ABSTRACT

This report presents detailed information concerning the member institutions of the United Negro College Fund, comprising 41 historically black colleges and universities in the United States. Data are organized within the categories of enrollment, admission, faculty and staff, degrees, student financial aid, college costs, institutional finances, and endowment. The data indicate that enrollments reached an all time high of 53,179 in fall 1992, a four percent increase over 1991; that about two-thirds of all students came from the Southeast; that the rate of enrollment increase for men has been larger than that of women; that applications for admission have increased by 27 percent between 1986 and 1991; that faculty salaries were only two-thirds as high as those found at other comparable institutions; that the percentage of full-time faculty who hold doctorates has increased from 46 percent to 52 percent; that business and management was the field with the highest number of bachelor degree graduates in 1990-91; and that the number of graduates in education increased by 15 percent, the first increase since 1979-80. Includes extensive tables in appendixes showing additional data. (JB)

## Acknowledgements

In producing this 1992 Statistical Report of the United Negro College Fund, Inc., I would like to extend my sincere appreciation to the registrars, admissions officers, institutional research officers, and their colleagues at the member institutions for their cooperation and dedication in first assembling the large amount of data this is required from each institution. I also appreciate their patience with me in answering the many follow-up inquiries that are a necessary part of producing this document.

To the administrative assistants in the UNCF Office of Grants Management and Research, Kia Palmer and Denise Vaughn, I thank for their help and support. Finally, I would like to thank Alan Kirschner, Vice President of Programs and Public Policy, for his many suggestions and his careful editing of the whole document.

Hugh R. Fordyce  
Director of Research

Highlights from the 1992  
UNCF Statistical Report

- \* Enrollments at UNCF colleges and universities reached an all time high of 53,179 in fall 1992; this was nearly a four percent increase over the 1991 figure and a 25 percent increase since 1986.
- \* The rate of enrollment increases at UNCF institutions since 1966 has been nearly double that found at all other U.S. college and universities. The UNCF four percent one-year gain in 1992 stands in sharp contrast to the projected one percent gain expected for other U.S. colleges and universities.
- \* About two-thirds of all UNCF students come from the Southeast. Over the past four years, however, the region that has shown the most growth in sending students to UNCF colleges has been the West. Since 1988, the number of students coming just from California has increased from 1,078 to 1,562, a 45 percent increase. The Northeast, the Central region, and the West now send approximately equal numbers of students to UNCF institutions.
- \* Over the past two years, the rate of enrollment increase for men has been larger than that of women. Women, however, still comprise 59 percent of the total enrollment at all UNCF institutions.
- \* Applications for admission to UNCF institutions increased by 27 percent over the five-year period between 1986 and 1991. Applications have increased even though the number of African Americans graduating from public high schools has declined by eight percent since 1986.
- \* In fall, 1991, the average faculty salary (for all ranks) at UNCF institutions, \$27,085, was only two-thirds as high as the \$40,620 found at all private baccalaureate institutions.
- \* Since 1985, the percentage of full-time faculty at UNCF institutions who hold the doctorate has increased from 46 percent to 52 percent.
- \* Faculty salaries at UNCF institutions grew by 5.1 percent during the past year, slightly higher than the 4.7 percent increase nationally.

- \* Some 5,229 bachelor's degrees were awarded by UNCF institutions in 1990-91; this was an increase of some six percent over the previous year. Other degrees: master's, 369; professional, 160; and doctoral, 44.
- \* Business and management, with nearly 30 percent of the total, was the field with the largest number of bachelor's degree graduates in 1990-91.
- \* With a total of 481 bachelor's degree graduates, the field of education showed its first increase since 1979-80. The number of graduates in education increased by 15 percent.
- \* At UNCF colleges, 87 percent of the students received some form of financial aid in fall, 1990.
- \* Students who attend UNCF institutions need substantial amounts of financial aid in order to meet their college expenses. Because of great financial need, 87 percent of the students at UNCF institutions received some form of financial aid.
- \* Because of the growing financial needs of students, UNCF colleges have dramatically increased the proportion of their operating funds allocated to student aid. Student aid has risen from 12 percent (in 1985-86) to 20 percent of the operating budgets at UNCF institutions.
- \* In 1991-92, the \$4,848 average cost of tuition and fees at UNCF colleges was less than half the \$10,017 average charged by private colleges nationally.
- \* Despite recent enrollment gains, African Americans are still considerably under-represented in U.S. colleges and universities. African Americans comprise 14.9 percent of the college-age population, but only 8.9 percent of the college enrollments.
- \* Endowment funds at UNCF colleges have more than doubled during the past seven years. The market value of these funds increased from \$190 million in 1983-84 to \$406 million in 1990-91.
- \* The value of the endowment per student at UNCF institutions, \$8,117, was only about one-quarter the \$30,856 average found at all private four-year colleges in 1990-91.

## Introduction

The 1992 UNCF Statistical Report presents detailed information concerning the member institutions of the United Negro College Fund. These colleges are a part of a larger group of 105 historically black colleges and universities (HBCUs); together, these institutions constitute only about three percent of all colleges and universities in the U.S., but they graduate over one-quarter of all African-Americans who earn the baccalaureate degree and nearly 40 percent of African-Americans who later earn a doctoral degree. Of the 48 privately supported HBCUs, 41 are member institutions of the United Negro College Fund.

With few exceptions, most UNCF member institutions were founded by religious societies from the North during the 35 year period following the Civil War. All UNCF institutions are accredited by the appropriate regional accrediting association. Located principally in the Southeast and in eastern Texas, these institutions operate with a variety of organizational structures and program offerings. While most of the institutions offer baccalaureate programs exclusively, Clark Atlanta, Livingstone, Tuskegee, Virginia Union, and Xavier offer graduate/professional programs in addition to their undergraduate curricula. The Interdenominational Theological Center, a specialized professional institution, provides programs of study at the master's and doctoral levels.

The United Negro College Fund was founded in 1944 by Dr. Frederick D. Patterson (of Tuskegee Institute) and 27 other college presidents who were convinced that private, historically black colleges should bind together for their mutual benefit. Dr. Patterson's vision was sustained in that during its first year of operation, the UNCF raised more than three times the amount that the colleges had raised individually in the prior year.

