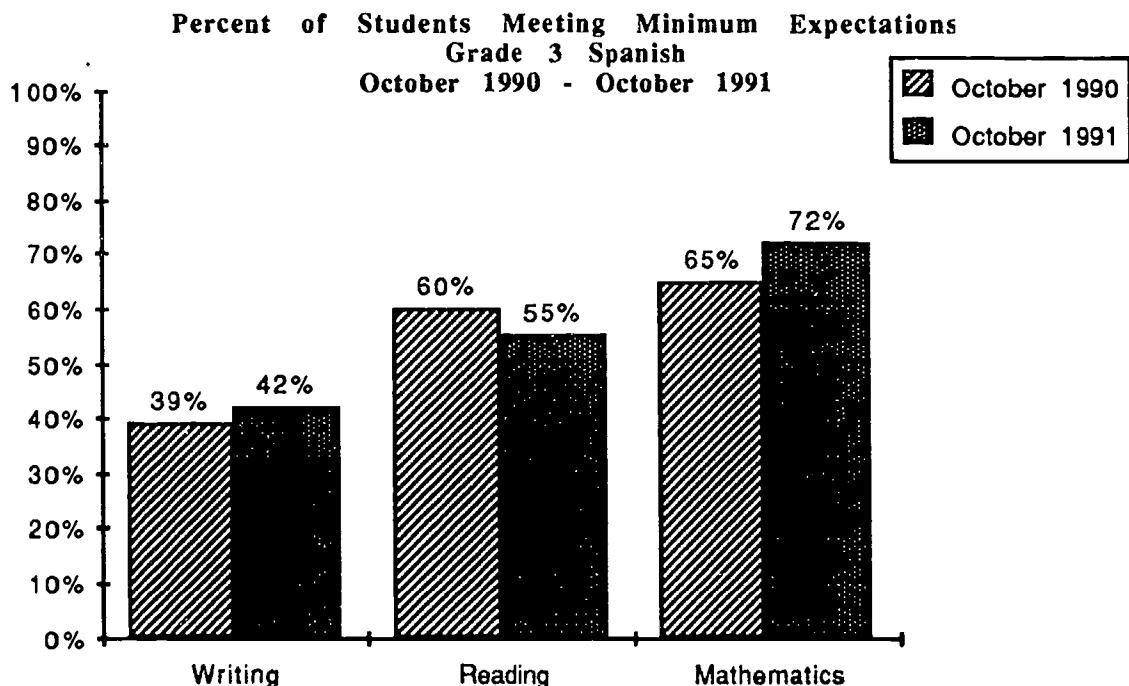

The Spanish version of the Grade 3 TAAS test provides an opportunity for students to be tested in their native language of Spanish. The Grade 3 assessment is the only test for which an alternative form is available for non-English speaking students.

#### OCTOBER 1991 ADMINISTRATION

Students taking the Spanish version of the Grade 3 TAAS in October 1991 experienced a higher rate of success overall than students who were tested with the Spanish version in October 1990.

Of the 14,432 students tested in October 1991, thirty-three percent met the minimum expectations on all tests taken, a two percentage point improvement from October 1990 results scored at the seventy percent standard. Four percent of the students mastered all objectives on all tests taken in October 1991.

One percent of the Grade 3 students tested with the Spanish version of TAAS, received Academic Recognition, the highest level of achievement on the testing program. The following chart compares student performance on the Grade 3 Spanish test between the October 1990 and October 1991 administrations. Growth in student performance was realized in the areas of writing and mathematics with students experiencing a decline in the area of reading.

The table below provides the number of Grade 3 students tested with the Spanish version test, the percent meeting minimum expectations, the average scale score, and the average scale score gain/loss between October 1990 and October 1991 in each subject area. The table further illustrates the drop in performance on the reading test between the 1990 and 1991 administrations.

**Grade 3 Spanish Student Performance by Subject Area  
October 1991**

	Number Tested	% Meeting Minimum Expectations	Average Scale Score	Scale Score Gain (Loss) 1990-1991
Writing	14,142	42%	1466	25
Reading	14,215	55%	1523	(14)
Mathematics	14,265	72%	1595	22

**SUBJECT AREA PERFORMANCE: WRITING**

Grade 3 students tested with the Spanish version of TAAS require additional experience with editing skills.

Grade 3 students receiving the Spanish version of the TAAS are not required to write a composition as students must do on all other grade level TAAS assessments. Students administered the Spanish version of the Grade 3 TAAS are measured on Objectives 5 through 7 with multiple-choice test items.

On the October 1990 administration of the writing assessment, thirty-nine percent of the students met minimum expectations. Results from October 1991 show that forty-two percent of students met the passing standard, which indicates a slight increase from the previous year. Eighteen percent of the students achieved mastery of the three multiple-choice writing objectives in October 1991.

Students taking the Spanish version of the Grade 3 assessment gained eight percentage points on Objective 5 which tested recognition of proper sentence structure. However, test results reveal that students are achieving little success on Objective 7, which assesses the student's editing abilities.

**Writing Objective Mastery**

<u>Objetivo (Objective)</u>	<u>October 1990</u>	<u>October 1991</u>
5. Construcción de Oraciones (Sentence Construction)	51%	59%
6. Uso de Palabras y Frases en Español (Spanish Usage)	55%	54%
7. Ortografía, Mayúsculas, Minúsculas y Puntuación (Use of Spelling, Capitalization, and Punctuation)	27%	25%

## SUBJECT AREA PERFORMANCE: READING

The reading test represents the area of most challenge for Grade 3 students tested with the Spanish version of TAAS.

On the reading test, minimum expectations were met by sixty percent of the third grade Spanish students tested in 1990 and by fifty-five percent of the students tested in 1991. Only twenty-seven percent of the students mastered all six reading objectives in October 1991.

