ABSTRACT

This document presents funding proposals from the Alabama Commission on Higher Education for 1993-94. A cover letter states that certain conditions should apply before the recommended improvements in the allocation of scarce education resources take place: that the distribution of funds between the broad sectors of education remain as in previous years; that after 3 years of proration and reduced funding all institutions receive inflationary relief before any differential funding is provided to any institution; that funds beyond the cost of living adjustment be distributed according to the Equity Increment Index, and that all institutions attain 100 percent of the Regional Standard funding at the same time. Individual sections cover the following: (1) the executive summary of the 1993-94 Unified Budget Recommendations; (2) a detailed presentation of the Higher Education Unified Budget Recommendations Programs for the 1991-92 and 1992-93 appropriations, 1993-94 requests, regional standards, and recommendations; (3) funding formulas and the recommendation process; (4) funding formula supporting data for senior institutions; (5) funding formula supporting data for two-year institutions; and (6) critical capital needs in Alabama public higher education. An appendix provides summaries of funding requests and recommendations of capital for Alabama Public Higher Education institutions. (JB)

ALABAMA COMMISSION ON HIGHER EDUCATION

UNIFIED BUDGET RECOMMENDATIONS  
FOR FISCAL YEAR 1993-94

December 1992

"..... The Commission shall receive, evaluate and coordinate budget requests for the public institutions of higher education of this State, shall hold open hearings on the budget requests of the separate institutions and shall present to each institution and to the governor and the legislature, a single unified budget report containing budget recommendations for separate appropriations to each of the institutions. The consolidated budget and analysis of the Commission shall be accompanied by the original requests and their justifications as submitted by each institution. The recommendations of the funding needs of each of the universities, as presented to it by the presidents, which assessment may include, but shall not be limited to, derived conclusions that may be based upon standard techniques of objective measurement, need and unit cost figures arrived at through the use of comparative and verified data secured from the various institutions, applied in an impartial and objective manner, and comparison shall be made not only between similar functions of institutions in Alabama but also between Alabama institutions and similar functions of institutions located in other states, provided that nothing herein shall be construed to prohibit any institutions of higher education in this state from submitting any matter pertaining to the financial operation and needs of said institution to the legislature or to the governor at any time....."

ACT 79-461 Section 9

Guy Hunt  
governor

# Alabama Commission on Higher Education

One Court Square, Suite 221

Borden Morrow, chairman  
Daphne

**TO: The Honorable Guy Hunt, Governor, State of Alabama  
Members of the Alabama Legislature**

Fred D. Lee, Jr., vice-chairman  
Florence

We are pleased to transmit herewith the recommendations for a Unified Higher Education Budget for Fiscal Year 1993-94.

Ben F. Beard  
Troy

These recommendations are designed to effect improvements in the allocation of scarce education resources. However, certain conditions should apply before such modifications are made:

Gaynell K. Dixon  
Montgomery

Charles F. Horton  
Tuscaloosa

- the distribution of funds between the broad sectors of education should remain as in previous years;

Jane H. McPherson  
Oneonta

- after three years of proration and reduced funding, all institutions should receive inflationary relief before any differential funding is provided to any institution;

Earlon C. McWhorter  
Anniston

- funds beyond the cost of living adjustment should be distributed according to the Equity Increment Index; and

Frank A. Nix  
Birmingham

- all institutions should attain 100 percent of the Regional Standard funding at the same time.

Cindy B. Paler  
Decatur

These recommendations are made as part of our lengthy review of higher education funding processes in Alabama. The very nature of funding public activities creates constant change and we are committed to continuing this review to ensure that Alabama's citizens receive a proper return for their investment in public education.

Richard A. Pizitz  
Birmingham

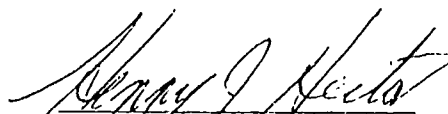

William L. Roberts, Jr.  
Mobile

We ask for your continued support in our efforts to bring an increased level of realism and accountability to public higher education finance. Only through concerted efforts will we successfully address the challenges that face us.