The UNCF member institutions have made great contributions to the education of minority students over the past century. The list of distinguished graduates from UNCF colleges includes civil rights leaders, political leaders, religious leaders, educators, scientists, lawyers, and physicians. Four UNCF colleges consistently rank among the top ten institutions in the country in supplying black applicants for medical schools.

Data for the report was generally obtained from the annual UNCF Questionnaire which was completed by college administrators during the 1991-92 academic year. Data regarding freshman characteristics was obtained from the 1991 report of the Cooperative Institutional Research Program: The American Freshman. Data concerning 1992 fall enrollments was obtained from a telephone survey of UNCF registrars in early October, 1992.

## Enrollment

Enrollment at the 41 member institutions of the United Negro College Fund (UNCF) totaled 53,179 in fall, 1992. This is a record enrollment and represents a gain of almost four percent [3.9] over the number enrolled in fall, 1991. Nationally, enrollments in all U.S. colleges and universities were projected to grow by less than one percent between 1991 and 1992. The number of enrolled students is an increase of nearly 2,000 over the fall, 1991, total of 51,187.

The new enrollment figure continues a pattern of gains that have characterized UNCF colleges and universities since 1986. Since that time, enrollments at UNCF institutions have risen by nearly 25 percent and the rate of gain at UNCF institutions has been almost twice the 13.8 percent increase at all U.S. colleges and universities. During this same period UNCF enrollment increases have also exceeded the 18.4 increase found among all African-American college-going students.

Enrollment gains were posted by 30 of the 41 UNCF institutions. The largest gain was found at Clark Atlanta University. Clark Atlanta increased its enrollment by 409 students over 1991 figures and now has a total enrollment of 4,405, the largest of any UNCF institution. In contrast to 1988 when only four institutions showed an enrollment of 2,000 or more, eight UNCF institutions now show such enrollments:

Clark Atlanta-----	4,405
Tuskegee-----	3,792
Xavier-----	3,333
Morehouse-----	2,990
Shaw-----	2,415
Bethune-Cookman-----	2,301
Spelman-----	2,030
Morris Brown-----	2,019

Table 1.

Enrollment Growth, UNCF Member Institutions  
1986-1992

	<u>Enrollment</u>	<u>Percent Increase Over Previous Year</u>	<u>Percent Increase Since 1986</u>
1986	42,613	--	--
1987	43,984	3.2	3.2
1988	45,987	4.6	7.9
1989	48,396	5.2	13.6
1990	49,816	2.9	16.9
1991	51,181	2.0	20.0
1992	53,179	3.9	24.8

Table 1 shows that enrollments at UNCF institutions have grown steadily since 1986 and are now nearly 25 percent larger than the 42,613 figure recorded in that year. Appendix A shows the total fall (head count) enrollments at each UNCF member institution from 1987 through 1992.

Figure 1 contrasts the rates of enrollments increases at UNCF institutions with those of all African-Americans and with those of all U.S. colleges and universities. Figure 1 clearly shows that since 1986, the rate of enrollment gains at UNCF colleges has surpassed the overall enrollment increases at all U.S. colleges and universities as well as those of all African-American college-going students. With a nearly 25 percent growth rate since 1986, the rate of UNCF enrollment increases are nearly double those of all U.S. college-going students and substantially higher than the rate of increase for all African American college-going students. (The final figures for the 1991-92 academic year have not yet been published by the U.S. Department of Education. The latest published projected figure shows that anticipated total fall enrollments in all U.S. colleges and universities for 1992 will show an increase of less than one percent over the 1991 figure.)

Fig. 1. Pct. Increase in Enroll.  
UNCF Inst., All Afro-Am, & Total U.S.

The tremendous gains in UNCF enrollments come at a time when the number of black students graduating from public high schools is actually declining. The number of black high school graduates in 1992 was some eight percent less than in 1986. (Beginning in 1993, the number of black high school graduates will begin to rise again.)

One key to the increase in UNCF enrollments is that larger proportions of black high school graduates are now enrolling in college directly after high school. In 1986, only 29.1 percent of black 18-24 year-olds who were high school graduates were enrolled in college; by 1990, that percentage had increased to 33.0.

A recent article in the Journal of Social and Behavioral Sciences<sup>1</sup> cites a number of reasons for the appeal of the historically black college or university (HBCU). Included among the factors listed: (1) recent overt discrimination and racial incidents on white college campuses; (2) the abandonment of black students by white schools following their freshman year in college; (3) the loss of interest and support for black studies programs on white campuses; (4) the resurgence of the need for black identity and black consciousness unavailable and negated on white campuses; (5) HBCUs aggressive recruitment measures; (6) HBCUs improvements in academic standards and educational programs.

The enrollment gains at UNCF institutions have been impressive in recent years and are perhaps indicative of a resurgence in African-American college attendance. After several years of decline during the early '80s, African-American proportional representation in U. S. colleges and universities has increased over the past two years. African-Americans now comprise 8.9 percent of the total U.S. college enrollments. See Table 2.

Table 2.  
African-American Proportional Representation  
in U. S. Colleges 1980--1990

	As a Percent of College-Age (18-24) Population	As a Percent of U. S. College Enrollment
1980	12.6	9.2
1982	13.4	8.9
1984	13.8	8.8
1986	14.0	8.7
1988	14.4	8.7
1990	14.9	8.9

## Full-time and Part-time Students

In fall 1991, most students at UNCF colleges were full-time students. Of the 51,187 enrolled students, 47,364 (92 percent) were classified as full-time. In contrast to the high proportion of UNCF students who are classified as full-time, recent U.S. Department of Education figures show that nationally only 59 percent of the undergraduate enrollment is classified as full-time. Appendix B shows the numbers and percentages of each college's full-time and part-time students.

### Classification

Of the total fall, 1991, enrollment of 51,181, some 20,391 (40 percent) were classified as freshmen. (The freshman classification included new students as well as some returning students who had not accumulated enough credits to be classified as sophomores.) Compared to fall 1990, the percentage of students classified as freshmen dropped slightly--from 42 percent to 40 percent; this drop in the percentage classified as freshmen indicates that the enrollment increases at UNCF institutions are related to the ability of the colleges to move greater numbers of students along to the upper class levels. Some 10,449 (21 percent) were classified as sophomores; 8,347 (16 percent) were juniors; and 7,579 (15 percent) were seniors.