Improvement can be seen in Objectives 1, 3, and 6 between 1990 and 1991, as shown in the table below. A marked decline of ten percentage points in student performance was seen on Objective 4 which required students to identify relationships and predict outcomes based on specific written texts.

Objetivo (Objective)	Reading Objective Mastery	
	October 1990	October 1991
1. Significado de Palabras (Word Meaning)	54%	56%
2. Ideas Secundarias (Supporting Ideas)	65%	61%
3. Resúmenes (Summarization)	41%	45%
4. Relaciones y Resultados (Relationships and Outcomes)	65%	55%
5. Inferencias y Generalizaciones (Inferences and Generalizations)	77%	76%
6. Punto de Vista, Propaganda y Hechos/No Hechos (Point of View, Propaganda, and Fact and Nonfact)	61%	65%

## SUBJECT AREA PERFORMANCE: MATHEMATICS

Students tested with the Spanish version of TAAS at Grade 3 attained the highest level of success in the area of mathematics.

In October 1991, seventy-two percent of the students tested met minimum expectations for passing the mathematics subject area test, a seven percentage point gain from the October 1990 results scored at the seventy percent standard. Fourteen percent of the students taking the Spanish version test mastered each of the thirteen mathematics objectives.

Grade 3 student results had strong gains in two of the three mathematics domains (Conceptos and Operaciones), while students continued to demonstrate difficulty with questions requiring problem solving skills. The mastery rates improved on each objective tested in the Conceptos domain with students attaining the highest achievement level on Objective 3 (92% mastery).

The Operaciones domain contained the objective achieving the largest percentage point increase in achievement between 1990 and 1991. The student mastery rate jumped sixteen percentage points on Objective 8/9 which measured use of multiplication/division in problem solving.

October 1991 results reflect the need for students to have further experience with higher order thinking skills in problem solving. Objective 10/13 reflected the lowest mastery rate of forty-one percent in the area of mathematics which required students to estimate and evaluate the reasonableness of solutions to problem situations.

### Mathematics Objective Mastery

<u>Objetivo (Objective)</u>	<u>October 1990</u>	<u>October 1991</u>
<b>Dominio de Conceptos (Concepts Domain)</b>		
1. Conceptos de Número (Number Concepts)	79%	81%
2. Relaciones y Funciones Matemáticas/Algebraicas (Algebraic/Mathematical Relations and Functions)	83%	86%
3. Propiedades y Relaciones Geométricas (Geometric Properties and Relationships)	86%	92%
4. Conceptos de Medida (Measurement Concepts)	72%	73%
5. Probabilidad y Estadísticas (Probability and Statistics)	79%	81%
<b>Dominio de Operaciones (Operations Domain)</b>		
6. Soluciones con la Suma (Use of Addition to Solve Problems)	67%	67%
7. Soluciones con la Resta (Use of Subtraction to Solve Problems)	72%	75%
8/9. Soluciones con la Multiplicación/División (Use of Multiplication/Division to Solve Problems)	65%	81%
<b>Dominio de Problemas Razonados (Problem Solving Domain)</b>		
10/13. Aproximaciones/Evaluación de lo Razonable (Problem Solving using Estimation/Reasonableness)	48%	41%
11. Problemas Razonados Usando Estrategias (Problem Solving using Solution Strategies)	61%	64%
12. Problemas Razonados: Representaciones Matemáticas (Problem Solving using Mathematical Representation)	55%	58%

## DEMOGRAPHIC PERFORMANCE SUMMARY

### *Economic Groups*

Grade 3 Spanish TAAS results show that students participating in free lunch and Chapter 1 programs outperform nonparticipants in all subject areas.

The following tables display assessment results aggregated by participation in a free or reduced price meal program (economically disadvantaged) and/or the Chapter 1 Regular program.

### Grade 3 Spanish Performance Results October 1991

Economically Disadvantaged	Number <u>Tested</u>	% Meeting Minimum <u>Expectations</u>	Average Scale <u>Score</u>	Scale Score Gain (Loss) <u>1990-1991</u>

Reading	9,258	55%	1523	(24)
Mathematics	9,286	72%	1596	15

### REMEDIATION

Despite a slight decline in the percent of students failing all three sections of the Spanish version of the Grade 3 test, the total student failure rate of sixty-seven percent remains the highest of any group tested in 1991.

Sixty-nine percent of Grade 3 Spanish students tested in October 1990 required remediation in one or more subject areas. In 1991, this percentage decreased

---

slightly, as sixty-seven percent of the students tested required remediation for failing one or more subject area tests.

### Grade 3 Spanish Students Requiring Remediation

	<u>October 1990</u>		<u>October 1991</u>	
Failed One Test Only	2,912	25%	3,548	25%
Failed Two Tests Only	2,786	23%	3,351	23%
Failed All Three Tests	<u>2,449</u>	<u>21%</u>	<u>2,817</u>	<u>19%</u>
Total	8,147	69%	9,716	67%

