ABSTRACT

In a continuing effort to measure the quality of their Dental Hygiene program, explore the need for changes, and substantiate the program's goals for accreditation standards, a follow-up study was conducted of the 1991 Dental Hygiene program graduates from William Rainey Harper College (WRHC) in Palatine, Illinois. Surveys were mailed to all 28 associate degree graduates, requesting information on their current employment and/or enrollment in school, employment search experience, salary/benefits, job satisfaction, job tasks, the quality of their WRHC preparation for those tasks, and suggestions for improving the WRHC program. Study findings, based on a 79% response rate, included the following: (1) all of the 22 respondents were employed in the dental hygiene field, with 13 working full-time and 3 more working full-time at 2 part-time jobs; (2) 27% of the respondents were working in a job-setting with only 1 practitioner, compared to 37% of the 1990 graduates; (3) respondents' search for employment typically involved 5 interviews, with 45% using the local newspaper and 54% using a personal contact; (4) 95% of the graduates were paid on an hourly basis, with a median wage of \$18.50 per hour, or approximately \$37,700 per year; (5) 86% of the respondents were very satisfied with their chosen profession; (6) respondents reported being underprepared to perform 7 of the 41 skills for which they were trained; and (7) while only 1 graduate was currently working toward an advanced degree, almost half intended to do so. Detailed data tables and the survey instrument are included. (MAB)

ABSTRACT

THE PURPOSE OF THIS STUDY WAS TO FOLLOW UP THE 28 1991 DENTAL HYGIENE GRADUATES AS ONE INDICATOR OF THE QUALITY OF THE PROGRAM, AND TO ASCERTAIN THE NEED FOR APPROPRIATE CHANGES AND IN ORDER TO SUBSTANTIATE THE PROGRAM'S GOALS FOR ACCREDITATION STANDARDS. A SURVEY INSTRUMENT WAS MAILED TO THESE GRADUATES AND AFTER SEVERAL FOLLOW-UP EFFORTS, A 79 PERCENT RESPONSE RATE WAS OBTAINED.

RESULTS OF THE STUDY INDICATED THAT ALL THE 1991 DENTAL HYGIENE GRADUATES WERE EMPLOYED IN THEIR FIELD AND ALMOST ALL WERE IN SITUATIONS THEY PREFER. THEY ARE GENERALLY VERY SATISFIED WITH THEIR CAREER CHOICE AND WITH THEIR EDUCATION AT HARPER. SALARIES ARE VERY GOOD AT AROUND \$37,700 WHICH IS UP 3.5 PERCENT FROM THE PREVIOUS YEAR AND CONSIDERABLY HIGHER THAN WHAT OTHER HARPER CAREER GRADUATES EARN. HOWEVER, BENEFITS RECEIVED BY GRADUATES HAVE DRASTICALLY DROPPED FROM WHAT WAS RECEIVED BY PAST GRADUATES. GRADUATES ONCE AGAIN REPORT THEY ARE WELL PREPARED IN THE SKILL AREAS THEY PERFORM MOST OFTEN.

Purpose

The purpose of this study was to follow up the 1991 Dental Hygiene graduates as one indicator of the quality of the program, the need for appropriate changes and in order to substantiate the program's goals for accreditation standards. The study was requested by the Coordinator of the Dental Hygiene Program.

Population Surveyed and Methodology

The survey instrument shown in the appendix was designed by the Coordinator of the Dental Hygiene Program with input from the Office of Planning and Research. This survey was mailed to all 28 1991 Dental Hygiene associate degree graduates. After four weeks those not responding were mailed a second copy of the survey. One month later, those still not responding were called and surveyed over the telephone. With this follow-up effort, 22 completed surveys were obtained for a 79 percent response rate. Results were compared with a similar 1990 graduate class survey.

Discussion of the Results

Among the 22 respondents, all are employed, at least part time, in the dental field. Thirteen are employed full time in one situation while 3 more are employed full time with 2 part-time jobs. Another 6 are employed part-time as dental hygienists by choice. In addition, only 1 is employed in a geographic location she does not prefer. Thus, the employment situation for Harper graduates is excellent.

In examining their employment situations, 27 percent are in a setting with only one practitioner while 73 percent are with more than one practitioner. All are employed in general practice. The average situation in their search for employment was to go through 5 job interviews. There were various avenues used in searching for employment but the most frequent means (54%) was through personal contact. Another 45 percent got their job through the local newspaper and 64 percent of the graduates reported their job is in the northwest suburbs.