Four percent of the enrolled students were classified as graduate or professional students. The UNCF institutions that offer graduate/professional studies include: Clark Atlanta University; Fisk University; the Interdenominational Theological Center; Livingstone College; Tuskegee University; Virginia Union University; and Xavier University.

Appendix C provides the institutional enrollment breakdown by classification.

### Racial/Ethnic/Citizenship Background

Some 95 percent (49,128) of the students at UNCF institutions in fall, 1991, were African-Americans. The largest group of students who were not African-Americans were the 1,901 non-resident aliens; these students comprised two percent of the total. Three UNCF institutions--Shaw University, Tuskegee University, and Xavier University--enrolled 100 or more white students. Hispanic students numbered over 100 at two UNCF institutions--Florida Memorial College and Tuskegee University--and constituted nine percent of the enrollment at Huston Tillotson College. The largest contingent of Asian-American students, 59, was found at Xavier University.

Appendix D provides detailed data regarding the enrollments at each UNCF institutions with respect to racial/ethnic/ background.

## Gender

Women continue to outnumber men by a considerable margin at UNCF institutions. In fall, 1991, of a total of 51,187 students, some 21,074 (41 percent) were men; 30,113 (59 percent) were women. Figure 2 shows that since 1985, the enrollments of women have risen from about 24,500 in 1985 to approximately 31,000 in 1992--a 26 percent gain. In contrast, the enrollment of men actually declined between 1985 and 1986, but since then has risen from about 18,000 to approximately 22,000--a 22 percent increase.

Fig. 2. Enrollments By Gender  
UNCF Institutions, 1985--1992

1992 Data Estimated

At only four of the UNCF institutions (excluding the three single-sex colleges) do men outnumber women. See Appendix F.

The most recent national figures (fall, 1990) show that black women accounted for 61 percent of the enrollment of African Americans at all levels of U.S. higher education. Although national figures over the past decade point to a rapid rise in the college enrollment rates for black women, the figures at UNCF institutions show a greater percentage increase for men during the past two years. The enrollment of men increased by 6.3 percent (from 19,819 to 21,074) during the 1989-91 period while the increase for women

(although larger numerically) was 5.4 percent (from 28,578 to 30,113). Many UNCF colleges have been sensitive to the need to enroll more African American men.

### Geographic Diversity

The member colleges are becoming more national in their appeal to students. The widespread appeal of UNCF institutions is demonstrated by the fact that students come to UNCF institutions from every one of the 50 U.S. states and from a number of foreign countries. The West has been the fastest growing region in terms of the increased numbers of students sent to the member colleges. The West posted a 34 percent increase in the three year period between 1988 and 1991. In fall, 1991, Georgia sent more students (5,560) to UNCF institutions than any other state.

Table 3 shows the enrollment from the 15 states which sent the largest numbers of students to UNCF institutions in 1988, 1989, 1990, and 1991. These states include eleven of the twelve states in which UNCF institutions are located plus California, Illinois, Michigan, and New York. The table also shows the percentage change from 1988 to 1991. With nearly a 45 percent increase, California posted the largest percentage increase over this four-year period. States that showed gains of over 20 percent during this period included Louisiana, North Carolina, and Texas.

Table 3  
15 States Sending Largest  
Numbers of Students to UNCF Institutions

	<u>1988</u>	<u>1989</u>	<u>1990</u>	<u>1991</u>	<u>Percent Change 1988-1991</u>
Alabama	3,046	3,005	2,985	3,068	0.7
California	1,078	1,184	1,412	1,562	44.9
Florida	4,625	5,206	5,278	4,852	4.9
Georgia	5,233	5,281	5,142	5,560	6.2
Illinois	1,918	1,997	2,035	2,013	4.9
Louisiana	2,865	3,232	3,356	3,470	21.1
Michigan	1,437	1,555	1,561	1,505	4.7
Mississippi	1,851	1,967	2,048	2,199	18.8
New York	1,752	1,892	1,927	1,997	14.0
North Carolina	3,309	3,398	3,694	4,128	24.7
Ohio	1,080	1,044	1,161	1,178	9.1
South Carolina	3,935	4,169	4,049	3,999	1.6
Tennessee	2,278	2,300	2,384	2,306	1.2
Texas	2,332	2,534	3,196	3,019	29.4
Virginia	1,506	1,639	1,657	1,714	13.8

Figure 3 shows the enrollments by the four principal regions of the U.S.<sup>2</sup> for selected years since 1969. In 1969, the Southeast accounted for almost 80 percent of UNCF enrollments, but now sends only about two-thirds of the students to UNCF colleges.

### Figure 3. Enrollment by Region Selected Years, 1969-1991

Appendix G shows the state-by-state origin of UNCF students at each of the member institutions; Appendix H shows the origin of UNCF students by principal market cities. Atlanta, with 2,448 students of origin, continues to send more students to UNCF colleges than any other city. Cities which sent at least 1,000 students to UNCF colleges in 1991 included: Chicago, Memphis, Miami, and New Orleans. During the four-year period from 1988 to 1991, cities which have increased their number of UNCF students by 100 or more include: Little Rock; Jacksonville; Atlanta; New Orleans; Detroit; Jackson (Mississippi); Raleigh; Charleston, Columbia, and Orangeburg (South Carolina); Richmond, and Dallas.

<sup>2</sup> The regional classification employed in this report divides the U.S. into four regions: Northeast--the New England states plus New York, New Jersey, Delaware, Pennsylvania, Maryland, the District of Columbia, and West Virginia; Southeast--Virginia through Louisiana and Arkansas; Central--the midwestern states extending from Ohio in the east to the Dakotas in the west and south through Kansas; and the West, including Texas and Oklahoma and all other states to the west.

## Admissions

### Application Process

During the period between 1986 and 1991, UNCF colleges and universities have seen the number of freshman applications increase substantially--from 36,199 in 1986 to 45,906 in 1991; this increase of nearly 10,000 applicants represents an increase of 27 percent. The number of students admitted during this period has paralleled the number of completed applications. Applications have increased during three of the past five years even though the number of African-Americans graduating from high school has declined by about four percent during this period.

Perhaps because of the great difficulty so many UNCF admitted applicants have in finding adequate financial aid, the number of students actually enrolling has not been keeping pace with the number of applications or the number of students admitted. Although the number of students enrolling has increased by 13 percent (from 12,116 to 13,645), the percentage of admitted students who later enroll has been declining. In 1987, 48 percent of the admitted freshmen actually enrolled, but, in 1991, this percentage had dropped to 41. Such figures suggest that students are facing severe financial difficulties and that many can not find the funds to enroll even though they have met the colleges' admissions criteria.