Charles R. Sillason  
Tuscaloosa

Henry J. Hector  
executive director

Respectfully submitted,

  
Henry J. Hector

SECTION A  
1993-94 UNIFIED BUDGET RECOMMENDATIONS  
by  
THE ALABAMA COMMISSION ON HIGHER EDUCATION

## 1993-94 Unified Budget Recommendation

By The Alabama Commission on Higher Education

As prescribed by ACT 79-461, Section 9, the Commission on Higher Education has evaluated the budgets submitted by the senior public institutions of higher education and by the Chancellor of the Junior, Community, and Postsecondary Vocational and Technical Education System at its meeting on December 7, 1992 and reached two sets of funding recommendations for all of higher education for fiscal year 1993-94.

The first recommendation (column 1 of the Executive Summary table, page A-7) is a statement of the Commission's estimate of the basic financial requirements necessary to support the institutions and their programs at the appropriately constructed Regional Standard. The second recommendation (identified as the Total 1993-94 Recommendation (column 7 of the Executive Summary table, page A-7) is predicated on availability of fifteen percent (15.0%) from the Alabama Special Education Trust Fund (ASETF).

This funding level of \$792,779,100, is constructed in two parts. First, all institutions should receive relief from several years of budget proration and reduction. The Base Index shown in column (4) on page A-7 will accomplish this. Secondly, additional Equity funds should be allocated on the basis of

remaining un-met needs of the institutions. The Equity Index (column 6 of page A-7) should be used only after all institutions receive recommended adjustments for inflation. This two-part recommendation anticipates that the traditional Alabama Higher Education share of the ASETF will continue.

The Commission approved this recommendation by unanimous vote of members present at the December 7, 1992 meeting. The Commission members believe that this document reflects the best compromise possible between documented needs, as outlined in the Regional Standard column and the anticipated level of available revenues.

This unified budget recommendation is based upon the following beliefs. First, all institutions should receive comparable relief in their base budgets. Second, the distribution of funds between higher education and the elementary/secondary systems will remain the same as in previous years. This means that higher education will receive one-third of the Alabama Special Education Trust Fund and K-12 will receive two-thirds. Third, funds available beyond the inflationary relief should be distributed in accordance with the Equity Index shown in column 6 of the Executive Summary table (page A-7).

The recommendation endorsed in this Commission on Higher Education Unified Budget Recommendation strives to continue a linkage to previous higher education budget agreements. By continuous recognition of relative un-met needs through use of the Equity Index, institutions can move toward the same proportion of regional standard funding.

#### Regional Standard Recommendations

The Regional Standard recommendations (see page A-13), historically designated the "Needs Budget", are based on the following:

(1) The institutional Regular Academic Programs, or "O&M", amounts are the products of the Commission's funding formulas for regular academic programs, at the level to achieve the average of the Southern Region states.

(2) The "O&M" amounts shown for the schools of Medicine, Dentistry, and Optometry at the University of Alabama at Birmingham, The University of Alabama, the University of Alabama in Huntsville, and the University of South Alabama are derived from the funding formulas used for a number of years to determine funding needs for these schools.

(3) The amount shown for the Auburn University First Professional Health (School of Veterinary Medicine "O&M") is, as in the past several years, the result of an algorithm that compares this activity with comparable programs in the other southern states.

(4) The category for the University of Alabama at Birmingham and the University of South Alabama hospitals' "O&M" has been replaced by an enhancement of the medical formula to provide for clinical education within Medical Centers.

(5) Facilities renewal needs are based on the Commission staff's formula for estimating facilities renewal allowances and backlogs.

(6) Research and Public Service "line items" have been carried forward from their fiscal year 1992-93 funding levels increased by a factor equal to the average increase of all teaching formula calculations over the respective 1992-93 funding levels.

(7) Capital Outlay Funds, while a continuing concern for higher education in Alabama, are not recommended for funding from normal revenue sources. The Commission continues to support special funding for the un-met Capital needs of the institutions. The

Commission's recommendation for Capital Outlay is included in a systematic statement of system needs in Section F of this document.

