TITLE Annual Full-Time Equivalent Enrollment and Student Semester Credit Hour Production in Arkansas State Institutions of Higher Education, 1988-89.

INSTITUTION Arkansas State Dept. of Higher Education, Little Rock.

PUB DATE Jan 90

NOTE 63p.; For 1987-88, 1990-92 reports, see HE 027 124-127.

PUB TYPE Statistical Data (110)

EDRS PRICE MF01/PC03 Plus Postage.

DESCRIPTORS Basic Skills; College Students; *Credits; Engineering Education; Enrollment; Enrollment Rate; Enrollment Trends; *Full Time Equivalency; Higher Education; Intellectual Disciplines; Language Enrollment; Majors (Students); Remedial Instruction; Second Language Learning; State Colleges; Tables (Data); Teacher Education; Two Year Colleges

IDENTIFIERS *Arkansas

ABSTRACT

This publication reports full-time equivalent (FTE) enrollment and student semester credit hour (SSCH) production in Arkansas' state higher education institutions for 1988-89 in 9 figures and 29 tables. Data on FTE enrollment show it rose 3.9 percent over the previous year, the third consecutive increase in FTE enrollment with most of the change occurring at the undergraduate level. SSCH production at state universities was 1,769,630 in 1988-89, its highest number since 1985-86 with increases in communication, education, foreign languages, multidisciplinary and interdisciplinary studies, psychology, protective services, and social sciences. The report includes tables showing SSCH by discipline from 1984-85 through 1988-89 at public four- and two-year institutions. Another section shows SSCH production by occupational codes at two-year and four-year institutions and from 1984-85 to 1988-89. The report also includes data briefs analyzing trends in selected disciplines. including basic skills or remedial education (for which there are new state mandates), education, engineering, and foreign languages. Appendices provide institutional SSCH production tables and institutional names and abbreviations. (JB)

IN ARKANSAS STATE INSTITUTIONS OF HIGHER EDUCATION, 1988-89**

Full-Time Equivalent Enrollment

Full-time equivalent enrollment (FTE) for 1988-89 rose 3.9% over the previous year, the third consecutive increase in FTE enrollment. The 59,775 total FTE is over two thousand FTE students higher than the total for 1987-88. This positive change is due to continued growth at the undergraduate level, with FTE rising by 9.9% since 1985-86 and 4.9% since 1987-88. The accompanying graph illustrates these changes.

At the public four-year universities, the FTE has reached its highest point in five years. FTE has risen by 2,034 since 1984-85, representing a 4.3% increase. The public two-year institutions have also experienced a five year peak in FTE, rising by 27.1% since 1984-85 and 1,087 over the 1987-88 FTE total. Tables 1 and 2 display FTE enrollment since 1984-85 for each public institution and Table 3 provides a grand total; FTE is derived from the student semester credit hours reported in Tables 4 through 6. Figure 1 illustrates SSCH production by level of study for the state's public institutions of higher education in 1988-89.

SSCH Production by Discipline

SSCH generation at Arkansas public higher education institutions, at 1,769,630 in 1988-89, reached its highest number since 1985-86. At the public four-year universities, steady increases over the past four years have occurred in Communications (09), Education (13), Foreign Languages (16), Multi/Interdisciplinary Studies (30), Psychology (42), Protective Services (43), and Social Sciences (45). Decreases in SSCH production have occurred in Agricultural Sciences (02), Architecture and Environmental Design (04), Computer and Information Science (11), and Engineering (14). See Table 7 for details of these changes.

The public two-year institutions have experienced many increases in SSCH generation. For example, SSCH in Basic Skills has almost doubled since 1984-85 and currently accounts for 11.49% of all SSCH produced at the two-year level. Other disciplines that have risen in SSCH production are Business and Office (07), Liberal/General Studies (24), Mathematics (27), Philosophy and Religion (38), Psychology (42), Social Sciences (45), and Transportation and Materials Moving (49). Table 8 provides this data for the past five years.

A list of the ten programs with the largest SSCH production since 1983-84 is shown in Table 9. An analysis of SSCH production in selected disciplines follows Table 9.

SSCH IN OCCUPATIONAL CODES

SSCH IN OCCUPATIONAL CODES

ADHE and the Arkansas Division of Vocational and Technical Education have designated lower level SSCH in the following twelve 2-digit CIP codes and one specific 4-digit category as occupational:

- 07 Business and Office
- 08 Marketing and Distribution
- 10 Communication Technologies
- 12 Consumer, Personal, and Miscellaneous Services
- 15 Engineering and Engineering-related Technologies
- 17 Allied Health
- 18.11 Nursing
- 20 Vocational Home Economics
- 41 Science Technologies
- 43 Protective Services
- 46 Construction Trades
- 47 Mechanics and Repairers
- 48 Precision Production

At the four-year universities, SSCH in occupational programs, at 39,491, has experienced a small decrease in 1988-89 after reaching a four-year peak of 39,767 in 1987-88. Most occupational programs at the four-year institutions declined over the last year; however, Allied Health (17), Nursing (18.11), and Protective Services (43) increased in SSCH production. The overall percentage of SSCH in occupational programs, at 4.4%, is at its lowest point since 1981-82. See Table 11 for four-year institutional totals and Table 12 for a summary of occupational SSCH production since 1986-87.