Table 4 below and Figure 4 show data concerning the admissions process for the six-year period beginning in 1986. Appendix I shows data for individual UNCF institutions for fall, 1991.

Table 4. Freshman Applications, Admissions  
and Enrollment at UNCF Institutions, 1986--1991

Year	Completed Applica- tions	No. Offered Admission	Percent of Applicants Admitted	No. Enrolled	Of Those Admitted, Percent Enrolled
1986	36,199	25,865	71	12,116	47
1987	38,973	27,439	70	13,060	48
1988	44,783	30,376	68	13,617	45
1989	43,799	34,453	79	14,394	42
1990	48,195	33,129	69	13,930	42
1991	45,906	33,040	72	13,645	41

### Characteristics of Incoming Freshmen

Because a number of UNCF institutions participated in the annual freshman survey conducted by the Cooperative Institutional Research Program (CIRP)<sup>3</sup>, it was possible to get a good description of UNCF students and to compare them with students at other private four-year colleges. The following descriptive data is derived from the responses of 4,438 freshmen who entered 12 private historically black colleges in fall, 1991; most of these students attended UNCF institutions.

<sup>3</sup> Astin, A.W., Dey, E.L., & Riggs, E.R., (1991). The American Freshman: National Norms for Fall 1991. Los Angeles: Higher Education Research Institute, UCLA.

- 38 percent reported that they had a B+ or better average in high school; over the past two years, the percentage of UNCF entering freshmen with B+ or better averages has increased substantially--from 28 percent to the current 38 percent.
- UNCF colleges, in contrast to students who attend other four-year colleges, draw students from greater distances; 43 percent of the entering freshmen traveled more than 500 miles to attend a UNCF college; in comparison, only 13 percent of all four-year college students traveled such distance.
- 36 percent came from families where the estimated parental income was less than \$25,000 compared to only 20 percent of the students at all private non-sectarian four-year colleges.
- The reported percentage of fathers who were unemployed was twice as high at UNCF colleges than at other four year colleges: six percent vs. three percent.
- Only five percent of the mothers of UNCF students were described as "homemaker"; in contrast, 14 percent of the students at all four-year colleges described their mother as "homemaker".
- Only 44 percent said that they came from a home where both parents were living with each other; 71 percent of the students at all four-year colleges came from such homes.
- Only one percent had smoked cigarettes frequently while in high school; the comparative figure for those attending all institutions was 11 percent. (Visitors to UNCF campuses often report that they never encounter anyone who smokes cigarettes.)
- 50 percent reported their religious preference as Baptist; at all four-year colleges the largest religious representation was composed of the 30 percent who identified themselves as Catholic.
- 18 percent reported spending sixteen hours or more per week in watching TV; 9 percent of those entering all four-year colleges reported watching this much TV.
- Only five percent of entering UNCF students chose teaching as a probable career occupation; in comparison, 13 percent of the students entering all colleges chose teaching as a probable career.

- In noting the most important reasons for choosing their particular college, 77 percent of UNCF entering students said "good academic reputation" was most important; other reasons in order were: "racial/ethnic makeup of the student body", 67 percent; "graduates get good jobs", 65 percent; "graduates go to top grad schools", 51 percent; "size of college", 41 percent"; and "offers special programs", 40 percent.
  
- Students entering UNCF institutions have a high level of aspiration. In comparison with 15 percent at all four year colleges, 28 percent of the UNCF freshmen say that they eventually plan to earn a Ph. D. or an Ed. D. degree.

### Transfer Students

Appendix E shows the previous college background of the 2,588 students who transferred to UNCF institutions in fall, 1991. Of the new students entering UNCF institutions, about one in six was a transfer student from another college. The figures show that about 60 percent of these new transfer students had previously attended a predominantly white institution.

## Degrees

The overall number of degrees awarded by UNCF institutions in 1990-91 increased by four percent over 1989-90 totals (from 5,581 to 5,754). The number of bachelor's degrees awarded increased six percent over the past year (from 4,936 to 5,229). The number of degrees awarded at the graduate/professional level showed a slight drop from the previous year. In 1990-91, UNCF institutions awarded 369 master's degrees, 160 professional degrees, and 44 doctoral degrees. Altogether, 573 degrees were awarded at the graduate/professional level. Ninety of the professional degrees were awarded in theology, while some 55 were awarded in veterinary medicine. Of the 44 doctoral degrees, 17 were awarded in educational administration.

The field of business and management was again the largest producer of bachelor's degrees at UNCF institutions. With 29.2 percent of all bachelor's degrees, the field accounted for almost twice as many bachelor's degrees as did the next ranking area, the social sciences.

Comparative data for 1989-90 and 1990-91 is shown in Table 5 below. For details of the degrees awarded by each UNCF institution, see Appendices R, S, and T.

## Trends in Areas of Study

Table 6 below shows the percentage of the total number of graduates who received degrees in various fields at UNCF institutions since 1979-80. As noted above, business--with nearly 30 percent of the total--accounted for far more degrees than any other area at UNCF colleges and universities.

After a number of years of decline, the field of education experienced a substantial increase in the number of degrees awarded in 1990-91. Education showed a 15 percent rise in the number of bachelor's degrees awarded--from 418 to 481. In 1979-80, education accounted for over one-fifth of all graduates at UNCF colleges.

In 1979-80, social science degrees almost equaled the number of degrees in business, while in 1990-91 there were only about half as many degrees in the social sciences as in business. After falling to 13 percent of all bachelor's degrees in 1985-86, the social sciences have continued to rise each year in the proportion of degrees awarded.

Compared to data from 1988-89 and 1989-90, computer science showed a decline in the number of bachelor's degrees awarded. Computer science had practically no graduates in 1979-80, but grew rapidly to account for almost six percent of the total number of graduates in 1987-88. Since that time, the field has continued to experience a diminishing number of graduates.

The number of bachelor's degrees in the physical sciences also was somewhat below the level of two years ago. Bachelor's degrees in these fields have dropped by some twelve percent during the two-year period 1988-89 to 1990-91--from 358 to 313.

The percentage of degrees in the humanities--English, foreign languages, philosophy, and religion--has dropped from 11.2 to 5.3 since 1979-80.