#### Modified Funding Recommendations

An historic difficulty in proposing a Unified Budget Recommendation for higher education in Alabama is the necessity to complete the recommendation process before firm projections are made of ASETF revenues. Once again, the Commission has struggled to provide a viable recommendation within the confines of ASETF revenues.

(1) Facilities Renewal, are included as a sum of the educational activities generating the need. Each institution's recommendation includes an allocation based on the Facilities Renewal formula applied to inventoried space. The Commission continues to endorse treatment of major capital needs for the several institutions via processes ancillary to the regular appropriations bill.

(2) Some statewide programs which benefit all of public higher education and all citizens of the State are recommended at above average increases. These include the Alabama National Guard Scholarship Program, the Experimental Program to Stimulate Cooperative Research (EPSCOR), the Eminent Scholars Program, and the Alabama Industrial Council on Engineering Education (AICEE).

### Special Circumstances of this Unified Budget Recommendation

It is important to note that this Unified Budget Recommendation represents continued movement toward balance between institutional needs, as reflected in the constructions of the regional standards, and the historic gap between that standard and actual appropriations. If Higher Education continues to receive its traditional share of revenues and if the political leadership continues to use this approach for distribution among institutions, continued convergence of relative needs and appropriations will occur.

The Commission believes that the distribution incorporated in this Unified Budget Recommendation is one of many required steps to improve higher education funding in Alabama.

Therefore, just as inequities have arisen from different treatment of institutions, so equity can only be reestablished by different treatment. As the following tables demonstrate, this Unified Budget Recommendation recommends different percentage increments for institutions. There is, in fact, a direct relationship between the Equity Increment Index recommended and how far below the Regional Standard is an institution's current appropriation. Inequities which remain will be lessened by each successive use of this approach.

- 1) Regional Standard defines that level of program funding required to achieve parity with regional averages. Includes effects of Title VI Remedial Decree Regular Academic Program requirements.
- 2) Excludes ASU-Miles Consortium, Alabama Shakespere Festival, Center for Disabilities and Learning Disorders, ADPE Operations and Bldg. & Equip. Rental, AIDT, and all employee benefits paid by the State of Alabama.
- 3) Equity Index based on the distribution of remaining deficits from the Regional Standard after current appropriation and cost of living adjustment (C.O.L.A.) are subtracted (Column (1) - Column (2) - Column (3)).

**SECTION C**  
**FUNDING FORMULAS**  
**AND UNIFIED BUDGET RECOMMENDATION PROCESS**

This section describes the various funding formulas used by the Alabama Commission on Higher Education in arriving at a statement of the level of funding required to achieve the appropriate Regional Standard for the institutional elements of the Higher Education Budget and the processes used in the construction of the Regional Standard for Alabama higher education funding.

## EXPLANATION OF FUNDING PROCESS FOR HIGHER EDUCATION

ACHE's recommendations for the funding of postsecondary education are based on several types of assessment:

- A set of formulas which relate funding needs for the regular academic programs of the senior and junior institutions to student credit hours, faculty productivity, and faculty salaries.

- Constructed formulas for the schools of medicine which relate funding needs to current uniform teaching procedures.

- Facilities Renewal Allowance is an estimation of the amount of money needed to provide for the aging of all building elements in a given year.

- Updated values for ongoing research and service activities and for other instructional activities which are not susceptible to "formula" determination, derived from earlier funding levels.

- Analysis of funding needs for new programs and major changes in existing programs based on estimated expenditures and revenues.

### Regular Academic Program Formula - Universities

The calculation of the Regular Academic Program multipliers are predicated in the estimated SREB regional General Studies average salary for doctoral and regional institutions. Each multiplier is determined from regional faculty salaries adjusted by an estimated departmental expense rate. The multiplier for the doctoral institutions used an assumed faculty productivity factor of 630 student credit hours (SCH) annually. The regional institutions multiplier used an assumed faculty productivity factor of 585 SCH. These productivity factors imply a General Studies faculty: student ratio of 1:26 for doctoral institutions and 1:24 for regional institutions.