Almost all (95%) are paid on an hourly salary basis, while a few receive commissions or bonuses or salary on another type of basis. The median hourly salary is about \$18.50 per hour and the median daily salary is about \$145. This latter figure is equivalent to an annual salary of just over \$37,700 - up about 3.6 percent over the 1990 dental hygiene graduates. This is higher than the median nursing graduate salary (\$29,000) or the median career graduate (\$24,300). Benefits dropped sharply among 1991 graduates compared to past classes. For example, malpractice insurance was provided for only 5 percent of the 1991 class as compared to 33 percent the year before. Life insurance was provided for only 10 percent of the 1991 class as compared to 30 percent of the previous year's class. Paid sick days were only provided to 29 percent of the 1991 class while this was provided to 48 percent of the previous year's graduating class. Overall, 11 benefits declined, 2 remained the same while only 3 increased.

Among those employed in dental hygiene, 86 percent are very satisfied with their chosen profession while all are at least satisfied with their chosen profession. This is a big jump in satisfaction from the previous year.

These graduates were also asked how frequently they perform certain dental hygiene skills and how well they were prepared to perform these skills. There were 41 skill areas that were rated by all 3 classes (1989-1991). The frequency these skills were

Discussion of the Results (continued)

practiced and the degree to which they were prepared for these skills was about the same for all three classes. Twelve skills have shown a trend in the 3 years that they are now being practiced more frequently. They are radiographs (interproximal and occlusal), radiology safety procedures (equipment inspection and badges), instruments (Gaceys, langers and files), topical fluoride application, root planning, indices (bleeding and gingival) and air polishing. Seven skills show a trend in the 3 years that they are now being practiced less frequently. They are intro/extra oral exam, universal curettes instruments, ultrasonic scaling, periodontal evaluation, complete charting, detition charting, nutritional counseling and suture removal.

Five skills have shown a trend in the 3 years that students now feel they are better prepared in these areas. They are gingival indices, impressions for study models, margination (EVA), file instruments, and polishing analgrams. On the other hand 7 skills have shown a trend in the 3 years that students now feel less prepared in these areas. They are intra/extra oral exam, taking medical history, periodontal scaling, ultrasonic scaling, group patient information, nutritional counseling and curettage.

As for continuing their education, 1 1991 graduate is working toward an advanced degree (social relations at Northeastern). However, almost half of the 1991 graduates anticipate eventually working toward an advanced degree. Almost all (91%) of the graduates have maintained membership in the IDHA/ADHA and 71 percent participated in formalized continuing education presentations. When asked how satisfied they were with their professional education, all said they were satisfied or very satisfied. Almost all commented that the dental hygiene program was excellent and prepared them well for their job. Three reported stressful negative experiences in their clinic work.

Major Conclusions

All the 1991 Dental Hygiene graduates were employed in their field and almost all in situations they prefer. They are generally very satisfied with their career choice and with their education at Harper. Salaries are very good at around \$37,700 which is up 3.5 percent from the previous year and considerably higher than what other Harper career graduates earn. However, benefits received by dental hygienists have dropped dramatically from what graduates received in previous years. Graduates once again report they are well prepared in the skill areas they perform most often.

- Well prepared to use equipment
- Adequately prepared to use cumbias
- Adequately prepared to use CEPH Radiograph
- Inadequately prepared to use CEPH Radiograph

- Well prepared to use sickles
- Well prepared to use 204's
- Well prepared to use scalers

Comments on how Harper can improve the quality of its program - 1990

- Would like to see more classes and hands-on with perio patients.
- Elaborate on perio aspect possibly - extend length of program.
- Get more familiar with nitrous oxide while in the program.
- Be more realistic, i.e., especially about the jobs out there - if you find the "ideal" job you are lucky.
- Not every DDS does all the indices that you are supposed to do.
- It takes a while to get things changed.
- More perio
- No improvement necessary
- I can't think of anything I would change - now that I'm out of college - it all seems fair.
- Include some nitrous oxide lectures. I don't use it that often but occasionally on fearful patients - more lectures on fearful patients.
- Good thorough program
- Possibly more clinic, more perio experience, root planing and curettage.
- More time with perio patients (root planing and curettage) in the clinic.
- Possibly to offer some DHY courses at evening hours.
- More perio program and how to introduce in general practice.
- Cover perio more and community dentistry.