# TEXAS ASSESSMENT OF ACADEMIC SKILLS SUMMARY REPORT

GRADE: 03-SPANISH

NON SPECIAL EDUCATION STUDENTS

REPORT DATE: DECEMBER 1991

DATE OF TESTING: OCTOBER 1991

**STATEWIDE**

TEST PERFORMANCE		GROUP CHARACTERISTICS	
	NUMBER	PERCENT	
<b>WRITING</b>			
COMUNICACION ESCRITA			
1-4. NO SON PARTE DEL EXAMEN EN ESPAÑOL			
		8101	59
		7435	54
		3502	26
5. CONSTRUCCION DE ORACIONES			
6. USO DE PALABRAS Y FRASES EN ESPAÑOL			
7. ORTOGRAFIA, MAYUSCULAS, MINUSCULAS Y PUNCTUACION			
NUMBER TESTED IN WRITING: 13654		5738	42
AVERAGE SCALE SCORE: 1468		2447	18
<b>TOTAL WRITING: MET MINIMUM EXPECTATIONS MASTERS ALL OBJECTIVES</b>			
<b>READING</b>			
COMPRENSION DE LECTURA			
1. SIGNIFICADO DE PALABRAS			
2. IDEAS SECUNDARIAS			
3. RESUMENES			
4. RELACIONES Y RESULTADOS			
5. INFERENCIAS Y GENERALIZACIONES			
6. PUNTO DE VISTA, PROPAGANDA Y HECHOS/NO HECHOS			
NUMBER TESTED IN READING: 13727		7644	56
AVERAGE SCALE SCORE: 1527		3816	28
<b>TOTAL READING: MET MINIMUM EXPECTATIONS MASTERS ALL OBJECTIVES</b>			
<b>MATHEMATICS</b>			
CONCEPTOS			
1. CONCEPTOS DE NUMERO			
2. RELACIONES Y FUNCIONES MATEMATICAS/ALGEBRAICAS			
3. PROPIEDADES Y RELACIONES GEOMETRICAS			
4. CONCEPTOS DE MEDIDA			
5. PROGRAMADURA Y ESTADISTICAS			
OPERACIONES			
6. SOLUCIONES CON LA SUMA			
7. SOLUCIONES CON LA RESTA			
8. SOLUCIONES CON LA MULTIPLICACION/DIVISION			
9. SOLUCIONES CON LA DIVISION			
<b>PROBLEMAS RAZONADOS</b>			
10/13. APROXIMACIONES/EVALUACION DE LO RAZONABLE			
11. PROBLEMAS RAZONADOS USANDO ESTRATEGIAS			
12. PROBLEMAS RAZONADOS: REPRESENTACIONES MATEMATICAS			
NUMBER TESTED IN MATHEMATICS: 13747		5719	42
AVERAGE SCALE SCORE: 1598		6842	64
		8040	58

## Texas Assessment of Academic Skills Instructional Objectives Grades 3 (English), 5, 7, 9, and Exit Level

### **LANGUAGE ARTS**

#### **DOMAIN: Written Communication**

- Objective 1: The student will respond appropriately in a written composition to the purpose/audience specified in a given topic.
- Objective 2: The student will organize ideas in a written composition on a given topic.
- Objective 3: The student will demonstrate control of the English language in a written composition on a given topic.
- Objective 4: The student will generate a written composition that develops/supports/elaborates the central idea stated in a given topic.
- Objective 5: The student will recognize appropriate sentence construction within the context of a written passage.
- Objective 6: The student will recognize appropriate English usage within the context of a written passage.
- Objective 7: The student will recognize appropriate spelling, capitalization, and punctuation within the context of a written passage.

#### **DOMAIN: Reading Comprehension**

- Objective 1: The student will determine the meaning of words in a variety of written texts.
- Objective 2: The student will identify supporting ideas in a variety of written texts.
- Objective 3: The student will summarize a variety of written texts.
- Objective 4: The student will perceive relationships and recognize outcomes in a variety of written texts.
- Objective 5: The student will analyze information in a variety of written texts in order to make inferences and generalizations.
- Objective 6: The student will recognize points of view, propaganda, and/or statements of fact and nonfact in a variety of written texts.

---

**Texas Assessment of Academic Skills  
Instructional Objectives  
Grades 3 (English), 5, 7, 9, and Exit Level**

---

**MATHEMATICS**

**DOMAIN: Concepts**

- Objective 1: The student will demonstrate an understanding of number concepts.
- Objective 2: The student will demonstrate an understanding of mathematical relations, functions, and other algebraic concepts.
- Objective 3: The student will demonstrate an understanding of geometric properties and relationships.
- Objective 4: The student will demonstrate an understanding of measurement concepts using metric and customary units.
- Objective 5: The student will demonstrate an understanding of probability and statistics.

**DOMAIN: Operations**

- Objective 6: The student will use the operation of addition to solve problems.
- Objective 7: The student will use the operation of subtraction to solve problems.
- Objective 8: The student will use the operation of multiplication to solve problems.
- Objective 9: The student will use the operation of division to solve problems.

**DOMAIN: Problem Solving**

- Objective 10: The student will estimate solutions to a problem situation.
- Objective 11: The student will determine solution strategies and will analyze or solve problems.
- Objective 12: The student will express or solve problems using mathematical representation.
- Objective 13: The student will evaluate the reasonableness of a solution to a problem situation.

---

**Texas Assessment of Academic Skills  
Instructional Objectives  
Grade 3 (Spanish)**

---

**Artes de lenguaje en español**

**DOMINIO: Comunicación escrita**

*Los objetivos números 1 á 4 son examinados con una composición escrita, la cual no es parte del examen en español en este momento.*

- Objetivo número 5: El estudiante reconocerá estructuras correctas de oraciones dentro del contexto de un pasaje escrito.
- Objetivo número 6: El estudiante reconocerá el uso correcto del español dentro del contexto de un pasaje escrito.
- Objetivo número 7: El estudiante reconocerá ortografía correcta, el uso correcto de letras mayúsculas y minúsculas, y puntuación correcta dentro del contexto de un pasaje escrito.

**DOMINIO: Comprensión de lectura**

- Objetivo número 1: El estudiante determinará el significado de palabras en varios tipos de textos escritos.
- Objetivo número 2: El estudiante identificará ideas secundarias en varios tipos de textos escritos.
- Objetivo número 3: El estudiante resumirá varios tipos de textos escritos.
- Objetivo número 4: El estudiante percibirá relaciones y reconocerá resultados en varios tipos de textos escritos.
- Objetivo número 5: El estudiante analizará información en varios tipos de textos escritos para hacer inferencias y generalizaciones.
- Objetivo número 6: El estudiante reconocerá puntos de vista, propaganda, y/o declaraciones que son hechos y no son hechos en varios tipos de textos escritos.