The credit hour calculations were modified so that the Lower Division Credit Hours were calculated at 85% of existing undergraduate weights and Upper Division Credit Hours were calculated at 115% of current Undergraduate weights.

The computations for 1993-94, for the senior institutions, are shown on page C-5.

(2) The amounts calculated above are distributed to institutions according to a formula consisting of the sum of the following elements:

- (a) Weighting Factors,
- (b) other Cost Factors.

1993-94 Multipliers	Doctoral	Non-doctoral	All Colleges
Assumed Number of General Studies Students per class section	26.3	24.4	24.4
Credit Hours generated per General Studies section (Students X 3 SCH)	78.8	73.1	73.1
Credit hours per term (4 sections X hours per section) per General Studies Faculty	315.0	292.5	292.5
Credit hours per academic year per General Studies Faculty (2 terms X hours per term)	630.0	585.0	585.0
Base period data for General Studies			
Unweighted General Studies Credit hours produced	764,557	447,527	1,212,084
Number of General Studies faculty positions required (Hours / hours per academic year)	1,214	765	2,072
SREB average salary for General Studies faculty	42,100	36,800	\$40,100
Inflated to 1992-93 (times 1.042)	43,900	38,300	41,700
Inflated to 1993-94 (times 1.035)	45,400	39,600	43,200
Total Instructional Cost (Salaries X positions)	55,096,647	30,294,135	89,507,742
Weighted General Studies Credit hours at all instructional levels	812,435	445,591	1,258,026
Direct Salary Cost = Instructional Cost / Weighted Credit Hours	67.82	67.99	71.15
Departmental Operating Expenses (20 Percent of Salary Cost)	13.56	13.60	14.23
Multiplier = Total General Studies Cost Per Hour (Direct Salary + D.O.E.)	81.38	81.58	85.38

## Senior Institutions

1. **Instruction:** The three year average of actual on-campus weighted semester credit hours for 1989-90, 1990-91 and 1991-92 is applied to the instructional multiplier. The instructional multiplier is 81.38% for the doctoral institutions and 81.58% for all other senior institutions. Remedial credit hours receive an additional 100% increment.
2. **Academic Support:** 5% of the amount generated for instruction.
3. **Research:** 2% of combined amounts for instruction and academic support plus 5% of 1990-91 sponsored research.
4. **Public Service:** 2% of combined amounts for instruction and academic support.
5. **Library Support:** Actual on-campus unweighted semester credit hours (except military science) corresponding to the weighted credit hour value multiplied by the following cost factors:

Undergraduate	\$ 7.61
Graduate I (Masters)	15.29
Graduate II (Doctoral)	65.46
Law	40.38

6. **General Administration and Student Services (GA/SS):** For institutions with total approved campus headcount enrollment of less than 4,000:

1,000 or fewer	\$678,310.00
1,001 to 2,500	342.60
2,501 to 3,999	233.17

For institutions with total approved campus headcount enrollment of 4,000 or greater:

First 4,000	\$385.63
4,001 to 8,000	288.81
Over 8,000	259.76

The GA/SS amount is computed based on total approved campus headcount, then distributed proportionately among the GA/SS components of the formula funded lines of the institution.

Example: Total Approved Campus Headcount	4,000
Main-Campus Headcount	3,800
Approved Branch Campus Headcount	200

Total GA/SS = 4,000 x 385.63 = \$1,542,520.