SSCH in occupational programs at the two-year institutions reached 82,363 in 1988-89. While this represents a five-year high in the actual number of SSCH production, it also represents a decline in the percentage of SSCH in occupational programs in relation to total SSCH. For example, in 1984-85, total occupational SSCH was 80,949, which was 34.1% of total SSCH. In 1988-89, SSCH in occupational programs reached 82,363; however, this figure only represented 27.3% of the total SSCH at the two-year institutions. Therefore, this increase most likely reflects the overall growth in SSCH at the two-year level and continues to suggest that a larger percentage of students are enrolling in transfer programs. See Table 10 for two-year institutional totals.

DATA BRIEFS IN SELECTED DISCIPLINES

SSCH IN BASIC SKILLS

In the regular session of the 1987 General Assembly, legislation was passed to require that all first-time freshmen admitted to enroll at any Arkansas public college or university be tested to determine the need for remediation before enrollment in college-level math and English courses. Act 1052 directed the State Board of Higher Education (SBHE) to establish the procedures, tests, and minimum scores needed to implement this law. At a November 13, 1987, special meeting, the State Board adopted freshman placement standards, after obtaining detailed information from each institution about present and projected SSCH in remedial education and cost estimates to implement the placement standards.

Implementation of the freshman placement standards in mathematics, English composition, and reading took place in Fall 1988. As anticipated, large increases occurred in all three subject areas, with mathematics realizing the most substantial gain. A report released by the Department of Higher Education in early 1989 showed that over 47% of all first-time-entering freshmen enrolled in Arkansas institutions of higher education needed math remediation as a result of Act 1052. It is believed that basic skills SSCH will increase during the 1989-90 academic year because higher placement standards will be in effect.

As mentioned on the previous page, basic skills SSCH in mathematics, at 60,762, has experienced the sharpest increase over the last year, doubling the 1987-88 total and almost quadrupling the 1985-86 total. The two-year institutions have accounted for the largest percentage growth, rising from 12,222 SSCH in 1987-88 to 26,671 SSCH in 1988-89.

English composition SSCH, at 18,190, peaked in 1988-89, representing a 30.8% increase over 1985-86. Although the four-year institutions experienced a downward trend from 1985-86 to 1987-88, an upward trend is likely to take place from 1988-89-forward due to the placement standards.

Despite a small decline in the reading area for the 1987-88 academic year, in 1988-89, remedial SSCH rose 36.7% over 1986-87. One reason for the surge in basic skills reading SSCH is that the placement standard for reading is the ACT Composite, which includes the ACT mathematics score as one component.

Overall, total remedial SSCH is up by 73.3% since 1987-88. Although remedial SSCH is expected to rise over the next few years, it is hoped that the implementation of college preparatory core curriculum courses by the state high schools will have a positive effect in reducing the amount of remedial courses being taught in college.

SSCH IN EDUCATION

Undergraduate education SSCH, at 161,978, reached its highest number since 1980-81. Although this discipline experienced a downward trend in the early 80's, it has gradually taken an upturn since 1984-85, increasing by 7.6%. At the four-year institutions, undergraduate education SSCH has risen by 6.7% since 1984-85; however, as a percentage of total undergraduate SSCH, it has remained at 11.1% or 11.2%. The two-year institution's education SSCH has held between 4.5% and 4.9% of total SSCH since 1984-85, while increasing by 36.1% over 1984-85. Overall, undergraduate education SSCH generated the second largest SSCH total at the four-year level and the seventh largest at the two-year level.

Over the past five years, graduate education SSCH has steadily risen to 38.6% of total graduate SSCH. Although a small decline in the number of SSCH occurred from 1985-86 to 1987-88, an upturn was realized in the academic year of 1988-89. At 42,013, graduate education SSCH has increased by 6.1% since 1984-85. Education continues to generate the highest number and percentage of graduate SSCH.

SSCH IN ENGINEERING

Arkansas has experienced a substantial decline in engineering enrollment over the last six years. In 1988-89, 33,426 SSCH were produced in engineering, whereas in 1983-84, engineering programs generated 41,399 SSCH. This constitutes a 19.3% reduction and is entirely consistent with national patterns of declining enrollment in engineering, according to the National Center for Education Statistics (NCES).