---

**Texas Assessment of Academic Skills  
Instructional Objectives  
Grade 3 (Spanish)**

---

**Matemáticas**

**DOMINIO: Conceptos**

- Objetivo número 1: El estudiante demostrará conocimiento de conceptos de números.
- Objetivo número 2: El estudiante demostrará conocimiento de relaciones matemáticas, funciones y otros conceptos algebraicos.
- Objetivo número 3: El estudiante demostrará conocimiento de propiedades y relaciones geométricas.
- Objetivo número 4: El estudiante demostrará conocimiento de conceptos de medida empleando unidades de varios sistemas.
- Objetivo número 5: El estudiante demostrará conocimiento de probabilidad y estadísticas.

**DOMINIO: Operaciones**

- Objetivo número 6: El estudiante empleará la operación de sumas para resolver problemas.
- Objetivo número 7: El estudiante empleará la operación de restas para resolver problemas.
- Objetivo número 8: El estudiante empleará la operación de multiplicación para resolver problemas.
- Objetivo número 9: El estudiante empleará la operación de división para resolver problemas.

**DOMINIO: Problemas razonados**

- Objetivo número 10: El estudiante aproximará respuestas a problemas.
- Objetivo número 11: El estudiante determinará las estrategias necesarias para obtener respuestas, y analizará o resolverá problemas.
- Objetivo número 12: El estudiante expresará o resolverá problemas empleando representaciones matemáticas.
- Objetivo número 13: El estudiante evaluará lo razonable que es la solución de un problema.

---

**Texas Educational Assessment of Minimum Skills  
Instructional Objectives  
Exit Level Mathematics**

---

- Objective 1: Select the set of numbers ordered from least to greatest.
- Objective 2: Round numbers to a particular place value.
- Objective 3: Identify equivalent fractions, decimals, and percents.
- Objective 4: Convert numbers from exponential notation to standard notation.
- Objective 5: Solve problems involving addition/subtraction/multiplication of fractions and mixed numbers.
- Objective 6: Use the basic operations to solve decimal problems.
- Objective 7: Solve problems involving addition of integers.
- Objective 8: Solve word problems involving multiple operations of whole numbers, decimals, fractions, and mixed numbers.
- Objective 9: Solve word problems involving proportions.
- Objective 10: Solve word problems involving percent.
- Objective 11: Solve word problems involving metric/customary measurements using the basic operations.
- Objective 12: Solve problems involving geometric formulas.
- Objective 13: Use geometric properties to solve problems involving geometric shapes.
- Objective 14: Solve word problems involving averages.
- Objective 15: Solve word problems involving simple probability.
- Objective 16: Use information from graphs and tables to solve word problems.
- Objective 17: Solve word problems using formulas.
- Objective 18: Solve problems to determine the value of a variable.

---

**Texas Educational Assessment of Minimum Skills  
Instructional Objectives  
Exit Level English Language Arts**

---

**Reading**

- Objective 1: Identify the main idea.
- Objective 2: Use context to understand the meaning of words.
- Objective 3: Use word structure to identify words.
- Objective 4: Identify specific details.
- Objective 5: Identify the sequence of events.
- Objective 6: Draw logical conclusions.
- Objective 7: Distinguish between fact and opinion.
- Objective 8: Identify the appropriate reference source.
- Objective 9: Use reference sources to locate information.
- Objective 10: Analyze literary selections.

**Writing**

- Objective 11: Demonstrate knowledge of standard uses of capitalization.
- Objective 12: Demonstrate knowledge of standard punctuation.
- Objective 13: Recognize the correct spelling of commonly used words.
- Objective 14: Demonstrate knowledge of correct English usage.
- Objective 15: Demonstrate the ability to distinguish complete sentences from fragments and/or run-ons.
- Objective 16: Recognize the sentence that best combines two related sentences.
- Objective 17: Demonstrate the ability to proofread a written communication.
- Objective 18: Demonstrate the ability to organize a written communication.

## Appendix B

### Development of the Assessment Instruments

The development phase of the TAAS testing program included a number of activities designed to ensure the production of high quality assessment instruments that accurately reflect what Texas students are being taught. Meetings were held with more than 1,000 educators and laypersons to identify those skills considered requisite for a Texas high school diploma. National experts were consulted to gather information on national trends in the instruction and assessment of mathematics, reading, and writing and to determine the direction of the Texas assessment program in those subject areas. Various strategies for assessment were also discussed.

The Texas essential elements were carefully analyzed in order to identify the strands of learning that cross the curriculum from the primary through the secondary levels. These strands were then translated into a broad set of test objectives that are consistent across grade levels. The objectives were adopted by the State Board of Education in November 1988.

After the objectives were adopted, specific instructional targets were formulated for each test objective. The instructional targets reflect grade-specific skill levels and thus vary from grade level to grade level. Test specifications were then developed for each subject area and for each grade level. In addition to the test objectives and instructional targets, these specifications also included an explanation of the content eligible for testing, a description of the test item format, and sample test questions. A draft of these specifications was reviewed by committees of Texas educators. Texas classroom teachers, curriculum specialists, administrators, education service center personnel, and a few university professors comprised these committees, which were formed by grade and subject area. Committee members were chosen to represent each education service center region, every type and size of school district, and the three major ethnic groups found in Texas. The committee's suggestions for revisions to the draft specifications were incorporated into the final versions of the TAAS measurement specifications. In July 1989 these documents were mailed to all school districts and education service centers.

The next stage in the development of the TAAS program was the development of more than 4,000 test items, which were written according to the test specifications and reviewed by Texas educator committees. The committees scrutinized each test item for appropriateness of content and difficulty and for cultural, ethnic, and sex bias. Based on the committee's recommendations, items were approved, revised, or rejected.