Main-Campus:  $\frac{3,800}{4,000} \times 1,542,520 = \$1,465,394$

Approved Branch Campus:  $\frac{200}{4,000} \times 1,542,520 = \$77,126$

7. **Maintenance of Physical Plant and Custodial Services:** Gross square feet as of June 30, 1992, multiplied by \$3.90.
8. **General Institutional support:** 14% of total amount generated in items 1-7.
9. **Utilities:** The highest annual consumption rate per gross square foot of E & G floor area for the last three years (July-June, 1989-90, 1990-91, 1991-92) for heat energy and electrical energy were multiplied by projected rates per energy units for 1993-94. The "other" utilities input (water, sewage, and solid waste disposal) was calculated by multiplying the actual rate of consumption per gross square foot of E & G floor area for 1991-92 by a projected rate per energy unit for 1993-94. The projected escalation factor for heating fuel, electricity and other utilities are the same as the inflation factors that were used throughout the calculation of the RAP (1.042 and 1.035). The sum of the projected amounts per gross square foot was then multiplied by the gross E & G floor area as of June 30, 1992.
10. **Tuition Adjustment:** A weighted average credit hour charge was calculated, using Fall 1992 tuition and required fees and three-year average unweighted credit hours. Ninety percent (90%) of that rate multiplied by the three year average of unweighted credit hours (excluding Military Science) is the tuition deduction for all institutions except Alabama A&M University and Alabama State University. For thoes institutions, ninety percent (90%) of their actual weighted credit hour charge is used for the tuition deduction.

For the 1993-94 formula, the weighted per-credit-hour tuition deductions are:

General	\$54.67
Alabama A&M University	50.04
Alabama State University	48.54

Junior & Community College Funding Needs  
Alabama Public Institutions  
Fiscal Year 1993-94

The method used in developing funding needs at the southern region average for the junior colleges is similar to that used for the senior institutions. The average funding rate per FTE student in the seven southern states in which junior colleges receive minimal local support (as in the case in Alabama) is calculated. This rate is multiplied by the Alabama Junior college FTE enrollment to produce a total which approximates the amount Alabama institutions would receive if they were funded at the average of the seven southern states. This amount is modified to reflect Teacher's Retirement, Social Security, and inflation.

STATE	APPROPRIATIONS	FTE ENROLL	\$/FTE	Ranking

Funding Needs - Technical Colleges Funding Needs  
Alabama Public Institutions  
Fiscal Year 1993-94

Total Funding needs for the Alabama technical colleges are estimated by calculating the average salary (12 months) for technical college faculty, applying standard student:faculty ratio (15:1) and standard contact hours per year (1,296) to determine instructional salary expense per student contact hours (SCH), and multiplying this rate by the total student contact hours for the latest year.

AVERAGE FACULTY SALARY 1990-91	43,950

## Constructed Formulas for First Professional Health

The "constructed" formulas used for estimating funding needs of the medical schools were derived by a consultant who worked with the staffs of the medical schools and the ACHE staff. These formulas calculate needs by determining required instructional staffing on the basis of enrollment, computing total salary requirements on the basis of regional salary averages, and estimating other expenditures from past experience in Alabama.

The formulas discretely express the resource needs of the three separate, and quite different, levels in medical education, i.e.;

1. Basic Medical Sciences (B.S.), the first two years of undergraduate medical school;
2. Clinical Sciences (C.S.), the second two years of undergraduate medical school which lead to the award of the M.D. degree;
3. Residency (Res.), the initial graduate medical education which qualifies a new M.D. for practice.

The formulas assert that the resource needs of each of these three levels can be described by four factors, i.e.;

1. The student load, the average enrollment at each level;
2. The cost per faculty contact hour with students. This factor recognizes that faculty have responsibilities other than teaching students. The cost is derived from the salary paid and its' allocation to the various responsibilities held;
3. Faculty contact hours per student, the hours a student is in contact with teaching faculty;
4. Other cost factor: The three factors immediately above describe only the resource needs of direct instruction. The other cost factor expresses the percentage that direct instructional costs are of total costs.

The formula to derive total resource needs for any level of medical education is: Student Load (SL) times Dollars per Faculty Contact Hour (\$/FCH) times Faculty Contact Hours per Student (FCH) divided by the Other Cost Factor (OCF) equals Resource Needs, i.e.,

$$\text{Total Resource Needs} = \frac{\text{SL} \times \$/\text{FCH} \times \text{FCH}}{\text{OCF}}$$

While the formula described seeks to identify the total resource needs of medical education, the formula adopted does not assume that all of these resource needs can or should be met by state appropriations. Rather, we explicitly assert that the state meet only a portion of these needs. The balance of the need is expected to be met by tuition, volunteer faculty, and other sources of income. For this reason, the product of the formula is multiplied by a state support factor, the percentage of the total to be met by the state, to derive an appropriations recommendation.

