ABSTRACT

A study was conducted at William Rainey Harper College (WRHC) of 400 students who had attended WRHC in fall 1990 but failed to enroll in the subsequent term. The sample was divided into two groups: students who had completed fewer than 16 credit hours and those who had completed more than 16 but less than 48 credit hours. All of the stopouts were surveyed regarding their employment status, educational achievement, reasons for leaving WRHC, and evaluation of various aspects of their experience at the college. Results of the study, based on responses from 70.5% from the first group and 71.0% from the second, included the following: (1) 83% of students who left with less than 16 credit hours had attended WRHC for general interest or refresher courses, while more than half of those who had 16-48 credit hours had enrolled for transfer purposes or to enter a career program; (2) students with more coursework rated the courses almost twice as beneficial as did those students with less coursework; (3) roughly 10% of the stopouts were currently full-time students and another 15% were attending school part-time, while both groups reported receiving higher grades than those received at WRHC; (4) about 80% of courses taken by the stopouts with more than 16 credit hours transferred to their current institutions, while only one-half of the courses taken by those with less than 16 hours transferred; and (5) nearly three-fourths of the stopouts with fewer than 16 credit hours worked over 30 hours per week while attending WRHC.

Abstract

The percentage (33 percent) of stopouts who return to Harper has increased to the level that was attained in the '70 s. These students interrupted their education because they had either completed all the courses they wanted to take or they transferred to other schools. Most held jobs they considered permanent and were satisfied with them.

The stopouts who took more coursework at Harper rated the services better than those who took fewer courses. In addition, these students also rated the coursework more beneficial. Stopouts intend to return to school in the near future, despite the fact they reported taking all the courses they currently wanted.

One out of four stopouts is either attending school full time or part time. Their GPAs are higher than those attained at Harper. The stopouts who took more coursework at Harper had a larger percentage of their classes transfer.

The stopouts with fewer credit hours generally worked more than 30 hours while attending Harper. Practically all stopouts spent very little time on campus socializing, participating in student activities or studying.

Purpose

The purpose of this report was to reflect the information gathered from students who, after attending Harper for one semester or more, failed to attend Harper during a particular semester before completing 48 or more credit hours. The results are for those students who attended for less than 16 credit hours and for those who attended more than 16, but less than 48 hours. The semester last attending Harper was the fall semester of 1990. For each of the above categories 200 students were sampled.

Method

The survey forms shown in the appendix were developed by the Office of Planning and Institutional Research and were mailed to the target population. The survey asks the students about their present employment status, their educational achievement, the reasons they left Harper and their evaluation of various aspects of Harper. About three weeks after the original mailing a second survey was sent to non-respondents. After another three weeks those still not responding were surveyed by telephone.

Discussion of Results

In comparing those who left with less than 16 credit hours to those with 16 or more we find 83 percent of the students with fewer credit hours enrolled to take courses for general interest or refresher courses. The 16 credit hours or more students enrolled for different reasons. Over one-half of them enrolled for transfer purposes or to enter a career program.

Most of the stopouts believed that the greatest educational value was the benefit to them on their jobs. As reported in prior studies most of them said they were in their permanent job or position. About 70 percent of the stopouts are currently employed full time. This characteristic is similar to our prior studies on stopouts. Most of these stopouts are working at jobs where they consider themselves as experienced professionals or second line supervisors. Less than one-half are working in areas that were related to the coursework they were taking at Harper. Not surprisingly the stopouts with more credit hours expressed their skill preparedness do much greater than those with fewer hours. Both groups stated they gained less preparedness in the areas of managerial and job search skills than in some of the other skill areas. Close to 40 percent of the employed stated they normally supervise other employees. Their average salary is approximately \$27,000. Most work at locations in the northwest suburbs or close to it.

The stopouts who took more coursework generally rated Harper services better than those with less coursework. The students with less coursework rated more of the services in the 'borderline' area, whereas, the others rated most items as 'average.' The stopouts rated courses by those most beneficial or least beneficial. It should be noted that those with more coursework gave much better ratings than those with less. They rated the coursework almost twice as beneficial as did with less coursework. Nearly two times the number of the stopouts with more credit hours took advantage of using academic services for educational plans than those with fewer hours. The most common reason for stopouts interrupting their schooling was they had taken all the courses they wanted. Other reasons were job demands and transferring to another school. One out of every two stopouts stated they would return to school within a year or at least planned to return in the future. It should be noted that one-third of the students currently enrolled are back at Harper. This ratio is similar to the '70s. During the early 80s fewer were returning to Harper when they returned to school.

Roughly 10 percent of the stopouts are currently full-time students. Another 15 percent are attending school as part-time students. The transfer students who took 16 or more credit hours had a higher percentage of their courses transfer than those with less credit hours. About 80 percent of the courses transferred for this group compared to only one-half of the courses for the last group. Both these groups reported earning a GPA average above three, higher than the GPA earned at Harper.

Nearly three-fourths of the stopouts with fewer credit hours worked over 30 hours while attending Harper. Only

50 percent of those earning more credit hours worked the same amount of hours. Most worked at jobs unrelated to the coursework they were taking at Harper. An overwhelming majority of these students did not participate in student activities or spent less than one hour a week socializing on campus. Over one-half of them did not study on campus.

Major Conclusions

The percentage (33 %) of stopouts who return to Harper has increased to the level that was attained in the '70s. The reason for these students to interrupt their education was they had completed all the courses they wanted to take while others transferred to other schools. Most held jobs they considered permanent and were satisfied with them.

The stopouts who took more coursework at Harper rated the services better than those who took fewer courses. In addition these students also rated the coursework more beneficial. Stopouts intend to return to school in the near future, despite the fact they reported taking all the courses they currently wanted.

One out of four stopouts are either attending school full time or part time. The GPAs they report are higher than those attained at Harper. The stopouts who took more coursework at Harper had a larger percentage of their classes transfer.

The stopouts with fewer credit hours generally worked more than 30 hours while attending Harper. Practically all stopouts spent very little time on campus socializing, participating in student activities or to study.

Fall 1991

Dear Former Student:

We are following many of the students who have left Harper before accumulating 48 credit hours. We would like to know what you are now doing and your evaluation of Harper College.

In order for Harper to properly evaluate itself and continue to improve quality of service to students, it is essential to have good information on students who have attended the College. We would appreciate a few minutes of your time to complete this survey. Any information you supply will be kept strictly confidential. The number on the survey identifies you to our personnel only. When we receive your completed survey, this number enables us to remove your name from the mailing list so you will not be bothered with our second mailing of the survey or a follow-up telephone call.

We greatly appreciate your response to this questionnaire. When you have completed the survey, please fold booklet with Harper College return address on the outside, staple or tape closed, and mail.

Very truly yours,

John A. Lucas

John A. Lucas, Director
 Office of Planning and
 Institutional Research

This number identifies you. When we receive your completed survey, we will remove your name from the mailing list so you will not be bothered with a second mailing of this survey or a follow-up telephone call.