The test items that survived the committee reviews were field tested in October 1989 in 784 Texas school districts with more than 200,000 students in Grades 3, 5, 7, 9, and 11 participating. Data from the field test included:

- numbers of students by ethnicity and gender in each sample;
- percent of total students choosing the correct answer and each incorrect response;
- percent of students by sex and by major ethnic group who chose the correct answer and each incorrect response;
- point biserial correlations to determine the relationship between a correct response on a particular test item and the score obtained on the total subject area test; and
- various Rasch and Mantel-Haenszel indices to determine the relative difficulty of each test item and to identify greater-than-expected differences in performance on an item by gender and ethnicity.

Field test data were reviewed by Texas educator review committees in January and early February 1990. Representatives from 219 Texas school districts as well as from several education service centers participated in these meetings. Committee members voted to accept, accept with reservations, or to reject each of the 4,000 items. In addition, groups of minority Texas educators conducted separate minority bias reviews of each item in the exit level test. They then reported specific bias concerns to the exit level committee, and these concerns were taken into consideration by the committee prior to voting on each item.

Test blueprints were developed that reflected the relative emphasis for each objective as recommended by the educator review committees and the Agency's curriculum staff. The TAAS tests were constructed to:

- represent the range of content and difficulty of field tested items;
- include only those items determined acceptable by the educator review committees and those judged to be free of sex or ethnic bias; and
- reflect instructional emphases of the 1990s--problem solving and complex thinking.

The TAAS writing, reading, and mathematics tests were administered for the first time in October 1990. The measurement specifications were updated in the spring of 1990 to reflect changes in the essential elements. The revised specifications were sent to districts in August 1990.

The TEAMS exit level test was developed with the same care and thoroughness as that given to the development of the TAAS tests. The Texas Education Agency held meetings across the state and conducted surveys of students, teachers, and administrators to ensure that the assessment instrument would be based on appropriate learning objectives in which students had been adequately instructed. As a result of these extensive inquiries, objectives were selected for mathematics and English language arts at the exit level. Test items were developed, examined closely by review committees of educators, and then field tested in order to obtain test item statistics. In addition, special committee meetings of Texas educators were convened and statistical analyses were conducted in order to ensure that test items were not biased against any minority group. After these analyses, subject area tests were constructed to include four items measuring each instructional objective.

Appendix A lists the TAAS test objectives for Grades 3, 3 Spanish, 5, 7, 9, and exit level, as well as the exit level TEAMS test objectives.

# Appendix C

---

## Texas Assessment of Academic Skills Test Quality

---

In determining the quality of the tests that comprise both the TAAS and the TEAMS testing programs, two factors must be considered: validity and reliability. Validity indicates whether the test measures what it is intended to measure. Reliability indicates how consistently the test measures its objectives. Both types of studies are conducted routinely on the TAAS and TEAMS tests.

### Validity

A strong effort has been made to establish both curricular and content validity in the TAAS and TEAMS testing programs. It is important to know whether the test objectives adequately represent what students should be able to do and whether the items based upon the test objectives measure intended behaviors. The complex development process described in Appendix B ensures that both things happen. The strong link that exists between the testing program and the state curriculum ensures that the statewide test is aligned with the curriculum and that the test measures objectives that Texas students should master.

### Reliability

Internal consistency is a type of reliability that is important to estimate for the TAAS and exit level TEAMS tests. This kind of reliability yields an indication of the extent to which the items in each content area are homogeneous. Item homogeneity refers to how consistently the test items are measuring the same content domain, such as writing, reading, or mathematics. Computation of an estimate for internal consistency reliability is accomplished using either Kuder Richardson Formula 20 or 21 (KR 20 or KR 21). These formulas relate the variances of the individual test items to the total variance of the test, thus yielding an estimate of the internal consistency of the test.

KR 20 can only be used for dichotomously scored items where individual p-values are available. A p-value for a particular item is the percent of students who answered that item correctly. KR 21 is a simpler version of KR 20 that can be easily calculated directly from the mean total score and variance of the overall test. KR 21 will yield the same reliability estimate as KR 20 only if all item difficulties are equal.

The following table provides the TAAS KR 20 and KR21 reliability coefficients for each subject area and grade level for the October 1991 administration.

**Kuder Richardson Coefficients**  
**October 1991**

<u>Grade</u>	<u>Reliability Coefficients</u>	<u>Writing</u>	<u>Reading</u>	<u>Mathematics</u>
3 (English)	KR 20	.77	.91	.85
	KR 21	.76	.90	.83
3 (Spanish)	KR 20	.83	.91	.84
	KR 21	.81	.92	.82
5	KR 20	.81	.89	.91
	KR 21	.79	.88	.90
7	KR 20	.85	.88	.93
	KR 21	.82	.87	.92
9	KR 20	.84	.91	.93
	KR 21	.82	.90	.92
11 (Exit)	KR 20	.83	.88	.92
	KR 21	.80	.86	.91

## Appendix D

### Measurement of TAAS Writing Skills

Objectives/instructional targets for the TAAS Grade 3 Spanish writing test and the TEAMS exit level English language arts test are measured with multiple-choice test items only. The TAAS writing tests for Grades 3 (English only), 5, 7, and 9, and for the exit level consist of multiple-choice test items and a written composition. While the multiple-choice items test sentence structure, language mechanics, and usage, the written composition is a direct measurement of the student's ability to synthesize the component skills of writing; that is, the composition task requires the student to express ideas effectively in writing. To do this, he or she must be able to respond to a specified purpose and audience, to organize ideas clearly, to maintain a consistent control of the written language, and to generate and develop ideas in a way that will allow the reader to understand completely what the writer is attempting to say. In October 1991, the following types of writing were assessed:

	<u>Purpose</u>	<u>Mode</u>
Exit Level	Persuasive	
Grade 9	Persuasive	Descriptive
Grade 7	Informative	Narrative
Grade 5	Expressive	Narrative
Grade 3	Informative	Descriptive

A process called focused holistic scoring has been developed to assess TAAS written compositions. The scoring system is "holistic" in that the piece of writing is considered as a whole; it is "focused" in that the piece of writing is evaluated according to preestablished criteria. These criteria correspond to the first four objectives in the *TAAS English Language Arts Writing Objectives and Measurement Specifications* and are used to determine the effectiveness of each written response. They focus on the student's ability to respond appropriately to a specified purpose and topic/audience, to employ a consistent organizational strategy, to exhibit control of written language, and to develop effectively the composition's central idea(s).