TABLE 16. ENGINEERING SSCH, 1985-86 THROUGH 1988-89

	1985-86	1986-87	1987-88	1988-89
State Four-Year				
Lower	11,708	12,213	11,417	11,438
Upper	20,495	18,840	19,203	18,223
Grad.	3,535	3,588	3,207	3,349
SUBTOTAL	35,738	34,641	33,827	33,010
State Two-Year				
Lower	326	325	604	416
TOTAL	36,064	34,966	34,431	33,426

Likewise, bachelor's degrees in engineering have also declined, both nationally and statewide. The most recent national data available from NCES show a 2% decline from 1984-85 to 1985-86, and Arkansas showed a 5% reduction for the same time period. In 1987-88, Arkansas conferred 286 bachelor's degrees in engineering, representing a 20.8% decrease since 1983-84. As the enrollment in this discipline continues to decline, it is likely that the number of graduates will also decline.

SSCH IN FOREIGN LANGUAGES

The economies of Arkansas and the United States are closely related to the international economic situation. The standard of living and the quality of life in Arkansas are becoming increasingly dependent on how the products and people of our state fare in the world marketplace. To meet this challenge successfully requires an understanding of the cultures and business practices around the globe.

One obvious aspect of knowing how other countries operate is exposure to their language and culture. This section addresses recent trends in foreign language study by students of Arkansas public higher education, with the conclusion that our students are constantly increasing their study of the foreign languages.

TABLE 17. SSCH IN FOREIGN LANGUAGES FOR PUBLIC FOUR-YEAR AND TWO-YEAR INSTITUTIONS, 1985-86 THROUGH 1988-89

	1985-86	1986-87	1987-88	1988-89

State Four-Year				
Lower	19,352	19,396	19,536	21,149
Upper	1,919	2,439	2,244	2,501
Grad.	589	803	1,024	891

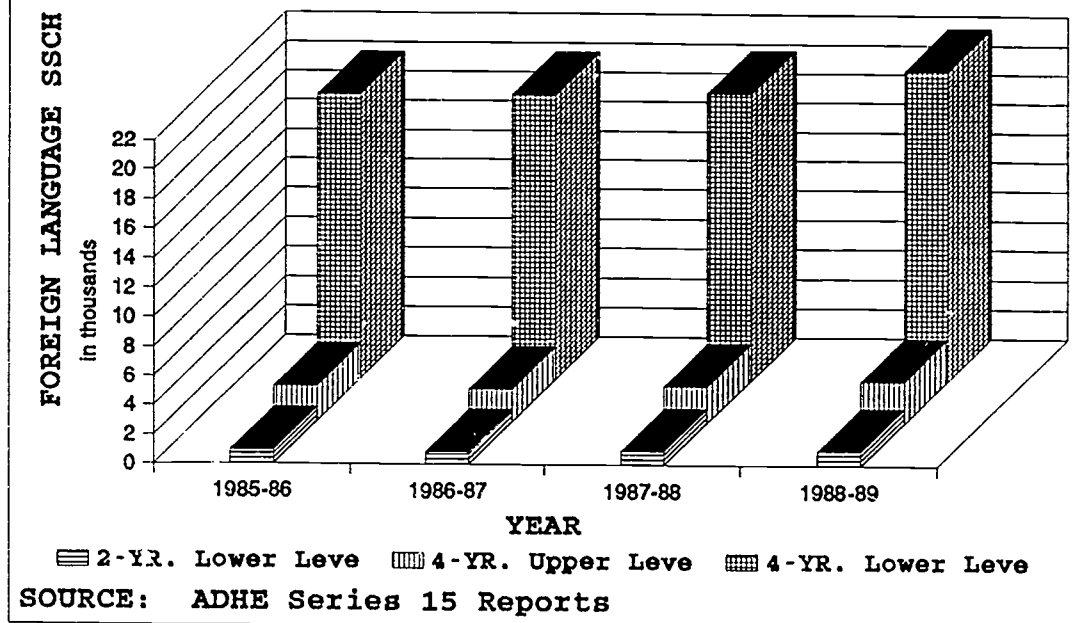

SUBTOTAL	22,380	23,310	24,027	25,953
=====				
State Two-Year				
Lower	942	867	966	996

TOTAL	23,322	23,310	24,027	25,953
=====				

According to Table 17, SSCH in foreign languages has steadily increased since 1985-86, with the exception of a minor drop in 1986-87. The four-year institutions have experienced constant increases in lower division SSCH since 1985-86, rising by 9.3%. While graduate level SSCH in foreign languages education had been rising since 1985-86, in 1988-89, a 13.0% reduction took place over the 1987-88 total. Overall, total foreign languages SSCH has increased by 11.3% over the last four years.

In the past, it was assumed that the upturn in foreign language SSCH was due only to the requirement of these courses for most degree programs. This still holds true to an extent, but it is also apparent that more Arkansas students are choosing foreign languages as a degree. The state of Arkansas conferred 46 degrees in foreign languages in 1987-88, doubling the number that were produced in 1983-84. With the continuous increase in upper level foreign language courses, it is evident that more students recognize the importance of advanced knowledge in foreign languages. With this in mind, both the number of SSCH and degrees granted should continue to rise.