Table 6.

Degrees Awarded by Area of Study 1979-80  
through 1990-91 (by percent)

## Faculty and Staff

### Academic Preparation

UNCF member institutions continue to demonstrate steady improvements in the academic development of their full-time faculty. The percentage of full-time faculty holding the doctorate has increased from about 44 percent to 52 percent since 1983-84. See Figure 5. Many of the persons who have gained the doctorate in recent years have been assisted by various faculty development programs administered by UNCF.

Figure 5. Faculty Doctorates  
UNCF Institutions, 1983-84--1991-92

### Gender/Racial Characteristics

UNCF colleges and universities are models of gender/racial diversity in the composition of their full-time faculties. Although UNCF colleges serve a predominantly black student enrollment, fully 40 percent of their 3,017 faculty members are nonblack and 39 percent are women. See Table 7. At five UNCF institutions--Knoxville, Paine, Stillman, Talladega, and Xavier--nonblack faculty outnumber black faculty while at five colleges--Bennett, Dillard, Oakwood, St. Augustine's, and Wilberforce--women faculty members are in a majority.

The Equal Employment Opportunity Commission has reported that blacks accounted for only 4.7 percent of the 520,551 full-time faculty members in the U.S. in 1991-92. Thus, the 1,915 black faculty members at UNCF colleges constitute nearly eight percent of the total number of black faculty persons in U.S. higher education. For details of the gender/racial composition at each college, see Appendix J.

Table 7.

Gender/Racial Composition of

Fall 1991

	Male		Female		Total	
	No.	%	No.	%	No.	%
Black	1,000	33	915	27	1,915	60
Nonblack	852	28	350	12	1,202	40
TOTAL	1,852	61	1,165	39	3,017	100

Faculty Salaries

In the academic year 1991-92, the average faculty salary at UNCF member institutions was \$27,085. This average salary was only two-thirds the \$40,920 average found at all private baccalaureate institutions in the U.S. in that year. In comparison with salaries at church-related colleges, the average UNCF faculty salary was 80 percent as high.

UNCF faculty salaries are particularly low at the highest academic rank--full professor. The average full professor's salary at a UNCF institution, \$33,340, was only 64 percent of the \$52,150 average at all private baccalaureate institutions.

Although still low in comparison with other private colleges, faculty salaries at UNCF institutions increased at a slightly higher rate than those at all baccalaureate institutions in the U.S. While the overall rise for faculty salaries was 4.7 percent between 1990-91 and 1991-92, the rise at UNCF institutions was 5.1 percent. The one-year gains were relatively consistent throughout all levels--from 4.4 percent for full professors to 5.6 percent for associate professors and instructors.

Shown below in Table 8 and in Figure 6 are the average salaries for various faculty levels at UNCF institutions, all baccalaureate institutions, and at church related institutions. Also shown in Table 9 is the one-year percentage increase for each level.

## Faculty Distribution by Area

Table 9 shows faculty distribution in various academic areas by two-year intervals since 1985. Perhaps one of the most striking points in Table 10 is the consistency of the data from year to year; in 1991, UNCF faculties were distributed in almost the same proportion as was found in 1985; education was the only area to show as much as a two percent drop, while the humanities showed a two percent increase. Although about 30 percent of UNCF students obtain degrees in business, only about 12 percent of faculty members are in that area. Many business courses are taught at the upper division levels where enrollments are generally not as high. Many of the humanities and science and mathematics courses are required courses for all students and these courses tend to have higher enrollments.

Table 9.

Faculty Distribution by Area, 1985 through 1991  
UNCF Member Institutions

	<u>Fall 1985</u>	<u>Fall 1987</u>	<u>Fall 1989</u>	<u>Fall 1991</u>
Business	12	12	11	12
Humanities	23	23	22	25
Science & Math	22	22	21	23
Education	14	14	13	12
Social Sciences	15	15	15	15
Fine Arts	7	8	8	8
Health Professions	4	3	2	2
Computer Science	3	3	4	3

## Faculty Turnover and Faculty Tenure

The composition of the faculty at UNCF institutions has been quite stable from year to year. In 1991-92, for example, only 11 percent of the faculty retired or transferred to other employment while 13 percent were new appointees. These percentages have changed little over the past several years.

The proportion of the faculty holding tenure has also changed little in recent years. For example, in 1980-81, 22 percent of the full-time faculty persons held tenure while in fall, 1991, 766 (25 percent) of the 3,017 full-time faculty members held such status.

Appendix L shows the faculty turnover and the number and percent of tenured faculty at each institution.

## Staff Composition

Reflecting increased enrollments, UNCF colleges increased the number of faculty members by five percent in 1991--from 2,868 in 1990 to 3,017. UNCF colleges have traditionally emphasized their teaching responsibilities and thus a greater proportion of total personnel at UNCF institutions are dedicated to teaching than at most U.S. colleges. In 1991, faculty comprised 34 percent of the total personnel at UNCF institutions as compared to 29 percent at all U.S. colleges and universities.

The number of administrators increased during the year from 1,893 to 1,997; administrators accounted for 22 percent of the personnel at UNCF institutions. Nationally, some 27 percent of full-time college and university personnel are administrators. Despite increases in enrollment, the number of senior administrators has declined by 18 percent in the past two years at UNCF institutions--from 327 to 269. By increasing the size of their teaching faculty while paring down the number in top administrative positions, UNCF institutions have emphasized their commitment to teaching.

The size of the support staff at UNCF institutions increased minimally over the past year--from 3,943 to 3,963; support staff comprised 46 percent of the personnel at UNCF institutions. (Nationally, support personnel constituted 44 percent of all college workers.)

Table 10 shows the overall staff composition at UNCF colleges during the years 1989-90, 1990-91, and 1991-92. Appendices O and P provide the details of the staff composition at each institution for fall, 1991.

Table 10.

## Student Financial Aid

### The Need

Although students come to UNCF colleges from a wide range of family income backgrounds, a large number come from families that can make little or no contribution to the expenses of attending college. In fall, 1990, fully one-third (34.8 percent) of UNCF students came from families where total income was less than \$20,000 per year.<sup>4</sup> In comparison, only 13 percent of the students attending private non-sectarian colleges nationally in 1990 came from such low income families. See Figure 7 below. In 1990, the median family income of students attending private black four-year colleges (the group in which most UNCF member institutions are included) stood at only \$28,333 or 56 percent of the \$51,037 median for families of all private nonsectarian college students. Only about 22 percent of all UNCF students came from families with incomes above \$50,000.