The procedures used for UAB's School of Dentistry and School of Optometry are identical to those used in previous years: a recommended level of support per student was multiplied by projected 1993-94 enrollments and reduced by tuition and SREB contract revenues to yield the recommended appropriations.

The enrollment data and funding factors used to develop recommendations for Dentistry and Optometry are presented after the medical formula values.

The category for the UAB and USA hospitals' "O&M" has been replaced by an enhancement of the medical formula to provide for clinical education within Medical Centers.

MEDICAL SCHOOLS

1993-94 FORMULA

1. Dollars Per Faculty Contact Hour (3.5% inflation for 1993-94.)

1991-92	71.38
1992-93	74.52
1993-94	77.27

2. Cost Per Student:

Level	\$/FCH	FCH/STU	Fac. Cost	OCF	Total Cost/STU
Basic Sciences	\$77.27	100	\$7,727	0.4	\$19,319
Clinical Sciences	\$77.27	500	\$38,637	0.4	\$96,593
Residency	\$77.27	1,600	\$123,639	0.4	\$309,098

1. Basic Sciences: cost for years 1 and 2.
2. Clinical Sciences: cost for years 3 and 4.
3. Residency: cost for 4 years, average residency length.

STATE FINANCIAL SUPPORT OF THE AUBURN UNIVERSITY

COLLEGE OF VETERINARY MEDICINE

The construct establishes a mean faculty/student ratio (for DVM students) and a mean faculty salary level for the southeastern state colleges of veterinary medicine. On the basis of data obtained by a telephone survey, a mean benefit factor is calculated and applied to faculty salaries. From reported and estimated data total expenditures are determined and the ratio of total expenditures are determined and the ratio of total expenditures to faculty compensation calculated.

A constructed funding level for 1990-91 for Auburn's DVM enrollment (350) was calculated by applying the derived faculty/student ratio, faculty salary and benefit factor, and "other cost" factor to this enrollment level (\$18,827,260). This amount was adjusted downward to compensate for the external funding of retirement and social security contributions and for Auburn's tuition and teaching contract revenues, producing a net support value for 1990-91 of \$15,191,066. This value was escalated according to the latest C.P.I. factors - (1.042 and 1.035) to 1993-94 level, \$17,267,796.

STATE FINANCIAL SUPPORT FOR  
AGRICULTURAL EXPERIMENT STATIONS  
AND  
COOPERATIVE EXTENSION SERVICES

The algorithm simply utilizes the average ratio of state to federal funding over a three year period to arrive at a target funding level for the Alabama AES/CES programs. This approach only requires acceptance of the perceived value of such activities as reflected in federal and state funding levels in southeastern states. As the average ratio of federal to state funding varies, the target funding level for Alabama will be adjusted according to the average response in the comparison states.

Note: Federal funds are those formula-funded programs known as Hatch, McIntire-Stennis and Smith-Lever. These funds are distributed via a combination of equal distributions and formula distributions based upon rural and farm population distributions among states. The states of Florida and Tennessee are excluded as 'extreme values'.

## Facilities Renewal Requirements

### Basis of Estimates

In its Unified Budget Recommendations for the last eight budget years, the Alabama Commission on Higher Education included funding, to be provided from nonrecurring revenues, for the renewal of facilities. The amount recommended for each institution is an estimate of the amount of money needed to provide for the aging of all building elements in a given year.

The method used by the Commission staff to estimate facilities renewal needs is not as precise as a carefully prepared engineering estimate based on detailed facilities inspections. However, until each institution has thoroughly documented its entire requirement for repair and renovation a detailed engineering estimate cannot be prepared, and the process followed by the staff provides a consistent and realistic estimate of needs. This method of estimating facilities renewal needs is being adopted by a number of states and institutions. The Alabama formula, known nationally as the "Cushing Phillips Formula," is one of three formulas recommended by a national joint commission formed to study facilities renewal. This commission is composed of members of the Association of Physical Plant Administrators, the Society for College and University Planning and the National Association of College and University Business Officers.