#### Scoring Process for the Written Compositions

Responses are rated on a scale of 0-4. Papers assigned ratings of 0 are not scorable because they do not respond to the task; "1" papers attempt to address the task but are unsuccessful. Responses receiving ratings of 0 and 1 are considered failing papers. The degree to which a student successfully completes the writing task determines whether a response receives a passing

score, ranging from 2 (minimally successful) to 4 (very successful). To demonstrate mastery on the TAAS writing test, a student must receive a rating of 3 or 4 on the composition (as well as master all three multiple-choice objectives).

Each response is scored independently by at least two trained readers. Unlike other large-scale state writing assessments, TAAS scoring requires absolute agreement on the two assigned scores. If the first two readers do not agree, the response is evaluated independently by a third reader, and the final score is determined by a two-out-of-three agreement among the three readings. Should the score from the third reading not match either of the other two scores, the response receives a fourth reading by the scoring director. Interrater reliability, based on the numbers of responses upon which agreement is reached after the third reading, is 98.5 percent.

### **Training Procedures**

For the October 1991 administration, approximately 600 readers scored TAAS compositions for Grades 3, 5, 7, and 9, and for the exit level. Readers were required to have at least a bachelor's degree in English or a related field and possess teaching or other relevant experience at or near the grade of assignment. Many readers have had prior experience scoring compositions from previous Texas assessments as well as from other state writing assessments. Readers were trained to read responses for one particular grade. Scoring directors were trained by TEA staff members from the Divisions of Instructional Outcomes Assessment and Curriculum Development, Language Arts section. Scoring directors, in turn, used scoring guides, and sets of papers to train both team leaders and readers. These guides included descriptions of the criteria for the rating system used in scoring TAAS compositions as well as numerous annotated examples of student responses that might be encountered by readers.

### **Quality Control**

Reader performance was monitored daily. Reader performance statistics, including the number of compositions read, the number of score resolutions required, and the number of instances in which readers rated responses low or high, were collected for each shift. Poor-performing readers were retrained or dismissed, as required.

In addition to monitoring the quality of scoring by individual readers, the quality control system included daily checks on "reader drift," that is, deviation from the established standards for rating TAAS responses. Prescored packets of TAAS responses that appeared to be actual test packets were circulated in each scoring room. Data on any disparities between each new scoring of these papers and the predetermined scores were collected daily. If it became apparent that readers were experiencing difficulty with the established standards, scoring was stopped and retraining occurred.

## **Analytical Scoring Information**

In October 1991 additional scoring information was provided for failing compositions at all levels. That is, students whose responses were assigned ratings of 1 or 0 received detailed analytic score information indicating specific areas of weakness on their Confidential Student Reports.

Identification of these areas provided teachers with the information they needed to begin intensive remedial instruction targeted at students' specific compositional weaknesses. This instruction was critical since students had to meet minimum expectations on the TAAS written composition as one of the requirements for receiving a Texas high school diploma.

The analytic information summary for all grades is outlined in Appendix G. This information includes a short explanation of the chief characteristics of each analytic category as well as a synopsis of the most frequently occurring types of errors found within that category.

\* Number of multiple-choice items correct + (composition score x 6)

Since minimum expectations cannot be obtained with less than a '2' on the written composition portion, a composition score of '1' plus 23 or more multiple-choice items correct will result in a scale score of 1499 which is one point below mastery.

## Texas Assessment of Academic Skills Explanation of Written Composition Analytic Information

---

### **SCORABLE**

#### **USED WRONG PURPOSE/MODE (PURPOSE ONLY AT EXIT LEVEL)**

##### **AT GRADE 3**

The purpose/mode at Grade 3 was informative/descriptive - that is, the student was required to use descriptive words and/or phrases to paint, in the reader's mind, a picture of the scene specified in the prompt.

In wrong purpose/mode responses, the student did not use descriptive words and/or phrases to paint a picture of the scene. Instead, the student told a story or explained the purpose or function of the scene without weaving sufficient description into the story or explanation to be minimally successful.

##### **AT GRADE 5**

The purpose/mode at Grade 5 was expressive/narrative - that is, the student was required to write a story on a specified topic.

In wrong purpose/mode responses, the student was not successful at telling a story because the response did not link a sequence of events through time. Although some of these responses contained events, the events were not sequenced. Other responses were merely informative or descriptive. In descriptive responses, the student described without weaving the description into a story.

##### **AT GRADE 7**

The purpose/mode at Grade 7 was informative/narrative - that is, the student was required to explain the steps/stages of a specified process or activity in such a way that the process or activity as a whole could be understood by someone else.

In wrong purpose/mode responses, the student did not order sequentially and/or delineate the steps/stages needed to understand the specified process or activity as a whole.

## AT GRADE 9 AND AT THE EXIT LEVEL

The purpose both at Grade 9 and at the exit level was persuasive - that is, the student was required to declare a position on a particular issue and then to present convincing reasons in support of that position. At Grade 9 the student was required to support either the "pro" or the "con" side of the issue and to write in the descriptive mode. At the exit level, however, the student was given more latitude in formulating a position; he or she was not restricted to a "pro" or "con" stance. In addition, no particular mode was required; the student could choose any mode or combination of modes that proved effective and persuasive. At both levels the student was expected to influence a specific audience to accept his or her point of view on the issue.