Figure 7. Family Incomes  
UNCF & Private Nonsectarian Colleges

The large percentage of students coming from families with less than a \$20,000 annual income can not--according to tables developed

<sup>4</sup> Astin, A.W., Korn, W.S., Berz, E.R. (1990). The American Freshman: National Norms for Fall 1990. Los Angeles: Higher Education Research Institute, UCLA.

by the College Scholarship Service--generally be expected to contribute anything for college expenses. Another 18 percent of UNCF students come from families in the \$20,000 to \$29,999 range where the expected family contribution would be only around \$500 per year. Table 11 below shows the percentage of UNCF students coming from each family income category, the expected amount of contribution from the family toward college expense, and the total amount of aid need needed by students from a particular income category. In calculating the amount of need, the table assumes that the average full cost of attending a UNCF institution in 1990-91 was around \$9300 (\$4600 for tuition and fees; \$2700 for room and board; \$1500 for personal expenses and transportation; and \$500 for books and supplies.) Based on this average cost of \$9300, the table shows the amount for each income category that could reasonably be expected to come from the family and the amount that would have to come from other sources--generally financial aid.

Table 11 also shows that the total amount of aid funds needed by students at UNCF institutions in 1990-91 was over \$320 million. Table 12 shows that the total amount of student aid funds awarded by the colleges was only \$245 million in 1990-91. Thus, UNCF colleges and their students faced a financial aid shortage of some \$75 million. This shortfall in aid funds meant that many needy students were unable to buy necessary supplies or were unable to participate fully in extra-curricular activities which are an important part of college life; many, unfortunately, were forced to drop out of college because of the lack of funds.

Table 11

Amount Needed to Supplement Family Contributions  
of UNCF Students, Fall, 1990  
(by Family Income Categories)

<u>Family Income Category</u>	<u>No. of Students from Category</u>	<u>Percent from Category</u>	<u>Average Amount Needed</u>	<u>Total Amount Needed</u>
Less than \$20,000	17,344	34.8	\$9,300	\$161,299,200
\$20,000--\$24,999	4,585	9.2	9,114	41,787,690
\$25,000--\$29,999	4,485	9.0	8,184	36,705,240
\$30,000--\$39,999	8,273	16.6	6,882	56,934,786
\$40,000--\$49,999	3,887	7.8	4,743	18,436,041
\$50,000--\$59,999	2,990	6.0	1,674	5,005,200
\$60,000--\$74,999	3,788	7.6	186	704,568
\$75,000 and above	4,487	8.9	-0-	-0-
TOTAL	49,839		\$6,438	\$320,872,725

Table 11 shows that middle income families--as well as low income families--face great difficulties in financing a college education for their sons or daughters. Even a family in the \$40,000 to \$50,000 income range needs an average of \$4,743 per year in student financial aid funds in order to meet the average costs at UNCF institutions. Note that the average amount of need as shown in the above table is \$6,438. This calculation uses all students; if the calculation were to consider only those students coming from families with less than \$60,000 income, then the average need of this "needy" group would be \$7,720. Because of the great financial burdens faced by UNCF students and their families, 87 percent of all UNCF students received financial aid in fall, 1990.

### Current Student Aid Resources

Some \$245 million was allocated to student financial aid during the last reporting year (1990-91). This amount was an increase of 15 percent over the \$213 million allocated for financial aid in the previous year. Although the financial aid funds grew, the total amount available was still considerably below the \$320 million that would have provided an adequate amount to all needy students.

With respect to dollars, the largest single aid program at over \$74 million was the Stafford Loan program. The Pell Grant program which provided awards to two-thirds of all UNCF students served the greatest number of students. In terms of the average size of award, the ROTC scholarship program with an average award of \$5,912 was by far the most generous; unfortunately, this program provided awards to less than one percent of all UNCF students. Table 13 shows the details of the main financial aid programs reported by the colleges.

Table 12  
Financial Aid by Category, 1990-91

Type of Aid	No. of Students	Percent of All UNCF Students	Total Award (in 000's)	% of Aid \$\$s	Avg. Grant/ Loan

<b>TOTAL</b>			<b>\$245,280</b>		

Trends in Student Financial Aid

Tables 13A, 13B, and 13C below highlight the trends of the six largest student aid programs at UNCF institutions over the past five years. The tables show that Federal student aid programs have failed to keep pace with enrollment increases and annual cost of living increases and that the colleges themselves have had to supply increasing amounts of aid funds in order for students to pursue their studies.

Table 13A relates to the number of students who received assistance for the five year period between 1986-87 and 1990-91. Note that in three of the programs--college work-study, SEOG, and state scholarships--the number of students receiving assistance actually declined. The number of students receiving assistance through the

Pell Grant program matched the 17 percent increase in enrollment during the period. Only the Stafford Loan program and institutional scholarships grew more rapidly than did enrollments. Raising the number of students served from 9,376 to 13,313, the institutional scholarships programs showed the most growth during the five year period.

Table 13A.

Numbers of Students Receiving Aid from Various Sources  
UNCF Member Institutions

	<u>1986-87</u>	<u>1987-88</u>	<u>1988-89</u>	<u>1989-90</u>	<u>1990-91</u>	Percent Change 1986-87 to 1990-91
Stafford Loans	22,070	22,236	21,782	23,688	25,583	30.7
Pell Grants	25,819	25,450	27,505	29,944	30,359	17.6

Inst. Schlrshps.	9,376	11,270	10,481	12,773	13,313	41.2

Table 13B, which details the amount of funds expended for various programs, also shows that the institutional scholarship program was the only aid program to expand in real dollars during the past four years. In analyzing the data in Table 13B, it is useful to remember that UNCF enrollments grew by 17 percent during the period and that the value of the dollar declined by about four percent a year due to the annual increase in the Consumer Price Index (CPI). If the amount of student aid simply kept pace with those two factors over the years surveyed in Table 14B, then a percentage increase of approximately 30 percent would be expected. Thus, the Pell Grant program merely kept pace with enrollment and CPI increases, while the college work-study program, SEOG, and state scholarships declined. Only the Stafford Loan program and institutional scholarships showed substantial growth during this period. The Stafford Loan program showed a 59 percent increase during this five year period; about half of this increase came during the last reporting year. Institutional scholarships expanded from \$17 million to over \$30 million--a 79 percent increase.