Comments on how Harper can improve the quality of its program - 1991

- If possible, it would be great to have more perio pts.
- With all the preparations done in school, I was really prepared to perform my duties.
- Ease the pressure of clinic requirements.
- During last semester 2nd year there should be 1 day a week where we have 1 hour perio pt. and do procedures that are done in private practice. Example - if probings - don't chart entire mouth. It was hard to go from 3 hrs. per pt. to 1 hour.
- I feel the education was excellent; however, I feel some of the clinical instructors acted unprofessionally toward the students. Once an opinion was formed of that student the instructors would treat her a certain way whether she deserved it or not. A few instructors seemed to be on a power trip and mentally intimidated many students. The program would have been less stressful if the students would not have been literally "scared" of many instructors. It is a shame to say I have very unfond memories of a few instructors which makes me want to avoid ever visiting in the future.
- Internship during 2nd year to provide on-the-job experience for the job market.
- The quality of the program was excellent - it prepared us for the real outside world in all aspects.
- Make the program and knowledge less difficult and more applicable to outside world
- I was very satisfied with the professional education but do believe it should have been more fun and less stressful. The Dental Hygiene Program often attracts married women or mothers, (single or married) who like this possibility of flexible employment. But these women have other "stresses" in their lives and do not need the extra stress placed on them during the program sometimes causing a normal/rational person to "snap". Unfortunately I have seen that it caused some former students to hate Harper and speak negatively of the program. For hygienists to be successful as a lobbying group, we need to be cohesive, not divisive. I would prefer to see more clinical time spent, I feel I was not properly prepared to see 8-12 patients a day when all I had seen was two. Although I occasionally use the information I learned in community dentistry, one class, not three should be sufficient to teach this class. I also think an introduction to dental materials is a good idea and perhaps an optional class made available for those who would like to continue on in dentistry. But frankly I don't use anything I learned in that class. I feel I would have adjusted to

Comments on how Harper can improve the quality of its program - 1991 (continued)
the "real world" better had I seen 2 patients a day in the spring of the first year, 3 a day in the summer, 4 a day in the fall and 5 a day in the spring of the second year. I felt very prepared to take the boards, both national and state, and I believe I was well educated in dental hygiene and had some excellent role models in the program which has helped me to develop a positive rapport with my patients. Unfortunately there are a lot of board questions that deal with community dentistry and dental materials - perhaps we need to convince them that these questions are not applicable to most hygienists.

Comments on Satisfaction/Dissatisfaction with Professional Education -- 1991

- I was very satisfied with my education - I feel I still have a long way to go on RP perio pts.
- Excellent instructors
- Program is excellent
- We were over prepared when we went out into the world! I brought up situations the dentist was knocked for a loop about! We blow them away in perio! It's great!
- Very helpful and knowledgeable instructors.
- I feel I had an extremely adequate education. I think I have an excellent knowledge base - Thanks!
- I felt that the education was quality; however, the game playing - power control that some faculty expressed was sickening. There is no need to play games with students minds. All they want is to learn. If you did not make buddy buddy with the certain staff members they made the two years Hell. It is sad because it could be such a positive program. Also a little less time on Comm. Dent. - Just teach (Real World Skills)
- Overall, I am very satisfied with the education I received.
- You don't use the degree -- production is more important.
- I felt very prepared to take the Boards both National and State, and I believe I was well education in Dental Hygiene and had some excellent role models in the program which has helped me to develop a positive rapport with my patients.

Spring 1992

Dear Class of 1991,

Greetings from Harper's Dental Hygiene Program! By now you have been working in your new profession for nearly a year, and we are anxious for you to share with us your thoughts about our program and your dental hygiene education.

We are especially interested in how you found your employment, how you like your chosen profession, are you continuing your professional growth, and how well do you feel we prepared you?

Please take a few minutes to complete the enclosed survey and return it in the self-addressed envelope which is provided for your convenience. Any information you supply will be kept strictly confidential and will be used only in combination with responses from other students. The number on the survey enables us to take your name off the mailing list when your completed response is received. This saves the cost of unnecessary mailings to non-respondents and saves you the bother of receiving a second copy of the survey in addition to a follow-up telephone call.

We greatly appreciate your response to this survey and especially enjoy hearing from our recent graduates.