The most common problems regarding purpose/mode (purpose only at exit level) involved the following types of responses:

- those in which the student merely provided information about both sides of the issue without stating a position;
- those in which the student may have stated a position and provided some support but proposed a solution without connecting it to a defense of the position (i.e., telling "how to" rather than "why");
- those in which the student did not sustain a consistent position. In these responses the student may have taken a position and provided some support for it, but he or she also presented support for the opposing side without including a refutation of the opposing arguments. Such responses were unsuccessful if the information in support of the stated position was insufficient to provide a minimally sound case;
- those in which the writer's purpose was not persuasive.

## LACKED ORGANIZATION/STRUCTURE/FOCUS

Organization refers to the strategy around which a response is focused and clearly and logically ordered.

Poorly organized responses were unfocused, with little or no sense of continuity between individual sentences and/or paragraphs. In some unfocused responses, the student may have had difficulty sustaining a progression of thought that reflected the specified purpose and mode (purpose only at the exit level). In general, no discernible organizational strategy was apparent in these responses. The student may have drifted briefly off task and/or off topic or may have presented ideas in a random or repetitive fashion, thereby causing gaps that obscured meaning; or the student may have rambled, presenting numerous details that did not contribute to the reader's understanding of the student's response. Also, lack of organization on a very short paper could have meant that there was not enough writing to determine whether the student had an organizational strategy.

## **LACKED SUPPORT/ELABORATION**

Sufficient elaboration in a successful response is dependent upon the degree to which the student clearly and completely develops those ideas that allow the reader to understand the meaning of the response.

Some responses that lacked support and/or elaboration addressed the prompt (writing topic) in a skeletal way. In these responses the student may have presented a number of ideas, and there may even have been a little elaboration of these ideas, but the information and explanation were insufficient to be minimally successful. In other responses the student presented ideas that lacked the specificity and/or clarity necessary to provide convincing support.

## **LACKED LANGUAGE CONTROL**

Language control measures the student's ability to communicate effectively in the English language. This ability determines both the extent to which the response flows smoothly from word to word, sentence to sentence, and paragraph to paragraph and the effectiveness and precision of the response as a whole. Since TAAS responses do not represent "polished" writing, some errors in spelling, capitalization, punctuation, and usage may occur. These types of errors are considered language control problems only if they are so frequent and/or severe that they interfere with the reader's ability to understand the response.

Students who lacked language control made errors that impaired communication. The flow or fluency of the response was interrupted as a result of repeated errors. Overall, the expression of the writer's thoughts was so confusing that the reader was left wondering what the writer was attempting to say.

## **NONSCORABLE**

### **WROTE OFF TOPIC**

In these responses the student wrote on an entirely different topic than the one specified in the prompt.

### **NO WRITING ATTEMPTED**

In these responses the student left his or her paper blank.

### **WROTE IN A FOREIGN LANGUAGE**

In these responses the student wrote entirely in a language other than English.

#### **PAPER WAS ILLEGIBLE/INCOHERENT**

These responses were completely unreadable. Illegible responses were those in which the handwriting could not be read; letters may have been discernible, but they did not form recognizable words. Incoherent responses were those in which letters or words were strung together in a meaningless fashion.

#### **DID NOT WRITE ENOUGH TO SCORE**

In these responses the student attempted to respond, but this attempt contained so little writing that the reader could not discern whether the student was responding to the prompt.

#### **COPIED THE PROMPT**

In these responses the student repeated or paraphrased the prompt but did not attempt to respond to it.

#### **EXPLICITLY REFUSED TO WRITE**

These responses contained nothing more than an explicit refusal to respond to the specified prompt, although the student may have offered some explanation of his or her refusal.

# Appendix H

## Categories on the District Analysis Report

The district analysis reports were produced with the following categories.

### Enrollment Groupings

Districts are grouped by size into nine categories based on their enrollment, which is determined by the total number of students enrolled in the district as of the Public Education Information Management System (PEIMS) fall collection date. The enrollment count does not include students who are served by the district but not enrolled.

### District Type

Districts are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to urban areas are used to determine the appropriate group. Districts are placed in one of the eight groupings based on the following definitions.

**Major Urban** - The eight largest school districts in the state which serve the metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.

**Major Suburban** - Other school districts in and around the major urban areas.

**Other Central City** - The major school districts in other large Texas cities.

**Other Central City Suburban** - Other school districts in and around the other large, but not major, Texas cities.

**Independent Town** - The largest school districts in counties with populations of 25,000 to 100,000.

**Non-Metro Fast Growing** - The school districts that do not fall in any of the above categories and that exhibit a five year growth rate of at least twenty percent. These districts must have at least 300 students enrolled.

**Non-Metro Stable** - The school districts that do not fall in any of the above categories, yet have an enrollment that exceeds the state median.

Rural - The school districts that do not fall in any of the above categories. These districts either have an enrollment between 300 and the state median and a growth rate less than twenty percent, or they have an enrollment less than 300.

## **Wealth**

The wealth of a district is determined by total taxable property value divided by enrollment and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is total taxable value (for the last completed calendar year, i.e. 1990) as determined by the Comptroller's Property Tax Division (CPTD). Enrollment is for the current school year, i.e. 1991-1992. The first wealth grouping classifies districts into ten wealth categories with approximately equal numbers of districts in each. The second grouping displays districts with wealth above and below the state average. The third wealth grouping classifies districts into twenty categories with approximately equal numbers of students in each category. The six special statutory districts form a separate group because they have no taxable property wealth.

## **Total Tax Effort**

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. This category shows the total effective tax rate, which is determined by dividing the last completed calendar year's total levy amount by that year's CPTD total taxable property value. The six special statutory districts are in a separate category because they do not levy property taxes.