Table 13B.

Total Amount of Aid (in 000's) from Various Sources  
UNCF Member Institutions

	<u>1986-87</u>	<u>1987-88</u>	<u>1988-89</u>	<u>1989-90</u>	<u>1990-91</u>	Percent Change 1986-87 to 1990-91
Stafford Loans	\$46,614	\$53,061	\$51,579	\$56,808	\$74,022	58.8
Pell Grants	39,176	41,591	45,264	50,340	50,998	30.2
College Wk-Study	17,003	16,932	14,459	15,268	15,813	(7.0)
SEOG	13,237	13,447	13,290	14,038	13,510	2.1
State Schlrshps.	18,239	15,553	15,799	19,584	18,248	0.1
Inst. Schlrshps.	17,070	17,636	18,906	24,711	30,620	79.4

Changes in the average awards during the past four years are shown in Table 13C. (With an annual inflationary rise of about four to five percent, the percent increase in those programs should have been around 16 to 20 percent in order to keep pace with the CPI.) To compensate for a decrease in other aid programs, the colleges have had to spread their limited resources over greater numbers of students. Thus, while the number of students receiving awards and the total dollar volume of the institutional programs have increased substantially, the average value of the award given to an individual recipient has shown far less increase. In fact, keeping in mind the inflationary increase over this period, the Pell grant program, college work-study, and the SEOG program now provide less average aid than five years earlier. The only program to increase its average award substantially was institutional scholarships, rising from \$1,820 to \$2,300--a 26 percent increase. The Stafford Loan program and the various state scholarship programs seem to have simply kept pace with inflationary rises.

## College Costs

In comparison with other private four-year colleges and universities in the U.S., the cost of attending a UNCF member institution remains much less. The data shown graphically in Figure 8 below compares the expenses at UNCF institutions with expenses at all private colleges in the U.S. and with private colleges in the South. For details of the costs at each UNCF college, see Appendix X.

### Figure 8. Basic College Costs UNCF Inst. & Other Private Colleges

From 1990-91 to 1991-92 tuition and fees at UNCF colleges rose from \$4,564 to \$4,848--an increase of 6.2 percent. (The rate of increase at all private four-year colleges was 6.6 percent.) Despite the increase in charges, the UNCF average charge for tuition and fees remains at less than half that charged by private colleges nationally (\$10,017) and 43 percent less than the \$8,478 charged by southern private four-year colleges.

Room and board charges at UNCF colleges also increased by six percent over the previous year--from \$2,784 to \$2,955. Compared to private colleges nationally, the charges for room and board for a typical UNCF student living on campus were one-third less; in relation to southern private colleges, UNCF colleges charged 21 percent less.

Compared to 1990-91, the cost of books and supplies increased minimally at UNCF institutions--from \$509 to \$513. The cost of books and supplies was approximately the same at all types of four-year colleges.

The average basic costs of attending a UNCF college in 1991-92 rose by less than \$500 over the previous year--from \$7,856 to \$8,344, a 6.2 percent rise. When compared to the average national private college cost of \$14,911 and the average private southern four-year college cost of \$12,715, the average basic cost at UNCF institutions was considerably less. (The overall basic costs rose 6.3 percent at all four-year private colleges and 7.3 percent at four-year private colleges in the South.) By keeping their costs relatively low, UNCF colleges have given thousands of students the opportunity to attend a quality four-year private college.

## Institutional Finances

For the fiscal year ending June 30, 1991, the member institutions reported revenues that averaged nearly \$15.8 million while expenditures averaged \$15.4 million. In comparison with figures for 1989-90, average revenues for 1990-91 increased by 10.1 percent while average expenditures increased by 8.8 percent. About five-sixths of all UNCF institutions reported revenues which exceeded expenditures; as recently as 1985-86, only 58 percent of UNCF institutions could report that their revenues exceeded expenditures.

### Revenues

Revenues continue to be derived from three main sources--student tuition and fees, government, and private gifts and grants. Those three sources accounted for 80 percent of all revenues. As shown in Table 15 below, tuition and fees has dropped slightly as a source of revenue since 1984 while the percentage from government has increased. The proportion of UNCF colleges' revenues coming from private gifts and grants has fluctuated between 17 and 20 percent since 1985-86; in 1990-91 18 percent came from this source.

Much of the revenue derived from government is in the form of grant funds restricted for student financial aid. Funds for Pell Grants would be an example of this kind of income. Other significant amounts of government revenues come from Title III of the Higher Education Act of 1965; virtually all UNCF institutions derive at least \$500,000 per year from this source. A third major part of government funds support research contract activities carried out by the colleges.

Alumni support accounted for over \$8 million in private gift and grant contributions during 1990-91. Appendix AA shows that of the 230,670 living alumni of UNCF institutions, over 27,000 made a financial contribution during the year. Altogether, their contributions averaged nearly \$300 per contributor.

The funds derived from auxiliary enterprises are chiefly those associated with the operation of college cafeterias and dormitories. Typically, operation of these facilities results in a small net profit for the institution. (In 1990-91, some 14 percent of the revenues came from auxiliary enterprises, while only 11 percent of the colleges' expenditures were used to cover operating costs for these activities.)

Table 14.

Source of Revenues at UNCF Institutions,  
1985-86 through 1990-91  
(by percent of total revenues)

	Tuition & Fees	Govern- ment	Private Gifts	Endowment Income	Aux. Enter.	Other Income
1985-86	38	20	17	4	16	3
1986-87	37	22	20	4	15	3
1987-88	36	22	19	4	16	3
1988-89	37	23	19	3	14	3
1989-90	35	27	18	4	14	2
1990-91	36	27	18	3	14	2

In comparison to the above data, Table 15 shows the latest available U. S. Department of Education figures (1989-90)<sup>5</sup> for private institutions of higher education in the U.S.

Table 15.