Very truly yours,

Marine P. Holt, R.D.H., M.A.
Coordinator
Dental Hygiene Program

WILLIAM RAINNEY HARPER COLLEGE

DENTAL HYGIENE PROGRAM

ALUMNI SURVEY

1- Check (x) your current employment situation

- A. Employed full time as a dental hygienist
- B. Employed in two part-time jobs as a dental hygienist equaling full-time employment in hours worked
- C. Employed as a part-time dental hygienist, by choice
- D. Employed as a part-time dental hygienist but would prefer full-time employment
- E. Employed outside the dental hygiene field by choice

Job Title _____

Why did you prefer this? _____

- F. Employed outside the dental hygiene field but would prefer working as a dental hygienist

Present Job Title _____

- G. Unemployed but searching for employment
- H. Unemployed because am enrolled in college

Major _____ College _____

- I. Unemployed because of being a homemaker
- J. Unemployed for some other reason

- 2- Practice setting:
- A. Solo Practitioner
 - B. More than one practitioner
 - C. Clinic type
 - D. Other _____

- 3- Type of Practice:
- A. General Practice
 - B. Perio
 - C. Pedo
 - D. Other _____

- 4- A. Number of work hours/week
 B. Number of offices

- 5- In which geographic area are you employed?
- A. Urban
 - B. Suburban
 - C. Rural

- 6- In which location are you employed?
- A. North suburbs
 - B. Northwest suburbs
 - C. South suburbs
 - D. Southwest suburbs
 - E. Chicago
 - F. Illinois/out of Chicago area
 - G. Out of state (specify) _____

7- Was this location your preferred choice?

- A. Yes
 B. No

8- What avenues did you use to find your employment situation(s)? Check (x) all that apply.

- A. Personal contact
 B. ADA Placement
 C. ADHA Placement
 D. Private Placement Agency
 E. Major City Newspaper
 F. Local newspaper
 G. Other _____

9- If you had difficulty finding employment, what type of difficulty? _____

10- During my employment search, I was looking for:

- A. Full-time work in one office (more than 30 hours)
 B. Part-time work in more than one office to equal a full-time work week.
 C. Part-time employment (less than 30 hours/week)
 D. Other - specify _____

11- How many jobs did you interview for? _____

12- How is your salary determined? Please (x) check all that apply.

- A. Hourly salary
 B. Weekly salary
 C. Monthly salary
 D. Commission
 E. Salary and Commission
 F. Bonus and 1 of the aforementioned
 G. Independent contracting
 H. Other - specify _____

13- What is your average daily salary (based on an 8-hour day)? _____

14- What is your hourly salary? _____

15- What benefits are included in your work situation? Check (x) all those that apply.

- A. Paid holidays - How many? _____
 B. Paid sick days - How many? _____
 C. Pension Plan
 D. Profit Sharing
 E. Paid Vacation - How much? _____
 F. Insurance: 1) Major medical _____
2) Life _____
3) Disability _____
4) Liability _____
5) Malpractice _____
 G. Other: 1) Uniform allowance _____
2) Continuing education courses paid _____
3) Paid dues for Association _____
4) Reduced fee for dental work _____
5) Bonus for production increase _____
6) Christmas bonus _____
 H. Other - Please explain, especially if you are an independent contractor: _____

I. No benefits

16- Look over the following job duties and indicate which ones you perform and how well prepared you feel in each area. Check (x) one in each section.

(Over)

17- Check (x) the degree of satisfaction with your chosen profession.

- A. Very satisfied
- B. Satisfied
- C. It is OK
- D. Dissatisfied - why? _____

18- Are you working toward an advanced degree?

- A. Yes - Major area of study _____
College _____
- B. No

19- Do you anticipate that you will eventually work toward an advanced degree?

- A. Yes - Major area of study _____
- B. No - Please explain _____

20- With regard to professional development, please check (x) all that apply.

- A. Maintained membership in IDHA/ADHA
- B. Attend local IDHA component meetings
- C. Participate in formalized continuing education presentations
- D. Volunteered for community projects or activities

21- To what degree were you satisfied with your professional education?

- A. Very satisfied
- B. Satisfied
- C. Somewhat satisfied
- D. Dissatisfied
- E. Very dissatisfied

Please comment on your satisfaction/dissatisfaction. _____

22- Please comment on how we can improve the quality of our program. _____

Please correct your mailing address, if necessary