The rationale behind the process is as follows:

- (1) The incidence of major repair and the need for general renovation of a building increase with its age and the relationship is generally skewed toward the older, unrenovated facilities.
- (2) Different elements of a building wear out or become obsolete at different ages. For example, foundations and principal elements of the superstructure are essentially permanent. Exterior walls, plumbing and lighting have expected life of 40 to 50 years. Roofs and air conditioning should last 20 to 25 years. Interior surfaces require reworking in 10 years or less.
- (3) Different types of buildings, even though constructed to similar standards of quality and of similar materials, are comprised of different combinations ("mixes") of elements, and the cost of replacing or renovating each type depends on the mix and the cost per square foot of each element.
- (4) The "renewal allowance" of a building is defined as the amount which should be budgeted in any year to provide for the aging of all elements of that building. The "renewal backlog" of a building is defined as the summation of all the years' renewal allowances to date, for that building, from its initial

completion (or latest complete renovation) and is a measure of the total amount which should be spent to bring the building to essentially new condition. The renewal allowances and backlogs are estimated by multiplying the sums of maximum renewal costs for each 25-year and 50-year element by factors reflecting the age of the building elements.

Attachment 1 summarizes maximum renewal costs, at 1992 construction cost levels, for 50-year and 25-year elements, for different types of college and university buildings, derived from the 1992 Means Square Foot Costs. These construction costs were then adjusted using a regional cost factor of .835. Elements normally requiring reworking or replacement in less than 20 to 25 years (e.g. wall finishes) are not included in renewal costs, on the basis that these elements are dealt with in the course of regular maintenance.

#### Procedure for Calculating Renewal Allowances and Backlogs

Renewal Allowances and Renewal Backlogs are calculated as follows:

(1) Calculate the current replacement value of each 50-year and 25-year element of each major campus building according to Attachment 1 and determine the Maximum Renewal Allowance for each facility as follows:

(a) 50-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of 50-year elements.

(b) 25-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of the 25-year elements.

(2) Calculate the "adjusted age" of the 50-year and 25-year elements for each building that has undergone renovation since its construction (up to 50 and 25 years respectively), as follows:

(a) 50-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated (i.e. one minus the proportion renovated) by the age of the building up to and including 50 years. The sum of the two (or more) products equals the adjusted age of the 50-year elements.

(b) 25-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated by the age of the building, up to and including 25 years. The sum of the two (or more) products equals the adjusted age of the 25-year elements.

(3) Calculate the current year Renewal Allowance for each facility as follows:

(a) 50-year Elements - Divide the building age (actual or adjusted), up to and including 50 years, by 1,275 (the sum of the years digits from 1 to 50). Multiply the quotient by the Maximum Renewal Allowance for 50-year elements and this product by the gross building area.

(b) 25-year Elements - Divide the building age (actual or adjusted), up to and including 25 years, by 325 (the sum of the years digits from 1 to 25). Multiply the quotient by the Maximum Renewal Allowance for 25-year elements and this product by the gross building area.

(c) Add products (a) and (b).

(4) Calculate a 50-year element renewal factor and a 25-year renewal factor for each facility as follows.

(a) 50-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 50 years) and divide by 1,275.

$$F_{50} = \frac{1 + 2 + 3 + \text{-----} + \text{Current Age}}{1 + 2 + 3 + \text{-----} + 49 + 50}$$

(b) 25-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 25 years) and divide by 325.

$$F_{25} = \frac{1 + 2 + 3 + \text{-----} + \text{Current Age}}{1 + 2 + 3 + \text{-----} + 24 + 25}$$

(5) Calculate the Renewal Backlog for each building as follows:  
 Renewal Backlog = (50-year renewal factor) x (50-year Maximum Renewal Allowance) + (25-year renewal factor) x (25-year Maximum Renewal Allowance).

(6) Sum the calculated current year Renewal Allowances and Renewal Backlogs for all campus facilities broken down by funding category (e.g. E&G, Auxiliary, Health Professions, etc.). The sum of the Renewal Backlogs represents current total renovation backlog. The sum of the current year Renewal Allowances will be the amount which should be appropriated for facility renewal for the current year.