Sources of Revenues at Private Institutions  
of Higher Education in the U.S.  
1989-90

<u>Source</u>	<u>Percentage</u>
Tuition and Fees . . . . .	44
Government . . . . .	20
Private Gifts & Grants . . . . .	10
Endowment Income . . . . .	6
Auxiliary Enterprises (hospitals excluded) . . . . .	15
Other Sources . . . . .	5

A comparison of the sources of revenues between UNCF institutions and other private colleges shows that UNCF institutions derive a smaller proportion of their revenues from tuition and fees than do other private colleges. The data also show that the UNCF institutions are much more dependent on private gifts and grants than other private institutions for obtaining crucial operating funds; 18 percent of UNCF revenues come from gifts and grants as opposed to only ten percent at all private institutions. The revenues obtained by UNCF institutions from government sources come primarily from the federal government and are generally restricted for use for student aid and for programs through Title III of the Higher Education Act; UNCF colleges receive little or no support from state or local governments.

<sup>5</sup> National Center for Education Statistics, Current Fund Revenues and Expenditures of Institutions of Higher Education: Fiscal Years 1980-88. June 1992, p. 12.

## Expenditures

A significant financial development has been the rapid rise in the proportion of funds that must be spent for student financial aid. As shown in Table 16, student aid now accounts for 20 percent of all expenditures at UNCF institutions. This 20 percent figure for student aid takes on greater significance when compared to the eight percent reported by all private colleges.

Table 16.

Funds Expended by Area at UNCF Institutions  
1985-86 through 1990-91  
(by percent of total expenditures)

	IN- STRUC- TION	RE- SRCH	ACAD SUPT	PUB SERV	INSTL SUPT	STU- DENT AID	STU- DENT PLANT	STU- DENT SERV	AUX ENTER	ALL OTR
1985-86	23	2	5	2	19	12	10	8	13	5
1986-87	24	2	6	1	20	11	12	8	12	4
1987-88	23	2	5	1	19	15	11	8	12	4
1988-89	22	2	5	2	19	16	11	8	11	4
1989-90	21	2	5	2	19	20	10	7	11	3
1990-91	22	2	6	2	18	20	9	7	11	3

The pattern of expenditures at UNCF institutions in 1990-91 showed little change from that of 1989-90; the proportion expended for instruction gained one point while the proportion spent for plant maintenance dropped one point. Since 1985-86, expenditures--except for student aid--have been rather consistent.

Student aid has more than doubled as a category of expense since 1984-85; UNCF institutions have had to spend larger and larger portions of their budgets on student aid because of the serious financial needs of their students. Student aid now accounts for almost the same proportion of expenditures as do those associated with instruction; in fact, at 19 UNCF institutions, student aid--in comparison to instructional costs--now takes a greater portion of the budget.

Other expenditures showed little change from those reported in prior years. Institutional support (general administration, the business office, and the registrar's office) accounted for 18 percent. Academic support, (e.g., computer assisted instruction, the library, and the developmental programs) accounted for six percent. Maintenance of the physical plant required nine percent while the costs associated with auxiliary enterprises (the book store, cafeterias, and dormitories) accounted for 11 percent of the colleges' budgets.

In comparison, Table 17 shows the latest available U. S. Department of Education figures (1989-90)<sup>6</sup> for expenditures at private colleges and universities in the U.S. UNCF colleges spend a far larger proportion of their operating funds on student aid than do other private colleges and universities. Also, since no UNCF college or university operates a hospital, the expenditures for auxiliary enterprises are somewhat lower than at other private colleges which often operate such facilities.

Table 17.

Expenditures by Area at Private Institutions  
of Higher Education in the U.S.  
1989-90

<u>Area</u>	<u>Percentage</u>

Details of each college's sources of revenues and categories of expenditures are shown in Appendix Z and Appendix BB. The total revenues and expenditures for each college are shown in Appendix Y.

<sup>6</sup> Ibid., p. 13.

## Endowment

Endowment funds at most UNCF member institutions continued to show solid gains during the one-year period ending June 30, 1991. At that date, the average endowment at UNCF institutions stood at \$9.9 million while the total market value of all endowment funds at UNCF institutions stood at \$405.8 million--an eight percent rise in their value over the previous year. Over the past several years, the endowments at UNCF colleges have risen dramatically. For example, in the 1983 fiscal year, the largest endowment at any UNCF institutions was \$27 million, while in the 1991 fiscal year, the largest reported endowment was \$51 million. At the present growth rate, the total of all UNCF member colleges' endowments will exceed a half billion dollars within the next three years. Figure 9 below graphically shows the growth of UNCF endowment funds since 1983.

Figure 9. Total Endowments  
UNCF Institutions by Fiscal Yrs.

While a wide range exists, 80 percent of UNCF institutions hold endowments of \$15 million or less and over half report endowment funds in the \$1 million to \$5 million category. See Table 18. The largest endowment among UNCF institutions is enjoyed by Spelman College; Spelman's endowment on June 30, 1991, was reported at \$51.3 million. Seven other UNCF institutions--Morehouse, Tuskegee, Dillard, Clark Atlanta, Xavier, St. Augustine's, and Jarvis Christian--have endowments valued at over \$15 million. The eight institutions with endowments over \$15 million account for nearly 60 percent of the total held by all UNCF institutions.

Appendix CC shows the market values of the endowment funds for the past three reporting years at each individual UNCF institution.

Table 18.

Distribution of Endowment Funds  
UNCF Member Institutions  
1990-91

\$10 ---- 14 million	4	10
\$ 5 ---- 9 million	10	25
\$ 1 ---- 4 million	18	44
under \$1 million	1	2

Endowment Compared with Other Private Colleges

Although UNCF colleges have been making great strides in the strengthening of their endowment funds, it is important to compare endowments held by the UNCF institutions with other private colleges. Although the \$9.9 average value of endowment funds at UNCF institutions represents much improvement, this amount is still considerably below the level reported by other private liberal arts colleges. The Council for Aid to Education reported<sup>7</sup> that the average endowment at the 492 private comprehensive and private liberal arts colleges (that filed a report) averaged \$30 million.

Table 19 shows the endowment per student figures at UNCF colleges and universities as compared with those at all four year private institutions. Since 1983-84, the UNCF endowment per student has increased by 86 percent; during that period, however, the endowment per student more than doubled at all private institutions. Since UNCF endowment funds have not kept pace with those at other four year private institutions, the UNCF endowment per student figure of \$8,117 is now only about one quarter as high as the \$30,856 found at all private colleges.

<sup>7</sup> Council for Aid to Education, Voluntary Support of Education, 1991. June, 1992, pp. 3-34.