## **Maintenance and Operation Effective Tax Effort**

Districts are grouped into four tax effort categories, or quartiles, with approximately equal numbers of districts in each. This category shows the maintenance and operation (M&O) effective tax rate, which is determined by dividing the last completed calendar year's M&O levy amount by that year's CPTD total taxable property value. The six special statutory districts form a separate category because they do not levy property taxes.

## **Highest Property Value Category**

The CPTD classifies property into thirteen categories based on how the property is used. These thirteen categories are grouped into four classifications: residential, land, oil and gas, or business. The one category of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory districts form a separate group because they have no taxable property wealth.

## **Academic Excellence Indicator Groups**

This category splits the districts into sixteen categories by size of enrollment, whether they are above or below the state average for district wealth, and whether they fall above or below a level of forty percent low income students. The six special districts form a seventeenth category because they cannot be categorized by wealth. These sixteen categories are used to group data provided in the Academic Excellence Indicator System (AEIS) so that each district's values can be compared to a group of districts with similar characteristics.

### **Small/Sparse Adjustment**

This category has four categories with approximately equal numbers of districts in each. The category shows the amount of the small/sparse adjustment as a percent of the total adjusted basic allotment amount. A fifth category contains all districts receiving no small/sparse adjustment. This small/sparse percentage is a measure of the extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

### **CEI Level**

The cost of education index (CEI) reflects geographic variations in costs and prices beyond the control of school districts. The index currently in use was first implemented in 1989-1990. The index has a minimum value of 1.01 and a maximum value of 1.20. This category divides districts into four groups with approximately equal numbers of districts in each.

### **Operating Cost Per Pupil**

Operating costs are the sum of all expenditures budgeted for the operation of the district, for all funds. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per pupil amounts are the current school year expenditures divided by the current enrollment. Districts are grouped into five categories with approximately equal numbers of districts in each. The source for budgeted expenditures is the fall submission of PEIMS.

### **ESC Region**

The state is divided into 20 regions, each served by an education service center.

### **TAAS: Percent Passing All Tests Taken**

For grades 3, 5, 7, 9, and 11, the total number of students who passed all tests taken is expressed as a percentage of the total number of students tested. Districts are grouped into four categories with the percent passing ranging from under 37 percent to 57 percent and over. These percentages exclude special education students and grade 3 students taking the Spanish version test.

### **Average SAT Score**

Districts are grouped into four categories based on their average score on the 1990-1991 administration of the SAT. The categories range from an average score under 810 to an average of 910 and over. A fifth category is for those districts which did not administer the SAT.

### **Average ACT Score**

Districts are grouped into four categories based on their average score on the 1990-1991 administration of the ACT. The categories range from an average score under 18.25 to an average of 20.5 and higher. A fifth category is for those districts which did not administer the ACT.

### **Student Density**

The square miles in a school district were determined through a joint effort by the State Property Tax Board (SPTB), the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the SPTB were digitized by the Water Commission and acreage was determined. Density is the number of students enrolled per square mile. Density groups range from fewer than five students per square mile to 100 or more students per square mile. The six special statutory districts form a separate group since mileage data is not available for them.

### **Enrollment Change from Prior Year**

This category looks at the growth or decline in student population over a one year period. Districts whose enrollment declined represent one grouping, while the remaining groups show one year growth rates ranging from "0%-3%" to "10% and over."

### **Percent African American, Hispanic, and Minority Pupils**

In these categories, districts are grouped according to the ethnic composition of their student population, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include American Indian or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of these categories has six subcategories with the particular population ranging from less than five percent to fifty percent and over.

## **Percent Low Income**

Percent low income is the percentage of enrolled students classified as economically disadvantaged on PEIMS. These students meet any of the following conditions:

- a) Eligible for free or reduced price meals under the Nation School Lunch and Child Nutrition Program.
- b) From a family with an annual income at or below the federal poverty line.
- c) Eligible for AFDC or other public assistance.
- d) Received a Pell Grant or comparable state program of need-based financial assistance.
- e) Eligible for programs assisted under Title II of the Job Training Partnership Act.

## **Average Teacher Experience**

In this category, districts are grouped into four categories with approximately equal numbers of districts in each. Average years of teacher experience is calculated as the ratio of total years of professional experience for all teachers in the district divided by the total teacher full-time equivalent (FTE) count.

## **Average Teacher Salary**

In this category, districts are grouped into four categories with approximately equal numbers of districts in each. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount does not include career ladder or any other supplements.

## **Percent Minority Teachers**

In this category, districts are grouped according to the minority composition of their teaching populations. Minority percent is calculated as the sum of all non-white teachers FTEs expressed as a percent of total teacher FTEs. The category has five groupings with the minority population ranging from less than five percent to fifty percent and over.

## **Percent of Teachers with Advanced Degrees**

In this category, districts are grouped into four categories with approximately equal numbers of districts in each. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a masters or doctorate degree divided by the total teacher FTE count.

# Appendix I

The following Grade 12 TEAMS Summary Reports are the all students results for the October 1991 and Spring 1992 administrations.

## COMPLIANCE STATEMENT

### **TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION**

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

- (1) acceptance policies on student transfers from other school districts;
- (2) operation of school bus routes or runs on a non-segregated basis;
- (3) nondiscrimination in extracurricular activities and the use of school facilities;
- (4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
- (5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
- (6) nondiscriminatory practices relating to the use of a student's first language; and
- (7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

### **TITLE VII, CIVIL RIGHTS ACT OF 1964 AS AMENDED; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, EDUCATION AMENDMENTS: REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED; AMERICAN DISABILITIES ACT OF 1990; AND THE CIVIL RIGHTS ACT OF 1991.**

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all Federal and State laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status or a disability requiring accommodation (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Employment Opportunity/Affirmative Action employer.