Attachment 2 summarizes Renewal Allowances and Renewal Backlogs for all Alabama public postsecondary institutions of higher education, based on the Fall 1990 Facility Inventory and 1992 construction cost data.

## SECTION D

### DATA ELEMENTS SUPPORTING THE FUNDING FORMULAS SENIOR PUBLIC INSTITUTIONS

This section presents the basic data elements and those derived statistics which are inputs to the formulas used by the Commission on Higher Education in determining the Regional Standards for funding of Alabama public senior institutions of higher education.

**SECTION F**  
**CRITICAL CAPITAL FUNDING NEEDS**  
**ALABAMA PUBLIC HIGHER EDUCATION**

This section presents the Commission on Higher Education's summary of the accumulated backlog of critical capital needs arising from the effects of age, methods and materials of construction, and other factors impacting on the continued usefulness of existing physical plant facilities at the public institutions of higher education in Alabama.

## Critical Capital Needs of Alabama

### Public Higher Education

As prescribed by Act 79-461, Section 16-5-2(c), "...the Commission shall serve in an advisory capacity to the legislature and the governor of this state in respect to all matters pertaining to state funds for the operation and the allocation of funds for capital improvements of state supported institutions of higher educations."

Alabama's appropriations for capital programs have been sporadic since the period of rapid expansion in the 1960's. Lacking cyclical procedures for evaluating or funding capital needs, the state has initiated capital appropriations, normally from new bond revenues, only when external events made such a move politically desirable.

This year, the Commission staff has received capital requests totaling over 735 million dollars. Directly following this narrative, there are three appendices which describe the institutional requests, the Commission's recommendation and a statement of critical capital needs. A summary of all three can be found in Table 1. Table 1, Part A is a recapitulation of all the institutional requests. Table 1, Part B is the Commission's funding recommendation. This recommendation includes the facilities renewal formula at 100% of the calculated backlog for Non-Specialized Education and General (E&G) Space, one-half of the modification/alteration/renovation projects, one-half of all utilities and campus-wide projects, and omits all requests for land acquisition. It also excludes all new construction projects. Table 1, Part C is titled Critical Capital Needs. This recommendation includes one-half of the facilities renewal formula backlog, one-third of the modification/alteration/renovation requests, one-half of the utilities/campus-wide projects and omits all requests for land acquisition.

Total capital appropriations for higher education from 1978 to 1991 amount to \$260 million dollars. Most of this amount has been spent for new facilities, rather than renovating existing facilities causing the backlog of deferred maintenance needs to grow rapidly. The current estimated cost for eliminating this backlog (Non-Specialized E&G Space only) amounts to \$335.9 million for the senior institutions and the Marine Environmental Science Consortium, \$116.6 million for the two-year colleges, for a total of \$452.5 million.

In addition to the deferred maintenance backlog, \$27.8 million is needed for repair, renovation, and replacement of utility generation and distribution systems, pavements, and other general campus facilities. (Note that in order to highlight the deferred maintenance problem, this recommendation excludes all new construction projects.) The institutions also have valid

requirements for the modification/alteration/renovation of existing facilities amounting to \$105.6 million for the senior institutions and \$4.5 million for the two-year colleges. The total recommended amount is \$590.4 million (See Table 1, Part B).

The Commission staff has reviewed the capital program proposals of all the institutions at length and visited a high proportion of the campuses. The staff has developed an estimate of critical capital needs by applying well-established facilities planning standards, state and national codes, and other professional criteria to campus facilities and enrollment data. (Note that the figures for facilities renewal amount to only one-third of the total estimated renewal backlog.)

The total for these critical needs estimates are \$96.8 million for the senior institutions and the Marine Environmental Science Consortium, \$62.6 million for the two-year colleges, or \$159.4 million for all public postsecondary campuses (see Table 1, Part C).

The purposes in presenting this estimate are, first, to insure that the magnitude of capital needs are recognized, and second, to make a case for placing these needs in line for regular funding.
